We believe that the bill is a responsible and balanced piece of legislation. There has always been concern among our independent telephone companies, the Bell System companies and your own staff that the many recent advances in technology be made available to all Americans. This bill addresses that concern in one very useful way. Pay telephones and a very limited number of other telephones (described as "essential telephones") can become compatible with hearing aids at minimal cost. The benefits are significant and the financial and regulatory costs are low. Once again, we appreciate your work and that of the other members of the Senate Commerce Committee in initiating and completing action on this bill.

Very truly yours,

MARTIN T. MCCUE.

Mr. STEVENS. Mr. President, I move that the Senate concur in the House amendments with a further Senate amendment which I send to the desk on behalf of Senator Packwood.

## UP AMENDMENT 1534

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Alaska (Mr. Stevens), on behalf of Mr. Packwood, proposes an unprinted amendment numbered 1534.

Mr. STEVENS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with. The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the bill, add the following new sections:

SEC. . Subparagraph (B) of paragraph (2) of section 1225(a) of the Public Broadcasting Amendments Act of 1981 is amended to read as follows:

"(B) Notwithstanding the provisions of subsection (c) of section 396 of the Communications Act of 1934, in the case of the offices of director the terms of which expired March 1982, persons appointed to fill two of such vacancies existing as of December 13, 1982, shall be appointed for terms which shall expire on March 1, 1984 and shall not be representative of the political party having a majority of the directors of the Board on December 13, 1982. Persons appointed for a term beginning March 1, 1984, to fill the vacancies occurring in such offices the terms of which, by reason of the preceding sentence, expire on March 1, 1984, shall not be filled by persons representing the political party having a majority of the directors of the Board on March 1, 1984. Persons appointed on or after March 1, 1984, to fill vacancies in the two such offices shall be appointed for terms of five years. On March 1. 1984, there are abolished those five offices of director the terms of which, without application of the preceding provisions of this paragraph, expire on such date. In administering the provisions of this paragraph a director is a minority member of the Board if he is not a member of the political party to which the majority of the directors of the Board are members.'

SEC. . The Communications Satellite Act of 1962, as amended (47 U.S.C. 701 et seq.), is amended by deleting the second sentence of section 304(b)(2) of such Act.

The motion to concur in the House amendments with the Senate amendment (UP No. 1534) was agreed to.

## FLORIDA INDIAN LAND CLAIMS SETTLEMENT ACT

Mr. STEVENS. Mr. President, I ask unanimous consent that the Committee on Indian Affairs be discharged from further consideration of H.R. 7155, the Florida Indian Land Claims Settlement Act of 1982, and I ask for its immediate consideration.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

The bill will be stated by title.

The legislative clerk read as follows: A bill (H.R. 7155) to settle certain Indian land claims within the State of Florida, and for other purposes.

The Senate proceeded to consider the bill.

Mr. COHEN. Mr. President, I rise in support of H.R. 7155 and urge that the Senate act favorably upon this measure. H.R. 7155 was introduced in the House by Congressman Fascell of Florida in September 1982. A companion bill, S. 2893, was introduced in the Senate by Senator Chiles for himself and Senator Hawkins on September 10, 1982, and was referred to the Select Committee on Indian Affairs.

H.R. 7155 was reported out of the House Committee on Interior and Insular Affairs without benefit of a hearing. It was acted upon by the full House on December 6 without opposition. On December 7, the Select Committee on Indian Affairs held hearings on H.R. 7155 and received testimony from witnesses from the Department of the Interior, the State of Florida, and the Miccosukee Tribe. The legislation was supported by all of the parties and has the support of the Florida congressional delegation.

Mr. President, H.R. 7155 is the culmination of many years of hard negotiation between the State of Florida and the Miccosukee Tribe. It resolves a substantial claim of the tribe against the State of Florida for the flooding by the State of a major portion of the tribe's State-recognized reservation, as a result of a public works project to control flooding and store water in the Everglades. it also resolves a claim for the loss or taking of the Miccosukee's rights in a 5-million-acre Executive order reservation in the southern part of the State which the tribe contends was set aside by order of President Tyler in 1839. The State has never conceded that such reservation was established.

In major outline, the agreement provides for settlement funds from the State for Florida to the tribe in the amount of \$975,000; the Miccosukee State Indian Reservation and three parcels of land along the Tamiami Trail will be taken into trust by the Secretary of the Interior; and a perpetual lease to approximately 189,000 acres of Everglades land will be granted by the State. These lands will remain available for use by hunters and fishermen with some restrictions.

The "State reservation" lands will become a Federal Indian reservation. The "lease lands will be treated as a Federal reservation for purposes of eligibility for Federal programs. The State of Florida has assumed jurisdiction over the tribes in that State under the provisions of Public Law 83-280. This jurisdictional scheme is continued in effect under the provisions of section 7 and 8(b) of H.R. 7155.

At the hearing before the Select Committee on Indian Affairs on December 7, the administration recommended three technical amendments relating to time limitation for payment of funds to the tribe by the State of Florida, clarification with respect to the fund from which payment is to be made, and clarification of the status of lands to be taken into trust by the Secretary.

I would note that the Florida State Legislature has already appropriated the necessary settlement funds and payment can be made immediately. For this reason the first two technical amendments appear unnecessary. As to the status of land taken into trust, I believe the language of the bill is clear that these trust lands are to be treated in the same manner as tribal trust lands are treated under the Federal laws generally applicable to tribal trust lands, including immunity from taxation. It is my understanding that this is the intent of the parties to this agreement, and certainly it is the intent of this legislation.

Under the provisions of section 177 of title 25, United States Code, any transaction involving an Indian tribe's land, or any claim to title, is void without the consent of the United States. H.R. 7155 provides the necessary consent to two underlying agreements of the State and the tribe: A "settlement agreement" and a "lease agreement." In addition, H.R. 7155 provides certain clarification of jurisdiction and application of Federal, State, and tribal laws within the Miccosukee Reservation and lease area.

In conclusion, I would stress one point: H.R. 7155 requires the relinquishment and waiver of the Miccosukee Tribe of any further claim of the tribe against the State of Florida for past land transactions or loss of lands within that State. The Seminole Tribe of Florida has similar claims against the State of Florida which are presently in litigation or are the subject of ongoing negotiation. Nothing in this act is intended to either enhance or diminish or in any way affects the claims of the Seminole Tribe, and this is understood by all parties concerned.

Mr. President, at this time there is no printed record in either the House or the Senate of the underlying agreements we are here ratifying. For this reason I ask, unanimous consent that the "settlement agreement" and the "lease agreement" between the State of Florida and the Miccosukee Tribe be printed in full at the conclusion of these remarks.

I urge my colleagues to support this bill.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

IN THE UNITED STATES DISTRICT COURT FOR THE SOUTHERN DISTRICT OF FLORIDA, MIAMI DIVISION

## CASE NO. 79-253-CIV-JWK

Miccosukee Tribe of Indians of Florida, Plaintiff, vs. State of Florida, et al., Defendants.

## SETTLEMENT AGREEMENT

It is hereby stipulated and agreed between the parties that the above-entitled case shall be finally settled in accordance with the terms of this Settlement Agreement (hereafter referred to as the "Agreement") and upon its approval by the Court. No appeal or review is to be sought by any of the parties. For the purpose of this Agreement, the parties shall be named and defined as follows:

Plaintiff, the Miccosukee Tribe of Indians of Florida (hereafter referred to as the ("Miccosukee Tribe") is recognized by the

State of Florida, pursuant to Chapter 285, Florida Statutes, and is an Indian tribe recognized by the United States and organized under the Indian Reorganization Act of 1934, 25 U.S.C. § 476, with a constitution and bylaws approved by the Secretary of the Interior pursuant to that Act. The Miccosukee Tribe approves this Agreement through its duly recognized and authorized Tribal Council, and its approval of this Agreement will bind the Miccosukee Tribe and any predecessor or successor in interest and all members thereof.

Defendants, the State of Florida, its agencies, political subdivisions, constitutional officers, officials of its agencies and subdivisions, and the South Florida Water Management District will be referred to hereafter in the Agreement as the "State of Florida, unless the language of this Agreement otherwise refers to a specific agency, official, or entity of the State of Florida. The State of Florida approves this Agreement through the Governor and Cabinet as the Executive Board of the Trustees of the Internal Improvement Trust Fund and as head of the Department of Natural Resources, the members of the Game and Fresh Water Fish Commission, the governing board of the South Florida Water Management District, and the Secretary of the Department Transportation, and its approval shall bind the State of Florida and its above mentioned agencies.

The term "lands or natural resources", as used in this Agreement, shall mean any real property or natural resources, or any interest in or right involving any real property or natural resource, including but not limited to minerals and mineral rights, timber and timber rights, water and water rights, and rights to hunt and fish.

#### WITNESSETH

Whereas, the parties recognize that a settlement of this litigation could not have been reached unless the Agreement included an extinguishment of any and all outstanding or potential claims the Miccosukee Tribe might have against the State of Florida, which may have arisen at any time prior to the effective date of this Agreement; and

Whereas, the parties also recognize that a settlement of this litigation could not have been reached unless the Agreement included a grant of a leasehold interest in certain lands to the Miccosukee Tribe; and

Whereas, the parties further recognize that implementation of this settlement will require action by both the Congress of the United States and the Legislature of the State of Florida: and

State of Florida; and
Whereas, it is the intent of this Agreement to resolve all outstanding disputes and differences between the State of Florida and the Miccosukee Tribe, and, in particular, to extinguish all claims presently in existence or arising out of any previous actions, inactions, or duties of the State of Florida, as well as to satisfy the need of the Miccosukee Tribe for additional lands, so that the future relations between the State of Florida, its citizens and the Miccosukee Tribe will be one of harmony, cooperation, friendship and peace.

Now therefore, the Miccosukee Tribe and the State of Florida stipulate and agree as

1. Effective Date. This Agreement shall not become final and shall be without any binding force or effect until:

a. The United States Congress enacts appropriate legislation, which: (1) approves the conveyances to be made or recognized by the Miccosukee Tribe pursuant to this

Agreement; (2) provides for the extinguishment of the claims of the Miccosukee Tribe to lands or natural resources in Florida, as specified in this Agreement; (3) declares that the leasehold interest of the Miccosukee Tribe under the Lease Agreement attached hereto as Exhibit A shall be exempt from all State and local taxes; (4) confirms that the area leased to the Miccosukee Tribe pursuant to said Lease Agreement (hereafter referred to as the "Leased Area") shall qualify as if it were an Indian reservation solely for purposes of determining the eligibility of the Miccosukee Tribe and its members for any Federal health, education, employment, economic assistance, revenuesharing, law enforcement over Indians, or social welfare programs, or any other similar Federal program for which Indians are eligible because of their status as Indians and residence on an Indian reservation; and (5) provides that any diminution or taking by the State of Florida of any interest granted to the Miccosukee Tribe in the Leased Area shall be made only for a public purpose and upon payment of just compensation, and that such diminution or taking shall not require approval of the United States Congress or Federal executive officer; and

b. The State of Florida enacts appropriate legislation, which provides: (1) that the Miccosukee Tribe shall have the right to exercise within the Leased Area the same governmental jurisdiction over Indians that the Miccosukee Tribe exercises in its reservation established under the provisions of Chapter 285, Florida Statutes; Provided, however, that such jurisdiction shall not be exercised in any manner inconsistent with the limitations upon the Miccosukee Tribe's rights under the Lease Agreement; and (2) that during the term of the Lease Agreement, members of the Miccosukee Tribe shall have the right in such Leased Area and such reservation to hunt and fish for subsistence purposes and to take frogs for consumption as food and for commercial purposes without restriction as to season and without payment of any license or permit fees; Provided, however, such laws may restrict the exercise of such hunting, fishing and frogging rights in the Leased Area in order to manage game and wildlife so long as prior to placing restrictions upon subsistence hunting, fishing and frogging, the Game and Fresh Water Fish Commission shall totally restrict any taking of that particular species for non-subsistence purposes.

This Agreement shall become effective upon the effective date of the above-described Federal legislation, the effective date of the above-described State legislation, or the date of its approval by the Court, whichever last occurs.

2. Cooperation of Parties. The parties agree to cooperate fully in requesting and supporting passage by the United States Congress and the Florida Legislature of the statutes described in paragraph 1. Drafts of such legislation, which reflect the understanding and agreement of the parties, are attached hereto as Exhibits B and C, respectively. The parties agree that failure by the United States Congress to enact the first sentence in Section 8 of the attached Federal legislation (Exhibit B) shall not void the Settlement Agreement.

The parties also agree that further proceedings in this suit shall be stayed while such legislation is pending; Provided, however, that this stay shall terminate on December 31, 1982, or earlier if the Court determines that favorable action by either Con-

gress or the Legislature within a reasonable time does not seem likely

3. Commitments of the Miccosukee Tribe. The Miccosukee Tribe agrees:

a. That the South Florida Water Management District shall be entitled to exercise all rights conveyed by the Dedication from the Board of Commissioners of State Institutions of the State of Florida on August 8, 1950, and the validity of such Dedication is hereby expressly recognized by the parties

hereto: b. That the Department of Transportation shall be entitled to exercise all rights conveyed by the Board of Trustees of the Internal Improvement Trust Fund to the Department of Transportation of Florida (or between their predecessor agencies) for a perpetual easement for road right-of-way and utility purposes over that strip of land, consisting of approximately 461.17 acres, which passes through the Miccosukee Reservation, and which is within the lands described in the Alligator Alley (State Road 84) easements, recorded in 1964, as more specifically described in Exhibit D attached hereto. It is agreed, that reasonable access shall be provided the Miccosukee Tribe and its members from Alligator Alley into the Miccosukee Reservation and also across or under Alligator Alley for the purpose of connecting the portions of said reservation lying north and south of the highway; Provided, however, the Miccosukee Tribe agrees to approve conveyances of additional lands necessary for the construction of said access and connections as well as the grant of an easement along the highway for drainage purposes within said reservation, without additional monetary compensation. In exchange for the conveyances of right-of-way and easement, the Department of Transportation agrees that simultaneously with the construction of the proposed access inter-change within the Miccosukee Reservation the Department of Transportation will fill and compact an area of not less than five (5) acres at a location specified by the Tribe and acceptable to the Department, which acceptance shall not unreasonably be withheld, to an elevation of not less than seventeen (17) feet above sea level, which land shall be adjacent to and accessible from the interchange and suitable for commercial development for the use and benefit of the Tribe; Provided, however, that nothing herein shall constitute Federal, State, or local approval of such development, and further provided that the provisions of this paragraph relating to access to the Miccosukee Reservation, conveyances of additional lands and easements, and the providing of five (5) acres of fast land shall be contingent upon the completion of Alligator Alley as part of the Interstate system or other four (4) lane limited access highway. In the event that Alligator Alley is not completed, or substantially completed, as part of Interstate system or other four (4) lane limited access highway within the Miccosukee Reservation within two (2) years after the effective date of this Agreement, the Tribe shall be entitled to construct, operate and maintain commercial facilities and related improvements wholly or partially within the easement for a road right-of-way described in Exhibit D, and in case such facilities and related improvements are constructed and their removal should become necessary in order to permit the completion of Alligator Alley as part of the Interstate or other highway system, the Department of Transportation agrees to pay to the Tribe at least six (6) months before such removal an amount equal to either (1) the replacement cost of the facilities and related improve-ments without depreciation, or (2) if relocation of the facilities and related improvements can be effected, the relocation cost together with damages for the loss of business, if any, during the relocation period, whichever is less;

c. To the extinguishment of any right, title, interest, or claim the Miccosukee Tribe may now possess in any public or private lands or natural resources in Florida, excluding hunting, fishing and trapping rights conferred by State law, and other than cer-"excepted interests" consisting of: (1) the State Reservation established under the provisions of Chapter 285, Florida Statutes; (2) the lands described in Dedication Deed No. 23228, dated November 20, 1962, from the Trustees of the Internal Improvement Fund of the State of Florida, as modified on October 6, 1981; (3) rights granted the Miccosukee Tribe by special use permits issued by the Secretary of the Interior in the Everglades National Park; (4) rights recognized in the Miccosukee Tribe in the Big Cypress Preserve pursuant to 16 U.S.C. §§ 410(b) and 689(j) and in the Big Cypress Area pursuant to Section 380.055, Florida Statutes; and (5) rights granted the Miccosukee Tribe under the Lease Agreement. The Miccosukee Tribe also agrees to the extinguishment of any and all claims which the Miccosukee Tribe may have other than the foregoing "expected interests" involving lands or natural resources in the State of Florida arising at any time prior to the effective date of this Agreement; Provided, however, that nothing in this Agreement or otherwise shall be construed, as waiving or relinquishing any right, title, interest, or claim to lands or natural resources in the State of Florida based on use and occupancy or acquired under Federal or State law by any individual member of the Miccosukee Tribe or any predecessor in interest thereof. The rights, titles, interests and claims outside the "excepted interests" which are being extinguished or waived by the Miccosukee Tribe, include:

(i) any and all claims the Miccosukee Tribe might have to any public or private lands of natural resources in Florida which are based upon claims of aboriginal title;

(ii) any and all other claims the Miccosukee Tribe might have to any public or private lands or natural resources in Florida, such as claims or rights based on recognized title, including but not limited to: (1) any claims the Miccosukee Tribe might have to the whole or any part of the approximately five million (5,000,000) acres of lands allegedly set aside in Florida for use and benefit of the Seminole Indian Nation, including the Miccosukee Tribe, during the period 1839-1845, or at any other date, by Executive Order of the United States Government commonly known as the "Macomb" or Polk" Reservation Area; (2) any claim based upon the grant and withdrawal of title to the State Indian Reservation in Monroe County, specifically returned to the State of Florida by Section 285.06, Florida Statutes and (3) any claim based upon the alleged grant of a license to Seminole Indians resid-ing in Florida by the Board of Commissioners of State Institutions on April 5, 1960;

d. To the extinguishment of any and all other claims, without regard to the "except-ed interests" specified above in paragraph 3c, related to the following matters:

(i) any and all claims arising out of any alleged breach of fiduciary relationship be-tween the Miccosukee Tribe and the State

of Florida, acting in a capacity as Trustee for the Miccosukee Tribe, arising out of any actions or inactions by the State of Florida prior to the date this Agreement is executed by the parties:

(ii) any and all claims for trespass damages or use and occupancy of any lands or natural resources in the State of Florida occurring prior to the date this Agreement is executed by the parties, including but not limited to claims for compensation for any road right-of-way and toll collections for State Road 84, also known as Alligator Alley. The Miccosukee Tribe also agrees to waive any and all claims arising between the execution and the effective date of this Agreement for trespass or use and occupancy of any lands or natural resources, including claims for compensation or collection of tolls, within any road or utility right-of-way or easement in existence at the date this

Agreement is executed:

(iii) any and all other claims against the State of Florida, especially the South Florida Water Management District, or its predecessor, the Central and Southern Florida Flood Control District, arising out of any actions or inactions by the State of Florida in regulating the use, management, or storage of water, including the construction of canals and levees, at any time prior to the date this Agreement is executed by the parties. The Miccosukee Tribe also agrees to waive any and all claims arising between the execution and effective date of this Agreement for the regulation, management and use of the water flowage and storage easements of the South Florida Water Management District, pursuant to its lawful rights and authority within the easement as expressly recognized by the Miccosukee Tribe in paragraph 3a;

(iv) any and all other claims by the Miccosukee Tribe against the State of Florida related to any of the matters listed in this paragraph 3d and in paragraphs 3c (i) and (ii) or arising out of any actions or inactions whatsoever by the State of Florida, including but not limited to tort, tax, contract, or constitutional claims prior to the date this Agreement is executed by the parties

4. Commitments of the State of Florida.

The State of Florida agrees:

a. To grant the Miccosukee Tribe a perpetual leasehold interest in certain lands under the control of the State of Florida, as provided in the Lease Agreement attached hereto as Exhibit A;

b. To pay the Miccosukee Tribe the sum of nine hundred seventy-five thousand dollars (\$975,000);

c. To carry out its commitments under

paragraph 3b; and

d. To waive any and all claims for offsets, including but not limited to tort or contract claims, which were or could have been as-serted against the Miccosukee Tribe by the Department of Transportation, the South Florida Water Management District, or the Trustees of the Internal Improvement Trust Fund prior to the date this Agreement is executed by the parties.

5. Condition for Invalidating Settlement. The parties understand and agree that the grant to the Miccosukee Tribe of the Lease Agreement attached hereto as Exhibit A is a vital element of the settlement for the Miccosukee Tribe. This Agreement, therefore, shall no longer have any binding force and effect if at any time, the Lease Agreement or any essential provision thereof which materially benefits the Miccosukee Tribe is ju-

dicially determined to be void ab initio by a court of competent jurisdiction or is admin-

stratively determined to be void or otherwise invalid by any officer of the State of Florida having authority to make that determination. In either of such event, the Miccosukee Tribe shall have the right to reinstate this litigation within a reasonable time—which period shall be defined for purposes of this Agreement as six (6) months after the Miccosukee Tribe receives written notice of such determination-and, if the suit is reinstated within that time, the parties agree that no defense, such as laches, statute of limitations, law of the case, res judicata, or prior disposition shall be asserted solely on the basis of the passage of time between the dismissal of this suit and commencement of the resumed litigation; Provided, however, that if any such suit is reinstated, the Miccosukee Tribe agrees that any defense which would have been available to the State of Florida at the time this suit was dismissed may be asserted, and is not waived by anything in this Agreement or by subsequent events occurring between the dismissal of this suit and commencement of the resumed litigation. Any taking by the State of Florida for a public purpose of interests granted to the Miccosukee Tribe in the Lease Agreement shall not be construed as voiding this Agreement.

If the Miccosukee Tribe reinstitutes suit, the State of Florida shall be able to offset or counterclaim for all compensation and the value of other benefits received by the Tribe under the Settlement and Lease Agreements and the Miccosukee Tribe shall be able to offset our counterclaim for all benefits received by the State. As an alternative to rescission and the reinstitution of litigation pursuant to this paragraph 5, the Miccosukee Tribe shall have whatever reme-

dies are provided by law.

## EXHIBIT A LEASE AGREEMENT

Whereas, the Governor and Cabinet as the Board of Trustees of the Internal Improvement Trust Fund of the State of Florida (hereafter the "Board") are authorized and empowered, pursuant to Section 253.03, Florida Statutes, to lease lands owned by the Board; and

Whereas, the Florida Game and Fresh Water Fish Commission (hereinafter the "Commission") under the Constitution and laws of the State of Florida has general supervision of fresh water aquatic life and wild animal life management within the

State of Florida; and

Whereas, pursuant to Chapter 373, Florida Statutes, the South Florida Water Man-District (hereafter agement formerly "SFWMD"), the Central and Southern Florida Flood Control District, has the statutory responsibility for flood control and water resources management in the lands described in paragraph 1 hereof and has acquired rights by virtue of easements of said lands from the State of Florida: and is authorized and empowered to lease lands owned by the SFWMD: and

Whereas, pursuant to a certain Agreement, dated January 18, 1952, between the Commission and the Governing Board of the SFWMD, the Commission has further undertaken the fresh water aquatic life, wild animal life and recreation management within geographical areas including Water Conservation Area 3A lying in Broward and

Dade Counties, Florida; and

Whereas, the Miccosukee Tribe of Indians of Florida (hereafter the "Miccosukee Tribe" or the "Tribe") is an American Indian tribe recognized by the United States, and the State of Florida pursuant to Chapter 285, Florida Statutes, and organized pursuant to the provisions of Section 16 of the Federal Indian Reorganization Act, 25 U.S.C. § 476; and

Whereas, a portion of the reservation of the Miccosukee Tribe created under Chapter 285, Florida Statutes, lies within the geographical boundaries of Water Conservation Area 3A, which portion contains approximately 49,280 acres and is delineated in red on the map attached hereto as Exhibit I (such portion being hereafter described as the "Original Reservation Tract"); and

Whereas, the Commission has for a substantial period of time engaged in fresh water aquatic life and wildlife management within the Original Reservation Tract and relations between the Commission and the Miccosukee Tribe with respect to fresh water aquatic life and wild animal life management within such tract have been both

amicable and successful; and

Whereas, the Board of Commissioners of State Institutions, on April 5, 1960, purported to set aside approximately 143,000 acres in Dade and Broward Counties as a license area for the use, occupancy and enjoyment of the Seminole Indians residing in Florida, including members of the Miccosukee Tribe, subject to certain conditions and limitations; and

Whereas, the Attorney General of the State of Florida has advised the Board that certain aspects of the action taken on April 5, 1960, described above need clarification due to incomplete documentation thereof and that the respective rights of the State and the Indians in the license area should be more precisely defined in the interest of

both parties; and

Whereas, the Board, the Commission, the SFWMD and the Miccosukee Tribe desire to describe more particularly their mutual rights and duties within a tract of lands in Dade and Broward Counties, as further described in paragraph 1 (hereafter the "Leased Area"), and, in part, also within the Original Reservation Tract, and to act cooperatively to protect, conserve and manage fresh water aquatic life and wildlife and manage and control recreational resources within the Original Reservation Tract and the Leased Area; and

Whereas, the Board, the Commission, the SFWMD and the Miccosukee Tribe further desire to continue and expand these cooper-

ative efforts in the future; and

Whereas, the parties intend to preserve the integrity of the State School Fund of Florida, recognizing that portions of the foregoing properties are "Section 16 Lands" whose income and principal shall be used only in accordance with Article IX, Section 6, Florida Constitution; and

Whereas, the Miccosukee Tribe has requested assurance that its rights shall not be subject to unilateral revocation by the State so that members of the Tribe and their descendants may be assured of the continued use of their traditional homeland:

and

Whereas, the SFWMD and the Board have agreed to lease the Leased Area to the Miccosukee Tribe for the uses and benefits established by this Agreement, and in settlement, inter alia, of claims asserted by the Tribe in Miccosukee Tribe of Indians of Florida v. State of Florida, et al., Case No. 79-253-Civ-JWK in the United States District Court for the Southern District of Florida; and

Whereas, the following agencies have title to all or part of the lands described in paragraph 1 or such lands are under their jurisdiction, management and control:

(i) The South Florida Water Management District, and

(ii) The Trustees of the Internal Improvement Trust Fund of the State of Florida;
Whereas, the Miccosukee Tribe has

whereas, the Miccosukee Tribe has agreed to accept the terms and conditions of this Agreement by executing same.

Now, therefore, in consideration of their mutual promises and for other good and valuable consideration, the parties hereto agree.

1. The Board, with the concurrence of the SFWMD, and the SFWMD grant to the Miccosukee Tribe a perpetual lease of the following described lands constituting the Leased Area as depicted on Exhibit 1 for the uses and purposes hereafter stated:

All those lands lying within the following

described area:

Begin at the intersection of the Westerly right of way line of South Florida Water Management District's Levee 67A (Drawing Number L-67A-1) and the Northerly right of way line of South Florida Water Management District's Levee 29 Section 2 (Drawing Number L-29-1);

Thence, Westerly along the Northerly right of way line of said Levee 29 Section 2 and Northwesterly along the Northerly right of way line of South Florida Water Management District's Levee 29 Section 1 (Drawing Number L-29-3) to the intersection thereof with the Easterly right of way line of South Florida Water Management District's Levee 28 (Drawing Number L-28-1).

Thence, Northerly along said right of way line to the intersection thereof with the North line of Section 29, Township 53 South, Range 35 East;

Thence, Easterly along the North line of said Section 29 to the Northwest (NW) corner of Section 28, Township 53 South, Range 35 East:

Thence, Southerly along the West line of Sections 28 and 33, Township 53 South, Range 35 East to the Southwest (SW) corner of said Section 33;

Thence, Easterly along the South line of Sections 33, 34, 35, and 36, Township 53 South, Range 35 East to the Southeast (SE) corner of said Section 36;

Thence, Northerly along the East line of Sections 36, 25, 24, 13, 12 and 1, Township 53 South, Range 35 East, and the East line of Sections 36 and 25, Township 52 South, Range 35 East to the Northeast (NE) corner of said Section 25;

Thence, Westerly along the North line of Sections 25, 26, 27 and 28, Township 52 South, Range 35 East to the intersection thereof with the East right of way line of South Florida Water Management District's Levee 28 (Drawing Number L-28-1);

Thence, Northerly along said right of way line to the intersection thereof with the Dade/Broward County line; said line also being the township line between Townships 51 South and 52 South and the Southerly boundary line of the Miccosukee Indian Reservation:

Thence, Easterly along said county line to the Southwest (SW) corner of Township 51 South, Range 36 East;

Thence, Northerly along the range line between Ranges 35 East and 36 East to the intersection thereof with the Southerly right of way line of State Road 838 (Alligator Alley or Everglades Parkway);

Thence, Easterly along said right of way line to the intersection thereof with a line that is 200 feet Westerly of, parallel and as measured at right angles to the centerline of South Florida Water Management District's Canal 123;

Thence, Southeasterly along said line to the intersection thereof with the North line of Section 3, Township 50 South, Range 37 East;

Thence, Southwesterly and Southerly along said right of way line to the point of beginning:

Also, the following described parcels of land: The West one-half of the Southwest one-quarter (W ½ of SW ¼) of Section 27 and the East one-half of the Northeast one-quarter (E ½ of NE ¼) of Section 36, all in Township 52 South, Range 35 East;

The Southwest one-quarter of the Southeast one-quarter of the Northeast one-quarter (SW ¼ of SE ¼ of NE ¼) and the West one-half of the Southwest one-quarter (W 1/2 of SW 4) of Section 3: the East one-half of the Northwest one-quarter (E 1/2 of NW 1/4) of Section 11; the Northeast one-quarter of the Northeast one-quarter (NE ¼ of NE ¼) of Section 12; all of Section 16; the West one-half of the Northwest one-quarter (W 1/2 of NW 4) of Section 22; the West one-half of the Northwest one-quarter (W 1/2 of NW 4) of Section 24; the West one-half of the Northeast one-quarter (W 1/2 of NE 1/4) of Section 26; The East one-half of the North-west one-quarter (E ½ of NW ¼) of Section 33; all being in Township 53 South, Range 35 East

Less, however, the following Tracts of The Everglades Land Company's Subdivision, as recorded in Plat Book 2, Page 1, Dade County, Florida, public records:

Tracts 111 and 112 in Section 29, and Tracts 57 and 58 in Section 31, all in Township 50 South, Range 38 East;

Tracts 79 and 80, and Tracts 109 through 112 in Section 3, Tracts 11 through 14 in Section 4, and Tracts 33 and 64 in Section 32, all in Township 51 South, Range 38 East;

Tract 56 in Section 5, and Tracts 3, 4, 45, 46, 51, 52, 57, and 58 in Section 7, all in Township 52 South, Range 38 East.

Also, less the North seven-eights of the East one-quarter (N % of %) of Section 16, Township 54 South, Range 36 East.

The above described parcels of land, being situated in Broward County and Dade County, Florida, were estimated to contain approximately 189,000 Acres.

The Board, the Commission and the District represent and the Tribe acknowledges that access to certain parcels of Board-owned or District-owned lands within the Leased Area may be severed by lands title to which is not vested in whole or in part in the Board or the District. The Tribe agrees that the Board, the Commission and the District shall not be responsible for perfecting or guaranteeing access across lands not owned by the Board or the District located outside the Leased Area.

2. Fresh Water Aquatic Life and Wildlife Management. The Commission shall continue freshwater aquatic life and wildlife management programs within the Leased Area and the Original Reservation Tract. The Commission shall discuss and coordinate with the Miccosukee Tribe in developing freshwater aquatic life and wildlife management practices within the Leased Area and the Original Reservation Tract, and the Commission and the Miccosukee Tribe shall cooperate in the enforcement of the regulations of the Commission. Representatives of the Commission, the SFWMD and the Miccosukee Tribe shall meet at least annually

(more frequently, if necessary or requested) to discuss regulations of the Commission with respect to hunting, fishing and public recreational utilization of the Leased Area. Nothing in this Lease Agreement shall grant to the general public any right of access to, or use of, the Original Reservation Tract for hunting, fishing, recreation, or any other purpose.

The activities of the Commission in freshwater aquatic life and wildlife management practices shall not interfere with or close any part of the leased Area to any tribal use or activity, including hunting, fishing and frogging, except as provided in this para-graph. The Commission may restrict hunting, fishing, or frogging within the Leased Area when necessary in order properly to manage freshwater aquatic life and wildlife; Provided, That no such restriction shall be greater than the restrictions imposed in surrounding areas. In addition, before any such restrictions are enacted, the Commission shall consult with and discuss same with the Miccosukee Tribe. If the Commission deems it necessary to place restrictions upon the Tribe's right to hunt, fish, or frog for subsistence purposes, it will do so only after a total restriction for the taking of a particular species has been placed upon all nonsubsistence users and the need for further restriction on the taking of that species continues to exist.

3. Rights of the Miccosukee Tribe. The Miccosukee Tribe shall have the following rights:

a. Subject to the provisions of paragraph 2 of this Lease Agreement and the approval of appropriate legislation to such effect by the Florida Legislature as required in the Settlement Agreement described in paragraph 8 below, the members of the Miccosukee Tribe shall have the right during the term of this Lease Agreement to hunt and fish for subsistence purposes and to take frogs for consumption as food and for commercial purposes without restriction as to season in the Leased Area and the Miccosukee Reservation and shall not be required to purchase any license or permit from the Commission in order to exercise such rights.

In addition, the Miccosukee Tribe shall be compensated by the Commission for public hunting and fishing on the Leased Area in accordance with the formula used statewide by the Commission to determine compensation to private owners for the right to manage wild animal life and for public hunting and fishing on private lands. The Miccosukee Tribe shall have the option of accepting the annual cash amount derived from the public use payment or directing the Commission to provide other goods and services which are within the authority of the Commission and which are agreed to be of equal monetary value by both parties.

b. The Miccosukee Tribe and its members shall have the right to engage in traditional subsistence agricultural activities in the Leased Area. It is understood that revenueproducing agricultural activities on the Leased Area at this time are inconsistent with the proper use of the area as a water flowage and storage area by the SFWMD. However, should conditions change, the may seek permission from SFWMD to engage in revenue-producing agricultural activities if such activities will not interfere with the rights and uses of the SFWMD. Approval by the SFWMD shall be pursuant to the permit procedures applicable to any private citizen.

c. The Miccosukee Tribe, and members of the Miccosukee Tribe under regulations the Tribe may adopt, shall have the right: (1) to reside in the Leased Area, including the construction of traditional homes, subject to the provisions of paragraph 6; (2) to use the Leased Area for tribal religious purposes; and (3) to take and use native materials from the Leased Area for tribal purposes, fabrication into artifacts, utensils, handicrafts and/or souvenirs for sale, subject to the provisions of subparagraph 3e below.

The Miccosukee Tribe shall have the right to receive fifty percent (50%) of the net revenue derived from such sale, lease, exploration, or other revenue-producing utilization of the mineral rights and interests in the Leased Area as may be allowed by the Board (except for the revenue derived from school lands pursuant to Article IX, Section 6, Florida Constitution), and the further right to require that any such mineral exploration, extraction, or other development and utilization be performed in accordance with any reasonable and acceptable method and technology which best protects the natural state and beauty of the Leased Area and which is least disruptive of the tribal uses permitted by this Agreement. The "Section 16" lands subject to the provisions of Article IX, Section 6, Florida Constitution, are identified as follows:

Township 52 South, Range 35 East: All of Sections 1, 2, 3, 10, 11, 12, 13, 14, 15, 22, 23 and 24.

All of Sections 4, 9, 16 and 21 East of the Easterly Right-of-Way of Levee 28.

Township 50 South, Range 36 East: All of Section 16. Township 51 South, Range 36 East:

All of Section 16. Township 52 South, Range 36 East:

Township 52 South, Range 36 East: All of Sections 6, 7, 16, 18, and 19. Township 53 South, Range 36 East: All of Section 16.

Township 50 South, Range 37 East: All of Section 16.

Township 53 South, Range 37 East: All of Section 16 West of the Westerly Right-of-Way of Levee 67A.

Totaling 14,800 acres, more or less.
e. The purpose of this Agreement is also:
(1) to preserve the Leased Area in its natural state for the use and enjoyment of the Miccosukee Tribe and the general public, as herein specified; (2) to preserve fresh water aquatic life, wildlife, and their habitat; and (3) to assure proper management of water

resources.

4. Revenue-Producing Services and Facilities. The Board, the Commission and the SFWMD agree not to erect or permit construction on lands which they own of any revenue-producing facilities within the Leased Area or within one-half mile of the Leased Area and the Original Reservation Tract without the prior written consent of the Miccosukee Tribe. The Miccosukee Tribe, or individual Indians licensed by the Miccosukee Tribe, shall have the ex-clusive right to offer airboat rides, guide services, or other tourist services, in the Leased Area. None of these exclusive rights shall prohibit reasonable entry into the Leased Area by airboat or otherwise by members of the public for the purpose of engaging in non-commercial recreational activities; provided that such activities shall be in compliance with the provisions of this Lease Agreement and shall not interfere with the rights guaranteed to the Miccosukee Tribe and its members herein; and provided further that entry into the Leased Area by members of the public engaged in commercial recreational activities shall be subject to the consent of the Miccosukee Tribe, except commercial recreational activities ongoing upon the effective date of this Lease Agreement and registered with the Game and Fresh Water Fish Commission within one (1) year of the effective date hereof, which shall be permitted to continue at the option of the Commission and if not in conflict with the rights of the Tribe and its members under this Lease Agreement. Commercial recreational activities ongoing upon the effective date of this Lease Agreement shall be defined as those recreational activities for profit which are occurring no less frequently than once each month or twelve (12) times for the twelve (12) month period preceding the effective date hereof.

5. Limitations on Tribal Use. Subject to the provisions of paragraph 6, use of the Leased Area by the Miccosukee Tribe shall comply with all applicable laws and regulations in effect on the effective date of this Lease Agreement (including but not limited to Chapter 373, Florida Statutes), with the lawfully enacted rules and regulations of the SFWMD, both presently existing and those which may be promulgated in the future, and with all future laws and regulations not inconsistent with the rights granted the Miccosukee Tribe under this Lease Agreement. The Miccosukee Tribe shall possess no exclusive or private rights of access to and from Alligator Alley in the Leased Area, and highway access by the Tribe shall be subject to regulation by the State of Florida and the United States.

6. Rights of South Florida Water Management District. The Leased Area has for many years comprised a portion of a large reservoir utilized for the flowage and storage of water servicing the area of Broward, Dade, Monroe and Collier Counties and designated as Water Conservation Area 3 as part of the federally authorized project of flood control and water management for central and southern Florida. The Commission and the Miccosukee Tribe agree that all of the rights set forth in paragraphs 1 through 5 and 7 are subject to and shall not interfere with the rights, duties and obliga-tions of the SFWMD or the United States Army Corps of Engineers, pursuant to the requirements of the aforesaid federally authorized project, conveyances, easements, grants, rules, statutes, or any other present or future lawful authority to manage, regulate, raise, or lower the water levels within the Leased Area or Water Conservation Area 3, including but not limited to the Dedication from the Board of Commissioners of State Institutions of the State of Florida dated August 8, 1950.

7. Limitations on Access. The Miccosukee Tribe shall have the right to survey and mark the boundaries of the Leased Area; Provided that such boundary markers shall consist of small monuments and shall in no way limit access to the Leased Area. Upon prior written approval of the Commission, the Miccosukee Tribe shall have the right to close to public access certain areas of the Leased Area used for traditional dwelling, agricultural and religious purposes. Employees or agents of the Board, the SFWMD, the Corps of Engineers and the Commission, in the performance of their official duties, shall be exempt from any limitation on access to the Leased Area. Such Board, SFWMD, Commission and Corps of Engineers' employees or agents shall likewise be exempt from the duty to pay any fees which may be imposed under this Agreement.

The right of the public access to the Leased Area shall be regulated by the Commission and shall be limited to recreational uses, including but not limited to hunting, fishing, hiking and bird watching. Such public recreational uses shall be subject to the rights expressly granted to the Tribe by this Agreement. The Miccosukee Tribe shall retain the right to exercise remedies authorized by law against trespassers.

8. Duration. This Lease Agreement shall become effective upon the effective date of a Settlement Agreement between the Miccosukee Tribe and the State of Florida, filed with and approved by the Court, in Miccosukee Tribe of Indians of Florida v. State of Florida, et al., Case No. 79-253-Civ-JWK in the United States District Court for the Southern District of Florida. The Miccosukee Tribe shall have no rights or interests to the Leased Area other than those expressly stated herein and in such Settlement Agreement. It is understood that the Board and the SFWMD shall retain their respective ownership of the Leased Area for all purposes including but not limited to oil, gas, water and mineral exploration and extraction, subject to provisions of paragraph 3d. The Lease Agreement shall not be terminated by the Board or the SFWMD without consent of the Miccosukee Tribe, or with respect to any portion of the Leased Area, unless for a public purpose upon payment of just compensation to the Tribe for the termination of the rights granted herein. The rights and privileges conferred upon the Miccosukee Tribe shall remain in perpetuity unless abandoned by the Tribe, but the rights and privileges granted to the Tribe by this Agreement shall not be assigned or subleased without the express permission of the Board.

9. Revocation of License. This Lease Agreement supersedes and replaces any rights, privileges, or interests the Miccosukee Tribe and its members may have possessed in the license area by reason of the action of the Board of Commissioners of State Institutions on April 5, 1960.

10. Rights of Other Indians in Lease. The Miccosukee Tribe recognizes and agrees that persons of Miccosukee Indian blood, who are not now members of the Tribe but are eligible for membership, may become entitled to share in the rights and interests granted to tribal members under this Lease Agreement pursuant to claims filed under section 5.(b)(4) of the "Florida Indian Claims Settlement Act of 1982" attached as Exhibit B to the Settlement Agreement described in paragraph 8 of this Lease Agreement.

In witness whereof, the Governor and Cabinet as the Board of Trustees of the Internal Improvement Trust Fund of the State of Florida and the Chairman of the Governing Board of the South Florida Water Management District have executed the foregoing Lease Agreement and the Florida Game and Fresh Water Fish Commission, and the Miccosukee Tribe of Indians of Florida have caused the approval of the foregoing Lease Agreement to be executed by their respective officers thereunto duly authorized.

Mrs. HAWKINS. Mr. President, I rise in support of the Florida Indian Land Claims Settlement Act. This legislation represents the culmination of over 7 years of negotiation among the State of Florida, the Miccosukee Tribe of Indians, and the Federal Government. What this legislation does, simply, is to ratify an agreement reached by the State of Florida and

the Miccosukee Tribe that settles a pending land claim the tribe has filed against the State. There is a great sense of urgency in this matter. Unless the measure becomes law before December 31, 1982, the settlement agreement—and all the benefits to both the State and the tribe—will become null and void.

I would like to thank Senator COHEN for his cooperation in this matter, his assistance in moving the legislation through his committee, and his help in securing timely action by bringing this bill to the floor. Once again, Senator Cohen has demonstrated his interest and sincere commitment to carrying out the charge of the Select Committee and resolving the many outstanding Indian land claims with equity and justice. I also want to thank Senator Gorton for his help in moving this legislation through and for considering it during hearings held earlier in this special session.

I want to make it clear that although the Florida Indian Land Claims Settlement Act has moved quickly, it has been, nevertheless, carefully conceived and constructed. Essentially, the Miccosukee Tribe will, for the first time, have a federally recognized home. The home consists of a new 76,000-acre Federal Indian reservation as well as an adjoining 189,000 acres held in perpetual lease for the tribe by the State. Florida's non-Indian people will continue to enjoy the rights to hunt and fish in the leased area, and the State of Florida will maintain authority and responsibility for flood control activities in the area.

Another important benefit of this settlement is the provision to preserve almost all the Everglades land involved in its natural state. The Miccosukee have emphasized their desire to pursue their traditional lifestyle on this land and to share its use with the non-Indian people of Florida. The State has emphasized the importance of protecting these wetlands as well. People familiar with Florida are well aware of how important this region is to the water supply of the southern portion of our State. Although the primary reason for enacting this bill is to provide equitably for the Miccosukee people, we should not overlook how important the protection of the Everglades is to the entire population of south Florida.

We are all aware that this is a time to very carefully control Federal expenditures. This measure does not include any new budget authority and does not require any Federal expenditures to compensate the tribe. In fact, the administration gave this measure its support during the hearings on December 7.

In sum, Mr. President, this measure ratifies an agreement that is well considered and fairly constructed. It

brings to a close the long dispute between the State of Florida and the Miccosukee people. It opens a new era of cooperation between the tribe and the State that should significantly benefit all Floridians. And it does this at no cost to the Federal Government. It is my hope the Senate will accept this measure. I urge my colleagues to support this bill.

Mr. CHILES. Mr. President, I want to voice my strong support of H.R. 7155, a bill designed to settle certain Indian land claims within the State of Florida. H.R. 7155 is the House companion to S. 2893, the bill Senator HAWKINS and I introduced at the request of the Miccosukee Indian Tribe and the State of Florida.

I wish to thank the Senator from Maine for his superb handling of the Miccosukee Indian Land Claims Settlement Act. I also want to thank the Senator from Washington for conducting the hearing on S. 2893 and express my gratitude to the staff of the Select

Committee on Indian Affairs for their cooperation and assistance.

Like most bills, this legislation is the end product of considerable work and effort by the affected parties. The Miccosukee land claims involve over 20 years of negotiation and over 150 years of history. The Miccosukee Tribe are descendants of the Seminole Nation which occupied all of Florida when the United States acquired it from Spain in 1819. Relations between the Miccosukee and the United States began formally with a treaty in 1823. Those relations deteriorated when the Armed Forces of the United States drove the Miccosukee Indians from their home in northern central Florida to the Everglades country of south Florida where they now live. Many years later, Presidents Tyler and Polk established a 5-million-acre Indian reservation by Executive order in southwest Florida, which now includes the cities of Naples and Fort Myers. Until the 20th century, the Indians were left undisturbed in the unsettled Everglades almost entirely unaffected by the white man. The State of Florida set aside a portion of the Everglades as a reservation for them in 1917. The State reservation, however, was abolished in 1935 to make way for the Everglades National Park. Another State reservation was provided but the Miccosukees understandably did not want to leave their traditional homeland. They did not leave, and in 1964 the National Park Service agreed to let them live in a strip 500 feet wide at the northern edge of the park and the State agreed to let them live temporarily on State-owned lands north of the park. These State lands are involved in the present settlement. Since before 1960 the tribe has negotiated with the State of Florida for the right to permanently occupy State lands. A settlement agreeable to both the tribe and the State was reached in 1978 but the Governor asked the Miccosukees to waive any legal claims they had against the State of Florida. The Miccosukees discovered that the Executive order issued by Presidents Tyler and Polk gave them a land claim. They also had a claim based on the flooding of more than half of the State Miccosukee Reservation without the permission of the tribe. Further negotiations took place and a final settlement was approved by the Governor and the cabinet of the State of Florida on October 6, 1981, by the Miccosukee Tribe on March 8, 1982 and was approved by the U.S. District Court for the Southern District of Florida in which the suit by the tribe is pending, on July 2, 1982.

The Florida Indian Land Claims Settlement Act authorizes no Federal expenditure in settlement of the tribe's claims. The monetary compensation to be paid to the tribe under the terms of the settlement will be paid entirely by the State. Nevertheless, Federal approval of the settlement as provided in the bill is necessary for three reasons:

First, in the settlement agreement the Miccosukee Tribe waives all its existing claims against the State. In view of the existing Federal legislation which prohibits conveyances of land by Indian tribes without Federal approval (25 U.S.C. S177), the State has wisely insisted that the tribe's waiver of claims should be confirmed by the Congress.

Second, the Miccosukee Tribe requested as a condition to the settlement that an existing Miccosukee State Indian Reservation be conveyed by the State to the Federal Government to be held in trust for the benefit of the Miccosukees. The Florida cabinet has approved this conveyance and the bill provides for the acceptance of these lands by the Secretary of the Interior as a Federal Indian reservation. Third, finally, the settlement agreement provides to the tribe approximately 189,000 acres of Ever-glades land under a perpetual lease. These lands and waters will be preserved in their natural state and will be available for public recreational use but the Miccosukee Indians will be guaranteed permanent rights to live, hunt, and fish in the area, which has been their traditional homeland for more than a century. While the legal title to the leased area will be held by the State, the State has agreed that the area may be treated for certain purposes as a Federal Indian reservation. The bill implements this agreement of the parties.

The terms of this agreement will terminate unless congressional approval is given by December 31, 1982.

I want to congratulate the State of Florida and the Miccosukee Indian Tribe for reaching this settlement after so many years of negotiation. I also compliment them for settling this matter without burden on the Federal Government or its budget. The State of Florida has recognized its obligation to the Miccosukee Indians, the Miccosukee tribal leaders have recognized their obligation to their people, the House of Representatives has recognized its obligation by passing the bill before us and I hope the Senate will feel the same sense of obligation to finalize this settlement to provide a permanent home for the Miccosukee Indians. I urge the Senate to pass H.R. 7155 so this bill can be sent to the President for his signature before the end of the year.
The PRESIDING OFFICER. The

bill is open to amendment. If there be no amendment to be proposed, the question is on the third reading and

passage of the bill.

The bill (H.R. 7155) was ordered to a third reading, was read the third time, and passed.

## SYCUAND BAND OF INDIANS TRUST LAND ACT

Mr. STEVENS, Mr. President, I ask unanimous consent that the Committee on Indian Affairs be discharged from further consideration of H.R. 5204, Sycuand Band of Indians Trust Land Act, and I ask for its immediate consideration.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill will be stated by title.

The legislative clerk read as follows: A bill (H.R. 5204) to authorize and direct the Secretary of the Interior to accept certain lands for the benefit of the Sycuand Band of Mission Indians.

The PRESIDING OFFICER. The bill is before the Senate and open to amendment. If there be no amendment to be offered, the question is on the third reading and passage of the bill

The bill (H.R. 5204) was ordered to a third reading, was read the third time, and passed.

## COW CREEK RESTORATION AND RECOGNITION ACT

Mr. STEVENS. Mr. President, I ask unanimous consent that the Indian Affairs Committee by discharged from further donsideration of H.R. 6588, Cow Creek Restoration and Recognition Act, and I ask for its immediate consideration.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill will be stated by title

The legislative clerk read as follows: A bill (H.R. 6588) to provide for Federal recognition of the Cow Creek Band of Umpqua Tribe of Indians.

The Senate proceeded to consider the bill.

Mr. HATFIELD. Mr. President, a resourceful, proud band of Indians in

Canyonville, Oreg., have waited patiently for the Senate to do what it is about to do today. In 1954, Congress passed the Western Oregon Termination Act and stripped the Cow Creeks and 61 other tribes of Federal recognition. By passing H.R. 6588, the Members of the body will right a wrong done over 28 years ago to the Cow Creek Band of Umpqua Tribe of Indians. No longer will the Cow Creek Indians be second-class native American citizens and no longer will the Cow Creek Indians be denied the whole panoply of Indian programs ranging from health services to educational benefits.

Mr. President, one of the most impressive aspects of the Cow Creek's attempt to gain Federal recognition is the extent to which the local communities who live and work with Cow Creeks have rallied behind the tribe. I have received letters from merchants in Roseburg, Myrtle Creek, and Canyonville, and have heard from church and civic leaders in those same cities, as well as in Riddle and Glendale, Oreg. All of these letters attest to the wonderful character of the Cow Creek Tribe. The Governor of the State of Oregon, Victor Atiyeh, has also expressed his support of H.R. 6588.

In fact, I have yet to receive one negative letter concerning the Cow Creeks, and judging from the representatives of the tribe who came to Washington, this is no surprise. I would like to thank Senator COHEN and his staff on the Select Committee on Indian Affairs for their diligence and competence. Congressman Jim Weaver is also to be commended for having his bill on the Cow Creeks, H.R. 6588, passed in the House on December 7. Notwithstanding these contributions, the credit for the passage of H.R. 6588 rests with the Cow Creek Indians. They are to be congratulated for their tireless efforts and perseverance during the difficult times that followed the Termination Act in 1954. Justice has been done, and for the Cow Creek Indians, it finally has come in the form of Federal recognition.

The PRESIDING OFFICER. The bill is before the Senate and open to amendment. If there be no amendment to be offered, the question is on the third reading and passage of the

The bill (H.R. 6588) was ordered to a third reading, was read the third time, and passed.

## INTERGOVERNMENTAL RELA-TIONS ADVISORY COMMISSION

Mr. STEVENS. Mr. President, I ask unanimous consent that the Governmental Affairs Committee be discharged from further consideration of H.R. 7173, Intergovernmental Relations Advisory Commission, and I ask for its immediate consideration.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill will be stated by title.

The legislative clerk read as follows:

A bill (H.R. 7173) to make certain changes in the membership and operations of the Advisory Commission on Intergovernmental Relations

The Senate proceeded to consider the bill.

Mr. ROBERT C. BYRD. Mr. President, there is no objection to the immediate consideration of the measure. Mr. STEVENS. I thank the Senator.

#### UP AMENDMENT NO. 1535

Mr. STEVENS. Mr. President, I send to the desk an amendment by Senator DURENBERGER and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows: The Senator from Alaska (Mr. STEVENS), on behalf of Mr. DURENBERGER, proposes an unprinted amendment numbered 1535.

Mr. STEVENS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 3(a) of the Act of September 24, 1959, entitled "An Act to establish an Advisory Commission on Intergovernmental Relations", is amended-

(1) by striking out "twenty-six members" in the matter preceding paragraph (1) and inserting in lieu thereof thirty members;

(2) by striking out "Governors' Conference" in paragraph (4) and inserting in lieu thereof "National Governors' Association";
(3) by striking out "board of managers of

the Council of State Governments" in paragraph (5) and inserting in lieu thereof "National Conference of State Legislatures'

(4) by striking out "and" at the end of paragraph (6) and by striking out the period at the end of paragraph (7) and inserting in lieu thereof a semicolon; and

(5) by inserting after paragraph (7) the

following new paragraphs:

"(8) One appointed by the President from a panel of at least two elected officers of a township submitted by the National Association of Towns and Townships;

"(9) One appointed by the President from a panel of at least two elected school board members submitted by the National School **Boards Association:** 

"(10) One appointed by the Chief Justice of the United States, who shall be a judge of a United States court of appeals or district court: and

(11) One appointed by the Chief Justice of the United States from a panel of two or more chief justices or judges of a State court of last resort submitted by the Conference of Chief Justices."

(b) Section 4(e) of such Act is amended by striking out "Thirteen" and inserting in lieu thereof "A majority of the".

(c) Section 3 of such Act is amended by adding at the end thereof the following new subsection:

(d) For the purposes of subsection (a)(8), the term "township" means township as described in the Governmental Organization volume of the 'Census of Governments' publication last issued by the Bureau of the Census at any time."

(d) The amendments made by this Act shall not be construed to affect the current members of the Advisory Commission on Intergovernmental Relations, but shall apply with respect to any member appointed to such Commission on or after the date of the enactment of this Act.

Mr. DURENBERGER. Mr. President, the legislation before the Senate has as its principal purpose modification of the membership on the Advisory Commission on Intergovernmental Relations. H.R. 7173 adds three new members to ACIR-a Federal judge, a State judge, and a local school board member. The amendment I am offering does not affect any of these three new positions on the Commission.

But H.R. 7173 does make one additional modification in the nomination and appointments process to which I cannot agree. Currrently, four local officials representing towns and cities sit on the Commission. They are appointed by the President from a list of nominees submitted jointly by the U.S. Conference of Mayors and the

National League of Cities.

Over the 20-year history of ACIR it has become apparent that this nomination procedure does not secure adequate representation of small communities on the Commission. H.R. 7173 seeks to remedy that shortcoming by including the National Association of Towns and Townships in the nomination process.

Under the House bill, the joint nominations of the Conference of Mayors and the National League of Cities would be reduced to three seats. The fourth seat would be filed by Presidential appointment from a list of two nominees submitted jointly by the League of Cities and the Association

of Towns and Townships.

Mr. President, the House bill is moving in the right direction. It will provide somewhat better representation of the concerns of small communities. To that extent the House bill is a positive step. But this positive step comes at the expense of large cities. The voice of the Conference of Mayors is reduced under the House bill.

This formulation is understandable from one perspective. It is important to keep a careful balance of views across all levels of government. Currently ACIR includes nine Federal officials, seven State officials, seven local officials, and three private citizens. The House bill adds one member in every category so the balance is preserved from the perspective of levels of government.

Mr. President, I am sensitive to this question of balance. I would not support amendments that radically alter

the current structure of the Commission. But I do think that we can provide a full voice to small communities, without subtracting from the contribution that officials of large communities have made to the work of the Commission

My amendment restores the nomination role for the U.S. Conference of Mayors and the National League of Cities as it has existed over the last 20 years. They will jointly nominate for four seats just as they always have.

My amendment also creates an additional seat on ACIR bringing total membership to 30-including the 3 members added by the House bill. This new position is to be filled by Presidential appointment from a list of two nominees presented by the National Association of Towns and Townships. The nominees are to be elected officials of township governments as township is defined in the Bureau of Census survey of governments.

Mr. President, preserving the balance of views on ACIR while broadcasting its membership has been more difficult than it might seem to a casual observer. My Subcommittee on Intergovernmental Relations has held two hearings on this subject. Many groups not mentioned in the House bill or included in my amendment have also expressed interest in membership. I have attempted to judge these various claims with three principles in mind: One, preserving balance on the Commission across all three levels of government; two, representation of general purpose elected governments; and three, limiting the size of the Commission to a number that promotes discussion and thoughtful debate among the Members at meetings. Considering those principles, I see no need for further modification in the Commission's membership after this bill is passed. We will not be returning to this question in the near future so far as this Senator is concerned.

Mr. President, I want to thank the distinguished Senator from Delaware and chairman of the Governmental Affairs Committee for the role he has played in making this bill possible. His long service on ACIR and insight into the structure of our Federal partnership has made Senator Roth a spokesman for State and local government here in the Congress. His leadership has been instrumental in resolving differences on this legislation.

Mr. ROTH. Mr. President, I am pleased to support the amendment to H.R. 7173 offered by my colleague, Senator DURENBERGER. I thank him for his kind remarks, and I appreciate the pivotal role he played in fashioning The this amendment. proposed changes improve upon the bill that was reported out of the House of Representatives earlier this year.

The principal purpose of H.R. 7173 is to modify the membership of the Advisory Commission on Intergovernmental Relations as Senator DUREN-BERGER has described. Before expressing my thoughts on these changes, however, I would like to make some general comments about the ACIR.

The Commission was established by an act of Congress in 1959 for the purpose of monitoring the relationships between the governments in our federal system and recommending ways to improve governmental cooperation and effectiveness. Elected and appointed members of Federal, State, and local governments meet periodically to review a broad array of intergovernmental concerns and problems. On the basis of its research the Commission makes recommendations to encourage a better financial and power balance in the federal system.

Throughout its 23-year history the Commission has consistently provided excellent research on the nature of our complex federal system. The quality and the constructive impact of this work represents an ample return on the investment of public funds.

In light of this record we must approach any attempt to refashion the Commission with caution. No change should be permitted to disrupt the work of the ACIR or detract from its fine performance record. The House bill with the inclusion of Senator DURENBERGER'S amendment takes this cautious approach.

The proposal before the Senate recognizes changes that have occurred in the intergovernmental system since the creation of the Commission in 1959. The expanded role of school boards, small communities, and the judicial system in the formulation and implementation of public policy in our country provide the justification for including membership for groups on the ACIR.

I particularly support the addition of an elected member of a local school board to the Commission. School boards do play a major role in our intergovernmental system today by virtue of the total size of their expenditures, the number of people that they employ and the range of services that they provide. Nationwide school boards expend nearly \$100 billion and employ nearly 3 million people. The size and role of school boards has grown a great deal since the Commission was created in 1959.

The addition of a school board member to the ACIR will guarantee that broad education concerns are represented in the Commission's policy discussions, and will afford other elected officials on the Commission a keener understanding of the concerns faced on a day-to-day basis by those in the education field.

In expanding the Commission, however, this proposal remains sensitive to the essential criteria for membership on the Commission. With the passage of this legislation the ACIR will continue to be comprised of elected officials from general purpose governments, and will retain a balance between the various levels of government. The types of governments represented on the Commission, for the most part, will be universally present throughout the Nation, and the Commission size will be kept at a manageable level.

I believe that the amendment offered by Senator Durenberger, by restoring the number of mayors nominated jointly by the U.S. Conference of Mayors and the National League of Cities to four, corrects an inequity that was created by the House-passed version. The House bill unfairly reduced the large city representation by one. The restoration of this member in conjunction with the addition of a township member to the Commission is a reasonable compromise that does not jeopardize the balance among the levels of government represented on the ACIR. I know that the National League of Cities was particularly concerned about the House-passed version of the bill. I have received a letter from the League of Cities stating that the group finds the proposed amendment acceptable. I ask unanimous consent to have the NLC letter printed in the RECORD.

There being no objection, the letter was ordered to be printed in the

RECORD, as follows:

NATIONAL LEAGUE OF CITIES. Washington, D.C., December 13, 1982. Hon. WILLIAM V. ROTH, JR.,

Chairman, Committee on Governmental Affairs, U.S. Senate, Dirksen Senate Office

Building, Washington D.C.

DEAR SENATOR ROTH: We understand that you will offer an amendment to H.R. 7173, which makes changes in the law governing the Advisory Commission on Intergovern-mental Relations, dealing with membership for townships.

Under your amendment, an additional Commission member would be authorized, representing townships as defined by the Bureau of the Census. The township member would be appointed by the President from a panel of at least two names submitted by the National Association of Towns and Townships.

The National League of Cities has no objection to your amendment.

Sincerely,

ALAN BEALS. Executive Director.

Mr. ROTH. In conclusion, Mr. President, I beleive that the amended House bill recognizes changes in the roles and responsibilities of Governments in our Nation that have occurred since the ACIR was created. I urge the Senate to pass the amended version of H.R. 7173 and to permit the House ample time to consider our changes. Passage of this proposal in the 97th Congress will allow the ACIR to move quickly to incorporate its new members and to continue its important and excellent work in the area of intergovernmental relations.

Mr. PERCY. Mr. President, I wholeheartedly support H.R. 7173, as amended, and urge its expeditious

passsage.

H.R. 7173 will expand the membership of the prestigious Advisory Commission on Intergovernmental Relations for the First time since its creation in 1959. In my view, this bill brings the ACIR into the present by modifying its composition to more adequately reflect the federal system as

its stands today.

H.R. 7173 expands the ACIR from 26 to 30 members by adding one elected school board member, one Federal judge, one State judge and one township official. I am particularly pleased at the inclusion of the elected school board official because it reflects the intent of S. 2338, a bill I introduced earlier this year with the distinguished chairman of the Governmental Affairs Committee, Senator ROTH, and several other Senators, which would have added three elected school board members.

Mr. President, the ACIR was established to bring together representatives of the Federal, state, and local governments to consider common problems. The Congress charged the ACIR with providing a forum for discussing the administration and coordination of Federal grant programs requiring intergovernmental cooperation. The ACIR is also responsible for recommending the most desirable allocation of governmental functions, duties, and revenues among the several levels of government. This function is central to today's ongoing debate over the new Federalism. The ACIR has thus far carried out its duties well and, as a result, is a highly respected group.

As a former member of the ACIR, I have been concerned, however, that the Commission's membership has not changed over the years to reflect the growing Federal system. School boards, for example, the focus of my legislation, have enjoyed dramatic growth in their role as a governmental unit since the late 1950's. Yet the ACIR has never had school board representation even though school boards today control more public dollars and more employees than any other unit of local government. Towns and townships also have expanded their role as local units of government and deserve ACIR recognition.

Mr. President, I want to commend Senator Roth for his leadership in making these important changes to the ACIR. Much credit also goes to the very able chairman of the Intergovernmental Relations Subcommittee, Senator Durenberger, who held hearings on S. 2338 and his own bill to add town and township representation to the Commission. His work on the ACIR and his expertise in this area is valued and very much appreciated.

Last, I would also like to acknowledge the hard work of our good colleagues in the House of Representatives, chairman of the Intergovernmental Relations Subcommittee, Congressman L. H. FOUNTAIN, and Congressmen Ray McGrath and Bun Brown, who steered similar legislation through the House several weeks ago.

Mr. President, I urge the adoption of H.R. 7173 to modify the ACIR and, in my judgment, make it better and more effective than ever before.

Mr. SASSER. Mr. President, I rise to state my support for this legislation to expand the membership of the Advisory Commission on Intergovernmental Relations. I believe that these new members can add an important new dimension to the commission.

I am particularly pleased that a school board member may soon sit on the ACIR. School districts certainly deserve this voice in the Commission decisionmaking on intergovernmental policy. The single largest State-local government function is education. At the local level, 36 percent of the total spending is for schools, and a large portion of every State budget is also committed to education.

Yet this important segment of the intergovernmental system has had no voice in the policies voted upon by the very influential ACIR. I believe we need to correct this.

The bill before us does just that. H.R. 7173 provides for representation on the Commission for school boards. School districts now exist in 49 States. Only Hawaii has a State system, and 94 percent of the school boards must stand for popular election. Fully 90 percent of the school districts are fiscally independent.

School districts must perform a variety of services, ranging from food processing to transportation; services to the elderly and day care for preschoolers: and recreation centers to health centers.

More than \$100 billion in taxes were collected by school districts in 1979. These units of Government have earned their place at the table when the Advisory Commission makes decisions affecting the federal system.

So, as a member of the Advisory Commission on Intergovernmental Relations for the past 4 years and as the ranking Democrat on the Senate Subcommittee on Intergovernmental Relations, I support this legislation. In addition to the new seat for an elected school board member, there will be appointments to represent State courts, Federal courts, and township governments. I believe that the perspective of these representatives will contribute greatly to the work of the Advisory Commission.

I urge my colleagues in the Senate

to vote for this measure.

The PRESIDING OFFICER. The bill is before the Senate and open to amendment. If there be no amendment to be offered, the question is on the third reading and passage of the bill.

The bill (H.R. 7173) was ordered to a third reading, was read the third time, and passed.

# PROCESSED PRODUCT SHARE OF U.S. AGRICULTURAL EXPORTS

Mr. STEVENS. Mr. President, I ask unanimous consent that the Finance Committee be discharged from further consideration of Senate Concurrent Resolution 122 relating to the processed product share of U.S. agricultural exports, and I ask for its immediate consideration.

The PRESIDING OFFICER. Without objection, it is so ordered.

The resolution will be stated by title. The legislative clerk read as follows: A resolution (S. Con. Res. 122) relating to the processed product share of United States agricultural exports.

The Senate proceeded to consider the resolution.

## **UP AMENDMENT 1536**

Mr. STEVENS. Mr. President, I send to the desk an amendment on behalf of Senator Percy and ask for its immediate consideration.

The PRESIDING OFFICER. The

amendment will be stated.

The legislative clerk read as follows: The Senator from Alaska (Mr. Stevens), on behalf of Mr. Percy, proposes an unprinted amendment numbered 1536.

Page 3, strike lines 3 through 6 and on line 7, renumber paragraph "4" to read

paragraph "3"

Mr. PERCY. Mr. President, in my statement late last month when submitting this resolution along with my colleague from North Dakota (Mr. BURDICK), I referred to my working involvement with the Export Processing Industry Coalition (EPIC). EPIC is a new concept for achieving the goals of agriculture and labor. The uniqueness of the coalition is in the uniting of labor and industry to work in a spirit of cooperation to expand U.S. exports of processed or value-added agricultural commodities. The industry sponsors of EPIC are the Corn Refiners Association, the Millers' National Federation, and the National Soybean Processors Association. EPIC's labor sponsor is the Industrial Union Department of the AFL-CIO whose members work in America's processing facilities. The international unions participating in EPIC are the: Allied Industrial Workers of America; American Federation of Grain Millers; Bakery, Confectionery & Tobacco Workers; International Molders & Allied Workers; International Union of Operating Engineers; International Woodworkers of America; Oil, Chemical & Atomic Workers; United Brotherhood of Carpenters & Joiners; United Cement, Lime, Gypsum & Allied Workers; and United Steelworkers of America.

Mr. President, there are now 24 organizations lending their support to this resolution. To give my colleagues an indication of the broad-based interest in increasing value-added exports, I would like to recite the names of these

support groups:

National Association of State Departments of Agriculture; National Governors' Association; Poultry and Egg Institute of America; American Farm Bureau Federation; Wine Institute; American Association of Port Authorities; Potato Chip/Snack Food Association; National Cattlemen's Association: Protein Grain Products International; Western Great Lakes Maritime Association; North Dakota Agricultural Products Utilization Commission; National Broiler Council; Food Processing Machinery and Supplies Association; Rice Millers Federation; National Turkey Federation; National Farmers Organization; National Conference of State Legislatures; Independent Bankers Association; National Rural Electric Cooperative Association: National Sunflower Association; National Wool Growers Association; National Cotton Council; American Textile Manufacturers Institute; and the American Meat Institute.

The amendment (UP No. 1536) was

agreed to.

The PRESIDING OFFICER. The question is on agreeing to the concurrent resolution.

The concurrent resolution (S. Con. Res. 122), as amended, was agreed to.

The preamble was agreed to.

The concurrent resolution as amended, with its preamble, reads as follows: S. Con. Res. 122

Whereas, without ignoring other concerns in the trade field, the American economy urgently needs the stimulus of increased agricultural markets to create jobs, increase personal income, improve our balance-of-payments postion, and broaden and expand the tax base for needed Government revenue; and

Whereas the efficient productivity of the agricultural sector provides one of the greatest opportunities for such expanded

exports: and

Whereas it is in the best interest of American agriculture and economy that export expansion include processed, as well as unprocessed, agricultural products; and

Whereas export of value-added processed agricultural products has not shared proportionately in the growth of world demand for such products as has the export of unproc-

essed products; and

Whereas economic studies by United States Department of Agriculture show export value-added agricultural products creates a great multiplier of economic benefits in terms of jobs and income increased revenue to the Government; and

Whereas expanding exports of such valueadded processed agricultural products increases Government revenues from the broadened tax base of the resulting stimulated economy and increase in employment and personal income: Now, Therefore, be it

Resolved, by the Senate (the House of Representatives concurring), That it is the sense of this Congress that the President should take every possible action to encourage increasing the processed product share of United States agricultural exports, including but not limited to—

(1) urging our negotiators to attempt to include a quantity of value-added processed agricultural products in any further extension or renewal of grains agreements with the Soviet Union, or other nonmarket econ-

omy countries;

(2) seeking the elimination of unfair trade practices by foreign competitors, through vigorously pursuing international trade negotiations to assure fair competition for United States agricultural processors in world markets;

(3) utilizing authorities of the Commodity Credit Corporation of the United States Department of Agriculture and the Export-Import Bank to ensure that credit arrangements for agricultural and agricultural product exports are on terms equal to those offered by other countries to assure fair competition.

## COAST GUARD OFFICER CANDIDATE PROGRAM

Mr. STEVENS. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of H.R. 6804, the Coast Guard officer candidate bill.

The PRESIDING OFFICER. Is there objection?

The Chair hears none, and it is so ordered.

The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (H.R. 6804), an act to provide subsistence allowances for members of the Coast Guard Officer Candidate Program.

The Senate proceeded to consider the bill.

The PRESIDING OFFICER. The bill is before the Senate and open to amendment. If there be no amendment to be offered, the question is on the third reading and passage of the bill.

The bill (H.R. 6804) was ordered to a third reading, was read the third time, and passed.

## FISHERY CONSERVATION AND MANAGEMENT IMPROVEMENT

Mr. STEVENS. Mr. President, I ask unanimous consent that the Senate now proceed to the consideration of H.R. 5002.

The PRESIDING OFFICER. Is there objection?

The Chair hears none, and it is so ordered.

The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (H.R. 5002) to improve fishery conservation and management.

The Senate proceeded to consider the bill.

## UP AMENDMENT 1537

Mr. STEVENS. Mr. President, I send to the desk an amendment on behalf of the Senator from Oregon (Mr. Packwood) and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Alaska (Mr. Stevens), on behalf of Mr. Packwoop, proposes an unprinted amendment numbered 1537.

Mr. STEVENS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Strike section 5(1)(B) and redesignate section 5(1)(C) accordingly.

The amendment (UP No. 1537) was agreed to.

Mr. PACKWOOD. Mr. President, I should like to discuss with the Senator from Vermont a jurisdictional question regarding amendments added to S. 2450 on the Senate floor by the Committee on Commerce, Science and Transportation. These amendments, which have been added to legislation dealing with the Magnuson Fishery Conservation and Management Act, are both reauthorizations. One is a 1-year extension of the Fisheries Loan Fund—which is part of the Fish and Wildlife Act of 1956)—and the other reauthorizes the Anadromous Fish Conservation Act.

As Senator Stafford can verify, questions have been raised between the committee he chairs, Environment and Public Works, and the committee I chair, Commerce, Science and Transportation, concerning proper jurisdic-

tion over these measures. I am pleased to say that it is my understanding that our two committees have now resolved this difference. Under our agreement, the Commerce Committee will have sole jurisdiction in the future over the fisheries loan fund. This in no way changes the fact that the Committee on Environment and Public Works will retain jurisdiction over the preponderance of the Fish and Wildlife Act of 1956. As far as the Anadromous Fish Act is concerned, it shall be referred jointly in the future to both Commerce and Environment.

This appears to me to be a reasonable solution. The fisheries loan fund is strictly a marine fisheries program and therefore properly belongs in the Commerce Committee. The Anadromous Fish Act, on the other hand, crosses jurisdictional lines and is best handled by giving both committees a

chance to review future legislation in management goals to include consideration of social and economic issues, set

I would like to ask Senator Stafford, at this point, if my characterization of the situation is in line with his understanding and if he is willing to accept this compromise on behalf of the Committee on Environment and Public Works.

Mr. STAFFORD. I say to the Senator from Oregon that he has indeed accurately described the situation. The agreement which has been reached regarding the fisheries loan fund and the Anadromous Fish Act does appear reasonable to me. The fisheries loan fund, as Senator Packwood has said, is concerned solely with marine fisheries, which is the jurisdiction of the Commerce Committee. And the Anadromous Fish Act must, by its nature, be referred to both committees since we are dealing here with both fresh water and marine fisheries.

On behalf of the Committee on Environment and Public Works I am pleased to accept this agreement. The compromise will facilitate the work of our two committees and will promote more effective fisheries legislation.

Mr. PACKWOOD. I thank the Senator from Vermont for his cooperation in this matter. At this point, I would ask unanimous consent that the Parliamentarian be directed to follow this agreement in making referrals of future measures covering these issues.

Mr. STAFFORD. I concur with the

Senator's suggestion.

Mr. GORTON. Mr. President, after months of discussion, public hearings, and comment from the industry, the Senate has before it a package of comprehensive amendments to the Magnuson Fishery Conservation and Management Act.

The Magnuson Fishery Conserva-tion and Management Act is unquestionably the single most important piece of fisheries legislation in our Nation's history. It established a comprehensive system of U.S. management of fisheries in an area of over 2 million square nautical miles, within which is found 15-20 percent of the world's traditionally harvested marine fishery resources. The act authorized the Feder-Government to conserve and manage fishery resources within the Fishery Conservation Zone, extends from the seaward boundaries of the territorial sea to 200 nautical miles from shore.

The act set up a system of regional councils to manage fisheries, in recognition of the fact that fish do not respect State boundaries. The councils have principal responsibility for development of fishery management plans for resources within the FCZ adjacent to the States and territories comprising the councils' areas of jurisdiction. In addition, the act set rigid biological requirements for harvest, broadened

management goals to include consideration of social and economic issues, set national standards against which management plans must be gaged, reserved certain resources exclusively for domestic use, and delcared the right of the United States to enforce such measures. With respect to foreign fishing, the act limited foreign allocations in the FCA to that portion of the optimum yield that would not be harvested by the U.S. industry, in recognition of the continuing strength and importance of our domestic fisheries industry.

Several major changes have taken place in fisheries management in the past several years since enactment of the act. First, a "fish and chips" policy was implemented in our dealings with foreign nations, whereby cooperation by foreign nations in U.S. fisheries development was made a significant factor in determining directed allocations. Second, the State Department, in cooperation with the National Marine Fisheries Service, instituted what would prove to be a highly successful policy of withholding a percentage of directed allocations of foreign nations, and gradually releasing these allocations as foreign nations demonstrated their good faith compliance with the "fish and chips" policy. Finally, provision was made for full observer coverage on foreign vessels fishing in our FCZ, to be financed by fees paid in advance by foreign vessel owners. Each of these changes was specifically designed to strengthen and support our domestic fishing industry.

Yet fishermen and processors, council members and interested Federal agencies, and all those who are intimately familiar with the day-to-day workings of the act, have reported that there continue to be impediments to the smooth functioning of the act, and to the fulfillment of the goals of the act. These problems include: Obstacles to timely plan development; delays in the review and approval of fishery management plans, inefficient procedures for handling emergencies in fisheries resources, impediments to the efficient functioning of the regional councils, and continuing inadequacies in observer and enforcement efforts.

Mr. President, I am proud to have played a part in this important effort to improve the functioning of national fisheries management. I cosponsored S. 2450, which received the unanimous endorsement of the Senate Commerce Committee, and I believe that the package before us today, which is the product of months of work by the Senate and House in resolving the differences between the Senate and House bills, merits the enthusiastic support of all of my colleagues. Our goal has been to make the regulatory framework fit the reality and needs of

sound fisheries management, as opposed to asking fisheries management to fit within an often unrealistic and unwieldly regulatory process. But our task must not end with this package of amendments; we must continue to be vigilant in insuring that the legislation fits the changing needs of the people and industries it serves and affects.

Mr. President, I am pleased to rise in support of these amendments to the Magnuson Fishery Conservation and Management Act, and the reauthorization of that act, as well as of several other important pieces of fisheries legislation. Ultimately, enactment of this bill should bring us closer to realization of the goals of the act—to promote, protect, and develop the resources of our Fishery Conservation Zone for the benefit of the U.S. fisheries industry.

Mr. PACKWOOD. Mr. President, the Senate will today be considering H.R. 5002. I am pleased that the Senate has the chance to vote on this package of amendments to the Magnuson Fishery Conservation and Management Act (MFCMA) prior to the end of this Congress. The amendments have been under review and discussion for over a year and represent a great deal of work by both the Senate and the House. Both bodies have conducted detailed hearings and reviewed numerous pieces of draft legislation.

During most of this time the House and Senate have pursued independent courses in drafting proposed changes to the act. But over the last several months the two approaches have been blended so that we now have before us a bipartisan package representing the best proposals of both bodies on how our Nation's fisheries should be managed.

I would like to briefly outline some of what I consider to be the highlights of this legislation.

Section 2 of the bill provides a detailed system for determining in what quantity and manner surplus U.S. fishery resources shall be allocated to foreign nations for their harvest. The provision closely ties these allocations to a specific set of criteria under which the various foreign nations desiring to fish in our waters will have to show that their fishery policies and conduct of fishing operations provide benefits to the U.S. fishing industry.

In making the allocation decisions the Secretaries of State and Commerce will be required to review a range of factors. Examples of these factors are: The foreign nation's fishery trade posture, compliance with U.S. fishery law, direct and indirect assistance provided to U.S. fishermen and fulfillment of contractual agreements, as well as the foreign nation's need for the fishery resources as a source of protein for its citizens.

While we are emphasizing that it is our fishermen and processors who have the first and only right to these fishery resources, we are not trying to make it impossible for foreign nations to qualify for and harvest a share of our abundant ocean fisheries. What we are trying to make clear is that no foreign nation has an inherent right to these fishery resources. Fish in the U.S. 200-mile zone will only be allocated to a foreign nation if those fish are surplus to the needs of U.S. industry, and if the foreign nation meets the types of requirements I outlined above.

Another important section of S. 2450 deals with the placing of American observers aboard foreign fishing vessels operating within our 200-mile zone. There has long been a desire to have 100 percent coverage of these foreign vessels since there is a fear within the U.S. fishing industry that some of these foreign ships may be conducting fishing operations which violate the terms of their permits. In order to reach this goal of 100 percent observer coverage, S. 2450 contains language which would create an alternative to the current requirement that observers be paid with funds appropriated by Congress. Under this new system, set to begin in 1984, if insufficient funds are appropriated to insure 100 percent observer coverage, then the foreign fleets must, as a condition of their fishing permits, hire observers on a contractual basis and pay them directly. This means that insufficient appropriations will no longer be the cause of our having less than 100 percent observer coverage of the foreign fishing fleets in the fishery conservation zone.

Any shortfall on the appropriations side of the ledger will be made up for by the requirement that the foreigners contract and pay for whatever additional observer services may be required. This system also continues the guarantee that there will be no cost to U.S. taxpayers; all costs of the observer program will be borne by the foreign nations fishing in our FCZ.

The amendments also provide a new system by which the Secretary of Commerce will review the fishery management plans submitted by the various regional fishery management councils. At the current time it can take close to a year for a complicated plan to be reviewed. This is far too long a period when dealing with a living resource such as fish. In order to speed up the review process we have made numerous changes in the procedures and timeframes to be used by the Secretary. Under the system we are proposing the Secretary will be able to approve a fishery management plan in as little as 75 days after its submission. But in no case is he to take more than 95 days unless there is a disapproval and the council must resubmit a revised plan.

These new procedures and time limits will go a long way toward ad-

dressing the complaints of the many Federal fishery management professionals around the Nation who have made it clear that more timely action is required on the secretarial level.

Another significant section of the bill is aimed at avoiding delays in the regulatory process which have been caused by the Paperwork Reduction Act, the Regulatory Flexibility Act, and Executive Order 12291. While the amendments do not negate the applicability of these laws, the time limits for compliance will now be specified in the MFCMA. In other words, the purposes of the acts will have to be fulfilled within the timeframe provided in the MFCMA. This will coordinate all Federal review procedures within the same process being used for fishery management plan review by the Secretary of Commerce. This should reduce the total amount of time necessary for plan approval, as well as avoid possible conflicts between the time requirements of the MFCMA and these other acts.

I want to be very clear about this point. The Commerce Committee is very serious about the requirement that these acts not interfere with the time requirements we have specified in the MFCMA. It is our intent that even if the requirements of these regulatory acts are not completed within the MFCMA's timeframe as specified in these amendments, the rest of the MFCMA's procedures will proceed on schedule without regard to either of the regulatory acts or the Executive order in question. The Office of Management and Budget has determined that the timeframes provided by these amendments to the MFCMA are sufficient for proper regulatory review to be carried out. We plan to hold OMB to its word on this issue.

S. 2450 also contains a series of authorizations for a variety of fishery programs. The MFCMA itself is authorized for an additional 3 years at totals of \$59,000,000, \$64,000,000 and \$69,000,000. This will be sufficient to maintain the National Marine Fisheries Service programs which are carried out under the authority of the MFCMA.

Beyond this authorization, however, S. 2450 also provides reauthorizations for the Anadromous Fish Conservation Act, the Fisheries Loan Fund and Volunteer Service portions of the Fish and Wildlife Act of 1956, and the Central, Western and South Pacific Fisheries Development Act.

It is very important that all these Acts be reauthorized, and the fact that they have been attached to S. 2450 makes passage of that bill even more critical.

I hope my colleagues will agree with me that this bill is a constructive approach to Federal fisheries management, and that they will join me in ap-

proving the measure.

Mr. CANNON. Mr. President, I join Senator Packwood in urging that the Senate pass H.R. 5002, a bill whose principal purpose is to improve the Magnuson Fishery Conservation and Management Act. As a result of some hard work with our House counterparts we have come up with a package of amendments that represents a sound compromise between S. 2450 as we reported it out of the Commerce Committee and H.R. 5002, the House Merchant Marine and Fisheries Committee bill covering the same issues.

I should like to address two very important themes running throughout this bill. First, the dynamic conditions of the marine environment require that fishery resources be conserved and managed through timely decisions based on the best and most current scientific information available. Second, in giving valuable rights to the vessels of foreign nations to harvest and process the fish found in the U.S. Fishery Conservation Zone, this country must insure that value is re-

ceived in return.

Timely and effective fishery management was the initial stimulus for the legislation we consider today. The eight regional fishery management councils, the quasi-Federal bodies composed of representatives of State and Federal governments and the private sector which are charged with the primary responsibility for deciding which U.S. fisheries should be regulated and how, concluded about 2 years ago that the statutory procedures governing their operations needed to encourage more timely management decisions. Indeed, since the Magnuson Act became law in 1976, very lengthy delays have often occurred in the review and implementation of fishery management plans. S. 2450 is an outgrowth of the council's concern in this area.

The bill focuses on three aspects of the fishery management process. At the plan development phase, we have sought to relieve the councils of the overlay of bureaucratic rules under the Federal Advisory Committee Act, while continuing the public participation guarantees of that act. Next, during the phase when the Secretary of Commerce reviews a fishery management plan to decide whether to approve or disapprove it in light of the Magnuson Act, we have set a deadline which will force the Secretary to make a timely decision on whether to review the plan. Finally, we would have the implementation phase of the plan run concurrently with the review phase; under current law these two phases are consecutive, causing needless delay. In light of concerns expressed about the reported versions of S. 2450 and H.R. 5002, we have taken care not to impair the administration's ability

to oversee regulatory proposals and paperwork. We retained, however, the requirement that such oversight be carried out within the time limitations set forth in our bill because it would be pointless to establish deadlines on the Secretary of Commerce if plans could still be held up due to paperwork backlogs elsewhere in the executive branch.

The second theme I mentioned is the policy of value given for value received. In the context of our fishery relationships with other countries, this policy is known as "fish and chips." Development of the harvesting and processing sectors of the U.S. fishing industry is the cornerstone of the policy. When the Magnuson Act was enacted 6 years ago, development of the U.S. industry was implied in the statutory language. In 1980 when I was chairman of the Commerce Committee, we passed the American Fisheries Promotion Act and included in that legislation explicit amendments to the Magnuson Act to leave no doubt that development of the U.S. industry was our main goal in seeking value from foreign nations whose vessels operate in our fisheries zone.

I am pleased to say that the State and Commerce Departments have faithfully carried out the intent of our 1980 legislation. In fact, they have taken a further step, which has been very helpful to U.S. fishing interests. They have held back 50 percent of the foreign harvesting allocations at the beginning of the year, with periodic subsequent releases of those fishing rights based on the given foreign nation's willingness to cooperate in our fish and chips policy. We like this practice so much, we decided to incorporate it into statutory language, with a variation to provide a small amount flexibility as circumstances change in the future.

To the greatest possible extent, we anticipate that the State and Commerce Departments will make decisions on realeases of harvesting allocations on a fishery-by-fishery basis, with special emphasis on providing opportunities for U.S. business in each particular fishery. In my mind it would be a regrettable error to trade the interests of one U.S. region's fishermen and processors against another region's.

Mr. President, again I urge favorable action on this legislation. It promises to give us more timely fishery management and provides additional means for encouraging foreign nations to assist the development of the U.S. fishery industry.

The PRESIDING OFFICER. The bill is before the Senate and open to further amendment. If there be no further amendment to be offered, the question is on third reading and passage of the bill.

The bill (H.R. 5002) was ordered to a third reading, was read the third time, and passed.

## CORRECTION OF ENROLLMENT OF H.R. 5547

Mr. STEVENS. Mr. President, I now ask unanimous consent that the Senate proceed to the consideration of House Concurrent Resolution 435.

The PRESIDING OFFICER. Is there objection?

The Chair hears none, and it is so ordered.

The resolution will be as stated.

The assistant legislative clerk read as follows:

A resolution (H. Con. Res. 435) correcting the enrollment of H.R. 5447.

Mr. STEVENS. Mr. President, I ask for immediate consideration of this resolution.

The resolution (H. Con. Res. 435) was agreed to.

SENATE CONCURRENT RESOLU-TION 136-PRINTING COPIES OF GENERAL EXPLANATION OF REVENUE PROVISIONS OF TAX EQUITY AND FISCAL RE-SPONSIBLITY ACT OF 1982

Mr. STEVENS. Mr. President, I send to the desk a concurrent resolution in behalf of the Senator from Kansas (Mr. Dole) and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will state the concurrent resolution.

The assistant legislative clerk read as follows:

## S. Con. Res. 136

Resolved by the Senate (the House of Representatives concurring), That three thousand additional copies of the General Explanation of the Revenue Provisions of the Tax Equity and Fiscal Responsibility Act of 1982, prepared by the staff of the Joint Committee on Taxation, be printed for the use of the Joint Committee on Taxation.

The Senate proceeded to consider the concurrent resolution.

Mr. DOLE. Mr. President, this resolution, which has been cleared on both sides, the majority and minority, provides for the printing of an additional 3,000 copies of the forthcoming publication by the staff of the Joint Committee on Taxation, entitled "General Explanation of the Tax Equity and Fiscal Responsibility Act of 1982."

This general explanation of TEFRA is similar to Joint Committee staff explanations of major tax legislation enacted in the past, and will be in great demand by offices of the Members of Congress—both the Senate and the House. The cost of printing the additional 3,000 copies when the document is initially published will be substantially less than if it were done later in a separate reprinting.

Thus, I urge adoption of the concurrent resolution.

The question is on agreeing to the concurrent resolution.

The concurrent resolution agreed to.

## JOB TRAINING PARTNERSHIP ACT AMENDMENTS

Mr. STEVENS. Mr. President, I send to the desk a bill on behalf of Senator QUAYLE making corrections to the Job Training Partnership Act.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (S. 3113) to make certain minor and technical amendments to the Job Training Partnership Act.

The Senate proceeded to consider the bill (S. 3113) to make certain minor and technical amendments to the Job Training Partnership Act, which was read the first time by title and the second time at length.

Mr. QUAYLE. Mr. President, today I am introducing a bill to make a few minor, technical amendments to the Job Training Partnership Act. I ask unanimous consent that the bill be taken up for consideration and passed

as introduced.

My bill makes changes which are technical in nature. For example, there are corrections of misspellings and cross-references. One of the corrections is to include an amendment to the Wagner-Peyser Act which was inadvertently omitted from the final version of JTPA. The agreement for this amendment is described in the conference report. See House Report No. 97-889, p. 136. I believe that all interested parties have had a chance to comment on this bill and there have been no objections to it. It has also been circulated on the House side and no one there has any substantive problems with these corrections.

Mr. President, these technical amendments are necessary to avoid confusion during the first year of implementing JTPA. I move that the Senate proceed to immediate consider-

ation of this bill.

The PRESIDING OFFICER. The bill is open to amendment. If there be no amendment to be proposed, the question is on the engrossment and third reading of the bill.

The bill (S. 3113) was ordered to be engrossed for a third reading, read the third time, and passed, as follows:

## S. 3113

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 103(c)(3) of the Job Training Partnership Act (hereafter in this Act referred to as the "Act") is amended by striking out "104" and inserting in lieu thereof "101".

(b) Section 106(d)(3) of the Act is amended by striking out "ex-offenders" and insert-ing in lieu thereof "offenders".

(c) Section 108(b)(2)(A)(iv) of the Act is amended by striking out "projects" and inserting in lieu thereof "payments".

(d) Section 122(a)(3)(C) of the act is amended by striking out "executive officers" and inserting in lieu thereof "elected officials".

(e) Section 125(c) of the Act is amended by striking out "subsection" and inserting in lieu thereof "section"

(f)(1) Section 141(c) of the Act is amended by inserting after "unless" the following: "the Secretary determines that".

(2) Section 141(g) of the Act is amended-(A) by striking out the word "which"; and (B) by striking out the word "title" and inserting in lieu thereof the word "Act"

(g) Section 142 (b) of the Act is amended by inserting after "aid" the following: "furnished under any Federal or federally assisted program based on need".

(h) Section 143(d) of the Act is amended by striking out "1921" and inserting in lieu

thereof "1931"

(i) Section 181(f)(5) of the Act is amended by striking out "this section" and inserting in lieu thereof "this subsection".

SEC. 2. (a) Section 203(a)(1) of the Act is amended by striking out "participate" and inserting in lieu thereof "participate"

(b) Section 203(b)(2) of the Act is amended by striking out "expend" and inserting in lieu thereof "be expended".

SEC. 3. Section 308 of the Act is amended

by-

(1) striking out ", as described in section 121," and inserting in lieu thereof "with";

(2) inserting before the period at the end thereof the following: ", in accordance with the provisions of section 121"

SEC. 4. (a) Section 401(h)(2) of the Act is amended by striking out "103" and inserting in lieu thereof "106"

(b)(1) Section 402(a)(2) of the Act is amended by inserting "the special nature of" after "because of".

(2) Section 402(c)(4) of the Act is amended by striking out "103" and inserting in lieu thereof "106"

(c) Section 454(b) of the Act is amended by striking out "title II" and inserting in lieu thereof "title IV".

(d)(1) Section 463(a)(1) of the Act is amended by inserting after "processing systhe following: "related to labor market information"

(2) Section 463(a)(2) of the Act is amended by inserting after "coding measures" the following: "related to labor market informa-

(e)(1) Section 464(a)(1) of the Act is amended by inserting "for each fiscal year" after "part"

(2) Section 464(b)(7) of the Act is amended by striking out "providing" and inserting in lieu thereof "provide".

SEC. 5. Section 13 of the Wagner-Peyser Act, as added by section 501(h) of the Act is amended by inserting "(1)" after "(b)" and by adding at the end thereof the following new paragraph:

"(2) No funds paid under this Act may be used by any State for advertising in newspapers for high paying jobs unless such State submits an annual report to the Secretary beginning in December 1984 concerning such advertising and the justifications therefor, and the justification may include that such jobs are part of a State industrial development effort.".

SEC. 6. The amendments made by this Act shall not be construed as affecting the term 'originally enacted" as applied to the Job Training Partnership Act in 402(a)(8)(A)(v) of the Social Security Act as amended by section 503(a) of the Act.

## ACACIA MUTUAL LIFE INSUR-ANCE COMPANY INCORPORA-TION ACT AMENDMENT

Mr. ROBERT C. BYRD. Mr. President, I send to the desk on behalf of Mr. DECONCINI a bill, and I ask unanimous consent that it be considered as having been read the first and second times, that it be considered, and proceed to the third reading and passed, and that the motion to reconsider be laid on the table.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill (S. 3114) is as follows:

#### 8. 3114

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That Section 3 of the Charter of Acacia Mutual Life Insurance Company, as amended, be and the same is hereby further amended to read as follows:

"SEC. 3. The number of directors of said company shall be fixed by the by-laws. A number of the directors, less than a majority, shall be elected by the policyholders at the annual meeting of the company from among themselves for a term of three years; that in all cases of a tie vote the choice shall be determined by lot, and in all other cases a plurality vote shall decide. The annual meeting of the company shall be held at such time and place as provided in the bylaws. The board of directors shall elect from among the policyholders at their first meeting succeeding the annual meeting of the company a president, one or more vice presidents, a secretary, and a treasurer, and from time to time such additional officers as the by-laws may provide. The president, the vice presidents, the secretary, and the treasurer shall each give bond with surety to the company in such sum as the board of directors may require for the faithful performance of his duties. At all meetings of the board of directors a majority of the entire board shall form a quorum. In case of any vacancy in the board of directors by death, resignation, or otherwise, such vacancy may be filled by the remaining directors from among the policyholders of the company to serve for the remainder of the unexpired term."

#### AMENDMENT OF TRIBALLY CON-TROLLED COMMUNITY COL LEGE ASSISTANCE ACT OF 1978

Mr. STEVENS. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on S. 2623.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the House insist upon its amendment to the bill (S. 2623) entitled "An Act to amend and extend the Tribally Controlled Community College Assistance Act of 1978, and for other purposes", and ask a conference with the Senate on the disagreeing votes of the two Houses thereon.

Ordered, That Mr. Perkins, Mr. Ford of Michigan, Mr. Gaydos, Mr. Andrews, Mr. Simon, Mr. Weiss, Mr. Kildee, Mr. Peyser, Mr. Williams of Montana, Mr. Eckart, Mr. Erlenborn, Mr. Coleman, Mr. Erdahl, Mr. DeNardis, Mr. Craig, and Mr. Bailey of Missouri be the managers of the conference on the part of the House.

Mr. STEVENS. Mr. President, I move that the Senate disagree to the House amendment and agree to the request of the House asking a conference and that the Chair be authorized to appoint conferees on the part of the Senate.

The motion was agreed to and the Chair appointed Mr. Cohen, Mr. Goldwater, Mr. Andrews, Mr. Gorton, Mr. Melcher, Mr. DeConcini, and Mr. Inouye conferees on the part of the Senate.

Mr. STEVENS. Mr. President, I ask unanimous consent that it be in order to consider en bloc all of the actions taken by the Senate on the call of the calendar that has just been completed.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. Mr. President, I move to reconsider en bloc the votes by which the calendar items were passed or agreed to.

Mr. ROBERT C. BYRD. Mr. President, I move en bloc to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. STEVENS. I thank the Chair and thank the minority leader very much.

## ORDER OF BUSINESS

Mr. STEVENS. Mr. President, is there any further business to come before the Senate?

Mr. ROBERT C. BYRD. Mr. President, I compliment the distinguished acting Republican leader. I note he stands here at 25 minutes to 12 midnight and he can hardly talk. His voice is hoarse.

Mr. STEVENS. I thank the Senator. It is not hoarse from having shouted too loud because it started before I got talking.

Mr. President, I do thank members of the staff and the Chair for being patient. It was important in our opinion to get this matter to the House of Representatives.

## RECESS UNTIL 11 A.M. TOMORROW

Mr. STEVENS. Mr. President, if there is no further business to come before the Senate, I ask unanimous consent that the Senate stand in recess in accordance with the previous order.

There being no objection, the Senate, at 11:36 p.m., recessed until Saturday, December 18, 1982, at 11 a.m.

## NOMINATIONS

Executive nominations received by the Senate December 17, 1982:

#### THE JUDICIARY

John P. Vukasin, Jr., of California, to be U.S. district judge for the northern district of California vice Stanley A. Weigel, retired.

## CONFIRMATIONS

Executive nominations confirmed by the Senate December 16, 1982:

#### NATIONAL INSTITUTE OF HANDICAPPED RESEARCH

Douglas A. Fenderson, of Minnesota, to be Director of the National Institute of Handicapped Research.

#### DEPARTMENT OF EDUCATION

Edward M. Elmendorf, of Vermont, to be Assistant Secretary for Postsecondary Education, Department of Education.

#### DEPARTMENT OF STATE

Paul D. Wolfowitz, of the District of Columbia, to be an Assistant Secretary of State.

Richard Fairbanks, of the District of Columbia, for the rank of Ambassador while serving as Special Adviser to the Secretary of State.

#### FEDERAL TRADE COMMISSION

George W. Douglas, of Texas, to be a Federal Trade Commissioner for the term of 7 years from September 26, 1982.

## CIVIL AERONAUTICS BOARD

Diane Kay Morales, of Texas, to be a Member of the Civil Aeronautics Board for the term of 6 years expiring December 31, 1988

The above nominations were approved subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.

## THE JUDICIARY

Geoffrey M. Alprin, of the District of Columbia, to be an Associate Judge of the Superior Court of the District of Columbia for a term of 15 years.

Virginia L. Riley, of the District of Columbia, to be an Associate Judge of the Superior Court of the District of Columbia for the term of years prescribed by Public Law 91-358.

## VETERANS ADMINISTRATION

Harry N. Walters, of Virginia, to be Administrator of Veterans' Affairs.

## DEPARTMENT OF DEFENSE

W. Paul Thayer, of Texas, to be Deputy Secretary of Defense.

## UNIFORMED SERVICES UNIVERSITY OF THE HEALTH SCIENCES

Francis Carter Coleman, of Florida, to be a Member of the Board of Regents of the Uniformed Services University of the Health Sciences for the term expiring May 1. 1983.

Perry Albert Lambird, of Oklahoma, to be a Member of the Board of Regents of the Uniformed Services University of the Health Sciences for a term expiring May 1, 1987

David I. Olch of California, to be a Member of the Board of Regents of the Uniformed Services University of the Health Sciences for a term expiring May 1, 1987.

James F. X. O'Rourke, of New York, to be a Member of the Board of Regents of the Uniformed Services University of the Health Sciences for a term expiring May 1, 1987

#### IN THE AIR FORCE

The following officers for appointment in the Reserve of the Air Force to the grade indicated, under the provisions of chapters 34, 831, and 837, title 10, United States Code:

#### To be major general

Brig. Gen. Dan C. Mills, xxx-xx-xxxx FG, Air National Guard of the United States.

Brig. Gen. Charles J. Young, Jr., xxx-xx-x... xx-...FG, Air National Guard of the United States.

## To be brigadier general

Col. Edward R. Aguiar xxxxxxxxx FG, Air National Guard of the United States.
Col. Clifton N. Bishop xxxxxxxxx FG, Air National Guard of the United States.

Col. Carl T. Butterworth XXX-XXXXX FG, Air National Guard of the United States.

Col. Andrew Cali, III, XXX-XXXXX FG, Air National Guard of the United States.

Col. Richard S. Johnson XXX-XX-XXXX FG.
Air National Guard of the United States.
Col. William S. Mahler, XXX-XX-XXX FG.
Air National Guard of the United States.

Col. Dominick C. Marchesiello, xxx-xx-xx... FG, Air National Guard of the United States.

Col. John L. Matthews xxx-xxxxx FG, Air National Guard of the United States.
Col. Alvah S. Mattox, Jr., xxx-xxxxx FG, Air National Guard of the United States.

Air National Guard of the United States.

Col. Robert D. McFrye xxx-xxxx FG,
Air National Guard of the United States.

Col. James R. Mercer, xxx-xxxxx FG, Air National Guard of the United States. Col. Fred L. Michel, xxx-xx-xxxx FG, Air

Col. Fred L. Michel, XXX-XX-XXXX FG, Air National Guard of the United States.
Col. Edward V. Richardson, XXX-XX-XXXX FG, Air National Guard of the United States.

Col. James E. Womack, xxx-xx-xxx FG, Air National Guard of the United States.

The following officers for apppointment in U.S. Air Force under the provisions of chapter 36, title 10, United States Code:

## To be major general

Brig. Gen. William P. Bowden, xxx-xx-xx...
FR, Regular Air Force.

Brig. Gen. William J. Breckner, Jr., xxx-...
xxx-xx. FR, Regular Air Force.
Brig. Gen. Donald D. Brown, xxx-xxxxx

Brig. Gen. Wiliam H. Greendyke. xxx-xx-x...
FR, Regular Air Force.

Brig. Gen. Maurice O. Edmonds, xxx-xx-x	
Brig. Gen. Ronald L. Watts xxx-xx-xxxx	
U.S. Army	

Lt. Gen. William R. Richardson, xxx-xx-x... xxx-... U.S. Army.

The following-named officer under the provisions of title 10, United States Code, section 601, to be assigned to a position of importance and responsibility by the President under title 10, United States Code, section 601:

To be lieutenant general

Maj. Gen. Fred K. Mahaffey xxx-xx-xxxx U.S. Army.

The following-named officer for appointment to the position indicated under the provisions of title 10, United States Code, section 711:

To be senior Army member of the Military Staff Committee of the United Nations

Maj. Gen. Fred K. Mahaffey, xxx-xx-xxx United States Army,

The following-named officer under the provisions of title 10, United States Code, section 601, to be assigned to a position of

importance and responsibility designated by the President in grade as follows:

To be lieutenant general

Maj. Gen. Bennett L. Lewis, xxx-xx-xxxx U.S. Army.

The following-named Army Medical Department officers for appointment in the U.S. Army to the grade indicated under the provisions of title 10, United States Code, sections 611(a) and 624:

To be permanent brigadier general

Col. John E. Major, xxx-xx-xxxx , Medical Corps, U.S. Army.
Col. Billy Johnson, xxx-xx-xxxx Dental

Corps, U.S. Army.

IN THE NAVY

The following-named officer, under the provisions of title 10, United States Code, section 601, to be assigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

To be vice admiral

Rear Adm. Crawford A. Easterling, xxx-.../1310, U.S. Navy.

The following-named officer, under the provisions of title 10, United States Code, section 601, to be assigned to a position of importance and responsibility designated by the President under title 10, United State Code, section 601:

To be vice admiral

Rear Adm. Henry C. Schrader, Jr., xxx-xx-x... xxx-.../1110, U.S. Navy.

The following-named officer, under the provisions of title 10, United States Code, section 601, to be assigned to a position of importance and responsibility designated by the President under title 10, United State Code, section 601:

To be vice admiral

Rear Adm. Thomas R. Kinnebrew, xxx-xx-x.../1110, U.S. Navy.

IN THE AIR FORCE

Air Force nominations beginning Robert R. Thunker, and ending Philip C. Amrhein, Jr., which nominations were received by the Senate on October 20, 1982, and appeared in the Congressional Record of November 29, 1982.

Air Force nominations beginning Bruce C. Bechtel, and ending Carl L. Alden, which nominations were received by the Senate on October 20, 1982, and appeared in the Congressional Record of November 29, 1982.

Air Force nominations beginning Larry D. Abney, and ending James A. Zimmerman, which nominations were received by the Senate on November 5, 1982, and appeared in the Congressional Record of November 29, 1982.

Air Force nominations beginning Glenn E. Adams, and ending Jon E. Zampedro, which nominations were received by the Senate on November 5, 1982, and appeared in the Congressional Record of November 29, 1982.

Air Force nominations beginning Ralph W. Appelgate, and ending Harold N. Walgren, which nominations were received by the Senate on November 15, 1982, and appeared in the Congressional Record of November 29, 1982.

Air Force nominations beginning Marion J. Hardy, and ending Anthony H. Wheeler, which nominations were received by the Senate and appeared in the Congressional Record of December 7, 1982.

Air Force nominations beginning Thomas F. Astaldi, and ending James R. Pope, which nominations were received by the Senate

and appeared in the Congressional Record of December 7, 1982.

## IN THE NAVY

Navy nominations beginning Gary A. Avery, and ending Paul I. Liu, which nominations were received by the Senate on October 20, 1982, and appeared in the Congressional Record of November 29, 1982.

Navy nominations beginning Ernst P. Frage, and ending Ives C. Thillet, which nominations were received by the Senate on October 22, 1982, and appeared in the Congressional Record of November 29, 1982.

Navy nominations beginning Tracy A. Adams, and ending John H. Hughes, which nominations were received by the Senate on November 5, 1982, and appeared in the Congressional Record of November 29, 1982.

ROVERDEF 3, 1882, and appeared in the Congressional Record of November 29, 1982.

Navy nominations beginning Mark R. Achenbach, and ending Jalal A. Najafi, which nominations were received by the Senate on November 15, 1982, and appeared in the Congressional Record of November 29, 1982.

Navy nominations beginning Stanford P. Sadick, and ending Kevin J. McKeown, which nominations were received by the

Senate on November 22, 1982, and appeared in the Congressional Record of November 29, 1982.

Navy nominations beginning Michael A. Fox, and ending Saul Monge, which nominations were received by the Senate and appeared in the Congressional Record of December 7, 1982.

Navy nominations beginning Richard Mills Dunbar, and ending John Mulliss Fiery, Jr., which nominations were received by the Senate and appeared in the Congressional Record of December 7, 1982.

## HOUSE OF REPRESENTATIVES—Thursday, December 16, 1982

The House met at 10 a.m.

Rev. Jonathan L. Graham, First Christian Church, Lexington, Mo., offered the following prayer:

God of infinite compassion, we are drawn again into the season of unique beauty. Compelled by the mystery of it and captured by its meaning, we pray simply that the Prince of Peace may find a birthplace in our hearts.

We are mindful that true peace and security in our lives come from an awareness of Your constant mercy upon us. Facing difficult decisions and monumental tasks, we seek wisdom and we pray for strength, but we also need a powerful presence which is conveyed to us from beyond ourselves. This reality, we do confess, comes from You alone.

Bless us, dear Lord, as we boldly recommit ourselves to the great ideals of peace and justice both in our Nation and within Your world. Amen.

## THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

## MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate agrees to the amendments of the House to a bill of the Senate of the following title:

S. 816. An act to amend the Clayton Act to limit the circumstances under which foreign governments may sue for violations of the antitrust laws, and for other purposes.

The message also announced that the Senate had passed bills of the following titles, in which the concurrence of the House is requested:

S. 2118. An act to designate certain national forest system lands in the State of Wyoming for inclusion in the National Wilderness Preservation System, to release other forest lands for multiple use management, to withdraw designated wilderness areas in Wyoming from minerals activity, and for other purposes; and

S. 3105. An act to modify the judicial districts of West Virginia, and for other purposes.

## WELCOME REV. AND MRS. JONATHAN GRAHAM

(Mr. SKELTON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.) Mr. SKELTON. Mr. Speaker, today we have had the honor of having the Reverend Jonathan Graham as our guest chaplain. It is a special pleasure for me, because he is the pastor of my home church, the First Christian Church of Lexington, Mo. He and his charming wife Marge have consented to come to Washington for this occasion.

Reverend Graham attended college and the Graduate Seminary of Phillips University in Oklahoma. Following graduation, he moved to Sedalia, Mo. In 1977 he came to my home church in Lexington, Mo. He has been serving there since 1979. Since that time he has been dedicated to serving the Lexington community and its people through his many church and his many civic activities.

Reverend Graham is very special to our family. I know he is very special to many others in our area in Missouri. It is my privilege to welcome the Reverend and Mrs. Graham today as he, Reverend Graham, serves as our guest chaplain.

## CONGRESSIONAL PAY—FRONT DOOR, SPEAKING FEE IN-CREASE—BACK DOOR

(Mr. OBEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. OBEY. Mr. Speaker, the other body is posing for holy pictures again on the issue of congressional pay. At the same time, it is voting to take the lid off what they can collect in speaker's fees.

Mr. Speaker, the country would be better off, the Congress would be cleaner, the legislative process would be less warped in favor of special interests with money if Senators were paid \$100,000 a year and could receive no outside speaking fees. I do not have any objection to an occasional speaking fee, but when a Member can collect \$8,000 in outside speaking fees in 1 day, that is not healthy.

If one Senator or House Member can clean up on the lecture circuit, by giving proenvironmental speeches and another Member can do the same thing by giving antienvironmental speeches, what incentive do each of them have to ever compromise on an issue such as clean air or any other issue?

And the argument that it is a matter for each district to judge is 100-carat baloney, because the banking bills and the tax bills that those Members vote on do not affect just the voters in those districts; they affect all Ameri-

If somebody represents a rock-safe district, they are virtually unreachable and unrestrained on that issue. Sophisticated, backdoor pay raises and gimmicks like that create subtle, divided loyalties.

I urge the conferees in the House to address the pay issue in a clean way and stick to the House position.

### SOCIAL SECURITY RESOLVE

(Mr. PICKLE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PICKLE. Mr. Speaker, in the final analysis, the Members of Congress must make the decision on a solution for social security. It will be helpful to us if the Speaker and the President, or the President's Commission, or all of them come together on some recommendations, or alternatives but the decision must still be made by the Members of this House and the other body.

This is as it should be, as it will be, and it should never be any other way.

During the past weeks, as the Nation has been beseiged about the problems of the Commission and of social security, there has been an equal amount of discussion among the Members of this body about what we must do.

In these discussions I sense a willingness and a general agreement from the Members of Congress—on both sides of the aisle—that we must go ahead with the tough decisions facing us and an acknowledgment of the fact that we must act. I think the Members are willing to act because of the deep commitment we all have to preserve the soundness of the social security program.

I am confident Congress will not abrogate its authority. It will do what it must do. I am confident we can do it together. The first thing is to have the resolve to do it. I feel we have made that resolve, that the people will support us.

## BICENTENNIAL OF THE CONSTITUTION

(Mr. GINGRICH asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GINGRICH. Mr. Speaker, I have a resolution which will provide

<sup>☐</sup> This symbol represents the time of day during the House proceedings, e.g., ☐ 1407 is 2:07 p.m.

<sup>•</sup> This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

for the House to participate in the upcoming bicentennial of our Constitution and our Government.

This bicentennial gives those of us who believe in a strong legislative branch an opportunity to educate the country on the preeminent role of the Constitution and the Federalist Papers of the legislative branch.

This resolution will not require any additional funds but will, instead, establish an office to be paid for from the contingency fund of the Speaker.

I think it is vital for those of us who believe in a strong legislature that we participate fully and adequately in the upcoming bicentennial.

## CALL OF THE HOUSE

Mr. WRIGHT. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The call was taken by electronic device, and the following Members responded to their names:

## □ 1030

The SPEAKER. On this rollcall, 321 Members have recorded their presence by electronic device, a quorum.

Under the rule, further proceedings under the call are dispensed with.

## PROVIDING FOR CONSIDER-ATION OF H.R. 3191, MODIFICA-TION OF NORTH AMERICAN CONVENTION TAX RULES

Mr. ZEFERETTI. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 630 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

## H. RES. 630

Resolved, That upon the adoption of this resolution it shall be in order, section 311(a) of the Congressional Budget Act of 1974 (Public Law 93-344) to the contrary not-withstanding, to move that the House re-solve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 3191) to amend the Internal Revenue Code of 1954 to exempt conventions, et cetera, held on cruise ships documented under the laws of the United States from certain rules relating to foreign conventions, and the first reading of the bill shall be dispensed with. After general debate, which shall be confined to the bill and shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Ways and Means, the bill shall be considered as

having been read for amendment under the five-minute rule. No amendment to the bill shall be in order except the amendment in the nature of a substitute recommended by the Committee on Ways and Means now printed in the bill, all points of order against said substitute for failure to comply with the provisions of section 311(a) of the Congressional Budget Act of 1974 (Public Law 93-344) are hereby waived, and no amendment to said substitute shall be in order. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit with or without instructions.

The SPEAKER. The gentleman from New York (Mr. ZEFERETTI) is recognized for 1 hour.

Mr. ZEFERETTI. Mr. Speaker, for purposes of debate only, I yield 30 minutes to the gentleman from Tennessee (Mr. QUILLEN) pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 630 provides for the consideration of H.R. 3191, modification of the North American convention tax rules. The Rules Committee granted a modified closed rule allowing for 1 hour of general debate to be equally divided and controlled by the chairman and ranking minority member of the Committee on Ways and Means. The introduced bill will be considered as read for amendment and section 311(a) of the Budget Act is waived against consideration of the bill. Section 311(a) prohibits consideration of any measure which reduces revenues in a fiscal year below the revenue floor set forth in the budget resolution. Although the revenue loss in fiscal year 1983 associated with this bill is negligible, the waiver is necessary since any tax deduction would result in a loss of revenue, this, making the bill subject to a point of order.

No amendments to the bill are in order except the Ways and Means Committee substitute now printed in the bill and the substitute shall not be amendable. Further, as was the case in the introduced bill, section 311(a) of the Budget Act is waived against the committee substitute.

At the conclusion of the amendment process the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit with or without instructions.

Mr. Speaker, presently the Tax Code provides that no deductions shall be allowed for expenses allocable to a convention seminar or meeting held on either a U.S.-flag or foreign-flag passenger ship. Therefore, U.S. passenger ships are placed at a disadvan-

tage as they are unable to compete with the land-based hotels.

This measure remedies this situation by permitting expenses for attending a convention or seminar on a cruise ship to be deducted from taxable income if: First, the cruise ship is a U.S.-registered flagship; second, the taxpayer has established that the cruise ship meeting is directly related to the active conduct of the taxpayer's trade or business or to an income-producing activity; and third, all ports of call of the cruise ship are within North America.

Mr. Speaker, this measure, as stated in the committee report, will have a 'negligible effect on the budget" and has a great potential of creating new jobs in the domestic passenger ship industry. I urge my colleagues to support House Resolution 630 so we can begin debate on H.R. 3191, modification of the North American convention tax rules.

Mr. QUILLEN. Mr. Speaker, I yield myself such time as I may use.

Mr. Speaker, the rule itself has been ably explained. This measure was up on suspension and failed to get a twothirds majority by a very, very small margin.

This is a good bill. The inequities in the tax law should be corrected. People who attend a seminar or hold a convention on a cruise ship documented by U.S. law should have equal treatment with people who attend a seminar or convention on land.

Mr. Speaker, I urge adoption of the rule and the measure when it is debated on the floor of the House.

Mr. FRENZEL. Mr. Speaker, will the

gentleman yield? Mr. QUILLEN. I am happy to yield

to the gentleman from Minnesota Mr. FRENZEL. Mr. Speaker, I thank

the gentleman for yielding.

Any rule which has to waive as many points of law as this rule has to waive ought to be defeated. I urge that the Members vote against the rule.

Mr. QUILLEN. Mr. Speaker, this measure was reported out of the Committee on Ways and Means by a majority vote, and, as I said, it failed on the House floor to get a two-thirds majority. But it would have passed overwhelmingly if it had been brought up in regular order under a rule.

Mr. Speaker, I urge adoption of the rule and the bill when it is debated. Mr. Speaker, I have no requests for

time.

Mr. ZEFERETTI. Mr. Speaker, I have no requests for time, and I move the previous question on the resolution.

The previous question was ordered. The SPEAKER. The question is on the resolution.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. FRENZEL. Mr. Speaker, I object to the vote on the ground that a

quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were-yeas 236, nays 146, not voting 51, as follows:

Mrs. COLLINS of Illinois, Mr. PER-KINS, and Mr. MOORHEAD changed their votes from "yea" to "nay."

Mr. WATKINS and Mr. RALPH M. HALL changed their votes from "nay" to "yea."

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

PROVIDING ROVIDING FOR CONSIDER-ATION OF S. 1965, PADDY CREEK WILDERNESS ACT OF CONSIDER-

Mr. MOAKLEY. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 631 and ask for its immediate consideration.

The Clerk read the resolution, as fol-

#### H. RES. 631

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (S. 1965) to designate certain lands in the Mark Twain National Forest in Missouri, which comprise approximately six thousand eight hundred and eighty-eight acres, and which are generally depicted on a map entitled "Paddy Creek Wilderness Area", as a component of the National Wilderness Preservation System, and the first reading of the bill shall be dispensed with. After general debate, which shall be confined to the bill and shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Interior and Insular Affairs, the bill shall be considered as having been read for amendment under the fiveminute rule. No amendment to the bill shall be in order except one amendment in the nature of a substitute printed in the Congressional Record of December 15, 1982 by, and if offered by, Representative Bailey of Missouri, all points of order against said amendment are hereby waived except under clause 7, Rule XVI, and said amendment shall not be subject to amendment but shall be debatable for not to exceed one hour, to be equally divided and controlled by Representative Bailey and a Member opposed to the amendment. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit with or without instruc-

## □ 1100

The SPEAKER. The gentleman from Massachusetts (Mr. Moakley) is recognized for 1 hour.

Mr. MOAKLEY. Mr. Speaker, for purposes of debate only, I yield the customary 30 minutes to the gentle-man from Mississippi (Mr. Lorr) pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 631 provides for the consideration of S. 1965, known as the Paddy Creek Wilderness bill. The resolution provides 1 hour of general debate to be equally divided and controlled by the chairman and ranking minority member of the Committee on Interior and Insular Affairs.

This is a modified open rule which provides that no amendments to the bill shall be in order except the amendment in the nature of a substitute by Representative BAILEY of Missouri printed in the Congressional RECORD of December 15, 1982. The Bailey substitute shall not be amendable but shall be debatable for 1 hour to be equally divided between Representative BAILEY and a Member opposed to the amendment. To permit consideration of the substitute, the rule waives all points of order against it with the exception of violations of clause 7 of rule XVI-the germaneness rule. The bill shall be considered as read for amendment.

Upon conclusion of consideration of the bill one motion to recommit with or without instructions would be in

order.

Mr. Speaker, S. 1965 would designate 6,888 acre area in the Mark Twain National Forest in Missouri as the Paddy Creek Wilderness. This designation was endorsed by the President after completion of a Forest Service Study recommendation that Paddy Creek be declared as wilderness.

Mr. Speaker, the bill, S. 1965, by a vote of 250 to 143 failed to get the required two-thirds when it was considered under suspension on Tuesday, December 14. As my colleages are aware, bills considered under suspension are not subject to amendment. House Resolution 631 will give the House an opportunity to vote on an alternative proposal offered by Representative BAILEY.

During the final hours of this session it is essential that we move expeditiously to complete the work of this Congress. House Resolution 631 will facilitate consideration of S. 1965 and allow the House to work its will on this matter.

Mr. Speaker, I urge adoption of House Resolution 631.

Mr. LOTT. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in opposition to this rule. This rule makes in order the consideration of S. 1965, which designates certain lands in the Mark Twain National Forest in Missouri as the Paddy Creek Wilderness Area. The gentleman from Massachusetts has explained the modified open rule with 1 hour of general debate. No amendment is in order except an amendment in the nature of a substitute to be offered by the gentleman from Missouri.

I am opposed to the rule and the bill itself. It is quite apparent that this bill has not received adequate consideration by the Interior Committee and should not be considered at this time.

Mr. Speaker, first of all, this area is not what I would consider a wilderness. A wilderness is generally an untouched and undeveloped area. This particular area has miles of roads and has been used for timber production and cattle grazing.

Second, the Interior Committee has pushed this bill through without any hearings in the area or proper contact with the gentleman in whose district the area is located. If they had, they might have discovered that few people in that district want the area declared a wilderness. The wishes and desires of those who have a vested interest in the area have been ignored. At the least, everyone in the area should have been given a chance to be heard in a public hearing. This is a blatant denial of the right of due process to these

Third, the Interior Committee has not followed proper procedure because this bill should have been referred to the Agriculture Committee. If the bill had been properly referenced, then chances are that the bill would not even be considered at this time.

Mr. Speaker, I believe that these practices of the Interior Committee should be stopped here and now. I urge all of my colleagues to vote down this rule or you might wake up one morning and find that your backyard has been proclaimed a wilderness area.

Mr. Speaker, I reserve the balance of my time.

Mr. HYDE. Mr. Speaker, will the gentleman yield?

Mr. LOTT. I yield to the gentleman from Illinois.

Mr. HYDE. I think the Speaker's admonition is very much in keeping with the new spirit since the election and the aggrandizement of power to the other side. Republicans will shut up, they will not debate, we will not get to vote on issues on the floor, there will be closed rules, and we better learn now, this early, to live with that new spirit of democracy that is going to obtain in this body.

I thank the gentleman for yielding. Mr. YOUNG of Alaska. Mr. Speaker, will the gentleman yield?

Mr. LOTT. I yield to the gentleman from Alaska.

Mr. YOUNG of Alaska. Mr. Speaker, I would like to compliment the gentleman for his statement. The rule is a bad rule. It is a closed rule. It is setting a precedent. There was no need for this. The House spoke yesterday under suspension against the bill. It is an area of 6,000 acres, 3 miles by 3 miles. The people who live there voted overwhelmingly, or at least in the majority, for the gentleman who represents that area not to put it in the wilderness. There is no crashing need for

By the way, many of the Members may not know, the area which the gentleman is speaking of has been logged, there are roads in it, there are homesteads in it, there is private property in it, and there is, in fact-and this is what hurts me-the roots of many of the people who live around that area, the roots are established there, and they want to go back in and visit where their forefathers were. These are older people, in many cases, and they cannot put their little green

packsack on or their waffle stompers. They are people who want to go in, to drive in, as they have done in the past, to lay flowers and wreaths upon the graves of their forefathers. And here we are, in the waning hours of this session, passing legislation, without hearings in the district, and without understanding that this should be a democracy.

I want to stress that, if the gentleman will yield further: A democracy. This great side always talks about being a party of the people. Collectively. I do not call you the party of the people, unless you want to refer to another nation. You are doing what is wrong here. And I know there will be that gentleman and that gentleman and that gentleman from Missouri say, "This is a good bill, and we want it in Missouri," but it is not in their districts. I thought we were a representative form of government. Six thousands acres, in the waning hours of the lameduck session. The gentleman in that district does not want it, his people do not want it, and here we are acting on this piece of legislation that we defeated yesterday.

I would like to compliment the gentleman who just said that this is the new era of time, of freedom and being able to speak out, and we are going to be listened to as the minority. No, we are being told, "Do not debate, do not discuss, just sit back, and we, the party of the people, are going to do it to the little people, are going to do it to the

little people, do it to them."

I thank the gentleman for yielding. Mr. LOTT. Mr. Speaker, I yield 2 minutes to the gentleman from Minne-

sota (Mr. FRENZEL).

Mr. FRENZEL. Mr. Speaker, last October when we closed down the regular session this year, the Interior Committee brought forth from its subcommittees bills in prodigious number that had never had hearings, and asked unanimous consent to have them presented on the floor.

It was my query at that time to the chairman of the committee whether he was cleaning out his broom closet of all of the bills that the committee had ever had referred to it. Now appears that his answer, "No," was correct, because we are dipping further into that same broom closet, at the end of a lameduck session. And we are doing so, I think, in violation of all of the processes that most of us swear to uphold when we come to the Congress.

This bill can wait until next year. I really do not have the knowledge to evaluate it on a substantive basis, but apparently, neither does the committee. What we do know is that it is a bill that is unwanted by the inhabit-

ants of the area.

But worse than that, it is being presented to us under a gag rule. We get the usual waivers, the usual denial of amendments, the usual inability of those who oppose to be able to be

heard over any extended period of time. We are being subjected to either arrogance of majority, or just plain lack of control by the leadership of this House.

I think it would be a good thing for this House if we drew the line right here and now and said, "No more of this junk are we going to bring out at the end of the session just because we have some time while we are waiting for a continuing resolution.

This kind of closed, waivered rule performance speaks volumes as to the professional management of this House. There is none, of course. Disorder and lack of discipline reign.

Vote down the closed rule, and let us stand for a little order around here. If the leadership can not enforce it, we are going to get it one way or another.

Mr. MOAKLEY. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, much has been said on the other side that there are no people locally in favor of this wilderness designation. The gentleman from Ohio, Representative Seiberling, appeared before the Committee on Rules and indicated that 44 people who live closest to this wilderness area are in favor of it. Every major local newspaper has been editorializing in favor of it. So this is not an outside move to take over the wilderness. The President is in favor of it. I wish that some Members on the other side would look closely at the President's statement.

Mr. Speaker, I yield 3 minutes to the gentleman from Missouri (Mr. Volk-

MER).

Mr. VOLKMER. Mr. Speaker, I would like to very briefly speak in favor of the rule and also in favor of the legislation.

As has been alluded to by the gentleman from Minnesota, to go to one thing first, that this bill somehow came out of Interior, maybe was hidden back in the closet. These bills, both the Irish Wilderness and Paddy Creek from Missouri were passed by the Senate on the last day, on October 1, of the session before we adjourned; and, therefore, the Interior did not have an opportunity to address them at that time.

Paddy Creek is basically supported by two U.S. Senators and seven Members of the Missouri delegation. The majority of the Missouri delegation support it. As has been alluded to by the gentleman from Massachusetts, the gentleman from Ohio (Mr. Seiberling) has a petition from people who live in the little town of Roby, which is a municipality or small little village that is located in the area. They want this designation as a wilderness area. The President has supported it. The Congress in the past has supported the designation as a wilderness area.

Mr. YOUNG of Alaska. Mr. Speaker, will the gentleman yield?

Mr. VOLKMER. I yield to the gentleman from Alaska.

Mr. YOUNG of Alaska. Just out of curiosity, when it is said that 44 people signed a petition supporting this, you know, I think if you checked the membership of the clubs they belong to, they belong to the Sierra Club or some other club.

Mr. VOLKMER. No; that is not correct.

Mr. YOUNG of Alaska. Now, this gentleman who runs in that district happens to be a Republican, and that county voted for him, because they are against wilderness in that area. It is not in your district, it is not in any of those Senators' districts or nobody else's district. It is in the district of this one Member right here.

#### □ 1115

Mr. Speaker, the Democrat county court judge is against it, elected officials are against it.

Let us face the fact. What is the rush? If everybody is for it, why not bring it back next session?

Mr. VOLKMER. It is not a rush. This has been around since 1971 or 1973.

Mr. YOUNG of Alaska. Has anything happened in the meantime to destroy the wilderness?

Mr. VOLKMER. No; but we might just as well get finished with it. I am sure the gentleman knows as we have been told if we do not get it done now the gentleman who will be representing the district in the next election supports this designation, voted for it on the suspension. I am sure we will be taking it back up again.

Mr. YOUNG of Alaska. Why do we not go out and have a hearing in that district? We did not have a hearing on this subject in that district with those people there. Why do we not listen to the people instead of having all the people in Washington, D.C., and the environmental organizations saying we have to have this in wilderness.

Mr. VOLKMER. Not everybody in Texas County is opposed to this. A good many of the people in this county, just as I said, a little village there, they support it.

Mr. YOUNG of Alaska. Has the gentleman ever visited the area?

Mr. VOLKMER. I have been down in the area; yes. It has been several years.

Mr. YOUNG of Alaska. Has the gentleman been to Paddy Creek Wilderness?

Mr. VOLKMER. I have been in the area; yes. I have camped out quite a bit in many parts of the State of Missouri.

Mr. YOUNG of Alaska. Has the gentleman been to Paddy Creek?

Mr. VOLKMER. I have not been inside the Paddy Creek area, hiked

inside of it; no. But I have been in the area many times.

Mr. LOTT. Mr. Speaker, I yield 15 minutes to the gentleman from Mis-

souri (Mr. Bailey).

Mr. Bailey of Missouri. Mr. Speaker, I rise to speak on the rule. I welcome the opportunity to speak on the rule, because the debate on this measure as we know occurred after the motion to adjourn last night when the gentleman from Oregon (Mr. Smith), made that motion to adjourn and was told to sit down by the Speaker, the debate then occurred at 20 minutes until 11 on this bill.

So I welcome this opportunity to speak in strong opposition to the rule. I speak in strong opposition to the rule, Mr. Speaker, for three reasons.

One, Paddy Creek had its shot. It had its opportunity under suspension. It was defeated under suspension. The chairman, the gentleman from Ohio (Mr. Seiberling), brought his bill forward, he had it his way. He wanted no amendments, he wanted it under suspension. And in the sense of fair play, we went along. We said that is OK, we will give you your shot, your way, and he lost.

So where did he go? He went directly to the Rules Committee. What is wrong with the rule? What is wrong with the bill?

No. 1, it is flawed. If my colleagues will check the gentleman from Ohio's language, if my colleagues will check his debate, his conversations on the floor of the House, when he presented it, he said the bill is flawed, but we worked out an agreement with the Senate that it will be OK, that we will not send it back to them. The bill is flawed

The second point, the gentleman spoke about the Indiana wilderness bill, and how the Indiana delegation had come together. The gentleman from Arizona (Mr. UDALL) said we have agreement on the Indiana legislation.

Mr. Speaker, that is the way it should be. You should have agreement from the delegation on what is going into wilderness and what is not going into wilderness.

Now, what has happened, and why does it make any difference about the Indiana delegation and how they handle their wilderness bill?

Let me tell my colleagues.

Mr. Speaker, the Indiana delegation designated the wilderness areas that they wanted and gave release language for the areas that they did not want designated in wilderness. Release language that this legislation does not contain.

Mr. Speaker, this area, third, is not pristine. When one talks about the words RARE-II, and each of us has seen environmentalists, we have been involved with the wilderness coalition, we have been involved with the Sierra

Club, we have heard the words RARE—the roadless area review.

RARE—the roadless area review. Roadless, Mr. Speaker, roadless.

Now, what does the Paddy Creek mean? The Paddy Creek is an area of 6,000 acres, and all you farm boys know 3 miles by 3 miles is 6,000 acres. It is a small piece of land. And what is inside this, gentlemen? Twenty-eight miles of roads, in a roadless area. Eighteen miles of trails. A total of 38 miles of roads and trails inside a roadless area that is 3 miles by 3 miles.

Mr. CRAIG. Mr. Speaker, will the

gentleman yield?

Mr. BAILEY of Missouri. I yield to the gentleman from Idaho, a member of the Interior Committee.

Mr. CRAIG. I thank the gentleman for yielding.

Is the gentleman telling me that an area 3 miles by 3 miles, some 6,000 acres, has 28 miles of road in it?

Mr. BAILEY of Missouri. Exactly. That is by the Forest Service, by the RARE-II document my colleagues have in front of them.

Mr. CRAIG. Well, I will have to admit to the gentleman from Missouri, I have never been to Paddy Creek.

Mr. BAILEY of Missouri. Neither has the sponsor of the bill or the gentleman from Ohio, the chairman.

Mr. CRAIG. Are there any manmade structures in the area?

Mr. BAILEY of Missouri. There certainly are. Inside this RARE pristine wilderness there is a sawmill.

Mr. CRAIG. A sawmill?

Mr. BAILEY of Missouri. A sawmill. Mr. CRAIG. Is the gentleman telling me this area has been logged?

Mr. BAILEY of Missouri. This area, this wild pristine area, has been saw milled and logged continuously since the thirties until 1975.

Mr. CRAIG. Is there any private land is the area?

Mr. BAILEY of Missouri. These certainly is. The gentleman asks such pentrating questions. Inside this wild pristine area that the gentleman from Missouri (Mr. Volkmer) has never been to, there are three areas that are not owned by the U.S. Government. One is in local ownership, and two areas are in private ownership, one by a corporation and the other by a private individual. One hundred and sixty acres inside this small 6,000 acre plot that are not owned by the U.S. Government.

Mr. CRAIG. Would the gentleman from Missouri say that according to the 1964 Wilderness Act which says that wilderness should be an area where man can come visit and then leave, that this area would not qualify as an area where man could visit, because man has been there for a century or more?

Mr. BAILEY of Missouri. Can my colleagues imagine an area that is 3 miles by 3 miles, that smack dab in the middle of it there is 80 acres owned by

private individuals, and under wilderness law they cannot deny access, so you have four-wheel drive vehicles zooming in and out of this wilderness area to get to this private ownership, that these gentlemen are rushing through here without having ever being there any time.

Mr. Speaker, there are barbed wire fences inside this area.

Mr. CRAIG. Will the gentleman tell me about the barbed wire fences. I do not think they have wilderness character.

Mr. BAILEY of Missouri. One gentleman, a member of the Interior Committee, said: "If this was in his area he would blacktop it as a parking lot."

Mr. CRAIG. I thank the gentleman. Mr. BAILEY of Missouri. Now, Mr. Speaker, let us talk about the facts that are presented by the RARE-II document.

Between 1965 and 1975 there were 11 timber sales yielding over 3 million board feet. That is enough to building 300 homes. The potential growing stock is enough to build 2,100 homes. Approximately 37 percent of the area is covered by small stands of saplings and small trees that have been logged over. The surrounding area, there are 57 sawmills, evidence of the timber industry in the area-109 acres of the 6,888 acres is not timber. Upon this ground there are grazing permits with forage production for 100 livestock. There are 1.4 miles of barbed wire fence in the area. Nonvisual intrusion-nonvisual intrusions, gentlemen. This area, and many of my colleagues have been to the area, is near Fort Leonard Wood, Mo. This pristine area, with no intrusions, is within 4 miles of Fort Leonard Wood, Mo., and the guns of Fort Leonard Wood, Mo., can be heard inside this wilderness. That is not my opinion. That is the evaluation of the RARE-II.

There are, as I said, 28 miles of roads, 18 miles of trails, including 800 blazed trees.

The local cost to the economy is \$50,000 to \$67,000. There are no endangered species, there are no threatened species, there are no rare geological formations, there are no minerals, there is no hazard to the watershed in the area.

Mr. Speaker, this simply is a ludicrous proposition. It is ridiculous to bring it up.

Mr. YOUNG of Alaska. Mr. Speaker, will the gentleman yield?

Mr. BAILEY of Missouri. I yield to the gentleman from Alaska.

Mr. YOUNG of Alaska. I thank the gentleman for yielding.

Mr. Speaker, I want to compliment the gentleman for his presentation on the floor of the House, for really describing this turkey for what it is. It is the Christmas season. If we vote for this rule or the bill, we have got our turkey. There is absolutely no reason, as the gentleman said, for this bill to even be on the floor of the House.

Mr. BAILEY of Missouri. This is a wooded area with a creek in it. It is a nice area. I am sure many of our city friends would say it would have a certain amount of beauty. It is no different, though, than the other area around it, surrounding it, or in close proximity.

Mr. YOUNG of Alaska. There has been a comment that 44 people signed the petition. Can the gentleman give me some idea how many people live in

the area?

Mr. BAILEY of Missouri. I am so

glad the gentleman asked that. Texas County, Mo., was one of those counties that was run over by the Union Army during the Civil War.

Mr. YOUNG of Alaska. The Union

Army?

Mr. BAILEY of Missouri. You bet. Those bluecoats came in there and ran all these people out, and they are a solid Democratic county. Republicans are just not allowed in the county. The entire county court is Democratic. The presiding judge and the two associate judges, and I have a resolution from them, are opposing the designation.

Mr. YOUNG of Alaska. Again I want

to thank the gentleman.

If we listen to the gentleman, this should be a "no" vote on the rule and a "no" vote on the bill.

Mr. WEBER of Minnesota. Mr. Speaker, will the gentleman yield?
Mr. BAILEY of Missouri. Certainly I

yield to my friend from Minnesota.

Mr. WEBER of Minnesota. I thank the gentleman for yielding.

As the gentleman knows and discussed with me afterward, I voted in opposition to his position when this matter came up under suspensions.

Mr. BAILEY of Missouri. We all

make mistakes.

Mr. WEBER of Minnesota. Am I to understand now in listening to the debate that the wilderness I was voting to protect the other day includes barbed wire fences and roads and private property and sawmills?

Mr. BAILEY of Missouri. We all make mistakes. The gentleman did not get a chance to hear the debate, unless he was switching off from Johnny

Carson. We tried to adjourn.

Mr. WEBER of Minnesota. I can only extend to the gentleman my deepest apologies for not listening more closely to his arguments. I want to assure him when this matter comes up I will be voting on his side of the question this time as I am sure will most of the Members who listen to the debate here today.

Mr. BAILEY of Missouri. After Sylvester Paddy came to the Ozarks, the man this area was named for, he began a logging operation in the

Paddy Creek area in 1816. They cut the tall virgin Missouri pine, rafted it down Paddy Creek to the Gasconade River and down to the Missouri River, where the gateway to the West was just being formed, and the German immigrants needed housing. So the Paddy Creek area was logged in the 1830's and 1840's and 1850's. And the lumber was shipped to build St. Louis, Mo.

After that came the era of the Civil War when the settlers were removed by the Union troops, and then they came back and made claims on their homesteads in the Paddy Creek area. Those homesteads are there still, the foundations are still there. As the gentleman from Alaska indicated, the people want to be able to go back to their old family homestead to visit those places where their forefathers were.

After that area became an area of expansion, my family moved there in the early 1900's, having plowed corn for Ance Hatfield of the Hatfield and McCoy region in Kentucky. They did not want to get into the bushwhacking and the murders going on in eastern Kentucky, so they came to Missouri and settled in Texas County, Mo.

It was during that time, than, during the Depression that the Forest Service—the National Geographic article on the U.S. Forest Service tells it

better than I:

There were also problems for rangers in the thirties in the Missouri Ozarks, woodland burning set almost ritually each spring in the belief they hastened the grasses greening; struggling peckerwood sawyers who fed their mobile mills with poached timber as an unwritten birthright; moonshiners whose smoking stills could draw an unsuspecting firefighting crew into a hall of gunfire. The first thing a ranger had to do, said Claude Ferguson, was to convince the moonshiner he wasn't a "revenoor."

The author says:

Claude and I grew up in those hills. The first units of the Mark Twain National Forest were being formed, one of them cradling the hill and valley town of Willow Springs, where I was born.

## □ 1130

Mr. Speaker, these are not vast reaches of wilderness. These are towns that are 26 miles apart. As I have indicated on the map, these areas are not inaccessible to other people. We are not locking up anything for anybody that they could not reach by driving 26 miles farther to Devil's Backbone.

Mr. CRAIG. Mr. Speaker, will the

gentleman yield?

Mr. BAILEY of Missouri. Certainly, I will yield to my friend from Idaho.

Mr. CRAIG. Mr. Speaker, this 6,000 acres the gentleman is discussing that is now under consideration that would be called Paddy Creek Wilderness, how has it been managed the last 15 years?

Mr. BAILEY of Missouri. It has been managed under the multiple-use concept that allows recreation. There are parks, places where you can park your car at the edge of this, where you can backpack in.

Then they have been managing the timber to get rid of some of this scrub oak that is still there remaining from the timber cut and allow that to come back; so they are going through a process of multiple-use management with timbering and recreation.

Mr. CRAIG. Under the current management plan, of course, it has been under the RARE-II process since 1976, is the Forest Service discussing any major shifts or changes in that man-

agement plan?

Mr. BAILEY of Missouri. Absolutely

Mr. CRAIG. Then it would be managed as it has been managed over the last 15 years?

The SPEAKER. The time of the gentleman from Missouri (Mr. Balley) has expired.

Mr. LOTT. Mr. Speaker, I yield an additional 2 minutes to the gentleman.

Mr. BAILEY of Missouri. Mr. Speaker, I would like to try to close, if I could, and point to the map that you can all see. I would like to talk for a minute to your logic and your good sense about whether we are indicating something here that should be.

Within 52 miles of Paddy Creek is Devil's Backbone, 8,000 acres of wil-

derness.

Within 64 miles is Bell Mountain.
Within 72 miles is Hercules Glade.

Within 88 miles is Rock Pile Mountain.

Within 96 miles is Piney Creek.

Within 108 miles is Mingo Reserve; all designated now as wilderness, just an hour's drive further for anyone who wants it.

As proposed wilderness, inside is Spring Creek, 42 miles; Swan Creek, 60 miles; Big Creek, 68 miles; Anderson Mountain and Irish Wilderness; all within an hour or an hour and a half's drive.

We are not denying anybody the opportunity to do anything.

As I have said, the local opposition is strong. It is intense. The entire country court and all the communities around there agree. It is not pristine.

Within this 3 miles it has the sawmill, the blazed trees, the homesteads where people want to go back and visit their families. It has 28 miles of roads, 18 miles of trails, 1.5 miles of fence.

In fact, in 1964, Mr. Speaker, the U.S. Army operated in there on Operation Goal Fire, an intensive maneuver with tanks and artillery and air support.

Mr. Speaker, I ask the Members of the House of Representatives to use instead of custom here, I ask you to prevail upon your good sense. I ask you to make a logical determination of whether you believe this is a pristine area and whether it should be included.

I think if you ask yourself that sincere question and make the logical determination, you will vote "no" on this rule.

Mr. MOAKLEY. Mr. Speaker, I yield 5 minutes to the gentleman from Arizona (Mr. Udall) for debate only.

Mr. UDALL. Mr. Speaker, 2 days ago this bill we are hearing about this morning passed this House by more than 100 votes, a margin of more than 100 votes; 243 to 130 something, as I recall.

I do not recognize the bill that we passed in this House 2 days ago from the description we are getting this morning. I do not recognize this as the sound bill we brought out of our committee many weeks ago.

This is in the subcommittee of the gentleman from Ohio (Mr. Seiberling) and he is not here. He knows more about it than I do, but let me make a few points, if I may, before we have

this vote.

Somebody who was throwing softballs at the Speaker, the gentleman from Missouri (Mr. Bailey), and he was knocking them out of the park and he thanked him for his penetrating questions. I wish somebody would ask me a couple, like how does our great President feel about this?

Mr. BAILEY of Missouri. Mr. Speak-

er, will the gentleman yield?

Mr. UDALL. I yield to the gentleman.

Mr. BAILEY of Missouri. Mr. Speaker, has the gentleman been to the Paddy Creek area?

Mr. UDALL. No; I have not.

Mr. BAILEY of Missouri. Has the gentleman been in the airport at St. Louis?

Mr. UDALL. I say to the gentleman, I try to go to most of the wilderness areas that we have under consideration. I regret that I have not seen this one, but our committee has.

Mr. BAILEY of Missouri. How would the committee have seen the area?

Mr. UDALL. I do not know. I do not have the figures. I will try to get them for the gentleman.

Mr. BAILEY of Missouri. Begging the chairman's pardon, the committee has not seen the area, neither the committee nor any member of the committee.

Mr. UDALL. The staff advises me the gentleman is correct.

Mr. BAILEY of Missouri. I thank the gentleman.

Mr. UDALL. Mr. Speaker, let me say to the gentleman that I think, as was said here earlier, that when a proposal for a national park or wilderness area involves an area covered by a local Congressman, that his views ought to have great weight. We give them great weight.

I so not think the Grand Canyon, however, is for me to decide or for the

local Congressman to decide. The Grand Canyon belongs to all of us; but I am told, and I think I am correct, that the gentleman will not be representing that area next year, that that area next year will be represented by the gentleman from Missouri (Mr. Skelton); is that correct?

I wish somebody would ask me the question, How does that great defender of wilderness, Ronald Reagan, stand on this bill? Well, the answer is that he endorsed the bill. He sent the report to the Congress asking for enactment of this legislation.

I hope some of the gentlemen will ask me how the Forest Service stands on this bill, and the answer is, they

strongly support it.

How does the rest of the Missouri delegation stand on the bill? Well, both Senators, one from each party, are cosponsors of the bill. It passed the Senate unanimously. It passed the Senate committee by a vote of 17 to nothing.

I wish somebody would ask me about this vacant land, these in-holdings that are there. The report says that the Forest Service, and I have the report here somewhere, says that they are going to make an exchange. That is customarily the way they do it. The Forest Service will give the private owners who have the land inside some forest land and will take this back, and will get rid of these in-holdings and have a better wilderness area than we would otherwise.

I do not claim this is our greatest bill. Apparently it is not the finest hour we have had in designating wilderness; but I think basically the support from that area, the support from all over the country, the support from the rest of the Missouri delegation, suggests that we ought to give some deference there, too.

There was a great deal of conversation here about an old sawmill. I am told that has been abandoned for a couple decades, at least. It is not being used. There is not a usable active operating sawmill in the area right now. I think that has come a little bit out of focus.

The gentleman made a very powerful argument, and I am impressed with him, I have seen a lot of people in the same situation fighting for what they feel is the local view on this; but the Forest Service hearing asked people who knew this area whether they favored wilderness. There were 1,950 people from the local area and from outside, and approximately 200 people came down and registered to vote against it.

So this is a carefully thought out bill that passed the House by 100 votes a couple days ago. I hope we will not have too many Members change their minds.

Mr. YOUNG of Alaska. Mr. Speaker, will the gentleman yield?

Mr. UDALL. I yield to the gentleman from Alaska.

Mr. YOUNG of Alaska. Mr. Speaker, the gentleman from Arizona referred to some questions. First, let me make the record clear. If the House sees fit to accept the gentleman's substitute, which will be offered of release language which has already been accepted in California, would the gentleman strongly support that? Indiana is in there and New Mexico has accepted it. It probably could work as a release part of the bill and it should be in there.

I have indications that is not going to be accepted on the gentleman's side and if it is not accepted, this bill is terribly wrong and the gentleman knows it is wrong.

If the gentleman will yield further, as a sponsor of the wildernes area, it is very clear this area does not qualify for wilderness.

Now, the Forest Service is a Government body. The Senator do not live in this region.

I get back to what the gentleman said. The people in the area do not want it. We must listen to the people in this body if we are to be a representative form of government.

Mr. UDALL. Mr. Speaker, I will recapture my time and maybe give the gentleman some reassurance. I am told that the Senators have called over just recently, the two Missouri Senators, and urged us to accept the amendment.

I have not talked to the subcommittee chairman, the gentleman from Ohio (Mr. Seiberling), but it looks like we can accept the amendment.

Mr. YOUNG of Alaska. Mr. Speaker, that makes me feel a whole lot better, because we were informed—it does not make the bill any better—we were informed they were not going to accept that language, and of course, the bill would be totally unacceptable on this side.

Mr. UDALL. Well, obviously, it is better to have it under a rule so we can make changes where they are agreed upon then having it under a suspension of the rules; but the time was running out.

So let us adopt the rule, get to that amendment and pass the bill again and maybe we will all be a little bit happier about it.

Mr. LOTT. Mr. Speaker, I yield myself such time as I may consume to respond further to some of the things the chairman of the Interior Committee, the gentleman from Arizona, just said.

As far as proper consideration being given to affected Members' districts, I submit that a pattern is developing in this Congress, particularly with those bills out of the Committee on Interior, where, in fact, individual Members' districts and their concerns are not

being considered. One example is the recent bill the House passed involving nuclear waste.

This week alone-the final week of the 97th Congress-we have had three bills come up, two of them under suspension, where the individual Members that were affected were opposed to it.

Now, I want to urge my colleagues again, you may think that it will only be Members on this side of the aisle that would be affected, but I would not be so sure.

I might point out that the Member that represents the Garrison diversion project that we voted on earlier this week happened to be on that side of the aisle.

There is a bad pattern here. I can remember when I first came here, 14 years ago, it was not that way. We worked with you, you worked with us, and so on, until the Members affected were satisfied that they had been given proper consideration and their constituents had had full hearings.

It is not that we are opposed to wilderness. I have got wilderness areas in my district and I am glad to have them, but when those things were worked out, this Congress always gave me and my constituents every opportunity to have our concerns addressed. And, Mr. Speaker, this is not the Grand Canyon.

Mr. YOUNG of Alaska. Mr. Speaker, will the gentleman yield?

Mr. LOTT. I am glad to yield to my friend, the gentleman from Alaska.

Mr. YOUNG of Alaska. Mr. Speaker, I would like to compliment the gentleman again on his statement.

I am probably-I hate to say that I am an expert, an expert on how I was listened to in the Interior Committee 2 years ago. By action of this body, 147 million acres was set aside in wilderness and parks in the national and collective interest.

Now, of course, it is Federal land. We know that, but there are other methods of protection, and no one listens to this. There are multiple use concepts. There are recreation areas, other designations, not just wilderness, because certain groups want them. Wilderness is a very restrictive classification of land, just as restrictive as parks in many cases, especially after 1983.

Mr. UDALL. Mr. Speaker, will the gentleman yield?

Mr. LOTT. I am glad to yield to the gentleman from Arizona.

UDALL. Mr. Speaker, the Alaska lands bill, in perspective, was probably the greatest environmental resource decision made in the history of this country. We would not have it today had we given the gentleman from Alaska a total veto or a total consideration on all sections of that bill. I think the gentleman concedes and the people of Alaska are conceding that

most of what we did is right. It probably needs some fine tuning, perhaps, down the road, but it was right.

Mr. YOUNG of Alaska. Mr. Speaker, will the gentleman yield?

Mr. LOTT. I yield to the gentleman from Alaska.

Mr. YOUNG of Alaska. Mr. Speaker, just to answer that question, the biggest objection was that it was already owned by the Federal Government. It was not owned by the State and it was being managed correctly; but when you put it into a wilderness area, it is no longer managed, and this is what the gentleman from Missouri is saying. Those people will be disallowed from going into their forefathers' burial grounds, unless they can walk in there.

Mr. UDALL. Well, maybe we can go up to Alaska and take a look at it again and I will not need a bodyguard this time

Mr. LOTT. Mr. Speaker, now we have the Grand Canyon, the Alaskan wilderness and Paddy Creek.

Mr. Speaker, does the chairman, the gentleman from Arizona, one of our admired liberal leaders in this body, support a closed rule on a bill out of the Interior Committee?

Mr. UDALL. At this late hour in this session, sometimes you have got to be practical to get results. It is a question of letting this go down the drain and not resolving it for another year or getting it now with a rule that I would prefer we not have. I would prefer to have a wide open rule; but the gentleman has already won a lot from us here. Apparently the gentleman is going to get the amendment he wants the most and we went to the Committee on Rules so that the gentleman could have a chance to at least have that amendment considered.

I hope the gentleman will reconsider his position on where we have the nuclear waste repository in the light of our discussion here today.

Mr. LOTT. Well, I think the thing to do here is to defeat the rule so that we will have adequate time to address what needs to be done in this area.

I urge my colleagues to vote against this closed rule requested by the Interior Committee.

The SPEAKER pro tempore. The time of the gentleman from Mississippi (Mr. Lott) has expired.

Mr. MOAKLEY. Mr. Speaker, I yield myself the balance of the time.

Mr. Speaker, the gentleman from Mississippi knows this is not a closed rule and the gentleman from Alaska, if he does not know, I will inform him that it is not a closed rule.

I am informed by the gentleman from Ohio (Mr. SEIBERLING) that he is willing to accept the amendment of the gentleman from Missouri with the two modifications and I would hope that this would make the rule more palatable to some of those who are opposing the rule, for fear that the gentleman from Missouri will not have his amendments adopted.

Mr. MOAKLEY. Mr. Speaker, I have no further requests for time, and I move the previous question on the res-

The previous question was ordered. The SPEAKER pro tempore. The question is on the resolution.

Mr. FRENZEL. Mr. Speaker, on that demand the yeas and nays.

The yeas and nays were ordered. The vote was taken by electronic device, and there were-yeas 217, nays 179, not voting 37, as follows:

#### □ 1200

Mr. JACOBS changed his vote from "yea" to "nay."

So the resolution was agreed to. The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

PROVIDING FOR CONSIDER-ATION OF S. 1964, IRISH WIL-DERNESS ACT OF 1982

Mr. BEILENSON. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 628 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

#### H. RES. 628

Resolved, That upon the adoption of this resolution it shall be in order, clause 2 (1)(6) or rule XI to the contrary notwithstanding, to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (S. 1964) to designate certain lands in the Mark Twain National Forest, Missouri, which comprise about seventeen thousand five hundred and sixty-two acres, and known as the Irish Wilderness, as a compo-nent of the National Wilderness Preservation System, and the first reading of the bill shall be dispensed with. After general debate, which shall be confined to the bill and shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Interior and Insular Affairs, the bill shall be considered as having been read for amendment under the fiveminute rule. No amendment to the bill shall be in order except one amendment in the nature of a substitute printed in the Congressional Record of December 14, 1982 by, and if offered by, Representative Emerson of Missouri, all points of order against said amendment are hereby waived except under clause 7, rule XVI, and said amendment shall not be subject to amendment but shall be debatable for not to exceed one hour, to be equally divided and controlled by Representative Emerson and a Member opposed to the amendment. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final pas-sage without intervening motion exept one motion to recommit with or without instruc-

The SPEAKER pro tempore. The gentleman from California (Mr. Beilenson) is recognized for 1 hour.

Mr. BEILENSON. Mr. Speaker, for purposes of debate only, I yield 30 minutes to the gentleman from Missouri (Mr. Taylor), pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 628 provides for the consideration of S. 1964, a bill designating the Irish Wilderness in the State of Missouri. The resolution provides 1 hour of general debate to be equally divided and controlled by the chairman and ranking minority member of the Committee on Interior and Insular Affairs. Since this is a simple bill, and in view of the limited time remaining in the session, the rule waives the requirement of clause 2(1)(6) of rule XI that the committee report accompanying S. 1964 be available for 3 days prior to consideration of the bill.

The resolution provides that no amendment may be offered to S. 1964 except for a substitute printed in the CONGRESSIONAL RECORD by Mr. EMERson, if Mr. Emerson actually offers the substitute. The rule further provides that all requirements set by the rules of the House be waived for consideration of this substitute with the single exception of the germaneness requirement of clause 7, rule XVI. The substitute may be debated for 1 hour to be equally divided and controlled by Mr. Emerson and a Member opposed. The substitute may not itself be amended.

Finally, the rule provides a motion to recommit the bill with or without instructions.

Mr. Speaker, S. 1964 designates a 17,600 acre area in Missouri's Mark Twain Forest as a wilderness. The wilderness designation will restrict commercial exploitation of the area and preserve its natural beauty and recrational value.

The rule before us provides for an expeditious consideration of this simple measure while insuring that interested Members have a full opportunity to place their views before the House.

Mr. TAYLOR. Mr. Speaker, I yield myself such time as I may consume.

Mr. TAYLOR. Mr. Speaker, House Resolution 628 is a mostly closed rule to allow for limited consideration of S. 1964, a controversial bill which designates several thousand acres of land in the Mark Twain National Forest in my home State of Missouri as the Irish Wilderness.

I am opposed to the adoption of this rule because it permits only one amendment to the bill, and because it does not facilitate a close examination in this House of the issues surrounding this particular wilderness designation.

I want to make it quite clear that I am not personally opposed to the creation of wilderness areas. I have two wilderness areas in my district. I had a great deal of opposition to those wilderness areas when the RARE-II was proposed. The chairman of the Subcommittee on Interior at that time, Mr. John Melcher, who is now a Member of the other body, afforded me the opportunity to go back to my district to fully explain the concept of the wilderness areas and to have the people informed as to what a wilderness area actually was. After we had an opportunity to fully explain the concept of the wilderness area, by and large we had support for the wilderness areas. They were established, and we now have within my district two wilderness areas known as the Hercules Glades Wilderness Area and the Piney Creek Wilderness Area, which are well accepted by the people and

neighbors living in those hill counties in southwest Missouri.

But the fact is that this measure is being rushed through the House without any attempt to conduct hearings in this area and hear from local people who are opposed to it or who are virtually uninformed.

Mr. Speaker, the prime example of how this bill is being rushed through is found right in the rule. It waives clause 2(1)(6) of rule XI. This is the 3-day layover rule. The proponents of the bill, some of the members of the Interior Committee, wanted to bring this bill up earlier in the week when the waiver would have been necessary. They wanted to rush this measure, hoping to avoid any close examination of the issues, but their committee report was not available for the required 3 days. Today, of course, it has been available for that required time and this waiver is now a moot point.

But the fact remains, Mr. Speaker, that the committee wants to take this bill up in the House with only one amendment that is made in order. This rule does not allow the opportunity to consider any other amendments except the substitute to be offered by my friend from Missouri, Representative EMERSON, who represents this district.

This rule bears no resemblance to the written request made by the chairman of the Interior Committee, Mr. Udall. He asked for a simple open rule with no waivers. The gentleman from New Mexico, the ranking Republican member of the Interior Committee, Mr. Lujan; the gentleman from Alaska, the ranking Republican member of the Public Lands Subcommittee, Mr. Young, and the gentleman from Missouri, in whose district this

will be, Mr. Emerson, all appeared in support of an open rule. Mr. Speaker, these requests went un-

Mr. Speaker, these requests went unheeded by the Committee on Rules. Instead, we have before us a rule suggested by the gentleman from Ohio, chairman of the Public Lands Subcommittee, Mr. Seiberling. He told us in the Rules Committee he honestly does not want the Members of the House to be able to offer amendments to this bill except for the substitute of the gentleman from Missouri.

What does that tell us about the level of regard some folks in the Interior Committee have for our traditions of full, free, and open debate? What does that tell us about the amount of consideration the local residents of four small, rural Missouri counties have received from the Interior Com-

mittee? I think it tells us a lot.

The people of southwest and south central Missouri in these hill counties are hospitable. They welcome visitors. They love the land on which they live. They love the beauty of those Ozark hills and the mountains and the timber, and they have preserved it

from generation to generation and opened their doors to all visitors who want to come to hunt, fish, camp, or hike. They made their land open to them and extended the welcome mat in most all cases.

Mr. Speaker, under the rule the gentleman from Missouri is allowed to offer a substitute, and all points of order against that substitute are waived except for those dealing with germaneness. It might be said that this is a fair rule to the gentleman from Missouri, but he told us that he would prefer a totally open rule. I do not think this is the most fair situation the gentleman from Missouri (Mr. EMERSON) could find himself in, and certainly not fair to all the Members of the House, because his substitute is not amendable.

#### □ 1215

The legislation passed by the other body and rubberstamped so quickly by the Interior Committee is opposed by the gentleman from Missouri (Mr. EMERSON). We have heard it said that this passed unanimously in the Senate, and I suppose it did. But so did the regulatory reform measure. That is not here for consideration in this lameduck Session. Are we letting the Senate run this body? I do not think we should.

The legislation is opposed by all the Republican members of the Interior Committee. It is opposed by the administration. The point was made on the previous proposition that it was supported by the administration. This one is opposed by the administration, and it is opposed by the Department of Agriculture and the U.S. Forest Service.

More importantly, perhaps of prime importance, the measure is strongly opposed at the present time by those who live in the area of the proposed wilderness. The proposed Irish Wilderness very probably contains valuable lead and zinc deposits, because that area of southern Missouri is rich in lead and zinc, and the local people are optimistic because they have the prospect of new jobs, the prospect for being able to improve the economic condition of those southern Ozark counties in their area, and the prospect of being able to better finance their local governments by raising their tax base if it turns out that these mineral deposits are there, and they probably are.

A mineral assessment of the area will soon be completed, and the gentleman from Missouri (Mr. EMERSON) feels that more than 1 year will be necessary to complete the process by which applications for prospecting permits can be granted.

What we are caught up in here, Mr. Speaker is a time clock that runs out at the end of next year. If this area is made a wilderness almost overnight,

any applicant who is granted a permit would have only one year to explore and establish what is known as a lease right.

Mr. Speaker, when the proponents of this legislation appeared before us in the Committee on Rules, I urged that they reconsider the matter and go to the local area and conduct hearings. Is that asking too much? I do not believe that it is. I do not believe that this legislation is that urgent.

I urged that they reconsider the matter, give us the time, and let the local people have an opportunity for input, but this plea fell upon a deaf ear. The response from the chairman of the subcommittee was that they might be willing to go into the area after it was made a wilderness. That would be an interesting trip.

My experience in these matters of wilderness designations has been that if the Interior Committee makes a good faith effort to explain what is involved and to explain it to the local residents, very often some of the strongest opposition will be lessened and in many instances opponents will become supporters. That happened in the two wilderness areas in my district. We did it the right way. This being done the wrong way.

Mr. Speaker, that is exactly what the gentleman from Missouri (Mr. EMERSON) wants, to do it the right way. That is exactly what I would like to see. But we do not have that kind of a situation under this rule.

What we are dealing with here on this rule today, I say to my friends, is not the concept of wilderness, but in a far more important vein we are making a landmark decision as to whether or not this House reaffirms its historic role as a house of the people, with concern for the opinions of the people and respect under a representative form of government for our colleagues who speak here on behalf of the people of the districts they were elected to represent in this Chamber.

Mr. Speaker, affirmation of these principles, in my opinion, calls for a sound defeat of this rule. Let us have the Interior Committee take this calf back and lick it one more time.

Mr. BEILENSON. Mr. Speaker, I have no requests for time at this moment.

Mr. TAYLOR. Mr. Speaker, I yield 5 minutes to the gentleman from Missouri (Mr. EMERSON).

Mr. EMERSON. Mr. Speaker, I want to thank the gentleman from Missouri (Mr. Taylor) for the very eloquent plea that he has made against this rule. Everything that he said is true in spades.

Everything that my colleague, the gentleman from Missouri (Mr. Bailey) said about the Paddy Creek rule is true in spades about this rule and this

bill, except that we are talking here about a larger issue. There are mineral deposits that we are concerned about, lead and zinc deposits, and there is a potential for jobs should lead and zinc

be discovered there.

I will speak to the issues in the course of the debate on the bill, but there are a couple of points I would like to touch upon here while the rule is under consideration. Much has been made of the fact that a majority of the members of the Missouri delegation favor this legislation, and I suppose a majority of the member do. But the fact of the matter is that everyone who is favoring this bill has not been there, and those who are opposed to it have been there.

Much is made of the point that the two Senators from Missouri are in favor of this bill. Fine. Some basic rules of comity apparently apply the Senate. If the two Senators from Missouri over there say they are for it, well, of course, the other 98 Senators are going to say, "who are we, from Wisconsin or California, or New York, to go against the wishes of the Senators from their own State?" But the fact of the matter is there has not been an application of any of the basic rules of comity that ought to obtain here in the House of Representatives.

I am put out that the subcommittee would not even come out there and hold a field hearing in the district. I think it is terrible that this bill is going to be railroaded through here in the manner apparently in which it is without even a field hearing having taken place. I requested one back early on when the gentleman from Missouri (Mr. Volkmer) and the gentleman from Missouri (Mr. CLAY) introduced the bill in the House, which is not the bill we are going to be acting upon because we are dealing with the Senate bill here. I asked for field hearings to be held, and the chairman of the subcommittee wrote me a letter in reply saying that if the Senate passed the bill, he would then be better disposed to hold field hearings.

Well, the Senate passed the bill, and we have not had any field hearings. I think it is terrible and the people of Oregon County, I am sure, think it is terrible that they have not had an appropriate opportunity to get their

licks in on this issue.

The presiding judge of the Oregon County Court did have an opportunity to testify when this matter was under consideration by the House Interior Committee at a Washington hearing last spring, but he was the only person from Oregon County who was up here. I will guarantee that if they come out there and hold some field hearings, they would be well attended. Let us invite the environmentalists, let us invite the mining companies, and let us invite the local population. And certainly I would like to invite the gentle-

man from Missouri (Mr. Volkmer) and the gentleman from Missouri (Mr. Clay), to whom this matter is so important, to come down there and participate in those hearings. St. Louis and Hannibal are about as far away as one can get from the Irish Wilderness and still be in Missouri. I think these gentlemen owe us the courtesy of coming down there and talking to my people before they try to cram this down the throats of my people.

I am not opposed to the Federal ownership of this land. I am not opposed by any stretch of the imagination to its continued use and status in

which it presently exists.

I am going to offer during the course of debate on the bill what I think is a reasonable compromise. I want to assure this body that I want to protect this land. It is now well protected. Virtually everyone agrees that it is being properly managed by the Forest Service and I want to indicate once again that the Forest Service opposes the designation of this land as wilderness at this time, as does the Interior Department.

So the issues here are ones really of basic fairness. The local people and I as their representative would like to work something out here so that all interests could be protected. The people of Oregon County are indeed proud of this land, and they do not

want to spoil it in any way.

Missouri is very privileged to have the mining industry that it does. It creates an awful lot of jobs in lead and zinc, and let me tell the Members that it is clean mining. People come from all over the world to learn the processes of mining that occur in Missouri in environmentally sensitive areas. They come there to learn from us.

If the committee and the Members of the House would be fair on this issue and give us an opportunity to hold field hearings to hear the views of all parties involved, I think something reasonable and acceptable to everyone could be arrived at. As the gentleman from Missouri (Mr. Taylor) pointed out, he had some problems early on when some local people did not want the designations that were being cast upon them. But by careful work with the subcommittee, the then subcommittee chairman afforded the gentleman the privilege of field hearings and they were able to resolve all those problems.

Mr. Speaker, that could happen if that were the case here and some basic rules of comity in this House applied.

Mr. BEILENSON. Mr. Speaker, I yield 1 minute to the gentleman from

Missouri (Mr. Volkmer).

Mr. VOLKMER. Mr. Speaker, I am not going to take the full 1 minute. I just want to remind the House that this is a rule that is very similar, if not identical, to the Paddy Creek rule. It is a fair rule, and it should be adopted. I

think we should debate the question of whether the Irish Wilderness should be designated a wilderness area. We should address the issue during debate on the bill, and I will not debate it now.

Mr. Speaker, I urge adoption of the rule.

Mr. TAYLOR. Mr. Speaker, I yield 3 minutes to the ranking minority member of the full committee, the gentleman from New Mexico (Mr. LUJAN).

Mr. LUJAN. Mr. Speaker, I want to thank the gentleman for yielding this time to me.

Mr. Speaker, I do not stand here as an opponent of designating areas as wilderness areas. As a matter of fact, I am a supporter of the wilderness system that we have put together. As a matter of fact, I think that once we put something into wilderness, then we ought to leave it alone until and unless there is some kind of national emergency.

But let me say that I think this is a different situation, a totally different situation. There have been no hearings in the area. Not one member of the committee, with the exception of the gentleman from Missouri (Mr. Emerson) who represents the area, and the gentleman from New York (Mr. Martin) who was there on some other business, has ever been anywhere near this particular area.

Mr. Speaker, it is not a matter of life and death that we face here in these waning moments of the 97th Congress. I do not understand why we should rush ahead and try to do something like this without having any hearings and without trying to compromise the situation. I just do not believe that that should be done.

There are some strong possibilities, very strong possibilities—as a matter of fact, strong probabilities—that there are substantial minerals in this area. The gentleman from Missouri (Mr. EMERSON) will offer an amendment that we have 10 years in which to explore, and then if there are not any minerals, we will then go ahead and make it a wilderness area. Those minerals that are in there are minerals that are needed in this country.

Now, there is a counterproposal, I understand, that we allow mineral exploration for 5 years, but for only one company. Why should just one company have the advantage over all the rest of them?

Mr. Speaker, this is not a popular issue in this Congress. When we had this bill on the suspension calendar, the vote was 217 to 179. Unlike other bills that we have had here which had a lot of support within the Congress, this one does not. If we had just 20 Members vote the opposite way this time this bill would be defeated.

This bill is different from the previous one we passed. Much has been said about the support from the Forest Service, the administration, and the Interior Department, as well as all the others that were quoted as supporting the Paddy Creek Wilderness a few minutes ago. This is different. Even the Forest Service agrees that this should not be put in a wilderness area.

I do not know that I agree with the Forest Service. Maybe it should and maybe it should not. I, like the rest of the committee members, have not been there. But I think we ought to have the opportunity to go there and to work out some compromise. I imagine this will become a wilderness area in time, but what is the hurry? Why do we have to do it at this last moment?

The House spoke earlier this week when the bill was brought up on the suspension calendar, and immediately after that we rushed over to the Rules Committee to get a rule so that we could get it going, as though if this bill does not pass, the world is going to come to an end. It is no such thing. Nobody is moving in on the proposed Irish Wilderness.

Mr. Speaker, I urge my friends in the body to vote against the rule.

Mr. TAYLOR. Mr. Speaker, I yield 3 minutes to the ranking minority member of the Subcommittee on Mines and Mining, the gentleman from Utah (Mr. Marriott).

Mr. MARRIOTT. Mr. Speaker, I rise in opposition to this rule because I am in opposition to the bill. I have supported my good friend, the gentleman from Ohio (Mr. Seiberling) on many occasions in wilderness legislation, but I have to part with him on this one because I honestly believe this goes a little bit too far.

This bill is detrimental to our national interests. It was brought up in the committee in great haste. We have not inventoried the land to see what is there

Wilderness land, as far as I am concerned, should be designated to preserve our primitive areas. The Irish Wilderness is not primitive. It is timberland. It has been cleared in many parts for grazing. It has extensive unpaved roads. It is being well managed now as multiple-use land, and that concept is supported by the local community.

#### □ 1230

More important than any of that, I suppose, is the fact that if you look at this map that I have just been reading, this land lies just south of the Viburnum Trend which is where 90 percent of the lead in this country is mined.

This land has great potential for the Nation's future lead reserves.

As the ranking Republican on the Mines and Mining Subcommittee, we are concerned about our mineral potential in this country and not locking it up.

I would just like to say to the Members if they support this rule and if they support this bill they are locking up this land forever after December 31, 1983. I do not think any of us want to do that until the Mines and Mining Subcommittee has had a chance to take a hard look at this land and its potential.

I would urge, therefore, that you give us some time to inventory the land and to evaluate its potential, to explore the land.

We find new deposits of minerals about once every 30 years. We need the time to explore this particular parcel of land and for that reason to lock it up permanently as wilderness is bad politics and runs against common sense.

I would urge my colleagues to vote against this rule and also to vote against the bill when it comes up.

Mr. SEIBERLING. Mr. Speaker, will the gentleman yield?

Mr. MARRIOTT. I am happy to

yield to the gentleman.

Mr. SEIBERLING. I simply want to

mr. SEIBERGING. I simply want to correct the Record. The gentleman from New Mexico (Mr. Lujan) stated that this bill was voted on yesterday by a vote of 217 to 170 or something like that.

There was no vote on this bill at all. This bill has never been voted on by the House. I do not know which bill the gentleman was referring to but it was not this one.

Mr. MARRIOTT. That is correct

and it should not be.

I yield back the balance of my time. Mr. TAYLOR. Mr. Speaker, I would simply say in closing that again the issue here is not the wilderness concept. The issue is fairness, reasonable consideration, and deliberation.

I would certainly urge in the spirit of cooperation with our colleagues and with the people who will be involved in this that we give further consideration to it, defeat the rule, and come back and look at it under more sane circumstances.

I yield back the balance of my time.
Mr. BEILENSON. Mr. Speaker, in
conclusion, the Committee on Rules
believes this is a fair rule. It allows the
gentleman from Missouri (Mr. Emerson) the opportunity to propose his
own substitute.

It waives all points of order against that substitute, with the single exception of the germaneness requirement, so that it allows the gentleman, in effect, to rewrite this bill as he wishes.

As the gentleman has testified to this House, he does intend to offer what he calls a reasonable compromise, so he will have every opportunity to present that to the Members. The gentleman will have his day in court. He is being fairly treated. I ask adoption of the rule.

Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.
The SPEAKER pro tempore. The question is on the resolution.

Mr. FRENZEL. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device and there were—yeas 186, nays 191, not voting 56, as follows:

Mr. FARY changed his vote from "nay" to "yea."

So the resolution was not agreed to. The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

PROVIDING FOR CONSIDER-ATION OF H.R. 7357, IMMIGRA-TION REFORM AND CONTROL **ACT OF 1982** 

Mr. BEILENSON. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 623 and ask for its immediate consideration.

The Clerk read the resolution, as fol-

#### H. RES. 623

Resolved. That upon the adoption of this resolution it shall be in order, section 402(a) of the Congressional Budget Act of 1974 (Public Law 93-344) to the contrary notwithstanding, to move that the House re-solve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 7357) to revise and reform the Immigration and Nationality Act, and for other purposes, and the first reading of the bill shall be dispensed with. After general debate, which shall be confined to the bill and shall continue not to exceed five hours, two hours to be equally divided and controlled by the chairman and ranking minority member of the committee on the Judiciary, two hours to be equally divided and controlled by the chairman and ranking minority member of the Committee on Education and Labor, and one hour to be equally divided and controlled by the chairman and ranking minority member of the Committee on Agriculture, the bill shall be read for amendment under the five-minute rule by titles instead of by sections, and each title shall be considered as having been read. No amendment to the bill shall be in order except (1) the amendments printed in the Congressional Record of December 6, 1982, by Representative Perkins of Kentucky, corresponding to the amendments recommended by the Committee on Education and Labor to H.R. 6514, said amendments shall be considered as if they were amendments recommended by the Committee on Education and Labor to H.R. 7357, and said amendments shall not be subject to amendment except amendments printed in the Congressional Record on or before December 9, 1982, and pro forma amendments; (2) amendments printed in the Congressional Record on or before December 9, 1982; and (3) pro forma amendments for the purpose of debate. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit. After the passage of H.R. 7357, the House shall proceed, any rule of the House to the contrary notwithstanding, to the consideration of the bill S. 2222, and it shall then be in order in the House to move to strike out all after the enacting clause of the said Senate bill and to insert in lieu thereof the provisions contained in H.R. 7357 as passed by the House. It shall then be in order to move to insist on the House amendment to S. 2222 and to request a conference with the Senate thereon.

The SPEAKER pro tempore (Mr. Brown of California). The gentleman from California (Mr. Beilenson) is recognized for 1 hour.

Mr. BEILENSON. Mr. Speaker, for purposes of debate only, I yield 30 minutes to the gentleman from Arizona (Mr. Rhopes), pending which I vield myself such time as I may consume.

Mr. Speaker, House Resolution 623 provides for the consideration of H.R. 7357, the Immigration Reform and Control Act of 1982. The resolution provides 5 hours of general debate to be allocated as follows: 2 hours to be equally divided and controlled by the chairman and ranking minority member of the Committee on the Judiciary; 2 hours to be equally divided and controlled by the chairman and ranking minority member of the Committee on Education and Labor; and 1 hour to be equally divided and controlled by the chairman and ranking minority member of the Committee on Agriculture.

To facilitate consideration of this important legislation, the Rules Committee granted a waiver of section 402(a) of the Congressional Budget Act requiring authorizations to be reported by May 15 before the beginning of the fiscal year for which they are effective. Also, the rule provides that the bill will be read by titles, with each title to be considered as read.

The resolution makes amendments printed in the Congressional Record of December 6 1982, by Chairman Per-KINS, corresponding to the amendments recommended by the Education and Labor Committee to H.R. 6514, in order as amendments recommended by the Education and Labor Committee to H.R. 7357.

The rule also allows consideration of any germane amendment printed in the Congressional Record by December 9, 1982, and pro forma amendments for the purpose of debate. This printing requirement has given Members time to examine the amendments to this complex bill before they are offered on the floor.

A motion to recommit is also provid-

After passage of H.R. 7357, the resolution waives all rules of the House to permit consideration of S. 2222 and makes in order a motion to strike all after the enacting clause of the Senate bill and to insert the House-passed

Finally, the rule provides for a motion to insist on the House amendment and request a conference with the Senate.

Mr. Speaker, H.R. 7357 will effect a long overdue reform in the manner in which our Nation regulates legal and nonlegal immigration across our borders. As Member are aware, millions of undocumented aliens reside in the United States and hundreds of thousands more arrive each year. The rapid population growth in neighboring countries to the South and the greater economic opportunities available in the United States guarantee that ever larger numbers will attempt to enter this country in the foreseeable future.

H.R. 7357 will take the important steps of encouraging stronger border control and penalizing employers who induce illegal immigration by making jobs available to the undocumented.

The bill also grants the opportunity for citizenship to undocumented aliens who have been living and working in this country for several years. The bill restructures many aspects of legal immigration to the United States, expanding opportunities for foreign workers and students to take employment in this country, waiving visas in cases where there is little risk that foreign nationals will attempt to stay here.

Finally, the bill provides for unlimited immigration by Amerasian children

within the next 3 years.

Mr. Speaker, H.R. 7357 is not a perfect bill, but it is, in this Member's opinion, a very good one. We do not know of any better one hanging around here in the Capitol waiting to be voted on. It is the result of an enormous amount of hard work by some dedicated colleagues of ours here in the House, and it deserves to be heard by the Members. In the opinion, again, of this particular Member, it is a necessary and a humane bill, and it is very much in our national interests to enact this legislation as quickly as possible.

Mr. RHODES. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the rule for the bill which is before us is a rule which came out of the Rules Committee by a unanimous vote. There is controversy on the bill itself, but there was no controversy on the rule. The gentleman from California has very adequately explained the rule, and I support it.

(By unanimous consent, Mr. Rhodes was allowed to speak out of order.)

REMARKS OF HON. JOHN J. RHODES OF ARIZONA ON HIS RETIREMENT FROM U.S. HOUSE OF REP-RESENTATIVES

Mr. RHODES. Mr. Speaker, I hope that Members will agree with me that one who has served in this body for 30 years does have a right upon leaving it to pass along some thoughts and conclusions concerning the institution itself. I guess if you want to label this, you could call it my swan song, because it may be the last time that I will be privileged to speak from this floor.

I want to keep my remarks to the institution. I have spoken on national issues at other times and, as the years and months go by, I hope to continue to do so by writing and speaking. But in these minutes that I now have, I intend to offer comments and suggestions which I truly hope will help this institution to become an even more capable one of discharging its responsibilities than I now believe it to be, and to have in the eyes of the country a

better image that it now seems to

I certainly do not claim to know all of the answers. I do not even know all of the questions. But I do have some ideas, and I have no intention of demeaning this institution in putting them forth. I am very proud to have been a Member of this House for 30 years, and I believe, as I did when I entered it, that it is the greatest deliberative body in the world.

#### □ 1300

I have enjoyed being here. I will miss the institution as well as my friends on both sides of the aisle, the Members and the staffs.

For some time I have been worried about the structure of the Federal Government and the state to which the actions or inactions of the Congress have caused departure from Federal service of many employees we

would like to have kept.

That is why I was pleased at the actions of the House the other day in passing the necessary legislation for a pay raise for this body. And I only hope that the other body will be equally zealous in passing the legisla-

tion for a pay raise.

One of the problems which I do not think has ever been brought to the concern of the country and the Congress adequately is the longstanding tradition that Federal employees in classified service will not receive compensation higher than do the Members of the Congress. Frankly, I have never understood the rationale for this sometimes written but also sometimes unwritten law.

It seems to me that we demean ourselves by comparing our positions with those of Federal employees. And I say that with certainly no disrespect to the Federal employees. But we were elected by some 525,000 Americans to serve our country as provided in the Constitution of the United States. Now, that is not true of the Federal employees. They have been selected and I hope selected carefully to en-force and administer the laws passed by us, the Members of the Congress, sitting in plenary session. It seems obvious to me that the people of the country are best served if we procure the talents and capabilities of the very best people available for Federal positions. We cannot do this unless the salary scale is at least comparable to that enjoyed by those in the private sector with similar responsibilities and with similar necessities for education and experience.

During my tenure in this body I voted several times for increases of pay for the Members of Congress. I do not believe I have ever voted against a pay increase because I always felt that by the time it came to the floor it was amply justified by the personal economics of the Members. I considered

those raises necessary to attract the best talent available to serve in the Congress of the United States.

A Congress made up of less than the best available is not a Congress which best serves our people. If because of an unrealistic pay scale Congress loses or does not attract the most capable people, the majority of Americans certainly are not well served, nor is our Republic.

In fact, if the Congress is underpaid, I venture to say that eventually it will be made up of mainly two classes of people. There would be those who have unearned income from stocks, bonds, mortgages, or whatever, which allows them to live in the style which they feel is desirable regardless of congressional pay. They do not need it. The second class would be those who have never done much with their lives and to whom the congressional pay, however inadequate, is remuneration beyond the wildest dreams that they have had and beyond their ability to earn in the private sector.

I hope we will quit treating ourselves like Federal employees. We are different, and we should maintain that difference.

However, when it becomes apparent that congressional salaries are inadequate to supply the needs of young families, to educate the children of those families and to provide reasonable standards of living for those families, then it is up to the majority of the Congress to make salary adjustments. It is a duty. To do otherwise is to limit seriously the availability of talented people from all walks of life to serve in the Congress and to serve in the Federal classified establishment.

But until Congress is willing to face up to its responsibilities to its own Members, it would be my hope that at least it would get out of the way and allow the pay of Federal employees to rise at least to keep up with the cost of living.

This I hope would stop the talent drain which threatens to undermine the efficiency and capability of the Federal Establishment.

Now, sure, I have taken some criticism for voting for pay increases. But I think my standing here is certainly evidence of the fact that the criticism was not fatal, it was not widespread, and it did not last very long. If each Member goes home and explains to his people why, in his opinion, increases were necessary, I believe that he will find as I have that the people of our districts are more understanding than we thought they were, and that they understand as well as anybody that having a Congress which is underpaid is truly a false economy.

Now, on another subject.

I was privileged to serve as a member of the ad hoc committee appointed by Speaker Carl Albert to explore the possibility of devising a congressional budget. I am pleased that we were able to put together that package and at that time it was acceptable to the Members of the Con-

But the time has come for a review of that congressional budget process with the idea of making some changes which will benefit not only that process, but the entire structure of the

Federal Government.

In my opinion, the budget process has become a dam rather than a conduit, and unduly disrupts the business of the legislative body. Several factors

have contributed to this.

First, it was never the idea of the Budget Study Committee that the first concurrent budget resolution would be anything other than a study in macroeconomics, to determine the needs of the economy insofar as Federal participation was concerned.

The idea was to have the Federal Government and its activities flow in the direction of aiding the economy to see stability and to serve the private sector and its needs. Instead, we argue interminably in areas which approach line item expenditures, in effect taking over the job of the Appropriations Committee in the budget process.

The first resolution will, in my opinion, have a much easier birth if it returns to the original concept of a study in macroeconomics. It would be my hope that the Congress could organize itself early in January after the election. As many of my colleagues will remember when we decided to have our orientation meetings of the new Members in December, that was the idea, that we would not only orient but we would proceed to organize for the new Congress. And this could be accomplished if the majority caucus or conference would make up its mind in December as to the ratio of division of the various committees of the House.

This would allow the work of committee assignments to proceed also in December so that in January the House would be organized and ready to proceed with business. Unless this is done, then I suggest that the time for the first concurrent budget resolution to be reported be changed from May 15 to June 1 or perhaps even June 15. Accompanying the first concurrent budget resolution should be a reconciliation bill which would direct the various committees to make changes in agencies, programs, or bureaus which are in their jurisdiction insofar as authorizations for expenditures or entitlements might be concerned.

If the Budget Committee determines that reductions in outlays are necessary, it would, through the House acting itself, direct the appropriate committees to report bills to effect

them.

One of defects which I am sure we are all aware of in the Congress is the extent to which many of the committees become enamored of their own jurisdictions. And this is understandable. I do not criticize it. But it is a phenomenon which I think we need to take into consideration.

It is understandable because most people are serving on committees which they find congenial or they would not be there. And they very likely sought those committees because of an affinity which they feel for some of the activities of that committee.

A reconciliation bill really is the majority of the entire House and Senate, telling a legislative committee or committees that it does not share the high regard for some parts of the committee's jurisdiction which the members of that committee hold. It is telling that committee that the will of the majority of the House and the Senate is that the Federal pie must be divided differently than the members of the committee might desire. I regard these mandates by the majority not as usurpation, but as helping committee members and chairmen to keep their balance and realize that as Members of Congress they have higher responsibilities than just to insure the wellbeing of certain pet agencies or bu-

In my opinion, all of the work of the first concurrent budget resolution including reconciliation must be accomplished by a certain date. As I have already indicated I would certainly be amenable to changing the date from May 15 to a later time which might prove more practicable.

But I feel that if the first concurrent budget resolution is not in place by the date set, that nevertheless some-

thing should happen.

I suggested that at the time that the congressional budget process was being born, that unless on May 15 or the date set for the first concurrent budget resolution to have been adopted, if that act has not occurred, that then the President's budget would also become the budget of the House and the Senate.

Now, I do not want that to happen. And I bet that it will not happen. Because I cannot imagine a Congress al-

lowing it to happen.

But, nevertheless, if it does occur, it will at least allow the Appropriations Committee to begin marking up its bills and getting them ready for full committee action and for passage by the Congress.

In my opinion, it is extremely important that we no longer have situations such as those we have seen in this session and the preceding one in which only a few appropriations bills ever become law. Operating the Government by concurrent resolution is certainly not desirable. And I submit that

it does not adequately execute the duties which the Constitution prescribes for the Congress of the United States

I hope that the Appropriations Committee will always get its work accomplished and its bills passed at the appointed time. Personally, I believe that a second concurrent resolution is necessary together with further reconciliation legislation if it is needed aimed primarily at the appropriations bills themselves.

This was never possible for the Congress to reconcile appropriations bills adequately because those which were already adopted were in the law and could not easily be changed.

For this reason, I suggest very strongly that all appropriations bills proceed through the House, the Senate and conference, but that no final enrollment of the bills occur until all appropriations bills are in place and ready for enactment.

Now, there are various reasons for

The first one of course is that if the bills in total exceed the limit of expenditures that the Congress believes proper it is then comparatively easy to change those bills which the Congress desires to change. Having all of them ready and available for change keeps the last few bills enacted from being victimized by the later realization by Congress that total expenditures exceed the optimum and desired amount.

In other words, for example, if all bills except the defense bill-if all bills were enacted except the defense bill and it became necessary for draconian cuts to be made in expenditures, the only cuts possible would be in the defense bill. And of course that applies equally to all of the other appropriations bills-Agriculture, Commerce, and the like-if they happen to be the last.

I doubt that this is a result that anyone would find desirable.

Another change that I would suggest in the budget process is to make appropriations for 2 years at a time. I feel that the Budget and Appropriations Committees are prefectly capable of quite accurate projections and that the administration would be well served if it was able to count upon certain amounts of funds for certain activities further ahead than 1 year. But another definite advantage on 2-year appropriations is that it leaves 1 year for studying the jurisdictions of the various committees. Legislative oversight has been largely neglected by the Congress for many years. It is obviously one of the most important functions which any Congress can per-

I would hope that in the off year, the year in which we do not appropriate, that legislative oversight would become the prime duty of the legislative committees. This would not only help committees to understand their own jurisdictions better, but in my opinion would give the administration and the entire executive department help which they need in anticipating and complying with the desires of the Congress.

As I told our esteemed Speaker, my good friend, not too long ago, I would not rewrite the scenario that I have played out these last 30 years in very many ways. One of those ways would be that I would have defeated him at least once in our biennial contest for the Speakership. There are many reasons why I would like to have been the Speaker of this House. Some of them deal with political, economic, and social philosophy. Some of them deal with strongly held concepts which I have concerning the internal organization of the House, its infrastructure.

First I feel that we have too many select committees and subcommittees and therefore we have too much in the way of staff. I think we should be much more careful in spending the public money on our own operations than I think we have been.

Also without any reflection whatsoever on the estimable people who hold these jobs, it appears to me that the organization of the House, with the Clerk having certain responsibilities, the Sergeant at Arms having others, and the Doorkeeper and the Architect having others, many of them overlapping, provides very little in the way of cohesion or direction from the top.

I happen to believe that it should be the responsibility of the Speaker to supervise carefully and closely and to streamline these operations with the idea of making them more efficient and more responsive to the desires and the needs of the Members.

As Speaker, if I could have gotten by with it, and I am not sure I could, I would have done away with the patronage system. In my opinion, it does not result in the employment of the best people available for the jobs which the House can bestow. It seems to me there should be better and more fair methods of selecting employees than we now use and providing for tenure for employees so that there could be more of them who are of capability who would seek these positions and keep them through the years.

# □ 1315

I suppose I could be accused of feeling as I do about patronage because I never had any. Actually, that may be one of the reasons I feel this way. I have never missed having patronage and I do not feel that the lack of patronage has inhibited my capabilities or my ability to get reelected. I dare say that if patronage no longer exist-

ed, in a very short period of time nobody would miss it.

I am reminded of the time when postmasters and rural mail carriers were appointed by the Members of the House. As one Member said, "Every time you appoint a postmaster, you make a thousand enemies and one ingrate." This, I think, would apply to the rest of the patronage positions of the House.

I am well aware of the fact that the Members of the House probably will not adopt many of the suggestions I have made. I made them in good faith, in good humor, and without the desire to offend anyone. I do hope, however, that each of you will give the points I have made some thought and perhaps you will come to the conclusion as I have that we can make this institution an even greater one than it now is.

Before I stop, I would like to congratulate the gentleman from California (Mr. Beilenson) of the fine work which he has done as chairman of the ad hoc committee which was appointed by the chairman of the Rules Committee for the study of the budget process. He has held exhaustive hearings. He has gotten the thinking of not only many of our Members, but many of the best informed people from around the country. I certainly hope and believe that subcommittee will report soon in the next Congress and when it does I am sure that its work will bear the scrutiny and I hope the adoption of all the Members of the House.

In leaving, I wish to thank all of you for the many kindnesses and favors that I have enjoyed at your hands. We have fought sometimes, we have agreed sometimes, but I think with practically no exceptions, we have mastered that gentle art of being able to disagree without being disagreeable.

I value the friendship of all of you and look forward to continuing it.

Hail, and farewell.

Mr. BEILENSON. Mr. Speaker, I yield 1 minute to the gentleman from Washington (Mr. Foley).

(By unanimous consent, Mr. Foley was allowed to speak out of order.)

Mr. FOLEY. Mr. Speaker, it is not my intention to start a special order on the gentleman from Arizona because that would take up the rest of this day's business. after that very moving and enlightened statement, however, I do not think it would be appropriate to proceed without first saying that as is true of his colleagues on the other side of the aisle, those of us on this side know of no one we have served with who has shown more concern or dedication to the welfare and interests of his district, State, and Nation than the gentleman from Arizona (Mr. Rhopes). He has done us all a great honor in serving in this body and in allowing us the privilege of calling him a colleague and friend.

Mr. RHODES. Mr. Speaker, I yield 3 minutes to the gentleman from Illinois (Mr. McClory).

Mr. McCLORY. Mr. Speaker, I thank the gentleman for yielding.

I want to pay the highest tribute to my distinguished colleague from Arizona (Mr. Rhodes) who has occupied positions of top leadership on this side of the aisle.

I regret, as he does, that he never had the opportunity to mount the rostrum and to serve as the Speaker of the House of Representatives.

The remarks of the gentleman from Arizona uttered today, constitute a framework for improving the legislative process of this body. I recall a few years ago that the gentleman from Arizona, as the editor of an important work, entitled "We Propose: A Modern Congress" the gentleman from Arizona included a number of recommendations which, if followed, could have enhanced the reputation and improved the work product of this body.

I had the privilege of serving as the editor of that chapter relating to the budgetary process to which the gentleman made reference. The recommendations therein made are consistent with those which the gentleman made just a few moments ago.

As a matter of fact, the various recommendations that the gentleman made if subscribed to and if followed could certainly improve the operations of this body.

The gentleman represents the very highest in my view of statesmanship, of stature and of those qualities that help to make this body the great deliberative body that it is.

As one who has served for 20 years with him and who is departing from these Halls with him, I join in extending to him and to his wife, Betty, our good wishes for a healthy and rewarding future.

Mr. BEILENSON. Mr. Speaker, I yield such time as he may consume to the distinguished majority leader, the gentleman from Texas (Mr. WRIGHT).

Mr. WRIGHT. Mr. Speaker, I certainly want to join in expressing what all of us feel in our hearts who have had the rich and rare privilege of serving with John Rhodes. He is and has been an exemplary colleague, a worthy adversary, a warm and generous and gentle friend. He has conducted himself always and in every situation in such a manner as to reflect credit upon this institution which he loves.

When he disagrees, he does so without being in any sense disagreeable. John Rhodes in all the years that I have had the honor to know and work with him has epitomized that standard of legislative craftsmanship which honors this Hall by according to those even with whom he disagrees the assumption of honor which each of us would have others accord to himself.

So, John, for being the kind of person that you are, for being a man's man, a legislator's legislator, and an American's American, we honor you. All of us want to express our hopes that the future may be kind and gentle, that you will save some time to let us here enjoy at least occasionally your company and your counsel, and that when you are in your home State the suns of Arizona may shine as brightly and as warmly upon you as the radiance of your personality has shown upon this Chamber.

Mr. BEILENSON. Mr. Speaker, we have 5 hours of general debate on this bill, so I think it is not out of order for us to take a couple more minutes for folks who want to be recognized to say a word or two about the gentleman from Arizona (Mr. Rhodes).

This Member wanted to also thank the gentleman from Arizona for his remarks, especially his remarks with respect to the budget process. The gentleman has been a most valuable and faithful and helpful member of our ad hoc task force and he will be sorely missed.

This Member believes that the gentleman from Arizona is one of the very best and very finest Members of this great institution, as well as one of the finest human beings that this particular Member has ever had the privilege of knowing.

I cherish my friendship with the gentleman, as do many other Members of this body. We hold the gentleman in the greatest respect and affection and I would be doing him a disservice if I did not also express my appreciation at this moment for his support for the rule which is before us, to bring us back to the subject at hand.

Before we get back to the subject at hand, Mr. Speaker, I yield 1 minute to the gentleman from California (Mr. Panetta) for purposes of debate only.

Mr. PANETTA. Mr. Speaker, I, too, would like to join in commending the gentleman from Arizona. There are those that work and live and vote here and do not realize the institution that they are a part of and there are other who work and live and vote and appreciate the institution. John Rhodes is one of those who lives this institution.

I particularly appreciate his recommendations with regard to the budget process because I think the gentleman has taken the time in the task force and the groups with which he has been related to really be concerned about the budget process and recommendations to improve it.

I guess if there is one thing that I can assure him of, it is that despite his leaving there are those of us who share his concern about that process that will carry his recommendations and his concerns, hopefully, into implementing reforms in the process. That probably more than anything

else would be the greatest tribute to the gentleman from Arizona.

Mr. BEILENSON. Mr. Speaker, I yield 1 minute to the gentleman from New York (Mr. Downey).

Mr. DOWNEY. Mr. Speaker, I want to also express my support and admiration for the gentleman from Arizona. I was 3 years old when the gentleman was elected to the Congress and it was my misfortune to give my first speech on the B-1 bomber and have the very first question ever put to me in this Chamber by the distinguished minority leader. I learned a great deal that day about preparation and repartee from the distinguished gentleman from Arizona and I believe I have been enriched by my experience with him.

This Congress is losing two of its giants, the gentleman from Missouri (Mr. Bolling) and the gentleman from Arizona (Mr. Rhodes). I think that those links to the past are very necessary for this Member and for other Members to understand what came before, to understand something about this institution.

I will miss the gentleman from Arizona, but I will also be comforted in the knowledge that he is only a phone call away.

Mr. BEILENSON. Mr. Speaker, I yield 1 minute to the gentleman from

California (Mr. Pashayan).
Mr. PASHAYAN. Mr. Speaker, when I came to this institution 4 years ago, I came as somebody who had never run for office before, never occupied any public office. I came with an awful lot to learn.

We have all extolled JOHN RHODES for his various virtues and I should like to thank him for being my mentor. I only hope I follow to some degree the very good advice he has given me. His door was always open.

I have learned a lot from his counsel and advice over the years. I count him as a friend and I look forward to seeing him as much as possible. I hope he comes back to Washington often. I know that when he does come back it will always be in good grace.

Mr. BEILENSON. Mr. Speaker, I yield 1 minute to the gentleman from Wisconsin (Mr. OBEY).

Mr. OBEY. Mr. Speaker, I just would like to say that I share the sentiments expressed by the gentleman from New York. I think it is fitting that both John Rhodes and Dick Bolling are retiring at the same time, because they more than any other individuals I know are truly institutional men and they more than any other individuals who I have ever served with in this House have given the question of what is good for this institution as a whole the highest priority—above partisanship, above every other consideration I know.

I simply want to say that when John Rhodes and Dick Bolling leave, we are losing our five best men.

□ 1330

Mr. BEILENSON. Mr. Speaker, I yield 1 minute to the gentleman from New York (Mr. Gilman).

Mr. GILMAN. Mr. Speaker, I am pleased to rise in order to join my colleagues in paying tribute to the gentleman form Arizona (Mr. Rhodes).

I was a Member of the Congress when John Rhodes was elected to the leadership post of the minority party. In his 30 years in the Congress John has been a patient and knowledgeable adviser to many of us, as outstanding minority leader and a model for all of us to emulate in his roll as an outstanding legislator.

We are going to miss John Rhodes in this body. We hope that he will be around and be able to continue to guide and advise us. John Rhodes has left behind a legacy of reform that I hope we will dust off from time to time, reminding ourselves that there is much room for reforming and strengthening our procedures.

JOHN RHODES, we thank you for your significant contributions, to this great institution. We wish you good health, happiness, and success in all your future endeavors.

Mr. BEILENSON. Mr. Speaker, this gentleman is running out of time. We have to discuss the rule as well, so if he may, he would like to start recognizing Members who have to speak on the rule. There is apparently some opposition to it.

Mr. Speaker, at this time I yield 10 minutes to the gentleman from New York (Mr. Garcia).

Mr. GARCIA. I thank the gentleman for yielding this time to me.

Mr. Speaker, before I get started on my statement, I would like to say to the gentleman from Arizona that as a leader, as one wno has served here for so many years, there was a period in my young life when I was the minority leader of the State senate and I know the frustrations and the feelings.

I remember Lloyd Bridges, our majority leader, saying at the time:

The institution must go on, and those of us to come are blessed with the fact that we have had this opportunity to serve, but the business of the people is something.

So with the minority leader's permission, I would like to get into the statement on the rule. I am particularly sorry, if I may say to all of my colleagues, that this rule has come out and this rule is coming out during the lameduck session.

I do not want to take anything away from my colleague, the gentleman from Kentucky (Mr. Mazzoli), my colleague, the gentleman from New York (Mr. Fish), because I think if there are any human beings in this body who in fact are sensitive and understand the needs of the poor, and especially those who presently do not enjoy the similar status that we enjoy

today, that this bill would be much rougher for those of us who are trying

to defend those people.

But be that as it may, and since we are in a lameduck session and since we are doing today with this rule and with the 5 hours of general debate that will take place from 6 p.m. until 11 p.m. tonight, when I am certain many Members, realizing that there will be no votes, will not be in the Chamber, it seems to me that because this bill affects the millions and millions of people that it will affect, not only this year but in the years to come. I think it is appropriate that I stand here today and oppose this rule because I believe that it should not be handled during a lameduck session.

A primary objection that I have to the bill centers around employer sanctions. These sanctions, as far as I am concerned, are designed to discourage employers from hiring undocumented workers. A fine or sanction would be imposed on employers who hire individuals who are not citizens or legal residents of the United States.

The provision on the surface and on paper looks good, but I am afraid that in reality and in practice it would allow employers to act as both the judge and the jury with prospective employees who speak with an accent or who look different. Employers could refuse to hire these individuals, claiming that they are afraid of being fined.

In my tenure as a State senator in the year 1974, Malcolm Wilson, who served for 1 year as Governor of our State, in that time we passed a bill in the house and in the senate calling for a \$5,000 fine on employers dealing with the question of sanctions. We were able to convince Malcolm Wilson, then Governor of the State of New York, to veto the bill.

I feel today, as I felt then, that sanctions are wrong. Instead of sanctions, there should be target enforcement of existing labor laws. This would upgrade working conditions and wages so U.S. citizens could take jobs that are now unattractive because of substandard pay or an adverse working environ-

ment.

The bill also suggests a national ID card to be used to prove citizenship or residency in order to obtain employment. Not only would this program be expensive to implement, I truly believe it is an infringement on civil liberties. It sets the stage for a more sophisticated and expensive black market for the new ID cards. Further, it is a stumbling block in the way of America's poor and indigent seeking employment.

The chronically unemployed do not need to become more alienated from participating in the mainstream of society.

I believe that the legalization program in H.R. 7357 does not go far

enough. Legalization should not be a tradeoff to the minority community. It is an opportunity for the United States to wipe the slate clean, to begin handling its immigration problems from a fresh start. Without a legalization program, the underclass of undocumented persons in the United States will continue to become more alienated and exploited.

We do not need to expand our Nation's underclass. We truly need all people living in and working in this country to work together and to build for the future.

It has been inferred that the consideration and passage of H.R. 7357 would help heal America's unemployment problems. I truly find this ironic, No. 1, because I firmly believe that blaming undocumented immigrants for unemployment problems is scapegoating; two, because an expanded H-2 program, that is, a program that invites workers from the Caribbean and Latin America to work in this country on a temporary basis, has also been included in H.R. 7357. This seems to be another version of the now abolished bracero program which was instituted as a result of a labor shortage.

The only cure for unemployment is to get our economy moving. The primary cause of this problem is not immigration, but a faulty economic policy.

There is another important point to be considered when we discuss the new immigration problem, and that is the root cause of immigration, which is that people come to the United States searching for opportunity, as many, if not all, of our parents did.

In order to control immigration, the United States should help developing countries with labor-intensive industries that would keep potential immigrants at home. Immigration must be stopped at the source. Agriculture, labor-intensive industrial development programs in prime sending nations are two key proposals for achieving this. Bolstering developing nation's economies, particularly in Latin American and the Caribbean, also provides the dual benefits of stabilizing the region politically and building potential markets for U.S. goods and services.

It is to the advantage of those countries sending the most immigrants to cooperate not only because it would increase their prosperity, but because it also cuts off the so-called brain drain of their most intelligent and industrious workers.

I have to admit it is not an easy task to integrate both the immigration and the foreign aid policy together. As far as I am concerned, it may be somewhat of a radical approach to immigration. Nonetheless, it reflects a profound understanding of the complexity of the U.S. Government's attempts to control the borders.

H.R. 7357 does not take into account foreign policy considerations. It attempts to deal with immigration not at the border or before the border where the problem begins, but over the border in the United States where fair enforcement is much more difficult and less permanent.

The recent economic difficulties in Mexico and the immediate increase in attempted crossings at the United States-Mexican border is an excellent example of the magnitude of the problem the United States will continue to face unless it integrates its immigration and foreign policies.

Yes; the United States is a wealthy country. The nations south of our borders are very poor. The attraction for the people of these nations to come to the United States is obvious and strong

What a new immigration policy must do is assist prime sending nations in making it equally attractive for potential immigrants to stay home. Also, the Immigration and Naturalization Service should be given more funding to enable them to increase their efficiency.

This is a very serious issue, and the INS needs adequate support in handling it.

I am in favor of a new immigration policy. The United States has to protect its borders. We have the right to control the number of people who come into our country, but any immigration policy must be realistic and fair if it is to properly reflect American principles of justice.

Therefore, this H.R. 7357 should not, and I underline the word "not," become law.

Mr. Speaker, I yield back the balance of my time.

The CHAIRMAN. The Chair would announce that each of the two Members has 7 minutes remaining.

Mr. BEILENSON. Mr. Speaker, I yield such time as he may consume to the gentleman from Georgia (Mr. Levitas).

Mr. LEVITAS. Mr. Speaker, I ask unanimous consent to address the House for 1 minute to speak out of order and that the time consumed not be charged to either the majority or minority.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Georgia?

There was no objection.

CONTEMPT OF CONGRESS REPORT

Mr. LEVITAS. Mr. Speaker, I take this time to make an announcement with respect to the matter of a contempt of Congress resolution that will be brought before the House later in the day.

Because of the gravity of this matter, and in an effort to see that each Member be fully informed before reaching a decision, it is my purpose to announce that copies of the report of the Committee on Public Works and Transportation with respect to the contempt of Congress and available for Members in the House Chamber, and I urge all Members to avail themselves of the opportunity to read the report.

Mr. BEILENSON. Mr. Speaker, I yield 2 minutes to the gentleman from Texas (Mr. KAZEN) for purposes of debate only.

Mr. KAZEN. I thank the gentleman

for yielding this time to me.

Mr. Speaker, at a later date I am sure we are going to have ample opportunity in a special order to express our feelings for the distinguished gentleman from Arizona, who has been a very close and dear friend in all of the years that I have been here, but for the present let me just say that I wish him well and that we will be talking about him a little later on.

As far as this rule is concerned, Mr. Speaker, I do not believe that the immigration bill should be debated in this lameduck session at this late stage

of the session.

This bill covers the waterfront on immigration policy for the United States. The mere fact that it has a 5-hour rule tells us how important it is and how important the consequences of passing a bill at this later hour under the atmosphere that we have in this House at this particular time. It is not conducive to the best interests of this country.

I recognize the good work done by my good friend, the gentleman from Kentucky (Mr. Mazzoli), and the other people who have worked on this bill but, my colleagues, this is not the type of topic to take up within 2 or 3 days of adjournment of this Congress.

Once we pass this bill, we know that we are going to have some consequences that we did not think of. These are very serious topics, such as amnesty, sanctions, H-2, the whole complex of immigration policies involved in this bill, and we just do not have the time to deal with them as we could during the regular session.

There is not that much urgency to pass it now and do what I consider this House will do, a bad job, debating this bill and amending it with over 250 amendments which are now pending at the desk, and I can assure this body that the majority of them will be presented and we will not have time to consider them properly.

I urge the defeat of the rule.

#### □ 1345

Mr. RHODES. Mr. Speaker, I yield 3 minutes to the gentleman from Wisconsin (Mr. Sensenbrenner).

Mr. SENSENBRENNER. Mr. Speaker, let me reiterate the remarks that have been made by my friend from Texas, Mr. Kazen. This is a complicated bill that has far-reaching circumstances.

Mr. Speaker, I wish to commend the chairman and the ranking minority member of the House Judiciary Subcommittee on Immigration, Refugees, and International Law for asking for the rule that is before us today. It will allow for a complete discussion of the issues surrounding immigration reform.

I must, however, rise in strong opposition to H.R. 7357 for several reasons. H.R. 7357 does not place a cap on

legal immigration. Legal immigration to our country has increased dramatically. Between 1951 and 1960, the average number of legal immigrants entering our country each year was 25,000. This figure has increased to a per annum figure of 438,000 for the 7-year period between 1971 and 1978. This mushroomed to 808,000 in 1980.

I will be offering an amendment to place a cap on legal immigration. It would raise the current cap of 270,000 to 425,000 and include refugees within the cap. Unless a cap is enacted, any attempt at immigration reform will be meaningless. The adverse impact that unlimited immigration is having on this Nation's high unemployment rate will continue to go unchecked.

Another serious problem we must address is the problem of brothers and sisters of U.S. citizens who are attempting to gain entry to this country using the fifth preference. Today, we have a fifth preference backlog of 800,000 people, and this figure is growing by leaps and bounds. We have an obligation to these people to maintain realistic immigration quotas in view of this Nation's economic problems. Family reunification, which is a major component of our immigration law, will be rendered ineffective, as immigrants who become U.S. citizens try to get all their relatives over to the United States. A Washington Post article recently documented a person who petitioned for 69 relatives. This figure has to be brought under control family reunification is achieved.

The most serious problem of H.R. 7357 concerns amnesty. If we legalize the estimated 6 to 12 million illegal aliens in this Nation today, we are encouraging still more illegal aliens to cross our borders. We are also penalizing the thousands of people who have followed the law and still wait to be legally allowed in this country. Amnesty will also cause serious financial dislocations among our State and local governments, as they will not be fully reinbursed by the Federal Government. This could bankrupt some local jurisdictions.

However, the most serious concern about H.R. 7357 is the combined effect that amnesty, the current fifth preference, and no cap on legal immigration will have on our country. The ripple effect of refugees and amnestied aliens on the current fifth preference will be

tremendous. As each brother and sister of the amnestied aliens, refugees, and immigrants become eligible under the current system, all of their immediate family also becomes eligible—spouse and children. After these spouses qualify, they will be able to file for their brothers and sisters and the process will continue on and on. Additionally, the costs, possibly up to \$25 billion, will have to be absorbed by the Federal, State, and local governments at a time when the public is clamoring for balanced budgets at all levels of government.

In conclusion, the reality of our economic and resource situation is such that we cannot continue to be a Nation without borders. If the preference system, a cap on legal immigration, and the amnesty provision are not changed, then the bill should be defeated.

Mr. RHODES. Mr. Speaker, I yield 2 minutes to the gentleman from Florida (Mr. Shaw).

Mr. SHAW. Mr. Speaker, I thank the gentleman for yielding. We have heard expressed here today concern with regard to the full implications of this bill, and the fact that we are taking it up here at a late time in a lameduck session. I can understand that concern, and I can say the same thing for just about everything we are taking up at this late date. But, this is not something that is a new thought to this Congress; it is not a new thought to the Judiciary Committee.

The committee, under Chairman Mazzoli, and the good work of a very hard-working Subcommittee on Immigration have done a tremendous amount of work with extensive hearings all over the country on this most important bill.

I come from a part of this country that has been ravaged by the fact that this country does not, still does not, and did not for the last several years have a valid immigration policy that we can even enforce. It is tearing the guts out of this country, and I think the fact that we do not have an immigration policy, that we do not have secure borders, is bringing about problems that are felt all over this country. Problems of unemployment are, I believe, aggravated by the fact that we do not have control of our borders. This is a most important piece of legislation, and I can assure the Members that it is probably one of the most important that we have brought up in the last 2 years. I wish too that we had more time to talk about it, but we do not. It is not a question that if we do not take it up we will take it up in January, because everybody who has been here many more years than I have knows that is not the way this Congress works.

It is an important bill to the poor and unemployed Americans in this

country who find that their jobs are being taken away by those who are here illegally, who will work for next to nothing just simply because they have to get by. This bill is going to solve many of the social problems for this country. I am not talking just about the State of Florida; I am talking about all of the border regions; I am talking about also the deep heart-lands of this country. This is a question that we have to approach and we have to approach very seriously. It is almost too late.

I urge adoption of this rule. I urge careful attention to the debate that will follow, and also urge the passage of a meaningful immigration law, though I will support some of the amendments. It must be passed, and it

must be passed now.

Mr. BEILENSON. Mr. Speaker, I yield 4 minutes to my distinguished colleague from California (Mr. ROYBAL) for the purposes of debate

only.

Mr. ROYBAL. Mr. Speaker, one must acknowledge the fact that the rule now under consideration is fair and just, that under its modified provisions it allows 5 hours of debate and does in fact permit amendments. Unfortunately, we must also admit that this otherwise good rule was given to a bad bill, and at the worst possible time. It was the Nation's understanding that this lameduck session of Congress was called to deal with the fiscal affairs of this country, with the problems of its jobless, its homeless, and its destitute and not with a complex and most controversial immigration bill. Because the provisions of the bill before us will affect millions of human beings almost immediately, and millions more in generations to come, it must be considered in a regular session of Congress, and not during the last few hours of this lameduck session when almost every Member has hardto-get reservations for the trip home, and one foot in the door waiting for the last gavel to come down ending the 97th Congress.

The people of America expect and deserve more than just an immigration bill that no one seems to want in its present form. Had Members been asked if this bill be scheduled, I am sure that the answer would have been overwhelming and resounding Perhaps that is at least one of the many reasons why almost 300 amendments have been printed in the RECORD in compliance with the rule. This means that this bill will be re-written on the floor of this House, during the last precious hours of this session of Congress and at a time when we cannot really say that we have fulfilled the purpose for which

we convened.

I do not cherish the thought that we will go home for Christmas to tell our constituents that we could not pass the necessary appropriation bills to run our country, but instead gave them a 3-month continuing resolution

that ends on March 15.

I hope we do not have to tell the people of America that we increased their gasoline tax, making it more expensive to look for a job, and, at the same time, tell them that we in this House could not hold on to the jobs bill. We, of course, can always tell them that while we did not do too well looking after their best interests, we did give them the Immigration Reform and Control Act, a piece of legislation that is neither control nor reform and one that has drawn more amendments than any other bill in this Congress and perhaps in the history of this House.

Surely, we do not want to place ourselves in a worse position. A bill as important as this, one which will touch the lives of millions of human beings for generations to come, and one which will in effect, change the immigration policy of this Nation, should not be written on the floor of this House and it will, if the rule is approved. Very much needed immigration reform should be considered in a regular session of Congress and be the result of reasoned negotiations, arbitration, and conciliation, among Members, and countries such as Mexico that send us their poor and unem-

ployed. Mr. Speaker, the best interests of this Nation and this body will not be served if this rule is approved, let us not give the American people this immigration bill for Christmas, a "no" vote on the rule will not place anyone in favor or against the bill, but simply mean that you find this legislation important enough to be properly considered in a regular session of Congress.

Mr. Speaker, I urge my colleagues to

vote "no" on this rule.

Mr. RHODES. Mr. Speaker, I yield the remaining time on this side to the gentleman from New York (Mr. FISH).

Mr. FISH. Mr. Speaker, I had not intended to speak during the consideration of the rule because we do have ample time under the rule for general debate. This bill comes to the floor late, yes, but we have been ready for months to bring it to the floor, and Members will have to ask other people why consideration has been delayed.

Is it being considered in a hurry? Gentlemen and ladies, only a couple of days ago you voted in a matter of hours for hundreds of billions of dollars under a rule limited to eight amendments. Today, we have an open

Ventilation is needed, proper consideration is needed, we are told. Those who tell us that include people who did not appear, as I recall, before any one of 24 Select Commission consultations and probably up to 50 different subcommittee meetings held in the House and in the Senate in the last 4 years. We have heard from numerous witnesses from Federal, State, and local governments; business and labor organizations; industry and agriculture; religious and ethnic groups, and civil liberties organizations. The committee has made a conscientious effort to address very diverse concerns.

Members have heard some of those concerns expressed. It is amusing to me that the people who express criticism about the bill certainly never will agree among themselves, as I under-

stand them.

The genius of Simpson-Mazzoli is reflected in its balancing of competing interests. The bill, by focusing on enforcement, on adjudications, and on legalization, addresses the major issues relating to the presence of undocumented aliens in the United States today. The bill has received very thorough and considered deliberation and ventilation. Practically every editorial published in the United States on this subject in recent months supports passage.

The result of 4 years of work is finally before this body. I urge support of

the rule.

Mr. BEILENSON. Mr. Speaker, I yield 30 seconds to the distinguished gentleman from Kentucky (Mr. Mazzoli), the distinguished subcommittee chairman.

Mr. MAZZOLI. Mr. Speaker, I thank the gentleman for yielding me the time. I rise in strong support of the rule. Let me just reflect with my colleagues that despite what they might have heard we may be at the 11th hour with regard to this legislative session, but we are at the first hour of the day when it comes to this bill.

It has been studied, it has been looked over more carefully than maybe any other piece of legislation reaching the floor this Congress. We have had over 100 hours of hearings. 14 separate days of hearings. We have had 300 witnesses, and that is just on our side. Our counterparts in the other body have done the same thing.

Mr. Speaker, it is a good, thoroughly studied bill and I urge support for the

rule.

Mr. BEILENSON. Mr Speaker, I yield myself the remaining time.

On behalf of hearing the bill, it is a big bill, but it is an important bill, a tremendously important one; it should be taken up and, in the opinion of this Member, it should also be passed.

On the matter of time, we will probably be here for an additional 5 days. If in fact it does not turn out to be an adequate amount of time and we do not get to a vote, the problem will resolve itself.

On behalf of the rule: it is an open rule, and almost 300 amendments have been noticed in the RECORD. And, we have 5 hours of general debate.

Mr. Speaker, I urge the adoption of the rule.

#### □ 1400

Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.
The SPEAKER pro tempore. The question is on the resolution.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. GARCIA. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify the absent Members.

The vote was taken by electronic device, and there were—yeas 257, nays 137, not voting 39, as follows:

# FURTHER MESSAGE FROM THE SENATE

A further message from the Senate, by Mr. Sparrow, one of its clerks, announced that the Senate agrees to the amendments of the House to a bill and a joint resolution of the Senate of the following titles:

S. 1735. An act to provide for the use and distribution of funds awarded the Pembina Chippewa Indians in dockets numbered 113, 191, 221, and 246 of the Court of Claims; and

S.J. Res. 101. Joint resolution designating "National High School Activities Week."

The message also announced that the Senate agrees to the amendments of the House with an amendment to a bill of the Senate of the following titles:

S. 1986. An act to provide for the use and distribution of funds awarded the Blackfeet and Gros Ventre Tribes of Indians and the Assiniboine Tribe of the Fort Belknap Indian Community, and others, in dockets numbered 250-A and 279-C by the United States Court of Claims, and for other purposes.

The message also announced that the Senate agrees to the amendment of the House to the amendment of the Senate, with an amendment, to a bill of the House of the following title:

H.R. 5121. An act to improve the collection of Federal royalties and lease payments derived from certain natural resources under the jurisdiction of the Secretary of the Interior, and for other purposes.

The message also announced that the Senate agrees to the amendment of the House to the amendment of the Senate No. 4, with amendments, to a bill of the House of the following title:

H.R. 1952. An act authorizing appropriations to carry out conservation programs on military reservations and public lands during fiscal years 1982, 1983, and 1984, and for other purposes.

The message also announced that the Senate had passed bills and a concurrent resolution of the following titles, in which the concurrence of the House is requested:

S. 1908. An act to provide for the reinstatement and validation of United States oil and gas lease NM-A26947 (Oklahoma);

S. 2623. An act to amend and extend the Tribally Controlled Community College Assistance Act of 1978, and for other purposes; S. 2611. An act to amend the Peace Corps

Act;

S. 3073. An act to provide for the distribution within the United States of the U.S. Information Agency film entitled "Dumas Malone: A Journey With Mr. Jefferson"; and

S. Con. Res. 131. Concurrent Resolution to express the sense of the Congress concerning Americans missing and unaccounted for in Southeast Asia. CONFERENCE REPORT ON H.R. 5447, FUTURES TRADING ACT OF 1982

Mr. DE LA GARZA. Mr. Speaker, I call up the conference report on the bill (H.R. 5447) to extend the Commodity Exchange Act, and for other purposes.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Pursuant to the rule, the conference report is considered as having been read.

(For conference report and statement see proceedings of the House of

December 13, 1982.)

The SPEAKER pro tempore. The gentleman from Texas (Mr. DE LA GARZA) will be recognized for 30 minutes, and the gentleman from Virginia (Mr. Wampler) will be recognized for 30 minutes.

The Chair recognizes the gentleman

from Texas (Mr. DE LA GARZA).

Mr. DE LA GARZA. Mr. Speaker, I yield myself such time as I may consume. I am pleased to bring up at this time the conference report on H.R. 5447 for consideration by the House. The report is the culmination of many months of effort that began early this year with the Committee on Agriculture. The report has broad-based support on both sides of the aisle, and has been signed by all the conferees from the House and Senate. For the most part the bills passed by the House and the Senate were identical in their provisions. There were, however, a few substantive differences which were resolved in the conference in a fair and equitable manner that largely preserves the intent of the bill that earli-

er had passed the House.

I wish first to extend my appreciation to the many Members of the House and Senate who contributed to this effort-to Senator Helms chairman of the conference, for the gracious and cooperative manner in which he chaired the conference and the able assistance provided by him the ranking minority member, Senator HUDDLESTON and the other conferees from the Senate. I would also like to pay tribute to my colleagues in the House-Congressman ED Jones, chairman of the subcommittee, for his tireless efforts in behalf of this legislation, to the minority leaders of the committee, Mr. WAMPLER, ranking minority member, and Mr. JEFFORDS, the ranking minority member of the subcommittee, to Mr. GLICKMAN, who contributed so much toward refining the provisions of the bill, and to the other House Members from our committee. Finally, I wish to express my appreciation to the distinguished chairman of the House Energy and Commerce Committee, Congressman DINGELL and his associates from that committee for their cooperation in working out a mutually satisfactory solution to issues that affect the jurisdiction of our two committees.

In the past 5 years futures trading volume has nearly tripled from 37 million contracts to more than 100 million contracts annually. In the month of October 1982 alone, there were in excess of 10 million contracts traded—an increase of 29 percent from the comparable month in 1981. The term "commodity" has come to embrace a variety of financial instruments, previous metals, and natural resource items, as well as domestic and international agricultural products.

The surge in trading reflects the increased use of the futures market by financial institutions and businesses to shift their price risk to others—a process known as hedging. It also reflects the use of the markets by the general public—not only as individual customers but through professionally managed commodity pools and accounts.

It is particularly timely for this reauthorization bill to be considered at this time in view of the explosion that has taken place in the industry since the last full scale review of the Com-

modity Exchange Act in 1978.

The conference report is a carefully crafted and balanced piece of legislation. It streamlines the operations of the CFTC, provides the Commission the tools it needs to protect the public interest in an effective manner and accommodates the interests of the many persons who make use of the commodity markets.

In brief, the conference report extends the authorization for appropriations of the Commission 4 years. It accommodates the jurisdictional interests of the Commission and the Securities and Exchange Commission over futures contracts on stock indexes and certain types of options transactions. It provides an expanded role for the States in combating fraud in commodities trading. It authorizes a pilot program for trading in agricultural options. It encourages the development of an effective self-regulatory agency by the industry, the National Futures Association. It provides additional remedies for violation of the act. It provides for a broad-based study of the effects of the economy of trading in futures contracts and options to be administered by the Federal Reserve Commission and the Treasury Department. It clarifies the authority of the CFTC to collect service fees but does not authorize the imposition of any transaction fee or tax. Finally in another important provision, the conference report contains an export contract sanctity amendment which originated in the Senate. It provides that if the Government should impose an export embargo on agricultural commodities, the embargo could not apply to a contract signed before the embargo was imposed, if the contract called for delivery within 270 days after the imposition of the trade restriction. The new provision would not apply, however, during periods of declared war or national emergency.

I would like now to discuss in more detail some of the important issues that were resolved in conference.

#### JURISDICTION

The conference report clarifies CETC's jurisdiction over futures contracts and options on futures contracts based on a group or indexed of securities (stock index futures). Before approving pending applications for stock index futures or options thereon, the CETC would be required to consult with the SEC. For applications submitted to CFTC after December 8, 1982, the SEC would have power to disapprove the contract if it believed the proposed new contract did not meet requirements set under the bill. A person aggrieved by any such order of the SEC may obtain judicial review under the terms and conditions provided in section 6(a) of the Commodities Exchange Act. The CFTC retains exclusive authority to regulate all aspects of trading in such contracts after they are approved.

#### AGRICULTURAL OPTIONS

The conference report authorizes the Commission to conduct a pilot program for the trading of agricultural options. The CFTC would be authorized to approve the commodity option transactions program in as many agricultural commodities as will provide an adequate test of these options. After completion of the pilot program, the Commission may authorize trading in these commodities without regard to the restrictions of the pilot program but subject to the same requirements that apply to options trading in other commodities. Options in agricultural commodities have been banned since 1936, even though options trading in other commodities are currently authorized.

# STATE ANTIFRAUD JURISDICTION

H.R. 5447 would explicitly permit the application of any Federal or State law to be applied to activities of persons who are required to, but who do not obtain registration or designation by the CFTC or who otherwise unlawfully engage in commodity transactions outside the act's regulatory structure such as off-exchange futures or other commodity investments.

These initiatives in effect declare the committee's intention that the resources of the CFTC and State officials should be used together to clean up the continuing problem of off-exchange commodity frauds. Chairman Philip Johnson of the CFTC characterized the provision as an open season on such activities, and the committee concurs.

The conference report also provides State officials new authority to proceed in a State court against any person registered under the act—other than a floor broker or registered futures association-for an alleged violation of any antifraud provision of the act or any antifraud rule, regulation, or order issued pursuant to the act. Any State instituting a proceeding under this provision must, however, give the Commission prior written notice of its intent to proceed and furnish the Commission with a copy of its complaint or other moving paper immediately upon instituting any such proceeding. The Commission would have the right to intervene in any such proceeding and to file an appeal. The Commission or the defendant may remove such proceeding to Federal court within 60 days after service of the summons and complaint upon the defendant to help assure uniformity in the interpretation of the act. The Commission also has the right to appear as amicus curiae in any such proceeding.

#### EXPORT SALES REPORTING

The conference substitute authorizes the Commission to refuse to register or place restrictions upon registration of any person and bar a person from participating in any market regulated by the Commission if the person has been found to have knowingly violated the export sales reporting requirements of section 812 of the Agricultural Act of 1970. This provision would apply additional sanctions to violators of export sales reporting requirements because of the importance of assuring that the public obtains upto-date information on cash sales that have an impact upon the futures market and are factored into the trading strategy of producers and other traders.

#### INSIDE TRADING

The conference report provides that the Commission shall, at a cost of not more than \$200,000, undertake a study of insider trading. The study would cover the nature, extent, and effects of trading in representative futures markets by persons possessing material information regarding cash or futures transactions that is not generally known to the public, and the adequacy of the Commission's authority to prevent market and customer abuses resulting from the possession of such nonpublic information. Not later than September 30, 1984, the Commission must transmit to the Senate Committee on Agriculture, Nutrition, and Forestry and the House Committee on Agriculture a report describing the results of these studies and including any recommendations for legislative action. If the Commission should find that there is a problem with respect to insider trading, the conferees intend that the Commission immediately take appropriate action to deal with the situation under its current authority.

# REGISTERED FUTURES ASSOCIATION

The conference report contains a number of provisions to enhance the

effectiveness of the National Futures Association, a new industry self-regulating body. The NFA is required to implement by September 30, 1985, a comprehensive self-regulatory program. Among the matters covered by this program are rules that require Association to establish: First, training standards and proficiency testing for personnel of members involved in the solicitation of transactions subject to the provisions of the act, supervisory officials of such personnel, and all individuals for which it responsibilities; registration second, a program to audit and enforce such standards; third, minimum capital, segregation, and other financial requirements applicable to its members for which requirements are imposed by the Commission; and fourth, minimum standards governing the sales practices of its members and persons associated therewith as to transactions subject to the provisions of the act. The conference report requires the Commission to submit a report to Congress of the regulatory experience of the NFA not later than January 1, 1986, covering the period January 1, 1983, through September 30, 1985.

To assure an effective self-regulatory program, the conferees expect that the Commission will take such action as it deems appropriate to insure that persons eligible for membership in a registered futures association become and remain members of at least one such association.

#### LEVERAGE TRANSACTIONS

The conference report substantially adopts the provisions of the House bill relating to certain off-exchange transactions called leverage transactions. Specifically, it requires the Commission to regulate these transactions under terms and conditions as the Secretary shall prescribe as expeditiously as possible. Excepted from these requirements are agricultural commodities. The conferees recognize the increasing demands upon the Commission's resources and accordingly do not object to the current regulatory moratoria maintaining the status quo in the industry until such time as a comprehensive regulatory system is in place and the Commission is capable of regulating an expanded leverage industry. The conferees intend for the Commission to terminate these moratoria as quickly as the Commission determines it is prudent to do so.

The conference report also deletes section 19(d) of the Commodities Exchange Act which provides that if the Commission determines that any leverage transaction is a contract for future delivery within the meaning of the act, such transaction shall be regulated as a futures contract in accordance with the applicable provisions of the act. The repeal of section 19(d) is in no way to be constued as limiting or

circumscribing the Commission's authority to take appropriate action under any other provision of the Commodity Exchange Act against transaction masquerading as leverage contracts.

#### PRIVATE RIGHTS OF ACTION

The conference report contains a provision which explicitly authorizes a private right of action to be instituted by persons engaging in commodity transactions to recover actual damages against violators of the Commodity Exchange Act, subject to specific conditions. This provision had its genesis in a provision in the House bill that was agreed to at the time the case of Merrill, Lynch, Pierce, Fenner and Smith against Curran was pending before the Supreme Court. On May 3, 1982, the Supreme Court decided that implied private rights of action exist under the Commodity Exchange Act. The Court did not decide, however, the elements of liability, causation, and damages, and expressed no opinion about any such questions. It indicated that the lower courts would have to answer these questions "unless and until Congress acts." The conference report provides guidance by Congress to the courts on these unresolved issues and on other issues that were involved in the case. Other provisions of the bill broaden the rights of individuals to request arbitration of claims against commodity brokers and the reparations procedure for resolution of disputes between parties trading in commodities. These changes enhance the remedies for violations of the act and should discourage fraudulent behavior and improve confidence in the market.

# STUDY OF THE COMMODITY FUTURES INDUSTRY

The conference report requires a study of the effects on the economy of trading in futures contracts and options. The study would be carried out by the Board of Governors of the Federal Reserve System, the Commodity Futures Trading Commission, and the Securities and Exchange Commission, with the assistance of the Secretary of the Treasury. The Board of Governors, however, would have responsibility for organizing and administering the study, total cost of which may not exceed \$3 million.

The conferees intend that the areas of study include contracts of sale for the future delivery of commodities involving any group or index of securities—and options thereon.

The conference substitute gives the CFTC and the SEC the primary responsibility for selecting and studying the instruments under their respective jurisdictions. The Board of Governors is required to review, and may supplement with its own analysis, studies conducted by the other agencies and submit a report of the study to Congress by September 30, 1984, together

with recommendations for legislative or regulatory action proposed by the participants.

PILOT PROGRAM FOR STOCK INDEX TRADING

The conference substitute deletes the House provision restricting trading in stock index futures contracts to a pilot program in view of the inclusion in the conference substitute of the study of the commodity futures industry, as described above.

#### SERVICE FEES

The conference report clarifies the authority of the Commission to promulgate, after notice and opportunity for hearing, a schedule of appropriate fees to be charged for services rendered and activities and functions performed by the Commission in conjunction with its administration and enforcement of the Commodity Exchange Act. The report limits the fees for any specified service or activity or function to not in excess of the actual cost of the services to the Commission.

The conferees intend that the fee schedule addressed by the conference substitute is to be strictly limited to Commission activities directly related to certain functions. These are: First, Commission audits of firms not members of contract markets or of a registered futures association; second, contract market and registered futures association rule enforcement reviews and financial review; third, Commission registration functions, but only until such time as the registration functions are assumed by a registered futures association; fourth, contract market designations; fifth, reparation fees; sixth, publications of the Commission; seventh, Freedom of Information Act services; and eighth, providing transcripts of Commission meetings.

The conference substitute does not contain authority for the Commission to impose any transaction fee or transaction tax.

#### AGRICULTURAL EXPORTS

The conference report prohibits the President, except in periods of declared war or national emergency, from prohibiting or curtailing the export of any agricultural commodity, or the products thereof, covered by an export sales contract when the export sales contract was made prior to the announcement of action prohibiting or curtailing these exports and the contract requires delivery within 270 days after the trade suspension is imposed.

Mr. Speaker, this concludes my remarks on the legislation, but before I conclude I wish once again to thank the chairman and members of the SEC for their cooperation on this endeavor and to the chairman and members of the CFTC, my most sincere appreciation for the important contribution which they made to make this a workable piece of legislation, and for the good job they are doing in a very

wish them well as they continue their very diligent work. I urge my colleagues to join me in voting in support of the conference report.

Mr. Speaker, I reserve the balance of

my time.

Mr. WAMPLER. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I want to associate myself with the remarks of my colleagues from the Committee an Agriculture in support of the conference report to H.R. 5447, the Futures Trading Act of 1982. I believe this report is a fair, workable compromise which should help insure that we have freely functioning markets with effective surveillance and protection against abuses.

The major purpose of this legislation is to extend for 4 years the operating authority of the Commodity Futures Trading Commission. The bill also contains numerous amendments to the Commodity Exchange Act which should update and improve CFTC operations without hindering trading on the futures markets. These amendments include provisions to improve Federal, State, and private protection against fraud and market manipulation; establish a pilot program of trading in options on agricultural commodity futures; broaden CFTC authority in setting speculative limits; provide for limited judicial review of CFTC emergency powers; and provide for broadened power for individuals to request arbitration.

Mr. Speaker, this bill does not include authority for a "user fee" on futures transactions. However, the conference report clearly states that the CFTC may use existing legal authority to charge service fees for activities such as rule enforcement reviews on commodity exchanges. This provision was viewed as a compromise between advocates of the user fee concept and those opposed to transaction fees at this time. As a result of this compromise, I understand the administration will not veto this bill on the basis of no authorization for user fees.

This conference report also gives a new futures industry self-regulatory body, the National Futures Association, a chance to see whether it can operate effectively and handle some of the regulatory work now performed by the CFTC. The legislation also requires the National Futures Association to set standards for sales practices and industry employee training.

I would like to point out that this bill clearly exempts registered futures associations, such as the NFA, from any State actions under the Commodi-Exchange Act. Because of the NFA's unique status as an independent self-regulatory body, it is necessary to grant it the same exemption from State actions that exchanges and floor brokers have under the Commod-

difficult area. We commend them and ity Exchange Act. This exempting statutory language is contained in new section 6d(8)(A) of the act.

During the conference committee on H.R. 5447, I offered language to the conference report which meant to clarify and emphasize new section 6d(8)(A) as it related to registered futures associations. This language was unanimously approved by the conference committee, but inadvertently left out of the filed conference report. I therefore would like to make this language, which merely restates and clarifies the corresponding statutory language, part of the record here today. The language reads as follows:

The conferees do not intend that the language in new section 6d(8)(A) of the act. which reads "any person registered under this Act", be interpreted to apply to a registered futures association, or that any State should have any authority to bring an action under any provision of the Act against a registered futures association.

Mr. Speaker, I believe that this legislation will enable the rapidly growing futures industry to operate in a responsible and economically beneficial manner. I urge my colleagues to vote for passage of this conference report.

Mr. GONZALEZ. Mr. Speaker, will the gentleman yield?

Mr. WAMPLER. I yield to the gentleman from Texas.

Mr. GONZALEZ. On page 33 of the conference report you provide under section 236 and section 236(a)(1) the Board of Governors of the Federal Reserve.

I was under the impression that this Commodity Futures Act had to do with agricultural products. Here it refers to options on foreign currencies and options on securities, including exempted securities or on any group or index of securities.

You provide:

The Board of Governors of the Federal Reserve System, the Commission, and the Securities and Exchange Commission, with assistance from the Secretary of the Treasury, shall conduct a study of the effects on the economy of trading in contracts of sale of commodities for future delivery and in options (including options on commodities, options on contracts of sale of commodities for future delivery, options on foreign cur-

Does this act also envision the jurisdiction over trading in futures of foreign currencies?

Mr. WAMPLER. It does, if I may respond to my distinguished colleague from Texas. I might say this particular section was the result of interest on the part of the Committee on Energy and Commerce and it was as a result of an accommodation to them that this language is in the bill.

I will be glad to yield to my colleague from Texas if he wants to elaborate further.

Mr. DE LA GARZA. I appreciate the gentleman yielding. Let me say to my distinguished colleague from Texas that the purpose of utilizing the Board of Governors of the Federal Reserve System here is solely for the conducting of a study. It is unrelated to any jurisdiction of the Federal Reserve or the SEC or the CFTC.

The reason for their inclusion was that the committee wanted a study made of a list of items and no one was comfortable with making the decision should it be led by the SEC or should it be led by the CFTC.

The compromise was made that we would ask the Federal Reserve to coordinate the study.

#### □ 1430

It has nothing whatsoever to do with basic jurisdiction of the Federal Reserve.

Mr. GONZALEZ. Why are they talking, though, of options on foreign currencies?

Mr. DE LA GARZA. Those options are now within the jurisdiction of the commodity futures trading Commission if they are traded on a commodities exchange.

Mr. GONZALEZ. That is what I wanted to know.

Mr. DE LA GARZA. And this is not touched. That remains there. In this provision no basic jurisdiction is taken from or granted to any one of the three agencies. The whole purpose of this item in the bill is to have a study and to have an impartial agency—not the two agencies involved—coordinate these studies.

Let me say that the special study provision states that the Commission shall have primary responsibility for selecting and studying the instruments under its jurisdiction, and the Securities and Exchange Commission shall have primary responsibility for selecting and studying the instruments under its jurisdiction. That maintains the 2 jurisdictions of those agencies.

The Federal Reserve will participate to coordinate the study and supplement with its own analyses the studies conducted by the CFTC and SEC.

Mr. GONZALEZ. I think the gentleman just told me that the Commission, the futures, does have jurisdiction on this question of options on foreign currency now.

Mr. DE LA GARZA. Yes.

Mr. GONZALEZ. In other words, it is not exclusively on agricultural commodities?

Mr. DE LA GARZA. Oh, no. The jurisdiction has been expanded into precious metals and financial instruments.

Mr. GONZALEZ. The reason I asked the question, it raises a grave concern in my mind, because is it true or not a fact that the principal grain companies, that is, the ones who are going to be doing the intervening in our market with our farmers, are foreign owned and foreign based, the principal

owners of the principal grain companies?

You know, we have been under the impression that they are American owned. I have been told that they are not, that the principal ones are foreign owned, and that, therefore, these are men who are going to be sitting in Brussels, in Buenos Aires, in London, intervening, as they have, I understand—I do not know, I may be wrong; that is what I want to know—in what our farmers are going to be trading and what our options here in futures activities will be governed by.

I was totally surprised when I was informed that the principal grain companies are not American that are dealing in American grain, for example. Now, I do not know if that is true or not. If it is true, then what it means is, with the additional lack of viability of control on your foreign currency things, you have a highly volatile situation, and I am just concerned.

Mr. DE LA GARZA. If the gentleman will yield further, the gentleman is basically correct as to the mixture of ownership, so far as grain companies are concerned. But I think that the gentlemen need not be concerned in relation to trading in foreign currencies. Trading in currencies is basically unrelated to trading in commodities. Different people for different reasons trade in the different items. I do not know that any of our studies or any of our investigations showed the possibility that manipulation in the currency sector affects the grain sector. I have made a personal study and visit to the different exchanges. Different people deal for different reasons in different commodities. The fact is that at the present time there is no trading on exchanges in options on foreign currency. Small coin dealers and other people may make a few dollars by buying or selling the currencies either with banks in town or with different customers that they have in their

The thing that we think will have more impact on protecting the public from adverse effects of foreign ownership of grain companies, is the authority we have given the CFTC to require reports from the exchanges, to regulate the exchanges, and to suspend individuals from trading on exchanges if they violate the act. That affords us the protection we need.

Mr. GONZALEZ. I thank the gentleman, and I thank the distinguished gentleman from Virginia.

Mr. DE LA GARZA. I thank the gentleman for his contribution and for his concern, because it has been addressed, and I know how the gentleman assiduously guards interests in the foreign sector as relates to banks and currencies. I want to assure the gentleman of our continued and complete cooperation in that area.

Mr. GONZALEZ. I thank the gentle-

Mr. WAMPLER. Mr. Speaker, I would like to inquire to the distinguished gentleman from Texas (Mr. de La Garza): The gentleman heard me read earlier the language that was approved by the conference committee but was inadvertently left out of the final conference report. Does the gentleman from Texas concur that this is an accurate statement of the language that was adopted by the conference committee?

Mr. DE LA GARZA. If the gentleman will yield, yes, the gentleman from Texas concurs. And that certainly was the intent of the conference and has been the intent of the committee. I have no knowledge of anyone thinking to the contrary. So I would say that this is a part of the legislative history as regards to the intent of the committee and of the conference.

Mr. WAMPLER. I thank the gentle-

Mr. COLEMAN. Mr. Speaker, will the gentleman yield?

Mr. WAMPLER. I yield to the distinguished gentleman from Missouri.

Mr. COLEMAN. Mr. Speaker, the conference report on H.R. 5447, the Futures Trading Act of 1982, which reauthorizes the Commodity Futures Trading Commission (CFTC) for the next 4 years, must be approved today.

While this legislation is important because it will enable the CFTC to carry out its regulatory functions of the commodity futures industry, a Senate amendment, unanimously accepted by the House conferees, also requires contract compliance on agricultural exports that are within 270 days of delivery. This contract sanctity, Mr. Speaker, is vital to our farmers. America's farmers are still affected by the 1980 Russian grain embargo; indeed, farmers are hampered still by export restrictions that were made nearly a decade ago.

Since 1973 when former President Nixon imposed trade restrictions on U.S. soybeans, our midwestern soybean farmers who were supplying 90 percent of the beans and soybean products in world trade found themselves in 1981 with only 67 percent of the market. Our 1982 soybean crop, a record, has fewer and fewer buyers. And it all goes back to trade restrictions which resulted in buyers going elsewhere and smaller suppliers increasing their production.

These embargoes and trade restrictions do not work. The 1980 embargo did not hurt the Soviets in any significant way. The trade restrictions in the early 1970's drove our traditional customers, for instance, the Japanese, to find new suppliers and to invest heavily in countries which could supply them in the future. They simply could not rely on the Americans to sell them

what they needed and could pay for. To this day, many agricultural economists contend that these trade restrictions were unneeded from the standpoint of U.S. domestic needs and prices.

Certainly, each Chief Executive who has occupied the White House has not wanted his ability to conduct foreign policy curtailed. I can understand that desire. But we should not make an embargo mistake again. The only way to assure our buyers of U.S. grains that we mean to fulfill our obligations is to require contract sanctity of agricultural products. H.R. 5447 does that and the House should approve this conference report today.

Mr. BEREUTER. Mr. Speaker, will

the gentleman yield?

Mr. WAMPLER. I yield to the gen-

tleman from Nebraska.

Mr. BEREUTER. Mr. Speaker, I rise in support of this conference report and urge my colleagues to vote for passage of this measure. Of particular interest to me, as the representative of one of the Nation's major agricultural regions, and as a Member who is keenly interested in the area of agricultural trade, are the "contract sanctity" provisions which were added in the Senate. In past years I have seen our producers of wheat, feed, grains, and oilseeds suffer through the disastrous effects of export embargoes, and I have watched as they have struggled to regain the lost markets which inevitably result from those actions.

While we are all familar with the lingering effects of the 1979 Carter grain embargo to the Soviet Union, there have been other such embargoes in the past which have had equally damaging effects upon our foreign agricultural markets. Just 2 days ago, the cheif agricultural staff representative of the Liberal Democratic Party of Japan sat in my office and recalled for me the impact of the 1973 soybean embargo on Japan. It is clear to me that that single event, short lived as it was, was the impetus for Japan's efforts to secure a reliable supply of oilseeds from other nations, and our soybean producers have suffered since 1973 as a result of the actions of their own government.

During my recent visit to Moscow, in discussions with Soviet agriculture and trade officials, it was again made clear to me that Soviet perception of the United States as an unreliable supplier have had a devastating impact upon the prospects for increased agricultural sales to that country. It is questionable whether we will ever regain those lost markets, even with the adoption

of these provisions.

If we are to make any progress in our efforts to regain our position as a reliable supplier, it is essential that the Congress speak clearly on the issue of contract sanctity and that the President sign this bill. These provi-

sions simply restrict the Government from prohibiting delivery on contracts signed before the embargo was imposed, so long as the contract provided for delivery within 270 days. This minimal protection is the least we can do for our struggling producers. Again, I urge my colleagues to support the conference report, including the contract sanctity provisions.

Mr. WAMPLER. Mr. Speaker, I yield such time as he may consume to the gentleman from Missouri (Mr. EMER-

Mr. EMERSON. Mr. Speaker, I rise in support of the contract sanctity provisions contained in the conference

report on H.R. 5447.

The contract sanctity provision in this measure is similar to my bill, H.R. 6135, which has 41 bipartisan cosponsors. The legislation under consideration by the House today will prohibit the Federal Government from imposing restrictions upon the export of agricultural commodities, which would interfere with valid export contracts entered into 9 months before the imposition of such restrictions.

We all know the severe consequences of the embargoes that were implemented by past administrations. With memories of the soybean embargo of 1973 and the grains and oilseeds embargoes of 1974 and 1975 etched in their minds, many nations no longer consider the United States a reliable supplier. Instead, most nations, friends and foes alike, have diversified their purchases to include other nations viewed as more reliable suppliers. The result has been a decline in the U.S. share of world grain and oilseeds trade, and the United States is carrying large shares of world surpluses.

Let me remind my colleagues of the importance of our agricultural exports. Agricultural exports provide about one-fourth of U.S. farm income and the harvest from almost twofifths of our croplands is sold in foreign markets. Agricultural exports also generate jobs-more than 1 million people are working full time in farm export related jobs. Moreover, agricultural exports create additional business activity. Every dollar that is returned to the United States from farm exports is more than doubled in business activity.

To conclude, I believe this legislation will send a clear signal to our trading partners that we will honor our contracts, thereby protecting the rights of our farmers and grain exporters to sell their grain abroad.

I urge the President to sign this im-

portant legislation.

Mr. DE LA GARZA. Mr. Speaker, I yield such time as he may consume to the distinguished gentleman from Wisconsin, (Mr. Zablocki), chairman of the Committee on Foreign Affairs.

Mr. ZABLOCKI. I thank the gentleman for yielding.

Mr. Speaker, I would like to engage Chairman de La Garza in a discussion regarding section 238 of the conference report H.R. 5447.

That amendment would prohibit the application of export controls on agricultural commodities to any contract which was in force at the time of a Presidential decision to impose export controls if the contract called for the delivery of the commodities within 270

I understand that this was a Senate provision and that the conferences felt it necessary to accept it. I have no desire to jeopardize the conference

report.

However, I would like to note for the record that, under clause (i) of rule X of the rules of the House, jurisdiction over export controls lies exclusively with the Committee on Foreign Affairs. This provision of the conference report clearly is within the jurisdiction of the Committee on Foreign Affairs. Its inclusion in the conference report should not be used in the future to suggest any jurisdiction by the Committee on Agriculture over export controls.

Mr. DE LA GARZA. Mr. Speaker, I would like to assure the gentleman that the Committee on Agriculture looks for no extension of its jurisdiction either in this act or any other act, and the gentleman can rest assured that it will never be our intention to intervene in any jurisdiction either of the gentleman's committee or any other committee, and we would operate as authorized under the rules of the House, solely in the areas where the rules clearly give us jurisdiction.

Mr. ZABLOCKI. I thank the gentleman.

I understand that the other body operates under different rules, and it is very, very difficult in conference sometimes to impress upon them how necesary it is for our conferees to abide by our rules.

Mr. DE LA GARZA. Mr. Speaker, I yield such time as he may consume to the gentleman from Iowa (Mr. SMITH).

Mr. SMITH of Iowa. First, I want to commend the gentleman. I support the conference report. There are a few sections I think could be improved, but it does extend the authorization for the CFTC which I originally authored and involves an industry which has since exploded into a major industry. The gentleman did as good a job as could be expected as chairman with this conference report, in view of the major financial interests which lobbied so hard with some Members.

I want to speak specifically to the sanctity provision. It is a good example of why nongermane amendments should not be attached to bills. This provision can be interpreted as meaning we have now authorized embargoes, so long as the contract has not yet been entered into or so long as it is a contract for delivery more than 6 months from the time the embargo is ordered. Present law does not make these exceptions, so it can be interpreted as a backward step in trying to stop embargoes.

The only protection is that the President must declare a national emergency. That is not difficult to do. Some say, they have not declared a national emergency for many years, but they had no reason to. In order to order a veto, they can now have an incentive to find a way to declare an emergency for some purpose. Under present law, to order an embargo, a President must declare that there is a danger to the national security. That needs to be refined to at least make clear to me our own U.S. security is endangered but the provision in this amendment does not make the needed amendment.

So, this either is no improvement or a backward step, and the farmers should not be mislead to believe they receive any protection at all from the provision in this bill.

But I do again want to commend the gentleman from Texas. I think he did as good as he could be expected to do, with all of the conflicting interests that are involved in this bill.

Mr. DE LA GARZA. I thank the gentleman for his contribution.

Mr. Speaker, I yield such time as he may consume to the distinguished chairman of the subcommittee, the gentleman from Tennessee JONES).

Mr. JONES of Tennessee. Mr. Speaker, I rise today in support of the conference report on H.R. 5447, the Futures Trading Act of 1982.

As sponsor of the bill and chairman of the subcommittee in which it originated, I give it my full endorsement and support.

H.R. 5447 is a comprehensive piece of legislation which deals with broad issues and technical issues alike. It is a package of remedies to problems our committee and others have uncovered since the last reauthorization process in 1978. Since 1978, the Agriculture Committee has conducted numerous oversight hearings, reviews, and investigations as problems have arisen.

The bill attempts to deal with major issues such as jurisdiction, service fees, the role of the states, private rights of action, interagency coordinating, emergency powers of the Commission, and hundreds of other matters in a deliberate and responsible way. The House conferees did accept a Senate amendment providing limited protection for agricultural export contracts in embargo situations.

The original bill was submitted by the Commodity Futures Trading Commission and was the subject of 3 days of public hearings. Each and every issue was thoroughly debated by both mittee.

Reports from the GAO and other congressional committees were taken into account as were the view of industry spokesmen. I am proud to say the result is a well-balanced bill which will not bind this growing industry with will unnecessary regulation, but strengthen the markets through assuring safe, fair, and competently regulat-

During the conference on this bill, the Agriculture Committee conferees were jointed by three distinguished members of the Energy and Commerce Committee, Chairman DINGELL, Mr. WIRTH, and Mr. BROYHILL. This advice and input strengthened the final product and I commend them for the fine job they did.

As my colleagues review this conference report, they will recognize that the House prevailed on most of the important issues. Where compromises were made I feel they resulted in a generally better piece of legislation.

Many of you know that neither the House nor the Senate bills contained a user fee or transaction fee even though the administration wanted one enacted.

However, in an effort to reach a middle ground with the White House an arrangement has been made to increase or implement certain service fees paid by the industry. These fees paid for such services as audits, rule enforcement reviews, registration, and publication distribution will exceed CFTC's cost in performing them and will likely raise \$2 to \$3 mil-

Chairman Helms advised the conference that this service fee arrangement satisfied the White House and that no veto would be forthcoming based on this issue.

The contract sanctity amendment seems to be the only controversial provision. As sponsor of the bill I can say that no policy spokeman from the White House contacted me in opposition to this provision prior to or during the conference.

A single letter from the Assistant Secretary of State for Congressional Affairs in opposition to the Senate amendment was received.

The "contract sanctity" idea was first set in motion by President Reagan during the 1982 election season. At that time he pledged contract sanctity to the Soviet Union for a specified period which has now expired.

This provision in the conference report simply extends the spirit of President Reagan's campaign gesture. I urge him to adopt it—to take credit for his good idea. American farmers deserve no less.

In closing, let me congratulate Chairman DE LA GARZA for the fine job

the subcommittee and the full com- he has done on this complicated legislation.

Additionally I want to give thanks and recognition to Congressman Dan GLICKMAN whose help, dedication and expertise are in evidence in every single section of this bill.

Mr. Speaker, with those comments I will close and ask my colleagues to support this conference report.

#### □ 1445

Mr. DE LA GARZA. Mr. Speaker, I yield such time as he may consume to the distinguished chairman of the Committee on Energy and Commerce, the gentleman from Michigan (Mr. DINGELL).

Mr. DINGELL. Mr. Speaker, my remarks will be brief. I want to pay particular words of tribute and thanks to the distinguished chairman of the Committee on Agriculture and to be able members of that committee who served as conferees on this matter. Their courtesies to us on the Committee on Energy and Commerce were exemplary. We are keenly appreciative of their efforts to arrive at which I regard as a very wholesome compromise which I believe has laid to rest the difference which existed with regard to this bill.

I personally commend the distinguished gentleman from Texas (Mr. DE LA GARZA) and his able colleagues from the Committee on Agriculture for the fashion in which they worked. I believe we have a good compromise and a good proposal which can receive the support of the House.

Mr. Speaker, I urge speedy enactment of this bill into law to provide an authorization for the Commodity Futures Trading Commission and to strengthen the Commodity Exchange Act to give the CFTC the tools it needs to adequately police the burgeoning futures markets.

Mr. Speaker, I yield back the balance of my time.

Mr. WIRTH. Mr. Speaker, will the gentleman yield?

Mr. DE LA GARZA. I yield to the gentleman from Colorado.

Mr. WIRTH. I thank the gentleman for yielding.

I just wanted to add from the perspective of the subcommittee with jurisdiction over the securities area to thank the gentleman from Texas and the gentleman from Kansas and the members of the Committee on Agriculture as we worked out a very fair and reasonable approach to the new instruments coming onto the market.

Mr. DE LA GARZA. Mr. Speaker, I yield such time as he may consume to the gentleman from Kansas (Mr. GLICKMAN).

Mr. GLICKMAN. Mr. Speaker, I would just like to again thank all my colleagues and particularly the chairman of the full committee for producing a product which should give the farmers of this country as well as the purchasers of the futures and options in America some confidence that there is a regulatory structure that will pro-

vide consumer confidence.

The futures business is an enormously growing area. The whole issue of the futures industry, whether the futures instruments are on farm commodities, gasoline, Treasury bills or foreign futures is moving this country into previously uncharted waters. I think in this bill we have provided a product that will be a significant improvement in how the Government and private industry engage in the regulation of this industry.

Mr. DE LA GARZA. Mr. Speaker, we

Mr. DE LA GARZA. Mr. Speaker, we thank the gentleman for his contribution and the endeavor which gives us a final product we have here today.

Mr. Speaker, I yield 2 minutes to the gentleman from South Dakota (Mr. DASCHLE).

Mr. DASCHLE. Mr. Speaker, I rise in support of the conference report on the Futures Trading Act of 1982.

A great amount of work, thought and compromise went into developing this bill. It was treated seriously because the issues involved are very important to the national economy.

No question exists that the economy is in a perilous period. A glance at the financial pages of any newspaper on almost any day confirms that confusion reigns in the economic arena.

In times such as these careful and prudent regulation of the economic sector is called for. At the same time we must maximize people's ability to protect themselves as they see best.

This bill H.R. 5447 enhances regulations of our very important futures markets. It strengthens the regulatory tools of the Commodity Futures Trading Commission, especially in emergency situations. It enhances the ability of private market users to sue when they have been defrauded. It gives States a broader role in bringing to justice dishonest commodity operators.

Additionally this bill provides for the careful development of some new market instruments which deserve a fair test.

Stock index futures have engendered wide debate and controversy. Many Members have expressed grave reservations about trading these unique contracts. I am impressed by these warnings but know of no better way to test the conflicting ideas than through a pilot program in futures pits. H.R. 5447, in my view, provides carefully considered protections in this regard.

Another item which has been of particular interest to me is the lifting of the trading ban on agricultural options. Limited trading, on a pilot basis, was supported by most farm organizations and is included in the bill. I do not know how they will be accepted in

the farm community but I see a potential for farmers to purchase some price protection in an arena somewhat less risky and complicated than the futures markets.

In closing, I simply want to say this is a well balanced bill. We can be proud of it and urge my colleagues to

support it.

Mr. WAMPLER. Mr. Speaker, I yield such time as he may consume to the gentleman from Vermont (Mr. Jeffords).

Mr. JEFFORDS. Mr. Speaker, I want to commend all the conferees. This is a very difficult piece of legislation. We labored many hours, and I think came out with a very good com-

promise.

I would take my time at this point to thank in particular the gentleman from Virginia, for I believe this is the last official piece of legislation that I will have an opportunity to work on with him. I have worked with the gentleman for some 8 years now. I know that of all the people I have dealt with in Congress, I have found no one who has dealt with me more fairly, and who has from the bottom of his heart tried to help the American farmer and the American people.

I would say that the public sometimes makes some bad judgments. I would say from the circumstances of his election I am not even sure that the will of his district was really expressed. I am depressed because of the election irregularities that have been related to me. I know not whether the results would be changed, but I do know Virginia is being deprived of a superb leader in the field of agriculture at a time when Virginia and the Nation is facing a dire farm emergen-

I do know this. There is no one who has done more in my estimation for trying to bring about some rational reasonable agricultural policy in this country than the gentleman from Virginia. He also is renown for his efforts in promoting agricultural research.

In summary, I want to express my sincerest appreciation to him for all he has done, not only for agriculture, for the Congress, for the American people, but also for me personally. I wish the gentleman all possible success. He deserves a most prosperous future.

Mr. Speaker, what this conference report basically does is extend the life of the Commodity Futures Trading Commission for 4 years. In addition, the bill makes several changes to the Commodity Exchange Act which should improve the operations of the Commission while promoting the smooth and abuse-free operation of the futures markets. Major provisions include amendments to expand effective industry self-regulation and broaden CFTC authority in setting speculative limits, and amendments to

establish authority for a pilot program of trading in options on agricultural commodity futures, which has been banned by law for many years.

I am particularly pleased that H.R. 5447 gives States a substantially increased role in policing off-exchange activities in order to protect individual traders. In the past, State actions under the Commodity Exchange Act have been limited, even though the CFTC took the initiative to work with States in implementing these authorities. Under the new provisions included in this conference report, the CFTC will be permitted to share otherwise confidential information with the States. The bill also authorizes the CFTC to provide information on any registrant either voluntarily or at the request of any State. The availability of this information will aid States in preparing their own cases and should enable them to assess whether to join litigation being prepared by the Commission. H.R. 5447 also would explicitly permit the application of any Federal or State law to activities of persons who are required to, but who do not, obtain registration or designation by the CFTC or who otherwise unlawfully engage in commodity transactions outside the act's regulatory structure, such as off-exchange futures or other commodity investments. States also will be able to bring actions in State courts to enforce anti-fraud sections of the Commodity Exchange Act against persons registered under the act. In these cases, the CFTC can intervene in a State proceeding, and either the CFTC or a defendant will have the right to remove the action to a Federal court. I believe that these initiatives declare the intention of Congress that the resources of the CFTC and State officials should be used together to clean up the continuing problem of off-exchange commodity fraud.

I also would like to note, Mr. Speaker, that this bill does not contain a trading fee proposal as originally requested by the administration. However, the conference committee did agree on a compromise provision which restates the legal authority of the CFTC to charge service fees on such Commission functions as rule enforcement reviews. Both the futures industry and the administration have agreed to support this provison, which will enable the Government to recoup the cost of some specific service functions of the CFTC.

Mr. Speaker, we must provide the CFTC with the necessary tools to regulate effectively futures trading without adversely affecting the beneficial operations of the futures markets. I believe this bill goes a long way toward accomplishing that goal.

I urge my colleagues to support passage of this legislation.

Speaker, will the gentleman yield?

Mr. JEFFORDS. I yield to the gentleman from Kansas.

Mr. ROBERTS of Kansas. I thank

the gentleman for yielding.

In the Agriculture Committee we are often proud of the fact that we endeavor to find answers to our problems in a very bipartisan manner. One of the chief reasons for that has been due to the leadership of the gentleman from Virginia.

I would like to associate myself with the remarks of my friend from Vermont. I know of no one in the Congress who by his personal example has exemplified the kind of integrity and leadership that we need in this body than BILL WAMPLER. I, too, want to wish him well and to pay him my personal tribute as a friend, not only as a Member of this body, but as a staff member for many years.

I would like to say also, if the gentleman would continue to yield, that I rise in support of this bill, especially in regard to the contract sanctity provision. This provision is not perfect, but it does mark the first time we have in legislation some real guarantees for this country to be a reliable supplier of farm products. We just went through a long debate the last couple of days on a domestic content bill. Some of the supporters of that legislation indicated that that was one way to send a message to the Japanese and thereby increase our farm exports.

Let me say to those folks and to my colleagues that if we can once again establish ourselves as a reliable supplier of farm products and quit using the farmer as a foreign policy tool we will do more for farm exports and do more for our balance of payments and more for every citizen in this country than any single economic policy decision.

I also wish to thank the chairman for his leadership in the conference committee. It was a very difficult con-ference. Because of his leadership we were able to proceed and make some progress.

Mr. JEFFORDS. I thank the gentleman for his comments.

Mr. WAMPLER. Mr. Speaker, we have no further requests for time.

Mr. DE LA GARZA. Mr. Speaker, let me, before I move the previous question, just state that I join with my colleague from Vermont. I am sure I speak for all the members of our committee when I say that this will be the last piece of legislation which I as chairman have the pleasure of working with our distinguished colleague from Virginia (Mr. WAMPLER). It certainly has been my great honor, distinct privilege and genuine pleasure to work side by side with the gentleman from Virginia. His contribution to agriculture, to rural America in the years he has spent with us have been productive years I am sure personally to

Mr. ROBERTS of Kansas. Mr. him. His contribution to this Nation and to the spirit of the Nation which we call America has been great, and I think it will be especially appreciated by those of us who have worked with him. I am sure it will be appreciated in the years to come by those who reap the benefits of his contribution during the years which he served with us here in this House.

• Mr. FRENZEL. Mr. Speaker, this is undoubtedly an important bill. But I believe it will be remembered mainly as the carrier for the contract sanctity bill.

The contract sanctity amendment is a nongermane rider put on the bill in the other body by the distinguished senior Senator from my State. It guarantees that agricultural commodities which have been purchased have some reasonable chance of being delivered.

Usually I do not like nongermane amendments. But I congratulate my senior Senator, and the House managers, because this amendment is urgently needed to prove that America is a reliable supplier of agricultural products.

Our off-again, on-again embargoes have caused our main customers to seek other supply sources. The contract sanctity amendment will not restore confidence immediately, nor will it raise our market shares overnight. But it surely will help us in the long run.

I urge passage of the bill and the contract sanctity amendment.

Mr. Speaker, I move the previous question on the conference report.

The previous question was ordered. The conference report was agreed to. A motion to reconsider was laid on the table.

AUTHORIZING CLERK OF THE HOUSE TO MAKE CORREC-IN ENROLLMENT OF TIONS H.R. 5447, FUTURES TRADING **ACT OF 1982** 

Mr. DE LA GARZA. Mr. Speaker, I send to the desk a concurrent resolution (H. Con. Res. 435) directing the Clerk of the House of Representatives to make corrections in the enrollment of the bill (H.R. 5447) to extend the Commodity Exchange Act, and for other purposes, and ask unanimous consent for its immediate consideration.

The Clerk read the title of the concurrent resolution.

The SPEAKER pro tempore. there objection to the request of the gentleman from Texas?

There was no objection.

The Clerk read the concurrent resolution, as follows:

# H. CON. RES. 435

Resolved by the House of Representatives (the Senate concurring), That, in the enrollment of the bill (H.R. 5447) to extend the Commodity Exchange Act, and for other purposes, the Clerk of the House of Repre sentatives shall make the following corrections:

In section 239, strike out "sections 9, 14, and 28" and insert in lieu thereof "sections 207, 212, and 231".

The concurrent resolution was agreed to.

A motion to reconsider was laid on the table.

#### GENERAL LEAVE

Mr. DE LA GARZA. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the conference report on the bill, H.R. 5447, just agreed to.

The SPEAKER pro tempore. there objection to the request of the gentleman from Texas?

There was no objection.

#### MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the House by Mr. Saunders, one of his secretaries.

#### FISHERY CONSERVATION AND MANAGEMENT IMPROVEMENT

Mr. JONES of North Carolina. Mr. Speaker, I call up the bill (H.R. 5002) to improve fishery conservation and management, and ask unanimous consent for its immediate consideration in the House.

The Clerk read the title of the bill. The SPEAKER pro tempore. there objection to the request of the gentleman from North Carolina?

Mr. FORSYTHE. Mr. Speaker, reserving the right to object, I do so to permit a colloquy between the chair-man and myself as to what we are trying to deal with here in this legislation and to point out to the House that we believe that we have a very important piece of legislation. It is one that does protect the interests of the gentlemen from California in terms of their concern with the California council. We think it does protect those people who have had concerns with this legislation. But it does some very important things in terms of our 200mile fisheries legislation, in terms of moving it forward and implementing this in a way that will enhance our American fisheries.

# □ 1500

Mr. ANDERSON. Mr. Speaker, will the gentleman yield?

Mr. FORSYTHE. I yield to the gentleman from California.

Mr. ANDERSON. Mr. Speaker, I rise in support of H.R. 5002, a bill to improve fishery conservation and management. H.R. 5002 amends the Magnuson Fisheries Conservation and Management Act (FCMA), an act. which is acknowledged to have dramatically improved this country's fishery conservation and management efforts since its original passage in 1976. H.R. 5002 provides for changes in the administration of the FCMA that are important, well-founded, and that foster the implementation of the goals of the FCMA.

There is one provision in this bill that is, and has been for some time, of critical importance to me and to my fellow Californians. I refer to the provision in H.R. 5002 which was passed by the Subcommittee on Fisheries and strengthened by the full Committee on Merchant Marine and Fisheries that grants the State of California additional representation on the Pacific **Fisheries** Management Council (PFMC).

Mr. Speaker, the State of California has worked for 4 years to persuade Congress to correct what California's fishery management and fishing industry representatives have viewed as an inequitable allocation of seats on the Pacific Council. In the past two Congresses, legislation has been introduced that would create a separate fishery management council for California in recognition of the State's extensive fishery resources and fishing industry. I am gratified that the House has, at long last, recognized and decided to act to correct this inequity.

The provision granting California additional representation is a just one. California stands apart from fellow member States on the Pacific Council-Washington, Oregon, and Idahoin several important regards. First, California has more commercial fishermen than any of the other three States. Second, California has more individual fisheries than all the other States on the Pacific Council combined. Many of these are not, incidentally, even managed by the PFMC.

The State manages these fisheries, gathers the necessary data, develops and enforces regulations covering these fisheries, and taxes its citizens to pay for these services. There is but one fishery where the stocks migrate through waters of several States and that is salmon. Third, the State of California has a large and valuable recreational fishery, the problems of which are inherent to the State. Lastly, Pacific Council management plans have had either little or no effect on most of California's fishermen or they have hurt our fishermen. The priorities of the State of California in the management of its fisheries are not being realized on the council under the current allocation of seats.

In conclusion, this provision simply seeks to give California an equal determination of how its fisheries are to be managed. By passing this bill, the House acknowledges the importance of California fisheries in the overall

west coast fisheries management scheme. By giving California additional representation on the council, it is intended that the Pacific Fisheries Management Council be set up in such a way as to allow the council to fairly address the opportunities and problems of all the fisheries that exist along the entire coastline from Neah Bay to San Diego.

I would therefore like to ask my good friend and chairman of the Committee on Merchant Marine and Fisheries whether there is in this bill brought up today under suspension of the rules a provision that would grant California two additional seats on the Pacific Fishery Management Council.

Mr. JONES of North Carolina. The gentleman is correct. The bill provides two seats for the State of California.

Mr. ANDERSON. Mr. Speaker, I thank the gentleman.

Mr. CLAUSEN. Mr. Speaker, will the

gentleman yield? Mr. FORSYTHE. Continuing to reserve my right to object, Mr. Speaker, I yield to the gentleman from Califor-

nia (Mr. CLAUSEN). Mr. CLAUSEN. Mr. Speaker, I rise in support of the bill H.R. 5002, which proposes several improving amendments to the Fishery Conservation and Management Act of 1976 (FCMA). I would like to commend my col-leagues on the Committee on Merchant Marine and Fisheries for their willingness to address a number of very key issues in a realistic and responsible manner.

I am particularly grateful to the distinguished chairman of the Subcommittee on Fisheries and Wildlife, the gentleman from Louisiana BREAUX), and the distinguished ranking minority member, the gentleman from New Jersey (Mr. Forsythe), for the opportunity afforded me in having input in the development of one of these amendments. The open and responsive fashion in which his subcommmittee permitted me the opportunity to address a key concern regarding section 302, the composition of the regional fishery management council which has jurisdiction over the fisheries off the northern coast of California, was both appreciated and responsive.

As my colleagues are well aware, the Fishery Conservation and Management Act of 1976 marked the beginning of a new era by providing the framework, opportunity, and mandate for State governments and locally impacted user groups to address the challenge of managing their respective fisheries.

Anadromous Pacific salmon have played a major role in the social and economic development of the west coast of the United States. Over the past century salmon populations have been drastically reduced by the cumulative effects of overfishing and widespread destruction of freshwater spawning, rearing, and migration habitats. This has resulted in growing conflict among competing users over a dwindling supply of this valuable resource. In recent years the ocean fisheries understandably have been the primary focus of the Pacific Fishery Management Council, which, as you know, consists of the States of California, Oregon, Washington, and Idaho.

For a number of years, a principal concern has been the fundamental issue of fair representation in the management of the fishery resources within the jurisdictional waters of this council. Almost half of the fisheries managed by the PFMC are located in California waters, and approximately 44 percent of the commercial fisherman in the 4 State region are from California. Additional representation for the State of California on the council has been the object of longstanding efforts on the part of State and local governments, fishery managers, and all segments of the State's fishing industry.

The California State Legislature has twice passed resolutions calling for the creation of a separate management council for the State of California. Accordingly, I have introduced legislation, along with my colleague from California (Mr. PANETTA)-H.R. 770which would create a separate California council. Since the establishment of a separate council with jurisdiction over the resources off the coast of California would require a cooperative effort with its neighboring States, I believe that the more modest proposal contained in the FCMA bill-to increase the number of obligatory seats for California from one to three-to be a successful compromise.

Mr. Speaker, the facts speak for themselves. California's coastline of over 1.000 miles covers more ocean fisheries than the rest of the States in the PFMC combined. The committee has given careful consideration to all the facts and the product of their work is an equitable, balanced, and responsive piece of legislation. I urge my colleagues to support passage of this bill.

Mr. STUDDS. Mr. Speaker, will the gentleman yield?

Mr. FORSYTHE. I yield to the gentleman from Massachusetts.

Mr. YOUNG of Alaska. Mr. Speaker, will the gentleman yield?

Mr. FORSYTHE. I yield to the gentleman from Alaska (Mr. Young).

Mr. STUDDS. Mr. Speaker, let me just say this is an unusual procedure, but it is a bill which represents a very broad consensus not only within this institution, but between the two bodies, and I commend it to my col-

Mr. Speaker, I rise in strong support of H.R. 5002, a bill which amends the

Fishery Conservation and Management Act of 1976. The text of the amendment now before us reflects a consensus reached between the House and the other body concerning the various changes which need to be made to the act, and I urge my col-

leagues to support passage of the bill.

In section 2 of the amendment we have strengthened the position of the Department of State in the allocation of surplus fish to foreign nations. Specifically, the amendment requires that the Secretary shall not release initially more than 50 percent of any foreign allocation of fish. In order to receive any further releases of fish, a foreign nation will be required to fulfill the commitments it made to the United States prior to receiving any surplus fish. As required by law, these commitments include reducing tariff barriers on the importation of U.S. fish, minimizing gear conflicts with our own fishermen, transferring harvesting and processing technologies, and complying with our fishery laws and regulations.

For example, if a foreign nation's fishing fleet is not complying with our laws, by underlogging its catch, the Department of State is required to reduce any further releases of fish to that nation. In short, we have made it very clear that we will no longer allow those foreign fishing vessels which have had a history of undermining our conservation and management efforts and which have not paid outstanding fines to continue to fish off our

The provisions of section 2 specify very clearly the manner in which the Secretary of State shall release fishery resources allocated to foreign nations. Our Committee on Merchant Marine and Fisheries found it necessary to include such direction because all too often the Department of State has handed over to foreign nations our valuable fishery resources-many times to the detriment of our industry and our national interests. By providing clear legislative guidance to the Secretary we will be able to more fully realize the goals of our U.S. fishery policies and take action promoting the development of the U.S. fishing indus-

Section 5 of the amendment concerns the organization and functions of the regional councils established under the act. Many of the changes made in section 5 were recommended the councils to our committee during oversight hearings held last year. One of the provisions in this section states that the Federal Advisory Committee Act (FACA) does not apply to the councils or their committees. I am personally aware that over the past 6 years the councils have been bombarded by legal interpretations about whether the FACA applies to them. I hope that we have once and for all settled this issue so that the councils can now proceed with more important business, such as managing our fishery resources.

Section 5 of the amendment also provides that the councils shall adopt internal procedures to insure the confidentiality of information received from fishermen. These safeguards are to relieve concerns of the National Marine Fisheries Service (NMFS) and industry that information supplied to the councils might not be kept confidential. As a result, councils should be able to receive the confidential information which they believe they need from the National Marine Fisheries Service. Further, NMFS should take account of the expressed needs of the councils in compiling and maintaining confidential information.

In section 7 of the amendment the committee has recommended changes to the act which will expedite the approval process of fishery management plans. By shortening the time periods during which the Secretary of Commerce reviews proposed fishery management plans, I believe we will prevent costly delays which have plagued the system in the past. Overall, the amendments made by this section will make the management process more responsive to the dynamics of our fish-

ery resources.

Section 9 of the amendment addresses those limited situations where Federal waters are surrounded by State waters. The presence of these pockets creates incongruous fishery management schemes and presents significant problems in the area of fisheries law enforcement. Nantucket Sound is identical to these areas and creates the same fishery management problems, although not totally enclosed by the territorial sea. At the eastern edge of the sound the lines delimiting the territorial sea come within 1 mile of

intersecting each other.

I am pleased that the amendment now before us includes language which I requested to resolve this problem. Quite simply, it treats Nantucket Sound as the other affected areas. Historically, the Massachusetts Division of Marine Fisheries provided the management of the fisheries in the sound. fisheries law enforcement, conducted stock assessments and other fishery related research, and continues to do so today. By insuring a unified fisheries management regime, this amendment will enhance fishery conservation and fisheries law enforcement in the sound.

Finally, section 14 reauthorizes for 3 years the Anadromous Fish Conservation Act and extends for 2 years the emergency striped bass study. During the Merchant Marine and Fisheries Committee markup session, I offered an amendment to restrict some of the funding under this program in cases where a State had not adopted an approved interstate fishery management plan. The amendment was adopted; however, due to concerns expressed by Chairman Jones and Members of the other body, the language of that provision has been changed. Section 14 of the amendment contains new language which in essence offers an incentive to States to adopt interstate management plans.

States which have adopted such plans, such as my own State of Massachusetts, will be eligible to receive a larger Federal share of funding available under the Anadramous Fish Conservation Act. I support these changes and hope that eligible States will take full advantage of these new provisions by adopting interstate fishery management plans.

Lastly, Mr. Speaker, the amendment provides for the completion of the emergency striped bass study. As many of my colleagues remember, I was the House author of this study and have followed its progress over the past 3 years. The research being conducted under the study has yielded very important information about the abundance and migratory patterns of the striped bass. The small amount of funding contained in the amendment will allow this important research to continue so that we may learn more about this magnificent

Mr. YOUNG of Alaska. Mr. Speaker, I rise in support of H.R. 5002 and urge its passage by the House.

This bill is designed to correct a number of problems that have been identified in existing law. These include the process by which fishing privileges are granted to foreign nations in our 200 mile zone: the amount of time necessary to approve fishery management plans: confused enforcement authority in areas surrounded by State waters; and other procedural matters affecting the regional councils and the Department of Commerce. All of the these issues have been addressed in this legislation and the solutions found will greatly increase our ability to wisely manage our fisheries.

I do want to make particular mention of one amendment that is not included in the bill. During mark-up in committee, I offered an amendment which would insure that foreign fishing allocations are based only on matters involving fisheries. This amendment was adopted by the committee in a modified form but was dropped from the package we have today. It is my intent to seek the original change again in the next Congress. We have seen a number of examples where our fisheries resources, which represent a major source of food for our Nation, are traded away to satisfy the foreign policy brokers in the executive branch and the narrow interests of small-minded pressure groups. Our fish-a strategic resource—are too important to be kicked around in a game of political football. I am putting this Congress and those special interest groups on notice that I intend to see the law changed so that it works to the benefit of American fisherman, rather than to their detriment.

Mr. Speaker, at this time I wish to yield to the Chairman and ranking Republican of the subcommittee to

engage in a colloquy.

If I may address the managers of the bill for a moment, do I understand that it is the intent of the committee that the allocation process described in section 2 of the bill should be used to allocate fishing privileges on a fishery by fishery basis in those cases where doing so will provide substantial benefits to the U.S. fishing industry?

Mr. JONES of North Carolina, Mr. Speaker, if the gentleman will yield, I would say to the gentleman that that

is the intent of the bill.

Mr. YOUNG of Alaska. Is it further the intent of the committee that the Departments of Commerce and State will pay particular attention to foreign allocations for those species which the U.S. fishing industry has had little or no success in placing in the markets of that Nation?

Mr. JONES of North Carolina. Mr. Speaker, the answer to that is "yes.

Mr. YOUNG of Alaska. Finally, does the committee intend that the allocation policy currently used by the Departments of State and Commerce will be continued under this legislation where doing so will provide substantial benefits to the U.S. fishing industry?
Mr. JONES of North Carolina. That

is the intent of the bill.

Mr. YOUNG of Alaska. Mr. Speaker, I want to thank the gentleman for

bringing this bill to the floor.

 Mr. BREAUX. Mr. Speaker, the bill before us, H.R. 5002, represents the culmination of a 3-year effort by our committee to assess the effectiveness of our Fishery Conservation and Management Act (FCMA), signed into law on April 13, 1976. The purposes of this historic act, which created a 197-mile fishery conservation zone (FCZ) adjacent to the territorial sea, were twofold:

First, to provide for the conservation and management of valuable fishery resources found off the coast of the United States, and second, to insure priority access to such resources to the

U.S. fishing industry.

The significance of this legislation can be appreciated by considering the foreign and domestic fisheries which existed in the 20 years preceding its enactment. During this period, the world production of fish multiplied more than threefold, from 20 million metric tons to approximately 72.4 million metric tons, yet the U.S. share of the catch hovered between 2 and 2.2 million metric tons. While the U.S.

harvest of fish remained relatively stable, other nations with large and efficient fleets-many of which were subsidized-experienced substantial increases in the amount of fish harvested off our coasts. This situation led to the overfishing of at least 10 major commercial stock-Alaska California sardines, haddock, halibut, herring, ocean perch, Pacific mackerel, sablefish, yellowfin sole, and yellowtail flounder-causing serious economic consequences. For example, overexploitation of the haddock fishery off New England and of the sardine fishery off California resulted in an accumulated loss to fishermen in excess of half a million dollars by 1974.

To manage the fishery resources of the U.S. fishery conservation zone, containing approximately 20 percent of the world's total fishery resources. the Congress, in passing the FCMA, provided for the creation of eight regional fishery management councils. fishery management plans The (FMP's) developed by the councils, reviewed and approved by the Secretary of Commerce, identify the optimum annual harvest for each fishery, calculate the U.S. harvest, and set the total allowable level of foreign fishing.

From June of 1979 through this past fall, the Subcommittee on Fisheries, Wildlife Conservation and the Environment conducted nine oversight hearings on the effectiveness of the conservation and management regime established by the FCMA. What we learned from those hearings was that although valuable gains have been made in the development of the U.S. fishing industry, further actions are needed. Our findings were detailed in an oversight report filed with the House last December (H. Rept. 97-

Some of the further actions called for in our oversight report were achieved with the enactment, on December 22, 1980, of the American Fisheries Promotion Act (AFPA). However, while the AFPA contained numerous provisions designed to stimulate and enhance the development of the U.S. fishing industry, it did not address several issues related to the day-to-day functioning of the management process. These issues include, among others:

First, the functions of observers placed onboard foreign fishing vessels participating in the harvest of fish resources of the FCZ and the method for insuring 100 percent observer coverage:

Second, appointment process for members of the regional fishery management councils:

Third, the relationship of council deliberations to the Federal Advisory Committee Act;

Fourth, the method for filling gaps in data and information necessary to sound fishery management decisions:

Fifth, the degree of Federal oversight and control of fishery management decisions made by the regional councils; and

Sixth, the conditions under which foreign citizens may participate in recreational fishing in U.S. waters.

In addition, the committee discovered that a need existed for a strong mechanism to insure foreign compliance and observance with the fish and chips policy of the FCMA and AFPAdesigned to maximize the return to U.S. fishermen from foreign participation in the harvest of U.S. fishery resources.

Mr. Speaker, based upon the findings of our hearings and further consultations with representatives of the fishing industry and the regional fishery management councils, our committee, as well as the Senate Committee on Commerce, Science, and Transportation, reported legislation to reauthorize our fishery conservation and management efforts, and to accomplish the changes in our basic fisheries law which will help to insure its smooth operation.

Although the House and Senate reported bills were remarkably similar, there were some areas of difference. In an attempt to avoid the necessity of convening a conference committee at this late date in the session, the staff of our committee and of the Senate committee have been meeting to resolve outstanding differences. I am happy to report that this goal has largely been accomplished and is represented in the committee substitute we bring before the House today. Let me take a few moments to briefly outline the elements of the legislation before us and to explain where it departs from the bill we reported from the Merchant Marine and Fisheries Committee by unanimous voice vote on May 17.

One of the first substantive differences is an amendment to section 201(c)(4) of the FCMA, indicating the sense of Congress that Governing International Fishery Agreements (GIFA's), which constitute the basic mechanism allowing foreign citizens to apply for permission to fish in the U.S. FCZ, must contain a binding commitment on the part of the foreign nation and its citizens to comply with the fish-and-chips policies set forth in section 201(e)(1) of the FCMA. We understand that some foreign nations whose GIFA's were renegotiated this year disputed the right of the State Department to include these policies, by specific reference, in their agreements. We believe, however, that the State Department approach was correct and intend to clarify their right to insist that the foreign nation undertake the obligations set forth in our law.

The second difference relates to the method by which fishery allocations are released to a particular foreign nation. Under the provisions contained in the substitute amendment, the Secretary of State, in cooperation with the Secretary of Commerce, must first determine what the allocation, if any, for a particular nation is, with respect to each fishery subject to the exclusive management authority of the United States. From this determination, the Secretary of State shall determine the aggregate of all fishery allocations to each foreign nation.

At this point, the Secretary of State and the Secretary of Commerce will release up to 50 percent of the aggregated allocation total. It is important to note that even if the Secretaries decide to release 50 percent of the aggregated allocation, they are not bound to release 50 percent of the allocation for each fishery, although the Secretaries could decide that this is the most effective way to achieve fish and chips. The provision has been carefully drafted so as to maximize the leverage that can be placed on such foreign nations to comply with fish and chips. Thus, the Secretaries could consider the relative value of different fish species in making releases from individual fisheries within the total aggregate release. In addition, the Secretaries could consider the seasonal nature of certain fisheries and the conservation and management measures adopted by the United States which might require an initial allocation of more or less than 50 percent of the allocation for a particular fishery. Of course, the Secretaries could decide to release identical percentages from each fishery within the aggregated total when this method would further fish and chips policies. Again, however, in no event may the initial releases total more than 50 percent of the aggregated allocations determined for a particular nation for that year. The basis on which each release is made must be stated in writing. Of course, the Secretaries decisions must be based upon the fish and chips criteria of section 201(e)(i).

After the initial releases are made, the Secretaries of State and Commerce must determine in writing that the foreign nation is continuing to comply with fish and chips before undertaking further allocation releases. The legislation does not specify a standard time that must elapse between the initial and subsequent allocation releases, and indicates that the Secretaries should take into account the size of the allocation given to the foreign nation under consideration for a particular fishery, as well as the length and timing of the fishing season for that fishery. If within that time frame, however, the Secretaries determine that the foreign nation in question is not complying with fish and chips policy, the Secretary of State is directed to reduce, in a

manner and quantity he determines appropriate, the subsequent allocation release. If all of the annual allocation for a particular fishery has already been released to a noncomplying foreign nation, the Secretary of State is directed to reduce the next year's allocation, of such fishing, if any, to such foreign nation.

Mr. Speaker, a new provision contained in the substitute provides a mechanism for insuring 100 percent U.S. observer coverage of foreign fishing vessels operating in the U.S. FCZ. This provision directs the Secretary of Commerce, beginning in 1984, to certify U.S. citizens who have the requisite education or experience to carry out the functions of observers. It will be encumbent upon the foreign fishing vessel, operating under a U.S. permit, to contract with such certified individuals. This provision will also apply to foreign vessels operating in the U.S. zone for highly migratory species of tuna, if such vessels have a permit for an incidental take of billfish. It is important to note that this system of providing U.S. observers on foreign fishing vessels operating in the U.S. FCZ applies to the extent that observers cannot be obtained due to a lack of appropriations from the existing Observer Fund.

Mr. Speaker, the committee substitute also contains the reauthorization of the Anadromous Fish Conservation Act, which earlier passed the house as H.R. 5663. We have slightly amended the original bill to:

First, reduce the term of reauthorization for the section 7 emergency striped bass study to 2 years rather than 3. This action was taken due to our concern that this study is taking too long, and we want to signal our displeasure with the continued delay in its completion. The section 4 State grant program will be reauthorized for 3 years and the funding levels for both sections will be retained as in the original House-passed bill; and

Second, delete the provision which restricted funding to those States that do not adopt an interstate fisheries management plan developed under the programs conducted pursuant to the act. This provision will be replaced by one which permits Federal funding of 90 percent of the costs of projects relating to species for which a State has adopted an interstate management plan, such as the striped bass plan. States which fail to adopt such a plan would be eligible for the normal 50percent Federal share of the project costs. This provision is designed to promote the cooperative and responsible management of territorial sea and inland fisheries for striped bass as well as all other anadromous fish species in the United States.

Mr. Speaker, the remainder of the substitute amendment is self-explanatory and is largely taken from the bill

reported by our committee in May. I urge my colleagues to support this timely legislation.

• Mr. HUTTO. Mr. Speaker, I want to take this time to commend the chairman of the Subcommittee on Fisheries and Wildlife Conservation and the Environment for bringing H.R. 5002 to the floor for consideration.

I am particularly pleased that the chairman and his staff have addressed a problem which is crucial to the continued participation by the State of Florida in the fishery conservation management program. The substitute will grant general Federal arrest authority to agents of the National Marine Fisheries Service and affected State agencies which participate in the Fishery Conservation Zone (FCZ) program. I am certain that the Members are aware of the tremendous drug smuggling problem in the State of Florida. This problem has strapped the resources of not only our State law enforcement agencies, but Federal agencies such as the U.S. Coast Guard which is responsible for keeping our waters free of drug trafficking. Obviously, this is no easy task.

The provision on pages 26 and 27 of the substitute will close a law enforcement loophole that has existed for too long. When a Marine Fisheries Service (MFS) agent, or other State agent under delegated Federal authority, patrols the sea for fishery or marine resource violations, that agent may encounter felony activity such as drug smuggling on a routine basis. Yet, that agent lacks authority to arrest the felon and seize the contraband.

This lack of authority raises my concern for several reasons. First, I believe that the lack of authority puts the lives and well-being of marine fisheries service and State agents in jeopardy when attempting to enforce our Nation's maritime laws. Second, a serious violation of Federal law may go unprosecuted. Third, if an agent arrests a felon without this authority, the consequences may lead to personal or agency liability and the suppression of evidence.

Mr. Speaker, this provision is a commonsense approach to an unnecessarily complex situation. I once again applaud my chairman for his efforts on this provision and on H.R. 5002 as a whole.

 Mr. LENT. Mr. Speaker, as a sponsor of the Fishery Conservation and Management Act of 1976, also known as the 200-mile limit law, I rise in strong support of H.R. 5002 reauthorizing this act.

The FCMA is absolutely essential to protect the valuable fishing grounds within 200 miles of America's coasts from overfishing by foreign fleets and to conserve and manage fishery resources within our Fishery Conservation Zone.

Since enactment of the FCMA in 1976, we have made substantial progress in checking overexploitation of many fish stocks, and established a national pattern of fish conservation which previously had been lacking.

The National Advisory Committee on Oceans and Atmosphere (NACOA) recently reported that foreign fishing within the U.S. Fishery Conservation Zone has been reduced by 34 percent from 1976 to 1980, and domestic fish catches in the Fishery Conservation Zone were 28 percent more during 1980 than in 1976. By the end of 1981, the fifth year in which the 200-mile limit law had been in full operation, 14 fishery management plans had been implemented.

But more needs to be done if we are to realize the full potential of our U.S. fisheries industries.

In addition to reauthorizing the FCMA for 3 years, the legislation before us makes a number of important improvements to the act which clarify the role of the Regional Fishery Management Councils in developing management plans, and streamline the plan review and implementation process.

The legislation specifies that the guidelines issued by the Secretary of Commerce to assist in the development of fishery management plans are advisory only, and that it is the responsibility of the Regional Fishery Management Councils to develop fishery management plans and be responsible for day-to-day management decisions. I believe this legislation brings into better balance the roles of the Federal Government and the regional councils in managing our fisheries resources.

In addition, the legislation before us reauthorizes programs under the Fish and Wildlife Act and the Anadromous Fish Conservation Act; incentives for States to manage anadromous fish species such as the striped bass are also included.

Finally, I want to note that the legislation continues the vitally important study of the striped bass, whose North and mid-Atlantic populations have been in a state of decline. The striped bass is one of our most popular and desirable recreational fisheries and I understand that recent breakthroughs in striped bass research would make termination of this program at this time penny wise and pound-foolish.

I want to commend my colleagues on the Merchant Marine and Fisheries Committee for their perseverance in developing this consensus measure, and I urge my colleagues in the House to vote for its passage without further delay. Thank you.

Mr. FORSYTHE. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the

gentleman from North Carolina (Mr. JONES)?

There was no objection.

The Clerk read the bill, as follows: H.R. 5002

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, SECTION 1. AMENDMENT REFERENCE.

Whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or subsection, the reference shall be considered to be made to a section or subsection of the Act entitled "An Act to provide for the conservation and management of the fisheries, and for other purposes", approved April 13, 1976 (90 Stat. 331 et seq., 16 U.S.C. 1801 et seq.).

SEC. 2. PURPOSES OF ACT.

Section 2(b)(4) (16 U.S.C. 1801(b)(4)) is amended by inserting "by the United States fishing industry" immediately after "from each fishery".

SEC. 3. FOREIGN FISHING.

Section 201 (16 U.S.C. 1821) is amended-"(1) by amending subsection (c)(2)(A)(i) to read as follows:

"(i) The term 'certification' means-

"(I) a certification made by the Secretary that nationals of a foreign country, directly or indirectly, are conducting fishing operations or engaging in trade or taking which diminishes the effectiveness of the International Convention for the Regulation of Whaling; or

"(II) a certification made by the Secretary under paragraph (1) of section 8(a) of the Fishermen's Protective Act of 1967 (22 U.S.C. 1978(a)(1), regardless of whether the President directed any action to be taken under paragraph (4) of such section 8(a) as a result of such certification.

A certification made by the Secretary under subclause (I) shall also be deemed to be a certification for the purposes of paragraph (1) of such section 8(a).";

(2) by amending subsection (i)-

(A) by amending paragraph (3) to read as follows:

"(3) United States observers, while aboard foreign fishing vessels, shall carry out such scientific, enforcement, and other functions as the Secretary deems necessary or appropriate to carry out the purposes of this Act; and shall cooperate in carrying out such other scientific programs relating to the conservation of living resources as the Secretary deems appropriate."; and

(B) by amending the fourth sentence of paragraph (5) to read as follows: "All payments made by the Secretary to carry out this subsection shall be paid from the Fund."; and

(3) by adding at the end thereof the fol-

lowing new subsection:

"(i) RECREATIONAL FISHING -Notwithstanding any other provision of this title, fishing vessels of foreign nations may engage in recreational fishing within the fishery conservation zone, the territorial sea of the United States, and the internal waters of a State subject to obtaining such permits, paying such fees, and complying with such conditions and restrictions as the Secretary, with respect to the fishery con-servation zone, and the appropriate State official, with respect to the territorial sea and internal waters, shall impose as being necessary or appropriate to insure that the fishing activity of such foreign vessels is consistent with any applicable fishery man-

agement plan implemented under section 305. The Secretary shall consult with the Secretary of State and the Secretary of the department in which the Coast Guard is operating in formulating the conditions and restrictions applicable with respect to the fishery conservation zone.".

SEC. 4. FOREIGN FISHING PERMITS.

Section 204(b) (16 U.S.C. 1824(b)) is amended-

(1) by inserting "hold capacity," immediately after "fishing gear," in paragraph (3)(B);

(2) by striking out subparagraphs (B) and (C) of paragraph (4) and inserting in lieu thereof the following:

"(B) a copy of the application to the Secretary of the department in which the Coast Guard is operating; and

'(C) a copy or a summary of the application to the appropriate Council, upon its request.":

(3) by striking out "After receipt of an application transmitted under paragraph (4)(B), each appropriate Council shall" in paragraph (5) and inserting in lieu thereof 'After receiving an application copy or summary under paragraph (4)(C), the Council may": and

(4) by striking out "loans therefrom," and all that follows thereafter in the last sentence of paragraph (10) and inserting in lieu thereof "loans therefrom.".

SEC. 5. NATIONAL STANDARDS.

Section 301 (16 U.S.C. 1851) is amended— (1) by inserting "by the United States fishing industry" immediately after "from each fishery" in paragraph (1); and

(2) by adding at the end of subsection (b) the following new sentence: "The guidelines shall not have the force and effect of law.". SEC. 6. REGIONAL FISHERY MANAGEMENT COUN-CIL ORGANIZATION AND FUNCTIONS.

Section 302 (16 U.S.C. 1852) is amended as follows:

(1) Subsection (a) is amended-

(A) by striking out "(b)(1)(C)" each place it appears therein and inserting "(b)(1)(B)" (B) by striking out "11" in paragraphs (1)

and (5) and inserting in lieu thereof "12"; (C) by striking out "12" in paragraph (2) and inserting in lieu thereof "13";

(D) by striking out "8" in paragraphs (3)

and (6) and inserting in lieu thereof "9";
(E) by striking out "4" in paragraph (4) and inserting in lieu thereof "5";

(F) by amending paragraph (7) by striking out "7" and inserting in lieu thereof "8"; and by striking out "5" and inserting in lieu thereof "6"; and

(G) by amending paragraph (8) to read as follows:

"(8) WESTERN PACIFIC COUNCIL.—The Western Pacific Fishery Management Council shall consist of Hawaii, American Samoa, Guam, and the Northern Mariana Islands and shall have authority over the fisheries in the Pacific Ocean seaward of all States except Alaska, Washington, Idaho, Oregon, and California. The Western Pacific Council shall have 13 voting members, including 9 appointed by the Secretary pursuant to such subsection (b)(1)(B) (at least one of the following States: Hawaii, American Samoa, Guam, and the Northern Mariana Islands).".

(2) Subsection (b) is amended-

(A) by amending paragraph (1)-(i) by striking out subparagraph (B), and

(ii) by redesignating subparagraph (C) as subparagraph (B); and

(B) by amending paragraph (2) by striking out "(1)(C)" and iserting in lieu thereof

"(1)(B)"; and by adding at the end thereof the following new sentences: "The Secretary shall make, and announce publicly, the appointment of an individual under paragraph (1)(B) not less than 45 days before the first day on which the individual is to take office as a member of a Council. The Secretary may remove for cause any member appointed under paragraph (1)(B) if the Council concerned first recommends removal by not less than two-thirds of the members who are voting members. A removal recommendation of a Council must be in writing and accompanied by a statement of the reasons on which the recommendation is based."

(3) Subsection (e)(1) is amended by redesignating subparagraphs (A) through (D) as subparagraphs (B) through (E), respectively; and by inserting immediately before subparagraph (B) (as so redesignated) the fol-

lowing new subparagraph:

"(A) The regional director of the National Marine Fisheries Sercvice for the geographical area concerned, or his designee, execpt that if 2 such directors are within such geographical area, the Secretary shall designate which of such directors shall be the nonvoting member.

(4)Subsection (d) is amended (A) by striking out "for GS 18 of the General Schedule" and inserting in lieu thereof 'of \$100"; and

(B) by striking out "(c)(1)(C)" and inserting in lieu thereof "(c)(1)(D)".

(5) Subsection (f) is amended-

(A) by adding at the end of paragraph (6)

the following new Sentences:

"Such procedures shall include, but shall not be limited to, the following requirements:

"(A) Emergency meetings of the Council shall be held at the call of the Chairman.

"(B) Timely notice of each regular meeting and each emergency meeting of the Council and the agenda for each such meeting must be published in newspapers of general circulation throughout the geographical area concerned; and timely notice of each regular meeting and agenda shall also be published in the Federal Register.

(C) Interested persons shall be given an opportunity to submit oral or written statements regarding matters before the Council at regular and emergency meetings.

"(D) A record shall be kept of the proceedings at each regular or emergency meeting and the record (including a copy of each written statement and document presented in the course of the proceedings, as well as the transcript, if any, of the proceeding) shall be available for public inspection and copying at a single location in the offices of the Council.

The requirements set forth in subparagraphs (A) through (D) shall also apply with respect to the procedures for the scientific and statistical committee and advisory panels established under subsection (g) by a Council. The Federal Advisory Committee Act (5 U.S.C. App. I) shall not apply with respect to any Council, scientific and statistical committee, or advisory panel."; and

(B) by adding at the end thereof the fol-

lowing new paragraph:

"(8) Each Council shall establish such procedures relating to the confidentiality of statistics submitted to it as the Council deems appropriate, including, but not limited to, restrictions regarding Council employee access and the prevention of conflicts of interest; except that such procedures must, in the case of statistics submitted to the Council by a State, be consistent with the laws or regulations of that State concerning the confidentiality of such statistics

(6) Subsection (h) is amended as follows: (A) Paragraph (1) is amended to read as follows:

"(1) prepare and submit to the Secretary "(A) a fishery management plan with respect to each fishery, within its geographical area of authority, that requires conservation and management.

"(B) a data collection program described in section 303(e) if the council determines

such a program to be necessary, and
"(C) such amendments to any fishery

management plan or data collection program prepared by it as the Council may deem, from time to time, to be necessary:

(B) Paragraph (2) is amended by striking out "204(b)(4)(B)" and inserting in lieu thereof "204(b)(4)(C)".

(C) Paragraph (3) is amended by inserting immediately before the semicolon at the end thereof the following: "(and for purposes of this paragraph, the term 'geo-graphical area concerned' may include an area under the authority of another Council if the fish in the fishery concerned migrate into, or occur in, that area or if the matters being heard affect fishermen of that area; but not unless such other Council is first consulted regarding the conduct of such hearings within its area)".

(D) Paragraph (4) is amended to read as

follows:

"(4) submit to the Secretary such periodic reports as the Council deems appropriate, and any other relevant report which may be requested by the Secretary;".

SEC. 7. CONTENTS OF PLANS.

Section 303 (16 U.S.C. 1853) is amended as

(1) Subsection (b) is amended-

(A) by amending that part of paragraph (6) which precedes subparagraph (A) to read as follows:

"(6) establish for the fishery, in order to achieve optimum yield, a limited access system (which system may include a vessel 'buy-back' or equivalent program, may provide for the funding of any such program through the fee schedule for the system, and may be administered by the States concerned), and in developing such a system, the Council and the Secretary shall take into account-

(B) by striking out "and" at the end of paragraph (6);

(C) by redesignating paragraph (7) as paragraph (8);

(D) by inserting immediately after paragraph (6) the following new paragraph:

"(7) set forth those factors, if any, that are impeding the full utilization of the optimum yield of the fishery by the United States fishing industry and recommend those measure which should be taken to eliminate, or reduce the effect of, those factors: and"

(2) The first sentence of subsection (c) is amended to read as follows: "Each Council shall prepare such proposed regulations as it deems necessary or appropriate to carry out each fishery management plan, and any amendment thereto, that is prepared by it."; and

(E) by adding at the end thereof the fol-

lowing new subsections:

"(e) DATA COLLECTION PROGRAMS.—(1) If a Council determines that the statistics and other data available to it are insufficient or unreliable for the purposes of—
"(A) determining whether a fishery man-

agement plan is needed for a fishery; or

(B) preparing a fishery management plan:

the Council may prepare and submit to the Secretary a data collection program for the fishery which sets forth the types of statistics and other data which the Council considers necessary, the periods of time over which, and the intervals at which, such data should be collected, the probable sources of the data, a justification for the need for such data as it relates to the fishery or the fishery management plan proposed to be prepared, and such other matters as the Council deems appropriate or the Secretary may require.

"(2) The Secretary shall review and approve or disapprove each data collection program within 60 days after the date on which the program is submitted to him. The Secretary shall approve a data collection program if he determines that the need for the data is justified. If the Secretary does not consider any specific data, collection sequence, or source proposed in a data collection program to be appropriate for purposes of determining whether a fishery management plan is needed or the preparation of a plan, he shall disapprove all or part of the program, inform the Council of the reasons therefor, and propose suggestions for improvement. Within 60 days after the date of disapproval, the Council may amend the proposed program and resubmit it to the Secretary for approval.

"(3) The Secretary, within 60 days after approving a data collection program under this subsection, shall promulgate regulations to implement the program.".

SEC. 8. ACTION BY SECRETARY.

Section 304 (16 U.S.C. 1854) is amended as follows:

- (1) Subsection (a) is amended by striking out "60 days" and inserting in lieu thereof "90 days"; and by adding at the end thereof the following new sentence: "If the Secretary does not notify the Council of his approval, disapproval, or partial disapproval of the fishery management plan or amend-ment before the close of the 90-day period following his receipt of it, the plan or amendment shall be deemed, as of the close of such period, to be approved by the Secretary for purposes of section 305(a)(1).".
  - (2) Subsection (c)(1) is amended-
- (A) by striking out "or" after the semicolon at the end of subparagraph (A);
- (B) by striking out the period at the end of subparagraph (B) and inserting in lieu thereof "; or"; and
- (C) by adding at the end thereof the following new subparagraph:
- "(C) a Council, by not less than two-thirds of the members who are voting members, determines that an emergency involving a fishery exists and requests the Secretary to prepare a fishery management plan for that fishery.
- (3) Subsection (d) is amended to read as
- "(d) FEES .--The Secretary shall by regulation establish the level of any fees which authorized to be charged pursuant to section 303(b) (1) and (6). The level for fees imposed under a permit system pursuant to section 303(b)(1) shall not exceed the costs incurred by the Secretary in issuing the permits. The Secretary may enter into a cooperative agreement with the States concerned under which the States administer the permit system and the agreement may provide that all or part of the fees collected under the system shall accrue to the States.".

SEC. 9. IMPLEMENTATION OF PLANS.

Section 305 (16 U.S.C. 1855) is amended as follows

(1) Subsection (a) is amended-

(A) by striking out the matter preceding paragraph (1) and inserting in lieu thereof: "(a) In GENERAL.-Within 30 days after

the Secretary-

(B) by amending clause (B) to read as fol-'(B) the proposed regulations prepared by the Council as required by section 303(c), any suggested substantive revision by the Secretary to the proposed regulations, and an explanation of such revisions."; and

(C) by amending the last sentence thereof to read as follows: "Interested persons shall be afforded a period of 45 days after such publication within which to submit in writing data, views, or comments on the plan or amendment, the proposed regulations, and any suggested revision to the proposed regu-

lations.'

(2) Subsection (c) is amended—(A) by striking out "45-day" in paragraph (1)(A) and inserting in lieu thereof "30-day"; and

- (B) by adding at the end thereof the following new sentence: "If the Secretary does not promulgate regulations to implement a fishery management plan or amendment within the 30 day period following the close of the 30 day period referred to in subsection (a), the proposed regulations prepared by the Council under section 303(c) with respect to the plan shall be considered to have been promulgated by the Secretary effective on and after the day after the last day of such second 30 day period.".
  - (3) Subsection (e) is amended-

(A) by striking out the period at the end of paragraph (2) and inserting in lieu thereof a semicolon:

(B) by adding immediately after paragraph (2) the following:

and if a Council-

"(3) has requested under section 304(c)(1)(C) that a fishery management plan be prepared, the Secretary may promulgate emergency regulations to conserve the fishery until a plan can be prepared and implemented; or

'(4) by the unanimous vote of the members who are voting members declares than an emergency regarding a fishery exists and that appropriate action (including, but not limited to, closure of, or limitations on catch levels in, the fishery) will alleviate the situation, the Secretary shall promulgate emergency regulations that are necessary to im-

plement such action."; and

(C) by inserting immediately before the semicolon at the end of clause (B) the following: "(and, if such regulation was promulgated under paragraph (3), may be repromulgated following the second 45-day period for an additional period of not more than 90 days if such additional period is required for purposes of preparing a fishery management plan)"

(4) Subsection (f) is repealed.

(5) At the end thereof insert the following new subsection:

"(h) INAPPLICABILITY OF CERTAIN LAWS TO CERTAIN PROCEDURAL AND TIME REQUIRE-MENTS.—Neither the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 et seq.), the Regulatory Flexibility Act (5 U.S.C. 601 et seq.), or Executive Order Numbered 12291, dated February 17, 1981, shall affect in any manner or to any extent (A) the time limitations or procedural requirements specified in subsections (a), (b), (c), and (e), section 303(c) and (e), and section 304(a) as they apply to the functions of the Secretary under such provisions; or (B) the taking effect under subsection (c) of certain regulations proposed by a Council.".

SEC. 10. STATE JURISDICTION.

Section 306(a) (16 U.S.C. 1856(a)) amended by inserting immediately after the first sentence thereof the following new sentence: "For purposes of this Act, the jurisdiction and authority of a State shall extend to any pocket of waters that is adjacent to the State and totally enclosed by lines delimiting the territorial sea of the United States pursuant to the Geneva Convention on the Territorial Sea and Contiguous Zone or any successor convention to which the United States is a party.".

SEC. 11. (a) Section 309(b) (16 U.S.C. 1859(b)) is amended by striking out ", or imprisonment

for not more than 1 year, or both'

(b) The amendment made by subsection (a) applies with respect to offenses committed under section 309 on or after the date of the enactment of this Act. SEC. 12.

Section 310(a) (16 U.S.C. 1860(a)) is amended by inserting "(or the value thereof)" immediately after "fish" each place it appears. SEC. 13.

(a) Section 3(27) (16 U.S.C. 1802(27)) is amended by striking out "or" and inserting in lieu thereof a comma; and by inserting or numbered under the Federal Boating Safety Act of 1971 (46 U.S.C. 1451 et seq.) immediately before the period.

(b) The second sentence of section 306(a) (16 U.S.C. 1856(a)) is amended by inserting "or numbered under the Federal Boating Safety Act of 1971 (46 U.S.C. 1451 et seq.) immediately before the period.

(c) The last sentence of section 311(a) (16

U.S.C. 1861(a)) is repealed.

(d) The fourth sentence of section 2(e) of the Act entitled "An Act to authorize appropriations for fiscal years 1981, 1982, and 1983 for the Atlantic Tunas Convention Act of 1975, and for other purposes", approved September 4, 1980 (16 U.S.C. 1827(e)), is amended to real as follows: "All payments made by the Secretary to carry out this section shall be paid from the Fund."

Amend the title so as to read: "A bill to improve fishery conservation and manage-

ment, and for other purposes."

AMENDMENT IN THE NATURE OF A SUBSTITUTE OFFERED BY MR. JONES OF NORTH CAROLINA IN LIEU OF THE COMMITTEE AMENDMENTS TO H.R. 5002

Mr. JONES of North Carolina. Mr. Speaker, I ask unanimous consent to offer an amendment in the nature of a substitute in lieu of the committee amendments to H.R. 5002.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

The SPEAKER pro tempore. The Clerk will report the amendment in the nature of a substitute.

The Clerk read as follows:

Amendment in the nature of a substitute offered by Mr. Jones of North Carolina in lieu of the committee amendments to H.R. 5002:

Strike out all after the enacting clause and insert:

SECTION 1. AMENDMENT REFERENCE.

Whenever in this Act an amendment or repeal is expressed in terms of an amend-

ment to, or repeal of, a section or subsection, the reference shall be considered to be made to a section or subsection of the Act entitled "An Act to provide for the conservation and management of the fisheries, and for other purposes", approved April 13, 1976 (90 Stat. 331 et seq., 16 U.S.C. 1801 et seq.).

SEC. 2. FOREIGN FISHING.

- (a) Section 201 (16 U.S.C. 1821) is amended as follows:
- (1) Subsection (c)(2)(D) is amended to read as follows:
- "(D) United States observers required under subsection (i) be permitted to be stationed aboard any such vessel and that all of the costs incurred incident to such stationing, including the costs of data editing and entry and observer monitoring, be paid for, in accordance with such subsection, by the owner or operator of the vessel;".

(2) Subsection (c)(4) is amended-

- (A) by striking out "and" at the end of subparagraph (B):
- (B) by striking out the period at the end of subparagraph (C) and inserting in lieu thereof "; and"; and
- (C) by adding at the end thereof the following new subparagraph:
- "(D) take, or refrain from taking, as appropriate, actions of the kind referred to in subsection (e)(1) in order to receive favorable allocations under such subsection.'
- (3) The first sentence of subsection (d)(4) is amended by striking out "shall be allocated" in the matter following subparagraph (B) and inserting in lieu thereof "may be al-
- (4) Subsection (e)(1) is amended to read as follows:
- "(e) ALLOCATION OF ALLOWABLE LEVEL.—(1)(A) The Secretary of State, in cooperation with the Secretary, shall determine the allocation among foreign nations of the total allowable level of foreign fishing which is permitted with respect to each fishery subject to the exclusive fishery management authority of the United States.

"(B) From the determinations made under subparagraph (A), the Secretary of State shall compute the aggregate of all of the fishery allocations made to each foreign nation.

- "(C) The Secretary of State shall initally release to each foreign nation for harvesting up to 50 percent of the allocations aggregate computed for such nation under subparagraph (B), and such release of allocation shall be apportioned by the Secretary of State, in cooperation with the Secretary, among the individual fishery allocations determined for that nation under subparagraph (A). The basis on which each apportionment is made under this subparagraph shall be stated in writing by the Secretary of State.
- "(D) After the initial release of fishery allocations under subparagraph (C) to a foreign nation, any subsequent release of an allocation for any fishery to such nation shall only be made-
- "(i) after the lapse of such period of time as may be sufficient for purposes of making the determination required under clause (ii); and
- "(ii) if the Secretary of State and the Secretary, after taking into account the size of the allocation for such fishery and the length and timing of the fishing season, determine in writing that such nation is complying with the purposes and intent of this paragraph with respect to such fishery.

If the foreign nation is not determined under clause (ii) to be in such compliance, the Secretary of State shall reduce, in a manner and quantity he considers to be appropriate (I) the remainder of such allocation, or (II) if all of such allocation has been released, the next allocation of such fishery, if any, made to such nation.

The determinations required to be made under subparagraphs (A) and (D)(ii), and the apportionments required to be made under subparagraph (C), with respect to a foreign nation shall be based on-

"(i) whether, and to what extent, such nation imposes tariff barriers or nontariff barriers on the importation or otherwise restricts the market access, of United States

fish or fishery products;

"(ii) whether, and to what extent, such nation is cooperating with the United States in the advancement of existing and new opportunities for fisheries trade, particularly through the purchase of fish or fishery products from United States processors or from United States fishermen;

'(iii) whether, and to what extent, such nation and the fishing fleets of such nation have cooperated with the United States in the enforcement of United States fishing

regulations:

(iv) whether, and to what extent, such nation requires the fish harvested from the fishery conservation zone for its domestic

consumption:

'(v) whether, and to what extent, such nation otherwise contributes to, or fosters the growth of, a sound and economic United States fishing industry, including minimiz-ing gear conflicts with fishing operations of United States fishermen, and transferring harvesting or processing technology which will benefit the United States fishing indus-

try;
"(vi) whether, and to what extent, the fishing vessels of such nation have tradi-tionally engaged in fishing in such fishery;

(vii) whether, and to what extent, such nation is cooperating with the United States in, and making substantial contributions to. fishery research and the identification of fishery resources; and

'(viii) such other matters as the Secretary of State, in cooperation with the Secretary,

deems appropriate. (5)(A) Subsection (i) is amended-

(i) by amending paragraph (3) to read as follows

"(3) Observers, while stationed aboard foreign fishing vessels, shall carry out such scientific, compliance monitoring, and other functions as the Secretary deems necessary or appropriate to carry out the purposes of this Act; and shall cooperate in carrying out such other scientific programs relating to the conservation and management of living resources as the Secretary deems appropriate."; and

(ii) by adding at the end thereof the follow-

ing new paragraph:

(6) If at any time the requirement set forth in paragraph (1) cannot be met because of insufficient appropriations, the Secretary shall, in implementing a supple-

mentary observer program:

"(A) certify as observers, for the purposes of this subsection, individuals who are citizens or nationals of the United States and who have the requisite education or experience to carry out the functions referred to

in paragraph (3);
"(B) establish standards of conduct for certified observers equivalent to those appli-

cable to Federal personnel;

"(C) establish a reasonable schedule of fees that certified observers or their agents shall be paid by the owners and operators of foreign fishing vessels for observer services; and

"(D) monitor the performance of observers to ensure that it meets the purposes of this Act.

(6) Such section is further amended by adding at the end thereof the following new

subsection:

- RECREATIONAL FISHING.-Notwith-(1) standing any other provision of this title, foreign fishing vessels which are not operat ed for profit may engage in recreational fishing within the fishery conservation zone and the waters within the boundaries of a State subject to obtaining such permits, paying such reasonable fees, and complying with such conditions and restrictions as the Secretary and the Governor of the State (or his designee) shall impose as being necessary or appropriate to insure that the fishing activity of such foreign vessels within such zone or waters, respectively, is consistent with all applicable Federal and State laws and any applicable fishery management plan implemented under section 305. The Secretary shall consult with the Secretary of State and the Secretary shall consult with the Secretary of State and the Secretary of the Department in which the Cost Guard is operating in formulating the conditions and restrictions to be applied by the Secretary under the authority of this subsection."
- (b) The amendments made by subsection (a)(1) and (5)(A)(ii) shall take effect January 1, 1984.

SEC. 3. FOREIGN FISHING PERMITS.

Section 204(b) (16 U.S.C. 1824(b)) is amended

(1) by inserting "hold" immediately before

'capacity" in paragraph (3)(B);

(2) by striking out "and shall be set forth under the name of each council to which it will be transmitted for comment" in that portion of paragraph (4) which precedes subparagraph (A);

(3) by striking out subparagraphs (B) and (C) of paragraph (4) and inserting in lieu

thereof the following:

(B) a copy of the application to the Secretary of the department in which the Coast Guard is operating; and

'(C) a copy or a summary of the application to the appropriate Council, upon its re-

quest."; and

(4) by striking out "After receipt of an application transmitted under paragraph (4)(B), each appropriate Council shall" in paragraph (5) and inserting in lieu thereof "After receiving a copy or summary of an application under paragraph (4)(C), the Council may".

SEC. 4. NATIONAL STANDARDS.

Section 301(b) (16 U.S.C. 1851(b)) is

amended to read as follows:

(b) The Secretary shall establish advisory guidelines (which shall not have the force and effect of law), based on the national standards, to assist in the development of fishery management plans.'

SEC. 5. REGIONAL FISHERY MANAGEMENT COUN-CIL ORGANIZATION AND FUNCTIONS

Section 302 (16 U.S.C. 1852) is amended as follows:

(1) Subsection (a) is amended—
(A) by striking out "pursuant to subsection (b)(1)(C)" each place it appears therein and inserting in lieu thereof "in accordance with subsection (b)(2)";

(B) by amending paragraph (6) by striking out "State)" and inserting in lieu thereof 'State, except that at least three shall be appointed from the State of California)";

(C) by amending paragraph (8) to read as follows

"(8) WESTERN PACIFIC COUNCIL.—The Western Pacific Fishery Management Council shall consist of the States of Hawaii, American Samoa, Guam, and the Northern Mariana Islands and shall have authority over the fisheries in the Pacific Ocean seaward of such States and of the Commonwealths. territories, and possessions of the United States in the Pacific Ocean area. The Western Pacific Council shall have 13 voting members, including 8 appointed by the Secretary in accordance with subsection (b)(2) (at least one of whom shall be appointed from each of the following States: Hawaii. American Samoa, Guam, and the Northern Mariana Islands)."

(2) Subsection (b) is amended-

(A) by amending paragraph (1)(C) to read as follows:

(C) The members required to be appointed by the Secretary in accordance with subsection (b)(2).

(B) by redesignating paragraphs (2) and (3) as paragraphs (3) and (4), respectively;

(C) by inserting immediately after paragraph (1) the following new paragraph:

"(2)(A) The members of each Council required to be appointed by the Secretary must be individuals who are knowledgeable or experienced with regard to the management, conservation, or recreational or commercial harvest of the fishery resources of the geographical area concerned.

"(B) The Secretary shall appoint the members of each Council from a list of individuals submitted by the Governor of each applicable constituent State. Each such list shall include the names and pertinent biographical data of not less than three individuals for each applicable vacancy. The Secretary shall review each list submitted by a Governor to ascertain if the individuals on the list are qualified for the vacancy on the basis of the required knowledge or experience required by subparagraph (A). If the Secretary determines that any individual is not qualified, he shall notify the appropriate Governor of that determination. The Governor shall then submit a revised list or resubmit the original list with an additional explanation of the qualifications of the individual in question.

"(C) Whenever the Secretary makes an appointment to a Council, he shall make a public announcement of such appointment not less than 45 days before the first day on which the individual is to take office as a member of the Council.";

(D) by striking out "pursuant to paragraph (1)(C)" in subsection (b)(3) (as redesignated by subparagraph (B)) and inserting in lieu thereof "by the Secretary in accordance with subsection (b)(2)"; and

(E) by adding at the end thereof the following new paragraph:

"(5) The Secretary may remove for cause any member of a Council required to be appointed by the Secretary in accordance with subsection (b)(2) if the Council concerned first recommends removal by not less than two-thirds of the members who are voting members. A removal recommendation of a Council must be in writing and accompanied by a statement of the reasons upon which the recommendation is based."

(3) Subsection (f)(6) is amended by inserting after the first sentence thereof the following new sentence: "The procedures of a Council, and of its scientific and statistical committee and advisory panels established under subsection (c), must be consistent

with the procedural guidelines set forth in subsection (i)(2).

(4) Subsection (h) is amended as follows: (A) Paragraph (1) is amended by inserting "that requires conservation and manage-ment" immediately after "authority".

(B) Paragraph (2) is amended by striking out "204(b)(4)(B)" and inserting in lieu

thereof "204(b)(4)(C)".

(C) Paragraph (3) is amended by inserting immediately before the semicolon at the end thereof the following: (and for purposes of this paragraph, the term 'geographical area concerned' may include an area under the authority of another council if the fish in the fishery concerned migrate into, or occur in, that area or if the matters being heard affect fishermen of that area; but not unless such other council is first consulted regarding the conduct of such hearings within its area)"

(D) Paragraph (4) is amended to read as

follows:

'(4) submit to the Secretary such periodic reports as the council deems appropriate, and any other relevant report which may be requested by the Secretary;"

(5) Such section is further amended by adding at the end thereof the following new

subsection:

(i) PROCEDURAL MATTERS.—(1) The Federal Advisory Committee Act (5 U.S.C. App. 1) shall not apply to the Councils or to the scientific and statistical committees or advisory panels of the Councils.

(2) The following guidelines apply with respect to the conduct of business at meetings of a Council, and of the scientific and statistical committee and advisory panels of a

Council

(A) Unless closed in accordance with paragraph (3), each regular meeting and each emergency meeting shall be open to the

(B) Emergency meetings shall be held at the call of the chairman of equivalent pre-

siding officer.

(C) Timely public notice of each regular meeting and each emergency meeting, including the time, place, and agenda of the meeting, shall be published in local newspapers in the major fishing ports of the Council's region (and in other major fishing ports having a direct interest in the affected fishery) and such notice may be given by such other means as will result in wide publicity. Timely notice of each regular meeting shall also be published in the Federal Register.

(D) Interested persons shall be permitted to present oral or written statements regarding the matters on the agenda at meet-

ings

(E) Minutes of each meeting shall be kept and shall contain a record of the persons present, an accurate description of matters discussed and conclusions reached, and

copies of all statements filed.

(F) Subject to the procedures established by the Council under paragraph (4), and the guidelines prescribed by the Secretary under section 303(d), relating to confidentiality, the administrative record, including minutes required under subparagraph (E), of each meeting, and records or other documents which were made available to or prepared for or by the Council, committee, or panel incident to the meeting, shall be available for public inspection and copying at a single location in the offices of the Council. "(3)(A) Each Council, scientific and statis-

tical committee, and advisory panel-

"(i) shall close any meeting, or portion thereof, that concerns matters or information that bears a national security classification: and

"(ii) may close any meeting, or portion thereof, that concerns matters or information that pertains to national security, employment matters, or briefings on litigation in which the council is interested;

and if any meeting or portion is closed, the Council, committee, or panel concerned shall publish notice of the closure in local newspapers in the major fishing ports within its region (and in other major, affected fishing ports), including the time and place of the meeting. Subparagraphs (D) and (F) shall not apply to any meeting or portion thereof that is so closed.

(4) Each Council shall establish appropriate procedures applicable to it and to its committee and advisory panels for ensuring the confidentiality of the statistics that may be submitted to it by Federal or State authorities, and may be voluntarily submitted to it by private persons; including but not limited to, procedures for the restriction of Council employee access and the prevention of conflicts of interest; except that such procedures must, in the case of statistics submitted to the Council by a State, be consistent with the laws and regulations of that State concerning the confidentiality of such statistics."

SEC. 6. CONTENTS OF PLANS.

Section 303 (16 U.S.C. 1853) is amended as follows

(1) Subsection (b) is amended—(A) by striking out "and" at the end of paragraph (6):

(B) by redesignating paragraph (7) as

paragraph (8); and

(C) by inserting immediately after paragraph (6) the following new paragraph:

'(7) assess and specify the effect which the conservation and management measures of the plan will have on the stocks of naturally spawning anadromous fish in the

(2) Subsection (c) is amended to read as follows:

"(c) Proposed Regulations.—The proposed regulations which the Council deems necessary or appropriate for purposes of carrying out a plan or amendment to a plan shall be submitted to the Secretary simultaneously with the plan or amendment for action by the Secretary under sections 304 and 305."; and

(3) Such section is amended by adding at the end thereof the following new subsec-

"(e) Data Collection Programs.-If a Council determines that additional information and data (other than information and data that would disclose proprietary or confidential commercial or financial information regarding fishing operations or fish processing operations) would be beneficial for the purposes of—
"(1) determining whether a fishery man-

agement plan is needed for a fishery; or

"(2) preparing a fishery management

the Council may request that the Secretary implement a data collection program for the fishery which would provide the types of information and data (other than information and data that would disclose proprietary or confidential commerical or financial information regarding fishing operations or fish processing operations) specified by the Council. The Secretary shall approve such a data collection program if he determines that the need is justified, and shall promulgate regulations to implement the program within 60 days after such determination is made. If the Secretary determines that the need for a data collection program is not justified, he shall inform the Council of the reasons for such determination in writing. The determinations of the Secretary under this subsection regarding a Council request shall be made within a reasonable period of time after he receives that request.

SEC. 7. ACTION BY SECRETARY.

(a) Section 304 (16 U.S.C. 1854) is amended as follows:

(1) Subsections (a) and (b) are amended to read as follows:

"(a) ACTION BY THE SECRETARY AFTER RE-CEIPT OF PLAN .- (1) After the Secretary receives a fishery management plan, or amendment to a plan, which was prepared by a Council (the date of receipt of which is hereafter in this section referred to as the receipt date'), the Secretary shall-

"(A) immediately commence a review of the management plan or amendment to determine whether it is consistent with the national standards, the other provisions of this Act, and any other applicable law;

"(B) immediately publish in the Federal Register a notice stating that the plan or amendment is available and that written data, views, or comments or interested persons on the plan or amendment may be submitted to the Secretary during the 75-day period beginning on the receipt date; and

"(C) by the 30th day after the receipt

date-

"(i) make such changes in the proposed regulations submitted for the plan or amendment under section 303(C) as may be necessary for the implementation of the plan, and

"(ii) publish such proposed regulations, including any changes made thereto under clause (i), in the Federal Register together with an explanation of those changes which

are substantive.

"(2) In undertaking the review required under paragraph (1)(A), the Secretary shall-

"(A) take account the data, views, and comments received from interested persons; "(B) consult with the Secretary of State with respect to foreign fishing; and

"(C) consult with the Secretary of the department in which the Coast Guard is operating with respect to enforcement at sea.

"(b)(1) A plan or amendment shall take effect and be implemented in accordance with section 305(c) if-

"(A) the Secretary does not notify the Council in writing of his disapproval, or partial disapproval, under paragraph (2), of the plan or amendment before the close of the 95th day after the receipt date; or

"(B) at any time subsequent to the 75th day after the receipt date and before such 95th day, the Secretary notifies the Council in writing that he does not intend to disap-prove, or partially disapprove, the plan or

amendment.

"(2) If after review under subsection (a) the Secretary determines that the plan or amendment is not consistent with the criteria set forth in paragraph (1)(A) of that subsection, the Secretary shall notify the Council in writing of his disapproval or partial disapproval of the plan or amendment. Such notice shall specify—

"(A) the applicable law with which the plan or amendment is inconsistent:

"(B) the nature of such inconsistency; and "(C) recommendations concerning the actions that could be taken by the Council to conform such plan or amendment to the requirements of applicable law.

"(3)(A) If the Secretary disapproves, or partially disapproves, a proposed plan or amendment under paragraph (2), the Council may submit a revised plan or amendment, accompanied by appropriately revised proposed regulations, to the Secretary.

"(B) After the Secretary receives a revised plan or amendment under subparagraph (A) or (C)(ii), the Secretary shall immediately—

"(i) commence a review of the plan or amendment to determine whether it complies with the criteria set forth in subsection (a)(1)(A);

"(ii) publish in the Federal Register a notice stating that the revised plan or amendment is available and that written data, views, or comments of interested persons on the plan or amendment may be submitted to the Secretary during the 30-day period beginning on the date (hereinafter in this paragraph referred to as the 'revised receipt date') the plan or amendment was submitted to the Secretary under subparagraph (A) or (C)(ii); and

"(iii) review the revised proposed regulations, if any, submitted by the Council and make such changes to them as may be necessary for the implementation of the plan, and thereafter publish such revised proposed regulations (as so changed) in the Federal Register together with an explanation of each of such changes that is substan-

tive.

"(C)(i) Before the close of the 60th day after the revised receipt date, the Secretary, after taking into account any data, views, or comments received under subparagraph (B)(ii), shall complete the review required under subparagraph (B)(i) and determine whether the plan or amendment complies with the criteria set forth in subsection (a)(1)(A). If the Secretary determines that a plan or amendment is not in compliance with such criteria, he shall immediately notify the Council of his disapproval of the plan or amendment.

"(ii) After notifying a Council of disapproval under clause (i), the Secretary shall promptly provide to the Council a written statement of the reasons on which the disapproval was based and advise the Council that it may submit a further revised plan or amendment, together with appropriately revised proposed regulations, for review and determination under this paragraph.

"(D) A revised plan or amendment shall take effect and be implemented in accordance with section 305(c) if the Secretary does not notify the Council, in writing, by the close of the 60th day after the revised receipt date of his disapproval of the plan or amendment."

(2) Subsection (c)(1) is amended—

(A) by amending paragraph (1)-

(i) by amending subparagraph (B) to read a follows:

"(B) the Secretary disapproves or partially disapproves any such plan or amendment, or disapproves a revised plan or amendment, and the Council involved fails to submit a revised or further revised plan or amendment, as the case may be.", and

(ii) by adding immediately after the last sentence thereof the following flush sen-

tence

"The Secretary shall also prepare such proposed regulations as he deems necessary or appropriate to carry out each plan or amendment prepared by him under this paragraph,"; and

(B) by amending paragraph (2) to read as

follows:

"(2)(A) Whenever, under paragraph (1), the Secretary prepares a fishery management plan or amendment, the Secretary shall immediately"(i) submit such plan or amendment, and proposed regulations to implement such plan or amendment, to the appropriate Council for consideration and comment;

"(ii) publish in the Federal Register a notice stating that the plan or amendment is available and that written data, views, or comments of interested persons on the plan or amendment may be submitted to the Secretary during the 75-day period beginning on the date the plan or amendment was submitted under clause (i); and

"(iii) by the 30th day after the date of submission under clause (i), submit for publication in the Federal Register the proposed regulations to implement the plan or

amendment

"(B) The appropriate council must submit its comments and recommendations, if any, regarding the plan or amendment to the Secretary before the close of the 75-day period, referred to in subparagraph (A)(ii). After the close of such 75-day period the Secretary, after taking into account any such comments and recommendations, as well as any views, data, or comments submitted under subparagraph (A)(ii), may implement such plan or amendment under section 2056.0"

(3) Subsection (d) is amended by striking out the last sentence and inserting in lieu thereof the following: "The Secretary may enter into a cooperative agreement with the States concerned under which the States administer the permit system and the agreement may provide that all or part of the fees collected under the system shall accrue to the States. The level of fees charged under this subsection shall not exceed the administrative costs incurred in issuing the permits."

(b) The amendments made by subsection (a) shall only apply with respect to fishery management plans and amendments thereto that are initially submitted to the Secretary of Commerce on or after the date of the enactment of this Act for action under section 304

SEC. 8. IMPLEMENTATION OF PLANS.

Section 305 (16 U.S.C. 1855) is amended as follows:

(1) Subsections (a) and (b) are repealed.
(2) Subsection (c) is amended to read as follows:

"(c) IMPLEMENTATION.—The Secretary shall promulgate each regulation that is necessary to carry out a plan or amendment—

"(1) within 110 days after the plan or amendment was received by him for action under section 304(a), if such plan or amendment takes effect under section 304(b)(1);

"(2) within 75 days after a revised plan or amendment was received by him under section 304(b), if such plan or amendment takes effect under paragraph (3)(D) of such section; or

"(3) within such time as he deems appropriate in the case of a plan or amendment prepared by him under section 304(c).".

(3) Subsection (e) is amended to read as

follows:

"(e) EMERGENCY ACTIONS.—(1) If the Secretary finds that an emergency exists involving any fishery, he may promulgate emergency regulations necessary to address the emergency, without regard to whether a fishery management plan exists for such fishery.

"(2) If a Council finds that an emergency exists involving any fishery within its jurisdiction, whether or not a fishery management plan exists for such fishery—

"(A) the Secretary shall promulgate emergency regulations under paragraph (1) to

address the emergency if the council, by unanimous vote of the members who are voting members, requests the taking of such action; and

"(B) the Secretary may promulgate emergency regulations under paragraph (1) to address the emergency if the Council, by less than a unanimous vote, requests the taking of such action.

"(3) Any emergency regulation which changes any existing fishery management plan or amendment shall be treated as an amendment to such plan for the period in which such regulation is in effect. Any emergency regulation promulgated under this subsection-

"(A) shall be published in the Federal Register together with the reasons therefor;

"(B) shall remain in effect for not more than 90 days after the date of such publication, except that any such regulation may, by agreement of the Secretary and the Council, be promulgated for one additional period of not more than 90 days; and

"(C) may be terminated by the Secretary at an earlier date by publication in the Federal Register of a notice of termination, except for emergency regulations promulgated under paragraph (2) in which case such early termination may be made only upon the agreement of the Secretary and the council concerned."

Subsection (f) is repealed.

(5) Such section is further amended by adding at the end thereof the following new subsection:

"(h) EFFECT OF CERTAIN LAWS ON CERTAIN TIME REQUIREMENTS.—The Paperwork Reduction Act of 1980 (44 U.S.C. 3501 et seq.), the Regulatory Flexibility Act (5 U.S.C. 601 et seq.), and Executive Order Numbered 12291, dated February 17, 1981, shall be complied with within the time limitations specified in subsection (c) or section 304 (a) and (b) as they apply to the functions of the Secretary under such provisions."

SEC. 9. STATE JURISDICTION. Section 306(a) (16 U.S.C. 1856(a)) is amended by inserting immediately after the first sentence thereof the following new sentence: "For purposes of this Act, except as provided in subsection (b), the jurisdiction and authority of a State shall extend (1) to any pocket of waters that is adjacent to the State and totally enclosed by lines delimit-ing the territorial sea of the United States pursuant to the Geneva Convention on the Territorial Sea and Contiguous Zone or any successor convention to which the United States is a party and (2) with respect to the body of water commonly known as Nantucket Sound, to the pocket of water west of the seventieth meridian west of Greenwich.". SEC. 10. SUBPENA POWER.

Section 308 (16 U.S.C. 1858) is amended by adding at the end thereof the following new subsection:

"(e) SUBPENAS.-For the purposes of conducting any hearing under this section, the Secretary may issue subpenas for the attendance and testimony of witnesses and the production of relevant papers, books, and documents, and may administer oaths. Witnesses summoned shall be paid the same fees and mileage that are paid to witnesses in the courts of the United States. In case of contempt or refusal to obey a subpena served upon any person pursuant to this subsection, the district court of the United States for any district in which such person is found, resides, or transacts business, upon application by the United States and after notice to such person, shall have jurisdiction to issue an order requiring such person to appear and give testimony before the Secretary or to appear and produce documents before the Secretary, or both, and any failure to obey such order of the court may be punished by such court as a contempt thereof.".

SEC. 11. OFFENSES.

(a) Section 309(b) (16 U.S.C. 1859(b)) is amended by striking out ", or imprisonment for not more than 1 year, or both"

(b) The amendment made by subsection (a) applies with respect to offenses committed under section 309 on or after the date of the enactment of this Act.

SEC. 12. CIVIL FORFEITURES.

Section 310(a) (16 U.S.C. 1860(a)) is amended by inserting "(or the fair market value thereof)" immediately after "fish" each place it appears.

SEC. 13. POWERS OF AUTHORIZED OFFICERS.

Section 311(b) (16 U.S.C. 1861(b)) is amended-

(1) by inserting "(1)" immediately before

"Any officer";
(2) by redesignating paragraphs (1), (2), and (3) as subparagraphs (A), (B), and (c), respectively;

(3) by redesignating subparagraphs (A), (B), (C), (D), and (E) as clauses (i), (ii), (iii), (iv), and (v), respectively; and

(4) by adding at the end therof the follow-

ing new paragraph:

"(2) Subject to the direction of the Secretary, a person charged with law enforcement responsibilities by the Secretary who is performing a duty related to enforcement of a law regarding fisheries or other marine resources may make an arrest without a warrant for an offense against the United States committed in his presence, or for a felony cognizable under the laws of the United States, if he has reasonable grounds to believe that the person to be arrested has committed or is committing a felony. The arrest authority described in the preceding sentence may be conferred upon an officer or employee of a State agency, subject to such conditions and restrictions as are set forth by agreement between the State agency, the Secretary, and, with respect to enforcement operations within the fishery conservation zone, the Secretary of the de-partment in which the Coast Guard is operating.".

SEC. 14. AUTHORIZATION OF APPROPRIATIONS.

(a) Section 406 (16 U.S.C. 1882) is amended by adding at the end thereof the following new paragraphs. '(9) \$59,000,000 for the fiscal year ending

September 30, 1983.

(10) \$64,000,000 for the fiscal year ending September 30, 1984.

(11) \$69,000,000 for the fiscal year ending

September 30, 1985."

(b)(1) Subsection (c) of the first section of the Anadromous Fish Conservation Act (16 U.S.C. 757a(c)) is amended-

(A) by inserting "(1)" immediately before "Whenever"; and

(B) by adding at the end thereof the following new paragraph:

"(2) In the case of any State that has implemented an interstate fisheries management plan for anadromous fishery resources, the Federal share of any grant made under this section to carry out activities required by such plan shall be 90 percent."

(2) Section 4(a) of the Anadromous Fish Conservation Act (16 U.S.C. 757d(a)) is amended by adding after paragraph (3) the

following new paragraph:

"(4) \$7,500,000 for each of fiscal years 1983, 1984, and 1985.".

(3) The first sentence of section 7(d) of the Anadromous Fish Conservation Act (16 U.S.C. 757g(d)) is amended by striking out "and" after "1981,", and by inserting immediately before the period the following: " and not to exceed \$1,000,000 for each of the fiscal years ending September 30, 1983, and September 30, 1984".

SEC. 15. TECHNICAL AMENDMENTS.

(a) Section 3(27) (16 U.S.C. 1802(27)) is amended to read as follows:

"(27) The term 'vessel of the United States' means-

"(A) any vessel documented under the laws of the United States;

(B) any vessel numbered in accordance with the Federal Boat Safety Act of 1971 (46 U.S.C. 1400 et seq.) and measuring less than 5 net tons; or

"(C) any vessle numbered under the Federal Boat Safety Act of 1971 (46 U.S.C. 1400 et seq.) and used exclusively for pleasure.

(b) Section 307(2) (16 U.S.C. 1857(2)) is amended-

(A) by amending subparagraph (A) to read as follows:

"(A) in fishing within the boundaries of any State, except recreational fishing permitted under section 201(j);"; and

(B) by striking out "in fishing" in sub-paragraph (B) and inserting in lieu thereof in fishing, except recreational fishing permitted under section 201(j),".

(c) The last sentence of section 311(a) (16

U.S.C. 1861(a)) is repealed.

(d) Section 8 of the Central, Western, and South Pacific Fisheries Development Act (16 U.S.C. 758e-5) is amended by striking out "and 1982" and inserting in lieu thereof "1982, 1983, 1984, and 1985".

Mr. JONES of North Carolina (during the reading). Mr. Speaker, I ask unanimous consent that the amendment in the nature of a substitute be considered as read and printed in the RECORD.

The SPEAKER pro tempore. there objection to the request of the gentleman from North Carolina?

There was no objection.

The SPEAKER pro tempore. The gentleman from North Carolina (Mr. Jones) is recognized for 1 hour.

Mr. JONES of North Carolina. Mr. Speaker, I yield myself such time as I

may consume.

Mr. Speaker, in addition to reauthorizing the Fishery Conservation and Management Act (FCMA) for a 3-year period, H.R. 5002 is designed to streamline the process by which fishery management plans are prepared, approved, and implemented. The bill before us is the result of a long and careful series of oversight hearings before our subcommittee on fisheries and wildlife conservation and the environment during the last Congress

In 1976, with the passage of the FCMA, the Merchant Marine and Fisheries Committee began the process of revitalizing the American fishing industry and returning it to its proper rank among the world's fishing nations. Under the FCMA, which is better known as the 200-mile fishery conservation zone law, we have made progress. There is still a long way to go, however, before our country regains its past standing as a leader among fishing nations and assumes its full role in the development and utilization of one-fifth of the world's fishery resources which lie within 200 miles of our shores.

As is the case with most major laws, the passage of time brings to light those areas which were overlooked as well as deficencies in the process set up to administer the law's provisions. Two years ago, passage of the American Fisheries Promotion Act strengthened the existing law through provisions designed to eliminate trade barriers and create new markets for U.S. fishermen. H.R. 5002 is another step in the same direction as well as an effort to tighten up the administrative procedures under the act to assure efficient and effective management of our fisheries.

Mr. Speaker, the bill under consideration is a committee substitute for that which was reported last May but its purposes have not changed. Since the authorizations under the act expired on September 30 and given the short time remaining in this Congress, this substitute is an effort to find common ground with the Senate and expedite enactment.

The committee amendment to H.R. 5002 has the following features:

It directs that governing international fishing agreements entered into by the United States with foreign countries make clear that U.S. observers be permitted on foreign fishing vessels at the expense of the vessel owner or operator.

It directs the Secretary of State to release foreign fishing allocations but provides that he should hold back at least one-half of each foreign nation's fishing allocation until he determines that such nation is complying with U.S. fisheries policy. Among the factors he must consider are:

First, whether the foreign nation imposes tariffs or nontariff barriers or other restrictions on the importation

of U.S. fish:

Second, whether that country is purchasing fish from U.S. processors or fishermen:

Third, whether that nation and its fleet cooperate in the enforcement of U.S. fishing regulations;

Fourth, whether that nation requires fish from our 200-mile zone for its domestic consumption;

Fifth, whether that nation is contributing to the growth of the U.S. fishing industry by minimizing gear conflicts and transferring technology beneficial to the U.S. fishing industry.

I might note that the amendment drops an earlier prohibition against the Secretary of State denying foreign fish allocations for solely political rea-

The amendment takes note of the fact that the U.S. observer program on foreign fishing vessels in our 200-mile zone has never been fully implemented because of insufficient appropriations. Without 100 percent observer coverage, foreign fishing vessels will continue to be able to underreport their catch with little fear of detection and penalty. This disadvantages U.S. fishermen, depletes our fisheries resources, and forces us to divert Coast Guard funding and resources to fisheries law enforcement. Having a U.S. observer on board is by far the most efficient enforcement tool we could employ. Our committee originally designed the observer program to be of no expense to the taxpayers because we anticipated that the foreign fishing vessels would reimburse the Treasury for the cost of the observers. Unfortunately, we cannot collect fees from the foreigners higher than the amount actually appropriated by Congress and Congress has thus far chosen not to appropriate a sufficient amount for 100 percent observer coverage. Therefore, the bill today provides that if appropriations are insufficient, a supplemental financing system would go into effect. This system will require that foreign fishing vessels pay Government-certified U.S. observers directly.

The bill clarifies that foreign fishing vessels from countries with which we do not a GIFA can participate in recreational fishing tournaments within the 200-mile zone under certain condi-

tions.

It clarifies the procedure for the Secretary of Commerce to appoint members of the regional fishery councils.

The bill makes clear that the Federal Advisory Committee Act does not apply to regional councils and instead sets up detailed procedures for the councils to follow in conducting their

meetings.

The time required for secretarial review and approval of the management plans will be shortened to 95 days. There are additional time constraints specified if the Secretary rejects a council's proposed management plan and the council subsequently submits a revised plan. Regulations to implement a plan must be approved by the Secretary within 110 days. These changes should eliminate the long delays previously encountered by the regional councils in seeking approval and implementation of management plans.

The bill permits duly authorized officials enforcing the Federal Fishery laws to make arrests for other U.S. felony violations which he discovers during the course of his fisheries en-

forcement.
The committee amendment provides authorizations of \$59 million for fiscal 1983; \$64 million for fiscal 1984; and \$69 million for fiscal 1985.

The bill also incorporates much of the substance of H.R. 5663, the Anadromous Fish Conservation Act previously approved in this House on June 8, 1982. It does reduce the reauthorization of the section 7 emergency striped bass study to \$1 million annually for 2 years rather than 3. It also set the State grants authorization \$7,500,000 annually for 3 years and encourages States to participate in interstate management for these fish by increasing the Federal share for grants to States who do so participate.

I might note that several items in the bill originally reported from committee have been dropped. These in-

clude:

First, an effort to reduce the per diem compensation for members of the regional councils.

Second, a proposed buy-back system in the event a council sets up a limited entry system for a particular fishery.

Third, efforts to exempt the councils from the Paperwork Reduction Act, the Regulatory Flexibility Act and Executive Order 12291.

H.R. 5002, as amended, will aid in our efforts to promote our United States fishing industry by providing for better management, utilization and protection of our resources within our 200-mile zone.

I urge its enactment.

Mr. FORSYTHE. Mr. Speaker, will the gentleman yield?

Mr. JONES of North Carolina. I yield to the gentleman from New Jersey.

Mr. FORSYTHE. Mr. Speaker, the Fishery Conservation and Management Act (FCMA) was signed into law on April 13, 1976. The purpose of this historic act was to provide for the conservation and management of important fishery resources found off the coasts of the United States. The significance of this legislation can be appreciated by considering the state of the fishing industry and of the fisheries themselves in the 20 years which preceded enactment of this legislation. During that period world fish production multiplied more than threefold, from 20 million metric tons to approximately 72.4 million metric tons, yet the U.S. share of the catch hovered between 2 and 2.2 million metric tons. While the U.S. harvest of fish remained relatively stable, other nations with large and efficient fleets-many of which were subsidized-substantially increased the amount of fish harvested off our coasts. This situation led to the overfishing of at least 10 major commercial stocks and caused serious economic consequences for the U.S. industry.

As a means of mitigating this overfishing and of achieving the objective of effectively conserving fishery resources, the FCMA established a 197mile fishery conservation zone adjacent to the 3-mile territorial sea. Ap-

proximately 20 percent of the world's fishery resources are contained within this 200-mile zone. The act also provided for the creation of eight regional fishery management councils which have the responsibility of developing fishery management plans. These plans identify, for each fishery, the optimum yield which could be harvested annually, the U.S. harvest, the total allowable level of foreign fishing, and the management rules governing foreign and domestic harvests. The Secretary of Commerce is responsible for the review and approval of each plan and the Secretary of State, in consultation with the Secretary of Commerce, is charged with the responsibility of allocating, among foreign nations, the surplus fish not harvested by U.S. fishermen.

More than 6 years have elapsed since this statute took effect and there can be no doubt that the act has been enormously successful in achieving its objectives. Species of fish which were considered overfished have begun to recover. The U.S. harvest has begun to increase and coastal economies which became depressed because of foreign overfishing have begun to rebound as the U.S. harvesting and processing industry gains strength.

While great strides have been made, the experience of the past 6 years has taught us that improvements can be made. The process by which fishery management plans have been developed and approved has become too cumbersome. The regional councils frequently take more than a year to develop a management plan. Once the plan is developed, the Secretary of Commerce hardly ever complies with the statutory time limit in which he must approve or disapprove the plan.

Not all the blame for this situation can be heaped upon the regional councils or the Secretary. For example, one of the major reasons for the delay in council deliberations is that the council often lacks the necessary information to determine whether a fishery needs management and what form that management should take. To remedy this, H.R. 5002 establishes a mechanism for implementing special research plans which can be used to gather the necessary data. Gathering this data in advance of the time in which a management plan is actually needed will speed the process and allow for swifter reaction to the conservation needs of the resource.

Once a management plan is developed and submitted to the Secretary of Commerce for review, it takes an inordinately long period of time for the Secretary to finally act. Part of the problem stems from the fact that statutes unrelated to fisheries conservation—the Regulatory Flexibility Act, the Paperwork Reduction Act, and Executive Order 12291—impose require-

ments which consume vast amounts of time. I support applying regulatory and economic impact analyses to fishery management plans because these plans clearly affect U.S. businessmen. However, the need to conserve the resource must be paramount, and compliance with these requirements can result in fisheries remaining unmanaged while the requisite economic and regulatory analyses are completed. The biological needs of the resource should not wait for these analyses to be completed. For this reason, H.R. 5002 requires the Secretary to approve or disapprove a fishery management plan within a specified number of days. While the Executive order and the other statutes will apply to the review process, H.R. 5002 makes it clear that the requirements of these statutes and Executive order must be complied with within the same period.

H.R. 5002 also seeks to expedite the process by which regulations to implement fishery management plans are prepared and considered by requiring that every plan must be accompanied by draft regulations when the plan is submitted for review. Consideration and approval of these regulations are placed on the same fast time track that consideration of the plan itself is placed on. Thus, shortly after the plan is approved, the regulations can be implemented and the plan given force

and effect.

H.R. 5002 does not stop with the housekeeping type of amendments necessary to make the FCMA work more effectively. The legislation before us today also recognizes that there is a clear relationship between the management of a fishery and the pace at which the U.S. fishing industry expands its harvest. We have learned from the past 6 years that if a foreign nation can satisfy its market demand by harvesting fish from the U.S. zone, then there is no market for U.S.-harvested product. To remedy this, H.R. 5002 puts additional teeth in the fish-and-chips policy. The teeth are in the form of amendments to section 201(E) which direct the Secretary of State to withhold at least 50 percent of each nation's allocation until it is determined that the nation is complying with any agreements it made.

In implementing this section, the Secretary of State shall determine the aggregate amount of the total allowable level of foreign fishing which would otherwise be allocated to each foreign nation. This determination will be made by using the FCMA fish-and-chips policy. After determining the initial aggregate allocation, the Secretary may release no more than 50 percent of the aggregate and could withhold up to 99.9 percent if he determines that withholding this allocation would be in the best interests of the U.S. fishing industry or if the foreign nation involved is not abiding by

agreements it has made pursuant to the fish-and-chips policy. Subsequent releases of allocations would be subject to scrutiny to determine whether the nation involved is complying with any agreements it has made and whether the release would be in the best interests of the U.S. fishing indus-

In addition to these changes, H.R. 5002 offers an alternative way in which the observer program can be implemented under the FCMA. Currently, each foreign vessel fishing within the Fishery Conservation Zone must have a U.S. observer on board. These observers are Federal employees and are funded by fees paid by the foreign nation. This program is subject to appropriations; unfortunately, the observer program has never received the funding necessary to provide an adequate level of observer coverage. Therefore, H.R. 5002 provides an alternative mechanism for implementing 100 percent observer. H.R. 5002 accomplishes this by providing that no foreign fishing vessel operating under the FCMA may receive a permit to fish in the Fishery Conservation Zone unless the vessel owner or operator agrees to have on board the U.S. observer and will pay for that observer. Although the observer would perform such functions as are assigned by the Secretary of Commerce, the observer would not be a Federal employee. The observer would be an employee of a private firm or university or other entity and will be someone who is certified by the secretary as having the education and the experience to perform the functions of an observer. Foreign vessels will not pay the U.S. Government for the observer but will pay the private firm which is providing the certified observer on a contract or other basis.

H.R. 5002 also reorganizes the observer program established under the Atlantic Tunas Convention Act. Under that statute, foreign vessels fishing for tuna within the U.S. zone must have a U.S. observer on board if the vessel will incidentally take billfish. Since these vessels are incidentally taking billfish, they are required pursuant to both the FCMA and the Atlantic Tunas Convention Act to have a U.S. observer on board. H.R. 5002 repeals the observer langauge of the Atlantic Tunas Convention Act because it is superfluous to the FCMA. It is clear that under the FCMA, as amended by H.R. 5002, any fishing vessel receiving a permit under the FMCA must have an observer. Since the class of vessels currently fishing for tuna within the FCZ must have a billfish permit, these vessels must have an observer pursuant to section 201(i) of the FCMA.

Mr. Speaker, H.R. 5002 will significantly improve the operation of the Fishery Conservation and Management Act by overcoming those proce-

dural problems which have hampered the development and implementation of fishery management plans, by removing some of the restrictions which have been imposed on the internal operations of the regional fishery management councils, and by clarifying the relationship between fishery management and fishing industry development. I urge my colleagues to adopt this important measure.

Mr. JONES of North Carolina. Mr. Speaker, I have no further requests

for time.

The SPEAKER pro tempore. The question is on the amendment in the nature of a substitute offered by the gentleman from North Carolina (Mr. JONES).

The amendment in the nature of a substitute was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

# MODIFICATION OF NORTH AMERICAN CONVENTION TAX RULES

Mr. STARK. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 3191) to amend the Internal Revenue Code of 1954 to exempt conventions, et cetera, held on cruise ships documented under the laws of the United States from certain rules relating to foreign conventions.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from California (Mr. STARK).

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. PRENZEL. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 326, nays 26, not voting 81, as follows:

So the motion was agreed to. The result of the vote was announced as above recorded.

#### IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill, H.R. 3191, with Mr. WHITE in the

The Clerk read the title of the bill. The CHAIRMAN. Pursuant to the rule, the first reading of the bill is dis-

The gentleman from California (Mr. STARK) will be recognized for 30 minutes, and the gentleman from Tennessee (Mr. Duncan) will be recognized for 30 minutes.

The Chair recognizes the gentleman from California (Mr. STARK).

Mr. STARK. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, H.R. 3191 would exempt conventions and similar meetings held on cruise ships documented under the laws of the United States from certain rules relating to foreign conventions.

Currently, the Internal Revenue Code flatly disallows all deductions for the expenses of attending conventions, seminars, and similar meetings on cruise ships. This automatic disallowance of deductions has effectively conventions eliminated on cruise ships, even those that fly the U.S. flag. Permitting a deduction for attending conventions on U.S.-flag cruise ships would make them competitive with U.S. hotel facilities and create jobs in the cruise ship industry.

Mr. Chairman, much has been said about this bill, and if I may at this time, I would like to clear up some confusion. The bill in effect creates no new tax deductions. Under present law, the expenses of attending a seminar or business meeting held in a hotel or at a resort in the North American area are deductible to the same extent as other business expenses. This bill would allow deductions for the expenses of those meetings held on one of presently four operating ships, two cruising in the waters around the Hawaiian islands, one on the Mississippi River, and one on the west coast of California, provided that taxpayers meet not only all of the reporting requirements of present law and regulations, but also the new, more stringent reporting requirements imposed by this bill.

It is a strange situation that a convention can be held in Mexico or Canada or Jamaica, in a hotel owned by non-U.S. citizens and staffed by non-U.S. employees, and the expenses of attending that convention would qualify for a tax deduction. But, put it on a U.S.-flag ship, manned by U.S. citizens who are U.S. seamen, and the expenses would not be deductible. That is the inequity which we are trying to correct today.

This would involve a negligible revenue loss to the Treasury, and would correct an inequity which has existed since the convention laws changed by the Ways and Means Committee and the House of Representatives several ago.

H.R. 3191 allows business deductions for the expenses of attending meetings on U.S-flag cruise ships, but only if the taxpayer establishes the direct relation between the cruise meeting and the taxpayer's business, and only if all ports of call of the cruise are in the North American area, which includes the United States, our possessions and territories, Canada, and Mexico. The bill includes special reporting requirements for taxpayers seeking to deduct cruise meeting expenses. If the ship calls on a port outside the North American area, no deduction is available. Expenses for meetings on foreign-flag cruise ships remain nondeductible. It is estimated that the bill will have a negligible effect on budget receipts.

H.R. 3191 was the subject of hearings by the Subcommittee on Select Revenue Measures, and was unanimously reported by the subcommittee. On September 16, 1982, the Committee on Ways and Means favorably reported the bill to the House. H.R. 3191 was considered by the House on Monday, December 13, 1982, on the Suspension Calendar. At that time, a majority of the House supported this bill. However the bill failed to obtain the necessary two-thirds vote for passage.

Mr. Chairman, I urge the House to once again support H.R. 3191.

Mr. Chairman, I reserve the balance of my time.

Mr. DUNCAN. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I again rise in support of H.R. 3191. Currently, the Internal Revenue Service could deny any tax deduction for expenses incurred in attending a convention that is held on cruise ships. H.R. 3191 provides a limited exception to the rule, and would allow tax deductions on cruise ships for attending a convention on a cruise ship. These cruise ships must be documented under the laws of the United States, and all the ports of call are within North America.

Earlier this week the House considered H.R. 3191, and a majority of the Members voted for it, 219-164. However, this did not provide the necessary two-thirds vote. As the chairman of the subcommittee has indicated, this bill has been misunderstood and has caused some confusion among some of our colleagues. I would like to quote part of a letter regarding this bill from the Department of Defense, which says:

The Department of the Navy, on behalf of the Department of Defense, enthusiastically supports the enactment of H.R. 3191. This legislation would substantially aid the revival of U.S.-flag passenger shipping by removing the disincentive that has prevented businesses from holding conventions aboard cruise liners.

This in turn will provide the Navy with auxiliary vessels for hospital ship conversion or troop carriage on very short notice.

# □ 1530

And also, if the Members will read on page 6 of the report the letter from the Congressional Budget Office, they indicate that this bill does not provide any new budget authority or any new or increased expenditures.

I say again that a lot of people think that this involves only ships on the high seas. It does not. It involves ships in areas of our country, the *Mississippi Queen*, the *Delta Queen*, and ships throughout Louisiana, Mississippi, Arkansas, Tennessee, and Kentucky.

Mr. Chairman, I strongly urge the adoption of this bill.

Mr. Chairman, I yield such time as he may consume to a fine member of the Committee on Ways and Means, the gentleman from Minnesota (Mr. Frenzel).

Mr. FRENZEL. Mr. Chairman, going briefly into the history of the "Love Boat" law which antedates my time on the Ways and Means Committee, this sort of convention expense was declared to be not deductible as a business expense because of what seemed to be abuses of conventioneering. Those abuses were called to the atten-

tion of the Ways and Means Committee.

Prime among them happened to be cruises in the Aegean Sea by certain medical groups which turned out to be far more recreational than inclined toward professional development. This Congress has maintained that nondeductibility on conventions afloat ever since.

To be sure, this bill is reasonably restrictive. It applies apparently to only four vessels, and those vessels have to be making calls in American ports or in ports of American possessions. I suppose if it is passed, it is not going to be a grievous wound in our tax system.

Nevertheless, I think there may be a number of Members of Congress who, like myself, feel that cruising is not necessarily conducive to good business education or professional development, and that there may be other places where these conventions and seminars could take place, where the expenses are currently deductible, where the participants might get more good out of them than they would get afloat. It will be hard to convince my constituents that cruising should be deductible, especially when they are paying big heating bills this winter.

I think if we want to give a subsidy to our maritime operation or if we want to do something good for the maritime unions, we should use more direct ways such as appropriations, rather than literally dipping into the funds that are provided by the general taxpayers. We are, of course, providing an exemption, which means that the rest of the taxpayers have to pay a little more.

My best judgment, Mr. Chairman, is that this is probably not the most important bill that will come before this body this year, and that even if it is passed, it will move forward to an uncertain future in the other body.

Nevertheless, I think there may be many Members like myself who will be unable to explain such special privileges to their constituents, and who consequently will feel obliged to vote against it.

Mr. STARK. Mr. Chairman, I yield 3 minutes to the gentleman from Hawaii (Mr. HEFTEL).

Mr. HEFTEL. Mr. Chairman, this bill is one of equity or fairness. It simply says that if a convention, a seminar, or a conference is going to be held, it can be held at its option in a hotel or on a ship. It so happens in this instance that there are only four ships that could qualify because America only has four ships.

It is interesting to note that one can have a tax deductibility for a conference held in Canada, in Mexico, or in Jamaica with employees who are not U.S. citizens, in a hotel owned by non-u.S. citizens, but one cannot have a tax deduction when that same confer-

ence is held on a ship owned by Americans and manned by American employees.

As to the concept of luxury which has been brought up, it is interesting to note that this really got my attention in Hawaii when the president of the State Teachers Association said to me, "I don't understand our tax laws, We planned our yearly conference on one of the ships that are now sailing between the Islands of Hawaii" there were two then sailing-"only to find we can't do that. We must hold it in a hotel because it won't be deductible on a ship." So those teachers held their conference in a hotel. Now, that does not make good sense. It is not good tax law. It is not good economic policy. And the two ships the gentleman from California (Mr. STARK) alluded to that are sailing among the Hawaiian Islands are not sailing. One is in port; the other sails part of the time. If we do not pass the legislation. neither ship will sail, and 900 American citizens will not work. That does not make good sense.

Mr. Chairman, I hope we will let good sense prevail and not let the word, "cruise," stop our intellect from working.

Mr. STARK. Mr. Chairman, I yield 3 minutes to the gentleman from New Jersey (Mr. Guarini).

Mr. GUARINI. Mr. Chairman, I am very pleased that we are having this debate. I welcome it because there has been a great deal of misinformation, misconceptions, and misimpressions.

This is indeed a good bill. It will be a good law. It will do equity, and will present an evenhanded application of our tax law between the land-based hotels and the sea-based hotels, which is what passenger ships really are.

The point we are actually addressing here, bottom line, is American ships, carrying American flags, with American workers, going between American ports and providing a place for conventions in North America, which our convention laws allow at this point of time.

Before January 1, 1981, we always permitted tax deductions for conventions, seminars, and meetings aboard cruise ships. It was only through an oversight or perhaps an omission in the 1980 modification tax laws concerning cruises that we happened to inadvertently omit cruise ships carrying our American flag.

We hear a great deal about the perception that "it doesn't play in Peoria" and "Love Boat," et cetera. I hope that we do not pass our laws by slogans. I hope we go by what is right and fair. I hope we have the conviction and the courage to be able to vote for this bill regardless of how it is going to "play back in Peoria," because it is a just bill.

I believe the importance of this bill is that we have a bill here that does tax equity, one that is equitable and evenhanded, a business allowance that always existed before, and one that gives Americans employment. It will not cost the Government any tax dollars whatsoever because if one did not go to a convention in a particular location, they would have gone someplace else. So it makes no difference from a tax loss standpoint.

Mr. Speaker, I want to mention another salient point. The Department of Defense, and the Department of the Navy enthusiastically support this bill because our military services remember quite well what happened, and they point out what happened, with the Queen Elizabeth II and the Canberra when England had the Falkland Islands crisis and the conversion into Islands crisis and the conversion into the deployment of large numbers of

men and equipment.

Today, we have only four ships left from a proud fleet. New York, which used to be a very important harbor for passenger ships, no longer depends on any passenger ships. We must rebuild our fledgling fleet. It is very critical for national defense, and it is important as well to be fair and not discriminate against our shipping industry which needs our help. By excluding conventions in our tax laws while including hotels, we are indeed discriminating.

We presently have 1,200 people employed, and one of the 4 ships that were mentioned in Hawaii—I believe it is the Constitution—may well be out of business in 6 months; 300 people will be laid off. Then, our Nation will be down to 3 ships should we not pass this bill. So I think it is very, very essential for jobs for rebuilding our passenger fleet, and for the equitable ad-

ministration of our Tax Code.

Mr. Chairman, let me leave the Members with one last thought. There are many Members on the other side of the aisle, especially those who have spoken against the bill, who are interested in passing the CBI, the Caribbean Basin initiative, which will be coming up for vote tomorrow. I want to remind them that the legislation allows conventions to be held in 28 different countries in the Caribbean islands. Whether it be Haiti, St. Vincents, or El Salvador or whether it be any of the other countries in Central America or the Caribbean, we will permit conventions to be held tax deductible by the CBI proposals. So I do not understand how my colleagues can be consistent while voting for the CBI and then at the same time vote against H.R. 3191. So, Mr. Speaker, I ask the Members to truly be consistent, to be fair, and to not discriminate against an industry that is languishing and needs help. This is good tax legislation. It would really help an ailing industry and give employment to our American people. With the right kind of incentives we can give a rebirth to our shipping fleet which was once a proud and vital part of our economy.

Mr. DUNCAN. Mr. Chairman, I reserve the balance of my time.

Mr. STARK. Mr. Chairman, I yield 6 minutes to the gentleman from Ohio (Mr. Pease).

#### □ 1540

Mr. PEASE. I appreciate the opportunity to rise in opposition to this bill. I will say at the outset that I do so with real regret because I have a genuine respect and affection for the gentleman from New Jersey (Mr. Guarini), my colleague on the Ways and Means Committee.

This is the same bill, I would remind my colleagues, that was on the floor on Monday under suspension. It was rejected on Monday. It ought to be re-

jected today.

It is a bill that had 146 votes against the rule, which should send some kind of a signal. The fact that there were so many people that even voted against the rule today says something about the merits of the bill.

It also says something about the procedure under which this bill is being brought to us. The truth is that this is the kind of bill which should not be brought up in the waning hours of a legislative session. Whatever merit the bill has, and it does have some merit, it is and will be interpreted as special interest legislation. As legislation, it will be wide open to criticism and ridicule in the press and among our constituents.

As an institution, we open ourselves to criticism and ridicule by going to extra lengths to bring up a bill like this in the last hours of this legislative session.

If for no other reason than to avoid making ourselves look silly, we ought to defeat this bill this afternoon.

What about the merits? The bill, as I said, does have some merits. It will encourage U.S.-flag ships. As has been mentioned, there are four of them. It will perserve a few jobs in the maritime industry.

At a time when we have so many people unemployed I know that is an appealing argument. But, again, consider the cost in terms of what our constituents will think about the fairness of our Federal tax system.

I have not in my "Dear Colleague" letters referred to this bill as the "Love Boat bill." But inevitably it will be referred to that way in the newspapers and among our constituents.

The Treasury Department, in expressing open opposition to this proposal, said, and I quote:

The decision to hold a convention aboard a cruise ship is invariably motivated almost exclusively by personal, nonbusiness considerations. Try to tell the average citizen that a convention held aboard a cruise ship is not a vacation in disguise. That citizen will look at you with incredulity.

This is a tax loophole for well-off Americans, a tax loophole for those who are able to go on expensive trips ostensibly for business reasons.

In passing this bill we would open a tax loophole which Congress closed only a few years ago. We will be acting to reduce what little faith the American citizen has in fairness in our tax system.

I remind my colleagues that our income tax system is based on voluntary compliance. The clamor for a flat tax that we hear today comes because people, ordinary citizens, believe that our tax system is not fair, that people are getting away with something that the ordinary citizen cannot.

Let us not take a step to undermine the faith of our constituents in the fairness of our income tax system. Let us not take a step to damage the reputation of Congress by acting on minor legislation of special application in the waning hours of this Congress.

I ask you to vote "no" on this bill. Mr. ZEFERETTI. Mr. Chairman,

will the gentleman yield?

Mr. PEASE. I yield to the gentleman from New York.

Mr. ZEFERETTI. The gentleman stated earlier that the majority of the Members of the House did not vote for the rule and the majority of the Members of the House did not vote for the bill when it was under suspension, that the majority of the Members of the House would vote against this bill at this particular time.

Mr. PEASE. No. I think my colleague is in error. I quoted the number of people who voted against the rule and that was 146, not a majority.

Mr. ZEFERETTI. A majority of the Members of this House voted for the rule and there was a majority of the Members of the House that voted for this bill when it was up under suspension.

Also, is it any more fair to have a tax deduction outside of the United States than it is within the boundaries of the United States?

Mr. PEASE. What I am most concerned about, and what I focused on in my comments, are the perceptions of ordinary Americans about what is fair. You can say to an ordinary American, "I am going to a convention in Toronto," even in Mexico City, and it is a different impression from what comes if you say, "I am going on a convention on a cruise ship."

There is no question about that in my mind and it is that which motivates my concern about this bill.

Mr. ZEFERETTI. If the gentleman will yield further, my constituency would have some doubt, too, if we were talking about having a convention in Las Vegas or we were talking about having another convention in Atlantic City.

We are talking about the same thing. We are talking about recreational areas that afford the opportunity to have conventions and seminars for the economics of that particular area.

We are talking also about an industry that has been handicapped over a period of years and not had that ability to go forward with initiatives to put people back to work.

Mr. DUNCAN. Mr. Chairman, I reserve the balance of my time.

Mr. STARK. Mr. Chairman, I yield 4 minutes to the gentleman from California (Mr. Anderson).

Mr. ANDERSON. Mr. Chairman, I rise in support of H.R. 3191, a bill to encourage the expanded development of the U.S.-flag fleet by permitting the deduction of convention expenses held on U.S.-flag passenger vessels. H.R. 3191 would amend the Internal Revenue Code to permit the deduction of expenses for conventions held on U.S.-flag passenger ships, when all ports of call are within the North American

The 96th Congress recognized the important economic benefit of a U.S.-flag passenger fleet when it approved legislation enabling certain passenger vessels to engage in this Nation's domestic commerce. As a result, the SS Oceanic Independence began offering passenger service in the Hawaiian Islands during 1980.

The 97th Congress enacted legislation permitting the sister ship of the SS Oceanic Independence, the SS Constitution, to enter the domestic service in the Hawaiian Islands. This measure was signed into law March 2, 1982, and enabled the SS Constitution to begin operation in June of this year.

I am pleased to report that the Independence has recently called on the Port of Los Angeles; modern passenger Terminal facilities. The vessel's successful passage from Los Angeles to the Hawaiian Islands can be viewed as a trial run for potential future west coast to Hawaii passenger vessel service.

But I believe that the future success and expansion of the U.S. passenger ship industry rests in part on the ability to host conventions. Our existing passenger vessels are operating on margin. For example, the SS Constitution is now in danger of being laid up due to declining passengers. But, these vessels and several others operating in the shallow draft and deep-sea trades are fully capable of providing suitable meeting facilities and the technical equipment necessary to conduct productive business conferences.

Mr. Chairman, H.R. 3191 is critical to the U.S. passenger ship industry because of the following reasons: An allowable tax deduction for convention expenses on U.S.-flag passenger vessels will provide professional and industry organizations the incentive to make greater use of these convention facilities.

The ability to host business conferences will attract additional investments by domestic passenger ship operators to expand their operations and provide new employment opportunities. For example, the two new ships in the Hawaiian Island trades alone created jobs for nearly 900 seagoing workers rotating between the two ships over the course of the year. There would be, in addition, 100 direct shoreside jobs and many more indirect shoreside jobs created as a consequence of passenger service from the Port of Los Angeles to Hawaii.

Furthermore, I understand that the Department of the Navy "enthusiastically supports" enactment of H.R. 3191, because the U.S.-flag deep-sea vessels suitable for hosting shipboard conventions can also be used in times of national emergency as troop transports and hospital ships.

Mr. Chairman, in conclusion, I believe that it is simply inequitable to permit a tax deduction for convention expenses at land-based hotels, while not permitting the same deduction for a business convention held on a U.S. passenger ship. Under current law, convention expenses are deductible even when the convention is held in Canada or Mexico. I am told that this bill has a negligible affect on budget receipts, but it may be the last hope to continue the work of the 96th Congress in revitalizing a U.S.-flag passenger fleet that once numbered 15 ships and directly employed 10,000 American seafarers.

# □ 1550

Mr. DUNCAN. Mr. Chairman, I yield 2 minutes to the gentleman from Pennylvania (Mr. Gaydos).

Mr. GAYDOS. Mr. Chairman, if the economy of the United States ever is to pick itself off its broad backside, it will not be done in one sweeping movement, but in stages. Some stages will occur naturally and others will have to be induced by Congress.

This provision represents one small stage to be worked into the total movement.

I like H.R. 3191 for several reasons.

First, conventions on land are tax deductible items. There are only so many conventions a year. This provision would create no more, and, thus, it would have little or no impact on tax revenues.

Second, even U.S.-originated conventions held overseas are tax deductible if they are held on land, I understand.

We have heard talk of subsidies; this amounts to a direct subsidy by American taxpayers of foreign economies. Third, if it catches on, it might even spawn a real American-flag cruise ship industry larger than four vessels—why, it could lead to additional employment of U.S. citizens and the building of new ships, which certainly would employ U.S. citizens.

Small now, it could cause a significant ripple that, when joined with other ripples, would constitute a wave of recovery.

Mr. Chairman, if you want to make waves, you have first to make ripples. I urge the passage of H.R. 3191.

Mr. STARK. Mr. Chairman, I yield 2 minutes to the gentleman from New York (Mr. PEYSER).

Mr. PEYSER. Mr. Chairman, let me say, at the ouiset, that I rise in strong support of this legislation. But one of the things that I am concerned about is that both my good friends from Ohio and Minnesota are talking about perception of the public. In the first place, I do not think we should be legislating on the basis of perception of how something may or may not be perceived by the public. I think the facts are that we have an opportunity here to bring about a correction of what really has been a wrong that has been taking place in our tax law.

Second, we have the opportunity of keeping American seamen employed.

Third, we have the opportunity, perhaps, of providing a stimulus to this industry that will create some new shipbuilding and new American jobs.

To do all of this in a bill that provides just equity for the American businesses, for the cruise ships and for American seamen, it seems to me the bill ought to pass by an overwhelming majority, as I am convinced, incidentally, it will.

But, you know, when we talk about how the public thinks of what we may do on tax legislation, I still look at the windfall profit tax on the oil companies when we proceeded a year ago to give the oil companies billions of dollars back in taxes that we were already ready to collect. Now, there is something the American public really got concerned about. But I assure you that this bill will pass.

And also I want to make one more point. Many of you men and women have been to conventions, have been to business conventions either as a business person or as someone speaking at a business convention. I am convinced a great deal more work can be done when you have your group together and contained than you can if you are at, perhaps, a resort where you have the wonderful things, the golf courses, and what have you, where everybody may disappear. I believe we ought to pass the bill. Let us create an honest equity for this industry.

minutes to the gentleman from New York (Mr. Biaggi).

Mr. BIAGGI. Mr. Chairman, I rise in support of H.R. 3191. Clearly, some arguments have been offered in opposition to this legislation, and I respect the proponents of those arguments, but I hardly believe they deal with the facts.

A very important fact is the decline of the American maritime service over a period of years. Reference is made to perception which would alienate the public. Perception is not what motivates us to legislate. Substance does. The opposition from Atlantic City, Las Vegas, and some of these other hotels in other recreational areas really is illfounded, because these American vessels had this tax exemption once before. During that period the aformentioned areas flourished. Now that these vessels do not have this tax exemption, these areas are not flourishing, and they cannot point to this tax exemption as a threat to their profits. It has been the general economy that has been the reason for the diminution of their business. What we are doing is restoring to the vessels what these other recreational areas have enjoyed and continue to enjoy.

But on the far side of this legislation, we are talking about the recovery of American-flag cruise vessels, which are very few in numbers, but they reflect additional jobs. It would obviously be an encouragement for those in the shipping business who would like to invest their dollars but find little incentive to do so because of the lack of opportunity to profit. This is only natural in a free enterprise system, clearly people will not be encouraged to invest their dollars. This will be a step forward. And we need many, many such steps in the restoration of the maritime industry. But as a member of the Committee on Merchant Marine Fisheries, which must address itself to the decline in the maritime industry, I vigorously urge my colleagues to vote for this very minimal, infinitesimal step toward recovery.

Mr. DUNCAN. Mr. Chairman, I yield 2 minutes to the gentlewoman from Il-

linois (Mrs. Martin).

Mrs. MARTIN of Illinois. Mr. Chairman, I recognize the sponsors mean well by this. But has this place gone mad? How can you possibly go home to your districts and on one day tell people who are worrying about their gas bills the next day that you are going to give tax breaks for cruises?

Twenty-three percent of my people are unemployed. They cannot afford to take cruises. It will be the wealthy doctors, lawyers, and executives. That

is who will get the tax break.

Now, maybe it sounds nice, and I know you meant well. But it seems to me that you do talk about sending signals out to the economy. Now you may

Mr. STARK. Mr. Chairman, I yield 2 want to rebuild your fleet, you may want to help the maritime unions-everybody does-but there is no rightthinking midwesterner who is ever going to believe that a cruise is pure business and should be deductible. They are absolutely right.

Mr. WHITTAKER. Mr. Chairman, I have no further requests for time.

Mr. STARK. Mr. Chairman, I yield 1 minute to the gentleman from Ohio

(Mr. PEASE).

Mr. PEASE. Mr. Chairman, I just wanted to make the point in response to my colleague from New York, who is talking about perceptions, that the reason I worry about perceptions is precisely the reason that was alluded to by the gentlewoman from Illinois a moment ago. And that is that our system of income taxes relies very heavily on voluntary compliance. People have to feel that the system is fair or they do not play fair with the system. And if they have a reason to believe that other people, wealthy well-off people, business people, are cheating or ripping off the system on their income taxes, that encourages them to do the same on their

I think we do that at the peril of our system of income taxation.

Mr. STARK. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I would remind my colleagues that on Monday this bill received 219 yea votes to 164 nay votes. I urge its adoption. It is fair. It costs no money. It opens no new tax loopholes. In the sense of equity and fairness, I think it is important that we pass it.

Mr. Chairman, I have no further re-

quests for time.

Mr. AKAKA. Mr. Chairman, I rise to voice my enthusiastic support for H.R. 3191, a mwasure to exempt conventions held on U.S. documented cruise ships from certain provisions of the Internal Revenue Code of 1954.

My colleagues are fully aware of the decline of U.S. documented cruise ships and the recent struggle by a few shipping companies to regain some measure of our once proud reputation on the high seas. H.R. 3191 is needed to encourage the growth of our struggling U.S. passenger ship industry. It is a small step of encouragement. A step we need to take. The bill will make U.S. passenger ships more competitive with hotel facilities and could lead to the creation of new jobs in the cruise ship industry.

It was only through an oversight in a miscellaneous tax measure establishing safe harbor tax rules for conventions held in North America that deductions for conventions on cruise ships were not included within the law. Thus, H.R. 3191 is consistent with current law. The objective of the law is to encourage the growth of the multimillion dollar convention business in the United States. This growth industry promises to employ an ever increasing number of Americans. It is only right and fair that the passenger ship industry receive the same tax incentive as all other competitors for the lucrative convention business.

I have been very pleased that two of the largest U.S. passenger ships have been operating among the Hawaiian Islands. It is my hope that legislation such as H.R. 3191 will lead other American businesses to enter into the fledgling cruise ship industry.

The CHAIRMAN. Pursuant to the rule, the bill is considered as having been read for amendment under the 5minute rule. No amendments are in order except the amendment in the nature of a substitute recommended by the Committee on Ways and Means now printed in the bill, and said substitute shall not be subject to amendment.

The text of the bill is as follows: H.R. 3191

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) paragraph (2) of section 274(h) of the Internal Revenue Code of 1954 (relating to attendance at conventions, et cetera) is amended to read as follows:

"(2) CONVENTIONS ON CRUISE SHIPS.-

"(A) Foreign cruise ships.—In the case of an individual who attends a convention, seminar, or other meeting which is held on any cruise ship which is not a domestic cruise ship, no deduction shall be allowed under section 162 or 212 for expenses allocable to such meeting.

"(B) Domestic cruise ships .- A convention, seminar, or similar meeting held on a cruise of a domestic cruise ship shall be treated as held in the North American area if all ports of call of such cruise are inside the North American area."

(b) Paragraph (3) of section 274(h) of such Code is amended by redesignating subparagraph (B) as subparagraph (C) and by inserting after subparagraph (A) the follow-

ing new subparagraph:

(B) DOMESTIC CRUISE SHIP .- The term 'domestic cruise ship' means any cruise ship documented under the laws of the United

(C) The amendments made by this Act shall apply to conventions, seminars, and meetings beginning after December 31, 1981.

COMMITTEE AMENDMENT IN THE NATURE OF A SUBSTITUTE

The CHAIRMAN. The Clerk will report the committee amendment in the nature of a substitute.

The Clerk read as follows:

That (a) paragraph (2) of section 274(h) of the Internal Revenue Code of 1954 (relating to attendance at conventions, etc.) is amended to read as follows:

"(2) Conventions on cruise ships.—In the case of any individual who attends a convention, seminar, or other meeting which is held on any cruise ship, no deduction shall be allowed under section 162 or 212 for expenses allocable to such meeting unless

(A) the cruise ship is a vessel documented under the laws of the United States,

"(B) all ports of call of the cruise are inside the North American area, and

"(C) the taxpayer establishes (by written statements signed by the taxpayer and by an officer of the sponsoring organization or group, and by such other methods as may be prescribed by regulations) that the meeting is directly related to the active conduct of his trade or business or to an activity described in section 212.

Paragraph (1) shall not apply to any meeting with respect to which the requirements of the preceding sentence are met.

(b) The amendment made by subsection (a) shall apply to conventions, seminars, and meetings beginning after December 31,

Mr. STARK (during the reading). Mr. Chairman, I ask unanimous consent that the committee amendment in the nature of a substitute be considered as read and printed in the RECORD

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. STARK. Mr. Chairman, this is purely a technical amendment.

I have no requests for time on it, and I urge the adoption of the amend-

The CHAIRMAN. The question is on the committee amendment in the nature of a substitute.

The committee amendment in the nature of a substitute was agreed to.

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly the Committee rose: and the Speaker pro tempore (Mr. BENNETT) having assumed the chair, Mr. WHITE, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee having had under consideration the bill (H.R. 3191), to amend the Internal Revenue Code of 1954 to exempt conventions, et cetera, held on cruise ships documented under the laws of the United States from certain rules relating to foreign conventions, pursuant to House Resolution 630, he reported the bill back to the House with an amendment adopted by the Committee of the Whole.

The SPEAKER pro tempore. Under the rule, the previous question is ordered.

The question is on the amendment.

The amendment was agreed to. The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER pro tempore. The question is on the passage of the bill.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. FRENZEL. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not

present. The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 227, nays 172, answered "present" 1, not voting 33. as follows:

Mrs. COLLINS of Illinois, Messrs. RALPH M. HALL, MARRIOTT, FOR-SYTHE, and ANDREWS changed their votes from "yea" to "nay."

Messrs. SIMON, BRINKLEY, GINN, DANIEL B. CRANE, and WILLIAMS of Ohio changed their votes from "nay" to "yea."

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

# GENERAL LEAVE

Mr. STARK. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

### PADDY CREEK WILDERNESS ACT OF 1981

Mr. SEIBERLING. Mr. Speaker, pursuant to House Resolution 631, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the Senate bill (S. 1965) to designate certain lands in the Mark Twain National Forest in Missouri, which comprise approximately 6,888 acres, and which are generally depicted on a map entitled "Paddy Creek Wilderness Area," as a component of the National Wilderness Preservation System.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Ohio (Mr. SEIBER-

The motion was agreed to.

#### IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the Senate bill, S. 1965, with Mrs. KENNEL-Ly in the chair.

The Clerk read the title of the Senate bill.

The CHAIRMAN. Pursuant to the rule, the first reading of the bill is dispensed with.

Under the rule, the gentleman from Ohio (Mr. Seiberling) will be recognized for 30 minutes, and the gentleman from Alaska (Mr. Young) will be recognized for 30 minutes.

The Chair recognizes the gentleman from Ohio (Mr. SEIBERLING).

Mr. SEIBERLING. Madam Chairman, I yield myself such time as I may consume.

I rise in strong support of S. 1965, which would designate a 6,888-acre wilderness in the Mark Twain National Forest in Missouri. The Paddy Creek area was designated by Congress as a wilderness study area in 1976 with instructions that the area be evaluated to determine whether it should be recommended for addition to the National Wilderness Preservation System.

Madam Chairman, the Forest Service has completed the study and recommended the area for wilderness and on September 13, President Reagan sent a message to Congress confirming the administration's endorsement of the wilderness proposal.

The Subcommittee on Public Lands and National Parks had previously held a hearing concerning the area on May 24 of this year and found near unanimous support for wilderness des-

ignation.

Madam Chairman, I note that in President Reagan's message to Congress supporting this wilderness designation, it was indicated that during the wilderness study review process, the in-State public input, that is, letters from Missourians, ran 1,954 to 204 against the wilderness designation for Paddy Creek. In addition, every major newspaper in the State has run editorials in favor of wilderness and a majority of the State's delegation has supported this proposal.

It has been asserted that the local people in the area do not support wilderness designation for Paddy Creek. Undoubtedly some do not, as is usually the case. However, many do. For example, I have received a petition signed by 44 residents of the small village of Roby, which is within 1 mile of the proposed wilderness, in which they eloquently express their support. The petition reads as follows:

We, the following people of the Roby community would like to see our area known as Paddy Creek protected under the Wilderness Bill for future generations. Some of us work in the timber industry and believe that surely we can afford to set back this 6.888-acre area. We are tired of seeing acre after acre clear cut. We have often thought how nice it would be to have Paddy Creek with all its unique caves, springs, and rock formations set aside for our enjoyment and future generations to come.

I would also note that the proposed wilderness comprises less than onehalf of 1 percent of the national forest land in Missouri and, of course, an infinitesimal amount of the total land in the State.

# □ 1630

So, I believe that while there was a certain amount of concern when we took this up before, we now are under a rule under which the gentleman currently representing this area, Mr. BAILEY of Missouri, is entitled to offer an amendment in the nature of a substitute. He and I have worked out an agreement to support that amendment with two technical corrections in it, so I really do not think there is any longer any issue that is likely to delay our disposal of this matter.

I would note that the net effect of this amendment will be to apply the so-called soft release language formula, which has already become law in several States, to national forest lands in Missouri not already designated wilderness or designated wilderness by this act or remaining in further planning upon enactment of this act. I should note that this means that the so-called Irish Wilderness area, which was identified for further planning in RARE II, and remains in that category, will continue to be studied for wilderness, and that the status quo in that area will not change as a result of the adoption of this amendment and release language.

Therefore, I do not plan to occupy any more time in general debate

unless other Members wish to discuss it further.

Madam Chairman, at this point I reserve the balance of my time.

Mr. YOUNG of Alaska. Madam Chairman, I yield 5 minutes to the gentleman from Idaho (Mr. CRAIG).

Mr. CRAIG. Madam Chairman, I oftentimes do not choose to debate wilderness issues outside of my State of Idaho. I choose not to because I find that usually those important issues and decisions on a particular wilderness have already been made by the members of the delegation from the State in which the proposed wilderness area resides. I have to take exception, at least in explanation, to this wilderness area, or this wilderness area proposal, and I do it because I think it is important that we understand the kinds of processes that we are now going through in an effort to declare additional wilderness to the wilderness systems of our country.

The 1964 law that declared that this Congress would designate certain lands within the public domain to be called and used and so managed as wilderness was rather clear and very specific in its intent. Beyond that, it stated a very important philosophy. Now, not often does law that this body deals in deals with a philosophy, but in the area of the 1964 wilderness law there is a body of that law that speaks very clearly of the philosophy of wilderness and the intent of wilderness itself. It talks about a type of public domain which is rare and unique in its character; which in large part has not been trampled by man, and which by the designation of wilderness will only allow man to enter as a visitor, to stay and enjoy the qualities of that uniqueness, and then to leave, unmarking that wilderness by his hand.

That was the intent of the original law. That was the purpose of the original wilderness areas that we have seen spring up in our country. I have nearly 4 millon acress in my State, and I can tell the Members that it is unique land; it is untouched by man; it is high, pristine mountain terrain that in every description of wilderness fits the description.

Something has happened. Something is different. Something is now occurring in this body that was not true 5 or 6 years ago. Through the RARE-II process, we are now seeing wilderness, or the effort to include additional wilderness acres, as different from and uniquely different from the law that was originally passed to create our wilderness system.

Today, Paddy Creek is a good example of how we have changed and how our attitudes have changed and the kinds of lands we are now processing for inclusion in our wilderness system. If this 6,000-acre parcel were involved in the RARE-II process in my State, it

would be kicked out entirely. It involves 28 miles of manmade road. It has been logged. It has been grazed. It has major inholdings inside of it that are—and the term is "cherry stemmed."

In other words; we are drawing unique lines around these inholdings to allow access. That was not the intent of the original wilderness law, but that has become the thrust of this

Congress. My colleague from Missouri spoke earlier about the kind of activity that has gone on at Paddy Creek for the last 100-plus years, and I can tell the Members that under any stretch of the imagination this is not a piece of wilderness. This is a piece of land that has been managed by the U.S. Forest Service since the creation of the Forest Service, and some land acquired under a multiple-use mode; and only in the last few years has it been picked as a protected area except for access by those who have a right to have access.

And yet today, in our drive to keep the environmentalists off our political backs, we are willing to give them anything they want, at least within reason. A good many of us, I find, are now voting, not because we know about the issues, not because we know about the area itself or the characteristics of the area or the kind of impact that a particular inclusion of public domain might have on the local constituents of an area or the local economy of an area. We can sit in our congressional districts 200 miles away and say, "That's an easy vote that we can give the environmental community because is isn't in our backyard.'

The CHAIRMAN. The time of the gentleman from Idaho has expired.

Mr. YOUNG of Alaska. Madam Chairman, I yield 3 additional minutes to the gentleman from Idaho.

Mr. CRAIG. Madam Chairman, that is wrong. If this land is unique, if this land in itself has characteristics that the public deserves to have protected for generations to come, then it ought be wilderness. But, if it is land that fits under the multiple-use mode, that can be logged, that has been logged, that has been grazed, that has major inholdings in it and private property in it, then we really ought to be considering this as rejected from the RARE-II process and returned back to the multiple-use mode of management that it has been managed under for a good many years.

What we have done and what we continue to do and what we nearly did to Oregon and the Oregon wilderness is to say, "Oh, well, it is an easy vote to give, and so we will give it and not take the kind of time to consider the impact of this kind of legislation."

Yes, there were a good many people supportive of this. I read the text of the Paddy Creek testimony last night, and I can tell the Members where all those people came from. They came from St. Louis and Columbia and places 400 and 500 miles away from the proposed Paddy Creek Wilderness, and not the local constituency, and not the local economic base that these people will have to live and/or die with in the future.

Mr. YOUNG of Alaska. Madam Chairman, will the gentleman yield? Mr. CRAIG. I yield to the gentleman

from Alaska.

Mr. YOUNG of Alaska. Madam Chairman, I wish to compliment the gentleman on his statement, a statement that I have made on this floor. I think it is time that we start listening to the intent of the act of 1964 and the intent of Congress. The gentleman is absolutely right. We are becoming responders to those who say, "If you don't vote this way, you are going to get on the dirty dozen list."

They wear the white hat when they say that. Anybody else who challenges you or threatens you that way gets

taken to court.

So, I am suggesting to the gentleman that he is absolutely right. We should look at these areas individually, and ask if they fit the criteria. Are there higher use values? Have they been used before? That is the type of thing that I think the gentleman is bringing forth today.

I think the gentleman for his state-

ment.

Mr. CRAIG. I thank the gentleman from Alaska for that statement. I am pleased that this legislation could become a vehicle for major change in the State of Missouri, and I congratulate the chairman of the Subcommittee of Interior for allowing the compromise to be struck, and compliment my colleague from Missouri who has brought this compromise.

#### □ 1640

Madam Chairman, I say in closing to the members of this committee that I think it is time we make a reexamination of the 1964 act and make sure that we do not, just for the sake of doing something, include on an ongoing basis thousands of acres of wilderness unless they meet the criteria, because we now have millions of acres of wilderness to offer the citizens of the country for their present and they and their childrens future.

Mr. YOUNG of Alaska. Madam Chairman, I yield back the remainder

of my time.

Mr. SEIBERLING. Madam Chairman, I yield back the balance of my time.

The CHAIRMAN. Pursuant to the rule, the bill is considered as having been read for amendment under the 5-minute rule. No amendments are in order except one amendment in the nature of a substitute printed in the Congressional Record of December

15, 1982, by, and if offered by, Representative Balley of Missouri, and said amendment shall not be subject to amendment.

The text of the Senate bill, S. 1965, is as follows:

#### S. 1965

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be known as the Paddy Creek Wilderness Act of 1981.

SEC. 2. In furtherance of the purposes of the Wilderness Act (78 Stat. 890) and the Act of January 3, 1975 (88 Stat. 2096), the following area as generally depicted on a map appropriately referenced, dated December 1981, is hereby designated as wilderness and, therefore, as a component of the National Wilderness Preservation System; certain lands in the Mark Twain National Forest, Missouri, which comprise about six thousand eight hundred and eighty-eight acres, are generally depicted on a map entitled "Paddy Creek Wilderness Area", dated December 1981, and shall be known as the Paddy Creek Wilderness Area.

SEC. 3. As soon as practicable after this Act takes effect, the Secretary of Agriculture shall file a map and legal description of the Paddy Creek Wilderness Area with the Energy and Natural Resources Committee of the Senate and the Interior and Insular Affairs Committee of the House of Representatives, and such description shall have the same force and effect as if included in this Act: Provided, however, That correction of clerical and typographical errors in such legal description and map may be made.

SEC. 4. The area designated as wilderness by this Act shall be administered in accordance with the applicable provisions of the Wilderness Act (78 Stat. 890) and the Act of January 3, 1975 (88 Stat. 2096), except that any reference in such provisions to the effective date of such Acts shall be deemed to be a reference to the effective date of this Act.

AMENDMENT IN THE NATURE OF A SUBSTITUTE, AS MODIFIED, OFFERED BY MR. BAILEY OF MIS-SOURI

Mr. BAILEY of Missouri. Madam Chairman, I have an amendment at the desk, and I ask unanimous consent for its immediate consideration.

Madam Chairman, it is agreed to by the subcommittee chairman, it is agreed to by the gentleman from Alaska (Mr. Young) and I agree with it. It is release language for other areas in Missouri, and I ask unanimous consent for immediate consideration of the amendment.

The CHAIRMAN. Is there objection to the request of the gentleman from Missouri?

Mr. SEIBERLING. Reserving the right to object, Madam Chairman, let me ask the gentleman from Missouri (Mr. Bailey), is this the same draft that he and I discussed with the two corrections on it?

Mr. BAILEY of Missouri. Madam Chairman, if the gentleman will yield, on page 2 we add the words, "map and legal" before the word, "description," and then on page 3 we add the words "or remaining in further planning upon enactment of this act."

Mr. SEIBERLING. "Remaining in further planning," is that correct? Mr. BAILEY of Missouri. "Or re-

Mr. BAILEY of Missouri. "Or remaining in further planning upon enactment of this act."

Mr. SEIBERLING. Madam Chairman, I withdraw my reservation of objection. I have no objection.

The CHAIRMAN. Is there objection to the request of the gentleman from Missouri?

Mr. VOLKMER. Madam Chairman, may I ask the gentleman, is he just asking unanimous consent at this time to take the amendment up?

Mr. BAILEY of Missouri. Madam Cahirman, if the gentlemen will yield, the answer is "Yes."

Mr. VOLKMER. Madam Chairman, I withdraw my reservation of objection.

The CHAIRMAN. Is there objection to the request of the gentleman from Missouri?

There was no objection.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amendment in the nature of a substitute, as modified, offered by Mr. Balley of Missouri: Strike all after the enacting clause and insert the following:

That this Act may be known as the Paddy Creek Wilderness Act of 1981.

SEC. 2. In furtherance of the purposes of the Wilderness Act (78 Stat. 890) and the Act of January 3, 1975 (88 Stat. 2096), the following area as generally depicted on a map appropriately referenced, dated December 1981, is hereby designated as wilderness and, therefore, as a component of the National Wilderness Preservation System; certain lands in the Mark Twain National Forest, Missouri, which comprise about six thousand eight hundred and eighty-eight acres, are generally depicted on a map entitled "Paddy Creek Wilderness Area", dated December 1981, and shall be known as the Paddy Creek Wilderness Area.

SEC. 3. As soon as practicable after this Act takes effect, the Secretary of Agriculture shall file a map and legal description of the Paddy Creek Wilderness Area with the Energy and Natural Resources Committee of the Senate and the Committees on Agriculture and Interior and Insular Affairs of the House of Representatives, and such map and legal description shall have the same force and effect as if included in this Act: Provided, however, That correction of clerical and typographical errors in such legal description and map may be made.

SEC. 4. The area designated as wilderness by this Act shall be administered in accordance with the applicable provisions of the Wilderness Act (78 Stat. 890) and the Act of January 3, 1975 (88 Stat. 2096), except that any reference in such provisions to the effective date of such Acts shall be deemed to be a reference to the effective date of this Act.

SEC. 5. (a) The Congress finds that—

(1) the Department of Agriculture has completed the second roadless area review and evaluation program (RARE II): and

(2) the Congress has made its own review and examination of National Forest System roadless areas in the State of Missouri and of the environmental impacts associated with alternative allocations of such areas.

(b) On the basis of such review, the Congress hereby determines and directs that—

(1) without passing on the question of the legal and factual sufficiency of the RARE II Final Environmental Statement (dated January 1979) with respect to National Forest System lands in States other than Missouri such statement shall not be subject to judicial review with respect to National Forest System lands in the State of Missouri;

(2) with respect to the National Forest System lands in the State of Missouri which were reviewed by the Department of Agriculture in the second roadless area review and evaulation (RARE II), except those lands remaining in further planning upon enactment of this Act, or designated as wilderness by this Act or previous Acts of Congress that review and evaluation shall be deemed for the purposes of the initial land management plans required for such lands by the Forest and Rangeland Renewal Resources Planning Act of 1974 as amended by the National Forest Management Act of 1976 (Public Law 94-588) to be an adequate consideration of the suitability of such lands for inclusion in the National Wilderness Preservation System and the Department of Agriculture shall not be required to review the wilderness option prior to the revision of the initial plans and in no case prior to the date established by law for completion of the initial planning cycle;

(3) areas in the State of Missouri reviewed in such final environmental statement and not designated as wilderness by this Act or previous Acts of Congress or remaining in further planning upon enactment of this Act shall be managed for multiple use pursuant to section 6 of the Forest and Rangeland Renewable Resources Planning Act of 1974 as amended by the National Forest

Management Act of 1976; and

(4) unless expressly authorized by Congress the Department of Agriculture shall not conduct any further statewide roadless area review and evaluation of national forest system lands in the State of Missouri for the purpose of determining their suitability for inclusion in the National Wilderness Preservation System.

Mr. VOLKMER (during the reading). Madam Chairman, I ask unanimous consent that the amendment in the nature of a substitute be considered as read, printed in the RECORD, and open to amendment at any point. The CHAIRMAN. Is there objection

The CHAIRMAN. Is there objection to the request of the gentleman from Missouri?

Mr. YOUNG of Alaska. Madam Chairman, I object. The CHAIRMAN. Objection is

The CHAIRMAN. Objection is heard.

The Clerk will read.

The Clerk concluded the reading of the amendment in the nature of a subsitute.

The CHAIRMAN. Pursuant to the rule, the gentleman from Missouri (Mr. Bailey) will be recognized for 30 minutes, and a Member opposed to the amendment will be recognized for 30 minutes.

The Chair recognizes the gentleman

from Missouri (Mr. BAILEY).
Mr. BAILEY of Missouri. Madam
Chairman, I yield myself such time as
I may consume.

Madam Chairman, I think the language of the amendment speaks for itself. What we have done is accepted Paddy Creek and given release language on all other lands for future planning for wilderness in Missouri.

Mr. VOLKMER. Madam Chairman, will the gentleman yield?

Mr. BAILEY of Missouri. I yield to the gentleman from Missouri.

Mr. VOLKMER. Madam Chairman, I would like to make this inquiry.

According to the information I have here, there has been a lot said about the number of roads that are within this area, and in fact it has been described as a 3-by-3-mile area, which is not quite correct. It is a little longer across the bottom than it is at the top, and it comes down almost in a triangular shape rather than a square shape.

Is the gentleman trying to tell the Members of the House that these roads within the Paddy Creek area are paved roads?

Mr. BAILEY of Missouri, No.

Mr. VOLKMER. The gentleman is not telling us that; is he?

#### □ 1650

Mr. BAILEY of Missouri. I am talking about graded, maintained roads that are passable. Two cars can pass on the gravel maintained road.

Mr. VOLKMER. According to the information we have on the study report from the Forest Service and the Department of Agriculture it shows about a total of 5 miles of dirt road and any other was the old logging roads that were years ago, that are maybe passable if you take a 4-wheeler in there if you did not run into a fallen tree or something like that.

But the maps and everything that they have do not show this type of atmosphere where people are running in and out of there all the time.

Mr. BAILEY of Missouri. I think I debated the merits of the bill fairly adequately this morning If the gentleman would like to do that over again I would be happy to engage in it. But it seems to me that it would be in the best interests of the gentleman's position not to follow that line of questioning.

Mr. VOLKMER. I do not dispute the fact of that.

But it is true, is it not, that it is not a 3-square mile area?

Mr. BAILEY of Missouri. No. It is about 3½ miles by 2½ miles. It is shorter than 3 miles on the north-south and a little longer than 3 miles on the east-west.

Mr. VOLKMER. Yes.

Mr. BAILEY of Missouri. Two and a half by three and a half, if that suits you better, sir.

Mr. VOLKMER. That is a lot better, a little more accurate.

Mr. YOUNG of Alaska. Madam Chairman, will the gentleman yield?

Mr. BAILEY of Missouri. I yield to the gentleman from Alaska.

Mr. YOUNG of Alaska. I would like to compliment the gentleman from the district and, as I mentioned before, the chairman of the subcommittee, for reaching this agreement. It does not make this bill palatable to me yet because I think it was unnecessary to have the legislation before us at this late hour but it shows when we work together we have more time to play together. I say that with tongue in cheek because this is the day where the committee has a gathering to celebrate the past 2 years and say goodbye to those good friends we have worked with and will no longer be with us and to say hello to some new ones.

Working together with the good Member from Missouri and the gentleman from Ohio in this compromise I think shows often that we get out and listen to the whispers in the wind and are misled by those that really do not know the truth of a situation.

So I would suggest that again this gentleman probably is speaking for the last time on the floor on this issue and he should be complimented by going out with great dignity and with the idea that he hopefully will be back to this body someday as a leader from Missouri either in one way or another, but a man who speaks his mind and defends the rights of his people. I want to compliment the gentleman.

Mr. BAILEY of Missouri. I thank the gentleman.

Mr. SEIBERLING. Madam Chairman, will the gentleman yield?

Mr. BAILEY of Missouri. I yield to the gentleman from Ohio.

Mr. SEIBERLING. I just want to conplement the gentleman from Missouri for working with us to reach a reasonable compromise. I think this was a very good way to resolve this issue.

I regret that we had the conflict that we had but I think this result speaks well for the gentleman. I think it speaks well for the Members on both sides of the aisle and I see no need to further debate the matter since it has been discussed at great length already.

I would urge the approval of the amendment and the approval of the bill as so amended.

Mr. EMERSON. Madam Chairman, will the gentleman yield?

Mr. BAILEY of Missouri. I yield to the gentleman from Missouri.

Mr. EMERSON. I would just like to take this opportunity to compliment the gentleman from Missouri on the fine efforts that he has made here and to advise the House that the gentleman from Missouri now, with the passing of this Congress, becomes my constituent. I can assure you that we will have his input in matters of this sort for a long time into the future.

It has been a pleasure for me to serve this past 2 years with the gentleman from Missouri, Mr. Bailey. We are going to miss him here but we look forward to working with you in future endeavors, Wendell.

Mr. BAILEY of Missouri. I thank the gentleman.

The CHAIRMAN. The question is on the amendment in the nature of a substitute, as modified.

The amendment in the nature of a substitute, as modified, was agreed to.
The CHAIRMAN. Under the rule, the Committee rises.

Accordingly the Committee rose: and the Speaker pro tempore (Mr. BENNETT) having assumed the chair. Mrs. Kennelly, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the Senate bill (S. 1965) to designate certain lands in the Mark Twain National Forest in Missouri, which comprise approximately 6,888 acres, and which are generally depicted on a map entitled "Paddy Creek Wilderness Area," as a component of the National Wilderness Preservation System, she reported the bill back to the House with an amendment adopted by the Committee of the Whole.

The SPEAKER pro tempore. Under the rule, the previous question is ordered.

The question is on the amendment The amendment was agreed to.

The SPEAKER pro tempore. The question is on the third reading of the bill.

The bill was ordered to be read a third time, and was read the third time.

The SPEAKER pro tempore. The question is on the passage of the bill.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. ROBERTS of Kansas. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent members.

The vote was taken by electronic device and there were—yeas 367, nays 23, not voting 43, as follows:

Mr. SKEEN changed his vote from "yea" to "nay."

So the Senate bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

# GENERAL LEAVE

Mr. SEIBERLING. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the Senate bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

CONFERENCE REPORT ON H.R. 7019, DEPARTMENT OF TRANS-PORTATION AND RELATED AGENCIES APPROPRIATIONS, 1983

Mr. SABO. Mr. Speaker, I call up the conference report on the bill (H.R. 7019) making appropriations for the Department of Transportation and related agencies for the fiscal year ending September 30, 1983, and for other purposes.

The Clerk read the title of the bill. The SPEAKER pro tempore. Pursuant to the rule, the conference report is considered as having been read.

(For conference report and statement, see proceedings of the House of December 13, 1982.)

The SPEAKER pro tempore. The gentleman from Minnesota (Mr. Sabo) will be recognized for 30 minutes, and the gentleman from Pennsylvania (Mr. Coughlin) will be recongized for 30 minutes.

The Chair recognizes the gentleman from Minnesota (Mr. Sabo).

#### GENERAL LEAVE

Mr. SABO. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the conference report and amendments in disagreement on the bill, H.R. 7019, and that I may include tabular and statistical material.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

Mr. SABO. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the conferees on the fiscal year 1983 transportation appropriations bill had two basic objectives: First, to provide the resources necessary to meet our Nation's transportation program objectives for the current year, and second, to produce a conference agreement which will become a public law.

We believe we have achieved both of The these objectives. conference would agreement provide \$10,646,348,919 in new budget authority. While this is \$553 million less than the bill which originally passed the House in September, I must point out that the original House-passed bill included \$865 million for two programsinterstate transfer grants for highway and transit-which were funded in the continuing resolution, Public Law 97-276. The appropriations for these programs, therefore, are not included in the conference agreement which the House is considering today.

Excluding these programs, the conference agreement is \$311,949,000 more than the original House-passed bill. Virtually all of this increase is related to budget requests which were submitted after the House had passed the bill.

Mr. Speaker, this legislation is the product of many hours of hard work. The late Adam Benjamin devoted many hours to the hearings on this bill and he guided it through the subcommittee and full committee markups. Subcommittee Chairman BILL LEHMAN has been superb in managing the bill on the House floor and in conference with the Senate. I also want to recognize the excellent work of the chairman of the Senate subcommittee, our former colleague, Mark Andrews from North Dakota and I want to thank the gentleman from Pennsylvania (Mr. Coughlin) for his cooperation and support throughout the year.

HIGHLIGHTS OF THE CONFERENCE REPORT

For the Coast Guard, the conferees have provided a total of \$2.4 billion, which is \$122 million more than the budget request. Virtually all of this increase is for the procurement of new vessels and aircraft and for the improvement of existing Coast Guard equipment and facilities. The conferees are fully aware of the increased responsibilities of the Coast Guard and have provided increased funds to assist that agency in fulfulling its multifaceted operations.

The conference agreement includes nearly \$3.3 billion for the Federal Aviation Administration. While this is \$313.6 million more than the House passed bill, the Senate and conference committee considered \$323.5 million in budget requests which were submitted after the House had passed this bill in September.

In the highway area, the major change from the House bill is the deletion of funds for interstate transfer grants. Funding for this program has already been enacted in Public Law 97-276 and, therefore, has been deleted from the conference agreement.

For the Federal Railroad Administration, the conference agreement would provide a total of \$919.7 million, which is less than either the House or Senate bills. Of this amount, \$700 million is for grants to Amtrak. We believe this amount should be sufficient for the full fiscal year. The conference agreement also directs the transfer of \$25,000,000 from the redeemable preference share program for the commuter rail service and Conrail labor protecton programs. The Department is directed to take these funds from the \$45,000,000 reserved for the East St. Louis gateway project.

For public transportation, a total of \$3.2 billion is included in the conference agreement. While this is \$442.7 million less than the House bill, \$365 million of this reduction is in the area of interstate transfer grants which were funded in Public Law 97-276. In addition, urban formula grants have been reduced \$100 million below the bill. The House conferees House agreed to this reduction only after receiving assurances from Senator An-DREWS that OMB would recommend to the President that the bill be signed.

Mr. Speaker, all of the House and Senate conferees, except for the Senator from Wisconsin (Senator Proxmire), signed the conference report. It is fiscally responsible as well as programmatically responsive to the transportation needs of our Nation. I urge the adoption of the conference report. I insert at this point in the Record a table giving the conference figures in detail.

yield myself such time as I may consume.

I rise in support of the fiscal year 1983 Transportation appropriations conference report. The report does contain \$10 billion, \$646 million in funding for all transportation accounts except for interstate transfer grants which were funded for the entire year in the continuing resolution.

This is not only a bipartisan effort among members of the Transportation Appropriations Subcommittee, but also a good compromise with the Senate. The original bill is largely the handiwork of our late and missed colleague, Adam Benjamin. The acting chairman, the gentleman from Florida, BILL LEHMAN, whom we all miss today, shepherded the bill through floor consideration and the conference. Now our friend, the gentelman from Minnesota, Marty Sabo, is doing

report approval.

I want to also pay my compliments and congratulations to the staff, Tom Kingfield, Greg Dahlberg, and Kenny Kraft for the fine job that they have done on this bill.

As my colleague, the gentleman from Minnesota, has indicated, the bill provides some \$72,440,000 for the new headquarters account for the Coast Guard and \$1,518,963,000 for operating expenses.

For acquisition, construction, and improvements, the Coast Guard is generously funded at \$409 million.

The bill provides \$54,574,000 for the Federal Aviation Administration headquarters and \$2,456,783,000 for operations.

Facilities and equipment is funded at \$625 million.

In the conference report's statement of the managers, we point out the fact that the FAA might not be able to ob-

Mr. COUGHLIN. Mr. Speaker, I a superb job of honchoing conference ligate the full amount of the budget request in fiscal year 1983. Hence, this account contains a reduction and a promise to consider a supplemental should the level of activities be accelerated. Funds are to be utilized so as not to adversely affect aviation safety. efficiency or economy, and to continue the MLS and FSS modernization programs on schedule.

In the Federal Highway Administration, what is of interest here is what is not in the conference report, because interstate transfer grants have already been funded for the entire year in the continuing resolution.

For urban mass transportation, the conference report provides \$1,606 million in section 3 urban discretionary grants for new starts and ongoing projects and \$1,200 million for section five urban formula grants. The funds are to be distributed one-fourth under the 1970 census and three-fourths under the 1980 census.

The conference report in total is about \$320 million above the President's budget request, but as my colleague, the gentleman from Minnesota has indicated, we have been informed that the Office of Management and Budget will recommend that the bill be signed.

Mr. Speaker, the bill that is before the House at the moment is a good bill. We hope that the bill will be passed by this House and will be

signed into law.

Mr. SABO. Mr. Speaker, I yield 2 minutes to the gentleman from Oregon (Mr. AuCoin).

Mr. AuCOIN. Mr. Speaker, I rise in strong support of this conference agreement on the 1983 transportation

programs.

Not only have we continued to fund this country's critical highway, mass transit, rail, and airway systems, but we have also managed to make responsible budget cuts and remain under

the administration's request.

I would, however, at this time like to make a point for the record, and that is that although we have made budget reductions in a move toward greater austerity in these federally funded programs, it is not the intent of the subcommittee or the conferees to in any way diminish the mandate for effective safety programs administered by the National Highway Traffic Safety Administration.

I have raised some concerns over the effectiveness of the seatbelt promotion program currently in place and the conferees have instructed NHTSA to set a goal for increased use along with a timeframe for achieving it. A Government-wide mandatory safety belt

use policy is also called for.

I remain concerned, however, about the possible impact any future reductions in staff may have on the ability of the agency to carry out its statutory mandate to increase traffic safety on this Nation's highways. For that reason, Mr. Speaker, let the record show that the Appropriations Committee expects to be notified in advance of any plans NHTSA has to reduce the current employee level of 640 personnel.

Mr. SABO. Mr. Speaker, I yield such time as he may consume to the gentleman Massachusetts from

STUDDS).

Mr. STUDDS. Mr. Speaker, I thank the gentleman for yielding.

I would like to ask a question, if I may, of the conferees.

Last March the Coast Guard announced plans to remove almost 1,300, or 25 percent, of all aids to navigation from the coastal waters of New England and the Mid-Atlantic States. This action was deemed necessary because of a \$1.4 million cut in funds allocated in aids to navigation teams.

Last September when this bill was considered on the House floor, I offered an amendment providing for the transfer of \$14 million in unneeded funds from the retirement pay account to the operating expenses account. This money was to be used for several purposes, but most particularly the restoration of the aids to navigation teams.

The conference report before us includes a total of \$1.591 billion for operating expenses for the Coast Guard, an amount \$4 million higher than the total originally brought to the House floor and \$14 million higher than the administration request.

My question to the gentleman is whether, in the opinion of the conferees, there is \$1.4 million in this bill to save the aids to navigation teams?

Mr. SABO. The answer is "yes." Mr. STUDDS. Mr. Speaker, I thank the gentleman.

Mr. COUGHLIN. Mr. Speaker, I

yield 2 minutes to the gentleman from

Pennsylvania (Mr. Walker).
Mr. WALKER. Mr. Speaker, I have a concern about one of the amendments that was adopted in the conference committee regarding the St. Lawrence Seaway, that is an amendment which would in effect forgive about \$109 million of outstanding debt which has been paid through user fees up until now and which we are now going to forgive. In a rather remarkable effort to bypass the authorizing committees, the Senate Appropriations Committee attached this rider and as of now the conferees have accepted it.

I am hopeful that my colleagues will agree with me and recede from this amendment at the appropriate time in

our consideration.

This particular exemption is inconsistent with any effort to assure cost accountability in water resource development. Conservation organizations, the administration, and others are trying to establish a principle of having user fees finance water resources and water resource development. This waiver of the St. Lawrence Seaway debt would set a very unfortunate principle, in my opinion. It would suggest that any user fee to be imposed in the future need not be taken seriously because of what we are about to do here.

U.S. share of construction of this particular project was \$139 million. The seaway opened in 1959 and during the next 11 years about \$30 million were paid back. Now we are going to say that the other \$109 million simply is not going to be paid and I think that is wrong.

The President has proposed greater reliance on user fees to help finance Federal water projects and it seems to me that any kind of a rational Federal Water policy depends upon a rational

investment policy.

The Office of Management and Budget expressed concerns about this particular amendment when this bill

went to the conference committee. But the conferees chose not to go the route of removing this language.

I think the House today should insist upon its disagreement and that we ought to make certain that our water resource policy for the future reflects user fee development so that we have a rational investment policy.

#### □ 1730

Mr. SABO. Mr. Speaker, I yield such time as he may consume to the gentleman from Michigan (Mr. DINGELL).

Mr. DINGELL. I thank the gentle-

man for yielding.

Mr. Speaker, I rise in regard to the conference report, H.R. 7019, Department of Transportation Appropriations and as the report refers to safety belt use programs conducted by the National Highway Traffic Safety Administration.

I support the concept of the safety belt use program and regret that adequate progress has not been made in previous years to get American motorists to use the safety belts available in motor vehicles.

However, with the initiation of this program and new effort and methods to encourage safety belt use, I am hopeful that usage rates will begin to go up and that the Congess can be influential in helping guide an effective program. I am an advocate of safety belt use but I share the conferees' concern about the cost-effectiveness of this NHTSA educational program. I hope we will begin to see some positive results in the very near future.

At the same time, Mr. Speaker, as we adopt this conference report. I believe it important that the House not send any wrong signal to the American people about their need for safety belt use and the need for effective safety belt use educational programs that are already ongoing throughout nation as the result of efforts by NHTSA and other numerous groups and organizations.

National Highway Traffic Safety Administration is one of the main focal points for the dissemination of information about the need for safety belt use by American motorists.

Working with the NHTSA are scores of concerned individuals and groups:

The Parent-Teacher Association. American Red Cross, Boy Scouts, Girl Scouts, National Education Association, law enforcement and emergency medical services groups, child health groups, American Academy of Family Physicians and other medical groups, Federation of Women's Clubs, American Automobile Association, consumer groups, labor, Motor Vehicle Manufacturers Association, business and industry and trade associations, automobile dealers, and many, many more.

We have all seen the efforts of these groups in both the electronic and print media. There already is a substantial campaign going forward to encourage belt use in motor vehicles and there should be no back tracking.

Over 90 percent of the vehicles on the road today are equipped with either the three-point lap and shoulder safety belt system or the lap belt. They should be used at all times.

Safety belts when worn are a most effective device to prevent fatalities or injuries in motor vehicle crashes. Drivers of motor vehicles should always be buckled up as the driver is the one with the responsibility to maintain control of the car or truck in order to take evasive action to avoid a possible accident. If the driver is not properly buckled into the seat in the proper seating positon, the risk is loss of control of the automobile and a resulting crash that otherwise might have been avoided. Safety belts hold you in place and save lives.

The NHTSA estimates that as of 1981, safety belt use was at 11 percent. That is not good enough for anyone. The NHTSA does advise us, though, that they are encouraged by more and more reports of belt usage through their efforts and those of the various automobile occupant, safety-minded organizations. The awareness program is growing. We should not want to see a lessening of public interest in safety belts. The use of safety belt messages in the many automobile manufacturers' television commercials is commendable and others can and will do their share as long as our congressional and Federal Government efforts remain spirited and we work for the goal of increasing safety belt usage rates.

The NHTSA further advises that with each 1 percentage point increase in belt use per year, this results in \$100 millon in savings overall to society.

ty.

I believe Congress must keep the focus of attention on safety belt use programs and increase participation of as many organizations as possible.

We know other countries already have successful and acceptable safety belt use laws. In the United States, 16 States have adopted specific requirements regarding the use of child restraint devices.

My State of Michigan is trying to enact a State safety belt use law.

I am also mindful that our colleagues supported the program in the recently passed highway jobs bill by providing the States with funds to conduct "programs to encourage the use of safety belts by drivers of, and passengers in, motor vehicles."

The House language on that bill, H.R. 7360, should be maintained by Congress to further aid us in programs to save the lives of American motorists through increased use of safety belts.

Mr. Speaker, I read with great care the language of the conferees on pages 12-13 of the conference report (H. Rept. No. 97-960) on H.R. 7019 and I have no objection to the conferees establishing the two conditions for further funding. I think they request information that is appropriate to obtain and I would expect NHTSA to provide the same information to me, as chairman of the Committee on Energy and Commerce, and to the subcommittee chairman, Mr. Wirth.

However, I am concerned that this program not be delayed because I believe it can help to save lives and that is what I believe is most important. Also, I am concerned about the suggestion that the Committee on Appropriations are indicating through this report that they have to approve the written submissions prior to NHTSA obligation of additional contracts. Committee approval of this nature is akin to a committee veto which, I note, is not a recognized practice under the Constitution and the House Rules.

Nevertheless, our committee wants to work cooperatively to insure that the program is worthwhile and that funds are not wasted. I presume that is their goal, which I share, and that they, like our committee, would not want to try to balance costs versus lives saved. If lives can be saved through this program by encouraging public use of seatbelts, then I feel certain each of our committees will want to put aside our reservations-which all of us may share about any type of promotion type program funded with Federal funds-in favor of saving lives and encouraging the program.

Mr. SABO. Mr. Speaker. I yield such time as she may consume to the gentlewoman from Ohio (Ms. Oakar).

Ms. OAKAR. I thank the gentleman for yielding.

Mr. Speaker, I certainly support this conference report.

The Midwest is fortunate to have an extensive network of rivers and lakes that provide its great cities with direct waterborne access to all the major seaports of the world. The Midwest is indeed the fourth seacoast of our country. To properly utilize the north coast of the United States, the St. Lawrence Seaway was constructed in the 1950's. My own city of Cleveland is strategically located and its port should be bustling.

Unfortunately, the St. Lawrence Seaway continues to be burdened by a construction debt of nearly \$110 million and annual interest charges of \$2 million. This burden constitutes a disincentive to the proper utilization of this national asset. The St. Lawrence Seaway is the only Federal waterway with substantial user fees. Continued debt service drives up the cost of shipping in the region and drives down its economic vitality. The seaway is the only waterway in our country which

has had to generate revenues for its construction.

Canada relieved the St. Lawrence Seaway Development Corp. of the debt owed long ago. We should do the same. Relieving the seaway of the debt would achieve a long-sought purpose, providing a measure of equity for America's north coast, fostering competition by facilitating access of the industrial and agricultural output of our country's heartland to the channels of world trade.

I urge my colleagues to concur with the conference report to H.R. 7019 and relieve the Great Lakes of the debt burden that has been stifling trade in our region and contributing to its already worrisome economic problems. Acceptance of the conference report on the seaway construction debt forgiveness would be a wise step for the Midwest and for the country.

My colleagues, end this discrimination, support our conferees. At this point I would like to thank the House conferees for their concurrence with the Senate. Thank you also for your assistance to me personally on this issue. I am deeply grateful for your support.

Mr. COUGHLIN. Mr. Speaker, I would just simply rise to point out that the payments on the St. Lawrence Seaway, from the St. Lawrence Seaway tolls, the payback schedule calls for a very steep increase beginning in the year 1986. That increase in the payment of that debt would make the increase in tolls required, and make the St. Lawrence Seaway uncompetitive and hurt our competitive position as a nation in world trade.

Mr. SABO. Mr. Speaker, I yield such time as she may consume to the gentlewoman from Louisiana (Mrs. Boggs).

Mrs. BOGGS. I thank the gentleman for yielding.

Mr. Speaker, I would like to ask the gentleman from Minnesota a question.

As the gentleman knows, I have been interested for a very long time in the safety of the vital marine transportation in the Lower Mississippi River Basin and I would like to ask if the gentleman can assure me that within this bill there is sufficient funding for the continuation and implementation of the Vessel Traffic System, the VTS system, in the Metropolitan New Orleans area and down through the passes at the mouth of the Mississippi River?

Mr. SABO. The gentlewoman is accurate.

Mrs. BOGGS. I thank the gentleman very, very much.

Mr. MICHEL. Mr. Speaker, I want to express appreciation to the conferees for including \$3 million to continue work on the alteration and repair of the Peoria-Pekin Railroad Bridge.

This bridge was declared an unreasonable obstruction to navigation by the Coast Guard, and is the most hazardous bridge on the Illinois River. It is the only rail link across the Illinois River remaining in the Peoria area, and the alteration and repairs will insure that it remains open and usable. We had another rail bridge collapse 10 years ago after being hit by a barge, and it would be a disaster for the area if that happened again.

So once again, I express appreciation to the conferees for their action.

• Mr. CONTE. Mr. Speaker, I rise in support of the conference report to accompany H.R. 7019, making appropriations for the Department of Transportation and related agencies for fiscal year 1983.

I would particularly like to commend our chairman, the gentleman from Florida (Mr. LEHMAN), who has led the subcommittee under very difficult circumstances, and our ranking minority member, the gentleman from Pennsylvania (Mr. Coughlin). We have all worked very hard on this bill, and the end result is a good one.

I would particularly note a few items in this bill. We have provided \$700 million in grants for Amtrak, an amount that is less than both the House and Senate-passed bills. Nevertheless, we have been assured that Amtrak can continue to serve its existing routes

with this level of funding.

For the Urban Mass Transit Administration's section 18 nonurban formula program, we have provided \$68.5 million, the Senate figure. This program provides for the operation of transit systems outside of major cities, including several in my part of western Massachusetts. This amount will permit the support of ongoing transit programs at the 1982 level.

For the Coast Guard, which has traditionally had to rely on the hand-medowns from the Navy and other services, we have provided \$409 million for acquisition, construction, and improvements. This amount will help the Coast Guard enforce the 200-mile territorial limit, perform its traditional boating safety and search and rescue mission, and meet its increased responsibilities in stopping over-water drug smuggling.

Mr. Speaker, I support this conference report and urge its adoption by

my colleagues.

Mr. YOUNG of Alaska. Mr. Speaker, I rise in support of the conference report on H.R. 7019, the Department of Transportation appropriation bill. Included in this bill is the fiscal year 1983 appropriation for the Coast Guard.

Mr. Speaker, we know through extensive oversight and study during this Congress that the traditional Coast Guard functions of promoting safety of life and property at sea must be preserved, continued and, I might add,

adequately funded. Among those functions are the all-important search and rescue, enforcement of laws and treaties, maritime safety, and national defense. We can no longer ask them to do more and more with less and less as has been the case in the past decade. It seems that whenever the United States requires expertise in the maritime area, it turns to the Coast Guard to do the job. But the budget has simply not kept pace. Thus, it is extremely important that we provide proper and adequate funding for these important programs.

This conference report takes a great step in this direction. I am particularly pleased that the amendments we adopted providing for additional funds for operating expenses and for Reserve training have been retained. The operating expense money will be used to carry out those important day-today functions of the Coast Guard and the Reserve training will be used for

national defense by maintaining the Coast Guard Reserve at the newly authorized level of 12,000 Ready Reserv-

I know, however, that the levels of funding are still below those in the Coast Guard authorization bill for Fiscal Year 1983, particularly for operating expenses. I suspect that we will once again during the course of the next Congress be faced with adding money in a supplemental appropriation for the Coast Guard. We know that with additional programs, such as the drug and migrant interdiction operation in the south Florida-Caribbean area, the Coast Guard is being stretched thin throughout the rest of the country. We must be sure that its personnel and facilities are not being overtaxed and that they do not run out of fuel and parts for their ships and aircraft simply due to the lack of proper funding.

As the Representative from the State of Alaska, you have heard me repeat time and time again that the services of the Coast Guard are extremely valuable and essential in that region. However, I submit that they are essential through the entire maritime community and ultimately to the Nation as a whole. We in Alaska need both effective fisheries law enforcement and search and rescue coverage to protect both the livelihood and the lives of our people. All of us need the services of the Coast Guard. Therefore, I urge that the conference report be adopted today.

Mr. COUGHLIN. Mr. Speaker, have no further requests for time and I yield back the balance of my time.

Mr. SABO. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. Speaker, I move the previous question on the conference report.

The previous question was ordered. The conference report was agreed to. Speaker, I ask unanimous consent that

A motion to reconsider was laid on the table.

AMENDMENTS IN DISAGREEMENT

The SPEAKER pro tempore. The Clerk will designate the first amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 2: Page 2, line 10, rike out "\$37,532,000" and insert strike \*\$41,700,000".

MOTION OFFERED BY MR. SABO

Mr. SABO. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. Sabo moves that the House recede from its disagreement to the amendment of the Senate numbered 2 and concur therein with an amendment, as follows: In lieu of the matter stricken and inserted by said amendment, insert the following: "\$40,000,000, of which \$1,000,000 shall be transferred and made available to the Motor Carrier Ratemaking Study Commission

Mr. SABO (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

Senate amendment No. 6; Page 3, after line 11, insert:

## HEADQUARTERS ADMINISTRATION

For necessary expenses, not otherwise provided for, of providing administrative services at the headquarters location of the Coast Guard, including, but not limited to, executive direction; budget, planning and policy; command, control, communication, and operations; financial management; legal; engineering; civil rights; and personnel and health services for the Coast Guard, \$72,440,000.

MOTION OFFERED BY MR. SABO

Mr. SABO. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. Sabo moves that the House recede from its disagreement to the amendment of the Senate numbered 6 and concur therein with an amendment, as follows: In lieu of the matter inserted by said amendment, insert the following:

# HEADQUARTERS ADMINISTRATION (INCLUDING TRANSFER OF FUNDS)

For necessary expenses, not otherwise provided for, of providing administrative services at the headquarters location of the Coast Guard, including, but not limited to, executive direction; budget, planning and policy; command, control, communication, and operations; financial management; legal; engineering; civil rights; and personnel and health services for the Coast Guard, \$72,440,000, of which \$14,000,000 shall be derived by transfer from appropriations for Retired pay.

Mr. SABO (during the reading). Mr.

the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Minnesota?

There was no objection. The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 11: Page 5, line 6, strike out all after "services," down to and including "pay" in line 8 and insert "\$54,000,000".

MOTION OFFERED BY MR. SABO

Mr. SABO. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. Sabo moves that the House recede from its disagreement to the amendment of the Senate numbered 11 and concur therein with an amendment, as follows: In lieu of the matter stricken and inserted by said amendment, insert the following: "\$50,000,000 together with an amount not to exceed \$4,000,000 which shall be derived from appropriations for Retired pay".

Mr. SABO (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Minnesota?

There was no objection. The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 15: Page 7, line 3, strike out "\$1,000,000,000" and insert "\$1,464,150,000".

MOTION OFFERED BY MR. SABO

Mr. SABO. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. Sabo moves that the House recede from its disagreement to the amendment of the Senate numbered 15 and concur therein.

The SPEAKER pro tempore. For what purpose does the gentleman from California (Mr. MINETA) rise?
Mr. MINETA. Mr. Speaker, I

Mr. MINETA. Mr. Speaker, I demand that the question be divided.

The SPEAKER pro tempore. The question will be divided.

The gentleman from Minnesota (Mr. Sabo) is recognized for 30 minutes. Does the gentleman wish to debate?

Mr. MINETA. Mr. Speaker, I offer a preferential motion.

The SPEAKER pro tempore. The question has not been divided as yet.

Does the gentleman from Minnesota (Mr. Sabo) wish to debate?

Mr. SABO. No, Mr. Speaker, I do not.

The SPEAKER pro tempore. The question is, will the House recede from its disagreement to Senate amendment numbered 15?

The House receded from its disagreement to Senate amendment numbered 15.

PREFERENTIAL MOTION OFFERED BY MR. MINETA Mr. MINETA. Mr. Speaker, I offer a preferential motion.

The Clerk read as follows:

Mr. Mineta moves that the House concur in Senate amendment No. 15 with an amendment as follows: In lieu of the matter proposed to be inserted by the Senate amendment, insert the following: "\$1,264,000,000".

The SPEAKER pro tempore. Does the gentleman yield to the gentleman from California?

Mr. SABO. Mr. Speaker, I yield to the gentleman from California.

Mr. MINETA. Mr. Speaker, the amendment I have offered will make the appropriation from the airport and airways trust fund for FAA operations consistent with the authorization legislation which we passed only 4 months ago.

When we reviewed the airport and airways trust fund program as part of the August tax bill, we carefully crafted provisions to insure that there would be a proper balance between trust fund spending for capital development of airports and airways and trust fund spending for FAA operations. This balance was part of a package in which aviation user groups were asked to pay substantially increased taxes, but with the assurance that there were carefully prescribed limits on how much of their tax money could go to pay for the salaries of FAA employees rather than to the original purpose of the trust fund, which was to provide for urgently needed capital development.

The appropriations conference proposal violates that assurance. The legislation this Congress recently enacted requires that the authorized level for FAA operations is automatically reduced if there is not full funding of capital development, the primary purpose of the trust fund. The conferees on the appropriations bill did not follow that provision and, as a result, the conferees would spend \$200 million more from the trust fund for operations than is authorized.

My amendment will reduce trust fund expenditures for operations by \$200 million, restoring the balance contemplated by the authorizing legislation. I emphasize that my amendment will have no adverse effect on aviation safety. I am not proposing a reduction in the total appropriations for FAA operations; I am only proposing that we follow the authorizing legislation in determining the portion of the total for operations which is taken from the user-supported trust fund.

The issue here is equity for the many users of the aviation system. The user fee and operations increases which we agreed to were substantial. The airline passenger ticket tax went from 5 percent to 8 percent, and the tax on general aviation fuel went from 4 cents per gallon to 12 cents per

gallon for gasoline, and from no tax to 14 cents for jet fuel.

We further agreed to allow more than 70 percent of the direct expenses of operating the airways to be taken from the trust fund. Past appropriations for this purpose have been considerably lower. The highest appropriation under prior law was \$450 million in fiscal year 1981, compared to the \$1.4 billion possible in fiscal year 1983 under the new authorizing legislation.

We were extremely reluctant to adopt these increases in view of past experience in which user fees were not spent as promised for capital development, but were allowed to accumulate in the trust fund or were used for FAA operations. The Congress agreed to increase user fees and spending for operations only after receiving assurances that the administration would support capital development.

The Congress also insisted on provisions to reduce trust fund support for operations if capital development was not funded as contemplated. In short, the authorizing legislation assured Congress and aviation user groups alike that capital development would remain the primary purpose of the trust fund.

Mr. Speaker, the users of the system are paying substantially increased taxes for capital development of the airports and airways.

## □ 1740

The legislation we adopted only a few months ago assured the users that capital development would be accomplished before these user fees were spent to cover FAA salaries in unprecedented amounts. Fairness and equity requires that we respect the assurance we gave the users only 4 months ago. My amendment will accomplish this result, and I urge its adoption.

Mr. ANDERSON. Mr. Speaker, will the gentleman yield?

Mr. MINETA. I yield to my distinguished colleague from California, the chairman of the Public Works and Transportation Subcommittee on Surface Transportation, who formerly chaired the Aviation Subcommittee.

Mr. ANDERSON. Mr. Speaker, I rise in strong support of this equitable amendment offered by my California colleague. I commend him on a fine iob.

As former chairman of the Subcommittee on Aviation, I am well aware of the constant struggle we have had to endure on attempted assaults on the airport and airways trust fund to pay for the Federal Aviation Administration's operating expenses.

As a conferee to title V of the August 1982 tax bill—commonly referred to as the airport and airway improvement provision—I am well aware of the precarious and carefully crafted

balance between the FAA's administrative expenses and the trust fund's badly needed and rightfully deserved capital development programs.

Contained within this legislation were increased taxes for many aviation user groups. Among some of these were the tripling of the fuel tax for general aviation from 4 cents a gallon to 12 cents a gallon; a 3 percent increase in the airline ticket tax; and, a 14 cents increase in the jet fuel tax. This money collected from the users should be spent on airport and airway improvement projects which would benefit those who must pay the higher tax. By all means, this trust fund money should not, I repeat not, be used to further the FAA's operating budget. If this were to happen it would be a complete break in faith with the many aviation users who expect, and more importantly deserve, trust money to be spent on developing and preserving our Nation's airport facilities which, to me, is extremely more important than an increase in the salaries of FAA employees.

I urge my colleagues to adopt the

Mineta motion.

Mr. MINETA. I thank the gentleman from California.

Mr. LEVITAS. Mr. Speaker, will the

gentleman yield?

Mr. MINETA. I yield to my colleague from Georgia, a distinguished member of the Aviation Subcommit-

Mr. LEVITAS. Mr. Speaker, I thank my colleague, the chairman of the subcommittee, for yielding to me. I want to rise in support of the motion offered by the gentleman from California, and commend him for taking this action.

The gentleman has clearly and succinctly explained the reason for this, but I would just want to emphasize two points, very briefly. The first is that, if we do not accept the language offered by the gentleman from California, then the very carefully crafted, negotiated result that we just finished legislating would be abrogated totally.

Second, the whole purpose of that fund was to do the specific things the program was designed to do, not to simply provide back door financing for the general operations of the Federal Aviation Administration. That is not the purpose of a user's tax, and to disproportionately take the user fees and use them for operational purposes in this disproportionate way, without the gentleman's amendment, would simply strike a blow not only at this trust fund but every other user fee and every other trust fund Congress has established.

I urge adoption of the gentleman's amendment.

Mr. SABO. Mr. Speaker, I rise in opposition to the amendment offered by the gentleman from California. This amendment is one in which the House yielded to the Senate. However, it is part of a larger total package in which many tradeoffs have been made-an agreement that we have been assured will be signed into law. I think the package in toto is good, and I would not like to see it disrupted.

The gentleman is accurate, amendment does not affect the total dollars available for FAA, but would simply rearrange the source of these dollars. On the other hand, let me indicate to the House that the uncommitted balance in the airport and airway trust fund is substantial. The projected uncommitted balance as of September 30, 1982, was \$2.15 billion. It is estimated to be at \$1.9 billion at the end of this fiscal year, so that the action of the conference committee and the action of the Senate, in which the House concurred, is of no great threat to the trust fund.

I would hope that the House would honor the agreement of the conferees. and not untangle the very delicate conference committee report that we have before us.

Mr. MINETA. Mr. Speaker, would the gentleman yield?

Mr. SABO. I yield to my distin-

guished colleague.

Mr. MINETA. Mr. Speaker, the problem is that, as we went through this whole program and we looked at the national airspace plan that Mr. HELMS has put before the Congress. and as we looked at the amount of revenues that would be generated and what was included in the program, and the spend out rates, that that starts in 1983; and our fear is that if this kind of drawdown takes place at this point, that in the outyears of 1985 and 1986 and 1987, we will then be shortchanging ourselves, so that we have a carefully crafted provision that took into consideration the income that we would be getting, the amount that is there in the balance, in the aviation trust fund, and that we do not want to see that shortfall as we get into the tremendously large computer buy that we are going to be necessarily getting into in replacing the computers that we have in the system right now.

So, that is why, when we originally talked about this ratio between facilities and equipment and the operations and maintenance to be taken out of the trust fund, we made sure that that ratio was a proper one, because we were imposing on the user community a higher sum to be taken from the trust fund; but more importantly, we wanted to make sure that there was not a shortfall in fiscal years 1985 and 1986 and 1987. That is why we are trying to make sure that this does not get out of balance, and why are we are asking for the reduction of \$200 million by this amendment.

I thank the gentleman for yielding. Mr. SABO. I might indicate, Mr.

Speaker, that the problem the gentle-

man from California outlines is one that I expect we would have to deal with if in fact it becomes reality. However, the fact of the matter is that the total dollars coming from the trust fund under the conference agreement is less than what had been originally recommended by the Senate. We reduced the funding for facilities and equipment, and the committee also indicated that while we were skeptical that FAA could spend all the money for facilities and equipment that they were requesting, we urged them, if in fact they could, to come back with a supplemental so that we might be able to deal with that issue later on.

Mr. COUGHLIN. Mr. Speaker, I yield 5 minutes to the gentleman from Kentucky (Mr. SNYDER).

Mr. SNYDER. Mr. Speaker, I rise in support of the gentleman's motion and urge my colleagues to do the same.

As he has indicated, the DOT appropriations conferees agreed to fund operations and maintenance (O&M) from the airport and airway trust fund at a level of \$1.46 billion or \$200 million over the authorized amount. As the ranking member of the Aviation Subcommittee, I submit to my colleagues that this is not only beyond the scope of the authorization but also constitutes a breach of faith with the aviation community and the traveling public which, since September 1 of this year, have been paying substantially more in taxes than had been the case before.

When Congress passed the President's tax bill prior to Labor Day it also adopted 5-year authorizations for aviation programs funded out of the airport and airway trust fund. In adopting these authorizations, we linked the authorizations for the capital development programs with the level of operations and maintenance funding we would allow to be derived from the trust fund. Therefore, we provided that shortfalls in funding for the capital programs would result in a 2-for-1 reduction in the authorization for trust fund O&M.

Unfortunately, in exercising their prerogatives to appropriate \$625 million rather than the authorized amount of \$725 million for the facilities and equipment program—which is the program designed to modernize the air traffic control system-the appropriations conferees overstepped their authority by appropriating \$200 million more than the authorization for trust fund operations and maintenance.

Mr. Speaker, I submit to my colleagues that it is just this kind of possibility that prompted us to put this in the authorizing law to begin with. While we reluctantly agreed to increase use taxes and substantially increase the trust fund O&M contribution, we did so only on the basis that

spending for the capital programs would reflect the absolute minimum which was needed to increase the safety and capacity or our airport and airway system. If for one reason or another, spending for the capital programs was going to be less than authorized levels, we wanted to be sure that the trust fund O&M levels were also reduced and that the delicate balance between capital and operating costs was maintained. Unfortunately, the appropriations conferees reduced facilities and equipment funding without reducing trust fund O&M as required by section 506(c) of Public Law 97-248 (the tax bill).

Finally, I want to say that what has been done by the appropriations conferees is an affront to every authorizing committee in this Congress.

If they can be permitted to appropriate more than the authorized amount—especially when the Presiauthorized dent's signature on that authorization is only 3 months old-we may as well just fold our tents and go home. There is no reason for those of us who live with and understand these programs to even waste our time if this kind of action is allowed to stand.

For the foregoing reasons, I urge my colleagues to support the gentleman's motion.

# □ 1750

Mr. COUGHLIN. Mr. Speaker, I yield 5 minutes to the gentleman from California (Mr. CLAUSEN).

Mr. CLAUSEN. Mr. Speaker, I also rise in support of the gentleman's motion and urge my colleagues to adopt it.

Many of you are undoubtedly familiar with the age-old controversy involving the appropriate level of trust fund spending for FAA's operations and maintenance (O&M).

Like many who have been actively involved with aviation most of our lives, I have always felt that the primary purpose of the trust fund should be the funding of necessary capital programs to improve our airports and airways.

Only if the aviation infrastructure is adequately funded should the balance of available revenues go toward de-fraying that part of FAA's routine O&M expenses.

Unfortunately, the appropriations conferees seem to have rearranged the funding priorities established by the Congress only 3 months ago.

They are asking this body to fund the facilities and equipment (F&E) program at \$625 million rather than at the authorized amount of \$725 million.

While I am not happy with this, I realize that the Appropriations Committee is not bound to appropriate the authorized amount for a particular program.

I think they are wrong in the case of the F&E program, but my attitude can

acceptance.

However, just as the appropriations conferees are exercising their prerogatives to fund the F&E program \$100 million below the authorization, we on the authorizing committee exercised our prerogatives when we passed the 5-year ADAP statute as part of Public Law 97-248.

concerned about what We were would happen if others in the Congress or the administration did not share our belief that funding for the capital programs should not be less than the authorized amounts.

We determined that should this a corresponding reduction occur. would be made in the authorization for trust fund O&M, which was set for fiscal year 1983 at a maximum of \$1.46 billion.

Therefore, since the appropriations conferees have reduced F&E funding by \$100 million, the law requires a 2 for 1 or \$200 million reduction in the O&M authorization to \$1.26 billion.

It is this reduction which the conferees did not make and which would occur if the gentleman's motion is adopted.

Mr. Speaker, I submit to my colleagues that to protect the integrity of the authorization process, as well as to keep Congress part of the bargain it made with aviation users only 3 months ago, that we support the gentleman's motion.

Mr. COUGHLIN. Mr. Speaker, I yield myself such time as I may consume

Mr. Speaker, I take this time simply to say that, as the gentleman from Minnesota (Mr. Sabo) so correctly pointed out, this bill is the product of a great deal of work and give and take between the House and the other body, and I would be very reluctant to see us rock the boat by having this disagreed to.

It is a bill that can be signed, we are advised, by the administration, and I do not know what effect this would have on that.

I do not now what effect it will have when it goes back over to the other body, but certainly it seems to me this is not the time to change the very delicate balance that we already have in this bill.

Let me also say that we are, of course, simply setting funding levels for these various accounts, funding levels that are set through the appropriations process, and I think that that is entirely within our prerogative.

Mr. SABO. Mr. Speaker, I yield such time as he may consume to the gentleman from California (Mr. John L. BURTON).

Mr. JOHN L. BURTON. Mr. Speaker, I thank the gentleman for yielding this time to me.

Mr. Speaker, I certainly support my colleague, the gentleman from Califor-

best be described as one of grudging nia (Mr. MINETA), as well as that distinguished Member, the gentleman from Kentucky (Mr. SNYDER). What we are being told here is: "don't worry about what the other committees in the House and the Senate happened to work out; if the conference committee of the Transportation Subcommittee of the Appropriations Committee decides to work out something different, that is fine."

> I have the greatest respect for the gentlemen and gentlewomen on that subcommittee, but what they are doing is really going against not only the spirit of a compromise that has been worked out but the dollars and cents of that compromise. There is going to be a tremendous amount of money that is going to be necessary to come from this trust fund when the time comes for the modernization of the computers that all of us know have had problems in the air traffic control system.

> To those Members who consider themselves conservative, as I consider some of my friends conservative, to take money from a trust fund for purposes like this has to go against the grain. To those of us who are liberal and think the whole concept of the unified budget is terrible where we lump trust funds into the general revenues that come from income taxes, excise taxes, and corporate taxes is wrong, this is the worst of both worlds. We are taking trust fund moneys and using them for what should be general revenue obligation. We are doing that out of a conference committee, not out of committee of this House and coming onto the floor of this House, and if the President is going to sign the bill now, I am certain that the motion offered by the gentleman from California (Mr. MINETA) is not going to take away the President's enthusiasm for the bill, for that President has no greater champion on this floor than the Honorable GENE SNYDER of Kentucky and Don Clausen of California, and they knew what they were talking about, absent GLENN Anderson and Norman Mineta of California.

> Our subcommittee has held hearings on FAA, on the procurement situation. We are concerned with what happens to this trust fund money, and it is just the wrong way to go at the wrong time. For us just to say that the President is going to support this bill but we do not know what he will do with this amendment, let me say that this amendment does not do anything more than bring in a little fiscal restraint and do things right.

> I urge the strongest possible support for the motion offered by the gentleman from California (Mr. MINETA). It is not our place to rewrite the business of this House in an appropriations conference committee. We had to give

something to the Senate, so we are not even writing it; it is the Senate that is writing it and telling us to take it. The Senate is telling us not even to take an Easter recess or a Christmas recess, and I certainly do not think we should take their language on this aviation trust fund.

Mr. Speaker, I strongly urge an aye vote on the Mineta amendment.

Mr. SABO. Mr. Speaker, I yield 2 minutes to the gentleman from

Kansas (Mr. GLICKMAN).

Mr. GLICKMAN. Mr. Speaker, my subcommittee of the Committee on Science and Technology is involved with aeronautics and aviation, and we have been actively involved in coming up with the funds for the new computer system and the modernization of the system.

Looking at this particular issue, I would have to believe that without exception we have to support the Mineta motion to reduce an unauthorized diversion of trust funds to FAA oper-

I think that this unauthorized diversion of funds, if allowed to stand, would constitute a breach of faith with aviation users who were promised basically, through many of the actions taken, and particularly through the leadership of the gentleman from California (Mr. MINETA), that their higher taxes would not be used disproportionately to fund FAA operations.

This action, if not challenged or stricken by the proposal of the gentleman from California (Mr. MINETA), would disrupt the delicate balance between trust fund spending for aviation capital programs and FAA operating expenses recently enacted into law. It would undermine the integrity of the aviation trust fund and the authoriza-

tion processes.

My judgment is that this is an attempt by the Office of Management and Budget to take operating moneys out of the trust fund, and I think that it would be very inappropriate and a slap in the face of aviation users who have paid these taxes all these years.

Therefore, Mr. Speaker, I urge my colleagues to support the Mineta motion to reduce the trust fund contribution to FAA operations by \$200

million.

# □ 1800

Mr. SABO. Mr. Speaker, I move the previous question on the motion.

The previous question was ordered The SPEAKER pro tempore. The question is, on the preferential motion offered by the gentleman from California (Mr. MINETA).

The preferential motion was agreed

Mr. SABO. Mr. Speaker, I ask unanimous consent to consider en bloc the several motions where the House recedes and concurs in amendments of the Senate numbered 16, 18, 28, 55, 69, 77, 81, and 92.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Minnesota?

Mr. WALKER. Mr. Speaker, I reserve the right to object.

Mr. SABO. Excuse me, Mr. Speaker, I will exclude No. 91.

Mr. WALKER. I thank the gentleman, and I withdraw my reservation of objection.

Mr. SABO. And I ask unanimous consent that they be considered as read and printed in the RECORD.

The SPEAKER pro tempore. there objection to the request of the gentleman from Minnesota?

There was no objection.

The Clerk designated Senate amendments 16, 18, 28, 55, 69, 77, and 92, as follows:

Senate amendment No. 16: Page 7, line 5, after "Provided," insert "That, in addition, not to exceed \$5,000,000 shall remain available until expended to be derived from the Airport and Airway Trust Fund for reimbursement of expenses incurred by certificated air carriers in the security screening of passengers moving in foreign air trans-portation: Provided further,".

Senate amendment No. 18: Page 7, line 10, after "program" insert ": Provided further, That not to exceed \$500,000 of the total amount available for operation shall be obligated for a contract with the National Academy of Sciences and the Federal Aviation Administration Administrator shall enter into an agreement with the National Academy of Sciences to study the state of knowledge, alternative approaches and the consequences of wind shear alert and severe weather condition standards relating to take-off and landing clearances for commercial and general aviation aircraft: Provided further, That the Academy shall complete the study within six months after funding arrangements have been made: Provided further, That the Federal Aviation Administration Administrator shall report to Congress within thirty days regarding the status of the contractual arrangements and the conditions necessary to implement the agreement with the National Academy of Sciences: Provided further, That the Department of Transportation shall furnish to the National Academy of Sciences any information which the Academy determines to be necessary for the purpose of conducting the study: Provided further, That not to exceed \$150,000 of the funds provided to the Federal Aviation Administration in this Act shall be available for doubling the number of windshear sensors at Moisant Airport in Kenner, Louisiana."

Senate amendment No. 28: Page 12, after line 18, insert:

#### HIGHWAY BEAUTIFICATION

For necessary expenses in carrying out section 131 of title 23, U.S.C. and section 104(a)(11) of the Surface Transportation Assistance Act of 1978, \$500,000 to remain available until expended.

Senate amendment No. 55: Page 22, line 7, after "apportioned" insert "and allocated"

Senate amendment No. 69: Page 26, line 25, strike out all after "expended" over to and including "payments" in line 15 on page 27 and insert "and such amounts as may be prior to September 30, 1982, under 49 U.S.C. 1376 and 1389: Provided, That, notwithstanding any other provision of law, none of the funds hereafter appropriated by this or any other Act shall be expended under section 406 (49 U.S.C. 1376) for services provided after September 30, 1982: Provided further, That, notwithstanding any other provision of law or of the previous provision of this paragraph, payments shall be made from funds appropriated herein and in accordance with the provisions of this paragraph to carriers providing, as of September 1982, services covered by rates fixed under section 406 of the Federal Aviation Act (excluding services covered by payments under section 419(a)(7) and services in the State of Alaska): Provided further, That, notwithstanding any other provision of law, such payments shall be based upon rate orders applicable to such carriers as of July 1, 1982, but shall not exceed \$13,500,000 in the aggregate: Provided further, That, notwithstanding any other provision of law, to the extent necessary to meet this limitation, such payments shall be reduced by a percentage which is the same for all carriers eligible for such payments: Provided further, That nothing in this Act shall be deemed to prevent the Board from granting an application under section 419(a)(11)(A) (49 U.S.C. 1389) pertaining to a carrier receiving compensation under this Act, in which event the standards and procedures set forth in section 419(a)(11)A) shall apply"

Senate amendment No. 77: Page 30, line 11, after "agencies" insert ": Provided further, That, to the extent that the resources of the Fund are not adequate to provide the amount of budget authority provided above, the Commission may incur obligations in advance of adequate receipts in the Fund'

Senate amendment No. 92: Page 39, after

line 23, insert:

"Sec. 321. Notwithstanding any other provision of law, no funds authorized to be appropriated for any fiscal year under provisions of the Federal-Aid Highway Act of 1956 shall hereafter be apportioned to any State which imposes a vehicle width limitation of more or less than 102 inches on any segment of the National System of Interstate and Defense Highways, or any other qualifying Federal-aid highways as designated by the Secretary of Transportation, with traffic lanes designed to be a width of twelve feet or more: *Provided*, That, not-withstanding any other provision of law, certain safety devices which the Secretary of Transportation determines as necessary for safe and efficient operation of motor vehicles shall not be included in the calculation of width: Provided further, That, notwithstanding any other provision of law or of this paragraph, a State may grant special use permits to motor vehicles that exceed 102 inches: Provided further, That, notwithstanding any other provision of law, no withholding of apportionment shall be imposed upon a State by virtue of the provisions of this paragraph prior to October 1,

#### MOTION OFFERED BY MR. SABO

Mr. SABO. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. Sabo moves that the House recede from its disagreement to the amendments of the Senate numbered 16, 18, 28, 55, 69, 77, and 92, and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 17: Page 7, line 10, after "program" insert ": Provided further, That the Federal Aviation Administration shall not undertake any reorganization of its regional office structure or begin any studies dealing with such a reorganization without the prior approval of both House and Senate Appropriations Committees".

MOTION OFFERED BY MR. SABO

Mr. SABO. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. Sabo moves that the House recede from its disagreement to the amendment of the Senate numbered 17 and concur therein with an amendment, as follows: In lieu of the matter inserted by said amendment, insert the following: ": Provided further, That the Federal Aviation Administration shall not undertake any reorganization of its regional office structure without the prior approval of both House and Senate Appropriations Committees"

Mr. SABO (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Minnesota?

There was no objection. The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amend-

ment in disagreement. The amendment reads as follows:

Senate amendment No. 43: Page 16, line 10, strike out all after "expended" down to and including "States" in line 23.

MOTION OFFERED BY MR. SABO

Mr. SABO. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. Sabo moves that the House recede from its disagreement to the amendment of the Senate numbered 43 and concur therein with an amendment, as follows: Restore the matter stricken by said amendment amended to read as follows: ", of which \$10,000,000 shall be derived from the unobligated balances of "Redeemable preference shares' Provided, That such sum shall be considered to have been appropriated to the Secretary under said section 713 for transfer to the Railroad Retirement Board for the payment of benefits under section 701 of Regional Rail Reorganization Act of 1973, as amended: Provided further, That, for pur poses of section 710 of the Regional Rail Reorganization Act of 1973 as added by section 1143 of the Northeast Rail Service Act. of 1981, such sum shall be considered to have been appropriated under section 713 of the Regional Rail Reorganization Act of 1973 and counted against the limitation on the total liability of the United States"

Mr. SABO (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Minnesota?

There was no objection. The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 45: Page 17, line 20, strike out "\$788,000,000" and insert '\$735,000,000".

MOTION OFFERED BY MR. SABO

Mr. SABO. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. Sabo moves that the House recede from its disagreement to the amendment of the Senate numbered 45 and concur therein with an amendment, as follows: In lieu of the sum proposed by said amendment, insert "\$700,000,000"

Mr. SABO (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. there objection to the request of the gentleman from Minnesota?

There was no objection. The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 46: Page 18, line 10, strike out all after "665" down to and including "regulations" in line 16.

MOTION OFFERED BY MR. SABO

Mr. SABO. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. Sabo moves that the House recede from its disagreement to the amendment of the Senate numbered 46 and concur therein with an amendment, as follows: Restore the matter stricken by said amendment amended to read as follows: ": Provided further, That, of the funds available, \$25,000,000 shall be held in reserve for 6 months after the date of enactment of this Act to be available for the rehabilitation, renewal, replacement, and other improvements on the line between Indianapolis, Indiana, Shelbyville, Indiana, and Cincinnati, Ohio: Provided further, That, of the funds available, \$5,000,00 shall be made available only for the rehabilitation, renewal, replacement, and other improvements on the line between Attleboro, Massachusetts, and Hyannis, Massachusetts, to ensure that such track will meet a minimum of class III standards as prescribed by applicable Feder al Railroad Administration regulations"

Mr. SABO (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Minnesota?

There was no objection. The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 47: Page 18, strike out all after line 18 over to and including line 2 on page 19, and insert:

For necessary expenses to carry out the commuter rail activities authorized by the Northeast Rail Service Act of \$75,000,000 to remain available until expended, to be derived from the unobligated balances of "Payments for purchase of ConMOTION OFFERED BY MR. SABO

Mr. SABO. Mr. Speaker, I offer a motion

The Clerk read as follows:

Mr. Sabo moves that the House recede from its disagreement to the amendment of the Senate numbered 47 and concur therein with an amendment, as follows: In lieu of the matter stricken and inserted by said amendment, insert the following:

For necessary expenses to carry out the commuter rail activities authorized by section 601(d) of the Rail Passenger Service Act (45 U.S.C. 601), as amended, \$15,000,000, to remain available until expended and to be derived from the unobligated balances of "Redeemable preference shares", and for necessary expenses to carry out section 1139(b) of Public Law 97-35, \$75,000,000, to remain available until expended and to be derived from the unobligated balances of "Payments for purchase of Conrail securi-

Mr. SABO (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 53: Page 21, line 16, strike out "\$1,630,000,000" and insert "\$1,621,700,000".

MOTION OFFERED BY MR. SABO Mr. SABO. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. Sabo moves that the House recede from its disgreement to the amendment of the Senate numbered 53 and concur therein with an amendment, as follows: In lieu of the sum proposed by said amendment, insert the following: "\$1,606,000,000".

Mr. SABO (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 56: Page 22, lines 7 and 8, strike out "the same decennial census data which is used to distribute funds for Urban formula grants" and insert "data from the 1980 decennial census".

MOTION OFFERED BY MR. SABO

Mr. SABO. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. Sabo moves that the House recede from its disagreement to the amendment of the Senate numbered 56 and concur therein with an amendment, as follows: In lieu of the matter stricken and inserted by said amendment, insert the following: "data from the 1970 decennial census for onequarter of the sums appropriated and the remainder shall be apportioned and allocated on the basis of data from the 1980 decennial census".

Mr. SABO (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the

gentleman from Minnesota?

Mr. FRENZEL. Mr. Speaker, reserving the right to object: while I was unavoidably out of the Chamber for an important committee meeting I understand that the House accepted this conference report by a voice vote. I am reserving the right to object simply to indicate my disappointment that this body is willing to spend \$11 billion of the taxpayers' money without so much as an attempt for a recorded vote, notwithstanding the fact that the conference report is well over the budget resolution.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Minnesota?

There was no objection. The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 59: Page 22, lines 16, 17, and 18, strike out "1970 decennial census for one-half of the sums appropriated and the remainder shall be apportioned and allocated on the basis of data from the".

Mr. SABO. Mr. Speaker, I offer a

motion.

The Clerk read as follows:

Mr. Sabo moves that the House recede from its disagreement to the amendment of the Senate numbered 59 and concur therein with an amendment, as follows: Restore the matter stricken by said amendment amended to read as follows: "1970 decennial census for one-quarter of the sums appropriated and the remainder shall be apportioned and allocated on the basis of data from the ".

Mr. SABO (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the Record.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Minnesota?

There was no objection. The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 66: Page 26, line 18, strike out "\$24,350,000" and insert "\$21,900,000".

MOTION OFFERED BY MR. SABO

Mr. SABO. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. Sabo moves that the House recede from its disagreement to the amendment of the Senate numbered 66 and concur therein with an amendment, as follows: In lieu of the matter stricken and inserted by said amendment, insert the following: "\$23,125,000: Provided, That of the foregoing amount, not to exceed \$10,625,000 shall be made available for the period between April 1, 1983, and September 30, 1983".

Mr. SABO (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Minnesota?

There was no objection. The motion was agreed to.

The SPEAKER pro tempore. The clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 72: Page 28, line 17, after "5901-5902);" insert "offical reception and representation expenses of the Board:".

MOTION OFFERED BY MR. SABO

Mr. SABO. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. Sabo moves that the House recede from its disagreement to the amendment of the Senate numbered 72 and concur therein with an amendment, as follows: In lieu of the matter inserted by said amendment, insert the following: "not to exceed \$8,000 for official reception and representation expenses of the Board;".

Mr. SABO (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Minnesota?

There was no objection. The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 91: Page 37, after line 11, insert:

SEC. 311. Notwithstanding any other provision of law, any bond issued under section 5 of the Act of May 13, 1954 (68 Stat. 94; 33 U.S.C. 985), is hereby canceled together with the obligation to pay such bond and section 12(b)(5) of such Act is hereby repealed: Provided, That paragraphs (10), (11), and (12) of section 4 of the Act of May 13, 1954, are hereby redesignated as paragraphs (11), (12), and (13) respectively and a new paragraph (10) is enacted to read as follows:

"(10) may retain toll revenues for purposes of eventual reinvestment in the Seaway".

MOTION OFFERED BY MR. SABO

Mr. SABO. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. Sabo moves that the House recede from its disagreement to the amendment of the Senate numbered 91 and concur therein.

Mr. WALKER. Mr. Speaker, demand a division of the question.

The SPEAKER pro tempore. The question will be divided.

Does the gentleman from Minnesota wish to be yielded time for debate at this time?

Mr. SABO. No, Mr. Speaker. I have no opposition.

The SPEAKER pro tempore. The question is, Will the House recede from its disagreement to Senate amendment No. 91?

The question was taken; and the Speaker pro tempore announced that the noes appeared to have it.

Mr. WALKER. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

# PARLIAMENTARY INQUIRIES

Mr. ROE. Mr. Speaker, I have a parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state his parliamentary inquiry.

Mr. ROE. Mr. Speaker, am I under the impression that the vote we will be taking on this issue, if we vote no on the issue that means we disagree with the division?

The SPEAKER pro tempore. If the House refuses to recede from disagreement then a motion to insist on disagreement would be in order.

Mr. ROE. By voting no on this motion?

The SPEAKER pro tempore. A motion to insist would then be in order. The question is whether or not the House will recede from disagreement, and if you vote aye then you are voting to recede from disagreement.

Mr. SABO. Mr. Speaker, I have a parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state his parliamentary inquiry.

Mr. SABO. The gentleman has requested a roll call on the motion to recede.

The SPEAKER pro tempore. The gentleman is correct.

Mr. ROE. Mr. Speaker, my parliamentary inquiry is that a "no" vote would mean that we would concur with the committee's position on Senate amendment No. 91?

The SPEAKER pro tempore. A "no" vote would mean that a motion to insist on disagreement would be in order.

Mr. SABO. Mr. Speaker, further parliamentary inquiry.

I did not understand the response.

If a Member wishes to support the position of the conference committee—

The SPEAKER pro tempore. Then the gentleman would vote aye.

Mr. SABO. It would be an "aye" vote. I thank the Speaker.

The vote was taken by electronic device and there were—yeas 298, nays 77, not voting 58 as follows:

Moffett

Garcia

Messrs. GREGG, WATKINS, NEAL, PANETTA, and HARKIN changed their votes from "yea" to "nay."

So the House receded from its disagreement to Senate amendment No.

The result of the vote was announced as above recorded.

(By unanimous consent, Mr. WRIGHT was allowed to speak out of order.)

# LEGISLATIVE PROGRAM

Mr. WRIGHT. Mr. Speaker, I have sought this time in order that I might announce to the House the program for the remainder of today and what we expect to accomplish tomorrow.

After the conclusion of this matter, which involves I believe two additional motions that are thought to be relatively noncontroversial, it then will be in order for the House to consider a highly privileged matter brought by

the Committee on Public Works, the question of a contempt citation. Depending upon the disposition of the membership, that matter might consume as much as 2 hours of debate. That will undoubtedly produce a vote at the conclusion of that debate; so Members should be advised that there will be one more important vote in which the Congress as a whole and presumably every Member has a quite considerable interest.

Following the disposition of that matter, then it is the plan that we would begin general debate under the rule earlier adopted today on the immigration bill and that we would consume 2 hours of that debate this evening and then rise.

The remainder of that general debate, with 3 hours remaining, would be put over until tomorrow.

We intend the first thing tomorrow to bring to the House the Caribbean Initiative.

Mr. Speaker, I thought it was important for Members to know this. We will convene at 10 o'clock tomorrow under an agreement already gained.

I do not have any knowledge to spread about how long we will be in session. Obviously, we will be in session until it is possible to achieve an agreement with the other body and with the White House over the continuing resolution. Whether that is sometime late tomorrow, whether it is sometime Saturday, or whether it is possibly Monday, I do not have any knowledge at this time. Members ask and I understand their concern. All of us are involved with the same problems and the same natural instincts to fulfill family obligations that come upon us.

Our first responsibility, of course, will be to finish the continuing resolution in order that the Government may continue to operate.

Mr. SNYDER. Mr. Speaker, will the gentleman yield?

Mr. WRIGHT. Of course, I yield to the gentleman.

Mr. SNYDER. Mr. Speaker, the gentleman only indicated the continuing resolution was necessary to resolve before the sine die adjournment. Is the highway bill not in that category

then?

Mr. WRIGHT. Well, certainly we hope and expect that the highway bill will be enacted before we adjourn. The other body is acting on that matter now and I am told as recently as 15 minutes ago by a high ranking member of the other body that they exepct to conclude action on that bill before they take up the continuing resolution. Therefore, presumably we would have had an opportunity to complete that prior to our opportunity to act on the conference report on the continuing resolution.

Mr. SNYDER. Mr. Speaker, I thank the majority leader.

Mr. RODINO. Mr. Speaker, will the gentleman yield?

Mr. WRIGHT. Of course, I yield to my distinguished friend, the chairman of the Committee on the Judiciary.

Mr. RODINO. I would like to put this question. Is it not possible to proceed with the continuation of general debate on the immigration bill tonight, get that out of the way? There are going to be no votes during general debate.

Mr. WRIGHT. Once general debate begins, Members might reasonably expect there would be no further votes tonight. We have had an urgent request from those Members who have the responsibility for the final 2 hours of debate, which has been assigned to the Committee on Education and Labor, that because of the importance which they attach to amendatory language which that committee sponsors, they want the membership present to hear the debate on that phase of this legislation.

#### □ 1830

And the gentleman who is handling that portion of the debate has personally come to me and to the Speaker and requested that we may have that portion of the debate on tomorrow at a time when Members may be present to hear what is said, rather than at midnight or such an hour this evening. It seemed a reasonable request.

Mr. RODINO. Mr. Speaker, will the gentleman yield further?

Mr. WRIGHT. Indeed, I do.

Mr. RODINO. It is my understanding that there have been over 200 amendments noted in the Record. Is that not going to be sufficient time for the House, if it is interested and concerned with this measure, that they are going to be fully informed as to what those amendments are going to be all about? Is that not going to be sufficient time for a debate on this bill? That is going to stretch out for a period of time.

Mr. WRIGHT. Well, I just have to answer the gentleman that I would expect that that would be more than sufficient time, ample time for discussion. However, under the general debate provisions, as the gentleman knows, the rule which was adopted in the House accords 2 hours of time to the management of the Committee on Education and Labor, and the Member of the House who is handling that portion of the general debate for the Committee on Education and Labor has come to the Speaker and to me and personally requested that it may be handled tomorrow rather than at the late hour tonight at which time it would be reached, conceivably as late as 11 o'clock or midnight tonight.

Mr. LUNGREN. Mr. Speaker, will the majority leader yield? Mr. WRIGHT. Yes, of course I yield. Mr. LUNGREN. I thank the gentle-

man for yielding.

Mr. LUNGREN. As the gentleman knows, there is a divergence of opinion with respect to those amendments that are being offered by the Committee on Education and Labor. Those of us who have an opinion that somewhat differs from those supporting that position believe that our views and the way it affects our constituents is every bit as important as those views and interests of those people supporting the version of the Committee on Education and Labor.

It seems somewhat unfair or strange to suggest that one committee assume the burden of presenting their viewpoint in the late hours when no one is here, and another committee which has a different viewpoint and expresses slightly different interests are going to have the opportunity to present it at a time when Members are

presumably here.

Obviously, if we do not want the bill completed, we could put all the 5 hours over until the next day, but it seems to me if we are going to make an accommodation, how about splitting up the time such that the two committees involved share the time today and then share the time tomorrow?

Mr. WRIGHT. Well, I am not attempting to perform a Solomonesque task dividing time between committees and subsections of the committees, and I think probably that is beyond my judgmental capacity at this moment.

I do not really quite understand whether the gentleman is suggesting that he wants to require that all of it be heard tonight or that he wants it required that half of each segment be put off until tomorrow, or what, but I should imagine that any such request would almost require unanimous consent in order to achieve.

As I understand, under the rule, the first 2 hours of general debate are to be consumed by the Committee on the Judiciary, and an intermediate hour is allotted to a second committee, and the concluding 2 hours are allotted to the Committee on Education and Labor.

Mr. LUNGREN. Mr. Speaker, will the gentleman yield further?

Mr. WRIGHT. Surely.

Mr. LUNGREN. I have a suggestion to help the gentleman out of this difficult situation. If we could postpone the Ms. Gorsuch matter until tomorrow, we could have the full debate on the immigration bill tonight, the Members could go home early, and that would be taken care of.

Mr. WRIGHT. As the gentleman is aware, I think the gentleman's suggestion is made in good faith and deserves the courtesy of a good-faith response. The response is that, as the gentleman

is aware, under the Rules of the House that matter is a highly privileged matter and the gentleman who represents the Committee on Public Works and Transportation, the chairman of that committee, Mr. Howard, is entitled to be recognized as such time as he seeks recognition. I have been advised that he will seek recognition immediately upon completion of the matter presently before us.

Mr. MAZZOLI. Mr. Speaker, will the gentleman yield?

Mr. WRIGHT. Surely.

Mr. MAZZOLI. I thank the gentleman for yielding.

Mr. Speaker, it does occur to me that not getting the general debate out of the way on the immigration bill, a bill that has had 4 years of very careful study, is to if I understand the gentleman correctly, put debate at the end of the calendar for tomorrow, jeopardizes greatly the chances of this bill becoming the law of the land.

Today we had a very strong vote on the rule, which indicates that this House, despite the hour of the legislative session, does want this Congress to deal with the issue. My recommendation, and I wonder if the gentleman from Texas agrees, is possibly to have half of the 5 hours, if we on the 2 hours controlled by the gentleman from New Jersey (Mr. Rodino) where we have had relatively few requests for time, because we have an open rule in which during the 5-minute rule all the amendments will be fully debated, there will be no curtailment of time, my thought is that we could yield back part of our time, get our debate done this evening.

The gentleman from California (Mr. MILLER), the gentleman who will be handling it for the Committee on Education and Labor, is a very thoughtful Member of this body. Perhaps the argument could be sort of compressed into a 1-hour period and we could get all of our general debate done tonight.

Mr. O'NEILL. Mr. Speaker, will the gentleman yield?

Mr. WRIGHT. Of course I yield to the Speaker.

Mr. O'NEILL. It is my understanding that there is no set pattern in this rule; there is no requirement that certain Members must debate their section of the bill first, second, or third. There is no reason that I can see why you could not divide the first 2 hours and then tomorrow divide the remaining 3 hours. That seems to be the way.

It is my understanding we will not be to this bill until some time around 8 o'clock. I know there are going to be intervening motions which will take time. It is going to be 11 o'clock before we get out and it would be 3 o'clock in the morning before you complete the 5 hours.

I think in fairness to the Members, we are trying to expedite the matter,

the first thing we will bring up tomorrow will be the Caribbean Basin bill. That is an up or down vote after 2

hours of debate.

I do not know how long we are going to be here. I cannot give you a timetable of how long we are going to be here because it depends on the othe body and the actions of the President. It does look to me as though we are going to be in here a long time tomorrow, with either a possible session on Saturday, and if not on Saturday, if we cannot complete on Saturday, we are going to be back on Monday and Tuesday.

So I think we are wasting a lot of time debating the merits of who should go when and how long we should debate, and I think we ought to get to the business of the evening.

Mr. MAZZOLI. Mr. Speaker, will the

gentleman yield further?

Mr. WRIGHT. I, of course, yield. Mr. MAZZOLI. I thank the gentle-

man for yielding further. The distinguished Speaker, on that point, I think has a good suggestion. I think it would be eminently agreeable.

Mr. MILLER of California. To do what, if I may ask, if the gentleman

will yield?

Mr. WRIGHT. Two hours tonight to be split in such a way as the committees may desire, the remainder to be heard tomorrow.

The SPEAKER pro tempore. Does the gentleman from Minnesota (Mr. Sabo) have a motion?

Mr. SABO. Mr. Speaker, I move that the House concur in Senate amendment No 91

The SPEAKER pro tempore. That is the pending question. Does the gentleman wish to debate?

#### PARLIAMENTARY INQUIRY

Mr. WALKER. Mr. Speaker, I have a parliamentary inquiry.

The SPEAKER pro tempore. The

gentleman will state it.

Mr. WALKER. Mr. Speaker, are we going to get debate time here? I am wondering about the debate time. The Members were confused on the last vote because we were not given debate time in which to explain what it was we were doing. I think the Members need to know we are talking about \$109 million here. I think debate time is in order.

The SPEAKER pro tempore. The gentleman from Pennsylvania (Mr. COUGHLIN) has 30 minutes, and he

could yield if he desires.

Mr. SABO. Mr. Speaker, the House voted by an overwhelming margin to recede in its disagreement. I would hope that the House by an equally large margin would vote to concur in the Senate amendment.

#### □ 1840

Mr. COUGHLIN. Mr. Speaker, I yield 5 minutes to the gentleman from Pennsylvania (Mr. WALKER).

Mr. WALKER. Let me first of all, Mr. Speaker, apologize to the Members for the fact that we went through the last vote without very much of an explanation as to what it was we were doing, but we do have an important issue that goes to the heart of a number of appropriation matters that we have addressed with regard to water resources policy in this country. is embodied in this particular motion on my part, and I would hope that the House, after having gone throught the last exercise, would not vote to concur in what we just did, because what we are talking about here is \$109 million of taxpayer money, on a debt that is going to be written off and charged to the taxpayers.

The St. Lawrence Seaway, when it was built in 1959, incurred construction costs of \$139 million. At that time, they were to pay off that money through the use of user fees. Over the period of time since, they have been paying off that debt on a regular basis. They have reduced the debt to the point where we now have \$109 million

left.

If we concur in the action of the committee this evening, what we will have to do is charge off \$109 million of debt to the American taxpayers. More importantly, however, what we will be doing is setting a precedent that I think will ill serve us in water resources user policies for the future, because I think we will establish a very unfortunate principle to suggest that any user fees that might be imposed in the future need not be taken seriously because it can be easily forgiven with a sufficient amount of lobbying.

The direction in which the administration has been trying to go, the direction in which many conservation and environmental groups are trying to go, is to assure that we have a resource investment policy in this country that stresses user fees. This is the kind of amendment that undermines

that kind of concept.

So, I would hope-and I do not want to take a lot of the Members' time here-but I would hope that the Members will understand that in voting on this particular motion, they are voting on a \$109 million item, and we are discussing whether or not we are going to forgive \$109 million in debt, or whether or not we are going to go ahead with a user fee policy which stresses that those who use these kinds of facilities should pay their way.

I would ask at the appropriate time that we vote not to concur.

Mr. COUGHLIN. Mr. Speaker, I yield myself so much time as I may consume.

Mr. Speaker, this is the same question that we just voted on a few minutes ago, and that was defeated by an overwhelming "yes" vote. I hope we will have another overwhelming "yes"

Let me just point out that the St. Lawrence Seaway is the only North American seaway that is required to pay for past construction. It is entirely consistent with the administration's user fee proposal to fund the current operations out of the user fees, the tolls for the waterway. That is being done. All the current costs are financed out of the tolls, but if we increase the tolls to pay these balloon payments that are on the end of this construction loan provision, we would have tolls that would be so totally outrageous that the seaway would be totally noncompetitive.

I hope my colleagues will vote to

concur.

Mr. PURSELL. Mr. Speaker, will the gentleman yield?

Mr. COUGHLIN. I yield.

Mr. PURSELL. I would also like to suggest, Mr. Speaker, to our good chairman and both committees, that there has been a lot of homework, a lot of personal effort put in by people who spent some time looking at the Eisenhower Lock, which needs a great deal of repairs and maintenance. So, we still keep the toll. I think that is important. It is the only toll in North America, and to be competitive with the Canadians I think it is essential. I am very pleased to see the Congress and this House support this effort.

Mr. COUGHLIN. Mr. Speaker, yield to the distinguished minority leader, the gentleman from Illinois

(Mr. MICHEL).

Mr. MICHEL. Mr. Speaker, I would like to concur in the comments made by the gentleman from Pennsylvania and the gentleman from Michigan.

Mr. SABO. Mr. Speaker, I yield 5 minutes to the gentleman from New

Jersey (Mr. Roe).

Mr. ROE. Mr. Speaker, I know the Members are anxious to vote, and I am, too. I think the fact that the House voted 298 to 77 on the first go around on this critically important issue is most important. It has nothing to do with the idea of user fees. We are not going to negate users fees. Those user fees are going to be used for maintenance and operation of the seaway.

Canada has forgiven its debt. If we do not move in this direction, what we are doing is, we are materially knocking out the Great Lakes as a major port access in this country. That is why this has become a bipartisan vote of 298 to 77.

Mr. Speaker, it is important to our country that we concur with the Senate, be done with this, and let us get on with the vote.

Mr. Speaker, I rise in support of amendment No. 91.

This amendment cancels the remaining debt of the St. Lawrence Seaway Development Corporation. The St. Lawrence Seaway Development Corporation was established in 1954 to construct and operate the U.S. portion of the St. Lawrence Seaway. The Corporation which is subject to the direction and supervision of the Secretary of Transportation was given the authority to issue revenue bonds to the Secretary of the Treasury in order to finance the construction of the project. The bonds were to be repaid from tolls collected by the Corporation. Tolls are also collected to cover the operation and maintenance costs of the U.S. portion of the seaway.

tion of the seaway.

The St. Lawrence Seaway is unique among U.S. navigation projects in that its construction and operation and maintenance costs must be paid by its users. It has had difficulty meeting its obligations without raising tolls to the point where traffic would be diverted. In 1970, legislation was enacted to relieve the Corporation of paying interest on its bonded indebtedness. The present provision in the appropriations bill would relieve it of its obligation to repay the principle but would leave it the authority to charge tolls in order to cover its operation and maintenance expenses.

The burden of repaying the construction costs which is not shared by any other U.S. waterway will have an adverse impact both on international trade and on the economy of the area served by the seaway. I would point out that the seaway corporation will still be required to collect tolls to cover operation and maintenance ex-

penses.

The provision contained in amendment No. 91 is within the jurisdiction of our Committee on Public Works and Transportation. We had planned to consider this matter in connection with our next water resources development bill and received a good deal of testimony on it during this past year. Unfortunately, time has not permitted resolution of the complex issues of user fees, cost recovery, and cost sharing which were presented by the administration during this Congress. Given these circumstances and the serious economic conditions prevailing in the country, especially in the area served by the St. Lawrence Seaway, I am prepared to concur in this amendment.

Mr. OBERSTAR. Mr. Speaker, will the gentleman yield?

Mr. ROE. I yield to the gentleman from Minnesota.

Mr. OBERSTAR. Mr. Speaker, the essential issue here is whether the St. Lawrence Seaway shall compete on a basis of equality with other port ranges. The answer to that question is that, even with the adoption of this provision in the conference report, it will not. St. Lawrence Seaway users will still be required to pay the total cost of operations and maintenance of the St. Lawrence Seaway and the administrative cost of its managing au-

thority, the St. Lawrence Seaway Development Corporation, to the tune of some \$32 million a year.

No other waterway in the United States can make that claim. No other waterway is required to pay the full operation and maintenance cost, let alone repay the capital cost of construction with interest. Those of us from the Great Lakes region are not asking exemption from the payment of Seaway tolls or user fees as they are called today. No, indeed, we are accepting the present and future continuation of user fees on the St. Law-

rence system.

What we are asking is that Seaway users not be required to repay the cost of building this international waterway just as users of the Mississippi River, the Houston Ship Channel, the Arkansas River project, the Baltimore Harbor, and the Philadelphia Ship Channel, among others, are not required to repay the capital cost of building those facilities. Those and other waterways have contributed mightly to the Nation's economic growth, especially to its export trade. Their users have not been required to pay for either building or using those waterways.

The St. Lawrence Seaway makes an equal contribution to the Nation's export trade and balance of payments, moving some 50 million metric tons a year in international trade. But the Seaway operates at a competitive disadvantage compared to other waterways, by having to repay an additional \$2 million a year in capital debt costs, a figure that will jump to \$9 million a

year by 1986.

I want to emphasize for my colleagues that today's action on the Seaway debt does not mean that tolls will not increase—they will. But they will not increase as dramatically nor with such an adverse effect on traffic as would occur if the debt burden is removed.

I think it is important to point out that, over the 23 years of operation of the St. Lawrence Seaway, users have paid some \$650 million to the Canadian and U.S. Governments; \$126 million of that amount has been repaid to the U.S. Government to recover \$23 million of the original debt, \$37 million in interest, \$14 million in administrative charges, and \$52 million in operation and maintenance charges.

From 1977 to 1980, the St. Lawrence Seaway Development Corporation has increased tolls over 100 percent. In this past year alone, tolls have jumped 18 percent; and next year another 10-percent toll increase will go into effect. That shows pretty clearly that the Seaway is paying its way and then

some.

I want to emphasize that, with this provision of the conference report, we are not breaking new ground or establishing a new precedent, but rather we

will be reaffirming a 200-year standing policy of the United States that the public, interstate waterways are not required to repay their capital construction cost. I must also point out that the Congress is not taking this action lightly. Elimination of the Seaway debt has been the subject of extensive congressional hearings, both in Duluth in 1980 and earlier this year before the House Water Resources Subcommittee. Almost all the testimony received at these hearings encouraged the Congress to take immediate action to convert the St. Lawrence Seaway debt to equity.

Passage of this provision of the conference report will be an historic moment for the Great Lakes States, for industrial and agricultural producers whose products reach the seven seas through the St. Lawrence Seaway system. It is the culmination of 8 years of effort on my part to remove the seaway debt, an effort in which I have been joined by all port authorities throughout the Great Lakes, including the Seaway Port Authority of Duluth, led by my good friend Dave Helberg, the knowledgeable and dedicated di-

rector of that port.

Today's action will sound a positive note for the recession-stricken economies of the Great Lakes States; for farmers, for factory workers, for long-shoremen, for seafarers, marine engineers, and others whose lifelihoods depend on the Great Lakes trade and who have not had much to cheer

about this past year.

I am personally pleased because the language in the conference report accomplishes the goal of H.R. 845, which I introduced in this and preceding Congresses and which set the stage for today's action. I urge the House to concur in the Senate amendment and thereby to confer parity upon America's forth seacoast, the Great Lakes, long-sought and well-deserved parity with the other three great port ranges of this country.

Ms. OAKAR. Mr. Speaker, will the gentleman yield?

Mr. ROE. I yield to the gentlewoman from Ohio.

Ms. OAKAR. Mr. Speaker, I support the chairman.

Mr. ECKART. Mr. Speaker, will the gentleman yield?

Mr. ROE. I yield to the gentleman from Ohio.

Mr. ECKART. Mr. Speaker, I rise in support of the amendment to forgive the \$110 million construction debt of the St. Lawrence Seaway. This action would end the burden of paying off the construction costs, which now falls upon all Great Lakes users.

Users of the Seaway share a burden borne by users of no other federally constructed waterway: The repayment

of capital construction costs. It is the only waterway in the history of the

United States which has had to raise its own revenue to cover the initial construction costs, as well as pay for its own operation and maintenance. Every single Seaway toll charge and fee includes payments to retire that debt.

High user fees have caused Great Lakes shipping to decline dramatically over the years. If we do not do something soon, all international shipping on the Great Lakes will slowly sink into the sunset. Passage of this bill, however, would result in increased shipping on the Great Lakes. It would bring about more jobs in the plants and cities along the shores of the Great Lakes. And, Mr. Speaker, in my home district, nothing could be more welcome.

By forgiving this debt, we can pump new life into cargo and shipping activity all along the Great Lakes. The result would be a shot of new vigor for our ports, our cities, and the economy all along the Great Lakes, America's

"fourth seacoast."

• Mr. MARTIN of New York. Mr. Speaker, the hour is getting late, and I urge my colleagues to support the

motion before us.

We have just voted overwhelmingly to recede from disagreement with the amendment. Clearly, our colleagues are in agreement that this measure will provide much-needed relief from economic pressures facing one of our great national assets, the St. Lawrence Seaway.

But just to sum up briefly one more time: Those who use the St. Lawrence Seaway, unlike the users of other federally constructed waterways, must repay the seaway's capital construction cost through tolls. In 1986, the annual debt repayment will increase some 475 percent. Unless the action we have just taken is allowed to stand, that increase in payments will bring about an enormous increase in Seaway tolls, to the great competitive detriment of the system and the region it serves.

One more point-safety; that is, the proper operation and maintenance of the Seaway's historically impressive capital equipment, is our paramount concern. Revenue used to repay construction costs is revenue, for example, that cannot be used to keep the Eisenhower Lock in a state of good repair. The cost of that effort alone is 8 to 10

percent of annual revenues.

I was particularly chagrined and concerned, Mr. Speaker, to learn some time ago that in periods of income shortfalls, it has been necessary to defer badly needed maintenance of Seaway equipment. We have spoken often of the great need to renew our Nation's value but crumbling infrastructure. How tragic it would be to overlook the legitimate needs of this great product of human talent and ingenuity.

Mr. SABO. Mr. Speaker, I more the previous question on the motion.

The previous question was ordered The SPEAKER pro tempore. The question is, Will the House concur in Senate amendment No. 91?

The House concurred in Senate

amendment No. 91.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 93: Page 39, after

line 23, insert: SEC. 322. (a) Any air carrier having a claim compensation under section 406 or 419(a)(7)(B) of the Federal Aviation Act of 1958, may appeal from a decision of the Civil Aeronautics Board (hereinafter re-ferred to as the "Board") to the United States Court of Claims as provided in section 8(g)(1) of the Contract Disputes Act of 1978 with respect to claims which have been decided by an agency board of contract appeals. Failure by the Board to issue a final decision on a final claim within one year after it was filed with the Board, or by the date of enactment of this section, whichever is later, shall be deemed to be a decision by the Board denying the claim, and will authorize an appeal on the claim as provided in this section. This section shall apply to any claim decided, or deemed to have been decided, by the Board after January 1, 1981, including any claim remanded to the Board by a United States court of appeals, irrespective of when the claim was filed with the Board. Any appeal under this section shall be filed within one hundred and twenty days after the claim has been decided or is deemed to have been decided by the Board, or within one hundred and twenty days after the date of enactment of this section, whichever is later. Any petition for review of a decision of the Board with respect to any such claim pending in a United States court of appeals on the date of enactment of this section shall be dismissed with-

out prejudice upon motion of the petitioner. (b) Except as provided herein, the following provisions of the Contract Disputes Act of 1978 shall apply with respect to any claim to which this section applies as if such claim were a claim with respect to a contract appealed by a contractor under section 8(g)(1) of such Act and as if the Board were an agency board of contract appeals:

(1) Section 10(b), relating to scope of review by the Court of Claims.

(2) Section 10(c), relating to disposition of the case by the Court of Claims.

(3) Section 12, relating to interest, which shall be payable by decision of the Board or the Court of Claims at the rates provided in such section from the date of the claim was filed with the Board.
(4) Section 13, relating to the payment of

claims and judgments.

(5) Section 14(i), relating to the jurisdic-

tion of the Court of Claims.

(c) If an administrative law judge has issued an initial decision in the case before the Board, the court may, in its discretion, give such initial decision the same weight it would give to a decision by a trial judge of the Court of Claims.

MOTION OFFERED BY MR. SABO

Mr. SABO. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. Sabo moves that the House recede from its disagreement to the amendment of the Senate numbered 93 and concur therein with an amendment, as follows: In lieu of the matter inserted by said amendment. insert the following:

SEC. 322. (a) Any air carrier having a claim for compensation under section 406 or 419(a)(7)(B) of the Federal Aviation Act of 1958, decided by the Civil Aeronautics (hereinafter referred to as "Board") may bring an action directly on the claim in the United States Claims Court as provided in section 10(a) of the Contract Disputes Act of 1978 with respect to claims which have been decided by a contracting officer. Failure by the Board to issue a final decision on a final claim within one year after it was filed with the Board, or by the date of enactment of this section, whichever is later, shall be deemed to be a decision by the Board denying the claim, and will authorize an action on the claim as provided in this section. This section shall apply to any claim decided, or deemed to have been decided, by the Board after January 1, 1981, including any claim remanded to the Board by a United States court of appeals, irrespective of when the claim was filed with the Board. Any action under this section shall be filed within one hundred and twenty days after the claim has been decided or is deemed to have been decided by the Board, or within one hundred and twenty days after the date of enactment of this section, whichever is later. Any petition for review of a decision of the Board with respect to any such claim pending in a United States court of appeals on the date of enactment of this section shall be dismissed without prejudice upon motion of the petitioner.

(b) Except as provided herein, the following provisions of the Contract Disputes Act of 1978 shall apply with respect to any claim to which this section applies as if such claim were a claim with respect to a decision of a contracting officer under section 10(a) of such Act and as if the Board were a con-

tracting officer.

(1) Section 12, relating to interest, which shall be payable by decision of the Board or the Court of Claims at the rates provided in such section, not to precede the date of enactment of the Contract Disputes Act of 1978.

(2) Section 13, relating to the payment of claims and judgments.

(3) Section 14(i), relating to the jurisdiction of the United States Claims Court.

(c) If an administrative law judge has issued an initial decision after a hearing on the record in the case before the Board, the court may, in its discretion, rely upon the evidence adduced at such hearing and may give such initial decision such weight as it deems appropriate.

Mr. SABO (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 96: Page 39, after line 23, insert:

SEC. 325. None of the funds provided by this Act shall be used by the Civil Aeronautics Board to substitute aircraft of lesser seating capacity or lesser than necessary pressurized altitude capability, for the type of aircraft now prescribed for essential air transportation to any point in Alaska as set forth in Civil Aeronautics Board Order 80-1-167 without the prior concurrence of the applicable State agency of the State of Alaska.

MOTION OFFERED BY MR. SABO

Mr. SABO. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. Sabo moves that the House recede from its disagreement to the amendment of the Senate numbered 96 and concur therein with an amendment, as follows: In lieu of the section number named in said amendment, insert "323".

Mr. SABO (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Minnesota?

There was no objection. The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 97: Page 39, after line 23, insert:

Sec. 326. No funds appropriated under this Act shall be expended to pay for any travel by the Administrator of the Federal Aviation Administration or his immediate staff as passengers or crew members aboard any Department of Transportation aircraft to any destination served by a regularly scheduled air carrier: Provided, That this limitation shall not apply if no regularly scheduled carriers' flight arrives at the destination of the Administrator or member of his immediate staff within six hours local time of the desired time of arrival: Provided further, That this limitation shall not apply to costs incurred by any flight certified in writing by the Administrator to be solely for the purpose of inspecting, investigating, or testing the in-flight operation of any aspect of the Federal Aviation Administration system designed to aid and control air traffic: Provided further, That such written certifications shall be made readily available to

Congress and the general public.

MOTION OFFERED BY MR. SABO

Mr. SABO. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. Sabo moves that the House recede from its disagreement to the amendment of the Senate numbered 97 and concur therein with an amendment as follows: In lieu of the matter inserted by said amendment, insert the following:

SEC. 324. No funds appropriated under this Act shall be expended to pay for any travel initiated after January 1, 1983, by the Administrator of the Federal Aviation Administration as passenger or crew member aboard any Department of Transportation aircraft to any destination served by a regularly scheduled air carrier: Provided, That this limitation shall not apply if no regularly scheduled carriers' flight arrives at the destination of the Administrator within 6 hours local time of the desired time of arrival: Provided further, That this limitation

shall not apply to costs incurred by any flight which is essentially for the purpose of inspecting, investigating, or testing the operations of any aspect of the Federal Aviation Administration system designed to aid and control air traffic, or to maintain or improve aviation safety: Provided further, That this limitation shall not apply to costs incurred by any flight in Department of Transportation aircraft which is necessary in times of emergency or disaster, or for security reasons, or to fulfill official diplomatic representation responsibilities in foreign countries: Provided further, That written certifications shall be issued quarterly on all flights initiated in the previous quarter subject to this limitation and shall be made readily available to Congress and the general public.

Mr. SABO (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 98: Page 39, after line 23, insert:

SEC. 327. (a) Neither the Secretary of the department in which the Coast Guard is operating nor any other officer or employee of the United States shall approve any project or take any action which would interfere with the reasonable needs of navigation on the Columbia Slough, Oregon.

(b) For purposes of subsection (a) of this section, any bridge which is to be constructed across the Columbia Slough, Oregon, after the date of enactment of this section shall be deemed to provide for the reasonable needs of navigation on the Columbia Slough, Oregon, if such bridge provides at least thirty feet of vertical clearance Columbia River datum and at least eighty feet of horizontal clearance, as determined by the Secretary of the department in which the Coast Guard is operating.

MOTION OFFERED BY MR. SABO

Mr. SABO. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. Sabo moves that the House receded from its disagreement to the amendment of the Senate numbered 98 and concur therein with an amendment, as follows: In lieu of the section number named in said amendment, insert "325".

Mr. SABO (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the Record.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 101: Page 40, strike out lines 8 to 18, inclusive.

MOTION OFFERRED BY MR. SABO

Mr. SABO. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. Sabo moves that the House recede from its disagreement to the amendment of the Senate numbered 101 and concur therein with an amendment, as follows: Restore the matter stricken by said amendment amended to read as follows:

SEC. 327. Notwithstanding any other provision of law, the Secretary of Transportation shall approve, upon request of the State of Indiana, not to exceed \$4,000,000, to be made available from funds available for redistribution under 23 U.S.C. 118(b) for the construction of an interchange to appropriate standards at I-94 and County Line Road at the Porter-LaPorte County Line near Michigan City, Indiana. Such amount shall be subject to the obligation limitation enacted for fiscal year 1983 or any fiscal year thereafter on obligations for Federal-aid highways and highway safety construction programs.

SEC. 328. Notwithstanding any other provision of this Act, the Secretary of Transportation is authorized to transfer appropriated funds between the Coast Guard Operating expenses appropriation and the Coast Guard Headquarters administration appropriation and between the Federal Aviation Administration appropriation for Operations and the Federal Aviation Administration appropriation for Headquarters administration: Provided, That the Coast Guard and Federal Aviation Administration Headadministration appropriations quarters shall be neither increased nor decreased by more than 7.5 per centum by any such transfers: Provided further, That any such transfers shall be reported promptly to the Committees on Appropriations and the appropriate authorizing committees in the House and the Senate.

Mr. SABO (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

The motion was agreed to.

A motion to reconsider the votes by which action was taken on the conference report and on several motions was laid on the table.

REPORT OF COMMITTEE ON STANDARDS OF OFFICIAL CONDUCT

Mr. STOKES. Mr. Speaker, by direction of the Committee on Standards of Official Conduct, I submit the following report entitled: "Investigation Pursuant to House Resolution 518 Concerning Alleged Improper or Illegal Sexual Conduct, Alleged Illicit Use or Distribution of Drugs, and Alleged Preferential Treatment of House Employees by Members, Officers, or Employees of the House":

INVESTIGATION PURSUANT TO HOUSE RESOLU-TION 518 CONCERNING ALLEGED IMPROPER OR ILLEGAL SEXUAL CONDUCT, ALLEGED ILLICIT USE OR DISTRIBUTION OF DRUGS, AND AL-LEGED PREFERENTIAL TREATMENT OF HOUSE EMPLOYEES BY MEMBERS, OFFICERS, OR EM-PLOYEES OF THE HOUSE (REPT. No. 97-965)

Mr. Stokes, from the Committee on Standards of Official Conduct submitted

the following report:

On July 13, 1982, the House agreed to House Resolution 518. That resolution authorized and directed this Committee to conduct a full and complete inquiry and investigation of-

(1) alleged improper or illegal sexual conduct by Members, officers, or employees of

the House;

(2) illicit use or distribution of drugs by Members, officers, or employees of the House; and

(3) the offering of preferential treatment by Members, officers, or employees of the House to employees of the House, including congressional pages, in exchange for any item referred to in subclause (1) or (2).

On July 27, 1982, this Committee retained Joseph A. Califano, Jr., as Special Counsel to conduct the investigation. The Committee's Special Counsel thereafter assembled a staff and has carried out an extensive inves-

tigation. The Special Counsel has filed an interim report with this Committee, which the Committee has approved, on the investigative work completed during the 97th Congress. The Special Counsel's interim report is attached as an Appendix to this Report.

#### I. ALLEGED IMPROPER OR ILLEGAL SEXUAL CONDUCT

The Special Counsel reported that most, but not all, of the investigation of sexual misconduct had been completed. The Special Counsel found that the evidence conclusively indicated that the highly-publicized charges of sexual misconduct made by two former pages were false. The basis for the Special Counsel's conclusions are set out in detail in his report.

In one instance, however, the Special Counsel recommended that the Committee initiate a Preliminary Inquiry. Based on that recommendation, the Committee voted to initiate that Preliminary Inquiry.

In the case of the Preliminary Inquiry and of the matters still under investigation, the Committee voted to transmit all materials involved to the 98th Congress and to recommend these matters be completed as early as possible next year.

### II. ALLEGED ILLICIT USE OR DISTRIBUTION OF DRUGS

The work of the Committee's Special Counsel in investigating allegations of illicit use or distribution of drugs involving Members, officers, or employees of the House has been carried out in coordination with the Justice Department and its Drug Enforcement Administration. Both the Committee's Special Counsel and the Department of Justice have a number of matters under active investigation.
In one instance, the Special Counsel rec-

ommended that the Committee open a Preliminary Inquiry. Based on that recommendation, the Committee voted to initiate that

Preliminary Inquiry.
With respect to all the Special Counsel's work in investigating alleged illicit use or distribution of drugs, the Committee voted to transmit all materials involved to the Congress with the recommendation that the investigation be completed promptly next year.

#### III. FURTHER RECOMMENDATIONS

The Committee further recommends: (1) that the Committee on Standards of Official Conduct be constituted immediately upon the convening of the 98th Congress:

(2) that the 98th Congress agree to a resolution that provides the Committee on Standards of Official Conduct with the same powers and authority provided to this Committee by House Resolution 518.

#### IV. CONCLUSION

The Committee has carried out its work over the past four and a half months with a determination to fulfill its responsibilities under House Resolution 518 and to carry out the House's constitutional responsibilities under Article I, Section 5, to investigate and discipline violations by its Members, officers, or employees. The Committee believes that significant progress has been made. But the work that has been started must be carried forward vigorously and promptly. The Committee is confident that the 98th Congress will do so.

This report was adopted by a show of hands, 11 yeas, 0 nays, on December 14,

### STATEMENT UNDER CLAUSE 2(b) OF RULE X

The Committee's oversight findings and recommendations are stated in sections I, II, and III of this report.

No budget statement is submitted.

APPENDIX-INTERIM REPORT OF THE SPECIAL Counsel to the House Committee on STANDARDS OF OFFICIAL CONDUCT

## SPECIAL COUNSEL'S OFFICE

Joseph A. Califano, Jr., Special Counsel; Richard Cotton, Deputy Special Counsel; Hamilton P. Fox, III, Associate Special Counsel; and Gerald T. McQueen, Chief Investigator.

#### I. INTRODUCTION AND SUMMARY

On June 30 and July 1, 1982, tens of millions of Americans watched two teenagers, both former pages of the House of Representatives, with their faces shielded, declare on the CBS Evening News that they had been victims of sexual misconduct by Members of the House of Representatives. One page told of "homosexual advances" by Congressmen and Congressional staff. CBS said the page had been "homosexually har-

The experiences described by the other page shocked the nation. He said that he had engaged in sexual relationships with three Members of the House of Representatives and that he had procured male prostitutes for House staffers. He told his interviewer that homosexual relationships were part of the system of what a page had to do to get ahead in the House. In June and July of 1982, these two former pages repeated those assertions-although with some inconsistencies-to newspapers and other television reporters, to the Federal Bureau of Investigation, and to investigators for the Committee on Standards of Official Conduct.

On July 13, 1982, the House agreed to House Resolution 518 which authorized and directed the Committee on Standards of Official Conduct to investigate allegations of:

(1) Improper or illicit sexual conduct by Members, officers, or employees of the House of Representatives involving congressional pages;
(2) illicit use or distribution of drugs by

Members, officers, or employees of the House; and

(3) the offering of preferential treatment by Members, officers or employees of the House in exchange for sexual favors or drugs.

On July 27, 1982, the Committee retained Joseph A. Califano, Jr., as independent Special Counsel to conduct the investigation. At the time of Mr. Califano's appointment as Special Counsel, Committee Chairman Louis Stokes stated that "his charge is clear and straightforward—to conduct the investigation that in his judgment is required and to advise the Committee of his findings and recommendations."

The Speaker, the Majority Leader, and Minority Leader of the House joined Chairman Stokes and the Committee's Ranking Minority Member Floyd Spence in assuring the Special Counsel that he would have the independence and resources to conduct a full and impartial investigation-"whatever truth about the allegations that have been made."

This interim report details the results of that investigation in the 97th Congress. The report responds to the Chairman's charge that the Special Counsel report to the Committee on his findings and recommenda-tions. This report of the Special Counsel sets out (1) the investigative work completed so far with respect to allegations involving sexual misconduct, (2) his findings and conclusions regarding this work, and (3) his recommendations on the work remaining to be done and on actions the Committee should take at this time.

#### IMPROPER OR ILLEGAL SEXUAL CONDUCT

The investigation conducted by the Special Counsel has extended beyond the original charges of sexual misconduct made by the two former pages. Pursuant to H. Res. 518, the Special Counsel has sought to determine whether there is any responsible evidence of improper or illegal sexual conduct by Members, officers, or employees of the House of Representatives involving congressional pages. The focus of the investiga-tion has been on the period from July, 1981, through June, 1982. To assure completeness, however, the Special Counsel sought to contact every page employed by the House of Representatives during the past three years. The Special Counsel has also investigated allegations that he has received of sexual misconduct involving preferential treatment but not involving pages.

The Special Counsel has found no merit whatsoever in any of the original allegations of sexual misconduct made by the two former pages. One of these pages testified under oath that he lied about having sexual relations with Members of the House and about procuring prostitutes for anyone. The other page, who had referred to homosexual approaches by Congressmen, testified under oath about three isolated instances of conversations in public places that lasted less than two minutes and involved no improper actions. This page testified that he himself no longer believed, in at least two of these instances, that there were any sexual over-tones. The Special Counsel also independently investigated these allegations and has determined that the evidence conclusively indicates that all charges of sexual misconduct made by these two pages were false.

In the course of the investigation, the Special Counsel has received allegations of sexual misconduct from a variety of sources, wholly independent of the two former pages. The Special Counsel has completed investigation of most of these allegations. In most of these cases, the Special Counsel found no evidence to support the allegations.

In one instance, however, the Special Counsel has found reasonable indications that improper or illegal sexual conduct by an employee of the House may have occurred and, therefore, recommends that the

Committee open a Preliminary Inquiry.
Under the Committee's rules, a Preliminary Inquiry is convened when evidence has been presented to the Committee that reasonably indicates that a violation may have been committed and the Committee determines that the evidence presented merits further inquiry. The individual named in a Preliminary Inquiry has the opportunity to present to the Committee, orally or in writing, a statement concerning the allegations that have been made. At the conclusion of the Preliminary Inquiry, if the Committee determines that the evidence establishes that there is reason to believe that a violation occurred, the Committee may direct that a Statement of Alleged Violation be issued to the individual involved. Full hearings must be held by the Committee on a Statement of Alleged Violation to determine whether to report a recommendation for disciplinary action to the full House. In this case, the Special Counsel recommends that the name of the individual who is the subject of the Preliminary Inquiry not be released publicly unless and until the Committee votes to issue a Statement of Alleged Violation.

The Special Counsel believes the evidence developed in this case requires the Committee, under its rules, to initiate a Preliminary Inquiry now, even though the full course of the proceedings cannot be completed in this Congress. The Special Counsel recommends that the Committee commence this Preliminary Inquiry, transmit all materials relevant to this matter to the next Congress, and recommend to the House leadership that the Committee on Standards of Official Conduct be constituted immediately upon the convening of the next Congress so that prompt action on this matter can be concluded expeditiously.

A small number of other instances of pos-

sible sexual misconduct involving pages or involving preferential treatment under investigation, and the Special Counsel recommends that the Committee transmit these matters to the next Congress with its recommendation that investigation of them be completed as early as possible next year.

The Special Counsel has found some evidence of other isolated instances of both heterosexual and homosexual advances to pages by individuals no longer associated with the House. Since these cases are beyond the jurisdiction of the Committee, investigation of these matters has not been pursued.

# ILLICIT USE OR DISTRIBUTION OF DRUGS

In coordination with the Department of Justice and its Drug Enforcement Administration, the Special Counsel has been investigating allegations of illicit use and distribution of drugs involving Members, officers, or employees of the House. Both the Department of Justice and the Special Counsel have a number of matters under active investigation.

In one instance the Special Counsel has already found reasonable indications that illicit use and distribution of drugs by an employee of the House may have occurred and, therefore, recommends that the Committee open a Preliminary Inquiry now, under the same conditions described above with respect to the Preliminary Inquiry of sexual misconduct involving pages

The rest of the Special Counsel's investigation of alleged illicit use or distribution of drugs by Members, officers or employees of the House is not yet at a stage where a report can be made in writing to the Committee. The Special Counsel, therefore, recommends that the Committee transmit the evidence developed in this part of the investigation to the next Congress with the recommendation that the investigation be carried forward expeditiously.

#### THIS REPORT

The balance of this report describes the work of the Special Counsel to date in investigating allegations of sexual misconduct. It sets forth:

(1) The scope and method of the investigation of sexual misconduct.

(2) The current operation of the page

(3) The problems that developed during the 1981-82 year that sparked rumors of a 'page scandal" and provided the springboard for sensational allegations in the press

(4) The basis for the Special Counsel's conclusion that the specific charges made by the two former pages are false.

(5) The findings of the Special Counsel concerning other allegations, received in the course of the investigation, of alleged sexual misconduct by Members, officers, or employees of the House.

The findings and conclusions of the Special Counsel concerning the February, 1982, investigation of pages conducted by the U.S. Capitol Police.

#### A. Scope

Pursuant to House Resolution 518, the Committee through its Special Counsel undertook an investigation to determine whether any Member, officer, or employee of the House of Representatives had engaged in any way in improper or illegal sexual conduct involving congressional

The investigation focused on the period from July, 1981, to June 1982, and on the allegations of two former pages that received national press attention beginning on June 30, 1982. But to ensure a thorough inquiry into all matters within the scope of H. Res. 518, the Special Counsel sought out information about earlier periods and about any kind of sexual advance, harassment, or relationship involving a congressional page and Member, officer, or employee of the House. In this connection, the Special Counsel has tried to contact every page employed by the House of Representatives during the past three years. In addition, the Special Counsel investigated all information he received about alleged sexual misconduct by House Members, officers or employees involving preferential treatment even where that information did not involve congressional pages.

#### B. Method of investigation

Since Chairman Stokes and Ranking Minority Member Spence announced my appointment as Special Counsel to the Committee to oversee the investigation authorized by H. Res. 518 on July 27, 1982, I have been able to conduct this investigation with complete independence. I have had complete freedom to make all appointments to the Special Counsel's staff, which has worked entirely under my direction, independent of the permanent staff of the Committee and of any other congressional office. The bipartisan leadership of the House and the members of the Committee on Standards of Official Conduct have provided the resources necessary to conduct a meticulous, searching, no-holds-barred investigation. In the course of this investigation, the Special Counsel has had the wholehearted cooperation of the Attorney General and the Justice Department.

#### C. The page system

During 1981-82, the House maintained 71 positions for Pages. Pages must be high school juniors or seniors at least 16 but not more than 18 years of age at the time of appointment. Pages are nominated by a House Member and selected by the Democratic and Republican Personnel Committees. Neither Committee has a systematic process for assessing the maturity of page candidates or their ability to handle the freedom that pages enjoy in Washington.

Pages have a demanding daily schedule. Page School classes begin at 6:10 a.m. When the House convenes at noon, these classes typically run until 9:45 a.m. or 10:30 a.m. When the House convenes earlier, class sessions are abbreviated so that pages can report to work at least an hour before the House starts. Except for meals, the pages remain on duty until 5 p.m. or until the House adjourns for the day, whichever is

The Doorkeeper of the House of Repre sentatives, who is elected by the Caucus of the Majority Party, is responsible for supervising House pages during their working hours. Outside of working hours, no one has clear responsibility for supervision. In fact, the Handbook issued by the Doorkeeper specifically states that:

"Parents or Guardians must file with the Doorkeeper of the House, a written statement assuming full responsibility for the safety, well-being, and supervision of the Appointee while living in the District of Columbia area and traveling to and from the House of Representatives.

Pages must find their own housing. In 1981-82, approximately 25 female pages lived in Thompson-Markward Hall, a dormitory-like facility with a curfew and other rules. The Page House Alumni Association housed approximately ten male pages until it closed its doors in August 1981. The rest of the pages resided in groups of two to six in apartments at various places on Capitol Hill, or in housing obtained through a university housing service.

Pages living in apartments had, in general, no adult supervision and no one easily available in the event of trouble.

The lack of effective supervision of pages outside of working hours has been sharply criticized for many years. At various times over the past 15 years, for example, Members of the House have called the House's failure to provide better supervision "unconscionable" and "inconceivable."

## D. Origin of allegations

The Special Counsel has found no support whatsoever for the sensational allegations of homosexuality charges launched this investigation. To the contrary, the evidence developed contradicts every one of the original highly publicized allegations made by the two former pages. Those allegations resulted either from outand-out fabrication, overactive teenage imagination stimulated by conversations with a journalist, or teenage gossip which has in virtually every case proved to be utterly inaccurate.

In view of this conclusion, another important set of questions emerged in the course

of the investigation: How and why did these charges come to be made? What was the

It is clear that during the 1981-82 academic year, some pages behaved irresponsibly after working hours. There is abundant and convincing evidence, in the case of some pages, of excessive use of alcohol, all-night parties, some drug use, and a variety of other activities that no responsible parent would tolerate.

Leroy Williams, at that time a 17-year-old page in the House, left the page program abruptly at the end of January, 1982, when financial and other troubles became too much for him to handle. Events surrounding Williams' departure triggered an investigation by the Capitol Police of page drinking habits and parties, and of Williams' homosexuality. Two pages, unconnected to Williams, were terminated partly as a result of information developed by the Capitol Police investigation. This investigation, Williams' departure and the termination of the other two pages spawned rumors of a "page scandal." Though unreported in the press, these rumors came to the attention of many reporters.

In June, 1982, a CBS news reporter interviewed a 16-year-old page named Jeffrey Opp in Washington, D.C. and Williams in Little Rock, Arkansas. The Special Counsel requested that the reporter speak to investigators in the Special Counsel's office and offered him the opportunity to do so. The reporter declined that invitation.1 Thus, the only information available about these interviews comes from the sworn testimony of Williams and Opp themselves. According to Opp, the reporter discussed with him lurid tales of sexual misconduct and homosexual prostitution in the Congress. The reporter asked whether Opp could confirm those stories or provide additional informa-According to Williams, the reporter said Williams was being identified in Washington as a drug trafficker and "bad apple" who had been the source of the problems with the page system. The reporter told Williams he was offering him a chance to

Following these conversations, and on the basis of assurances that their identities would be kept secret, both teenagers agreed to give on-camera interviews with their faces shielded, to the CBS reporter. Those interviews yielded lies from Williams. In response to the reporter's questions, Opp twisted minor, at best ambiguous conversations with three Congressmen and one lobbyist and characterized them as "homosexual approaches."

tell his side of the story.

Perhaps the most ironic twist of events was the role played by the CBS news reporter in bringing these charges to life. It appears to have been the reporter's discussion with Opp that inspired Opp to repeat these stories, with his own embellishments, to two of his Congressional sponsor's staffers. These staffers were initially suspicious of the sensational nature of Opp's charges. But, then this same news reporter told the staffers that Opp's charges had substance. It was these staffers who decided Opp should tell his story to the Justice Department. The department decided to investigate, at least in part because the staff of a Member of Congress considered the allegations to be serious. That Justice Department investigation itself became the "news" to which CBS pegged its June 30 and July 1

Leroy Williams attended high school in Little Rock, Arkansas, where he was a "B" student involved in extracurricular activities, and where he belonged to a strict, fundamentalist church.

Williams assumed his duties as a page on June 29, 1981. Throughout the period Williams served as a page, his work was considered satisfactory, although his performance declined toward the end.

It was after working hours that Williams had problems. When the Congress went into its 1981 mid-summer recess, Leroy Williams remained in Washington alone. At this point the 17-year-old Williams first engaged the services of a male prostitute; he used male prostitutes on fifteen different occasions between August and January, 1982, ten of those times during the August Congressional recess.

Williams drank alcohol more and more heavily. By January, 1982, he thought he was "literally an alcoholic." His use of drugs also increased sharply and he got into increasingly severe financial trouble. He failed to pay a large number of bills, wrote bad checks, and stole money.

Under increasing pressure, Williams finally left Washington by taking an automobile

belonging to a fellow page.

After he arrived back home in Little Rock in February, 1982 Williams said he heard several reports from Washington that he was a "bad apple" and that he had been distributing illicit drugs. According to Williams, his anger and resentment came to a head in June, 1982, when the CBS news re-porter appeared at Williams' home in Little Rock, and repeated these charges. Ten days later, on June 30, 1982, CBS News broadcast excerpts from its reporter's interview of Williams, creating a national sensation about homosexual relations between Congressmen and teenage pages.

Leroy Williams was interviewed by the F.B.I., various news organizations, and the Committee's staff in June and July, 1982. He did not tell the same story each time. But, in the course of these interviews, he claimed that he was propositioned by, and had sexual relations with, three congressmen, and that he arranged male prostitutes for a Senator and two other government employees. Williams also repeated to interviewers other allegations of sexual misconduct by Members and employees of the House which Williams claimed other pages had told him.

On August 26, 1982, Williams was reinterviewed by investigators from the Special Counsel's office, who had spend days documenting many inconsistencies and contradictions in Williams' allegations. Williams admitted to them that he had lied. On Saturday, August 28, 1982, he testified under oath at a deposition before the Chairman and Special Counsel of this Committee that none of the statements he had made about sexual misconduct were true. In subsequent testimony and interviews with the Special Counsel's staff, he also admitted that he did not believe most of the second hand infor-

mation he had passed on. The Special Counsel has concluded that there is no evidence to support any of Williams' original charges. In reaching this conclusion, the Special Counsel has not relied solely on Williams' recantation. Rather, the Special Counsel has conducted a detailed inestigation of each one of William's allegations. Every bit of independent evidence collected supports the conclusion that Williams' original allegations were false and that he was telling the truth when he testified that he had lied about those charges.

F. Jeffrey Opp

Jeffrey Opp was the second page who appeared, with his identity concealed, on the June 30 CBS News broadcast. Opp served as a page from January 4, 1982 until June 12, 1982. During the time he was a page, Opp went out of his way to challenge authority and to make people aware of his extreme political views. Not surprisingly, there was substantial tension between Opp and his supervisors in the Doorkeeper's office. He was known as a crusader, "someone who be-lieved his goal in life was to change the system." Pages said Opp had a tendency to "blow things way out of proportion." The impressions of the staff who worked for Congresswoman Schroeder reinforce the view that Opp was prone to exaggeration. One staffer who had provided temporary housing to Opp for his first month in Washington said Opp had a "super-hyper imagination".

Opp's own behavior reflects this tendency. The day after meeting with the television reporter, Opp told two persons on the staff of his congressional sponsor that he had worked undercover for CBS for two weeks. helping investigate Congressmen involved with male prostitutes. Opp claimed that his apartment had been bugged, and that his roommate was a spy from the Doorkeeper's office. As he later testified, none of these statements were true.

In Opp's broadcast interview, he alluded to "homosexual approaches" that Congressmen had made to him. In interviews with the Federal Bureau of Investigation and this Committee in June and July, Opp described four specific incidents which he described as homosexual approaches. He also reported other allegations of sexual misconduct based on hearsay information.

The Special Counsel has found no evidence to support any of these allegations.

The personal experiences that Opp reported with three Members of Congress and one lobbyist were little more than conversations, each less than two minutes, occurring in public places and involving no improper actions.

Opp's perspective has changed on most of his June allegations. In September, he told one of his friends among the pages that most of his stories had been inspired by the television news reporter who had sought him out three months before. Opp testified at his deposition that his TV interview "was a 16 year old kid satisfying his ego.

Based on a review of Opp's testimony and information provided by others, the Special Counsel has found him to be a highly impressionable teenager, with a tendency to place interpretations on events that appear to have no rational connection to what actually occurred. The Special Counsel found no basis whatsoever to conclude that anything improper occurred in any of the four conversations cited by him as the basis for his allegations about his personal experiences.

The second-hand information provided by Opp has also proved to be unsubstantiated. Much of it was nothing more than teenage gossip. None of it was accurate.

A careful evaluation of information provided by Opp has yielded not a single piece of responsible evidence that improper actions occurred. All the evidence the Special Counsel has developed-including signifi-

Evening News reports, including the shielded interviews of Williams and Opp. source of the rumors of a "page scandal"? E. Leroy Williams

<sup>&</sup>lt;sup>1</sup> The exchange of correspondence between the Special Counsel and CBS News appears at app. B.

cant changes in Opp's own story-indicates that there is no support for his allegations. G. Other allegations

During the course of the investigation pursuant to H. Res. 518, the Special Counsel has received a number of allegations of improper or illegal sexual conduct by Members, officers, or employees of the House of Representatives. In some cases investiga-tions are continuing. But the Special Counsel has concluded his investigation of most of the allegations received. Part V-D of this report summarizes the allegations investigated where no evidence was found to support further investigation. No further investigation will be pursued where the allegations concerned persons no longer associated with the House of Representatives.

#### H. February 1982 page investigation by U.S. Capitol Police

The United States Capitol Police (USCP) conducted a brief investigation into allegations of misconduct involving pages in early February, 1982. The Committee decided that the February investigation should be reviewed to determine whether the Capitol Police had information relevant to the Committee's investigation pursuant to House Resolution 518.

The Special Counsel has reviewed the written records of the USCP investigation, and has interviewed or deposed the following individuals: the Capitol Police detective who carried out the investigation and his superiors; individuals in the offices of the Doorkeeper and the Sergeant-at-Arms; Members of the House and their staffs who received information about the investigation; and pages who were interviewed by the USCP.

Based on the evidence obtained in the course of this investigation, the Special Counsel has found that the Capitol Police investigation was based on allegations of misconduct by pages, and that at no time in the course of the investigation did the police receive any significant allegations of misconduct by anyone else. The Special Counsel has concluded the decision to terminate the investigation was reasonable from the point of view of the Capitol Police.

But there was a serious failure on the part of the House as an institution. The Capitol Police developed information about page misbehavior that required further action. Yet no one took the action that was plainly required-because no one is charged with responsibility for supervising the teenage pages after working hours.

Based on the evidence received in the course of this investigation, the Special Counsel believes that there is an urgent need for the House of Representatives to fix responsibility-formally and in writing-for supervision of pages after working hours. In the Special Counsel's judgment, the lack of clear responsibility led directly to the failure to address the serious problems of misconduct that developed among the pages in 1981 and 1982. If the House chooses to employ teenage high school pages, establishing a page dormitory and a Page Board are steps in the right direction. But unless responsibility for supervision of teenage pages after working hours is clearly established, the problems that developed in 1981-82 are likely to recur.

#### II. SCOPE OF INVESTIGATION INVOLVING SEXUAL MISCONDUCT

#### A. Language and legislative history of House Resolution 518

The Special Counsel has taken the language and legislative history of H. Res. 518 as the guide in determining the proper scope of the investigation involving sexual misconduct.

Section 1 of H. Res. 518 directs the Committee to investigate "alleged improper conduct [1] referred to in this resolution [2] which has been the subject of recent investigations by the Department of Justice and other law enforcement agencies.

The conduct "referred to in this resolution" is the conduct described in the "Whereas" clause of the resolution, specifi-

"(1) alleged improper or illegal sexual conduct of Members, officers, or employees of the House;

and

". . . and "(3) the offering of preferential treatment by Members, officers, or employees to employees of the House, including congressional pages, in exchange for any item referred to in subclause (1) . .

The discussion of H. Res. 518 on the House floor on July 13, 1982, leaves no doubt that the "alleged improper or illegal sexual conduct" and the "offering of preferential treatment" referred to conduct involving pages

The resolution was introduced by Chairman Louis Stokes and Ranking Minority Member Floyd Spence on July 13, 1982, in the aftermath of reports of sexual misconduct involving pages. Chairman Stokes explained that, on July 1, he had instructed the staff of the Committee "to commence a thorough investigation of the allegations as reported by the media at that time.' Cong. Rec. H4012 (daily ed. July 13, 1982). He urged passage of the resolution to enable the Committee to "proceed in an orderly fashion in pursuing this investigation." Id.

Representative William Alexander, who spoke in favor of the resolution, referred to allegations of scandal . . . levied against the Members of Congress as well as the pages who assist them." Id. at H4035. He then quoted from a letter he had received from a former page, stressing the page's hope that "the Congress will take speedy action to restore the honor, dignity, and pride that pages enjoy who have served in the Congress." Id.

Representative Margaret Heckler, who urged the appointment of a special prosecutor to investigate the allegations, stated:

"We are dealing here with entirely new and far more sensitive areas of abuse of power if the allegations are true. I think we have a responsibility to the young people who are the pages, to our service in this Congress, and to the people of America, to the parents, to the Congress itself, to deal with the sensitivity of this situation so as to inspire confidence in the integrity of this Congress." Id. at H4036 (emphasis added).

resolution's reference to conduct which has been the subject of recent investigations by the Department of Justice and other law enforcement agencies" reinforces the conclusion that the sexual misconduct to be investigated involves congressional pages. In the area of sexual misconduct, the 'recent investigation" by the Department of Justice and the Federal Bureau of Investigation concerned allegations about misconduct of House Members and employees involving pages. In addition, the United States Capitol Police had conducted an investigation in February, 1982, which also focused specifically on House pages.

The intended meaning of H. Res. 518 appears clear. The references to "alleged improper or illegal sexual conduct" and the "offering of preferential treatment" are directed at sexual misconduct involving pages. The first phase of the Special Counsel's investigation has, therefore, addressed this

This phase of the investigation focused on the period from July, 1981, to June, 1982,2 and on allegations made by two former pages that received national press attention beginning on June 30, 1982. To insure a thorough inquiry into all matters within the scope of H. Res. 518, the Special Counsel sought out information about earlier periods. In addition, to the extent that the Special Counsel received information about alleged sexual misconduct by House Members, officers or employees involving preferential treatment that did not involve congressional pages, but fell within the literal terms of H. Res. 518, the Special Counsel also investigated such allegations.

Finally, H. Res. 518 refers to "Members, officers, or employees" of the House. In keeping with this language and the jurisdiction of the Committee, the scope of the investigation has not extended to allegations concerning former Members, officers, or em-

# B. Definition of sexual misconduct

In recognition of the special situation of congressional pages, the Committee and its Special Counsel have broadly defined "improper sexual conduct" in determining whether particular allegations pages should be investigated.

House pages are generally high school juniors and seniors, between 16 and 18 years of age. By statute, they cannot be appointed until their parents or legal guardians have been fully informed of the nature of their work, pay and working conditions, and the accommodations available housing them.3

Congress plainly accepts a considerable responsibility for pages. That responsibility is necessarily shared by every Member, officer and employee of the House. Where preferential treatment is, expressly or implicitly, an element of a sexual relationship between a Member, officer or employee and a page, or an element of a sexual overture or advance directed at a page, the conduct explicitly falls within H. Res. 518. But considering the young age of these pages and the fact that they are away from home and dependent on the House for school, work and money to live on, any sexual advance or relationship of any kind involving a page and a Member, officer or employee potentially entails an element of either preferential treatment or coercion, and hence an abuse of office or position.

The investigation has, therefore, proceeded on the assumption that any sexual rela-

<sup>&</sup>lt;sup>2</sup> This time period covers the terms of service of virtually all the pages whose employment over-lapped with that of the two pages whose allegations were reported in news broadcasts on June 30, 1982 and July 1, 1982.

<sup>2</sup> U.S.C. § 88b-1(a)(2).

On a number of occasions the House has considered discontinuing the use of high school teenagers as pages. For example the Legislative Reorganiza-Act of 1970, Public Law 91-510, 84 Sta (1970), as originally introduced, would have barred the appointment of pages who had not yet completed the twelfth grade of their secondary school education. 116 Congressional Record 32,229 (1970). Among the reasons commonly offered for using older pages is the desirability of minimizing or eliminating Congress's supervisory responsibility for pages. See e.g., Speaker's Commission on Pages, report to the Speaker, 97th Congress, 2d session 7 (1982); H. Rept. 91-1215, 91st Congress, 2d session 29-30 (1970).

tionship, whether homosexual or heterosexual, between a page and a Member, officer or employee, or any sexual harassment, overture or advance directed at a page by a Member, officer or employee, should be investigated as potentially "improper sexual conduct" under H. Res. 518.

## C. Allegations involving the Senate

In some instances, the Special Counsel has received information bearing on Members, officers, or employees of the Senate. The Special Counsel has not investigated these matters because the jurisdiction of the Committee runs only to the House. At the direction of the Committee and in accordance with arrangements with Senate Majority Leader Howard Baker, the Special Counsel has referred all such information to the Select Committee on Ethics of the U.S. Senate.

III. HOW THE INVESTIGATION WAS CONDUCTED A. Appointment of the Special Counsel and staffing of the Special Counsel's Office

Shortly after Chairman Stokes and Ranking Minority Member Spence announced the appointment of Joseph A. Califano, Jr. as Special Counsel to the Committee to oversee the investigation authorized by H. Res. 518. Mr. Califano assembled the staff of the Special Counsel's office. In staffing the office, as throughout the investigation, the pledges of independence were unequivocably supported by the Democratic and Re-

publican House leadership.

Mr. Califano appointed Richard Cotton as Deputy Special Counsel, Hamilton P. Fox, III, as Associate Special Counsel, and Gerald McQueen as Chief Investigator. Mr. Cotton, a partner in Mr. Califano's law firm, had just completed a six-month internal investigation for an international labor union. Mr. Fox had served as a federal prosecutor for six and a half years, as an Assistant U.S. Attorney, Deputy Chief of the Justice Department's organized crime section, and a member of the Watergate Special Prosecution Force. Mr. McQueen, a New York City homicide detective with 23 years' experience, had won national recognition as the commander of an elite detective squad assigned to solve Manhattan's most difficult homicide cases

The staff of the Special Counsel's office has averaged nine lawyers, seven investigators, three researchers and six clerical em-

plovees.

B. Characteristics of the investigation

Since July 27, 1982, the Special Council's office has attempted to investigate every specific allegation 5 that has come to its attention concerning the subject matter of H. Res. 518. In addition, the office has mounted wide-ranging efforts to contact individuals who might have information bearing on the subject matter of the investigation.

Attorneys and investigators on the Special Counsel's staff have carefully examined and followed up hundreds of leads, allegations and rumors. They have interviewed more than 150 individuals, many more than once, and conducted more than 50 despositions. They have travelled some 40,000 miles to interview witnesses in 40 cities. Forty-five subpoenas have been issued: 31 to compel oral testimony, 14 to compel production of documents. In addition, the office has made numerous requests to such agencies as the FBI, the United States Capitol Police and

merited investigation. C. Relationship with the Department of Jus-

From June through August, 1982, the Department of Justice investigated allegations of sexual misconduct by members of Congress and their staff. On August 31, 1982, the Department announced that it had closed that investigation because, as a Department spokesman stated, "there is insufficient evidence to warrant a federal prosecution or further investigation.

Counsel requested that the Attorney General make available to the Committee and its Special Counsel all written materials developed by the FBI in carrying out this investi-gation. On September 29, 1982, the Public Integrity Section of the Justice Department transmitted to the Special Counsel 244 documents, consisting primarily of summaries of interviews carried out by FBI agents in

the Metropolitan Police and to the broadcast media for materials which were voluntarily produced. Where necessary to follow up on specific allegations, investigators have reviewed financial and telephone records.

While it was essential to investigate each one of the specific allegations that prompted the passage of H. Res. 518, the Special Counsel decided that the mandate of H. Res. 518 required the Committee to seek out information that might bear on the subject matter of the investigation from all available sources. The Special Counsel initiated a number of separate inquiries to carry out this obligation.

First, lawyers and investigators interviewed more than 75 pages who had recently served in the House, and personnel in the Doorkeeper's Office whose duties include

supervision or direction of pages.

Second, the Special Counsel sent a letter requesting any information bearing of the subject matter under investigation to each of 516 former pages who had not already been contacted in person. These individuals served in the House of Representatives from September, 1979, through August, 1982. The text of this letter is reproduced in Appendix B to this report. Eighty-nine pages responded; 71 responded in writing, an additional 18 by telephone. Most said they had no information, but 11 responses contained relevant information or allegations of misconduct that required further investigation.

Third, the Special Counsel requested and obtained from the Capitol Police all documents and records for the years 1977 through 1982 that contained information bearing on the subject matter under investi-

gation.

Fourth, the Special Counsel made similar requests of the Doorkeeper of the House of Representatives, whose office is in charge of the page system, and of the Sergeant-at-Arms of the House of Representatives, who, together with the Sergeant-at-Arms of the Senate and the Architect of the Capitol, directs the Capitol Police.

Fifth, lawyers and investigators interviewed current and former teachers at the Capitol Page School concerning their knowledge of the subjects under investigation. Investigators also reviewed files of individual pages at the Capitol Page School and interviewed teachers from other educa-tional institutions who had had contact with pages in seminars and special classes.

Sixth, the Special Counsel's office examined a comprehensive compilation of press reports on the subject matter of H. Res. 518 and viewed videotapes of television news reports to identify specific allegations that

On behalf of the Committee, the Special

the course of this investigation. The names of certain witnesses who had requested confidentiality were deleted. The Justice De-partment informed the Committee that, with this exception, it had provided all the evidence collected.

#### D. Limits on the investigation

Any investigation of "improper or illegal sexual conduct" poses difficult obstacles and delicate problems. The Special Counsel's office has had to depend in large measure on interviews and depositions under oath to investigate these matters. Developing evidence depends on the willingness of individuals to come forward and to respond honestly to investigator's questions.

The investigation that has been conducted has, in the judgment of the Special Counsel, been as thorough as is reasonably possible. In an area involving such intimate conduct. such human sensitivity and so many individuals, it will never be possible to declare with certainty that every instance of what every citizen would consider "improper sexual conduct" has been detected. But the Committee, the House and the American people can be assured that every effort was made to contact individuals who might have relevant information. Every allegation put forward has been and will be pursued to the point where the Special Counsel concludes that there is no basis for it in fact, or that a preliminary inquiry is justified.

This has not been an inexpensive or pleasant task. It has taken much time, persistence, and patience on the part of Members of this Committee and attorneys and investigators in the Special Counsel's office, and the support of bipartisan House leadership and the Committee on Standards of Official Conduct. For many young Americans, a good number still teenagers, this investigation has been a difficult experience. But it has taken this kind of inquiry to provide the American people the assurance that the House of Representatives has the institutional stamina and courage to investigate its Members, officers, and employees searchingly and thoroughly.

#### IV. BACKGROUND: THE PAGE SYSTEM OF THE HOUSE OF REPRESENTATIVES

Because this investigation focused on pages and their relationships with Members, officers and employees of the House, it is essential to begin with an understanding of the page system. The House has relied on teenage pages as messengers since the early 1800's, and the system has survived many debates about its desirability, including the most recent review conducted this past summer by the Speaker's Commission on Pages. The key features of the page system-the selection process, the duties of pages, and the extent to which they are supervised-are described briefly below.

# A. Selection process and qualifications

During 1981-82, the House maintained 71 positions for House pages. Most page appointments run for six months or a year, although some appointments—typically in the summer-are for periods of two months or

Pages are nominated by a House Member and selected by the Democratic and Republican Personnel Committees from the candidates nominated. At the time of appointment, they must be high school juniors or seniors, at least 16 but not more than 18 years of age. The Republican Personnel Committee requires that pages have had at least a "B" scholastic average in their home

<sup>&</sup>lt;sup>5</sup> Some allegations concerned events so far in the past or were so vague that investigation was not

town high school; the Democratic Committee requires at least a "C" average.

Any Democratic Member of Congress may submit a recommendation to the Committee on Democratic Personnel requesting that an individual be appointed as a Democratic page. Typically, these recommendations provide the Committee with some information about the candidate, but the Committee has no application form and requires no specific information other than a birth certificate. The nominations are not considered on any particular date. The Committee's staff accumulates nominations until approximately ten are pending. These nominations, ranked according to the seniority of the Member making the nomination, are then submitted to the Committee Chairman, who makes the selections. The Committee conducts no independent check of a page's qualifications. The sponsoring Member is responsible for screening appli-cants and establishing that they meet the age, school year, and academic criteria.

The Committee on Republican Personnel has a printed application form, which requires a school transcript, an essay on why the applicant wants to be a page, a statement of extracurricular activities, and letters of recommendation. The Committee also requests that the Member personally interview the applicant and requires that sponsoring Members return the application materials by April 1 of each year. Information on each candidate is summarized by the Committee's staff, and page selection is made by Committee gives preference to Members who have not previously sponsored a page.

Neither Committee has established a systematic process for assessing the maturity of page candidates or their ability to handle the freedom that pages enjoy in Washing-

#### B. Duties of House pages

Pages do not work for the individual Members of Congress who sponsor them. They receive direction from the staff of the Door-keeper of the House, and work out of a central location just off the House Floor.

Pages never become involved in the substantive give-and-take of the legislative process. Their duties are exclusively those of clerical workers and messengers. They are generally assigned to the House floor, to the Democratic or Republican Cloakroom, or to positions as "running" pages. A page assigned to the House floor carries messages to and from Members and assists in assembling and distributing legislative materials on the floor. A page assigned to the Democratic or Republican Cloakroom answers telephones, carries messages to Members, and performs chores requested by Members while they are in the Cloakroom. "Running" pages deliver materials to congressional offices and to Members on the floor. Several pages serve as documentarians. processing House documents and operating the system of bells that call Members for votes. One is assigned as the Speaker's page.

The daily schedule of all pages, regardless of their assignment, is demanding. All are required to attend the Capitol Page School. Those enrolled for credit must maintain a "C" average; the rest are required to bring assignments from their home school and observe supervised study hours. Classes at the Capitol Page School begin at 6:10 a.m. and, on days when the House convenes at noon, typically run until 9:45 a.m. or 10:30 a.m. When the House convenes earlier, class sessions are abbreviated so that pages can report to work at least an hour before the

House starts. Except for meals, the pages remain on duty until 5:00 p.m. or until the House adjourns for the day, whichever is

#### C. Supervision of pages

#### (1) Working hours

The Doorkeeper of the House of Representatives, who is elected by the Caucus of the Majority Party, is responsible for supervising House pages during their working hours. The four to six pages working in the Democratic Cloakroom and the similar number working in the Republican Cloakroom report to the respective Managers of the Cloakrooms. The Democratic and Republican floor pages report, respectively, to the Majority and Minority Chief Pages, who are adult supervisors employed by the Doorkeeper of the House. The "running" pages, who are also supervised by the Majority and Minority Chief Pages, have intermediate supervisors drawn from the ranks of the pages themselves. These page "overseers" answer the telephones to receive requests for messenger service and then make assignments to "running" pages.
While the Doorkeeper of the House has

While the Doorkeeper of the House has overall responsibility for the pages, the Deputy Doorkeeper exercises disciplinary authority and receives reports from the two Cloakroom Managers and the two Chief

#### (2) Nonworking hours

Outside of working hours, no one has responsibility for supervision. In fact, the Handbook issued by the Doorkeeper specifically asserts that it is a condition of appointment that:

"Parents or Guardians must file with the Doorkeeper of the House, a written statement assuming full responsibility for the safety, well-being, and supervision of the Appointee while living in the District of Columbia area and traveling to and from the House of Representatives."

No individual in the Doorkeeper's office is formally responsible for counseling pages on problems outside of work or for seeing that they stay out of trouble. Some individuals in the Doorkeeper's Office show a good deal of concern for the pages' well-being, especially when it becomes apparent that a page is in some kind of difficulty.

The salary of teenage House pages—approximately \$700 every month—represents far more money than most of them have

previously had to manage.

Pages are responsible for finding their own housing. In 1981-82, pages generally resided in groups ranging from two to six in apartments located at various places on Capitol Hill, or in housing obtained through a university housing service. Apartments are frequently passed on from one page to another. Pages living in apartments had, in general, no adult supervision and no one easily available in the event of trouble.

easily available in the event of trouble.

Approximately 25 female pages lived in Thompson-Markward Hall, referred to by the pages as the "Y" because it is a dormitory-like facility with relatively strict curfew and other rules. The Page House Alumni Association, a non-profit organization created through the efforts of an employee of the Doorkeeper's office, provided dormitory-style housing for about ten male pages until August of last year.

Committee investigators interviewed the managers of seven apartment buildings in which pages resided. These individuals had been renting to pages for periods of time that range from slightly over one year to 40 years. Most were complimentary about the

conduct of the pages, and reported no knowledge of serious alcohol, drug or other problems with pages who had been their tenants. One, however, complained about excessive drinking and loud and boisterious parties.

The lack of effective supervision of pages after working hours has been sharply criticized for many years. Members of Congress have frequently called attention to the problem. In 1969, for example, Representative Andrews of North Dakota noted:

"It is unconscionable for Congress to bring these boys to the Washington metropolitan area and put them in some catch-ascatch-can accommodations where they lack supervision and decent quarters. If we are going to have high school boys working for the Congress they should have adequate quarters and proper supervision." Hearings before the Legislative Branch Subcommittee of the Committee on Appropriations, 91st Cong., 1st Sess. 497 (1969)."

In 1970, Representative Green of Oregon

"It is inconceivable to me that this situation has been allowed to continue. \* \* \* We bring youngsters—oftentimes from rural areas—turn them loose in a metropolitan area with more money than they have ever before had in their pockets and with absolutely no supervision in off hours. \* \* [I]t is incumbent upon us to provide these facilities in terms of housing and also in terms of classrooms. They find their own rooms in rooming houses or in tourist homes. I repeat—they have no supervision at all in their spare time. There is absolutely no one who is looking after their nutrition, their meals. 116 Cong. Rec. 32278 (1970)."

Testifying this past summer before the House Subcommittee on Legislative Branch Appropriations, the Doorkeeper of the House stated:

"They [the pages] are wards of the Congress. Once we bring them here, we have to assume some responsibility. We have already had some incidents. \* \* \* It is a very serious problem. Hearings on Legislative Branch Appropriations before Subcommittee on Legislative Branch Appropriations of the House Committee on Appropriations, 97th Cong., 2nd Sess., pt. 2 at 49 (1982)."

Because of concern over the absence of effective supervision, Congress has on a number of occasions considered discontinuing the use of high school age pages.

## V. RESULTS OF INVESTIGATION

The publicity given to the allegations made by Williams and Opp gave new life to every rumor and piece of gossip any page had ever heard. Once the House commissioned an investigation of sexual misconduct involving pages, any allegation repeated seriously by a page had to be investigated. Investigators have reconstructed conversations and rumors that were born in a milieu of teenage gossip and braggidocio. Investigators have time after time tracked a story from one page to another and finally to its source. In most instances, these allegations have proved without foundation—the result of a teenager trying to sound experienced. or the result of a drunken story invented on the spur of the moment at a party. Hundreds of hours of investigation have been required to reach these conclusions, and the results are set out below.

Not all of the allegations of sexual misconduct received by the Special Counsel have yet been fully investigated, however. In one case, the Special Counsel has recommended that a Preliminary Inquiry be initiated by the Committee, and the investigation of this case is continuing. The Special Counsel also continues to investigate a limited number of other allegations of sexual misconduct. No details will be provided at this time on any of the matters still under investigation.

This section discusses, first, the origins of the rumors about a "page scandal," and the events leading up to the charges made by Williams and Opp. The second and third parts of this section then examine in detail the allegations made by Williams and Opp, the investigation of these allegations, and the basis for the findings and conclusions reached by the Committee's Special Counsel.

Finally, the fourth part of this section briefly reviews a variety of other allegations of sexual misconduct received by the Special Counsel and his findings and conclusions concerning them.

# A. The origin of the allegations

(1) The 1981-82 year: The extent of alcohol use, drug use, and other misbehavior among pages

(a) Overview.—The Committee's investigation has found evidence of serious misbehavior by at least some of the pages during non-working hours over the 1981-82 year. These problems mirror those found elsewhere in the nation—alcohol abuse, drug abuse, late-night parties—but they were intensified by the complete freedom teenage pages enjoyed and the lack of any supervision after work.

Information provided to the Special Counsel indicates that many House pages routinely drank alcoholic beverages during the 1981-82 year, and many got drunk at large parties that occurred almost weekly. lesser but still significant number of pages drank excessively at smaller gatherings that occurred two or three times a week. A small number of pages also used drugs-caffeine pills, marijuana, and, in at least some instances, cocaine. Some pages used amyl nitrate, an over-the-counter substance inhaled through the nose. Information obtained by the Special Counsel indicates that alcohol abuse was far more prevalent than the use of other drugs. For example, pages often described the extent of marijuana use to Committee investigators as no more, and some said it was less, than they had witnessed at their home high schools.

Individual experience differed markedly. Pages tended to form small cliques, and a page's experience outside of work depended on his or her clique. The information pro-vided to the Special Counsel suggests that the pages fell roughly into three groups. One group, generally those who lived in the supervised housing, abstained almost entirely from use of alcohol and other drugs. A group, the largest numerically, tended to follow a middle path: They consumed alcoholic beverages (primarily beer) on occasion, and some in this group, particularly at parties, did drink to excess. This group experimented little with drugs. Finally, a third group—pages who lived in apart-ments and who saw themselves as more "mature" and independent-had the least disciplined life style. They attended more parties, drank a great deal, and were far more likely to use drugs.

(b) Alcohol abuse by pages.—The major drug problem that the pages themselves perceived was alcohol. Virtually every page interviewed on the subject stated that alcohol was easily available to underage pages from certain restaurants, bars, and liquor

stores in the Capitol Hill area of Washington.

The Special Counsel received information that pages generally consumed alcohol in three different circumstances: at lunchtime, at small informal gatherings at night, or at larger parties given by and attended by

Pages generally ate lunch in the government cafeterias on Capitol Hill. On occasion, however, pages would journey a few blocks to several restaurants on Pennsylvania Avenue and elsewhere in the area of the Capitol. The Special Counsel received varied testimony and information as to how frequently pages went to restaurants at lunch time. One page testified that some pages went out often and would frequently get drunk at lunchtime. Another testified that one page had been sent home after lunch for being drunk. Two pages testified that they ate lunch at the Pennsylvania Avenue restaurants a maximum of three to four times during the year, drank beer, but never got intoxicated. Another page discounted the stories of drinking at lunch as teenage boasting.

Pages engaged in different activities after working hours. Some reported that they had little social life; they simply returned to their living quarters, ate dinner, did homework, and went to bed early, because they had to arise at five a.m. each weekday. Others led more active social lives. For example, a group of five or six pages—of whom Leroy Williams was one—would gather at one another's rooms two or three evenings a week. At such gatherings, beer was the standard drink and hard liquor was often available. These gatherings sometimes became all-night sessions—with pages "passing out," sleeping in their clothes until it

was time to go to class.

During the 1981-82 year, pages also attended a number of larger parties. Estimates on the frequency of these parties have ranged from once a week to once a month. The variations in these estimates can be attributed to the frequency with which individual pages heard of or attended parties, and to differences in defining what constituted a "party," as distinguished from a more informal get-together. Nonetheless, large parties apparently occurred with some frequency. Alcoholic beverages were available at these parties, including hard liquor as well as beer. A good deal of drinking took place at these parties, and it was not uncom-

mon for pages to become intoxicated.

For example, one page testified that at "every party that I attended" alcohol was consumed, and that pages got drunk at "most" page parties the page had attended. Two other pages testified about parties at which they might have had so much to drink that they could not remember conversations or events that took place at the party. Another testified the pattern changed during the course of the year:

"I think pages abused that privilege of being on their own, so they drank when they first got there. But after the first few months some maintained drinking but some just dropped it and thought it was ridiculous, a waste of time, you know, do it every now and then. But the way they first came, it was like every single night, school nights and everything."

Several parties stood out in the minds of individual pages because of specific events. Pages recalled one party where a fight broke out between a page and two non-pages; another where Leroy Williams was so drunk he fell and cut himself badly; one

where a female page developed a nose bleed as a result of inhaling something; a fourth which was a "going-away" party for Leroy Williams; a year-end party where both alcohol and marijuana were available to pages.

In summary, alcohol use was extensive among pages during the 1981-82 year, and among some groups of pages and individuals it was seriously out of hand.

(c) Drug abuse by pages.—The Special Counsel has not completed the investigation of allegations concerning illicit use or distribution of drugs by Members, officers, or employees of the House. This report does not set forth any specific findings concerning such use or distribution, but it would be incomplete and misleading to address the sexual allegations involving pages without providing as background a description of the general sense obtained to date of drug use among the pages during 1981-82. Since these matters are still the subject of an active investigation by the Special Counsel and the Department of Justice, the summary presented here must necessarily be both partial and general.

The information gathered by the Special Counsel to date indicates that there was drug use by some pages during 1981-82. This drug use fell into four categories:

First, some pages used high dosage caffeine pills, amphetamines, or diet pills normally available only by prescription. Often these pills were used to keep awake during school and working hours.

Second, some pages used amyl nitrate, a substance known colloquially by a variety of names: "poppers," "rush," or "locker room." This substance comes in hard capsules which are broken open to allow the substance to be sniffed and give the user a "rush." It is reputedly used to enhance sexual performance. This substance is available over the counter.

Third, some pages smoked marijuana. The information obtained to date is not sufficient to determine the extent of marijuana use among the pages. But pages have said that it was used occasionally by some pages and that marijuana was smoked by a few pages at parties.

Fourth, the evidence received to date indicates that four pages may have used cocaine on a few occasions, although there is conflicting evidence on whether all four used it and, if so, how often. The information obtained to date is also not sufficient to reach a firm conclusion at this time about the extent of cocaine use among pages.

The evidence the Special Counsel has received, therefore, indicates that illegal drugs were used by some pages during 1981-82. No use of drugs by teenagers can be viewed as anything other than a grave and serious matter. But the evidence received to date indicates that the majority of pages did not use drugs during 1981-82.

# (2) Events of January to June, 1982

(a) Leroy Williams' departure from Washington, D.C.—The departure of Leroy Williams from Washington, D.C. is the event that brought attention to the activities of some pages. Williams had arrived as a page in June, 1981. He had been promoted to the position of page overseer in July, 1981. To all outward appearances he was doing well throughout the Fall of 1981. To the other pages, Williams appeared to have a lot of money, dressed well, and moved with a group of pages that partied and drank a lot.

On Friday, January 29, 1982, Williams turned his books in to the Secretary of the Capitol Page School. That night there was a farewell party for him. He left Washington that weekend.

Williams' departure might have been both the beginning and the end of the story were it not for Williams' landlady. She had been in regular contact with Williams' supervisor in the Doorkeeper's office, seeking assistance in collecting back rent. The Tuesday after Williams' departure, she reported to his supervisor that Williams had left behind some things in his room, including someone else's wallet. The supervisor informed her that the owner of the wallet was a page who had reported her wallet missing from the House Republican Cloakroom about two weeks earlier.

Based on this information, the landlady contacted the Capitol Police.

(b) The Grossi investigation.—When the page's wallet had first been reported missing, the Capitol Police had assigned the matter to Sgt. John Grossi of the Criminal Investigation Divison. On February 2, 1982, Williams' landlady met with Grossi and gave him the missing wallet. She informed Grossi that she had found the wallet when she was cleaning out the room of Leroy Williams.

Williams' landlady also told Grossi, that she had information concerning misconduct by pages. Grossi testified that she said that there had been "wild parties" at Williams' apartment and that "quite an amount of liquor and beer had been consumed." She reported receiving many complaints of loud all-night parties and broken liquor bottles in the trash area of the apartment building.

Finally, the landlady told Grossi about "pornographic material" which she had found in Williams' room. According to Grossi, she said that she had found "a particular type of magazine that lists homosexuals and . . . how you can get in touch with them"

During the next nine days, from February 2 to February 11, 1982, Grossi investigated not just the page's stolen wallet, but general misconduct of pages, including possible page involvement in homosexual activities.

Grossi interviewed eight pages. Both his recollection and his contemporaneous written reports indicate that the pages he interviewed confirmed that parties had occurred at which pages drank heavily. Grossi pressed for details in his interviews about the use of alcohol and the use of drugs among pages. He questioned the pages about Williams' homosexuality, about homosexuality among other pages, and about sexual activity between pages and "nonpage adults." According to Grossi's recollections, he did not ask questions about sexual activity involving either Members of Congress or congressional staff. He testified he had no reason to ask these questions because he had received no information suggesting such involvement. Nonetheless, it appears that at least two of the pages whom he interviewed interpreted his questions to mean that he was asking about Members of Congress and about congressional staff.

Grossi's reports list eight pages as directly or indirectly involved in loud parties, excessive drinking, forays to the Fourteenth Street "red light" district allegedly in search of prostitutes, or use of amyl nitrate. Grossi testified several pages told him that "the problem would no longer be a problem ... if they just got rid of a certain group

that was causing these problems."

In the course of his investigation, Grossi provided his written reports to Benjamin Guthrie, the Sergeant-at-Arms of the House. Guthrie provided information and copies of the reports to James Molloy, Doorkeeper of the House. Molloy in turn discussed these matters with several of his subordinates, at least some of whom also read Grossi's reports.

In a February 11, 1982 meeting, Guthrie directed Grossi to close his investigation.

(c) Actions following Grossi investigation.—Based on the information that Grossi developed, three actions occurred:

1. Two pages were terminated—technically on the grounds that they had grades below a C average at the page school.

 Doorkeeper Molloy informed sponsors of pages mentioned in Grossi's report that their pages' names had come up in the investigation.

3. Certain individual pages were reprimanded, and all pages were cautioned about their personal behavior.

Page terminations: One page reported by Grossi as a source of problems—Williams—had already left Washington. Molloy removed him from the page rolls to reflect administratively what had already occurred in fact.

During the Grossi investigation, Molloy discovered that two of the pages named in Grossi's reports had just then received midterm grades which fell below a C average. These two pages had come to his attention as poor workers in the past. He decided to terminate these two pages. To avoid giving them a bad record, Molloy justified the termination entirely on the basis of their grades. Molloy's recollection is that he simply informed the sponsoring Members that the pages were being sent home.

Molloy discussed another page identified by Grossi as a troublemaker with the page's immediate supervisor, and with the sponsoring Member. The supervisor reported to Molloy that the page in question was a hard worker and carried out his duties well. Molloy testified that the page's sponsor argued against the page being sent home on a number of grounds. Based on these conversations, Molloy decided not to terminate this page. But he asked the supervisor to have a tough conversation with the page and give him a strong warning that, if any further reports of misbehavior were received, he would be terminated.

Notification to Members: Guthrie and Molloy testified that they had one conversation with the Speaker of the House about the Capitol Police investigation shortly after the investigation began. The Speaker asked Molloy to notify the congressional sponsors of pages whose behaviour was under investigation. Molloy made a round of visits and telephone calls to carry out this instruction. In some circumstances, he could not reach the Member personally, and in some of those instances he provided the information to the Members' staff.

General followup by Doorkeeper's Office: About the middle of February, the Deputy in the Doorkeeper's Office, Jack Russ, convened a meeting of all pages. Russ covered a number of topics at this meeting. He included a strong warning to all pages against bouncing checks, drinking alcohol, or giving or attending wild parties. He alluded to the departure of several pages, with the implication that he hoped that there would be no further problems. Either at this meeting or at other times, pages received the clear impression that the Doorkeeper's Office did not want them to discuss these matters with the press.

(d) Rumors of a "page scandal" and press followup.-By mid-February, 1982 many people knew of the Capitol Police investigation and the existence of some page problems. The pages themselves were very much aware of the inquiry. The eight pages whom Grossi interviewed and the several additional pages named in his report were acutely interested in what the Capitol Police were finding. The nature of some of Grossi's questions to the pages inevitably had fueled speculation. Rumors abounded as interviewed pages read additional implications into Grossi's questions and speculated with others on what lay behind those questions. One page testified that another who had been interviewed speculated that Grossi thought Williams was a homosexual liaison for Members of Congress.

Some pages may have had a motivation to spread these rumors. Pages whose conduct was under scrutiny were not happy about the investigation or Molloy's complaints to their sponsors. The Special Counsel received evidence that some pages may, out of anger, have spread, or threatened to spread, malicious stories about Members of the House.8 An aide to Representative Patricia Schroeder, who sponsored Opp, recalls that Opp telephoned him one night in February from a page party, and told him that if the pages were going to be criticized they would take a few Members of Congress with them. A congressional staff person called the staff of the House Committee on Standards of Official Conduct on February 11 to report the rumor-along with a host of inaccurate details-that Williams had been a homosexual pimp for Members of Congress. When traced to its source by investigators for the Special Counsel, the source turned out to be

Beyond the pages, some sponsoring Members, the staff of some of those Members, and at least four or five staff members in the Doorkeeper's Office knew not only of the investigation but also of some details. In all, at least 20 to 30 people, probably more, knew something about the problems that had been discovered with the pages. Capitol Hill was described by one witness in his deposition as "the rumor capitol of the world." In this environment, it did not take long for news of the page investigation to travel.

The rumors quickly reached reporters. On February 11, 1982, the very day the Capitol Police closed their investigation, a reporter from the Washington Post called the Committee on Standards of Official Conduct and asked if the Committee was investigating improper activity involving House pages. At the same time, a reporter from Independent News Network made a number of calls and sought to interview pages. No stories appeared in the press during February, 1982, but rumors envisioning a scandal far beyond

<sup>&</sup>lt;sup>6</sup> A further discussion of the Capitol Police investigation appears in Appendix A.

<sup>&#</sup>x27;Staff members of the sponsoring Members recall that Molloy mentioned that the pages being dismissed had been named in an investigation. But staff of one of the Congressional sponsors believed that it was the sponsoring Member, and not Molloy, who decided to send the page home on the basis of bad grades. The sponsor of the other page recalls discussing with Molloy several reasons for his page's dismissal, including poor grades.

<sup>&</sup>lt;sup>8</sup>One of the terminated pages reacted angrily to his termination. This page told other pages that he was going to contact the Washington Post and expose the widespread favoritism on Capitol Hill. This page testified that he never followed through on this threat. But many pages reported as fact to Committee investigators that this page had gone to the House Press Gallery and denounced his spon-

the facts continued to circulate in the Capitol.

(e) Intervening developments.—No further significant developments involving pages occurred during the months of March, April and May.

Two important events did occur, however, although their significance was not appreciated until later. On March 18, 1982, the Arlington Police Department raided a male modeling agency that the police alleged was a front for a homosexual prostitution out-call business. The D.C. and Arlington Police confiscated extensive business records which included the names, addresses, and telephone numbers of hundreds of customers. These records also included detailed accounts of the dates, times, and names of both customer and prostitute for nearly every liaison. At the time of the raid, no one recognized that Friendly Models was the organization whose directory was found in Leroy Williams' room by his landlady in February, 1982.

One month later, on April 19, 1982, in a wholly unrelated investigation, the D.C. Metropolitan Police arrested three individuals for allegedly selling cocaine to an undercover police officer. One of the individuals arrested was a former page, and another was a former congressional staff member. The arrests do not appear to have made news at the time they occurred. But in mid-June both the Washington Post and the local Washington television affiliate of CBS, WDM, ran stories reporting that one of the arrested individuals had begun cooperating with the authorities. They charged that a network of Congressional aides such as tour guides, pages, and staff of the House Doorkeeper was distributing drugs on Capitol Hill.

(f) CBS news reporter.—Sometime in late May or early June, a CBS television reporter began contacting pages in the House seeking information about improper activities on the part of Members of Congress.

On June 9, 1982, Jeffrey Opp, then a sixteen-year-old House page, received a telephone call at his apartment in Washington, D.C. The caller did not identify himself, but, according to Opp, said he had an invitation for Opp and needed Opp's address. Opp provided his address to the caller. Opp testified that within five minutes a visitor knocked on his door and introduced himself as a CBS news reporter.

According to Opp, the reporter said he had been investigating homosexual activities of Members of Congress for some time. Opp testified under oath that the reporter asked him about a ring of 25 to 50 homosexual Congressmen and about an employee of the Doorkeeper's office who allegedly procured pages for them. Opp testified that the reporter claimed to have talked to homosexual prostitutes who told him that some Members of Congress frequented the "red light" district in Washington. Opp told the FBI and testified in his deposition that the reporter named Congressmen in his discussion of these allegations. According to Opp, the allegations discussed by the reporter According to Opp, the reporter said that he had heard that Opp knew a lot and was not an "air head." By Opp's account, he felt flattered by the reporter's attention and therefore spent some time talking to him.

Immediately after this conversation with the reporter, Opp had conversations with at least two other pages. He talked about homosexual approaches he said he had personally experienced and he also began repeating some of the stories that the reporter had told him.

On June 10, 1982, the day after Opp's discussion with the reporter, Opp went to see two staff aides in the office of Opp's sponsor, Representative Schroeder. He told them about a homosexual prostitution ring and drug use involving pages, Members of Congress and others. They asked him how he knew this, and he said he had been working undercover for the prior two weeks contacting young homosexual prostitutes on a section of New York Avenue (part of the Washington "red light" district) to assist a CBS news investigation. Opp claimed that an electronic "bug" had been placed in his room, that his new roommate was a "plant" placed to spy on him by the House Doorkeeper, and that people were watching his house. According to all three individuals involved, this conversation was tense; Opp was agitated and angry.

The two staff members were concerned about Opp's charges, and angry at the idea that a news organization would use a 16year-old House page to assist in investigating a homosexual ring in the New York Avenue area. They contacted officials at the Department of Justice, and telephoned the CBS reporter to complain. The reporter said he could not talk on the phone, and arranged to meet them on the Mall in front of the East Wing of the National Gallery of Art. The reporter arrived with another CBS employee. The Schroeder aides recall that his manner was very secretive. He said he had learned of a widespread homosexual ring among high-ranking government officials. He said he had been investigating this ring for some time, and it was a major scan-In a sworn statement, one of the Schroeder aides recalls that at this point in the conversation, the reporter "even drew a scheme on a piece of paper which had the Capitol at the center and included lines to the Pentagon, the Department of Justice, State, and GAO. He emphatically asserted that he had solid information that there was a widespread, organized homosexual ring among executive branch employees, including the agencies he drew, [M]embers of [C]ongress, lobbyists, and Capitol employees, and that favors were being traded for sex, including page promotions and extensions.

The Schroeder staff members told the reporter that Opp said he had been used undercover for two weeks on New York Avenue as part of CBS's investigation. The reporter denied that Opp had done any work for him, and said that, in fact, he had only talked to Opp the day before, June 9. The reporter said that he had discussed the names of some Congressmen with Opp to get Opp's view of them. The reporter said that he included in the list of names discussed with Opp some "dead-fish" Congressmen whom the reporter did not believe to

be involved in improper conduct, in order to test Opp's reliability. Opp had not claimed to have any knowledge about these people, which in the reporter's judgment enhanced the credibility of Opp's comments about others

Following this meeting with the reporter, the Schroeder aides interviewed Opp again. This interview occurred on Friday, June 11, 1982. Opp admitted that he exaggerated in his first meeting. He admitted that he had made up the story about finding a "bug" as well as the part about interviewing male prostitutes to assist CBS News. He also admitted he had no evidence that his roommate was a spy, planted by the Doorkeeper's office. But he stuck to the rest of the story.

That same day, the aides made arrangements for Opp to meet with Department of Justice Officials on Monday, June 14, 1982. Also on June 11, however, the reporter called Opp, and Opp agreed to give an interview on camera, with lighting and effects to shield his identity. This interview took place at CBS studios in Washington on the next day, Saturday, June 12 although it was not aired until June 30.

On June 14, 1982, Opp and his father met with attorneys from the Public Integrity Section for two hours. The Justice Department then initiated its investigation.

The CBS reporter later asked one of the Schroeder staff members about the details of the meeting at Justice and requested a description of the agents who attended. That staffer recalls that on at least one occasion between June 10 and June 15, he told the reporter:

"If you are basing your story on Opp's word, you are skating on thin ice. He may know something but he is not reliable, and a good deal of what he told us about this, along with some other unrelated items, turned out not to be true. For example, Opp had told me on/about May 1982 he had been admitted to Georgetown University and it turned out he was only a junior in high school and was not admitted to any university."

But Schroeder's staffer said the reporter responded that his story would not be based simply on Opp's allegations, that he had several witnesses and that Opp corroborated what he already had from other sources.

During June, the reporter also contacted Leroy Williams in Arkansas. On Saturday, June 21, 1982, he appeared unannounced at Williams' home in Little Rock. According to Williams' sworn testimony, the reporter said that the Doorkeeper's office had told the press that three pages including him had created problems, these pages had been dismissed, and that action cleared up the problem. The reporter also said to Williams that Opp had told the Justice Department that Williams was involved in homosexual activity as well as in drug trafficking. The reporter said that he believed the Doorkeeper's office was not being fair to Williams, and that he wanted to give Williams an opportunity to present his side.

Williams testified that he was upset to hear that the Doorkeeper's office was blaming him for problems of the page system, and that Opp had charged him with trafficking in narcotics. He saw the television reporter as an opportunity to respond to these charges. The reporter assured Williams that he would not reveal his identity, even in discussing with other witnesses information provided by Williams. The reporter promised Williams that he would not

were that one Congressman liked eightyear-olds, a second Congressman frequented the homosexual areas of Fourteenth Street, a third was "after little kids," a fourth was involved in homosexual activities, and a fifth was "an avid coke fiend."

<sup>&</sup>lt;sup>9</sup> The reporter declined to be interviewed by representatives from the Special Counsel's office, so that this account draws on information provided by people to whom the reporter spoke. In addition to the formal exchange of correspondence between the Special Counsel and the CBS attorney, there were several conversations between the Associate Special Counsel and the CBS attorney to provide the reporter an opportunity to comment on sworn testimony about him and to obtain any information of improper activities he had.

reveal the names of any people with whom Williams was sexually involved.

After having been given these assurances of confidentiality, Williams met with the reporter on Sunday, June 22, for about an hour. During that time the reporter interviewed him and tape-recorded the interview. On the following day, Monday, June 23, Williams, his face backlighted and hidden in deep shadows, gave the reporter an oncamera interview and alleged that he had had homosexual relations with three Congressmen and with Congressional staff.

On June 30 and July 1, CBS broadcast its interviews with Opp and Williams, and the Congress and the nation were introduced to the "page scandal." Thirteen days later, the House adopted to H. Res. 518, initiating this investigation.

#### (3) Summary

It is the conclusion of the Special Counsel that the rumors that sparked the initial press interest and press investigation of a "page scandal" on Capitol Hill had their origins in the events surrounding the departure of three pages from the page program in late January and early February of 1982.

These events included a brief investigation by Sgt. John Grossi of the Capitol Police Department. The issues raised by this investigation were unquestionably serious. They involved excessive drinking by young pages whose welfare was in large measure the responsibility of the House of Representatives. In addition, there were allegations that pages were involved in the use of drugs and in trips to Fourteenth Street to find prostitutes. Finally, the evidence assembled by Grossi indicated that Leroy Williams had been seriously in debt when he left Washington, and that Williams had left homosexual literature in his room when he left Washington. But nothing in the original investigation or in the facts that the Special Counsel has found concerning events in February even hinted at sexual misconduct involving Members or employees of the House.

Nonetheless, the evidence is clear that rumors about a "page scandal" began circulating in the wake of the investigation. These rumors included stories about sexual relationships between Members and pages as well as stories of pages "pimping" for Members. But the evidence also indicates that these rumors were grossly distorted interpretations of the page dismissals and the Capitol Police investigation.

Finally, the allegations made by the two former pages to the press in June, 1982 appear to have been stimulated more by their own resentment, egos and immaturity, and by contact with one reporter, than by any events involving actions by Members of Congress. It is to the allegations made by Leroy Williams and Jeffrey Opp that we now turn.

# B. Leroy Williams

In his CBS interview, Williams asserted that he had had sexual relations with three different Congressmen, three times with one of them, and that he procured homosexual prostitutes for Congressional staffers. Two month's later, Williams changed his story when he was interviewed by Committee investigators. Williams then testified under oath in a deposition taken by the Committee Chairman and Special Counsel that his prior assertions were false.

Since Williams had told two stories that were totally contradictory, the Special Counsel concluded that it was necessary to investigate his charges independently in order to assess whether his original story or his recantation was in fact true. In what follows, this report describes Williams' personal background, analyzes his experience in Washington in order to discern his motives for making the false charges that he did, and presents the basis for the Special Counsel's conclusion that Williams' original charges were false and that the testimony he gave under oath when he recanted those charges was accurate.

# (1) Personal background

(a) Introduction.—Leroy Williams was born on June 14, 1964 in Little Rock, Arkansas, and is the fifth of six children. His father worked as a laborer until several years ago when a medical disability forced his retirement. His mother is a domestic worker. Williams testified that his two older brothers are in prison, one for murder, one for robbery. His father and mother have periodically separated.

Prior to coming to Washington, Williams attended high school in Little Rock, where he was a "B" student and was involved in extracurricular activities such as the school choir and the drama club. He was also active in the Sixth and Izard Church of Christ. Williams testified that before he came to Washington he drank alcohol infrequently, "maybe once a month." He occasionally used drugs, such as marijuana, "on a limited social basis," at most once a month.

Unknown to his family and friends in Arkansas, Williams had felt a sexual attraction toward other males since the age of 12. At 14, he engaged in sexual relations with another male for the first time. During the three years from 1978 to 1981 that preceded his arrival in Washington, Williams had sexual relations with men approximately ten times. Williams guarded this secret elegals.

Williams first came to Washington in February, 1981, as a participant in "Close-Up," a program that brings high school students to Washington for a week to learn about government. While in Washington, Williams became interested in working as a page and filed an application with his Congressman, Representative Ed Bethune. Williams' application included recommendations from his history teacher and from persons at his church. The House Committee on Republican Personnel notified Congressman Bethune of Williams' selection on May 19, 1981, and he assumed his duties as a page June 29, 1981.

At the end of July, Williams was selected by the Doorkeeper to be one of the two Republican Page Overseers, a supervisory position. Throughout the period Williams served as a page, his work was considered satisfactory, although his performance declined toward the end of his tenure.

It was after working hours that Williams began to have problems. Williams spent most of his time outside of work and school with a group of about five or six pages. He created a fictitious picture that he came from a wealthy family. He told other pages that his father was a heart surgeon, his mother an opera singer. He talked about his parents' ranch, their European travels, and the cotillion balls they held every Christmas. Williams also told the other pages about his girlfriend, Nancy, who he said was a nurse. None of the pages ever saw or met Nancy.

(b) Sexual activities.—When the Congress went into its 1981 mid-summer recess, most of the other pages went home. But Leroy Williams remained in Washington alone. He told other pages that he was not going

home because his parents were travelling abroad. It was at this point that the 17 yearold Williams first engaged the services of a homosexual prostitute.

He contacted the "Friendly Models" agency and obtained the services of a male prostitute, for which he paid \$50 by check. Williams used the services of the Friendly Models agency on fifteen different occasions between August, 1981, and January, 1982, ten of those times during the August Congressional recess.

In the months that followed, Williams cruised the gay bars and bookstores, and visited a gay bath house. He testified that between the end of August, 1981 and the end of January, 1982 he had homosexual relations on an average of three times a week, usually with a different person whom he had met in one of those establishments. Williams thought some were congressional employees because he said he later recognized them at work in the Capitol. He dealt with these men on a one-time, first-name basis. In addition to these occasional relationships, Williams testified he had sexual relations on a few occasions with a male who was a Government Printing Office employee, and then over a period of several weeks with a male hairdresser who worked in Georgetown. So far as the pages were concerned, Williams tried to hide his homosexuality.

But it was impossible to keep this secret completely hidden. In August, Williams moved to an apartment from the room he had rented when he first arrived. A page supervisor in the Doorkeeper's office, who had rented Williams his first room, discovered a brochure advertising the Friendly Models prostitution agency among personal effects Williams had left in his room. This page supervisor has testified under oath that he did nothing with this information:

"I figured essentially that Leroy no longer lived there and that his social life, whatever it may be, \* \* \* [was] not of a particular interest to me \* \* \* In any respect, I have not really discussed with any page their sexual activity and while I am concerned about it and don't like it at all, I am not really sure what my role would be in discussing it with them."

(c) Use of alcohol and drugs.-During the seven months that Williams was in Washington, he consumed more and more alcohol. He drank when he cruised homosexual bars, and he and the five or six pages in his group drank frequently. The group gathered two or three times a week at his or another page's apartment for heavy drinking sessions lasting well into the night. Sometimes these sessions would go on until it was time for the pages to go to school at six the next morning. Williams or other pages would occasionally drink until they passed out from a combination of alcohol and exhaustion. Williams testified that when he left Washington in late January, 1982, he 'was literally an alcoholic."

Williams' use of drugs also increased sharply while he was a page. He frequently took caffeine pills to stay awake during the long hours of school and work when the House was in session. Williams testified that he used marijuana on several occasions, and he used cocaine two or three times. But alcohol, not drugs, was his nemesis.

Williams' school record reflects his intensifying problems while he was a page. In early fall 1981, Williams' first advisory grades were close to a B average. By the late fall, they had fallen well below a C average.

(d) Financial problems.—Williams got into increasingly severe financial trouble in Washington. Pages are paid \$700 per month. But that is not enough money to pay for rent, purchase food, and live the kind of lifestyle that Leroy Williams pursued. Williams' use of homosexual prostitutes, his heavy drinking, his expensive taste in clothing, and the gifts he reportedly gave to other pages at Christmas strained his finances severely.

Williams had no source of income other than his salary. He lived in the fashion he did by failing to pay a large number of bills, writing bad checks, and stealing money. When he eventually left Washington in January, 1982, Williams left behind many unpaid charge bills and bounced checks, including almost \$900 in unpaid rent and tele-

phone bills.

(e) Williams' departure.-By January, Williams was regularly bouncing checks. His landlady was becoming more and more impatient for her back rent. Williams testified that he was now more dependent on alcohol, more fearful that his homosexuality been discovered, and felt more preshad sured on his job. On Friday, January 29, 1982, Williams told his supervisor he was going to resign. That evening he went out with other pages to a party, and spent the night in a homosexual bath house. The next morning, Saturday, January 30, Williams took an automobile belonging to a fellow page, drove to Tuscaloosa, Alabama. He visthe former youth minister of his church who was living there, and eventually returned home to Little Rock.

(f) Williams' decision to talk to the press.—After he arrived back home in Little Rock in February, 1982, Williams began to realize that his departure had stimulated criticisms and speculation about him.

In early March, Williams was approached by a reporter for a local television station for an interview about his experiences as a page. The reporter asked Williams if he had ever been homosexually propositioned while in Washington. Williams responded, "Just by someone who worked on the Hill.

Then, later in March, the page whose car Williams had taken telephoned and asked if Williams had stolen the automobile which had been recovered in Tuscaloosa, Alabama. Williams denied taking the automobile. The page also told him there were rumors that Williams had been involved in drug traffick-

ing

According to Williams, he immediately telephoned his best friend among the pages in Washington. She called him back that same evening on a WATS line. She told him that the Doorkeeper's Office had linked him with two other pages who had been dismissed in February. Williams' friend said that supervisors in the Doorkeeper's office were saying that all three pages, including Williams, had been fired because they were "bad apples." She told Williams there was a press investigation about him, and the pages had been told not to talk to the press about

According to Williams, his anger and re sentment came to a head in June, 1982, when he gave a CBS News reporter the interview that CBS broadcast on June 30.

### (2) Williams' allegations

The F.B.I., various news organizations, and the Committee's staff interviewed Williams in June and July, 1982. He did not tell the same story each time. But, in the course of these interviews, he claimed that:

He was propositioned by, and had sexual relations with, three Congressmen;

He arranged a sexual liaison between a Senator and a male prostitute:

He arranged sexual liaisons with male prostitutes for a Congressman's administrative assistant and for an employee of the

Government Printing Office.
Williams also repeated to interviewers other allegations of sexual misconduct by Members and employees of the House which Williams said had been told to him by other pages. Specifically, he said he had been told that:

A female page had been sleeping with two

different Congressmen:

Pages suspected a Doorkeeper's office employee of procuring female pages for sexual liaisons with a Member of Congress, arranging homosexual activities for Congressmen, and having homosexual relations with some

male pages;

The Special Counsel has concluded that there is no evidence to support any of Williams' original charges. In reaching this conclusion, the Special Counsel has not relied solely on Williams' recantation. Rather, the Special Counsel's investigative staff has conducted a detailed investigation of each of Williams' allegations. Every bit of independent evidence collected supports the conclusion that Williams' original allegations were false and that he was telling the truth when he testified he had lied about those charges.

(a) General credibility.-Williams' credibility, even before he said he was lying about all of the allegations, was not high. While in Washington, Williams had lied about his family background. He had written numerous bad checks, failed to pay his rent, and lied to his supervisors about his financial problems. Finally, at the time he left the page program, he was suspected of having stolen both a wallet and a car from

other pages.

Williams' allegations were inconsistent almost from the moment he started making them. In his press interview in March, Williams derided rumors of sexual relations between pages and House staff, saying it was "a very, very small problem." He said he did not know of pages involved with congressional staff members, although he was aware of an occasional "pass" at pages. He specifically denied that he was personally involved in "this homosexual thing," but he did say that once a person "who worked on

the Hill" made a "pass" at him.

In June, Williams suddenly made his sensational charges on television that he had sexual relations with three Congressmen and procured prostitutes for congressional staff members. However, in Williams' first interview with the FBI on June 25, 1982, two or three days after he talked to CBS. Williams mentioned sexual relations with two Congressmen, and did not mention staff. Moreover, the details he provided concerning certain incidents differed. Williams told CBS he had sex with one Congressman on three occasions including one time at the Watergate. Williams told the FBI his most frequent encounters with one Congressman were on two occasions, and never mentioned a tryst at the Watergate.

Williams was reinterviewed by the FBI on July 7, 1982, and his story changed once again. He now spoke of sexual relations with three Congressmen, and gave the FBI a third name. But now, Williams added other names and allegations. For the first time, Williams said he had procured a male prostitute for a Senator, congressional staff member, and Government Printing Office

employee.

In his first interview with investigators from this Committee on July 9 and 10, Williams also lied. Questioned about the thefts of a female page's purse, of another page's automobile, and of a checkbook and cash from a family friend in Washington, Williams made up an elaborate story about the stolen car and also had an innocent explanation for the stolen purse. On the second day of this interview, however, he admitted that he had taken the purse, had in fact stolen the car, and \$120 in \$20 bills and some checks from his friend's purse.

On July 8, 1982, Williams failed a lie detector test administered by the FBI.

(b) Retraction by Leroy Williams.-By late August, inverviews with many pages and other individuals had established there was no corroboration for Leroy Williams' allegations. Under the circumstances, the Special Counsel decided Williams should be reinterviewed and confronted with the evidence. Extensive preparations were undertaken to prepare for the interview. Investigators diagrammed the offices of each of the Members of the House of Representatives with whom Williams alleged he had sexual relations. They noted unusual design features to test if Williams could provide details, since he claimed he had sexual relations with each Member in that Member's office. They interviewed the Congressmen's staffs to obtain information about the Congressmen to be used in questioning Williams.

On August 26, 1982, investigators met with Williams in Little Rock, Arkansas. During this interview, Williams admitted for the first time that the allegations that he had had homosexual relations with Members of Congress were false. He also admitted that the allegations that he had arranged sexual liaisons between male prostitutes and a Senator, a Congressman's staff employee, and an employee of the Government Printing Office, were also false.

Following these admissions to the investigators, a deposition was scheduled for the morning of August 28, 1982 in Washington. On that day the Chairman and Special Counsel deposed Williams in executive session in the presence of his attorney.

Williams testified that he had left Washington and the page program in late January, 1982 as a result of the problems he had experienced from excessive drinking:

"Because of the pressure that had been put on me because of [my supervisor's] suspecting my homosexuality, the pressures of the job, the fact that I was literally an alcoholic because I had gotten to the point where I felt like every day at lunch I had to have a drink in order to go through the rest of the day. Those situations scared me a great deal and I decided that it would be better for me to be at home because I had too much of my life left to ruin it all at such an early age."

Williams testified that when he was interviewed by the CBS news reporter in June of 1982, he made up the story about having sexual relations with Members of Congress. He told the Committee under oath:

"It was my intention to create a story that would be credible and drastic enough that it would cause enough public interest in order to cause people to look at the page system and look at what was going on and basically that was my reason."

Williams testified under oath that he never had sexual relations with any Member of Congress. He specifically denied under oath that he had never had sexual relations with the Congressmen he had named, that he had had sexual relations with the Senator he had named or that he ever arranged a liaison between the Senator and a homosexual prostitute.

He testified that Committee investigators had not pressured him or attempted to pressure him into changing his story. Rather, he said he had decided to tell the truth:

"Mainly because the mental depression and the pressure of the fraud that I created was just overwhelming and I knew, or at least I felt like, there had been enough attention brought to the pages where there were going to have to be modifications. So at that time, I did not feel like there was any reason to continue in the fraud because I was ready to tell the truth because the pressure was just overwhelming. It had gotten to the point where I wanted to end my life. So I knew that time it had become drastic enough for me to disclose the truth."

#### (3) Investigative findings

(a) Allegations against Members of Congress.—At various times, Williams alleged that he had had sexual relations with three members of Congress and that he had procured a male prostitute for a Senator. In two instances, the evidence obtained, in the judgment of the Special Counsel, proves—independent of Williams' recantation—that Williams' allegations were not true. In the other two instances, Williams' vagueness about dates has limited the Special Counsel's ability to develop definitive proof. But all the evidence that has been obtained contradicts Williams' allegations.

#### (i) Allegations for Which Detailed Evidence Was Obtained

Congressman A 10: Williams told two versions of his encounter with Congressman A. On July 7, Williams told the FBI the following story about Congressman A: In November, 1981, Congressman A approached him on the House floor and asked him to come to his office after the session. Williams discussed the situation with a fellow page who was a close friend. That evening he went to Congressman A's office, at about 6 p.m. where the Congressman expressed his desire to become better acquainted with Williams. This encounter lasted only 10 minutes and involved no sex. Over the next two weeks Congressman A once again approached him on the House Floor and asked him to come by his office. Williams said he went to Congressman A's office at approximately 6:00 p.m. that same day, where he was alone with the Congressman. Williams alleged that he and Congressman A engaged in homosexual relations for approximately one hour.

Two days later, Williams told Committee investigators a slightly different story. He said he had sexual relations with Congressman A in November, 1981 after the first approach by Congressman A on the House floor. He again said, however, that he joined Congressman A in the Congressman's office at 6 p.m. He said that the sexual relations were unsatisfactory to both of them and that Congressman A never approached him again.

Although the inconsistencies in the stories raise questions about Williams' credibility, both stories are consistent with respect to time-6 p.m.- and Williams' allegation that the liaison occurred on a work day sometime in November, 1981.

Investigators in the Special Counsel's Office have reconstructed Congressman A's time during the month of November 1981.

10 Since the Special Counsel has concluded the allegations concerning these Congressmen are false, no names will be used in this report.

That reconstruction indicates it was not possible for Williams to have been alone with the Congressman in his office between 6 and 7 p.m. in November, 1981 on a night when the House was in session. One staff member stayed in Congressman A's office every week night, except Tuesdays, during November, 1981, until at least 8:00 p.m., an hour after Williams claimed he was with the Congressman. That staff member served as secretary and receptionist between 6 and 8:00 p.m. and was aware if the Congressman was in his office and who was with him. She has stated under oath that the Congressman was never alone with a page in his office while she was there. If the meeting with Williams occurred during the week, it would have had to occur on one of the Tuesday nights during November when this staff member was not on duty.

The Special Counsel's office obtained and examined the Congressman's schedule and travel records for November 1981. These rec- ords show that Congressman A was not in Washington on three of the four Tuesdays in November. On the one Tuesday he was in Washington, the Congressman's records show that the Congressman was assigned the job of watching the floor for his party, and the Congressional Record shows that he was on the floor of the House until 7:39 p.m., more than one-half hour after Williams alleges their liaison terminated.

The House was in session on only one Saturday in November, 1981-Saturday, November 21. That evening, Congressman A went to dinner with another Congressman at a restaurant on Capitol Hill, between 6:00 p.m. and 7:30 p.m. The Special Counsel has obtained a copy of Congressman A's charge account receipt showing a charge at this restaurant on this date. The Special Counsel's staff has also interviewed the Congressman whom Congressman A said accompanied him to dinner that night. This Congressman confirms that he did in fact go to dinner with Congressman A immediately after the House session on November 21 at the restaurant named.

Congressman A requested that he be deposed, and he has sworn under oath that he never propositioned Williams, never had sexual relations with him, and in fact never even knew him.

Finally, the page whom Williams claimed he told about the approach from Congress-man A denies that Williams ever mentioned the matter.

In sum, based on the evidence obtained by the Special Counsel's office, it appears virtually impossible for Williams to have had sexual relations with Congressman A in his office between 6:00 and 7:00 p.m. on any work day in November, 1981.

Senator B: In July, Williams also made allegations to the FBI and this Committee's investigators about Senator B. Senator B is outside the jurisdiction of this Committee. However, to test Williams' credibility, the Special Counsel did investigate the allegations Williams had made.

On its face, Williams' story about Senator B strains credulity.

Williams alleged that in the latter part of November, 1981, his work as a page overseer required him to make frequent trips to the Senate where he became acquainted with Senator B. Williams stated that during one conversation the Senator asked him if he knew someone named Roger. Williams said that Roger, whom he had met two or three times, was a male prostitute employed by an "outcall" prostitution agency, Friendly Models. Williams said he told the Senator he did know Roger and the Senator then requested Williams to contact Roger for him.

According to Williams' story, the Senator asked Williams to arrange a liaison between Roger and the Senator at Williams' apartment. Williams told the Senator that he could not use his own apartment, but he could use the apartment of a friend with whom Williams was staying at the Watergate South apartments. Williams said he agreed to make the necessary arrangements, and subsequently, contacted the Senator's office by telephone leaving a message with a secretary that the appointment was set for 11:00 p.m. that evening. The Senator arrived at the apartment shortly after 11:00, after William's friend had gone to bed. After the Senator arrived, Williams claimed he contacted Friendly Models and requested Roger be sent to the apartment.

According to Williams, Roger did come to the apartment. After drinks, Williams said that Roger and the Senator went into the master bedroom for approximately one hour. Afterwards, as the Senator was leaving, he asked Williams to call his office if there was any way he could be of assistance to Williams. Williams alleged that approximately one week later, he telephoned the Senator's office and told a secretary that he wanted to work as a Senate page. The secretary told him she had a memorandum from the Senator indicating she should help Williams in any way possible. In a later conversation with this secretary, Williams said he was told that his application had been sent to "the appropriate Committee." Before the Committee made its decision, however, Williams had decided to return home, and did not pursue the matter.

The independent evidence developed by the Committee shows virtually every statement in this story to be untrue.

'Roger" and Senator B: Unrelated to this Committee's investigation, the Arlington County Police had executed a search warrant and obtained the records of Friendly Models on March 18, 1982. The Arlington Police provided the Special Counsel's Office with the following information: The records of Friendly Models show Leroy Williams was a client of Friendly Models. Those records indicate a visit by "Roger" to Williams on November 15, 1981, at the street address of the Watergate Apartments. This was the only time that the records showed an employee of Friendly Models made a visit at Williams' request to the Watergate apartments during 1981. (Williams had previously been visited by "Roger" on one occasion in August at his room on Capitol Hill.)

The Special Counsel's staff interviewed and deposed "Roger." "Roger" testified he had a homosexual liaison with Leroy Wil-liams—not a Senator—at the Watergate apartments on November 15, 1981. He denied having relations with Senator B and testified that Senator B was not present. "Roger" also took an FBI polygraph examination. It was the opinion of the examiner that "Roger" showed no deception when he denied the liaison with the Senator.

Senator B on November 15, 1981: The Special Counsel obtained and reviewed Senator B's records concerning his schedule, airline ticket receipts, and credit card receipts for the period Friday, November 13, 1981 through Monday November 16, 1981. These records indicate that Senator B was in his home state all day on November 15 and did not return to Washington until November

Calls to the Senator's office: Williams alleged he made at least one call to Senator

B's office the day of the liaison. He claimed he spoke with a secretary. But November 15, 1981, was a Sunday, and the Senator was out of town.

Weather: Williams alleged that on the night of the liaison there had been some snowfall. Official Weather Bureau records show that the first snowfall of 1981 did not occur until November 24, 1981, some nine days after the evening Roger visited the Watergate.

In conclusion, the Special Counsel has found that independent evidence totally contradicts Williams' allegations about Senator B and supports the conclusion that he lied in making this allegation.

### (ii) Allegations Regarding Other Two Members of Congress

Williams also told the FBI and investigators for this Committee that he had sexual relations with Congressman C and with Congressman D.

Congressman C: In the case of Congressman C, Williams initially told inconsistent stories. In his interview with CBS News, Williams said he had had sexual relations with the Congressman on three occasions. When he talked to the FBI two or three days later, however, Williams told them that he had had sexual relations with Congressman C on only two occasions.

In addition, details of the story that Williams told the FBI about his encounters with Congressman C differed from those he provided to investigators from the Special

Counsel's office.

Congressman C has denied ever propositioning or having sexual relations with Williams. He has said that he never met alone under any circumstances with Williams and does not know him. Congressman C took a polygraph examination, and the examiner's opinion was that the Congressman was telling the truth when he denied knowing Williams and denied having homosexual relations with him.

Investigators from the Special Counsel's Office have inspected the logs of the Congressman's Office and have interviewed his staff. His staff members have been shown photographs of Williams. No one recalls Williams visiting Congressman C's office on

any occasion.

Congressman D: In the case of Congressman D, Williams also told inconsistent stories to the FBI and to the Special Counsel's investigators. Williams told the FBI that Congressman D had initially propositioned him at a reception given by a Congressional Committee, which Williams named. Williams told the FBI he had declined that night, but that the sexual liaison occurred the following day after he was again propositioned by the Congressman. However, Williams told this Committee's investigators that he did go to Congressman D's office right after the reception and had sexual relations at that time.

Congressman D was interviewed by the Special Counsel's staff about Williams' allegations. He denied that he ever propositioned Leroy Williams or had sexual relations with him. He denied even knowing Williams. Congressman D also denied attending the reception at which Williams claimed to have met him as the sponsoring Committee did not involve an area of primary interest or concern to him. An inspection of his office records did not indicate any occasion when Williams was in his office. His staff could not recall that Williams had ever been in his office. Committee investigators showed Congressman B's staff

photographs of Williams. No one picked him out as someone they recalled seeing around the office.

In sum, all the available evidence supports the conclusion that Williams lied about Congressmen C and D.

(iii) Allegation of Procuring Prostitutes for a Congressman's A.A. and an employee of the Government Printing Office

Williams alleged for the first time in his July 7, 1982 FBI interview that in August, 1981 he had procured male prostitutes from Friendly Models for a Congressman's administrative assistant (AA) and for an employee of the Government Printing Office (GPO). Williams said both of these liaisons took place on the same evening at his apartment. Williams stated that he obtained a prostitute named "Donnie" for the AA and a prostitute named "Bob" for the GPO employee.

Evidence obtained by the Special Counsel supports the conclusion that Williams lied in making these allegations. The records of Friendly Models do indicate that on August 11, 1981, male models "Bob" and "Donnie," the prostitutes with whom Williams claimed he arranged dates for the GPO employee and the AA, answered calls from Leroy Williams. Investigators from the Special Counsel's office have located and interviewed both "Bob" and "Donnie." Both men confirm going to Williams' apartment on the same night in August, but both said that Williams was their only client and he did not procure their services for someone else. The Committee investigated and deposed

The Committee investigated and deposed the AA for whom Williams said he arranged a homosexual prostitution liaison in August. The AA testified that he did not have sexual relations with Leroy Williams or with

a male prostitute on any occasion.

Committee staff unsuccessfully attempted to locate the former GPO employee. GPO records, including credit union records, the GPO employee locator and the federal government communications operator did not list a present or former GPO employee with the name of the person for whom Williams said he arranged the date with "Bob."

(b) Further allegations by Williams.—Williams also repeated some allegations of sexual misconduct he had heard second-hand from others. These allegations amounted to little more than gossip, and, under other circumstances, would hardly merit serious investigation. But, to assure that the investigation was complete, these allegations have also been investigated. The evidence developed has, without exception, shown nothing to support them.

Allegation: Williams testified that he had been told that a female page whom he named had sexual relationships with two Congressmen, although he had no first-hand information of either liaison.

Investigative findings: Investigators interviewed the page and both Congressmen allegedly involved, and attorneys on the Special Counsel's staff took the page's testimony under oath at a deposition. They all denied the relationship.

Investigators showed a photograph array

Investigators showed a photograph array containing the page's picture to the staff of both Congressmen, none of whom recognized the page as someone who frequented

the offices.

The page's two roommates stated under oath at depositions that to the best of their knowledge she had not been dating or having an affair with a Congressman.

The two former pages who Williams said told him about one Congressman's relationship with the page were deposed. Both denied under oath knowing anything about any such relationship, and both denied telling Williams or anyone else about such a relationship.

Another former page, whom Williams said told him about the second liaison, was also deposed under oath. He denied ever making such a statement to Williams.

Allegation: Williams also testified that it was "rumored" that this female page was set up by a page supervisor with the second Congressman. Williams testified he heard this information from the page who told him about this liaison. Williams had no personal knowledge of such a liaison or whether the page supervisor had a role in setting up the liaison.

Investigative findings: Committee investigators identified those pages who worked most closely with the page supervisor, and interviewed and/or deposed each of them. None of the pages had any personal knowledge or had ever heard any rumor that the page supervisor had ever arranged or attempted to arrange dates between a female page and either of the Congressmen mentioned by Williams, or between any page and anyone else. The pages testified that they had no reason to believe that the page supervisor was arranging dates between pages and others or that any page was involved sexually with any Member of Congress.

The page who was supposed to have told this story to Williams denied under oath ever making such a statement.

The page supervisor named by Williams was also deposed under oath, and also denied having ever been involved in any such activity with a page or a Member of Congress.

Allegation: Williams also alleged under oath that a Member of Congress "propositioned" a female page. He testified that the Representative merely called the page desk in October, 1981, and asked to speak with the female page, who was unavailable. According to Williams, the Congressman later called the Cloakroom and asked her if she would drop by his office after adjournment; she reportedly declined, saying she was going home immediately after work because of school.

Investigative findings: The female page testified that she was never approached by the Congressman Williams mentioned, that she did not tell Leroy Williams, or any other page or anyone else that she had been approached, or that she was propositioned by that Congressman. She testified that some male pages "often" said to her that they were "sure" she had been propositioned by someone, but she insisted to them that this was not true.

The page's roommate testified under oath that she never heard anything about her roommate being propositioned by anyone.

### C. Jeffrey Opp

Jeffrey B. Opp was the other page who appeared, with his identity concealed, on the June 30 CBS News broadcast. In that broadcast, he alluded to one "homosexual approach" that a Congressman had made to him. But in interviews with the FBI and this Committee, Opp made two different types of allegations:

allegations based on his personal experience, and

2. allegations based on information that he had heard from other people.

The Special Counsel has found nothing to support any of these allegations.

At his deposition before this Committee,

Opp testified:

That interview was a-it was a 16 year old kid satisfying his ego. That interview was my being-was me being, as I have said, holier-than-thou, \* \* \* and being able to rationalize everything in my mind meant I had to be adamant, I had to be definite, I had to say this is the way it is and lay it on the line and not take into consideration my bias, which I did not at that point."
Opp further testified that his conversation

with the CBS reporter had left him:

"[P]anicked, scared, holier-thanthou, wanting to prove something, and I used what [the reporter] said and I convinced myself of it even though at the time he was saving it I didn't believe it. I convinced myself that it was true and then that this Hill just needed to be cleaned up.

In retrospect, Opp testified that he did not feel that he had acted responsibly in making the charges that he had made. He concluded that he had exaggerated the significance of his personal experiences in his discussions with the CBS reporter, with the staff of his congressional sponsor, and with the Justice Department.

A careful evaluation of information provided by Opp has yielded not a single instance in which there is responsible evidence that improper actions occurred. All the evidence we have developed-including significant changes in Opp's own story when he was questioned under oath-indicates that there is no support for his allegations.

#### (1) Background

Jeffrey Opp was appointed as a page under the sponsorship of Congresswoman Patricia Schroeder and served as a page from January 4, 1982 until June 12, 1982

Opp considered himself far to the left on the political spectrum and went out of his way to challenge authority and to make sure that people were aware of his extreme left-wing political views. For example, the Deputy Doorkeeper recalls a conversation in which he recommended to Opp that he open a checking account in order to deposit his salary and draw checks for his personal expenses; Opp responded that, for ideological reasons, he did not believe in using banks

There was substantial tension between Opp and his supervisors in the Doorkeeper's office. The supervisory staff who had contact with Opp had a strong negative impression of him. One supervisor told Committee investigators that he did not like Opp personally and believed that most of the pages did not like him. That supervisor also felt

that Opp had serious emotional problems. For his part, Opp felt that his supervisors believed that he should not have been a page. Opp felt that his supervisors' attitude toward him was based on the fact "that I preached socialist ideals, \* \* \* that I didn't look like a page, because I let my hair grow longer than I should have, I didn't tie my tie all the way while in session, I was not

your model page.

Opp also resented his involvement in the investigation of pages conducted by Sgt. Grossi of the Capitol Police. Opp said he believed this investigation would lead to his termination as a page, When Sgt. Grossi's investigation concluded, the Doorkeeper visited Congresswoman Schroeder to complain about Opp's conduct. Following the Doorkeeper's visit, Congresswoman Schroeder's staff admonished Opp. Opp's reaction to the investigation is evident from the telephone call he made to one of Congresswoman Schroeder's staff threatening that if the pages' conduct was going to be criticized, the pages would take a few Members of Congress down with them.

The allegations that Opp has made must also be considered against the background of his reputation for exaggeration and for blowing things out of proportion." Obviously, the evidence concerning Opp required that his statements be subjected to a critical and searching analysis.

#### (2) Opp's direct conversations with four individuals

In his interview at the Department of Justice and his interview by Committee investigators a few weeks later, Opp related four personal experiences that, he asserted, had overtones of homosexual solicitation.

(a) The four conversations.

Congressman E: Opp testified that on May 25, 1982 the House was working very late into the evening, and he was on duty on the House floor. Opp was asked to help Congressman E make copies of some documents to be distributed to House Members. Congressman E and Opp were in the Speakers Lobby, a small area off to the side where a copying machine is located. Opp said that he stood approximately two feet away from Congressman E while the machine copying. They stood silently for about 30 or 40 seconds, when Congressman E moved to within a foot of Opp. Opp recalled that the Congressman put his arm around Opp and pulled him "in an ingratiating move. gessman E then allegedly asked, "You want to come to a party tonight? I could show you some fun." Opp said he told the Congressman, no, and moved away. After the machine finished making the copies, Opp handed the copies to the Congressman, and the Congressman left the area. The entire incident took only two minutes.

Opp has consistently maintained that he interpreted the actions of Congressman E as being "an overt sexual proposal." He testi-fied, "I took it to mean that if I would have gone to that party, I would have had fun via having sex with him." Opp testified that he had no contact with Congressman E before this incident and had none after it occurred, except that the Congressman would look at him strangely when they encountered each

other on the floor.

Congressman E has said that he does not recall ever meeting Opp. He did not recognize Opp's photograph when it was shown to him. Congressman E said that he rarely asked pages to run errands for him and did not know many of them. Congressman E said that he had only attempted to use the copying machine in the Speaker's Lobby on one occasion, several years before, and had found the machine broken. He had not attempted to use the machine again; he habitually used another machine which he regarded as better. He speculated either that Opp has confused him with another Member or was inventing the entire incident. Congressman E recalled a somewhat heated exchange he had had on the floor with Congresswoman Schroeder, Opp's sponsor, some weeks before the alleged inci-Opp's dent. He thought it possible that Opp was retaliating against him out of a misguided sense of chivalry.

Congressman F: Opp's interpretation of a brief conversation with Congressman F has varied. According to Opp, on the night immediately after he had been approached by Congressman E, the House was also in session late. Opp testified that he was approached at his desk on the floor of the House by Congressman F who also asked him if he wanted to attend a party. According to Opp, the Congressman made a ges ture with his hands to his nose. Opp told the FBI that he interpreted this gesture to mean there would be cocaine at the party. He told Congressman F he was not into that sort of thing, and the Congressman said nothing else about it. The conversation lasted less than a minute, and Opp had no contact with the Congressman either before or after this one conversation.

Opp told the FBI that he did not feel that the Congressman was making homosexual advances toward him. But three days before the FBI interview he told Congresswoman Schroeder's staff that he did interpret the gesture to be sexual. When he first met with Committee investigators in July, he also said he considered Congressman F's invitation to a party and his sniffing gesture to be a sexual approach. Opp explained that the reason he perceived sexual overtones in the incident was that offering drugs to a page "goes hand in hand with homosexual

In his deposition in September, Opp reverted to the view that he did not believe there was anything sexual involved. Rather. he testified that he regarded the incident as

relating strictly to cocaine use.

Congressman G: Opp's interpretation of a conversation he had with Congressman G changed over the summer. He told the FBI in June that the conversation involved a sexual advance. In September, he testified that he was not so sure. The incident occurred while the House was in session, late one night in early May. The conversation with Congressman G occurred at approximately 11:00 to 11:15 p.m. in the Republican Cloakroom. Two employees who worked in the snack bar were within two or three feet of Opp and Congressman G when they were talking and there were other Congressmen milling around. He and Congressman G were standing at the snack bar, and the Congressman asked "Where do you go after this?" Opp said he responded, "Home, to bed." The Congressman then asked, "Don't you ever go out?" When Opp said yes, the Congressman asked where he went. Opp re-"Penn. Ave."—meaning the nearby and restaurants on Pennsylvania plied. bars Avenue. As Opp tells the story, the Congressman then said that he also went there and that "[i]t is strange we have not seen each other." Opp said the Congressman than said, "We should see each other sometime.'

The conversation lasted less than a minute. Opp said that he had had no further contact with Congressman G prior to that incident, other than taking messages to him on the floor, and that he had had no contact with him since that incident

Opp told the FBI that he considered the incident to have sexual overtones. But at the time of the deposition Opp testified that he was "not sure \* \* \* I am not positive. It strikes me as being odd; it strikes me as being strange, and certainly it could be, it could have been, but I am not positive.'

When asked the basis of his concern that there had been sexual overtones to the conversation, Opp said that Congressman G is "an aloof man" who "does not come on nicely to people." He also said that he had had some concern because of the reaction of the two women who worked behind the snack counter. At his deposition, Opp testified that one of these women told him upon his return a short time later, "Got to watch out." In previous interviews, he had described the women as "eyeing" him "warily" or clicking their tongues.

When the Special Counsel's staff interviewed Congressman G, he was incredulous. He did not know anything about Opp except what he had heard in the media. He said that he had never met Opp and did not now what he looked like. After being shown a photograph of Opp, he still said he did not recognize him. When asked specifically about a conversation that might have occurred late at night at the snack bar, Congressman G said that it was certainly possible that if the House was in session late at night he would get a sandwich from the snack bar and that if he did that, he would probably make conversation with someone standing nearby, including a page.

But he said that the notion that someone would sexually proposition a page in the snack bar was preposterous. The snack bar counter is only about seven feet long and there are two women who work behind it who would overhear any conversation. Furthermore, there are many other persons moving about in a relatively confined space who would also overhear. The Special Counsel's staff has visited this area and has found Congressmen G's description accu-

Lobbyist: Opp told the FBI in June that a woman lobbyist had been providing male pages for homosexual relations with Members of Congress. He did not know her

name. He described her to the FBI only as a "very large woman."

Opp explained to Committee investigators in July that this charge was based in part on an encounter he had with her. Opp did not know the woman's name, but described her as blond, obese, and having a prominent nose. He said he met this woman at a doorway to the House Floor and she remarked, "These guys could use some help from time to time. Do you think you could help?" Opp declined and went on his way. Based on this exchange, Opp had concluded she was seeking to arrange sexual liaisons. By September. Opp changed his mind about this con-

versation. He testified at his deposition that

he had "probably misread that incident."

## (3) Investigative findings.

It is difficult not to dismiss Opp's original stories, particularly about the lobbyist, as ludicrous on their face. Had it not been for the serious public concern about the "page scandal," Opp's charges would not have even warranted investigation. Nonetheless, to the extent possible, the Special Counsel attempted to investigate these charges. The Special Counsel looked for methods of investigating Opp's charges in ways other than by simply questioning the participants, who, assuming any wrongdoing, would be likely to deny it. This proved to be a difficult task. In each instance, the only thing which was alleged to have occurred was a brief conversation between Opp and another person. The two snack bar attendants Opp thought had overheard the conversation between Opp and Congressman G were interviewed by Committee investigators, but neither remembered the incident.

In an effort to seek some independent evidence, the Special Counsel deposed three former pages, all friends of Opp, whom Opp claimed he had told about his various experiences. if these witnesses could establish that Opp had at least related consistent versions of these events to them, more or less contemporaneously with those events, that consistency would have some limited corroborative effect. While all three former pages recalled Opp's informing them of at least one encounter with a Member of Congress, none of their recollections of these in-

cidents were consistent with each other, and all were different from Opp's version of

Finally, two of the three page friends testified that they did not believe aspects of Opp's story at the time he first told it to them last Spring. One testified that Opp was undergoing some difficult personal problems at the time. The second testified that aspects of Opp's story were "ridiculous" and that he was very concerned that innocent people named by Opp would be damaged if Opp's allegations appeared in the press.

It is the Special Counsel's view that Opp's interpretation of these incidents has more to do with his own idiosyncratic reaction to situations rather than misconduct on anyone's part. All his allegations of personal experiences were nothing more than brief conversations. There was no sexual contact, no sexual harrassment, no overt misconduct. The fact that Opp himself has retreated from his conclusion that two of the four incidents had sexual overtones and has expressed doubts about the third, further suggets that the "advances" were more imagined than real. The total absence of any corroborating evidence and Opp's general reputation only reinforce this conclusion. Under scrutiny, Opp's allegations of sexual misconduct arising out of these personal encounters simply collapse.

#### (4) Information from others

In his initial interview with the FBI, Opp passed on a number of stories of misconduct that he said were told to him by the CBS news reporter. These included a number of named Congressmen allegedly involved in homosexual activity as well as an alleged homosexual ring of 25 to 50 Congressmen for whom pages were procured for sex by an employee of the Doorkeeper's Office. Opp said his knowledge about these allegations was limited to what he said he has been told. The CBS reporter declined to discuss with the Special Counsel what he had said to Opp, much less the basis for any allegations that had been discussed.

Without the reporter's cooperation, only one of these allegations had sufficient detail to warrant investigation: that a sex ring was operating out of the Doorkeeper's Office. Investigators in the Special Counsel's Office interviewed every employee of the Doorkeeper's Office about this allegation and deposed four of the key employees. Every page or former page who was deposed was asked about these allegations. Absolutely no support was found for the charges. Indeed, it is almost impossible to imagine a sex ring of the magnitude alleged flourishing in secrecy in the fishbowl of Capitol Hill.

Opp did make three other allegations about sexual misconduct of Members of Congress which the Special Counsel did investigate. These all concerned incidents of which Opp had no first-hand knowledge. No

evidence has been found to support a single allegation.

Congressman H: Opp told the FBI he believed Congressman H was having sexual relations with a male page. Opp based this conclusion on four specific observations. First, Opp claimed that on three separate occasions, the page said that he was going to drive Congressman H to the airport so that the Congressman could fly to his home state. But Opp said that on each occasion, Opp saw Congressman H on the House floor or in one of the office buildings the next day. Second, Opp once overheard a House employee who worked on the Floor of the House say to the page, "You got to get to

know these people a lot better to stay here." The employee also told the page, "Go on about your business and I will tell you when it is time." Third, Opp testified that on one occasion he had asked the page "what the hell he was doing" after one of these conversations and the page said that he "needed to stay here." Fourth, the page had obtained appointments from several different Members of Congress.

Solely on the basis of these observations, Opp concluded that the page was having sex with Members of Congress and specifically with Congressman H in order to keep his

job.

Opp's view of these incidents had changed radically by the time of his deposition in September. He said that at the time he talked with the Justice Department officials

about this allegation.

"[Everything had the taste of, you know, perversion acts and that type of thing, and at this point I just, after rehashing with myself, using a bit of hindsight, and thinking that—back then I was doubting; I was doubting myself; I was doubting people I was in contact with; I was doubting all the congressmen who I had idolized at some point and so it was very easy to assume that.

"But after rehashing and hindsight, I was thinking the situation probably was that he was looking for an appointmentship."

In the Special Counsel's judgment, the basis advanced by Opp for his original allegation is so flimsy and farfetched that it is not credible on its face. Nonetheless, the page in question has been deposed. The page testified that he never told Opp that he was driving Congressman H to the airport unless he actually drove the Congressman to the airport. The page testified that he drove the Congressman on one occasion. The page further testified that he was not solicited by nor did he engage in homesexual relations with the named Congressman, with any other employee or staff member of the House of Representatives, or with any Member of Congress.

In addition, the House employee named by Opp was interviewed and provided a sworn affidavit. The House employee denied being involved in any homosexual activity and said that he cautioned the page to get to know the Members' faces so he could get

a job in the Cloakroom.

Congressman H has said that he sponsored this page after the page's prior appointment by another Member had expired. The page contacted someone on Congressman H's staff who investigated the page's credentials and recommended that Congressman H sponsor him; Congressman H did not interview or meet the page prior to sponsoring him.

Congressman H used his pages as drivers on occasion. On one occasion he had an early morning flight to his home state from Baltimore-Washington airport. Rather than leave his car at the airport, he drove to the page's house, picked up the page, drove to the airport, and left the car with the page to drive back to Washington. This incident may have triggered Opp's speculation about the page's driving him to the airport.

Congressman H noted that he never used any of his female pages to drive him anywhere in the evening because he was concerned that someone who spotted him getting into a car driven by a young woman would speculate about their relationship. He adhered to this position despite his wife's protest that he was discriminating against his female pages. (The pages liked to drive the Congressman because it gave them the

opportunity to talk to him and get to know him.) The Congressman found it ironic that he should be accused of having a sexual relationship with a male page because the page had driven him.

There is simply no evidence whatsoever to support Opp's initial allegation. Indeed, as Opp himself came to recognize, the "evidence" Opp cited in support of the initial al-

legation does not support it at all.

Congressman I: Opp told the FBI that an employee of the House of Representatives gave a party in April, 1982, at which Congressman I "came on physically" to a certain page. Opp said that the advances made by Congressman I were "groping stuff." Opp did not attend the party himself, but claimed to have had a conversation with a page who did. Opp named three other pages who were present at the party.

Based on Opp's allegations, the Special Counsel interviewed and deposed the page involved, and a number of other pages. The page who was reportedly the victim of the uninvited physical advances testified he had never been at the home of a House employee where Congressman I was present—totally contradicting what Opp had reported. The page further testified that he did in fact attend a party at Congressman I's house in April or May, 1982. There were ap-

proximately 12 other people in attendance, including the Congressman, his wife and children, one or two page supervisors and at least one of their wives, and several Cloakroom pages. The page testified that the Congressman made no advances to him. The page further testified he did not tell anyone that the Congressman had made any physi-

cal advances to him.

Another page who attended the party testified that the party occurred around May 25, 1982. In addition, this page testified he saw no advances by the Congressman or physical contact between the Congressman and any page. Nor was he told about any

such advances or physical contact.

Interviews with and depositions of more than half a dozen other pages and individuals who were present at the party, including page supervisors, corroborate this testimony that there was no such sexual advance at Congressman I's party by the Congressman. These individuals also said they knew of no party at the home of the House employee attended by the Congressman. Congressman I in an interview also denied the story. A photo array containing the photograph of the page was shown to I's staff. No one recognized the page.

It is wildly improbable that the Congressman would have made the type of advance described by Opp in the presence of his wife and children, whom, all of the witnesses agree, attended the party. No evidence supports Opp's allegation; to the contrary, all available evidence leads to the conclusion

that the allegation is false.

Congressman J: Opp testified that he had heard that Congressman J was sleeping with a female page. Opp said that the page's roommate, and Opp's own roommate had both told him about this relationship. According to Opp, the page's roommate had told Opp at a party that the Congressman was paying the page's rent. Opp said he was told that the page would purchase a money order, using funds supplied by Congressman J to pay her share of the rent. Opp's roommate repeated essentially the same information about this page and the Congressman approximately one month later—telling Opp this information also came from the page's roommate.

The Special Counsel's staff interviewed and deposed the page and her two roommates, one of whom had allegedly told Opp about the affair. Each of them denied any knowledge of such an affair.

The Special Counsel also took the following steps:

The Committee subpoenaed bank account records of the page and her roommate who collected the rent checks and sent them to the landlord. Those records reflect no evidence of a monthly payment from Congressman J. The records are consistent with the page's testimony that she paid her share of

the rent by check on a monthly basis. The Congressman's secretary who handled his personal finances was interviewed and deposed. She testified there were no records consistent with a pattern of regularly monthly payments in the amount of the page's rent, and that the records reflected no payments to any pages.

An investigator examined the House Finance Committee's periodic reports on Con-

gressman J's office expenditures. There were no payments from his office account to pages or for money orders. Nor were there any payments consistent with a pattern of monthly payments of the page's rent.

An investigator also examined the cancelled checks from the Congressman's personal account for the pertinent period. These checks reflected no payments to the page, no purchase of any money orders, and no pattern of payments consistent with the monthly payment of the page's rent.

The Committee investigators also showed to Congressman J's staff a group of unmarked photographs of female pages including the page supposedly involved in the affair. No one on the staff remembered the page as someone they had seen in Congressman J's presence.

man J's presence.

Congressman J responded to detailed questions from Committee investigators and

denied the affair.

In sum, no evidence could be found to suggest that Congressman J paid the page's rent or was involved in any sexual relationship with the page. The page's roommate testified that it was possible that this rumor resulted from a joke she had made about the fact that the page regarded the Congressman as attractive.

D. Other allegations

During the course of the investigation pursuant to H. Res. 518, the Special Counsel has received a number of allegations of improper or illegal sexual conduct by Members, officers, or employees of the House of Representatives. The Special Counsel has concluded his investigation of the allegations set out below. They fall into two categories. The first set of allegations proved unfounded. The second set of allegations proved to have insufficient grounds to warrant further investigation either because of the staleness of the incidents or because the allegations concerned individuals no longer associated with the House of Representatives.

Allegation: The Special Counsel received an anonymous letter charging that a Congressman had raped a participant in a university's internship program who had been placed in Washington, D.C. The anonymous author claimed that the director of the program was aware of the incident.

Investigation: The Special Counsel's staff interviewed the program director, two other university staff members, and an intern who had allegedly been placed in Washington, D.C. The director denied any knowledge of such an incident. The director advised the

Special Counsel's investigators that he had previously been questioned about this charge by three local newspaper reporters who had each received a copy of the same anonymous letter just prior to the 1982 congressional election. The other interviews established that there were no interns from this program in Washington, D.C., during the term of office of the accused Congressman.

Conclusion: The Special Counsel has found no evidence to support the allegation as described in the anonymous letter and has terminated the investigation of this matter. The timing of the allegation suggests that the anonymous source hoped to embarrass the Congressman immediately before the election.

Allegation: The Special Counsel's staff was told by two sources that a former female page had dated a House employee. Neither source could identify the employee, although one source said that the employee was a "page supervisor." Also, an anonymous caller named a particular page supervisor as being "involved with female pages."

Investigation: The Special Counsel's staff interviewed and deposed the female page. The page denied dating any Member, officer, or employee of the House, and was unable to recall anything she might have said that would have suggested that she had dated a page supervisor. However, she acknowledged that she often made joking remarks that others took to be serious. Her roommate testified that she was prone to exaggerate her social relationships. Other pages cited this female page as the source of other unfounded rumors. In numerous interviews and depositions of other pages, the Special Counsel inquired about whether the named supervisor was involved with female pages. No page knew anything about it. Many pages knew this supervisor and testified that the allegation was wholly inconsistent with their experience and perception of the individual in question. The individual was deposed and denied the allegation under oath.

Conclusion: The Special Counsel has found no evidence to support further investigation.

Allegation: A former page told the FBI and the Special Counsel's staff that a Congressman had asked a female page to go out with him. The female page asked two male pages to accompany her and the Congressman to Georgetown. At the conclusion of the evening the Congressman drove the pages home and remained in the car with the female page after the two male pages had gone inside.

Investigation: The Special Counsel's staff deposed the page who made the allegation as well as the female page allegedly involved. The third page named in connection with the incident was interviewed. The female page testified that the Congressman had never asked her to go out alone with him. On the evening in question, he had offered to give her and her friends a ride to Georgetown. She testified that the Congressman drove them to Georgetown, accompanied them to a club and drove them home. She testified that he never made a sexual advance to her. The statements of the second male page were consistent with those of the female page. Both the female page and the second male page stated that the page who made the allegation had consumed so much beer while at the club that his memory of the evening was unlikely to be reliable.

Conclusion: The Special Counsel has found no evidence to conclude that the Congressman made a sexual approach to the female page.

Allegation: A former page told the FBI of a conversation he had had with a Congres man in which the Congressman apparently

propositioned him.

Investigation: The Special Counsel's staff deposed the page who gave a different, wholly innocent, account of a conversation with the same Congressman. Other statements of the page who reported the allegation suggested that his initial interpretation of events was questionable and that he frequently tended to assert conclusions that, in the judgment of the Special Counsel, had no rational basis. The Congressman was interviewed and does not recall having met or conversed with the page, although he acknowledged it was his habit to "make small talk" in the Cloakroom where this incident was alleged to have occurred.

Conclusion: The Special Counsel has found no evidence to support the allegation. Allegation: In response to the Special Counsel's letter to former pages, a former female page wrote that, in the corridor of a House Office building, a male whom she believed to be a Congressman had put his arm

around her waist and invited her into an

office. She wrote that she "turned down the offer.'

Investigation: The Special Counsel's investigators interviewed this page twice. The page described the incident as a "joke," and recalled that she had laughed at the time. She reviewed photographs of all Congressmen who fit the physical description she gave and was unable to recognize any as the man who had approached her.

Conclusion: The Special Counsel has found no evidence to suggest that any mis-

conduct occurred.

Allegation: A former page alleged that statements and conduct of certain female pages led him to believe that Capitol Police been sexually involved with three female pages, two of whom had been Senate

pages.

Investigation: The Special Counsel's staff reinterviewed and deposed the page who made the allegation, and forwarded his statements about the former Senate pages to the Senate. The former female House page denied that she had had any sexual involvement with Capitol Police. Testimony of the page who made the allegation has been contradicted on a variety of matters by other evidence which has raised serious questions about his credibility. In addition, a former aide of his sponsor has questioned

his credibility.
Conclusion: The Special Counsel has

In several instances, the Special Counsel received allegations of improper or illegal sexual conduct that occurred many years ago, or by individuals who had once been but were no longer Members, officers, or employees. Further investigation of these allegations will not be pursued.

Respectfully submitted,

JOSEPH A. CALIFANO, Jr., Special Counsel. Dated: December 14, 1982.

APPENDIX A .- FEBRUARY 1982 PAGE INVESTIGATION BY U.S. CAPITOL POLICE

United States Capitol Police The (U.S.C.P.) conducted a brief investigation into allegations of misconduct involving pages in early February, 1982. This investi-

gation was triggered by the discovery in Leroy Williams' apartment of another page's missing wallet and by information from Williams' landlady about drunken par-

The Committee received allegations that the U.S.C.P. investigation had been prematurely terminated. These allegations implied that the U.S.C.P. had information relevant to the Committee's investigation pursuant to House Resolution 518. This Committee and the Special Counsel agreed that the Special Counsel should investigate the conduct of the U.S.C.P. investigation.

The Special Counsel has reviewed the written records of the U.S.C.P. investigation, and has interviewed or deposed (a) the Capitol Police detective who carried out the investigation and his superiors; (b) individuals in the offices of the Doorkeeper and the Sergeant-at-Arms; (c) Members of the House and their staffs who received information about the U.S.C.P. investigation, and (d) pages who were interviewed by the

The Special Counsel's inquiry has been directed at the following questions:

 What was the scope of the police investigation, and what information did it ohtain?

2. Was the investigation prematurely terminated?

3. What action was taken as a result of the investigation?

4. Did the police inquiry itself unintentionally contribute to rumors which later led to public allegations of sexual misconduct involving Members of Congress and pages?

#### FACTS

### A. Initiation of the investigation

The last day on which Leroy Williams worked as a page was Friday, January 29, 1982. That weekend he moved out of his apartment at 24 Third Street, N.E., and left Washington, D.C.

Following Williams' departure, his landlady found certain items in the apartment he had occupied. These included literature and other items strongly suggesting homosexual interests. In addition, she found a wallet be-

longing to a female page.

Williams' landlady contacted the House Doorkeeper's office and was referred to Sergeant John D. Grossi of the Capitol Police. Grossi had earlier been assigned to investigate the disappearance of the wallet found Williams' apartment. On February 2, 1982, Williams' landlady met with Grossi to give him the wallet. During this meeting, she told him that she had also found some pornographic literature in Williams' room, including what appeared to be a directory of male prostitutes. She also reported to Grossi that Williams' neighbors had complained to her about loud, late-night parties attended by pages at Williams' apartment. She and Grossi discussed the possible use of drugs and alcohol at these parties.

After his conversation with Williams' landlady, Grossi met with his superiors, Deputy Chief Gilbert Abernathy and Chief James M. Powell of the U.S.C.P., and related what he had learned. Chief Powell then telephoned House Sergeant at Arms Benjamin R. Guthrie, who is the representative of the House of Representatives on the Capitol Police Board. Arrangements were made for Grossi to brief Guthrie on the information he had received relating to pages.

Grossi met with Guthrie in Guthrie's office in the Capitol on February 2 or 3, 1982. After that meeting, Grossi and Guthrie met with House Doorkeeper James T. Molloy, whose staff supervises the work of House pages. In both meetings, Grossi discussed the information which he had received from Williams' landlady regarding page conduct. He told Guthrie and Molloy about the missing wallet and the homosexual materials found in Williams' room. He also told them about the allegations of page participation in loud, late-night parties at which drugs and alcohol may have been consumed. He was instructed to investigate the allegations, and to report back to Guth-

#### B. Grossi's interviews of pages

Over the period of a week, from February 4 through February 10, 1982, Grossi questioned eight pages. He reported back to Guthrie twice-once in the middle of this period and once at the end.

On Thursday, February 4, Grossi interviewed three pages about their personal activities and those of other pages. According to his interview reports, these pages told him about all-night "drinking parties" in Williams' apartment, attended by other pages; the use of drugs by Williams; and consumption of alcohol by pages at parties and at various commercial establishments. One or more of the three also told Grossi that Williams and a second page had taken pages to Fourteenth Street (an area of Washington frequented by prostitutes, which has a high concentration of pornographic bookstores and nightclubs). At least on the trips organized by the second page, the pages were alleged to have used the services of prostitutes. Grossi's report names eight pages as being "involved, directly or in the various activities deindirectly" scribed by the three pages.

On Friday, February 5, Grossi personally delivered the written report of his interviews with these three pages to Guthrie and discussed with Guthrie the information obtained in these interviews. Guthrie immediately arranged a second meeting with Molloy to provide him with the information in Grossi's reports.

By Monday, February 8, Grossi received information suggesting that Williams might have been responsible for the theft of a page's car, which had disappeared on January 6, 1982. On that day, he learned that both the car and Williams were in Tuscaloosa, Alabama. He conveyed this information to Guthrie on February 9 and also provided it to the Metropolitan Police who were responsible for investigating the stolen car.

Also on February 9, Grossi reinterviewed one of the pages he had interviewed earlier and interviewed another page for the first time. His written reports state that these pages told him that they believed Leroy Williams was a homosexual, that the pages "had no further information regarding any other pages that were homosexuals" or about homosexual activities among pages or nonpages. The report of Grossi's interview with the page he interviewed for the second time indicates that she said she did not know of any adults from the House or Senate attending any parties which she attended. The interview reports also included information about the use of alcohol by pages at parties given by Williams and others, the willingness of Washington commercial establishments to serve pages alcohol, the use of drugs by pages, and trips by pages to Fourteenth Street allegedly to pick up prostitutes. One of these pages also told Grossi about two separate fights involving two male pages.

Grossi's reports indicate that on February 10, he interviewed three additional pages. These three interviews focused on an incident at a page party in which a page had struck someone on the head with a bottle.

On February 11, 1982, Grossi wrote a summary report in which he listed eight pages whom he had interviewed.

The summary report included this para-

graph:

"With the exception of the few cases of misconduct as indicated by prior reports involving Pages, this investigation could find no further indications of sexual overtones or misconduct involving Male or Female Pages or non-Page adults."

Also on February 11, Grossi wrote a second report indicating that he met with Guthrie at 9:30 a.m. on that day, and that, at the direction of Guthrie, the page investigation was terminated. This second February 11 report indicated that, as a result of the investigation, four pages, including Leroy Williams, were being dismissed. Grossi wrote no more reports as part of his investigation. On June 25, 1982, he was contacted by a television reporter asking questions about the investigation. At that time he wrote a summary report of the investigation for his superiors.

Some of the pages whom Grossi interviewed have reported lines of questioning that are not reflected in Grossi's written reports. One page testified that Grossi asked her if she had ever been approached by a Member of the House or the Senate and if she had ever heard anything about Williams being approached by a Member of Congress. This page said that she heard that Grossi asked the same questions of everyone else. She also testified that Grossi's questions led her to believe that Leroy Williams had "some kind of sexual involvement with Congressmen."

Grossi himself has denied under oath that he asked any page about being propositioned by Members of Congress. He said that he had no reason to ask such questions. But he testified that he believes he did ask pages about propositions from "nonpage adults." He testified that the only conversation he had with pages specifically regarding a Member of Congress related to a Member who allegedly had asked some pages out for a drink. Grossi could not recall who had told him about this, and he had never learned the Member's name.

had never learned the Member's name.

A second page testified that Grossi asked her if Williams was involved with a prostitution ring, and if he was a liaison for Congressmen. Grossi testified that he asked the pages about sexual contact between pages and between pages and non-page adults, and he "probably" asked all of them if Leroy Williams was a homosexual. But Grossi does not recall asking the questions described by the page.

A third page testified

That Grossi told him that one of the reasons another page was dismissed was "conclusive evidence that he was prostituting himself on Fourteenth Street as well as picking (prostitutes) up;" and

That Grossi asked questions about these "prostituting activities" and about the sexual activities of yet another page.

Grossi said he heard early in his interviews that Williams and another page were taking pages to Fourteenth Street, and that he probably asked other pages about this al-

legation in subsequent interviews. However, he denies having told anyone any page was fired for prostitution. In fact, Grossi said he did not learn of any page's dismissal until the termination of his investigation. Thus he could not have given anyone any reason for a page's dismissal during his interview.

Based on the interviews and the evidence, the Special Counsel concluded that Grossi did ask about pages' sexual conduct and about contacts with adults, but did not ask about Members of Congress or about Williams and prostitution. Rather the Special Counsel has concluded that these subjects were the result of assumptions or speculation on the part of pages about what lay behind Grossi's investigation.

### C. Termination of the investigation

Grossi's reports indicate that Sergeant at Arms Guthrie instructed him to terminate the page investigation on February 11, 1982. Grossi has testified that the termination of the investigation at this stage was a surprise to him, inasmuch as he had not yet spoken to all the pages implicated in earlier interviews. In particular, he had planned to interview the second page, in addition to Williams, who was alleged to have taken other pages to Fourteenth Street. He said, however, that it was his understanding that the matter was to be handled "administratively," and that, while police involvement was no longer required, the questions raised by the investigation would be addressed.

Guthrie has testified that it is his recollection that, at the time of the termination, Grossi himself felt that he had pursued the matter as far as he could. Guthrie recalls that the pages who had not been interviewed had left Washington and were no longer accessible to the Capitol Police. In any event, on February 11, Guthrie felt that the investigation should be concluded. He pointed out that the investigation had been initiated by the police because of a page's missing wallet, and the primary suspect in the theft of the wallet, Leroy Williams, was then far from the jurisdiction of the Capitol Police. The information about page misconduct had been forwarded to the Doorkeeper of the House, who was responsible for the pages. Guthrie, therefore, felt that he and the police had done as much as they could.

Guthrie's recollection is supported by Grossi's first February 11 report, which the evidence indicates was given to Guthrie at the time Grossi met with him on February 11. In tone and in content that document suggests a final report.

Guthrie testified that he provided Grossi's written report to Molloy immediately following the February 11 meeting.

#### D. Action taken as a result of the investigation

(1) Notification of sponsors

Before the investigation ended, but after Guthrie and Molloy had received Grossi's report of his first interviews with pages, they met with House Speaker Thomas P. O'Neill to inform him that an investigation of pages was in progress. This meeting took place in the Speaker's office, probably on Friday, February 5 or Monday, February 8. Guthrie recalls that Molloy showed the Speaker the written reports of Grossi's interviews, but Molloy does not recall that he did so. Both agree that the meeting was brief; that it was solely to inform the Speaker; and that it was consistent with their practice to keep the Speaker advised of developments within their respective areas of responsibility.

Neither recalls with any specificity what was said at the meeting. Molloy says that he

told the Speaker that an investigation of page activity was being conducted, but is uncertain that he specified it was being conducted by the police. He also says that he may have mentioned allegations regarding the stolen car, wild parties, beer drinking, and homosexual activities. He says that he may have mentioned the possibility of homosexual activities involving Members of Congress, although he testified that he had not heard any allegations relating to Members and pages at this time. Guthrie recalls only that Molloy briefed the Speaker regarding the investigation. Both recall that the outcome of the meeting was that the Speaker instructed Molloy to inform the congressional sponsors of the pages of the information being developed about their pages.

The Speaker himself also recalls this meeting lasted only a few minutes. He remembers that Molloy told him there had been a problem with a page and that the problem involved the theft of a car and a wallet. He does not recall more than one page being mentioned. He does recall telling Molloy to inform the page's sponsor.

Over the next several days, Molloy contacted or attempted to contact the sponsors of pages named in Grossi's interview reports. Molloy recalls that he reached most of the sponsors or their staff, although he also recalls that he was unable to reach some of the sponsors. Most of those contacted by Molloy report that they received very little information regarding the substance of the investigation. Only Williams' sponsor, Representative Bethune, and one other sponsor reported receiving any indication of allegations of homosexual activity. In most cases Molloy simply reported that the page in question had been named in an investigation of misconduct.

Representative Bethune was visited by both Molloy and Guthrie on February 9. Guthrie and Molloy reported to Bethune about the items found in Williams' room indicating homosexual interests, the parties in his apartment, the allegations regarding trips to Fourteenth Street, and the evidence suggesting that Williams had stolen a page's wallet and another page's car. It is Bethune's recollection that there was no mention of any information relating to Members of Congress.

### 2. Dismissals

Molloy dismissed two pages. He testified that the performance of these two pages had been criticized by his staff in the past. In addition, Molloy said at the same time that Grossi reported they were misbehaving, he received reports from the Page School indicating that both had failed to meet minimum academic requirements. Considering all these factors, Molloy decided to send these pages home.

Grossi's final report indicates that a fourth page was also dismissed. In fact, this page was not dismissed. Molloy testified that he considered dismissing this page, because he had heard that the page had a drinking problem and that he was a source of trouble among the pages. But one of Molloy's subordinates told Molloy said that the page performed well on the job. Molloy said that the page's Congressional sponsor also argued against his dismissal. Molloy decided to let the page stay, but instructed one of the page supervisors to speak to him regard-

# 3. Warning to other pages

ing his behavior.

The Deputy Doorkeeper, Jack Russ, called a meeting of House pages in which he an-

<sup>&</sup>lt;sup>1</sup> No individual interview report appears to exist for one of the pages listed, but this page has confirmed that Grossi did in fact question him.

nounced that some pages would no longer be in the program. The purpose of this announcement was to warn other pages of the consequences of misconduct. Molloy testified he was not a participant in this meeting and did not know it occurred.

E. Rumors resulting from the police investigation

Grossi's questioning of pages clearly lead to speculation among the pages about the origin and purpose of the investigation. The rumors and gossip stimulated by the investigation in fact greatly complicated the task of reconstructing what actually occurred in the course of the inquiry. Two examples should demonstrate how some of the rumors began. The evidence obtained by the Special Counsel supports Grossi's testimony that he asked the pages he interviewed about sexual contacts between pages and "non-page adults." At least one page who was interviewed assumed from that question that she was being asked about approaches by Members of Congress. Undoubtedly that page in turn told other pages that the was investigating sex Members of Congress and pages.

The second example involves other pages interviewed by Grossi. A male page testified that Grossi had hinted about pornographic material, drugs, and a stolen wallet having being found in Williams' apartment. The page said that he had compared notes with a female page also interviewed by Grossi to try to figure out why Williams was involved in these things. At that time the female page had said that Williams was acting as a liaison between Congressmen and prostitutes. The male page said he believed his colleague was surmising this from Grossi's

line of questioning.

This testimony is corroborated by that of another male page, who said he heard the same female page say that Williams had been involved in setting up a prostitution ring for Members of Congress. He said this remark occurred in a conversation in which pages were speculating about the reasons

for the Grossi investigation.

Whatever the source of this rumor, it was plainly in active circulation before Grossi's investigation was even completed. On February 11, a staff member at the Democratic Study Group called a staff member of the Committee on Standards of Official Conduct to report a rumor that a page sponsored by Representative Bethune had been sent home. The rumor had a variety of de-tails-most inaccurate-including the claim that the page was a homosexual who had been "pimping" for Members of Congress. The staffer who called in this rumor reports that he heard it from a staff member in Representative Schroeder's office. staffer in turn heard the allegation from a page, Jeffrey Opp.

### CONCLUSIONS

A. Scope of the investigation

Based on the evidence obtained in the course of this investigation, the Special Counsel has found that the U.S.C.P. investigation was based on allegations of misconduct by pages, and that at no time in the course of the investigation did the police receive any significant allegations of misconduct by anyone else. The investigator conducting the inquiry did receive information that an unnamed Congressman had invited some pages to have a drink. But the investigator was also told that this invitation was not accepted. He asked questions of pages regarding their contacts with adults. While some pages recall that he asked questions

regarding Members of Congress, no one has ever said that any information about misconduct by Members was ever provided to the U.S.C.P. Sergeant Grossi himself has testified that he received no information about Members of Congress, other than the information regarding the invitation for a drink. There is no evidence that the police ever received any other information in the course of this investigation which suggested misconduct by any Member or nonpage employee of the House.

### B. Termination of the investigation

The Special Counsel has found it important to distinguish between two questions. First, from a law enforcement point of view, was the investigation prematurely terminated? In other words, were there indications of criminal activity that were intentionally ignored by the Capitol Hill Police when the investigation was concluded?

But this question must be distinguished from a second question that raises the broader responsibilities of the House of Representatives in supervising pages. That question is the following: Was appropriate follow-up action taken by someone in the House on the basis of the information developed by the Capitol Hill Police?

We turn first to the law enforcement question.

The Committee has deposed both House Sergeant-at-Arms Guthrie and Sergeant Grossi and has interviewed Grossi's police superiors. Deputy Chief Abernathy and Chief Powell, regarding the propriety of the termination of the police investigation. All agree that there was no longer any criminal matter to investigate when the inquiry was concluded on February 11. In their view, Grossi's effort began as an investigation of a stolen wallet. The prime suspect in that case, Williams, was hundreds of miles from the jurisdiction. Given the petty nature of the offense, there was no practical possibility of extradition. The stolen car, which did come to Grossi's attention in the course of the investigation, was a crime that was within the jurisdiction of and being investigated by the Metropolitan Police, not the U.S.C.P. (Grossi did inform the Metropolitan Police of the information he received regarding the car.) Grossi had received no other allegations of criminal activity within U.S.C.P. jurisdiction. Therefore, from the point of view of the Capitol Police, there was nothing further to investigate.

There is no evidence that the decision to terminate the Capitol Police investigation had its roots in any effort to conceal evidence of criminal misconduct or to conceal evidence of wrongdoing by Members, officers, or employees of the House. The Special Counsel has found no indication that the police possessed any such evidence or information.

But there clearly was a serious failure on the part of the House as an institution. While it may have been acceptable to conclude the police investigation, information had been developed that required further action.

Grossi's investigation left the following questions outstanding:

- 1. Had minor pages in fact visited Fourteenth Street area and used the services of prostitutes?
- 2. Were commercial establishments in the vicinity of the Capitol routinely and consciously serving alcoholic beverages minor pages?
  - 3. Were pages using illegal narcotics?

4. Were pages attending all-night parties. to the detriment of their school and work performance?

But no further official inquiries were made by officers or employees of the House to answer these questions, until allegations homosexual conduct involving Members of Congress and pages were publicized by the media in late June and early July, 1982.

No one took action that was plainly required. Specifically, nothing was done to determine with certainty whether pages had used the services of prostitutes. More importantly, nothing was done to prevent such activities in the future. No action was taken to stop several commercial establishments known to be patronized heavily by pages from serving them alcohol. No action, other than the implied threat in the announcement that two pages had gone home, was taken to stop the practice of all-night drinking parties by some pages.

In the judgment of the Special Counsel, the current fragmentation of responsibility for the pages resulted in a serious failure on the part of the House as an institution. Pages are sponsored by individual Members of the House. At work, they are supervised by the Doorkeeper's Office. The House requires the parents of a page to sign a written statement "assuring full responsibility for the safety, well-being and supervision of the [page] while living in the District of Columbia area." The Capitol Police have a narrow jurisdiction, and the Metropolitan Police can hardly be expected to focus on the welfare of pages scattered in apartments on Capitol Hill.

Based on the evidence received in the course of this investigation, the Special Counsel believes that there is an urgent need for the House of Representatives to fix responsibility-formally and in writing-for the supervision of pages after working hours. In the Special Counsel's judgment, the lack of clear responsibility led directly to the failure to address the serious problems of misconduct that developed among the pages in 1981 and 1982. If the House chooses to employ teenage high school pages, establishing a page dormitory and a Page Board are steps in the right direction. But unless responsibility for supervision of teenage pages after working hours is clearly established, the problems that developed in 1981-82 are likely to recur.

### APPENDIX B

U.S. HOUSE OF REPRESENTATIVE, COMMITTEE ON STANDARDS OF OFFICIAL CONDUCT,

Washington, D.C., September 27, 1982.

Mr. John Ferrugia, CBS Television News. Washington, D.C.

DEAR MR. FERRUGIA: On July 13, 1982 the House of Representatives adopted House Resolution 518 which authorizes the Committee on Standards of Official Conduct to carry out an investigation of-

- (1) Alleged improper or illegal sexual conduct by Members, officers, or employees of the House:
- (2) Illicit use or distribution of drugs by Members, officers, or employees of the
- (3) The offering of preferential treatment by Members, officers, or employees of the House, including congressional pages, in exchange for drugs or sexual favors.

The Committee has appointed me as Special Counsel to conduct this investigation.

Copies of House Resolution 518, which authorizes the investigation, the statement of Representative Louis Stokes, Chairman of the Committee on Standards of Official Conduct, and my response at the time of appointment are enclosed.

In the course of our investigation, information has been received concerning statements you made in the course of interviews you conducted earlier this year. That information indicates that you stated to individuals whom you interviewed that you had knowledge of improper or illegal conduct by Members, officers or employees of the House of Representatives, within the scope of House Resolution 518, and that in at least some cases, you identified the person

involved in such conduct.

Since the Committee has charged me with the responsibility to conduct a thorough investigation, I am requesting that you provide us with any information that you have falling within the scope of the investigation authorized by House Resolution 518. As a first step, I request that you meet with Mr. Hamilton P. Fox III of this office to discuss these matters, in House Annex II, Room H-2-507, at 3:00 pm, October 6, 1982. We are aware of the delicacy of the relationship between any government investigation and the press, but I believe it is important that we seek the cooperation of the press where a reporter has already disclosed the names of individuals to a number of people he has interviewed.

Thank you for your assistance in this matter.

Sincerely

JOSEPH A. CALIFANO, Jr., Special Counsel.

CBS,

Washington, D.C., October 14, 1982.

JOSEPH A. CALIFANO, Jr., Esq.,

Special Counsel, Committee on Standards of Official Conduct

DEAR MR. CALIFANO: I am replying to your September 27 letter to CBS News Correspondent John Ferrugia requesting that he meet with your staff in connection with your investigation pursuant to House Resolution 518. In your letter, you state that you have received "information" that Mr. Ferrugia stated to individuals whom he interviewed that he had knowledge of illegal or improper conduct by Members, officers or employees of the House and that, "at least in some cases," he identified such persons. Based on subsequent conversations with your staff, it is our understanding that a principal purpose of questioning Mr. Ferrugia would be to help assess the reliability of information obtained from certain individuals already interviewed by your staff.

As we have indicated, we believe that sensitive First Amendment questions are raised by your request, even if it is limited to the above purpose. Because of the important issues involved, your request has received very careful consideration both by Mr. Ferrugia and the management of CBS News.

For many years, it has been the general practice of CBS News to provide to government agencies only that information concerning its news reports which is a matter of public record. In this respect, we are pleased to enclose transcripts of all television reports broadcast by CBS News on this story. However, your request for an interview goes beyond the as-broadcast materials, and into the area of unpublished information. It is Mr. Ferrugia's strong conviction, and that of CBS News as well, that a discussion concerning unpublished material would unacceptably compromise the independence which should characterize the relationship between the press and the government.

In our view, questions as to whether and why particular statements were made during interviews with news sources go to the heart of the editorial process and are beyond the scope of legitimate inquiry by the government. It is obvious that reporters must ask questions in the course of gathering information for a story, that those questions often involve inquiries as to specific facts, and often as well involve attempts to confirm information already in the reporter's possession. (In the instant case, these questions involved not only inquiries about alleged misconduct but inquiries as well about the efforts of Members of the House to investigate such reports.) To later be interrogated by government investigators about what questions were asked and answers given can only chill the news gathering process.

We also believe it important to emphasize,

in light of the significance which is apparently now being attached to statements allegedly made by Mr. Ferrugia, that CBS News believes that he acted entirely properly in his investigation and reporting of this story. Mr. Ferrugia's reports were completely factual, and dealt largely with allegations which were being actively investigated by the Justice Department, the FBI, the Arlington Police, the Speaker's Special Commission on Pages, and the Committee itself. Moreover, given these investigations by government authorities, it is reasonable to believe that information which you might seek from Mr. Ferrugia is obtainable directly from these authorities.

In sum, the reports aired by Mr. Ferrugia represented what he and his superiors at CBS News concluded could be responsibly broadcast. Other information collected or discussed in the course of his inquiry has remained and must remain private and privileged. For the Committee to seek out such information from the reporter would, in our view, constitute a serious and unwarranted intrusion into the basic right of the press to go about its business on reporting, editing and publishing without governmental interference. Accordingly, Mr. Ferrugia, with the full support of CBS News, respectifully declines to be interviewed by the Committee

Very truly yours,

JOSEPH DE FRANCO, Washington Counsel.

APPENDIX C

HOUSE OF REPRESENTATIVES. COMMITTEE ON STANDARDS OF OFFICIAL CONDUCT,

Washington, D.C., August 20, 1982.
——: The House of Representatives DEAR has authorized the Committee on Standards of Official Conduct to investigate alleged improper conduct by any Member, officer, or employee of the House in the following three areas: (1) alleged improper or illegal sexual conduct, (2) illicit use or distribution of drugs, and (3) the offering of preferential treatment to employees of the House, including Congressional pages, in exchange for drugs or sexual favors. The Committee on Standards of Official Conduct has appointed me as Special Counsel to conduct this investigation.

Copies of House Resolution 518, which authorizes the investigation, the statement of Representative Louis Stokes, Chairman of the Committee on Standards of Official Conduct, and my response at the time of appointment are enclosed. As those documents indicate, the Committee has charged me with responsibility to conduct a fair, impar-tial, thorough, and expeditious investigation.

One part of the investigation is specifically concerned with House pages, and I am writing each individual who, like you, has served as a page during the last three years. I hope your service as a page was an educational, personally rewarding, and worth-while experience. But we need to know whether you have any information that relates to the subjects under investigation. The Committee and the House need your assistance.

I am sensitive to the delicate nature of the subjects of this investigation. We intend to conduct this inquiry in a fashion which will embarrassment to avoid unnecessary anyone. We are not seeking rumor or gossip. Rather, we are seeking any information that you have from personal knowledge or that you have received from a source whom you believe to be reliable and truthful. If you have such information relevant to the three subjects of the Committee's inquiry mentioned in the first paragraph of this letter and the enclosed House Resolution, I urge you to provide us with it. To the extent your experience indicates that allegations of improper conduct in the areas under investigation have no basis, we would appreciate hearing from you on that score as well.

Please contact me by sending a letter or by telephone. A properly addressed, franked envelope is enclosed for your convenience. If you prefer, you may call Jerry McQueen, Hamilton Fox, or Richard Cotton of our Special Counsel's office. You can reach them at: 202/225-8891 or 202/226-7760, and you may call collect. Because it is important to conduct this investigation as expeditiously as possible, if you do have information, you should contact us by September 15,

Those of you who have information may feel yourself caught between a personal desire not to be involved and your responsibilities to the House, to future pages, and as a citizen. Having served as a page, you are more aware than most young Americans of the importance of the House of Representatives. I encourage you to assist the House and the Committee on Standards of Official Conduct in carrying out this investigation in order to preserve the integrity of the House and the confidence of the American people in our democratic institutions.

We are asking for your voluntary cooperation. It is important to the House of Representatives and your nation that you provide that cooperation, and I urge you to do so.

Sincerely

JOSEPH A. CALIFANO, Jr., Special Counsel.

□ 1850

SIXTEENTH ANNUAL REPORT IN ACCORDANCE WITH THE AUTOMOTIVE **PRODUCTS** TRADE ACT-MESSAGE FROM PRESIDENT OF THE THE UNITED STATES

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Ways and Means.

(For message, see proceedings of the Senate of today, Thursday, December 16, 1982.)

PROPOSAL TO RESCIND BUDGET AUTHORITY AMOUNTS, TWO NEW DEFERRALS, AND REVISION TO PREVIOUSLY REPORTED DEFERRAL—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 97-268)

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Appropriations and ordered to be printed.

(For message, see proceedings of the Senate of today, Thursday, December 16, 1982.)

### PROCEEDINGS AGAINST ANNE M. GORSUCH

Mr. HOWARD. Mr. Speaker, I rise to a question of the privilege of the House, and by direction of the Committee on Public Works and Transportation, I submit a privileged report (H. Rept. No. 97-968).

The Clerk read as follows:

#### REPORT

### I. INTRODUCTION

On December 10, 1982, the Committee on Public Works and Transportation, by a vote of 28 to 11, with five Members voting present, adopted the following resolution, offered by Congressman Elliott H. Levitas, recommending to the House of Representatives that Anne M. Gorsuch, Administrator, U.S. Environmental Protection Agency, be cited for contempt of Congress:

"Resolved, That the Committee on Public Works and Transportation report and refer refusal of Anne M. Gorsuch, Administrator, Environmental Protection Agency, to comply with the subpoena dated November 16, 1982, issued by the Subcommittee on Investigations and Oversight, together with all facts in connection therewith, to the House of Representatives with the recommendation that Administrator Gorsuch be cited for contempt of the House of Representatives to the end that she may be proceeded against in a manner and form provided by law."

This action followed the December 2, 1982, action taken by the Subcommittee on Investigations and Oversight which, by a vote of 9 to 2 found the Administrator in contempt for failure to comply with a subpoena ordered by the Subcommittee, and duly served upon her on November 22, 1982. The Subcommittee also instructed its Chairman to report the matter to the full Committee for such action as it deemed appropriets.

The issuance of the subpoena was necessitated by the Agency's refusal to make available to the Subcommittee pertinent and crucial information documenting how the Agency is carrying out certain of its enforcement and cleanup responsibilities under the

Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (P.L. 96-510), the so-called Superfund stat-

The Subcommittee's review of the implementation of that law is part of a broader ongoing inquiry into the problem of hazardous waste contamination of the Nation's water resources. Refusal to provide the subpoenaed documents has prevented the Subcommittee from obtaining information necessary to the discharge of its responsibilities and duties.

This report outlines the Subcommittee's investigation into the Superfund program, highlighting the problems that are to be addressed by that law; the basis for the investigation, what the Subcommittee is attempting to assess with respect to the Superfund law, and the specific information being sought by the Subcommittee. It also reviews the actions of the Committee finding the Administrator in contempt, and discusses the general oversight authority of the Subcommittee as mandated by House and Committee Rules.

The action of the Committee in reporting the finding of contempt, an extraordinary sanction, reflects the importance that its Members place on the need to clean up abandoned hazardous waste sites, on protection of the health of millions of Americans, and the quality of the environment. Of course, the Committee has also acted in a manner consistent with the right of Congress, to obtain the information it deems necessary to carry out its legislative responsibilities, as vested in the Congress by Article I of the Constitution.

The Committee report concludes that the shroud of "enforcement sensitive" which has been placed by the Department of Justice over predominantly civil enforcement files within EPA as a basis for refusing to comply with the subpoena is legally unjustified, given the broad range of sensitive inteligence and national security information shared with Congress on a routine basis and would result in shutting off Congress from a significant source of information on how the laws it passes are administered, a responsibility repeatedly affirmed as within the constitutional authority of Congress. Watkins v. United States, 354 U.S. 178, 187 (1957)

Moreover, the Committee concludes that the assertion by the Department of Justice that by exercising its jurisdiction to examine the administration of laws the Congress is interfering, or becoming a "partner," in the prosecutorial process is unfounded. The Committee desires only to discharge its duty to see that the laws it passes are properly administered and has repeatedly disclaimed any intention to attempt to affect the prosecutorial decisionmaking process. The Attorney General, and no one in EPA, has cited the Committee to a single case which adopts this per se interference theory. Indeed, concurrent exercise of responsibility by units of the government, be they executive agencies, state governments or legisla-tive committees, is the rule not the exception. The power of Congress to probe the administration of laws by the executive dates from the beginning of the Republic. Indeed, the earliest examples of congressional inquiry related to examination of the manner in which executive agencies discharged their functions.

### II. BACKGROUND

Hazardous waste contamination of water resources

Hazardous waste contamination of the Nation's ground and surface waters may be the most significant and troublesome water quality problem facing the country for the remainder of this century. With their ability to render vast quantities of water unfit for use without treatment, the toxins that leach and flow from hundreds of active and abandoned waste sites all across the Nation pose costly and often controversial cleanup and public health problems for government officials at all levels.

The full scope of this problem is still emerging: new sites continue to be brought to the attention of regulatory officials, and thousands of known sites still need to be evaluated for the human health and water quality risks they pose. In part, this reflects the physical nature of the problem. Much of the waste is disposed in ways that first affect ground water, which moves much more slowly than water in surface streams and rivers. Consequently, it can often be months, even years before downstream of "down-gradient" drinking water wells and nearby surface waters become contaminated.

Relatively recent advancements in analytical technology that make it possible to detect extremely small amounts of chemicals have also contributed to the perception by some that the problem is only recent in nature. Others, however, believe that the problem has long been with us.

While it is difficult to show the causal relationships between the presence of extremely low, or "trade" levels of chemicals in a water supply to a given incidence of cancer, birth defects, or other diseases, it is not impossible, and there is now a growing body of data that does more than suggest that these waste sites cause actual harm to both the environment and the public's health.

While the epidemiologic data on the harm from some of these hazardous waste sites may be arguable, there is consensus on at least some aspects of this issue: the problem of containing and cleaning up chemical waste sites is widespread, and extremely costly. Further, these sites exist because of poor or inadequate, as well as illegal, waste handling, treatment and disposal practices that have been used by the rapidly expanding chemical/petrochemical industry since World War II.

# Causes of the problem

There are several ways hazardous wastes find their way into surface and ground waters. Two of these, leachate (the seeping or leaking of ground fluids) from solid waste landfills or garbage dumps, and "midnight dumping" into urban sewer systems appear to be the most common.

For years, one of the least expensive, and often most convenient methods to dispose of industrial waste products has been to put it in a landfill, or dump. Many of these were nothing more than local municipal "sanitary" landfills, designed to recycle domestic, biodegradable wastes back into the earth from which the materials comprising the wastes originally came. But they were never designed to handle the often toxic and persistent wastes of today's modern chemical world.

In many instances, this type of chemical disposal was often legal when it occurred. Many of these sites, whether publicly or privately owned, were designated by law or

local ordinance as qualified to receive "industrial" and "commercial" wastes. In others, however, the dumping was, and is, purely illegal. For example, investigations in Philadelphia and New York over the past few years by local and state authorities have led to the disclosure of unauthorized dumping of hazardous chemical wastes at municipal refuse sites and the arrest of some of the responsible parties. In the New York case, testimony and reports by the Select Committee on Crime of the New York State Senate indicates that this illegal disposal activity had been going on for years throughout several states, despite efforts by state officials to address the problem.1

The indiscriminate or haphazard stockpiling of waste-filled drums in open farm fields, empty city lots, active and abandoned warehouses, and the "back-lots" of small businesses or storage company properties are additional forms of land disposal. Run in a purely clandestine fashion, or under the guise of "recycling" and "recovery" operations, these sites often serve as convenient dumping or "holding" places for the chemi-cal industry's "cats-and-dogs" wastes, the wastes that have no further fuel or eco-nomically recoverable fractions that would be of value to anyone. And they often simply stay there, corroding their containers and leaching into the ground until some-

one happens on them.

The "Valley of the Drums" case, discovered a few years ago in Brooks, Kentucky, near Louisville, is a classic example. More than 17,000 drums of solvents, paint sludges, and other toxic and flammable wastes were strewn about this hazardous waste landfill and surface dump located just south of Louisville. The drums, and other wastes buried in the ground led to the contamination of a nearby stream which flows into the Ohio River, a drinking water supply for many communities

In yet another example, in Seymour, Indiana, approximately 60,000 drums of hazardous wastes and hundreds of thousands of gallons of chemical compounds in bulk storage vessels have contaminated the ground and surface waters, the former being source of drinking water for community residents. The costs of cleaning up these sites total into the millions.

As noted above, another frequently used disposal method is the illicit dumping of hazardous wastes into urban sewer systems. The existence of local government ordinances prohibiting this type of disposal in many sewered communities around the country makes such acts illegal, as well as

inappropriate.

Sometimes executed in broad daylight as well as in the dead of night, this approach for disposing of chemical wastes can accommodate a 5,000 gallon tank truck in a matter of minutes. And, while perpetrators of this type of disposal prefer to use storm sewers that by-pass local municipal waste water treatment works, they occasionally choose poorly. The result can, and has been the disruption of operations at the local treatment plant. And when this occurs, the results can be disastrous.

For example, in 1977, in Louisville, Kentucky, illegal dumping of highly toxic chemicals into that city's sewers rendered useless much of that city's new, multi-million dollar treatment works.2 While the parties responsible were ultimately identified and prosecuted, the plant was either totally or partially out of service for many months while special government and military teams attempted to rectify the situation. During that time, billions of gallons of raw or poorly-treated and chemically-contaminated sewage spewed into the Ohio River, a prime recreational resource and drinking water supply for numerous downstream

There are several other causes or sources chemical waste contamination which, while not necessarily as common or significant in scope as those just mentioned, are nonetheless of equal concern. They include (1) classic spills by transporters-sometimes intentionally; (2) the spreading of waste oil illegally laced with contaminants on rural roads-the spreading of oil itself being a common and apparently legal practice for dust control in some areas of the country; and (3) the literal pouring of liquid toxic wastes from tank trucks onto rural roadsides and wooded lots (often in the dead of the night) and into any other convenient place, including vacant urban lots.

Another illicit method for disposing of hazardous wastes is to mix it with waste oil and sell it as boiler fuel to unsuspecting commercial and industrial customers. A relatively "efficient" hazardous chemical disposal method, its impact on water quality is largely limited to "acid-rain" type fall-out from furnace stack emissions. For those in the area of the emission, however, the effect of burning this contaminated waste oil may be extremely hazardous as partially stroyed or heat-resistant toxics combine with furnace gases and enter the air.

The human and ecological effects of improper hazardous waste disposal

As noted earlier, the improper disposal of toxic chemical wastes can render ground water supplies, the source of drinking water for millions of Americans, unfit for use for decades without highly sophisticated and costly treatment. Toxins from abandoned hazardous waste sites have also contaminated surface waters in many areas, making them unsuitable for drinking and recreational purposes. In still other instances, these wastes have contaminated the very soil we walk on, that children play on, and in which we grow some of our food.

The presence of these toxic wastes are also believed to be the cause of many chronic illnesses, including cancer, to those who are routinely exposed to them. Simply living too close to an improperly managed and maintained site, according to some reports, can have seriously debilitating effects on public health.3

Concern about the effects of hazardous wastes have even triggered considerable interest in another medical area: neurotoxicity-chemical attacks on the human nervous system. Indeed, the risks to public health and welfare, as well as the damage these hazardous chemical wastes can wreak on this Nation's most valuable treasure, its water resources is almost unfathomable.

The Superfund law

In early December 1977, Congress enacted legislation to deal with abandoned and inactive waste sites: the "Comprehensive Envi-ronmental Response, Compensation, and Li-ability Act of 1980", commonly known as

Investigations and Review, July 1977, document No.

the "Superfund." The Act, which is also referred to by its acronym, CERCLA, is also intended to provide a means to respond to hazardous chemical spills.

Signed into law on December 11, 1980, the Superfund statute (P.L. 96-510) created a \$1.6 billion trust fund, to be used for cleaning up hazardous waste sites and spills of hazardous chemicals. The monies for the Fund, to be collected over a five-year period commencing in 1981, are derived primarily from taxes on oil and certain chemicals; 12.5 percent of the Fund's monies come from general tax revenues.

Among the key features of the Superfund Act is a grant of authority to the government to act to control and/or eliminate a hazardous waste situation when a responsible party cannot act, or cannot be identified in a timely fashion.

Another significant feature is the law's liability provisions. Essentially, those responsible for creating a hazardous waste site (or chemical spill), be they chemical waste generators, transporters, treaters, storers, or disposers, who do not act to clean up a site themselves, are required to reimburse the Fund for the government's cost of cleaning it up and for any damage to natural resources. Further, under the law, the Government can assess treble damages against responsible parties that refuse to cooperate in cleaning up a site.

On August 14, 1981, President Reagan issued Executive Order 12316, "Responses to Environmental Damage", which ordered, among other things, that:

"The responsibility for the amendment of the NCP (National Contingency Plan) and all of the other functions vested in the President by Section 105 of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, gated to the Administrator of the Environmental Protection Agency."

Executive Order 12316 also makes the EPA Administrator responsible for (1) cleaning up abandoned or inoperative hazardous waste sites and/or determining that the responsible parties will do so; (2) carrying out the enforcement provisions of the Act, including the issuance of administrative orders and the initiation of action in the U.S. Courts for necessary remedies, including fines and penalties; and (3) managing the "Hazardous Substance Response Trust Fund." (E.O. 12316 of August 14, 1981, at 170 and 171.)

III. THE SUBCOMMITTEE'S OVERSIGHT OF THE SUPERFUND LAW AND THE U.S. ENVIRONMEN-TAL PROTECTION AGENCY

On March 10, 1982, the Subcommittee on Investigations and Oversight of the Committee on Public Works and Transportation opened a series of hearings to examine the extent to which releases or discharges of hazardous and toxic wastes in the environment were being controlled or abated, and the effect that these releases have on the quality of the Nation's ground and surface water resources.

A central concern in this investigation and review by the Subcommittee was, and continues to be, the efforts being made by the U.S. Environmental Protection Agency to carry out the framework of Federal laws that address, in whole or in part, hazardous waste contamination of water resources. Among the statutes being examined, in addition to the Superfund law, are the Federal Water Pollution Control Act Amendments, P.L. 92-500, as amended (also referred to as

<sup>&</sup>lt;sup>3</sup> University of Medicine and Dentistry of New Jersey, July 1982.

<sup>&</sup>lt;sup>1</sup> Hazardous Waste Landfill Dumping, A Report by New York State Senator Ralph Marino, Chairman, Select Committee on Crime, March 25, 1982.

<sup>2</sup> Implementation of the Federal Water Pollution

Control Act, Hearings before the Subcommittee on

the Clean Water Act); and the Resource Conservation and Recovery Act, P.L. 94-580, as amended. (A review of the Department of Transportation's efforts to carry out the Hazardous Materials Transportation Act, P.L. 93-633, as amended, and its bearing on this issue, is also included.)

Of particular interest to the Subcommittee at the March 10, 1982, hearing was the EPA's February 18, 1982, action suspending its restriction on dumping "liquids in landfills". The Agency had previously banned the disposal of containerized liquid wastes in landfills that lacked the physical safeguards necessary to prevent toxic wastes from migrating into ground and surface waters. The EPA's lifting of this restriction raised the possibility that many new "Love Canals" might be created.

EPA officials testifying at that hearing, Mr. Christopher J. Capper, Acting Assistant Administrator for Solid Waste and Emergency Response, and Mr. Gary Dietrich, Director of EPA's Office of Solid Waste, acknowledged that they did not have adequate information on the potentially lethal effect that the dumping of these hazardous wastes into landfills would have on the Nation's ground and surface waters. They also advised, among other things, that many of the several hundred existing dump sites accepting hazardous wastes do not have anti-leaking (leachate) barriers or collection and treatment systems in place, and that the then EPA rules did not restrict the dumping of any type of hazardous waste, containerized liquid or solid, into any of those facilities.

In fact, the two EPA officials were able to provide the subcommittee with very little justification for suspending the "liquid in landfills" ban while they considered a new rules on this issue. Further, they acknowledged that no assessment had been made as to how much toxic waste had been stockpiled around the country because of the ban or how much toxic waste was being dumped as a result of the ban's suspension.

On March 17, seven days after the Subcommittee's hearing, the EPA announced that it was further modifying its regulations to partially reimpose the ban. (F.R. Vol 47, No. 55, March 22, 1982, pp 12316-12318.)

On March 30, 1982, the Subcommittee met again, to further question Messrs. Capper and Dietrich about the recent actions on the "liquids in landfills" ban suspension. Their response to the Subcommittee's questions seemed to conflict with their earlier testimony, raising questions as to whether there really was any need for EPA to suspend the ban on toxic liquid waste dumping in the first place.

On July 9, 1982, the Subcommittee held an additional day of hearings, in New York City, to examine more closely the progress being made by the EPA and other state and local officials in cleaning up some of the existing hazardous waste sites being addressed by the Superfund law. Witnesses included the Mayor of Oswego, New York, which is the site of the Pollution Abatement Services Company, an inactive liquid waste incineration operation that had been abandoned by its owners, and citizens living in the area of the Burnt Fly Bog and Lone Pile Landfill waste sites in New Jersey. The Burnt Fly bog site involves a 160 acre abandoned private dump, and the Lone Pile Landfill involves an inactive 85 acre landfill.

Vast quantities of toxic chemicals have been disposed of at these sites, creating water pollution and public health problems that may last for decades, and cleanup costs that may run into tens of millions of dollars. Of particular concern to the witnesses, and the Subcommittee, was why it was taking so long to get these sites cleaned up. Further, testimony by the Mayor of Oswego and another witness from that community indicated that much of the waste at the PAS site, and several satellite sites had yet to be cleaned up, and the possibility existed that some of it may never be dealt with.

Residents of Port Washington, N.Y. also testified during the hearing, raising questions about whether large quantities toxic chemicals may have been illegally disposed of in the community's domestic waste landfill. Despite the apparent litany of problems that have occurred, including explosions in nearby homes allegedly due to toxic gases escaping from the landfill, the witnesses expressed with some exasperation that they had been unable to get either the Federal EPA, the State of New York's Department of Environmental Protection, or the local community's officials to undertake the costly tests necessary to determine whether there were significant quantities of toxic chemicals present in the landfill that might contaminate the community's water supply and the nearby waters of Long Island Sound.

Finally, testimony by the U.S. General Accounting Office at the July hearing disclosed that EPA's efforts to carry out the Superfund law, including the development of implementing regulations and the "National Contingency Plan", called for by the Act, were significantly behind schedule, impeding the rate at which toxic waste sites were being cleaned up.

#### What the subcommittee is trying to assess

The Subcommittee's hearings and field investigations have raised a number of concerns about the adequacy of the Superfund law, and the extent to which the EPA's efforts to carry it out are both satisfactory and in keeping with the intent of the law. Further, public disclosure of alleged illegal hazardous waste disposal activities by a Waterbury, Connecticut chemical handling firm (New York Times, October 27, 1982, at B3), activities that may also be in violation of the Federal Clean Water Act, suggest that current efforts to prevent improper and illegal disposal of hazardous wastes are inadequate.

Testimony and additional evidence available to the Subcommittee also suggests that many identified hazardous waste sites are not being fully, nor expeditiously cleaned up, and that many of the companies responsible for the wastes are not being held fully liable for their share of the cleanup costs, as the Superfund law intended.

There is also evidence suggesting that resources devoted to the EPA for pursuing leads about responsible parties are inad-equate; that documents that would help to establish the responsibility of parties for some of these sites have not been expeditiously obtained; that contracts for cleaning up hazardous waste sites may be going to the very companies that had a hand in creating them; that wastes from some sites being cleaned up at public expense may appear to have been improperly disposed of, creating new cleanup problems; and, that EPA's efforts to impose administrative penalties on violators of hazardous chemical and waste laws over the past several years, have been oriented toward seeking minimum penalties, which are often further reduced during negotiations with responsible parties.

As a result, the Subcommitee's inquiry continued following the July 9, 1982, hearing and, with respect to the Superfund statute, focused heavily on the following areas:

Whether there are statutory requirements and/or administrative policies, practices and procedures that affect the government's (EPA's) ability to function effectively and achieve the objectives of the law, or whether amendments to the statute are needed;

Whether the Superfund law's enforcement provisions are being fully and effectively carried out;

Whether adequate efforts have been, or are being made to obtain and/or recover the full costs of cleaning up hazardous waste sites from responsible parties;

Whether the Fund, and the existing sources and amounts of revenue for it, particularly the tax on oil and chemicals, is adequate to address both known and potential hazardous waste sites and chemical spills; and

What information is being considered, or not being considered by the EPA, in its administration and management of the Fund, and its execution of responsibilities under the Superfund law.

Answers to these concerns will, in turn, assist the subcommittee in identifying weaknesses and/or deficiencies in the framework of Federal laws and the ways they are being carried out that may be inhibiting or precluding regulation and enforcement of hazardous waste disposal activities; in assessing the adequacy of existing statutory penalties for deterring the continuance of illegal or improper disposal of hazardous wastes; and in demonstrating how the several Federal statutes and their implementing regulations may be combining to create incentives and methods for generators of hazardous wastes to dispose of toxins illegally.

to dispose of toxins illegally.

In pursuit of information that would help the subcommittee make these assessments, efforts were undertaken by the Subcommittee's investigators to interview EPA Officials and others, and to review the agency's enforcement files. Among the questions

needing answers:

Why aren't responsible parties being held liable for their full share of the costs of cleaning up a hazardous waste site?

Why is the EPA agreeing to limit the liability of some responsible parties, and not others; and what is the effect of this on the program and the Fund's resources?

What is the basis for the agency deciding whether it will assess civil penalties, and how much those penalties should be?

What is the EPA's basis for deciding whether it will refer a case to the Justice Department for prosecution of either civil or criminal concerns?

What does the agency do when it finds that one or more of the responsible parties may be judgment proof?

Why are some cases being settled or handled administratively, and others going to litigation?

Is the agency capable of making substantive financial analyses of the responsible parties, and how does this affect their decisions on obtaining or recovering cleanup costs from responsible parties, or on pursuing penalties through litigation?

To what extent does the ability to identify responsible parties affect agency enforcement decisions about who should pay how much of the cleanup costs and whether efforts should be made to litigate, or settle out of court?

Is the agency able to move rapidly enough to ensure that valuable and critical evidence, particularly potentially criminal evidence, is not lost, or destroyed?

Is any consideration given to whether a responsible party is involved in more than one site?

Are cleanup and other efforts to negotiate settlements or proceed with litigation hindered in any way, or being stalled, and if so, why?

Are there weaknesses or deficiencies in the statute that affect EPA's ability to enforce?

The Attorney General and Administrator Gorsuch have repeatedly asserted that congressional inquiry into these matters wrest from the Executive its ability to "take Care That the Laws be faithfully executed," U.S. Const. art. II. Sec. 3.

As the opinion of the General Counsel to the Clerk in response to the Attorney General's opinion states:

"Congress does not forgo inquiry simply because it may produce information on the government's strategies and weaknesses; the only way to correct either bad law or bad administration is to examine these matters." See Appendix M.

The position of the EPA would mean that Congress would, in effect, destroy or diminish its own oversight power in passing laws. for once passed, administration of the law would fall exclusively within the "take care" clause power to the exclusion of oversight, sealing off from Congress an effective means for determining the sufficiency of existing law. This argument falls of its own weight. The power conferred by the Constitution under Article II, Sec. 3 is primarily to empower the President simply to carry out the laws enacted by Congress. It neither expressly nor impliedly authorizes the President, or any agency, to withhold documents essential to evaluating the administration of the laws passed by Congress which the President is to "faithfully" execute.

This kind of slipshod constitutional construction and the unsupported equivalency drawn between oversight and interference in execution of the law cannot withstand scrutiny and is rejected by your Committee.

Events leading to the subpoena of the EPA Administrator and the Agency's enforcement documents

As detailed during the Subcommittee on Investigations and Oversight's December 2, 1982 hearing, on September 13, 1982, the Subcommittee staff called and advised the Environmental Protection Agency's Region II Superfund program and legal enforce-ment staff of the Subcommittee's need and intent to review file materials related to the agency's efforts to carry out its hazardous waste disposal and spill cleanup mandates under the 1980 Superfund law; the Resource Conservation and Recovery Act (RCRA; P.L. 94-580, as amended), and the Clean Water Act (Pub. L. No. 92-500, as amended). EPA Region II staff (Mr. Robert Ogg and Mr. Walter Mugdun) advised that access to much of this information was restricted, and that EPA headquarters staff in the Office of Legal Enforcement Counsel, would have to be contacted. (Hearing transcript at

On September 14, 1982, the Subcommittee staff called EPA Headquarter's Office of Legal and Enforcement Counsel and spoke with Kathy Summerlee about the Subcommittee's investigation, and of the need to examine the agency's Region II Superfund enforcement files. Ms. Summerlee indicated that the person who normally handles such matters, Mr. Edward Kurent, was not in at

the time, and that she would have to call back with a response.

In a subsequent phone call from Ms. Summerlee on the same day, the Subcommittee staff was advised that there would be no objection to Subcommittee review of the enforcement files, so long as the confidentiality of the information in those files was maintained, a condition that was agreed to by the Subcommittee staff. These arrangements were confirmed with Mr. Mugdan in Region II. (Hearing transcript at 12.)

On September 15, 1982, Subcommittee staff traveled to New York City and met with Mr. Ogg and Mr. Mugdan of the EPA staff concerning the review of the agency's files. Mr. Mugdan advised that any of the engineering and technical studies that were being prepared on the several EPA Region II Superfund priority sites could be made available, but that the Subcommittee could not have access to the enforcement files.

Mr. Mugdan also advised that the Sub-committee staff were to contact Mr. Richard Mays in the EPA Office of Legal and Enforcement Counsel about this reversal in the previous day's arrangements. Upon doing so, Mr. Mays advised that he had discussed the Subcommittee's request with the EPA's Associate Administrator for General and Enforcement Counsel, Mr. Robert Perry, and that before the Subcommittee could have access to Superfund enforcement files, the agency wanted to have a formal letter from the Subcommittee requesting such access, as set out in section 104(e)(2)(D) of the Superfund law. (Hearing such transcript at 12.) (Section 104(e)(2)(D) stipulates that " . . . all information reported to or otherwise obtained by the President (or any representative of the President) under this Act shall be made available, upon written request of any duly authorized com-

mittee of the Congress, to such committee.) On September 16, 1982, a letter to the EPA Administrator, from the Subcommittee, dated September 15, 1982, was hand delivered to the EPA Administrator (and to others in the Agency, including Mr. Perry and Mr. Mays), requesting that information and materials, documents and other records pertaining to the implementation of the Superfund law be made available to the Subcommittee (Appendix A). Following confirmation of the delivery of the letter, the Subcommittee's staff, still present in New York City, met again with Mr. Mugdan, and requested access to the agency's enforcement files.

Mr. Mugdan immediately phoned Mr. Mays at EPA Headquarters, and asked for direction and guidance. Mr. Mays advised Mr. Mugdan that the Subcommittee staff could not have access to the enforcement files, and then spoke with the Subcommittee staff, by phone, personally confirming this directive to Mr. Mugdan (Hearing transcript at 13). Prior to leaving the EPA Region II headquarters building, the Subcommittee staff met with Mr. Warren Llullewan, Region II's General Counsel, and advised him of discussions between EPA and the Subcommittee staff, and that the refusal by EPA to grant access to the staff would have to be reported to the Subcommittee.

On September 20, 1982, EPA Associate Administrator and General Counsel, Robert Perry, called the Subcommittee staff to discuss the Subcommittee's access request, and indicated his willingness to cooperate. Mr. Perry suggested that he send an EPA head-quarter's official along with us to pre-screen their files and remove sensitive documents (emphasis added). He indicated that this

would be necessary because he wasn't sure what was sensitive or confidential in each file. This was deemed unacceptable by the Subcommittee staff, as it would obviously continue to preclude the Subcommittee access to necessary information (Hearing transcript at 13). The conversation ended with the scheduling of a meeting involving EPA, Department of Justice (DOJ) and Subcommittee staff on September 29, 1982.

On September 29, 1982, the Subcommittee staff met with Mary Walker and Stephan Ramsey of the Department of Justice, and Mr. Perry, Mr. Mays and Mr. Gerald Yamada of the EPA, at the Department of Justice. The EPA staff deferred to Mr. Ramsey, who advised the Subcommittee staff that he had serious problems with the Subcommittee's accessing active litigation files and other documents identifying "responsible parties" and the EPA's and DOJ's enforcement strategies.

Mr. Ramsey indicated that he believed that the Subcommittee did not have the authority to access that kind of information under section 104(e)(2)(D) of the Superfund law (Hearing transcript at 14). Mr. Prolman of the Subcommittee staff advised that the Subcommittee's inquiry was being pursued under the general authority of the Congress to conduct oversight and investigations, and the rules of the House granting jurisdiction to the Committee and not simply under the authority granted by section 104(e)(2)(D) of the Superfund law.

Mr. Perry and Mr. Ramsey asked the Subcommittee staff if they could be provided with a list of the documents being sought. They were advised that since the Subcommittee staff had not been allowed to conduct a visual review of any of the enforcement files, it would be impossible to provide such a list.

EPA and DOJ staff repeatedly advised that they felt that many of the types of questions the Subcommittee staff was asking, and the types of files or documents that would have to be seen to answer these questions fell into the area of those that they believed the Subcommittee could not see. Consequently, no agreement was reached, and Mr. Prolman of the Subcommittee staff advised those present that he would have to report the inability to reach an agreement to the Subcommittee.

# The subpoena

On September 30, 1982, the Subcommittee met in Executive Session and authorized the issuance of subpoenas to the EPA Administrator and other EPA officials, and for agency documents, if EPA continued to refuse the Subcommittee access to its enforcement files. (Committee Rules, Committee on Public Works and Transportation, 97th Congress, Rule No. V, at 4.)

On October 1, 1982, the Subcommittee Chairman, Mr. Levitas, Ranking Minority Member Mr. Hagedorn, Congressman Molnari and members of the Subcommittee staff, met with EPA Deputy Administrator John Hernandez, EPA Chief of Staff John Daniel, and Mr. Robert Perry, Gerald Yamada and Richard Mays of the EPA Office of Legal and Enforcement Counsel. The EPA officials present assured the Subcommittee that they would cooperate and provide access to, and copies of pertinent Superfund enforcement related files, and

<sup>&</sup>lt;sup>4</sup> After issuance of the subpoena, and at no time thereafter, has the EPA or representatives of the Department of Justice contested the jurisdiction of the Committee.

that they would so indicate in a response to the Subcommittee Chairman's September 15, 1982, letter to the Administrator. In response to questions by the EPA officials present, the Subcommittee Members assured that the confidentiality of the agency's sensitive materials would be maintained (Hearing transcript at 14, 15).

On October 7, 1982, EPA General Counsel Robert Perry transmitted a letter to the Subcommittee Chairman, in response to the Subcommittee's September 15, 1982 letter to the EPA Administrator, advising that the EPA would make their files available, with the exception (emphasis added) of memoranda by other agency or Department of Justice attorneys containing litigation and negotiation strategy, settlement posi-tions, names of informants in criminal cases, and other similar material," contrary to their stated intentions on October 1, 1982 (Appendix A).

On October 8, 1982, the Subcommittee's staff met with Mr. Perry, Mr. Mays, and Mr. Yamada of EPA at its headquarters to discuss several differences between the EPA October 7, 1982 letter and what had been stated at the EPA-Subcommittee meeting on October 1, 1982. EPA again advised that the desired information would be available and that a further letter would be sent to the Subcommittee to clarify the EPA Octo-

ber 7, 1982, letter.

On October 12, 1982, the above-referenced follow-up letter from EPA, signed by EPA General Counsel Perry, was received by the Subcommittee. The letter did not remove any of the restrictions or exceptions on access to critical information (Hearing tran-

script at 16).

On October 13-15, 1982, the Subcommittee staff traveled to EPA Regions I and II (Boston and New York) to review certain Superfund site enforcement related cases. and obtained a limited number of confidential documents concerning certain of the cases, but were advised that the decisions relative to enforcement actions were made by headquarters personnel, and that the records pertaining to those matters were at EPA headquarters.

On Friday, October 29, 1982, Subcommittee staff met with Mr. Gene Lucero and Mr. Tony Montrone, of EPA's Office of Waste Programs Enforcement. The purpose of the meeting was to obtain a general overview of that office's efforts to carry out the Superfund statute's enforcement requirements. and to review EPA headquarter's enforcement files on certain cases being addressed by the program, specifically the Bridgeport, New Jersey and Seymour, Indiana sites.

At the completion of general discussions, the Subcommittee staff asked to see the agency's enforcement files on the above two sites, including those files that contained enforcement strategy and settlement deci-

Mr. Lucero advised that he was under instructions not to let the Subcommittee's staff see these files, and that if the matter was to be pursued further, Mr. Perry, of the Office of Legal and Enforcement Counsel, would have to be contacted. At the Subcommittee's staff's request. Mr. Lucero and Mr. Montrone contacted Mr. Perry, and advised them of the situation. The meeting broke for lunch, and when the Subcommittee staff returned to Mr. Lucero's office at approximately 1:30 p.m., they were advised by Mr. Montrone to go to Mr. Perry's office.

When the Subcommittee staff arrived at Mr. Perry's office, they were informed that was not in Washington, and that they

were to meet Messrs. Michael Brown and Richard Mays of his staff. Also attending this meeting, apparently at EPA's request, was Mr. Stephen Ramsey of the Department of Justice.

Mr. Brown advised that he was only generally aware of the entire matter, and was unaware of Mr. Perry's letters of October 7 and 12, 1982, to Chairman Levitas, and the agreement that EPA Deputy Administrator John Hernandez, and EPA General Counsel Robert Perry, had made with the chairman and other Subcommittee Members on October 1, 1982, regarding the subcommittee's access to these files. Nonetheless, he advised that it was the EPA's policy that the information being sought was considered "enforcement sensitive" and would not be made

The Subcommittee staff asked both Mr. Brown and Mr. Ramsey why there had been this apparent change in the agreement that had previously been reached between the agency and the Subcommittee Members allowing access to these files and documents. They admitted that there had been a change due to the issuance of a subpoena for the same type of information by the Energy and Commerce Committee of the House (Hearing transcript at 17). Further, since they could not treat two Committees of the House differently, they were reverting to their original position on the matter. which was that they could not let the Subcommittee see these "enforcement sensidocuments. They also stated, when specifically asked, that the informal arrangements they had with the Subcommittee, as well as similar arrangements they with the Energy and Commerce Committee (apparently to review, analyze, make notes, and obtain copies of these enforcement sensitive documents), were null and void.

Both Mr. Brown and Mr. Ramsey advised that they felt that the Subcommittee did not have the authority to see this information (Hearing transcript at 17). Mr. Brown further advised that he felt it would be more appropriate if the Subcommittee would wait until the agency had finished its work before conducting a review, (Hearing transcript at 17). The meeting adjourned with no further resolution of the matter, and the Subcommittee staff reported this to the Subcommittee Chairman.

On November 22, 1982, the Subcommittee served a subpoena to EPA Administrator Anne M. Gorsuch, and required her to appear before the Subcommittee on December 2, 1982, and "to produce all books, records, correspondence, memorandums, papers, notes and documents drawn or received by the Administrator and/or her representatives since December 11, 1980, including duplicates and excepting shipping papers and other commercial or business documents, contractor and/or other technical documents, for those sites listed as national priorities pursuant to Section 105(8)(B) of P.L. 96-510, the "Comprehensive Environmental Response, Compensa-tion, and Liability Act of 1980"," (emphasis added.).

On November 30, 1982, the Subcommittee Chairman received a letter from Attorney General William French Smith, indicating that, in keeping with the "historic position of the Executive Branch that it is not in the public interest for sensitive documents found in open law enforcement files to be given to Congress or its committees, except in extraordinary circumstances," and that it would be preferable if the Subcommittee would "no longer seek to compel production of this class of documents from the Administrator." (Appendix G.)

The letter further suggested that "the legislative needs of your Subcommittee can be met without the production by the Administrator of sensitive documents in open law enforcement files." Referenced in, and enclosed with this letter, was a copy of a letter, also dated November 30, 1982, from the Attorney General to Congressman Dingell, Chairman of the Committee on Energy Commerce's Subcommittee on Oversight and Investigations (Appendix H). This latter document contained similar admonitions, and several references as to the basis for the Attorney General's position on the matter.

### Subcommittee hearing on subpoena

On December 2, 1982, the Subcommittee held a hearing to receive testimony from EPA Administrator Anne M. Gorsuch, in response to the subpoena, and to either receive the requested documents, or explanation as to why they were not going to be provided.

In her opening statement, Mrs. Gorsuch advised the Subcommittee "... that sensitive documents found in open law enforcement files will not be made available to the Subcommittee." (Hearing transcript at 57.) Citing the President's instructions to her as set forth in a memorandum dated November 30, 1982, (Appendix I), Mrs. Gorsuch further noted that:

. . sensitive documents found in open law enforcement files should not be made available to Congress or the public except in extraordinary circumstance. Because dis-semination of such documents outside the Executive Branch would impair my solemn responsibility to enforce the law. I instruct you and your agency not to furnish copies of this category of documents to the Subcommittees in response to their subpoenas.

The legal claims of the Attorney General that "open law enforcement files" cannot be made available to Congress we believe have been effectively met by the opinion of the General Counsel to the Clerk. Indeed, the leading case of McGrain v. Daugherty, 273 U.S. 135, 177 (1926) expressly holds that Congress' inquiry into "whether the Attorney General and his assistants were performing or neglecting their duties in respect of the institution and prosecution of proceedings" (emphasis added) was a proper and lawful exercise of Congress' power.

The Attorney General relied not on any caselaw, but on letters from prior Department of Justice officials in instances involving FBI criminal investigative files, not civil law enforcement files.

The administrator of EPA pegged part of the argument on the "loss of control" resulting from production of these documents to Congress, yet when Chairman Levitas offered a proposal to permit EPA to show these documents to the Subcommittee in executive session without ever ceding actual control over the documents, this proposal was rejected by EPA. The nub of EPA's refusal is the assertion that merely permitting Members of Congress to see these documents would constitute loss of control.

While repeatedly denying that the EPA quated disclosure to Congress with public disclosure of release to litigants in pending EPA cases, EPA and Department of Justice officials returned again and again to the spectre of the damage to EPA's litigation efforts which release of enforcement sensitive files would have. At the Subcommittee hearing, Ms. Gorsuch stated:

"For example, analysis of, in a particular enforcement case against a particular defendant or group of defendants which, among other things, identifies weaknesses in either our information base or our legal position. If we were to allow that to become public, nothing could be of more service to defendant." (Hearing Transcript at 68.)

Despite repeated assurances that the Committee would not release the materials, EPA persisted in grounding denial to Congress on fear of release to defendants.

Noting that the Subcommittee had sought those documents associated with the priority sites listed pursuant to section 105(8)(B) of the Superfund law, Mrs. Gorsuch advised the Subcommittee that since "the agency has issued only an interim priority list, not under section 105(8)(b). The subpoena does not apply to any documents, therefore, in the possession or custody of EPA." (Transcript of Hearing at 55.) This statement appeared to be intended to raise a technical objection to the subpoena, and perhaps whether it provided adequate notice to the EPA concerning the documents required to be produced. Any lack of adequate notice was belied by two factors openly conceded by EPA itself. First, Administrator Gorsuch in the very next sentence of her statement indicated her understanding of the scope of the subpoena by informing the Subcommitthat she "directed my staff to begin to gather all documents pertaining to the 160 sites now on EPA's interim priority list." Id. Moreover, in response to the Subcommittee subpoena EPA dispatched a memorandum to regional administrators identifying documents to be gathered for transmittal to Washington in compliance with the subpoena. That memorandum instructed the regional administrators to "gather all of the documents encompassed in the Subcommit-tee's subpoena" and to "segregate all materials which are 'enforcement sensitive.'" (Appendix F). The suggestion that the Administrator either could not understand the scope of the subpoena or could not comply because the sites had not yet been designated is undermined by the Administrator's instructions and her statement before the Committee.

It is well settled that minor irregularities in the form of a congressional subpoena do not invalidate it where its meaning is clear to the person to whom it is directed. Flanner v. United States, 235 F.2d 821 (D.C. Cir.

1956.5

It is clear that the Administrator and her staff had long been aware of the type of documents the Subcommittee was seeking, and that steps had been taken earlier in an attempt to identify and separate them from the agency's files.

As early as November 15, 1982, before the Subcommittee issued its subpoena, but long after discussions had been initiated about access to the agency's files, EPA Associate Administrator Robert Perry sent a memorandum to all those in his Office of Legal and Enforcement Counsel, advising them "... that certain classes of deliberative or negotiating materials relating to the en-

Further, on November 24, 1982, two days after the Subcommittee served its subpoena to the Administrator, Mrs. Gorsuch, herself, issued a memorandum to EPA Assistant Administrator for Solid Waste and Emergency Response, Rita Lavalle, and to all ten of the agency's Regional Administrators, indicating that—

"... the Department of Justice (DOJ) has advised us that certain classes of deliberative or negotiating materials must be reviewed very closely before being made available to Congressional committees. Included among these categories of documents are "enforcement sensitive" materials, ..." (Appendix F.)

In fact, in EPA General and Enforcement Counsel Rober Perry's October 7, 1982, letter to the Subcommittee Chairman, almost a month before this hearing, the type and nature of the documents that would not be made available to the Subcommittee were well articulated: "These documents include, for example, memoranda by Agency or Department of Justice attorneys containing litigation and negotiation strategy, settlement positions . . . and other similar material." (Appendix B.) Further, the Subcommittee, as noted earlier, intentionally excepted from its subpoena the vast majority documents known to be in the agency's files; shipping papers and other commercial or business documents and various technical documents involved in these sites.

As noted above, Mrs. Gorsuch informed the Subcommittee that while the agency would make most of the documents in its files available in response to the subpoena, she would not provide the Subcommittee with the so-called "enforcement sensitive" documents, those being of a nature or type as referenced by Mr. Perry in his October 7, 1982, letter. However, as to the number of documents this actually involves, there remained a question.

During her testimony on December 2, 1982, and as indicated earlier, Mrs. Gorsuch noted: "To date, at least 23 such documents from our headquarters have been preliminarily identified." (Hearing transcript at 57.) She also acknowledged in response to questioning that steps were being taken to identify the remaining balance of those documents, and that the Agency had "only gone through a small percentage of the files so far." (Hearing transcript at 95.) Indeed, the Agency itself did not know which documents, or how many, were actually going to be subject to their own criterion of "enforcement sensitive" and, therefore, to be withheld from the Subcommittee.

Subsequent questioning by the subcommittee also disclosed that the EPA had identified some 35 "enforcement-sensitive" documents involved in the three sites being examined by the House Energy and Commerce Oversight Subcommittee. Yet, despite the fact that these same three sites were included in the 160 referenced in the Public Works and Transportation subpoena, the EPA had only provided the Subcommittee with a list of 23 documents at issue. (Testimony by the EPA Associate Administrator for Legal and Enforcement Counsel, Mr.

Robert Perry, before the Energy and Commerce Oversight Subcommittee on the following day, December 3, 1982, disclosed that there may be as many as 51 "enforcement sensitive" documents involved in the three sites being examined by that Subcommittee, raising the prospect that as many as 2,000 to 3,000 documents may ultimately be involved, and withheld by the EPA.)

Unfortunately, the Subcommittee, and for that matter, the full Committee on Public Works and Transportation, remains unable to address these statistical inconsistencies in the Administrator's testimony. Indeed, while she and other agency officials have repeatedly advised that they are prepared to make the vast majority of all Superfund documents available to the committee for inspection and duplication, in fact, up to the date of the Administrator's appearance, December 2, 1982, this had not been the case.

As noted above, the Administrator herself advised the Subcommittee on December 2, 1982, that the agency was still reviewing the vast majority of its enforcement files in an attempt to determine just which documents are, in their opinion, "enforcement sensitive", and therefore to be withheld from the Subcommittee.

Until the review of these files is completed and the sensitive documents are removed, any review of these files by the Subcommittee or its staff would obviously provide access to the information being withheld. Consequently, each time the Subcommittee or its staff sought access to the agency's enforcement files, with the exception of the Regional files on about 3 or 4 cases examined in New York and Boston on October 13-15, the agency's staff declined to make these files available, particularly those at EPA headquarters (Hearing transcript at 137, 139).

Also of concern to the Subcommittee is the EPA's and Justice Department's apparent intent to preclude the Subcommittee access not only to "open law enforcement investigative files," but from review of docu-ments in files of cases that have been settled or closed. In response to direct questioning about whether documents considered "enforcement sensitive" when a case was open, would be available in closed cases, EPA Enforcement Counsel, Michael Brown, advised: "Sir it would depend upon any of those documents (sic) were an ongoing instruction. For example, if there were involved in a case file an ongoing decision by the Administrator of an enforcement philosophy that would also pertain to ongoing cases, then that particular document would not." (Hearing transcript at 72.)

This statement makes clear that even closed and settled EPA cases might not be provided to the Committee. The qualification placed by Mr. Brown on even closed or settled cases further diminished the vitality of the Department of Justice claim that it sought to guard against disclosures which harm "live" cases.

Ironically, this is the very type of information required by the Subcommittee to fulfill its oversight mandate to "review and study, on a continuing basis, the application, administration, execution, and effectiveness of those laws . . . in order to determine whether such laws and the programs thereunder are being implemented and carried out in accordance with the intent of the Congress . . . ", (H.R. Rule X, cl. 2(b)(1), Rules of the House of Representatives.)

Yet, as noted previously, the Subcommittee's interests and concerns must of necessity not be limited to "enforcement philoso-

forcement of EPA laws and regulations will not be made available to Congressional committees without first being screened by me or my designated representatives." (Emphasis added.) Included in his instructions were directives that even materials on closed cases be screened to assure that so-called "enforcement sensitive" documents would be withheld. (Appendix D.)

<sup>&</sup>lt;sup>5</sup> In Flaxner, the contemnor claimed a variance between the subpoena, which was directed to the "United States Professional Workers of America" and the indictment which alleged refusal to produce records of the "United Public Workers of America." The court rejected this argument, particularly because it was the witness who had called attention to the error. 235 F.2d at 826.

phies." It must seek to examine the adequacy of existing laws and the agency's efforts to make use of those laws, and to execute its Congressional mandates and responsibilities. It must seek to determine whether there are trends, nationally, that establish whether a law is being administered evenly and appropriately, and whether the circumstances that may cause for exceptions are reasonable and justified.

In short, the Subcommittee must be able to examine how and why the agency is making its decisions to enforce, or not to enforce, to litigate or not to litigate, to settle or not settle with some, or all of the parties that may be involved in the various Superfund cases. It must seek to establish just what is, and possibly more importantly, what is not being considered in the making of those decisions. Finally, it must asses whether there is a need for changes in existing legislation, or a need for new laws.

Following the testimony of the EPA Administrator and those accompanying her, and after further questioning of the Subcommittee's staff, the Subcommittee approved, in a 9 to 2 vote, the following resolution:

"Be it resolved. That the subcommittee finds Anne M. Gorsuch, Administrator, U.S. Environmental Protection Agency, in contempt for failure to comply with the subpoena ordered by this subcommittee and dated November 16, 1982, and the facts of this failure be reported by the Chairman of the Subcommittee on Investigations and Oversight to the Committee on Public Works and Transportation for such action as that Committee deems appropriate.'

### Attempt to negotiate

On December 8, 1982, a meeting was held with Subcommittee Chairman Levitas and various Administration officials, specifically, Robert Perry, EPA General Counsel; Theo-dore B. Olson, Assistant Attorney General, Office of Legal Counsel, DOJ; and Robert A. McConnell, Assistant Attorney General, Office of Legislative Affairs, DOJ. A number of Subcommittee and full Committee staff were also in attendance.

It was the Committee's understanding that the meeting had been requested by DOJ for the purpose of resolving the impasse which existed between the Subcommittee and the Administration.

For whatever reasons, the DOJ officials stated that they had not in fact requested the meeting and that, therefore, they had not come prepared to make "an offer."

Chairman Levitas, after restating the events to date and noting particularly the original understanding of the Subcommittee, proposed the following solution:

1. Subcommittee staff would be permitted to have access to all EPA documents relative to the 160 hazardous waste sites at issue.

2. Subcommittee staff would have the unrestricted right to examine the EPA documents and determine what documents it wished to have copied and produced for further staff work or made available to the

Subcommittee

3. EPA and/or Justice Department enforcement officials would then examine the documents which the Subcommittee staff designated for copying and designate those documents which were considered by the Executive Branch to be sufficiently sensitive to an open enforcement proceeding. Copies of those documents would be made and transferred to EPA headquarters in Washington but would not be provided to the Subcommittee. Copies of all the other documents designated by the Subcommittee staff would be furnished to the Subcommit-

4. Members of the Subcommittee and staff members would be permitted to examine the particularly sensitive documents at EPA headquarters in Washington under Executive Session Rules so that the documents would not be physically turned over to the Subcommittee and would not therefore have to be made available to every member of the House of Representatives pursuant to the Rules of the House of Representatives.

5. If the Subcommittee thereafter determined that it needed to have copies of any of the particularly sensitive documents, it would then have the right to pursue efforts to obtain copies of those documents through the mechanism of a subpoena.

6. Members of the Subcommittee and the staff would treat the information contained in the enforcement sensitive documents as confidential, recognizing the Subcommittee's right to utilize the information in any way which it found to be proper and appro-

Per discussion, the Administration officials noted the Chairman's proposal and

promised to get back to him on it The next day, December 9, 1982, a letter was sent to the Chairman from Robert A. McConnell, Assistant Attorney General. That letter (Appendix N) rejected the Chairman's proposal for the following reasons: under it, DOJ argued, it would be extraordinarily difficult to withhold access to a particular document to any committee or subcommittee of Congress if such access were made available to one Subcommittee and its staff; and, the proposal contemplates the Executive would part with control over the information in the sensitive enforcement documents. (Emphasis added).

The letter also included a counter-propos-

al, as follows:

1. The Subcommittee staff would be given access to all EPA enforcement files relative to the 160 hazardous waste sites in which you have an interest. Those files would remain where they are now, either at EPA headquarters or at the regional offices, respectively. Staff members would give notice, in advance, of which files were going to be examined so that EPA officials could initially examine the files to isolate those documents which were particularly sensitive from an enforcement standpoint. Those documents would be removed from the files and the remaining balance of the EPA enforcement files would be made available to Subcommittee staff and ultimately to the Subcommittee, subject to some appropriate understanding regarding confidential treatment with respect to certain materials in

those files. After examining the remaining files and after having been advised what documents had been set aside from the files, and after a briefing on the general nature of the contents of such withheld materials, staff could determine whether it was, in fact, necessary, in their judgment, to examine those files

2. Those withheld documents considered sensitive would then be analyzed by at least four persons two in EPA and two in the Land and Natural Resources Division of the Department of Justice. One person in EPA and one of the Justice Department individuals involved in this process would be professional, career attorneys engaged in the EPA enforcement process and, at Justice, in that section of the Department responsible for enforcement of CERCLA. In addition, one EPA official and one Justice Department official responsible for examining the withheld documents would be persons holding policy level positions. The Justice Department official would be a Deputy Assistant Attorney General. If those four individuals concurred that a particular document was sufficiently sensitive that its release would adversely affect the ability of the Executive to enforce the law, that document would be considered for withholding by the Executive Branch. Thereafter, those documents would actually be withheld only if the conclusions regarding their sensitivity were concurred in by an additional member of the Department of Justice in the Office of Legal Counsel and by an attorney in the Office of Counsel to the President.

'3. If the Subcommittee and its staff disagreed with the Executive Branch's position concerning the need for confidential treatment of the document in question or if it had additional reasons for why the document should be produced, those conclusions and those reasons would be articulated to the Executive Branch and the document in question would be reviewed again with those additional considerations in mind.

"4. Only if the foregoing process did not lead to a resolution of the dispute with respect to the document in question would it be necessary to proceed further. At that point if the Subcommittee was not satisfied with the good faith and the legitimacy of the position of the Executive Branch, the Subcommittee would retain all rights that it presently has to pursue all lawful efforts to obtain the document in question."

This counter-proposal was rejected since it was determined to be based on the premise that the Executive Branch has the right, through unilateral determination, to withhold any documents and information it so chooses from the Legislative Branch.

The kind of intricate and involved procedural safeguards which the DOJ proposal would have imposed on congressional access are, in the view of the Committee, more appropriate for highly sensitive national security documents, if at all, but totally unnecessary for the information sought primarily from civil enforcement files routinely developed within EPA

For the record, the counter-proposal was received in the early evening of December 9, the night before the full Committee consideration of the issue.

Full committee consideration of the issue

On December 10, 1982, the Committee on Public Works and Transportation, by a vote of 28 to 11, with five Members voting present, adopted the following resolution, offered by Congressman Elliott H. Levitas, recommending to the House of Representa-

The Administrator noted, in her testimony before the Subcommittee, that production of the volume of documents sought by the subpoena would involve significant copying and personnel costs but specifically declined to contest the Sub-committee's subpoena on this ground. In fact, Mrs. Gorsuch stated that "Although I personally have grave doubts about the wisdom and the cost of requiring EPA to deliver such a volume of paper, fol-lowing the direction of the President to cooperate with Congress wherever possible, the Agency is pre-pared to produce the majority of these documents as soon as possible." (Hearing at 56.) It is thus obvi-ous that while the Administrator has questioned the Subcommittee's "wisdom" in seeking a large number of documents she has not contested the Subcommittee's right to do so and has not raised the burden of complying with the subpoena as an excuse for her non-compliance.

tives that Anne M. Gorsuch, Administrator, U.S. Environmental Protection Agency, be

cited for contempt of Congress:

"Resolved, That the Committee on Public Works and Transportation report and refer refusal of Anne M. Gorsuch, Administrator, United States Environmental Protection Agency, to comply with the subpoena dated November 16, 1982, issued by the Subcommittee on Investigations and Oversight, together with all facts in connection therewith, to the House of Representatives with the recommendation that Administrator Gorsuch be cited for contempt of the House of Representatives to the end that she may be proceeded against in a manner and form provided by law."

Prior to taking this action, the Committee

Chairman noted the following:

"It is clear that the documents which the subcommittee seeks are essential to its full operation as a subcommittee in evaluating program that is under the basic jurisdiction of this committee; a program whose policy has been established by congressional action and enacted into law by the President; and a program which clearly mandates an agency to carry out the congressional policy.

to carry out the congressional policy.

"The issue here simply is whether the legislative body which passes legislation can see to it that the legislation is properly implemented and enforced as conceived. The Environmental Protection Agency has failed to comply with this mandate of the Congress and the Constitution of the United States. It has failed to turn over the essential documents that are needed for the committee and under the guise of executive privilege has determined unto itself that these documents cannot be made available to the responsible committee or subcommittee of the Congress." (Committee transcript at 5.)

# IV. AUTHORITY TO CONDUCT OVERSIGHT

The authority to conduct oversight as part of its lawmaking function is inherent in the legislative powers vested in the Congress by Article I of the Constitution. In fact, over the years, a number of Supreme court cases have not only firmly established legislative oversight as an appropriate and necessary function, but have generally interpreted the authority to be extremely broad and to include the conduct of investigations and inquiries of how government agencies are carrying out existing laws, and to search out and disclose corruption, waste and inefficiencies. (See H. Report No. 97-898, at 11, September 30, 1982).

Rules X and XI of the Standing Rules of the House of Representatives, as amended, and Rule IX of the Rules of the Committee on Public Works and Transportation (Feb. 19, 1981) mandate the authority of the Subcommittee on Investigations and Oversight to conduct legislative oversight. Pursuant to

these Rules:

'The Subcommittee on Investigations and Oversight and the appropriate subcommittee with legislative authority shall cooperatively review and study, on a continuing basis, the application, administration, execution, and effectiveness of those laws, or parts of laws, the subject matter of which is within the jurisdiction of the committe, and the organization and operation of the Federal agencies and entities having responsibilites in or for the administration and execution thereof, in order to determine whether such laws and the programs thereunder are being implemented and carried out in accordance with the intent of the Congress and whether such programs should be continued, curtailed, or eliminated. In addition, the Subcommittee on Investigations and Oversight and the appropriate subcommittee with legislative authority shall cooperatively review and study any conditions or circumstances which may indicate the necessity or desirability of enacting new or additional legislation within the jurisdiction of the committee (whether or not any bill or resolution has been introduced with respect thereto), and shall on a continuing basis undertake future research and forecasting on matters within the jurisdiction of the committee."

In addition to this general authority, the 1980 Superfund law, under section

104(e)(2)(D), also provides:

"Notwithstanding any limitation contained in this section or any other provision of law, all information reported to or otherwise obtained by the President (or any representative of the President) under this Act shall be made available, upon written request of any duly authorized committee of Congress to such committee."

As the oversight arm of the Committee on Public Works and Transportation, the Subcommittee's jurisdiction is concurrent with that of the parent Committee, as enumerated in clause 1(p) of Rule X of the Rules of the House which includes jurisdiction on matters pertaining to pollution of navigable waters and matters of transportation, including transportation of hazardous materi-

On the basis of that authority, various bills, both during and after formulation of the Superfund law, which provide for establishment of certain priorities in the disposal or treatment of hazardous waste; for liability, compensation, cleanup, and emergency response for hazardous substances released into the environment; and for cleanup of inactive hazardous waste disposal sites, have been referred to the Committee, at the least on a joint referral basis, for its consideration

### V. House Rules Requirements

Committee action and vote

Pursuant to clause 2(1)(2)(A), (B) of Rule XI, the majority of the Committee having been present, the resolution was reported by a vote of 28 ayes to 11 nays, with five Members voting present.

Compliance with rule XI, clause 2(d)(3)

(1) With reference to clause 2(1)(3)(A) of Rule XI of the Rules of the House of Representatives, a separate hearing was held on the subject matter of this resolution on December 2, 1982, by the Subcommittee on In-

vestigations and Oversight.

(2) With respect to clause 2(1)(3)(B) of Rule XI (requiring the report of any committee on a measure to include a statement required by section 308(a) of the Congressional Budget Act of 1974, if the measure provides new budget authority or new or increased tax expenditures); and clause 2(1)(3)(C) of Rule XI (requiring a cost estimate and comparison prepared by the Director of the Congressional Budget Office under section 403 of the Budget Act); neither is applicable as the measure reported by the Committee is neither a bill nor joint resolution.

(3) With respect to clause 2(1)(3)(D) of Rule XI, the Committee has not received a summary of the oversight findings and recommendations made by the Committee on Government Operations under clause 4(c)(2) of Rule X.

Inflationary impact statement

With respect to clause 2(1)(4) of Rule XI (the inflationary impact on prices and costs

in the operation of the national economy), no statement is required as the measure reported by the Committee is neither a bill nor joint resolution.

Changes in existing law

Clause 3 of Rule XIII (changes in existing law) is not applicable as the measure reported by the Committee is neither a bill nor a joint resolution.

Mr. HOWARD (during the reading). Mr. Speaker, I ask unanimous consent that the report be considered as read and printed in the Record.

The SPEAKER pro tempore. Is there objection to the request of the

gentleman from New Jersey?

Mr. CLAUSEN. Mr. Speaker, reserving the right to object, I want to get a clarification as to the amount of time that is going to be allotted to each side

for the purpose of the debate.

Mr. HOWARD. Mr. Speaker, if the gentleman will yield, I say to the gentleman that after this unanimous-consent request is disposed of, I plan to offer the privileged resolution, as the gentleman is well aware, and ask for its immediate consideration, and then, by agreement, I will ask unanimous consent that the debate time be extended to two hours of debate. I do this by agreement, because we have an agreement from the other side that there will not be an attempt by anyone on the other side to utilize parliamentary inquiries, motions to postpone, and such, and that, we feel, is in the best interest of this debate.

The time is to be controlled on our side. We naturally would intend to provide half of the time to proponents of the resolution and half of the time to opponents. However, there are many Members who wish to speak who perhaps have not decided how they will vote, so to the best of our ability, the time will be divided evenly.

Mr. CLAUSEN. Mr. Speaker, further reserving the right to object, do I understand that the gentleman from New Jersey will control half of the time, and the gentleman from California will control half of the time?

Mr. HOWARD. Mr. Speaker, all of the time will be controlled here, but that will be for the purpose of yielding to both sides, I say to the gentleman.

Mr. CLAUSEN. Mr. Speaker, further reserving the right to object, it was my understanding that the time would be divided equally under the agreement that we had.

Mr. HOWARD. Mr. Speaker, if the gentleman will yield, that is what we intend to do, but technically it will be controlled by this side. I am sure the gentleman knows that we will have no problem with that.

Mr. CLAUSEN. Mr. Speaker, will the gentleman yield me half of the time so that I can yield to some of my Members? That was the agreement we had.

Mr. HOWARD. I will, of course, also make a unanimous-consent request that all of the time, including that half of the time be yielded to the gentleman from California, for debate purposes only.

Mr. CLAUSEN. That is fine.

Mr. HOWARD. That is what I intend to do if I am permitted to do

Mr. CLAUSEN. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. there objection to the request of the gentleman from New Jersey?

There was no objection.

Mr. HOWARD. Mr. Speaker, by direction of the Committee on Public Works and Transportation, I offer a privileged resolution (H. Res. 632) and ask for its immediate consideration.

The Clerk read the resolution, as fol-

#### H. RES. 632

Resolved, That the Speaker of the House of Representatives certify the report of the Committee on Public Works and Transportation as to the contumacious conduct of Anne M. Gorsuch, as Administrator, United States Environmental Protection Agency, in failing and refusing to furnish certain documents in compliance with a subpena duces tecum of a duly constituted subcommittee of said committee served upon Anne M. Gorsuch, as Administrator, United States Environmental Protection Agency, and as ordered by the subcommittee, together with all of the facts in connection therewith, under seal of the House of Representatives, to the United States attorney for the District of Columbia, to the end tht Anne M. Gorsuch, as Administrator, United States Environmental Protection Agency, may be proceeded against in the manner and form provided by law.

The SPEAKER pro tempore. The gentleman from New Jersey (Mr. Howard ) is recognized for 1 hour.

Mr. HOWARD. Mr. Speaker, I ask unanimous consent that the time be extended to 2 hours.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

The SPEAKER pro tempore. The gentleman from New Jersey (Mr. Howard) is recognized for 2 hours.

Mr. HOWARD. Mr. Speaker, let me state that all the time yielded in this debate will be for debate purposes only, and I yield to the gentleman from California (Mr. CLAUSEN) 1 hour of that time, which he may dispense with for purposes of debate only, pending which I yield myself such time as I may consume.

Mr. Speaker, it is with deep regret that the Committee on Public Works and Transportation brings this privileged resolution to the floor. We have tried in every way to avoid this confrontation. We have been at it since September, and we are still hoping that an agreement might be met before the close of this debate today.

We are here for one basic reason, and that is to protect the rights of Congress and to assure that this Congress may meet its responsibilities

we represent.

The American people are taxed to support our Government. That money is used by Congress so that body may in its wisdom enact policy and programs for the good of our Nation, and we delegate the responsibility for carring out the congressional mandate to the administration. This House and the committees of the House are constantly reminded that we must insist that each committee have a nonlegislative investigative subcommittee to oversee the legislation that we have brought to the Congress and which has become law and to see to it that the money we have collected from the people is utilized with the intent and for the purpose that Congress set forth in enacting legislation.

A very, very important health matter for this Nation, the Superfund, was enacted into law. Millions of dollars have been appropriated for this program. The Subcommittee on Investigation of the full Committee on Public Works and Transportation is attempting to do its job to meet its responsibilities to all of us and all the people we represent, to see that the toxic wastes are cleared up and wrongdoers are prosecuted when necessary.

This Congress, all of us on both sides of the aisle, and all of our constituents have been thwarted by the administration. They have been telling us that we have no right to documents that they are using in order to implement the law that we passed and delegated the operation to them. So we have a basic fundamental question before us. Are we an equal branch of Government? Are we responsible for our actions in enacting legislation? The only way that we can be sure that our committee can report to all the Members in behalf of the people that the job is being done is if we have the information we need.

### □ 1900

This has been going on since September. We have tried to negotiate. Nothing has been rushed through.

The subcommittee made a determination. Your full committee made a determination.

We still attempted to work something out. We were not able to do it and that is why we are here at this

We cannot wait 10 or 15 years to see how this might work out or might not work out. The clock is running out. The clock is running out not only on the superfund which expires in 1985 and we have to make a decision on whether it is worthwhile to continue it or not. Time is also running out on the lives of the American people, lives which are threatened by this horrible toxic waste problem in the Nation.

If we should decide to act to shore up this Superfund enforcement we

under the Constitution to the people must act expeditiously and the unnecessary roadblocks that have been placed in the way of all of us on both sides of the aisle must be dealt with.

I emphasize this is not a partisan matter. This is a matter which will enable us to do the job which has been entrusted to us by the leadership in the Congress for our committee and by all of the people we represent. It is their money and it is their lives. We have to protect both.

I urge the adoption of this resolu-

Mr. CLAUSEN. Mr. Speaker, I yield 20 minutes to the distinguished gentleman from New York (Mr. Solomon).

Mr. SOLOMON. Mr. Speaker, at the outset Mr. Speaker, let me say that those of us that are opposed to this contempt situation do so because the last thing we want to do is to impede the programs of environmental cleanup through superfund or jeopardize any pending litigation now before the courts concerning the enforcement of this law.

While we support the concept of requiring the EPA to produce documents necessary for the subcommittee's investigation, we cannot support the committee's hasty and ill-conceived action in recommending that Administrator Gorsuch be found in contempt of Congress for failing to produce all of the documents subpensed by the subcommittee on November 22, 1982.

Our principal reason for not supporting the committee's recommendation is that it is not the product of careful, independent congressional deliberation. Instead, the resolution was called up with only 2 days notice to the full committee. This procedure did not give members a chance to adequately study the issues or to fully explore options for resolving the dispute.

We believe that this unfortunate confrontation was unnecessary and could have been avoided. We had presumed all along that the committee was interested in obtaining the documents in question, rather than to find Administrator Gorsuch in contempt of Congress.

In determining the wisdom and propriety of citing the EPA Administrator for contempt, we believe that a number of factors should be considered.

First. The power of Congress to find someone in contempt is an extraordinary power, and should not be used without clear reason to do so.

It is important to understand the full effect of citing the EPA Administrator for contempt. If the House cites Mrs. Gorsuch for contempt, the appropriate U.S. attorney is required by statute, title 2, United States Code, section 194, to bring the matter before the grand jury for its action. Ultimately, Mrs. Gorsuch could be subject to a criminal fine of not less than \$100 nor

more than \$1,000 and imprisonment for not less than 1 month nor more than 12 months.

This is an extremely serious matter, and one which should have received careful consideration. Yet the full committee was given only 2 days notice of the meeting. This simply was not sufficient time for the members of the full committee who are not on the Investigations and Oversight Subcommittee to review the facts of this case, or to research the extremely complex issues and precedents involved.

Furthermore, the full committee meeting itself was brief, and efforts to offer alternatives or to discuss the implications of the proposed actions were

given short shrift.

In fact, the ranking minority member of the committee was not even allowed to finish his opening statement. In addition, a motion to postpone the final vote until Wednesday, December 15, so that members could have time to study the issues, was rejected solely along party line.

Second. The committee's action fails to recognize that EPA has agreed to turn over to the subcommittee a substantial amount of information. Administrator Gorsuch agreed to provide approximately three-quarters of a million pages of enforcement file documents for the Investigations and Oversight Subcommittee, relative to 160 hazardous waste sites, including all technical and factual data and much confidential material. Neither she nor any other official of the administration has contested the subcommittee's authority to request and receive information relative to its oversight and investigatory task.

Third. The committee's action fails to recognize that the President directed Mrs. Gorsuch to withhold the document. With respect to the documents at issue, the Administrator has been specifically directed, by order of the President of the United States, dated November 30, 1982, that "sensitive documents found in open law enforcement files should not be made available to Congress" on the grounds that" dissemination of such documents outside the executive branch would impair \* \* \* (the President's) solemn responsibility to enforce the

law."

The President's decision and order to the Administrator of the Environmental Protection Agency was based upon the legal opinion of the highest ranking legal officer of the U.S. Government, an opinion and order which the Administrator has no standing to reject.

Fourth. The committee did not exhaust all means or resolving the dispute before resorting to the contempt citation. We are convinced that this dispute could have been avoided if the committee has not rushed into the contempt proceeding but instead had

taken the time to consider all alternative ways to resolve the problem. This can be best illustrated by a few examples.

Prior to the full committee meeting, White House officials asked to meet with the full committee chairman and ranking minority member. The meeting was not held.

White House officials offered to show the chairman and ranking minority member a sampling of the withheld documents so that they could better understand the administration's position on this matter. This overture was rejected.

A compromise proposal was offered which would have given the U.S. District Court in the District of Columbia the jurisdiction to determine the validity of the subcommittee's subpena.

White House officials indicated that the administration would not only support this legislation but would work in the House and Senate to enact it during the lameduck session. This

proposal was rejected.

The Administrator, in responding to a compromise proposal made by the subcommittee chairman, offered a counterproposal in a letter dated December 9, 1982. No formal response was made to the administration's proposal prior to the full committee meeting to cite Mrs. Gorsuch for contempt.

Fifth. The legal issues involved in this matter are extremely complex and should have been analyzed more carefully. Members of the committee did not have sufficient time, in our view, to review the competing arguments and to form an independent judgment on the merits of the issue.

Stated simply, the subcommittee chairman seems to be of the view that the subcommittee has a right to all of EPA's records and that staff should be given complete access to EPA's files, including the right to copy any documents it wants. It is alleged that the legal memorandum dated December 8, 1982 from the General Counsel to the clerk supports this position. A copy of this memorandum is included in the majority report.

The administration, on the other hand, disputes that Congress has an automatic right to each and every document in EPA's files. The Attorney General of the United States has taken the position that it is not in the public interest for sensitive documents found in open law enforcement files to be given to Congress or its committees except in extraordinary circumstances.

The cases construing executive privilege are very limited and no controlling judicial precedent exists governing attempts by a committee of Congress to obtain materials from the executive branch. That is, the Supreme Court has yet to be called upon to resolve the question of the respective rights of the executive and legislative branches in regard to a claim of privilege as a defense to compulsory legislative process for documents residing within the executive branch.

In our view, these conflicting legal opinions should have been more carefully analyzed before the committee proceeded to cite an executive branch official for contempt.

Sixth. The committee's action fails to adequately consider EPA's contention that ongoing enforcement cases might be jeopardized. While we are in agreement that the Congress has a legitimate right to information which it needs to carry out its oversight and investigative responsibilities, we are concerned over EPA's allegation that disclosure of certain files might jeopardize ongoing enforcement actions. The issue is certain documents in open law enforcement files. They are at the stage where EPA and/or the Justice Department are developing cases of prosecution, or are actually in the enforcement process by U.S. attorneys. What the committee is saying-by going forward with the contempt resolution-is that these documents, despite their sensitive nature and despite the fact that criminal prosecutions could be jeopardized, must be made available to the staff of this committee, the members of this committee and-by the rules of the House-to all House Members. We are not sure that we are prepared to go this far at this time. The issue is far more complex that it seems on the surface, and we have not had sufficient time nor information to form a judgment. We do believe that the committee should have availed itself of the administration's offer to look at some of the documents so that we could better evaluate EPA's claim with respect to these documents.

Seventh. The committee's action fails to recognize certain potential problems with respect to enforcement of the subpena issues on November 22, 1982. If the House cites Mrs. Gorsuch for contempt, the matter will be turned over to the U.S. Attorney for criminal prosecution. It is, therefore, relevant to consider potential problems that might come up with respect to the subpena.

First, the subpena is extremely broad, and this could become an important factor in a criminal prosecution for failure to comply. The subpena requests that virtually all documents created since December 11, 1980, pertaining to 160 hazardous waste sites be turned over to the subcommittee.

EPA has estimated that this would require the location, segregation, duplication and shipping of more than 787,000 pages of documents.

Second. EPA has stated that the subpena is technically defective. Since the Agency has so far only issued an interim priority list, not under section 105(8)(b), the subpena does not apply

to any documents in the possession or custody of EPA. No sites have been listed under section 105(8)(b).

Third. We are concerned that the committee has not yet reviewed the material which Mrs. Gorsuch was prepared to turn over to the subcommittee. According to EPA, she withheld only a small fraction of the total documents demanded by the subcommittee; moreover, no factual or technical materials are being withheld from Congress-only enforcement strategy such as analyses of strengths and weaknesses of the Government's case. It seems to us that the committee's case would be much stronger if we reviewed the materials which EPA did provide us before we conclude that there is a compelling need for us to have access to the remaining documents.

In conclusion, we have serious reservations about the wisdom and propriety of the committee's recommendation to cite the Administrator of the Environmental Protection Agency, Anne M. Gorsuch, for contempt of Congress. We are, therefore, unable to support the committee's recommendation at

Our principal reason for not supporting the contempt citation is that we feel that this matter was rushed through the committee without adequate time to study the complex legal and factual issues involved. Stated simply, a number of us feel that we do not have sufficient information to make a reasoned decision.

We also believe that this confrontation was unnecessary and could have been avoided had more time been taken at the full committee to evaluate various alternatives and options.

And finally, we note that this approach, that is, bringing criminal charges against Mrs. Gorsuch, will not necessarily result in the documents being made available to the committee. We believe that the committee's focus should have been to obtain the documents in question, rather than concentration on citing Administrator Gorsuch in contempt of Congress.

Consider these facts:

The Public Works Committee actions were factually, procedurally, and legally flawed.

The subpena was improperly drawn. As drawn, the subpena refers to hazardous waste sites designated under CERCLA [Superfund] section 105(8)(B). Although EPA has designated an "interim priority list" of sites, they were not designated under section 105(8)(B). Therefore, the subpena does not refer to any documents. Further, Chairman Levitas strongly opposed any attempt in subcommittee or committee to issue another subpena or to perfect the one already issued.

Because the subpena does not refer to any documents the Administrator is, in effect, in compliance.

The contempt resolution passed by the full committee differed legally from the one passed by the subcommittee.

The resolution of contempt passed by the subcommittee cited the Administrator with contempt for "failure" to produce the subpensed documents. The resolution passed by the full Public Works and Transportation Committee cited the Administrator for "refusal" to produce the documents. This citation of refusal is what stands before the House.

The term "refusal" means a willful intent not to comply. Normally, a legal determination of a refusal must be made by a court of law, not by a com-

mittee of Congress.

The committee made legal judgments without either due process or a full hearing of all evidence. Not only was there no testimony before the full committee, but the subcommittee proceedings denied certain witnesses the opportunity to expand or refute testimony by the subcommittee staff.

Further, without further testimony or any public discussion, the full committee took the subcommittee's finding of a failure to comply and made its own additional finding that the Administrator refused to comply. The Administrator had already made available to the committee the vast majority of documents and had offered the oversight subcommittee four boxes of documents.

The only refusal was the subcommittee's refusal to accept those documents.

Therefore, the full Public Works and Transportation Committee: First, is basing its action on an inoperative subpena; second, has acted without hearing all the evidence; third, has made an unsupported legal judgment of refusal; and fourth, wants the full House of Representatives to overlook the committee's failures and find the Administrator in contempt.

As we stand here, Mr. Speaker, there are six major environmental statutes which have expired:

The Noise Control Act expired Sep-

tember 30, 1979. The Clean Air Act expired Septem-

ber 30, 1981. The Clean Water Act expired Sep-

tember 30, 1982. FIFRA-Federal Insecticide, Fungi-

cide, and Rodenticide Act-expired September 30, 1981.
The Solid Waste Act—RCRA—ex-

pired September 30, 1982. The Safe Drinking Water Act ex-

pired September 30, 1982. Ocean Dumping Act expired Sep-

tember 30, 1982. We have not completed action on any of these. We have not even started action in any real sense on the Clean Water Act, and the Energy and Commerce Committee was unable to reach

a consensus on the Clean Air Act.

That's some environmental record this Congress has \* \* \* and here we stand, ready to pass the buck and blame someone else for our own failures.

But we do seem to be able to cite the EPA Administrator for contempt, and able to do so in but a few short weeks.

Will this contempt resolution pass the Clean Air Act?

Will it pass a Clean Water Act?

Will it resolve the difficulties stalling FIFRA?

Will it encourage the other body to act on RCRA?

We all know the answers. Of course, this contempt resolution won't solve any real environmental problems.

It also won't solve the questions of what constitutes executive privilege.

That is a question which the courts and the Congress have been unable to resolve fully in 200 years, and contrary to all the clearcut assertions, even if this case goes all the way to the Supreme Court, it may be years before an opinion is rendered.

So why are we voting on this?

All the published statements say that the question is not personal, that the supporters of the resolution do not have anything against the Administrator of the EPA.

Well \* \* \* if they don't have anything against the Administrator, if this resolution won't solve the environmental problems we face, and if it won't resolve the definitions of executive privilege, why should we support

The answer is-we shouldn't.

Mr. Speaker, one of the main reasons we find ourselves debating this matter today stems from an unfortunate but typical circumstance in most bureaucracies \* \* \* a breakdown in communication and cooperation between the staffs of EPA and the Public Works Subcommittee, resulting in misunderstandings, accusations, and ruffled feathers, to a point that negotiations completely fell apart between the staffs. It was at this point that members of the subcommittee, Mrs. Gorsuch, the Justice Department and the President's counsel became directly involved in a series of meetings resulting in a number of proposals and counterproposals that seemed about to succeed to the satisfaction of everyone \* \* \* when suddenly something hap-pened \* \* \* the subcommittee halted negotiations and with unbelievable speed, rushed the contempt citation through the committee, and here we are now on the House floor with no reasonable explanation as to what happened.

Mr. Speaker, we are faced with two alternatives:

First. To vote the contempt charge, which will accomplish nothing except to disrupt the EPA, or we can vote to lay this matter on the table and immediately pass the proposed legislation that would confer jurisdiction of the matter to the District of Columbia District Court to determine the executive privilege question as it pertains to the withheld enforcement sensitive documents. This legislation has the support of the President of the United States and he has assured us that he will work for its passage in the Senate and sign the bill. This will get results. And/or we can send the matter back to the subcommittee to continue their negotiations which I think will also bring results.

What will not get results is a vote to cite Mrs. Gorsuch.

Mr. Speaker, I am not a lawyer and I am not as eloquent as many distinguished Members of this House on both sides of the aisle, but, Mr. Speaker, like you, I have tremendous respect for this institution and its Members and, like you, I am so very proud to be a part of it \* \* \*

And the one thing that you and I and all of the Members do not want to do is abuse the powers granted to us as Members of this House \* \* \* we owe that much to this institution.

Let us find a better way.

And you, Mr. Speaker, as our leader and as one of the most powerful and respected men in America, can help us find that better way—for the sake of this institution—please do.

# □ 1920

Mr. HOWARD. Mr. Speaker, I yield such time as he may consume to the chairman of the Subcommittee on Investigations and Oversight, the gentleman from Georgia (Mr. Levitas).

Mr. SYNAR. Mr. Speaker, will the gentleman yield?

Mr. LEVITAS. I yield to the gentleman from Oklahoma.

Mr. SYNAR. Mr. Speaker, I rise in support of the resolution before us today citing the Administrator of the Environmental Protection Agency for

contempt of Congress.

As my colleagues know, the Energy and Commerce Subcommittee on Oversight and Investigations, on which I sit, voted this past Tuesday to cite Mrs. Gorsuch for contempt of Congress for refusal to release certain documents relative to three Superfund sites. For the most part, these are the same documents which EPA is refusing to release to the House Public Works Committee, which has brought forward this resolution of contempt.

I want to review for my colleagues a couple of facts which our own subcommittee has discovered, which point out how patently ludicrous the Adminis-

tration's position is.

As you all know, the Administration has asserted that this new category of so-called "enforcement sensitive" material cannot be released to Congress, for fear that we will somehow allow those documents to get into the hands of potential defendants. In simple

terms, the administration claims these particular documents are so sensitive, that under no circumstances can persons outside the executive branch—Congress most specifically—have these documents.

But there seem to be some exceptions which apply.

For instance, in testimony before our subcommittee this past Tuesday, Mrs. Gorsuch stated that the documents being withheld from Congress are available to outside contractors and, in fact may routinely be handled by secretaries and Kelly Girls.

Documents released to the subcommittee also show that since June, EPA itself has had reason to believe that at least two trade publications are in possession of one sensitive legal opinion memorandum related to mining sites—but that document was withheld from Congress. In fact, an EPA document released to our subcommittee states that an article in one of the trade pub-

lications suggests that the memo is in "wide distribution."

Other documents provided to the subcommittee indicate that EPA itself has released some of these enforcement-sensitive documents, upon request, to certain persons who are not within the executive branch, and who are not outside contractors.

Despite all of this, the administration is asserting that the documents are too sensitive to be released to Congress under any circumstances. Yet, at the same time, they freely admit that most of the documents are available to, and handled by, contractors.

It has become increasingly clear to me that this administration's claim that this new category of enforcement-sensitive documents can rightly or legally be withheld from Congress is, indeed, ludicrous.

This is not a political issue—it is an institutional issue. If ever we were serious about protecting the constitutional rights of this institution, now is the time.

If we vote down this resolution, we will effectively be letting this administration—and all future administrations—know that we will allow them to pick and choose what information will be provided to Congress. More important, we will be allowing any executive branch agency to throw the enforcement-sensitive cloak over virtually any information. We must not allow that to happen.

I strongly urge my colleagues to support the resolution before us today as a firm statement of our determination to protect the constitutional rights of this body.

Mr. LEVITAS. Mr. Speaker, I see there are two other gentlemen on their feet. I will be glad to yield to them if they would indulge me to make my opening remarks and then I will yield to the gentleman from Texas

and then to the gentleman from Missouri.

Mr. Speaker, I rise in support of this resolution, which originated in the Subcommittee on Investigations and Oversight of which I have the honor of being chairman.

This evening has been described by some as one of historic significance, and that may be. Certainly the issue before us is one of great gravity. This is not a partisan issue. This is an issue that deals with the Constitution of the United States and the prerogative of the Congress, a coequal branch of Government, to discharge one of its most important and solemn functions, that of oversight and assuring that the laws of this land are being implemented according to the way they were intended.

As far as the subject matter of the investigation that brought us to this point, I want to just take a moment to tell the Members just what we are engaged in. I can think of no other matter before us today that is more important to our Nation's quality of life and environment than the threat toxic chemical waste sites pose to the very health and well-being of the Nation's citizens and to one of our most valued natural resources, our water resources. These wastes are believed to be the cause of birth defects, cancer, and other chronic illnesses. Now there are reports from medical researchers that claim simply living in the area of one of these abandoned or illegal chemical dumps can jeopardize a person's health and threaten the very lives of our children.

Toxins from abandoned waste sites contaminate surface waters in many areas, making them unfit for drinking and for many recreational purposes. And where these wastes leak from the drums that contain them, drums that are often left to rust in fields or rot in the ground, they seep into the ground waters or run off into nearby streams, rivers, or lakes, making them unfit for use for years and perhaps decades.

The investigation initiated earlier this year by my Subcommittee on Investigations and Oversight has raised many questions about how the U.S. Environmental Protection Agency is executing the cleanup and enforcement provisions of the Superfund law that we enacted 2 years ago to address these very concerns. Our preliminary finding suggests that many hazardous waste sites are not being fully cleaned up, that chemical companies responsible for cleanup costs are not being held liable for their full share of the cleanup costs in every instance. That resource and staff deficiencies in the Environmental Protection Agency may be impeding the Agency's ability to follow up leads and obtain critical records and that the Superfund itself may be inadequate to address both

known and potential hazard waste sites and chemical spills. These are only some of the problem areas and concerns that we have already been able to identify and develop. But our ability fully to review and assess this program, to get at the hard information that is critical and necessary to make these determinations with certainty, has been blocked, obstructed, and delayed for months by the U.S. Environmental Protection Agency.

You have heard statements made that we have sought hundreds of thousands of documents. That is not the case. The fact of the matter is that there are only a very few documents that the committee actually needs in order to do its job, but when the door is slammed in your face and the file drawer closed, you have no way of knowing what documents are actually being sought. It is a total smokescreen and misrepresentation to say that 700,000 documents are being sought. That is not the case. We are talking about a very few. But the EPA has precluded us access to their files while they glean them of the very enforcement documents we must see, documents that may number in the hundreds by the time they are through with their sanitizing efforts.

Why are they doing this? What have

they got to hide?

The Attorney General and the Administrator have repeatedly asserted that our inquiry into this matter and our efforts to make mutually acceptable arrangements for our review and protection of confidential documents takes from the Executive its ability to take care "that the laws be faithfully executed."

My colleagues, Congress does not forego inquiry simply because it may produce information on Government strategies and weaknesses. The only way to correct either bad law or bad administration is to examine these

matters.

The position taken by EPA would mean that we in Congress would, in effect, diminish or destroy our own oversight power in passing laws, for once passed, their argument would have us believe that the administration of the laws we enact under the authority vested in Congress by article I of the Constitution would fall exclusively within the Executive's jurisdiction, to the exclusion of congressional oversight determination, sealing off from Congress an effective means for determining the sufficiency of existing law. This argument obviously falls of its own weight.

The power conferred by the Constitution under article II, section 3, to the President is primarily to enable the President simply to carry out the laws enacted by Congress. It neither expressly nor impliedly authorizes the President, the Environmental Protection Agency or any agency to withhold

documents essential to the evaluation of the administration of the laws passed by Congress, a coequal branch of the Government. This kind of slipshod consitutional construction, and the unsupported equivalency drawn between oversight on the one hand and interference with execution of laws on the other hand, cannot withstand scrutiny and must be rejected.

Let me turn to some of the comments made by the Member from the State of New York (Mr. Solomon). His basic contention has been that, somehow or other, the committee has rushed into the decision, and rushed into the action which is before the House tonight. Nothing could be further from the truth. The investigation that we are talking about was commenced in the early part of this year and has been ongoing ever since.

For a while, there was cooperation. But then the Environmental Protection Agency closed its files to our committee and its ability to do its job, After a great deal of effort a negotiated arrangement was made, but shortly after that arrangement was agreed to between myself, members of the minority, and the officials of the Environmental Protection Agency, they stopped even applying that arrangement as a means for access.

Therefore, on September 30, in executive session, so as to have no headline grabbing operation, the subcommittee voted to issue a subpena for those doc-

uments.

# □ 1930

That is when the decision was made that this Congress knew its right to get those documents and to assert that right. Let me say for the Members here that when that vote was taken, it was 11 to 0, 11 to 0.

Therefore, the people, who are now saying, "Did we have a right to get these documents or should we have done it?," were strangely silent when the issue was put. Thereafter, when the subpena was finally served in November of this year, there was plenty of notoriety given because rather than the information being made public by our subcommittee or committee that the subpena had been issued, it was leaked to the press by the Environmental Protection Agency itself.

When the hearing was finally held by the subcommittee and the Administrator of the Environmental Protection Agency and Assistant Attorney General appeared before our subcommittee, great lengths were taken to develop why we were not getting the information, and why the door was being shut in our face. The testimony revealed that we were not only being denied files with respect to ongoing investigations, to which we are also entitled if we are to stop the problem from happening, but we were told, my friends, that we could not even see

closed files on the settled cases. Those were being barred to the committee.

Now, the gentleman from New York suggests that somehow or other the committee should have provided some postponement of consideration of this matter to December 15, which was yesterday. Well, the whole game that has been played all along through this entire year-long investigation by the Environmental Protection Agency has been delay, put off, and stonewall.

This committee decided that enough was enough. The time for the American people, through its congressionally elected officials, to get the necessary information to do this vital inves-

tigation was at hand.

The gentleman from New York said that the White House requested a meeting with the ranking member and the chairman of the committee and that meeting was never held. Well, the fact of the matter is, the chairman of the committee told the members who had contacted him that if the White House wanted to have a meeting, they needed to meet with the chairman of the subcommittee, who was the person that had most of the information about the matter.

Indeed, a meeting was held in my office which the ranking member of the committee attended, a meeting that was called for by the Justice Department, and when the meeting began we asked, "What is your proposal?" That was before the contempt was voted.

Their answer was: "We have nothing to offer."

But, still going the next mile, at the suggestion of the gentleman from California, the ranking member, I, as chairman of the subcommittee, did make a proposal, did make an offer as to how we could resolve this problem so that the documents which were confidential would not become public in nature and would not even get into the custody and control of the Congress itself.

That proposal, my friends, was rejected, and the administration insisted once again that they, and they alone, were the determiner of what documents, what information this Congress had the right to have access to. Our proposals to compromise, to get the information, and to assure confidentiality was rejected.

As recently as today, this morning, I met with members of the leadership on the other side, with the chairman of the full committee and with representatives of the White House, again trying to come to some way to avoid this confrontation, and, within the last 2 hours, was advised that those proposals, once again submitted in good faith, had been rejected by the administration.

We have gone every mile of the way to avoid confrontration. I say to my colleagues that the very power and responsibility of this Congress to protect the American people through oversight and investigation will be crippled and destroyed if the contemptuous actions that have been taken in this case by officials of the administration are left unpunished.

That is why, for the integrity of this body, for the prerogatives of the House, and to uphold the constitutional balance, we must take this grave, regrettable step and vote the contempt resolution which the gentleman from

New Jersey has offered.

Mr. SKELTON. Mr. Speaker, will the gentleman yield?

Mr. LEVITAS. I yield to the gentleman from Missouri.

Mr. SKELTON. I thank the gentle-

man for yielding.

Mr. Speaker, I have a very serious question to put to the gentleman in the well. He will recall when the person to whom this is directed, Ms. Gorsuch, was before his committee and, of course, refused the request put to her by the committee, she was then, at that time, being advised by the Department of Justice, as the Attorney General or Assistant Attorney General. I belived he was actually there at the hearing.

Procedurally, I think this Congress finds itself with a problem because should we, as a Congress, vote a contempt citation, that contempt citation then goes to the U.S. attorney, and the U.S. attorney being a subsidiary of the very same Attorney General or Justice Department, on which side does the Department of Justice find itself? Where do we, as a Congress, find ourselves, because we are entitled, should this come to pass, to have the full strength of the Department of Justice presenting this issue to the grand jury and henceforth should there be a positive return from the grand jury, in a court of law.

I ask this question of the gentleman because it is of great concern to me and it should be of great concern to

every Member of this House.

Mr. LEVITAS. Let me respond to the gentleman as follows: First of all, the gentleman is correct that, upon the adoption of this resolution, the matter will be referred to the U.S. attorney for the District of Columbia for prosecution under the law.

The statute requires that the U.S. attorney present this matter to the grand jury and, while I know the gentleman has experience as a prosecutor and may have different views on this, I have got to believe that the U.S. attorney will obey the law conscientiously and diligently and do what is expected of him under the law.

That is my personal belief. I should feel very badly to believe otherwise. So I, first of all, tell the gentleman that I am satisfied in my own mind that that

will be done.

Second, when the Assistant Attorney General was before our committee, I asked him the question, because there was a concern, I said: "As you are aware, these proceedings," I am now reading from the transcript-

Mr. SKELTON. Was this not under oath?

Mr. LEVITAS. This is testimony under oath. I am reading from the transcript: "As you are aware," I said to Mr. Olson, the Assistant Attorney General, "these proceedings may, as a matter of law, hopefully not, but may lead to prosecution under the congressional contempt statute. I am trying to inquire whether it is the Department of Justice's position that you may furnish information to Mrs. Gorsuch notwithstanding the fact that later prosecution for contempt may result from these proceedings and that furnishing such representation will neither inhibit nor prevent the Department from carrying out its statutory responsibilities.'

Mr. Olson responded. He said: "This is not the appropriate time for the Attorney General or Department of Justice to make a determination as to who might represent an individual in a particular case or what particular case may be prosecuted under circumstances that have not yet developed."

Then I said to him: "Therefore, it is your position that the fact that you have advised Mrs. Gorsuch concerning this matter and your participation in these proceedings would not prevent the Justice Department from discharging its statutory responsibilities under the congressional contempt statute if that should, which we hope it will not, eventuate?'

Mr. Olson said: "We do not believe anything we have done to date or intend to do at this hearing would jeopardize the ability of the Attorney General to discharge his responsibilities under the Constitution and laws of the United States.'

Let me also say if they do not do their job, that itself becomes an impeachable offense and, of course, there is always the opportunity for Congress to use its inherent contempt powers and take direct action against someone who is contemptuous of the Congress. But the congressional contempt statute was specifically defined in order to be able to bring contempt action against executive department officials.

Mr. SKELTON. So the gentleman is satisfied with that answer?

Mr. LEVITAS. I am satisfied, and I can say to the gentleman that if that is not done, then it would be my purpose to take such steps as may be necessary provided by law to see that it is

Mr. SKELTON. I thank the gentle-

□ 1940

Mr. PAUL. Mr. Speaker, will the gentleman yield?

Mr. LEVITAS. I will be glad to yield to the gentleman from Texas.

Mr. PAUL. Mr. Speaker, I would like to express my support for the resolution. Unlike many who are going to support the resolution, I do not find a lot of criticism for the administration nor the policies of Anne Gorsuch. I think the issue and the vote we have to cast is somewhat different than voting just on her policies.

I think the issue here is a Constitutional issue and the prerogative of Congress to assume responsibility for those creatures we are always creating, the bureaus. I feel very strongly that we must have control and that

they must answer to us.

The statement was made that this may jeopardize some cases. Well, if bringing these records out would jeopardize the cases, I would assume that the cases are rather weak, and even if they do, I think the overriding constitutional issue is much greater.

I do believe, though, if the Congress does not prevail, it would confirm the belief of many American citizens that the bureaucracy is out of control and that Congress does not care and does not assume responsibility. I, for one, think it is very important that the Congress prevails under these circumstances and that we vote on this issue rather than the policies of Anne Gorsuch.

Mr. LEVITAS. I thank the gentleman from Texas, and I think the gentleman is absolutely correct. If Congress does not demonstrate its willingness to take the position that it has constitutional responsibilities to discharge, and that requires getting information, then I think the American public will abandon any hope that their elected representatives can control the bureaucracy, and we will have engaged in a serious act of self-emasculation with respect to our responsibilities under the Constitution.

I say to my friends on the other side of the aisle, this is not a partisan issue. I plead with you not to make it one. I suggest to you that the time has come for us as Members of Congress to recognize our responsibilities in this matter, and I urge you to support in a bipartisan fashion these prerogatives of the Congress under the Constitution, and discharge our responsibil-

Mr. PAUL. Mr. Speaker, I am thoroughly convinced that a citation of contempt of Congress is the right course of action under the circumstances, I am, moreover, convinced that we are under an obligation to support this resolution, if we believe in constitutional government.

Those who are familiar with my record in the House can probably infer from that record that I am convinced that, over the last 40 years or so, power in this Government has shifted to a dangerous degree from the legislative branch to the executive; away from the people to the bureaucracy. This shift, I am further convinced, threatens the system of government that our Founding Fathers so wisely bequeathed us. With this in mind, I am not at all surprised by this latest turn of events, though I am outraged by it. Far from surprised, I think we should expect precisely the kind of defiance of the legislative branch that have merited the serious step we are taking today.

Let me make it perfectly clear that my concern for the actions of Mrs. Gorsuch and my belief that she should be cited for contempt are not motivated by any hysterical fears on my part about the potential hazards of hazardous wastes—which, in my opinion, have been wildly exaggerated.

On the contrary, my concern goes much deeper than that. It is a concern for the survival of constitutional gov-

ernment itself.

This resolution demonstrates the clash between the power of the bureaus and the responsibility of the people. Nothing less is at stake when we take up matters of this kind.

I have no question in my mind that the Environmental Protection Agency's claim to executive privilege is ridiculously broad, and that if we allow this bureaucracy to get away with such arrogance it would indeed serve as a dangerous precedent to avoid the disclosure of information in the years to come—and we would have only ourselves to blame.

I hardly need to remind you that this is not a national security matter. The information that Mrs. Gorsuch is withholding does not jeopardize delicate negotiations. It would not reveal military secrets. It might, at best, embarrass that agency itself and, we can only assume, the White House. This is hardly grounds for claiming executive privilege.

At its strongest, the opponents of this measure contend that while the committee's oversight position is valid, the actual information involved is not crucial to the committee's purpose. Well, with all due respect, that, I would submit, is up to the committee

to determine.

This said, there is no question of the course of action we must choose. We owe it to ourselves as Members of this body, of course. But more than that, if we have any sense of our obligation to the delicate balance upon which constitutional government depends, we must support this resolution.

Mr. PETRI. Mr. Speaker, will the

gentleman yield?

Mr. LEVITAS. I yield.

Mr. PETRI. Mr. Speaker, I just have one question that I hope someone

would address in the course of this debate. That is, if we do not exercise oversight over this agency or other agencies of this sort, who, should, and who will, exercise that oversight or

have the power to do so?

Mr. LEVITAS. Of course, the gentleman's question answers itself, and in this instance the real meat of the coconut is this: When we get to the point of saying that this is something that is critical, something that we have to look at, the person who is making the determination that we do or do not get that information is the person that is part of the subject of the investigation. That is totally unacceptable.

This subcommittee was created over 23 years ago at the direction of Speaker Sam Rayburn. It has an unblemished record in those 23 years of impartially, objectively investigating matters under its jurisdiction, and never has any confidential information that has come to this subcommittee ever become public, except by due process of law—not through leaks, Deep Throat was not a member of this subcommittee, he was in another

branch of government.

I just want to say one other thing to the gentleman, because I think he raises a very, very important point. We have got to be able to find out how EPA is administering this public health program, this multibilliondollar program, before it becomes a mess. We have got to find out whether sweetheart deals are being made in settlement of cases, whether the guilty are being pursued, or whether they are not being pursued, and not come around 3 years from now, after \$1.6 billion has been wasted and many communities have water supplies that are poisoned, and say that it is really a shame.

We have got the opportunity to come in now and put an end to the abuses rather than to wait until it is

too late.

Mr. CLAUSEN. Mr. Speaker, I yield 7 minutes to the distinguished minority leader, the gentleman from Illinois (Mr. MICHEL).

Mr. MICHEL. Mr. Speaker, I rise in strong opposition to the resolution citing the Administrator of the Environmental Protection Agency, Anne Gorsuch, for contempt of Congress. The issue before us today is one of the most important issues that this House will consider this year, and one that deserves our careful scrutiny.

At the outset, and before I proceed to the merits of the issue, I would like to make it clear that I totally support the efforts of the Committee on Public Works and Transportation to review and study the effectiveness of the Superfund law and the manner in which it is being implemented by the Environmental Protection Agency. The committee's inquiry, in my view, is extremely important and most ap-

propriate to assure that the Superfund law is working and being administered to the fullest extent and intent of the Congress. Moreover, I support as a general matter the efforts of the committee to gain access to EPA's enforcement-related files. Congress cannot legislate wisely or effectively unless it has available to it information needed for the efficient exercise of the legislative function.

The sole issue before us today, however, is whether to cite Administrator Gorsuch for contempt of Congress for failure to comply with a subpena issued on November 22 by the Subcommittee on Investigations and Oversight of the Committee on Public Works and Transportation. The November 22 subpena basically requested that Ms. Gorsuch turn over to the subcommittee all-and I emphasize the word "all"-these books, records, correspondence, memorandums, papers, notes, and documents drawn or received by the Administrator and her representatives since December 11, 1980, for 160 hazardous waste sites.

Now, despite the broadness of the subcommittee's subpena, neither Administrator Gorsuch nor any other official of the administration contested the subcommittee's authority to request and receive information relative to its oversight and investigatory task. In fact, Ms. Gorsuch indicated that she was prepared to turn over to the subcommittee roughly 99 percent of the material which it requested.

Only a small fraction of the material requested by the subcommittee, about 1 percent according to EPA, was withheld. Now, the reason Ms. Gorsuch withheld these documents was quite simple. The President ordered her to do so. The President's position, based on a legal opinion from the Attorney General of the United States, is that, "Sensitive documents found in open law enforcement files should not be made available to Congress" on the grounds that "dissemination of such documents outside the executive branch would impair \* \* \* the President's solemn responsibility to enforce the law."

Now, against this background we must decide today whether to cite Ms. Gorsuch, who was acting on orders from the President, for contempt of Congress for refusing to turn over a small fraction of the materials requested by the subcommittee. I believe there are a number of compelling reasons why we should not cite Administrator Gorsuch for contempt based on the November 22 subpena.

As I begin, I would like to state what a very fine lady and public servant she is. We must, however, go beyond that.

First, the subpena is defective. It references hazardous waste sites "listed as national priorities pursuant to sec-

tion 105(8)(B) of Public Law 96-510.

Well, according to EPA, no sites have yet been listed under section 105(8)(B). Thus, technically, the subpena does not apply to any documents in the possession or custody of EPA.

Now, I think it is patently unfair for Congress to subject Ms. Gorsuch to a grand jury investigation—and let us face it—that is the effect of what we are doing here today. This action is based on failure to comply with a subpena which we know is defective.

Second, the subpena has another problem associated with it. It is extremely broad, and this could become an important factor in a criminal prosecution for failure to comply.

I have a great deal of trouble subjecting an executive branch official to criminal prosecution for failure to comply with a subpena which is too broad, and if ever a subpena looked like it was based on a fishing expedition, this is one.

### □ 1950

Now, my third reason for not approving the resolution is that the committee has not made the case that the withheld documents are demonstrably critical to the responsible fulfillment of its investigation. As I mentioned before, EPA claims it is prepared to turn over the vast majority of the material and that no factual or technical materials are being withheld from Congress.

It seems to me that it is extremely difficult that the disputed documents are critical to the investigation until such time as the committee has reviewed the voluminous materials which EPA is willing to provide.

A fourth reason why I believe that contempt resolution should not be approved is that the complex legal issues involved in this case have not been

sufficiently analyzed.

Mr friend, the gentleman from New York (Mr. Solomon) pointed that out.

The subcommittee's subpena is based on the assumption that Con-

gress has a right to all of the documents in EPA's files, even extremely sensitive enforcement strategy documents in an ongoing criminal prosecu-

tion.

I think I might very well depart for a moment to suggest that this Member knows of lawyers downtown—they are all around this town—who are most eager and anxious to get at any information available in the committee files here or through staff, if not through the Members themselves. Some of them will even frankly volunteer that within 3 days they can get all the information they want to either defend somebody or send them to the grave, depending on which side of the issue they are on.

The subcommittee's subpena is based on this assumption that the

Congress has a right, as I said, to all those documents in EPA's files. I just

have problems with that.

EPA and the Department of Justice, on the other hand, have taken the position that it is not in the public interest for certain sensitive documents found in open law enforcement files to be given to the Congress or its committees except in extraordinary circumstances.

The legal issues involved in resolving this dispute are complicated, to say the least, and I for one am not prepared to address the merits of these issues.

My basic position is that the Members of the House have not had sufficient time to review the competing arguments and to form an independent judgment on the merits. The legal memorandum prepared by the General Counsel to the Clerk of the House is dated December 8. The response from the Department of Justice is dated December 14. Neither of these documents have been available to the Members at large until today.

In my view, these conflicting legal opinions should be more carefully analyzed before the House proceeds to cite an executive branch official for

contempt.

A fifth reason why the contempt resolution should not be approved is because of due process problems in the way this matter has been handled.

The subcommittee held a hearing and approved a resolution finding Ms. Gorsuch in contempt of Congress on December 2, 1982, the same day EPA was due to comply with the subpena. Moreover, the subcommittee would not accept the documents which EPA was willing to turn over.

Then, with just 2 days' notice, the matter was brought up in full committee on December 10. The committee meeting itself was brief, and efforts to offer alternatives or to discuss the implications of the proposed actions were given short shrift. In fact, the ranking minority member was not even allowed to finish his opening statement, I understand.

Now we are taking this matter up on the floor under circumstances that guarantee that most of the Members will not know what is going on. The report was just filed yesterday evening and was not available to the Members until today.

I simply do not believe that the Members of the House should consider a matter as important as this one without having an opportunity to thoroughly review the committee's report and to form their own independent judgment on the merits of the issue.

In closing, Mr. Speaker, I must reiterate my strong opposition to the contempt resolution.

We are currently engaged in a confrontation with the executive branch. The issues involved in this dispute raise serious constitutional questions which have not yet been addressed by the Supreme Court.

It is my strong view that a matter of this constitutional significance should not be clouded by side issues such as a defective subpena, hasty procedures in committee, or hasty consideration on the floor.

Mr. Speaker, I take second place to no person as a defender of this body and its prerogatives. It is for that reason that I do not think we should proceed to a court determination saving what documents the House can obtain from the executive branch until we have an ironclad case. This case is not ironclad for the reasons I have listed, and for that reason I believe the matter should be put over until the next Congress. This will give us a chance to work out a compromise and will in no way jeopardize our case. We can always issue a new subpena early next year if an accommodation cannot be reached.

Frankly, here we are in the closing days of a lameduck session, a few days away from the convening of a new Congress, and I find it very, very difficult to interrupt the proceedings which have to take place with our continuing resolutionand all the rest of our business, to get ourselves to the point of citing Ms. Gorsuch for contempt.

I need not remind the Members that it would be the first time in our history that we have done that. I believe throughout the history of this country we have always had this conflict between the executive branch and the legislative branch. Just how far do we go? Up to this point we have always been able to rationalize that by giving and taking but never coming to the point of actually citing a member of the executive branch for contempt.

Mr. Speaker, I just think it is rather outrageous to do that.

Mr. LEVITAS. Mr. Speaker, I yield 5 minutes to the gentleman from New Jersey (Mr. Roe).

Mr. ROE. Mr. Speaker, I want to thank the gentleman for yielding me this time to spend a few minutes to discuss this matter and maybe take a different view of the issue.

I share the concern that has been raised by Members who have spoken and said that there unfortunately is an administrator or a person who is involved in this debate, but I think I come before this House with a little bit of special privilege, if I may say this to my colleagues, because of the fact that of the 160 sites that are being reviewed and investigated by the Oversight Committee of the Public Works Committee, 17 of those sites are in the State of New Jersey. Fully 10 percent of those sites affected are in the State of New Jersey. I remind

the Members of that here when we speak of a legal problem.

I do not consider this totally as a legal problem. I consider this a peoples' problem. I was proud when I first came to this House 13 years ago and they referred to this House particularly as the "peoples' house." That always gave me a little ring in my heart, because I felt that this was the place where 435 Members represented 220 million people in this country and most of the free world.

It seems to me the issue before us is life itself. The minority leader made the comment—and I applaud him—that perhaps this is the most important issue we are going to be faced with, because what we are talking about is the water supply of this country and the air supply, if you like, and the very substance of life itself. Can we even afford the 2 hours of debate? Because now it is degenerating or going down to the point that this is a legal issue.

This is not necessarily a legal issue. This is a question of whether or not the natural resources of the people of this country should be poisoned, and over what period of time. Is that dramatic? Is that emotional? Yes; it is, because when I go back to my State, people ask me: What did you do last week on that issue? Who is going to remove the 800 tons of thorium contaminated materials in my hometown?

We must debate and go through a whole waste of time, if I may, in determining what action we should take. The question is, Do the people of the country trust the people they elected? I think somebody made that point, whether the bureaucracy governs or whether the people they elected govern. That is the issue.

Is the issue such that the Members of this House cannot be trusted with the facts? What is there fundamentally to hide in an issue when we are determining whether or not the natural resources of this Nation should be poisoned? That is the issue before us.

I was taught when I went to school that the flow of information is knowledge. That is true, the flow of information is knowledge. We are talking about \$100 billion being expended in this Nation, between the Federal Government, the State governments, and the county and municipal governments, in cleaning up our pollution and developing a clean water supply. That is \$100 billion. We are attempting to revise and rewrite legislation to meet the needs and demands of the Clean Water Act, and we cannot secure the basic data that this House has asked for to make those determi-

So in the little bit of time perhaps that I have in this 5 minutes, I would like to say to all of us on Christmas Eve that it is a disagreeable experience. It is disagreeable that one of our

fellow citizens has to be subjected to this or become the focal point of the issue. It is not Mrs. Gorsuch's fault that this issue is before us. It is because of an executive memorandum that has been written that has denied the House of Representatives its knowledge to be able to pursue the needs of the people of this country. No matter what we did short of a nuclear war, the issue is whether or not a glass of water is usable to drink. That is the issue before us. There is not 20 years ahead of us to make that determination. It is momentarily and everyday that we have got to fight this issue.

#### □ 2000

Half of the water of this entire country, half of the water supply of this entire country is ground water.

All we have to do is have any accident with any toxic chemical anyplace and that water is destroyed for 1,000 years—it is nonretrievable—that is the issue.

So while we sit in debate as to whether or not the fundamental knowledge should be made to the people's House, to the people who are elected by 545,000 people each with a responsibility to this Nation for the very health of the people of this country, that is what the issue is, not the legal machinations.

The question is, Why not? The question is, Why not bring before the people of this country all of the mutual problems and let us try and solve them the way they ought to be solved in the interest of the people of this country?

Mr. CLAUSEN. Mr. Speaker, I yield 10 minutes to the distinguished gentleman from New York (Mr. MOLINARI) a member of the Oversight and Investigation Subcommittee.

Mr. MOLINARI. Mr. Speaker, I rise in support of this resolution and it is not an easy thing for me to do. But I have a personal involvement in this matter because it was at my request that Chairman Levitas commenced the inquiry that is the subject and the point that we are discussing here tonight.

This goes back some time. I think we should mention the chronology of events so that we understand why we are here tonight.

The gentleman from Georgia (Mr. Levitas) came to my district. He accompanied myself, some law enforcement officials, some informants, in a helicopter and we went around the New York region. We heard about the problems that were occurring, the deadly problem of dumping of toxic wastes that we must deal with.

We should not be here tonight, Mr. Speaker. It really disturbs me as a new Member of this body that we have failed to be able to reach an agreement so that we did not have to take

up this resolution tonight. But why did we fail? Why did we fail?

Was the fault with Chairman Leviras? No, indeed not. For 3 months he has attempted to get the information. For 3 months we waited and, indeed, in the beginning the information was made accessible.

There came a time when the investigative staff of his subcommittee visited region II in New York City and they were told no more files will be made accessible to you. When asked why, the answer was "We have got orders from Washington not to release any more files."

Now we have a confrontation. I disagree respectfully with my colleague from New York (Mr. Solomon) a good friend of mine, that ample time was allowed. If it was not for the fact that a citation was issued, that a subpena was issued, backed up with a contempt charge, we would not have made the progress that we have made.

It is only within the last 48 hours that there has been any serious negotiation.

That is what it takes.

The issues are complex. But what it boils down to is this: We are told in committee hearings that 10 regions in this country have to sit down, their staffs have to sift through their files and unilaterally make a determination as to what are sensitive documents.

We, as Members of Congress, imagine, do not have the right to see those documents, yet all of the staff employees, and they could be GS-5 or whatever, have the right to look through those so-called sensitive documents.

I can tell you that I had a personal experience in my State where the New York State Department of Environmental Conservation oversaw the cleanup of a chemical dump and permitted hundreds of thousands of gallons of oil that they said was waste oil and was listed in the manifest as waste oil but which was heavily ladened with PCB's. I will tell you where we got that information. We got it from their own files. We did not know where to find that information. We picked out files at random, but not at first because they denied us access.

So I learned a lesson the hard way. I learned that indeed the agencies that we entrust to protect our loved ones, and we have evidence of children playing in toxic chemicals, and the GAO has testified that there are as many as 50,000 dump sites in the country. I do not think there is a more serious problem that we are going to be confronted with in this Congress and I am disturbed that we spend time trying to get the possession of documents when perhaps we should be spending more time at the root problem, stopping the dumping of toxic wastes in this country.

Only when we do that can we effectively cope with the cleanup problem.

But I must say that Chairman Levi-TAS has really extended himself and I myself have asked Ms. Gorsuch to cooperate, to offer recommendations so that we could break this impasse because it was obvious to me we were going to have this confrontation. But we were rebuffed and I must stand behind the gentleman from Georgia (Mr. LEVITAS) because I think he is doing the right thing. I think that we are all doing the right thing in supporting this resolution.

I am hopeful that as I am standing here and as we are debating this resolution that somebody at the White House or somebody at the Justice Department is going to call and say that

we have a solution.

I think that we are going to have to come to grips with this problem and we are going to have to determine whether we as Members of Congress are going to insist on the right to oversee these files.

I cannot buy the argument that they are going to tell us what is a sensitive

document.

How do we know whether it is a sen-

sitive document?

Let me tell you what I had offered by way of a compromise. I suggested let the gentleman from Georgia (Mr. LEVITAS) one person, examine those socalled sensitive documents and let him make a determination whether they are indeed capable of being investigated further.

Do we trust him? I do. If there are any leaks that came from the committee, obviously they could be traced to his doorstep because he could be the

only one to have access.

That was not accepted. So I am afraid that anything else that we might suggest at this point in an effort to get at those papers that EPA says is sensitive will not be accepted.

Let us talk about that for a moment. How many documents are we talking about? Do not be misled by the number of 23 because during the hearings it was said at least 23. But in response to questions Mrs. Gorsuch mentioned that it could be many, many times that number.

The gentleman from Louisiana (Mr. ROEMER) asked the question could it be 10,000 and she said, I believe, something to the effect that "I doubt that

it could be that much."

But, Mr. Speaker, I am not happy that we are here tonight since I did start this proceeding off so many months ago. But I am also not happy at the progress that we have made. So I have no hesitancy to stand up on this floor and to say that I am going to be voting for the resolution.

I am not going to ask, however, that my colleagues join me. I am going to ask, rather, that you make your own determination because it is a very serious step that we are taking and one we should not be taking lightly.

Mr. PEYSER. Mr. Speaker, will the gentleman yield?

Mr. MOLINARI. I am glad to yield to the gentleman.

Mr. PEYSER. I thank the gentleman.

First I want to congratulate the gentleman for his statement. I know it is not easy being on that side of the aisle making the kind of statement the gentleman has just made. But it is a statement that is of great importance.

The one part of this issue that strikes me, and the gentleman touched on it, the minority leader spoke of it, was the fact that Congress really could not be trusted in the eyes of the administration on this information

that the EPA evidently has.

Yet I wonder. The CIA budget, which is certainly the most top secret information available, is open to every Member of this House to review who wants to sign a statement to see it. The Intelligence Committee deals with the most top-secret information that our country has.

#### □ 2010

What in the world can be so sensitive in the EPA files that they would not let a committee like the gentleman's review it?

Mr. MOLINARI. That point was made. I think it is an important point. I cannot for the life of me equate comparing CIA classified material to the so-called sensitive documents. I have seen some of these on a State level. And believe me, they are not sensitive. The question here really is, Do we

have a right to examine the documents in question or do we have an obligation to do so. It is my belief that we have an absolute obligation to insist on having access to the documents and for that reason, I will support the contempt resolution.

Mr. PHILIP M. CRANE. Mr. Speaker, will the gentleman yield?

Mr. MOLINARI. I yield to the gentleman from Illinois

Mr. PHILIP M. CRANE. Mr. Speaker, I thank my colleague for yielding.

Mr. Speaker, let me preface my remarks by stating that Mrs. Gorsuch, in my opinion, is a fine woman, the best Administrator of EPA since the creation of that Agency, and a courageous and faithful supporter of the administration.

Having said that, I regretfully announce that I must support the resolu-

The President, as Commander in Chief, has a legitimate right-upon occasion-to invoke the right of executive privilege.

But that right must be confined to those areas where the President enjoys a unique responsibility as Commander in Chief. The Environmental Protection Agency does not fall under that umbrella.

The House of Representatives, the people's body, has the responsibility to originate all policy for our National Government. This derives from our control of the purse strings, the power to originate all taxing and spending bills.

In order to make enlightened decisions in the best interest of the people of this country, we must have access to all the information we can get.

Withholding that information impairs our capability to perform this function.

I am aware that some colleagues on my side of the aisle will view this resolution in a partisan context.

For them I would ask, if Jimmy Carter were the President involved in this dispute and if Ralph Nader were the Director of EPA, how would you then vote?

One must rise above the emotion of partisanship and look at the principle that is involved.

This decision was not personally an easy or pleasant one. As I said initially, it is one I make with sadness, but it is one that needs to be made nonethe-

Mr. ROE. Mr. Speaker, I yield 4 minutes to the distinguished gentleman from Louisiana (Mr. ROEMER).

Mr. ROEMER. I thank the gentleman from New Jersey for yielding.

I want to begin by saying that I rise in support of the resolution for con-

I want to add further that as one Member of this body, small in stature and short in duration, I have learned a lot in the last 2 years. And it has come to a meaningful point to say to the gentleman from New York (Mr. Molinari) that what he said here tonight and what he has done over the last 5 months has meant a great deal to this country and to this Member. I thank him for that.

I want to finally say, before I hit the heart of my argument, on behalf of your consideration of the resolution for contempt, that I have thoroughly enjoyed the 2 years on the Oversight and Investigations Committee with my chairman, the gentleman from Georgia (Mr. LEVITAS).

However you think of the man, and however you judge his actions, we have the advantage, those of us on the subcommittee, of being there day in and day out with him and see him treat this with an even and fair hand.

My good friend, the minority leader, did his duty, spoke earlier, about the reasons that we should not vote for this contempt resolution. He suffers as most of us do from limited time and was not able to be at the subcommittee hearings, was not able to be at the committee hearings, does not know firsthand how long we worked, how deeply we felt that what we wanted was not confrontation but informa-

It was the denial of that information that we seek to redress in this resolution.

A lot of criticism from some has been made at the subpena and the contempt resolution—too hastily, there was another way to do it, they said, maybe the issue was not that important—these all are wrong in their own way.

Too hastily. It has been months.

Not important. It affects at least 160 and maybe as high as tens of thousands of cities in this country. And the attempt by this subcommittee and committee is not to find Anne Gorsuch derelict in her duty. The attempt by this Member is not to discover some dirt and expose it. The attempt of this subcommittee and committee in this House ought to be to find out what the truth is, and the truth is not some esoteric exercise of executive versus legislative.

In this instance, it is an exercise of health, of the future, of the way our money is being spent. Are the demands and the implementation policies of this Congress being followed? It is a question that I cannot answer tonight. But it is a question that we owe ourselves and the 500,000 people each who we represent to find an answer to.

Finally, there was the question that somehow Members of Congress are not to be trusted. We have all felt that privately on occasions. But in the history of this land, as the gentleman from Wisconsin (Mr. Petri), our colleague, asked, when it comes to oversight and review, if not us, who? If not us, who?

The law is with us. The public need is with us. The truth of the action of the men and women of this committee and subcommittee are with us.

I am hopeful, as we resolve this thing tonight and take the next step, as my colleague from New York has already stated—I am hopeful that the phone call will come. That those who do know, that those who have assumed the appointive responsibility of protecting the health of your children and mine, and your community and ours, give us the information, not to be flaunted in some newspaper, but to be studies for the benefit of all this country.

I urge the House, no matter what your philosophical persuasion, to vote yes on the resolution for contempt.

Mr. CLAUSEN. Mr. Speaker, I yield 3 minutes to the gentleman from Colorado (Mr. Kramer).

Mr. KRAMER. Mr. Speaker, I rise in opposition to the contempt citation. I believe that certainly the House and the committees of this House are entitled to oversight, and indeed have that responsibility under the Constitution.

But I question whether or not really the issue tonight is not at this particular point in time do we pass a resolution of contempt for Mrs. Gorsuch.

What is the reason for our rush to judgment? If this is indeed the serious problem, one of historical significance, a first-time event in the history of this country, does it not deserve full and adequate deliberation by the House, and not in the waning moments of this lameduck session.

Can we feel satisfied about the work that we have done in this House to date about protecting our environment?

Bills that have been required by our own rules to have been completed have not been 3 months after the past due date. The Clean Air Act authorization has expired, and the committee cannot even finish a bill to bring to the floor. The Clean Water Act authorization has expired, and the administration submitted a proposal more than 6 months ago, but we have not acted.

We cannot get the Noise Control Act out of conference, because we have not appointed conferees. And we have been without an authorization for both FIFRA and the Clean Air Act for more than a year.

And yet somehow we have the time to assert in these waning moments of this session that somehow if we pass this resolution of contempt, we are going to do something to clean up our environment.

We are dealing with a law that is less than 2 years old, a very important law. And yet we are concerned about some esoteric information, perhaps important, perhaps not. But where are those arguing for consideration on this floor tonight of noise control, of clean air, of FIFRA, or ocean dumping, of solid waste, of safe drinking.

### □ 2020

I think that in our rush to judgment, we do a disservice to ourselves and to the process which all of us hold so dear.

Mr. LEVITAS. Mr. Speaker, I yield 3 minutes to the gentleman from New Jersey (Mr. Florio).

Mr. FLORIO. Mr. Speaker, as chairman of the House subcommittee which oversees EPS's implementation and enforcement of the Superfund, over the past 2 years I have witnessed the repeated and willful disregard, by EPA of the intent and requirements of the Superfund law.

The Environmental Protection Agency has chosen to selectively interpret the clear intent, letter, and spirit, of the Superfund in a manner that invariably limits public scrutiny and jeopardizes protection of public health and the environment.

Serious questions have been raised by my committee and others regarding the integrity of several Superfund site settlements and negotiations with private parties. Only recently a settlement was entered into in Seymores, Ind., wherein the parties that inappropriately disposed of wastes were allowed to sign settlement agreements for one-third of the estimated cost of the clean up, which of course means that the taxpayers will pay the balance.

If the evidence from Superfund expenditures, enforcement and implementation are any indication, the Congress should be suspicious of the Agency's recent Superfund settlements and negotiations, and has every need to examine these files in detail.

Through the end of fiscal 1982, the Superfund trust fund had accumulated an unexpended balance of \$364 million, while only \$88 million had been expended on site cleanup and related work.

As a matter of fact, \$34 million has been earned from interest accrued on the unexpended balance. It would be nice if Superfund was to be a revenue raising mechanism, but it is not. It was to be a mechanism for cleaning up sites as rapidly as possible and that is not being done.

To date, of the 160 priority sites only 3 surface cleanups have taken place. At the same time, nearly one-quarter of the requests for emergency action have been denied by EPA head-quarters.

Turning to enforcement, which was to be the key to Superfund effectiveness, between fiscal years 1980 and 1981 one sees that civil case referrals from the EPA to the Justice Department under RCRA and Superfund, dropped by 82 percent (from 46 to 8 cases). In fiscal 1982, approximately 45 percent of the cases were referred on September 30, 1982, the last day of the fiscal year.

In addition to expenditures and enforcement, the EPA has failed to implement other key provisions of Superfund dealing with notification requirements for hazardous waste spills and failed to establish a national registry for victims and diseases resulting from hazardous waste exposure, a particularly arrogant disregard of the clear directive of the statute.

The present regime at EPA is dedicated to words, not actions. Given the Agency's Superfund record to date, the Congress would be derelict if it did not fully scrutinize the policies and procedures governing the recovery of Superfund expenditures from private parties, and the integrity of the Agency's approach to private settlements and negotiations.

In this instance, the skepticism of the Congress is more than justified; the requested documents must be examined. I urge my colleagues to affirm the contempt citation.

Mr. CLAUSEN. Mr. Speaker, I yield 3 minutes to the gentleman from Colorado (Mr. Brown).

Mr. BROWN of Colorado. Mr. Speaker, as I listen here tonight, it seems to me we have had a discussion from those on one side who are sincerely and honestly interested in seeing a full and proper operation of this fund and in the proper function of overview.

I have also listened to Members who have a deep and I think sincere concern about executive privilege. They make the point that over 99 percent of the documents that have been asked for have been delivered. It seems to me they present a reasonable case as well.

What the exact answer will be with regard to this legal question I do not know. I suspect most of the Members here tonight do not know. It involves a legal issue that has not been fully litigated.

No one here tonight could be insensitive to the statement that there is danger in releasing criminal investigatory material. No one here tonight would want to ever endanger a drug investigation or an organized crime investigation. No one here tonight could fail to have a question about whether or not everything that is in those files should be made public if it would make it more difficult to prosecute offenders.

I would hope before we vote tonight that we give some thought to the human aspect of the issue. It is not Mrs. Gorsuch that refused to disclose the information. That refusal came from an order by the President of the United States. But, the action we vote on tonight relates to Mrs. Gorsuch.

It is not Mrs. Gorsuch that has rendered the legal opinion that this information falls under the executive privilege. It is the Justice Department, that rendered that opinion. The motion we vote on tonight deals with Mrs. Gorsuch—not the Justice Department.

Mrs. Gorsuch is a woman who has worked hard to serve her country. Mrs. Gorsuch is a woman who has come to hearing after hearing on this Hill. Mrs. Gorsuch is a woman who has acquired a reputation as knowledgeable, hardworking, and dedicated.

Do we really solve this problem by sending Mrs. Gorsuch to jail? Does this really provide the answer that we seek? I do not think so.

I think, upon reflection, the Members will find that we have the wrong target. A contempt citation against Mrs. Gorsuch is not the answer to our problems.

I think we will find that Mrs. Gorsuch is not the one that we should be punishing.

Mr. LEVITAS. Mr. Speaker, I yield 3 minutes to the distinguished chairman of the Committee on Interstate and Foreign Commerce, the gentleman from Michigan (Mr. DINGELL).

Mr. DINGELL. Mr. Speaker, at issue is not the person or the character of the lady who administers EPA. She is a gentlewoman, a real lady and a fine person. She is, it is true, only carrying out orders.

The question is not whether she shall go to jail or not, because she will not. What will happen will be that the matter will be litigated and the courts will order the documents presented.

What is at question here tonight is the prerogatives of the Congress. These prerogatives will enable the Congress to procure the information absolutely necessary for us to legislate, and to assure the fair and proper enforcement and administration of the laws and that they are properly being carried out. The power we assert tonight is as old as the Magna Carta. Justice Coleridge speaking of the powers of the House of Commons, from which we inherit these powers said that the House of Commons, and so the House of Representatives as its successor, are "the grand inquisitor of the realm." He went on to say that "it would be difficult to define any limits by which the subject matter of their inquiry can be bounded. They may inquire into everything which it concerns the public weal for them to know; and they themselves, I think, are entrusted with the determination of what falls within that category."

Let me say this. The administration says these are enforcement-sensitive documents and, therefore, they are to be excluded from the right of Congress to know. Never before have these words been used or held by courts to deny Congress its right to information.

The House of Commons inquired into the behavior of the King and his government in the most sensitive

# □ 2030

That was regarded as proper. In the case of McGrain against Daugherty, the Supreme Court expressly recognized the power of the Congress to inquire into enforcement decisions of the Department of Justice to prosecute or to decline to prosecute and the upholding of this power caused the Teapot Dome scandal to come to light.

Now, it is clear that we must understand what really is at stake here. Never before in history have enforcement-sensitive decisions been used in the description of "Executive privilege." Indeed, Executive privilege." Indeed, Executive privilege as recognized by the courts regarding the other branches of government is a fairly recent event. I will tell you that every President and every administration and every person who has been pressed by the Congress, with its awesome power, to procure the information that is necessary to act in the public interest has been compelled to

come forward with the information which has been sought.

The SPEAKER pro tempore. The time of the gentleman from Michigan (Mr. DINGELL) has expired.

Mr. DINGELL. Mr. Speaker, will the gentleman yield 1 additional minute to me?

Mr. LEVITAS. I yield 1 additional minute to the gentleman from Michigan.

Mr. DINGELL. I thank the gentleman for yielding.

Mr. Speaker, it has been said that the administration can withhold and decide what documents they shall make available to us. Over 200 years ago, Pitt, the great English parliamentarian, had this to say about this kind of inquiry:

This enquiry, sir, will produce no great information if those whose conduct is examined are allowed to select the evidence.

What we are here to do tonight is to see to it that the Congress has the information that it needs to act on one of the great questions of the day, and that is the enforcement of the Superfund law and the cleanup of this Nation's dangerous and hazardous and toxic substances.

Criticism has been expressed by some members of the minority that the subpena of the Committee on Public Works and Transportation, which was served on November 22, 1982, and pertains to 160 hazardous waste sites, is overly broad. However, the Oversight Subcommittee of the Energy and Commerce Committee served a subpena on October 21, 1982, for documents concerning only three hazardous waste sites, and our subcommittee has been confronted with the same sweeping and unjustified assertions of executive privilege.

Given the limited number of documents which our subcommittee has requested, we have established that the withheld documents pertain only to civil actions. In addition, none of these documents relate to foreign policy matters or national security issues. EPA has also acknowledged that at the time the documents were transmitted to the Department of Justice for review, none of the withheld documents bore indicia noting: First, that they were prepared for the President or at the President's request; second, that they were prepared for or at the request of a member of the White House staff; third, that they were reviewed personally by the President; fourth, that they were reviewed by a member of the White House staff; or fifth, that they were sent to the President for his review.

What those documents, and what that information might be are for the Congress, and no one else to decide.

The historian Arthur Schlesinger had this to say about governmental secrecy, and I ask you to bear this in mind in coming to your decision. He

The secrecy system has become much less a means by which the government protects national security than a means by which the government dissembles its purposes, buries its mistakes, manipulates its citizens, maximizes its power, and corrupts itself.

I urge support of the motion.

Mr. CLAUSEN. Mr. Speaker, I yield 3 minutes to the gentleman from Florida (Mr. Shaw).

Mr. SHAW. I thank the gentleman

for vielding

Mr. Speaker, we have perhaps one of the quietest and attentive groups of Congressmen that I have seen this late in the evening in my 2 years in Congress. I think this really focuses upon the historic nature of the debate that we are having and perhaps it also focuses very readily upon the severity of what we are trying to do.

I have reviewed the statutes under which this Congress can hold somebody in contempt, and I find within the four corners of the law provisions for punishment. The law that we are talking about provides for, at a minimum, a month in jail and \$100 fine; at a maximum, a year in jail and a \$1,000

fine.

I fail in reading the sections that I have before me to see anything that would allow us to require the documents that we are after. I invite anybody here, if there is anything in here that I have missed, to please correct me because I should back away from this argument immediately.

But we have to ask ourselves, and we must ask ourselves, are we after the documents or are we after a pound of flesh? The law that we have is so limited that it does not even allow us to see the documents that we are after. We have a greater purpose here than just worrying about Ms. Gorsuch, worrying about EPA or these documents.

We have the very power of this institution and the subpena power. This power, I believe, should once and for all be placed before the courts. It should be placed squarely before the courts and the determination made. Each of us, Republican and Democrat here, have an obligation to this body, and that is an obligation so that we can enforce our subpena power. We should be able to enforce it in such a way that we can require these papers to come forward.

As I understand, the administration has offered a compromise that would require the production of these papers after that determination is made. This, I believe, by the special act that was put before us, would get us the papers. So if it is truly the papers that we want to know, truly if it is the information that we want to know, truly if it is a judicial determination with our own lawyers representing the House of Representatives, then let us take the administration on what is being offered as a compromise.

I think that it was put by the gentleman from Missouri (Mr. Skelton) very clearly in the early part of the debate about. "Is this not going to be in question, that the Judiciary, itself, is conducting this investigation?" And the gentleman from Georgia answered him, and I think in a very rightful way, the question is that they are sworn to uphold the law, and if they do not, it is an impeachable offense.

The SPEAKER pro tempore. The time of the gentleman from Florida (Mr. Shaw) has expired.

Mr. SHAW. Mr. Speaker, I ask for 1 additional minute.

Mr. CLAUSEN. I vield 1 additional minute to the gentleman from Florida.

Mr. SHAW. I thank the gentleman

for yielding.

Then I ask this body: Are we not putting an awfully unfair burden upon the administration here? Here we are asking them to go forward with their own lawyers, and we are asking them to prosecute an appointment of the administration under a misdemeanor, a quasi-criminal law, and then we are telling them right at the outset, "Unless you come back with an indictment, your very verdict, your very initiative, your very action is going to become very suspect and we may even call you back up here on an impeachable offense."

Now, what kind of action is this? If we want the papers, then let us proceed to get the papers. If you want a pound of flesh and if you want a scandal to carry you across the next year, then proceed with this situation that is before us.

Mr. LEVITAS. Mr. Speaker, I yield 3 minutes to the gentleman from Tennessee (Mr. Gore).

Mr. GORE. I thank the chairman of the subcommittee for yielding this time to me.

Mr. Speaker, let me say first briefly in response to my respected colleague, the gentleman from Florida, that our right, the right of Congress to this information, is not in the statute; it is in article I of the Constitution . It is inherent in the right to legislate. Courts have always so held, and that matter is really not in dispute.

I would also say to the minority leader, in response to a point he made earlier, charging that the committee's request was too broad, he knows the Subcommittee on Oversight and Investigations, of the Committee on Energy and Commerce has also requested information. Our request is narrow. We have 52 documents we want relating to three sites.

But the situation is the same in that instance as well. The Environmental Protection Agency and the executive branch have said to the Congress, "No, you have no right to these documents." The reason they give is contained in a letter that was written to Chairman DINGELL, AND LET ME QUOTE FROM THIS LETTER OF OCTOBER 25:

Potential defendants could gain access to sensitive prosecutorial documents through their elected Representatives. We stress this point because one of the sites in which you have expressed a particular interest is located in the district represented by one of your subcommittee members and a number of the generators of hazardous waste materials contained in another of the sites maintain offices in the district of another subcommittee member.

I would say to my colleagues in this Chamber that that is an insult to the Congress of the United States. Make no mistake about that. The executive branch is saying that if they turn over documents to a subcommittee or a committee of the Congress, that members of that committee are going to run out and give them to defendants in proceedings that are underway. I think that is really insulting. And balanced against our right under article I to this information, it simply cannot be allowed to stand.

What is our right to legislate, and how does it relate here? This Superfund is a unique law. Most of the money comes from a fee on the industry involved, and some comes from the taxpayers, but it embodies the principle that we must first proceed against those responsible for dumping hazardous waste, so the money collected from those responsible will be used to replenish the fund.

If the enforcement program is not effective and efficient, then to that extent the fund will not be replenished and we will have to go back to the American people and say, "We have to raise your taxes because the fund has not been replenished."

Do we not as a people's House have the right to see how this law is working? Of course we do.

## □ 2040

The SPEAKER pro tempore. The gentleman from New Jersey HOWARD) has 14 minutes remaining, and the gentleman from California (Mr. CLAUSEN) has 9 minutes remain-

Mr. HOWARD. I have a unanimous consent request, Mr. Speaker.

Knowing the seriousness of this issue, we have many Members who wish to be heard, many of the members of the committee that is bringing this resolution, or members of other committees in the House that have passed, at least through their subcommittees, similar resolutions. We do not wish to deny them time to talk. We have taken it right to the point now of the minimum time requested, desired, and we believed deserved.

Mr. Speaker, we ask unanimous consent that the debate be continued an additional 16 minutes, 8 minutes to each side. This will minimally take

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

Mr. CLAUSEN. Mr. Speaker, reserving the right to object, and we will not object. I just wanted to say that we do concur with the request of the chair-

Mr. HOWARD. I would like to say that this is cutting down Members to a bare minimum of what they requested.

Mr. CLAUSEN. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. there objection to the request of the gentleman from New Jersey?

There was no objection.

Mr. HOWARD. Mr. Speaker, I yield 3 minutes to the gentleman from California (Mr. MINETA), a member of the committee.

Mr. MINETA. Mr. Speaker, I rise to support the motion to cite the Administrator of the Environmental Protection Agency for contempt of Congress.

This Member, serves on the Public Works and Transportation Committee's Subcommittee on Investigations and Oversight. On that subcommittee, we are working to insure that the Superfund law is properly and adequately enforced. This is not only our right,

but indeed our responsibility.

We have been told that the documents in question are sensitive and too private to be shared with Congress. We have been told that the documents deal with enforcement strategies and are, therefore, protected by executive privilege. But it is precisely the EPA's enforcement-or their lack of enforcement-that we are attempting to review. This is a proper and appropriate subject for our study.

It may well be that some of the documents require handling with some degree of privacy. If that is so, then let us proceed to make whatever arrangements are necessary. As a member of the permanent Select Committee on Intelligence, I know that Congress and the executive branch have successfully dealt with this problem for many

Surely the administration is not arguing that the papers of the EPA are more secret, are more sensitive than those of the CIA or the NSA?

The issue here is simple. How good a job is the EPA doing in protecting this Nation from the dangers of toxic and hazardous pollutants? We seek nothing more than to be assured and shown that our health and safety are

being adequately protected.

Mr. Speaker, I made the original motion to cite the Administrator in the subcommittee, and I wish to urge my colleagues to support the motion of the distinguished gentleman from New Jersey (Mr. Howard) who chairs the Committee on Public Works and Transportation.

I remind the Administrator of the Environmental Protection Agency and the rest of the administration that as long as they refuse to disclose these documents, we in Congress and indeed people throughout the Nation will be left with one nagging question, "What are they trying to hide?"

I urge the administration to reconsider its position, to share these documents with us, and to let us get on with the business of protecting our health, our safety, and our environment.

Mr. CLAUSEN. Mr. Speaker, I yield 1 minute to the gentleman from Ar-

kansas (Mr. Bethune).

Mr. BETHUNE. Mr. Speaker, the great philosopher, Jeremy Bentham, once made a telling argument against the growing number of privileges and immunities which tended to make it harder to get the information when he just simply said, "Whence this fear of the truth?'

I, like other Members who do not serve on the committees, have not had enough time to study this matter carefully, but I have listened to the debate and I have read the report which was filed, and which was available just today. I feel rushed by this proceeding. I hope one day we will learn to do business in another way, but I have concluded-and perhaps it will be of some value to other Members similarly situated-if I make a mistake and if I err, I am going to err on the side of freedom of information.

So, I am going to support the resolution, but I do so with a great deal of discomfort. I hope one day we can correct this kind of proceeding so that we can do this in another way.

Mr. LEVITAS. Mr. Speaker, I yield 2 minutes to the distinguished gentleman from Massachusetts (Mr. Donnel-

Mr. DONNELLY. Mr. Speaker, today we face one of the most serious issues brought before the 97th Congress.

Probably the most urgent issue is not the immediate one of contempt charges or the serious matter of congressional or executive privilege over sensitive matter. The overriding questions are two: Who is responsible for the health and well-being of the American public? Is there a need to review legislation which was intended to end years of environmental decay?

Enactment of the so-called Superfund legislation encompassed months of debate, review, and disagreement during the 96th Congress. Partially due to the urgency of the matter Congress provided the EPA with considerable discretion over much of the decisionmaking process. The EPA's ability or inability to make such decisions has a major bearing on the choice and costs of cleanup sites as well as the determination of the responsible party for litigation purposes. The House Committee on Public Works and Transportation is bound to review and

report to the House legislation which would make the Superfund statutes a stronger act. It is essential that the committees be provided with all pertinent materials needed to evaluate the performance of the EPA, as well as the strengths and weaknesses of the law itself. The documents withheld by Administrator Gorsuch deal with the most dangerous of the 9,000 waste sites. The committees cannot possibly perform their oversight function without this information.

The ranking members of the oversight committees have been more than fair in attempting to work with the executive branch. However the Attorney General in his response to Chairman DINGELL's promise that the committee would receive the documents in executive session and keep them confidential contends that, "promises of confidentiality by a congressional committee or subcommittee do not remove the basis for the policy of nondisclosure of law enforcement files." Mr. Speaker, there is extensive judicial, statutory, and historic precedent for the disclosure of the most sensitive material to congressional committees in executive session. In a 1980 case, Exxon Corp. against FTC, the District of Columbia Circuit Court of Appeals refused to accept that ground for withholding information from Congress holding that disclosure of information to a congressional committee is not tantamount to public disclosure. Thus, the executive branch has no right to withhold information to a congressional committee is not tantamount to public disclosure. Thus, the executive branch has no right to withhold information from Congress, a coequal branch, once it promises confidentiality.

As for the Attorney General's asserted policy of nondisclosure of law enforcement files, there is no case law to support the AG's position:

On the contrary, the Supreme Court has expressly recognized Congressional authority to examine and inquire into Department of Justice enforcement decisions. Congress investigative power "encompasses inquiries concerning administration of existing laws as well as proposed or possibly needed statutes . . . (I)t comprehends probes into departments of the Federal Government to expose corruption, inefficiency, or waste." Watkins v. United States, 354 U.S. 178, 187 (1957). There is a long history of legislative oversight of the Justice Department and its enforcement of the law. Past congressional investigations have even focused on particular cases. McGrain v. Daugherty, 273 U.S. 135 (1926).

Congressional oversight authority applies with equal, if not greater, force to the EPA: Congress must determine if the EPA is adequately and properly performing the re-sponsibilities delegated to it by Congress in the Superfund law.

In his November 30 opinion letter to Chairman Dingell, the Attorney General contends that Gorsuch may assert executive privilege to "decline to provide committees with access to or copies of law enforcement files." Since the Executive Branch has exclusive authority and absolute discretion to decide whether to prosecute a case, his argument goes, the Executive has absolute discretion to decide whether to inform Congress of the course of their investigative proceedings.

In arguing that Congressional inquiry into Superfund enforcement is inconsistent with the Executive's absolute prosecutorial discretion, the Attorney General is confusing prosecutorial discretion with oversight authority. The Subcommittee is not concerned with influencing individual enforcement decisions, but only with examining the effectiveness of decisions that have been made.

Mr. Speaker, the Superfund enforcement documents are necessary to review the effectiveness of a law which is barely 2 years old that if successfully implemented could save many American men, women, and children from potentially serious illness.

There are Members of both parties who have objected and offered to amend administrative decisions made by both the EPA and the Department of Justice. I do not believe that any Member of Congress takes pleasure in finding Mrs. Gorsuch in contempt of Congress. However, it is our only method of sending a message to the executive in fact to the President himself—that the Congress intends to do what is necessary to carry out its constitutional functions. There is much more at stake here than institutional prerogatives. The health and welfare of millions who have been or may soon be affected by hazardous spills must be our principal responsibility.

Mr. CLAUSEN. Mr. Speaker, I yield 2 minutes to the gentleman from Pennsylvania (Mr. RITTER).

Mr. RITTER. Mr. Speaker, the hour is late and much of the legal jousting has already taken place. Taking another tack, I would like to address a question that the people are probably asking, How bad is this problem and what is EPA doing to solve it? Some Members have implied that somehow EPA has not shown proper concern and conducted itself with sufficient dispatch in the cleanup process. So, I would like to spend just a few moments on the question of whether or not the EPA is or is not doing the job in the cleanup of Superfund sites given the task at hand and the funds available.

First, we need to recognize that perhaps for 100 and more years this country and its various productive facilities have had a ofttimes haphazard approach to chemical wastes. Sometimes waste chemicals have been dumped into holes in the ground. Now in the past few years, we have begun taking a wholly different look and adopting a much stricter procedure in dealing with these waste chemicals, particularly hazardous wastes.

□ 2050

EPA's responsibility in cleanup and the priorities set for cleanup are not just problems of what is present; it involves questions of whether what is present is a danger to the public health. Everything cannot be cleaned up at once. Some sites are more dangerous than others. The dioxin site in Missouri, was one of the three sites focused on in the contempt proceedings in the Energy and Commerce Committee. Had EPA rushed to judgment, it would have done so with three data points showing dioxin concentrations at 500 parts per billion in an area involving six residences.

Basically, there were some reservations about going ahead and moving thousands of yards of dirt or burning thousands of yards of dirt for hundreds of residences in this area, given only three data points. Even with these concentrations of dioxin well beyond the 1 part per 1 billion standard, an assessment of the health effects of these concentrations showed that a small child ingesting a teaspoon a day of this contaminated soil would take some 7 years to possibly show symptoms of chloracne. Later 312 samples were taken and 120 homes thought possibly to be contaminated contained no detectable dioxin.

Many Members have got up tonight and implied that we are close to going under in a sea of hazardous chemicals and implied that only strong action by congressional investigations will save the American people from the threat.

This just is not the case.

And we should not mislead the American people to believe that only powerful action on the part of the Members of this body or certain Members of this body will save them from the hazards of chemical dumps. It will take much hard work by people who know how to clean up and properly dispose of such chemicals.

It will take chemists, chemical engineers, technicians, and workers time and money. But it also takes something else. A climate which is dispassionate and allows sound technical and scientific judgments to be made is es-

sential.

If we are to effectively deal with hazardous waste dumps, not all will be cleaned up at once, priorities will be set. Those priorities should not be set only by litigators and politicians, by newspaper and TV reporters. No, they should also be set by public health specialists, medical doctors, scientists, and engineers who can use the resources available most effectively without being buffeted by abundant emotionalism.

Here is a part of the record on Superfund. Thus far EPA has appropriated \$221 million in the Superfund cleanup effort. That is 83 percent of the Superfund obligation of \$265 million some \$118 million has come from

cost recovery from private sources. Sites having received attention and solution include overflows, explosive potential, acids, pesticide wastes, and others. Current Federal activities underway number some 112 plus approved removal applications numbering 98; active removal operations 11; and completed removal operations numbering 85. Remedial actions contain some 160 sites and include remedial actions, cooperative agreements, and Superfund State contracts.

RCRA regulations are completed in this past year when after 4 years of the previous administration, no regulations were forthcoming.

As I said the hour is late so I am not going to continue with these statistics. Let me close by calling to your attention that some extremely dedicated scientists at EPA have worked closely with State, local, and private organizations to effect cleanup and enforcement in cases which warrant it.

Cleanup is the important thing as far as the American people are concerned. If the atmosphere is highly charged with provoked emotionalism and fear, politicians might well be the only victors and the losers will be the environment and the people. Citing Ann Gorsuch, EPA Administrator for contempt will not serve the cause of Superfund cleanup nor the American people.

Mr. LEVITAS. Mr. Speaker, I yield 2 minutes to the gentleman from Oregon (Mr. WYDEN).

Mr. WYDEN. Mr. Speaker, I rise in support of this resolution because I believe that in denving the Congress this information we are being confronted with one of the most sweeping and unjustified assertions of executive privilege that has ever been made by a President. Its ramifications and sweep, if allowed to go unchallenged, will result in restricting the flow of information to every single committee of the House regarding the laws that are within their jurisdiction.

The documents being withheld are not even documents made by the President, Mr. Speaker. They are simply documents made by staff officials of the Environmental Protection Agency that were never intended to leave EPA. They have nothing to do with foreign policy or national securi-

Finally, Mr. Speaker, the misguided position the administration has taken with respect to this issue is illustrated by its policy respecting contractor access to documents withheld from the Congress. In a hearing that was held recently before the Congress, EPA Administrator Gorsuch conceded that dozens of employees, private contractors, including even Kelly girls, have had access to "enforcement-sensitive" files. These are the same files the administration has deemed too sensitive to release to Congress.

Mr. Speaker, I believe these are documents that the Congress deserves and documents the Congress needs to complete its oversight function. I urge support of the resolution.

Mr. CLAUSEN. Mr. Speaker, I yield 2 minutes to the gentleman from Cali-

fornia (Mr. DANNEMEYER).

Mr. DANNEMEYER. Mr. Speaker, we are a legislative body, but this evening we are sitting in our capacity as a quasi-judicial tribunal because that comes when we talk about citing somebody for contempt. The grounds of the alleged citation are for another

question entirely.

Why do I say that? Well, let me tell the Members that if they want to vote to hold Ms. Gorsuch in contempt on the basis of this document, I hope that will pause to reflect on the fact that we are going to fall flat on our face because a court is going to throw us out. I say that because the lawyer who assisted us in drafting this resolution failed to include one of the most fundamental and indispensible words that any citation of contempt must have to go anywhere in a court proceeding, and that word is "willful." It is a jurisdictional fact.

We have not said that Ms. Gorsuch willfully failed to do anything. We have just said she failed to do something, and you cannot hold anybody in contempt unless you charge them with willful disobedience of an act within the jurisdiction of the person asserting

the authority.

Second, let me tell the Members how a judge or a justice of an appellate court is going to look at this Record when we correct this resolution after we fail the first time.

we fail the first time.

The court will say, "Counsel, do you mean to tell me that the Congress refused to look at 786,977 documents the citee produced and yet is attempting to hold the citee in contempt for failing to produce 23 more? Get out of here. Commonsense dictates that Congress must first examine what is produced, then assert that such documents have been examined and the unproduced are needed to complete its investigative function.

Mr. Speaker, I am in opposition to this resolution which would cite the EPA Administrator as being in contempt of Congress. While recognizing that this institution has an important constitutional role in overseeing the implementation of the laws it has passed, a delineation has to be made between constructive oversight over, as opposed to counterproductive meddling in, the implementation of such laws

As a member of the Energy and Commerce Committee I have some familiarity with this issue in that our committee's Oversight and Investigations Subcommittee has also requested documents pertaining to Superfundalbeit a more reasonable number-and has been similarly denied. What is important to remember is that this denial of documents is not so much an exercise of executive privilege as it is a claim of separation of powers. Neither the Administrator nor the administration is claiming that certain documents should never be turned over. Instead, what they are claiming and what should be of concern to every Member of this House-is that should not be required to prejudice enforcement efforts while they are still in progress

The argument may be made that you cannot have effective oversight unless Congress can see what kinds of enforcement activities are going on. But the other side of that coin is, if we can look into all that is on while it is going on, we become a participant in the process. And that is not what the Founding Fathers had in mind. It was their intention that the executive branch enforce the law, not the legislative branch. As legislators our duty is to decide what the law should be, and then if it does not produce the intended results, to change it accordingly. But, in this case we do not know if the law has produced the desired results. Indeed, it has only been in effect for a year and a half and it still has 3 vears to run.

Also, it should be remembered that EPA is willing to turn over a vast majority of the documents requested-all but 300 to 400 pages out of an astounding total of 787,000. The pages being withheld go beyond the realm of summarizing actions taken or not taken; rather they involve legal analysis and possible legal strategies that might be pursued in the prosecution of the case. As a lawyer, I can share with my colleagues the thought that premature disclosure of such analyses and potential strategies would be most helpful to those suspected of noncompliance—the very people that I suspect the authors of this resolution would not want to see helped. Now I realize that none of my colleagues would ever think of leaking such information if it became known to them, but then again Capitol Hill leaks are not unheard of. So I do not think that it is any more unreasonable for the executive branch to try and protect itself against the premature disclosure of prejudicial information than it is for the legislative branch to try and obtain information essential to the fulfillment of its constitutional responsibilities. That being the case, I think this body should be seeking an accommodation that would balance the respective interests of the legislative and executive branches of Government rather than promote a confrontation between them.

One of the reasons I suggest this is that EPA has gone a long way toward

providing the requested material. Another is that EPA was not given very much time to do it. Indeed, it is my understanding that the EPA only had 8 days to comply with this subpena, not a very long period considering how long it has taken this Congress to pass appropriations bills, considering how difficult? it has been for this Congress to meet budget deadlines, and considering how many other environmental matters have been shuffled under the rug by this Congress. Just looking at the record, and comparing it with what is being requested here, and one could conceivably wonder if this is not a way to distract public attention away from what this Congress has not been doing. Of course, I realize that no Member of this august body would stoop so low as to put politics above principle in such a fashion-or in any fashion for that matter-but surely there are other matters just as much in need of attention, or more in need of attention, than this right now. Clean air legislation has been stalled for almost 2 years now, to cite one example, and I am reminded that clean water legislation, which was submitted to the Public Works and Transportation Committee early last summer has yet to be reported in any form. What an irony for the public to behold; a 22page clean water proposal cannot be marked up in 6 months, but 787,000 pages of documents covering 160 hazardous waste sites should be produced in toto, without regard to the sensitive nature of the contents, within 8 days. If this is not a case of the pot calling the kettle black, I am not sure what is. The real question is-Do we have the courage to admit as much to ourselves and the Nation. If not, is it any wonder Congress continues to rate so low in the public opinion polls.

One additional point needs to be made. Just because Congress has been lax in cutting spending and getting the Nation's fiscal house in order, it does not follow that that the executive branch should be held any less accountable. Two wrongs do not make a right. Hopefully, the next Congress will begin to get its act together, just as the EPA Administrator, in recent testimony before the Oversight and Investigations Subcommittee of the **Energy and Commerce Committee has** indicated that improvements should. and have, been made in EPA's internal operation. However, it is difficult for either Congress or EPA to make those improvements if a tremendous amount of time and resources are being expended in a questionable legal scrap. Which reminds me, quite a fuss has been raised by environmentalists over cutbacks in EPA's budget the last year or two and yet here we have something that will make it even more difficult financially for EPA to carry out its responsibilities. Another irony.

Speaking of reminders, this is not the first time in this Congress that a contempt citation has become an issue. The last time—back last winter—the problem was resolved through compromise. One hopes that the same thing could happen in this instance and, to that end, I urge that this resolution be defeated.

Mr. LEVITAS. Mr. Speaker, I yield 2 minutes to the gentlewoman from New

York (Ms. FERRARO).

Ms. FERRARO. Mr. Speaker, I was listening before as my colleague, the gentleman from New York (Mr. Molinari) commented that he was not happy about the action we were taking tonight. I think that is very, very obvious from what has been going on during the course of debate. None of

us are happy about it.

But the question at this point is, What choice do we have? The subcommittee for the past 5 or 6 months has been trying to negotiate with EPA in order to get documents which we feel are necessary to do our job of oversight. All the compromising and all the negotiating has come to a total impasse. Right now what we are doing is putting the problem before an impartial panel, first a grand jury and then perhaps a petit jury.

It was suggested during the course of our discussions before the subcommittee that we submit it to an independent panel. No matter how we came to drawing a panel, we could not come up with one that was objective. The panel suggested was comprised of an EPA official, an administration official, and someone from the Department of Justice, obviously three people who could not render an objec-

tive opinion.

Mr. Speaker, what we are doing tonight is placing it before a proper tribunal, which is the court, and moving
it out of our hands so we can get on
with our job, and, hopefully the administration as well.

Mr. CLAUSEN. Mr. Speaker, I yield 2 minutes to the gentleman from Ohio

(Mr. WEBER).

Mr. WEBER of Ohio. Mr. Speaker, I rise in opposition to the resolution of contempt, and I do so without judgment of the ultimate right of this House to have access to the documents labeled "sensitive" by the administrator, which the committee seeks.

I oppose the resolution because it is an extraordinary action which should be utilized only after all efforts to resolve the matter in dispute have been

exhausted.

With due respect to the chairman and other members of the committee who favor this extraordinary action, I do not consider the necessary point in time to have been reached in view of the offer of compromise contained in the letter of December 9, 1982, to the chairman of the subcommittee from Robert A. McConnell of the Depart-

ment of Justice—appendix N of the committee report—which contains an appropriate and reasonable effort to resolve this matter short of the confrontation, delay, and ultimate decision of the court which a citation of contempt will otherwise entail.

This offer by the administration deserves a reasoned consideration by the full committee which, it is apparent to me, has not been given to it. Rather, it has been rejected by the committee out of what I believe was an excess of zeal by the committee to assert a claimed prerogative rather than to pursue the objectives of its investigation. In the words of the committee:

This counterproposal was rejected since it was determined to be based on this premise that the executive branch has the right, through unilateral determination, to withhold any documents and information it so chooses from the legislative branch.

Mr. Speaker, I do not think we have the need at this moment in time for reaching a decision on this question of congressional prerogatives. I believe the counterproposal of December 9, 1982, transmitted from the Department of Justice should have been accepted and then, if it still proved necessary, to demand further documents, there would be ample time to consider a citation for contempt.

Mr. Speaker, that is why I oppose

this resolution tonight.

#### □ 2100

Mr. LEVITAS. Mr. Speaker, I yield 1 minute to the distinguished member of the Judiciary Committee, the gentleman from Ohio (Mr. Seiberling).

Mr. SEIBERLING. Mr. Speaker, there are only 10 members of the Judiciary Committee who sat on the committee during the impeachment investigation in 1974. Six are Democrats, four Republicans. Next year there will only be six.

How quickly time passes, and how quickly we forget, yet everything that is passing today before our eyes has a very familiar ring: Stonewalling, covering up, refusal to respond to congressional requests for facts that are clearly within the power of the Congress to obtain.

I can only say this, that if we do not uphold the right of this institution to obtain from the executive branch whatever information is needed to fulfill our public responsibilities, then we might as well go out of business, fold up our committees, and just indulge ourselves with pleasantries and the passage of niceties, instead of doing the job the people elected us to do and which we have been charged to do by the Constitution and our oath of office.

The issue raised here transcends partisanship. The issue is whether the Members of this institution have the will to maintain its ability to see that the laws we enact are faithfully and effectively executed.

Mr. CLAUSEN. Mr. Speaker, I yield such time as he may consume to the gentleman from New York (Mr. Green).

Mr. GREEN. Mr. Speaker, I think it is important to spell out what this vote is about.

We are not voting about whether Mrs. Gorsuch has run EPA well or badly.

We are not voting about whether the Reagen administrations environmental policies are sound or unsound.

We are not even voting about the problem of toxic waste.

Instead, we are voting on the rights of Congress.

I regret that the Democratic leadership has given us less than half a day between the time the committee report was made available and the time when we must vote to review that report.

But, as I analyze the report, the issue comes down to whether a committee of this House can require documents, even though leaking of those documents—in this case relating to the settlement position the Government would take in litigation-would plainly prejudice the Federal Government. I think our position in the House must be that, at least in domestic matters like this, it can. It is our responsibility to discipline our Members if they act improperly. I do not think the executive branch can deny us documents on the assumption that our Members will act improperly.

I shall therefore vote for the resolu-

Mr. LEVITAS. Mr. Speaker, I yield 2 minutes to the gentleman from New York (Mr. Scheuer).

Mr. SCHEUER. Mr. Speaker, I want to express my deep esteem to the gentlemen on the other side of the aisle who have stood up courageously and nobly. And brush partisan considerations aside in defending the institutional integrity of this body. I refer specifically to the gentlemen from New York, Mr. Green, and especially Mr. Molinari for his fine and moving statement, and the gentleman from Illinois (Mr. Crane).

I take great pride in the fact that they have helped us identify this not as a partisan issue but as an issue that goes right to the heart of our ability to carry out our constitutional oversight function, to supervise and scrutinize the operation of Government programs by the executive branch.

The fact that they have done so, the fact that they have reached across the aisle, should indicate to the Nation, Mr. Speaker, the gravity which we attach to the Environmental Protection Agency Administrator's wrong at EPA, not only in their specific inadequacies flouting of our constitutional responsibility. To oversee implementation of the Superfund.

I rise in support of the matter now before the House to cite EPA Administrator Ann Gorsuch for contempt of Congress.

I do so in recognition of this body's legitimate right of access to information that is necessary for the Congress to discharge its constitutional responsibility.

In the case before us, EPA and this administration has seen fit to withhold information on EPA's Superfund program that the Congress must have to insure that the law is carried out as intended.

The administration contends that this information is "enforcement sensitive" and, therefore, subject to executive privilege.

I find this argument totally without merit.

What the administration is really doing is hiding the facts about EPA's enforcement of Superfund from the Congress and the American people.

This leads me to believe that there is something very wrong with EPA's Superfund program and this administration's environmental protection policies in general.

This very morning at a hearing of my subcommittee on NRARE, we received a sworn affidavit from a recently resigned EPA assistant inspector general attesting to the fact that a top EPA official consciously and deliberately attempted to harass, intimidate, and fire one of the agencies most competent Superfund experts.

His only crime apparently was speaking out in the exercise of his constitutionally guaranteed right of free speech and criticizing EPA shortcomings in Superfund enforcement.

This hearing provided one more chip in the growing mosaic which portrays an agency totally out of step with its proper role in a representative democracy.

We cannot allow the withholding of information vital to our constitutional oversight function and we cannot allow and condone intimidation of Environmental Protection Agency employees who do properly perform their duties.

We cannot allow this critical issue to be swept under the rug and ignored, and any attempt to do so should be vehemently opposed.

The quality of our environment and the health of our citizens are at stake here.

I therefore find it necessary to support this action today and I urge my colleagues to join in preserving this body's constitutional oversight obligations and in fulfilling our obligations to the American people.

Mr. CLAUSEN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, this is truly a serious matter, one of the most serious matters that this House of Representatives has considered in the period of

time I have been privileged to serve in this House. I want to reiterate that this is not a partisan matter. As a matter of fact, I have done everything I can to avoid it becoming recognized as a partisan matter, as has the gentleman from Georgia.

I want to state categorically that there is no one in this House that I have more genuine respect for than the gentleman from Georgia (Mr. Levitas) who in my judgment is a man of impeccable integrity.

Mr. Speaker, I fully support the efforts of the Committee on Public Works and Transportation to inquire into the manner in which Superfund legislation is being carried out, and I recognize that access to the development of documents is critical to the success of such oversight efforts.

Further, I yield to no one in my efforts to enforce the clean water laws and in particular to the controlling of our toxic substances and my desire to uphold the prerogatives of the House of Representatives.

Therefore, it is a matter of considerable regret and disappointment to me that a conflict with the administration over access to files had been allowed to deteriorate into confrontation reflected in this proposal to cite the EPA Administrator for contempt of Congress.

I have believed throughout and continue to believe that this dispute can and should be resolved through negotiation leading to committee access to the documents in question and, therefore, accomplishing far more quickly what the contempt citation presumably is supposed to achieve when one considers the full range of potential court action that could be involved in this matter.

To date it has not been possible to develop, in as important a matter as a citation for criminal contempt, the same sort of strong, bipartisan consensus that normally characterizes the work of the Committee on Public Works and Transportation. That consensus over the years has not been achieved easily and I am very disappointed over the fact that we have not been able to achieve this.

But the principal issue, I think, and the concern of the administration is the question of precedent. I do not believe the administration is desirous of depriving the Congress of access to legitiniate requests for information to carry out its investigation. I do not believe that they are desirous of holding back on environmental enforcement information.

What I do believe is that they are concerned about some of the enforcement sensitive information and, even more importantly, concerned over the precedent that could actually cause problems in enforcement in other areas going beyond the environmental protection issue.

I am talking about areas of drug traffic and I am talking about organized crime as well as some of the SEC matters.

Mr. Speaker, the contempt power of Congress is an extraordinary power and should not be used unless all other avenues have been exhausted. The committee's action I think fails to recognize that EPA agreed to turn over to the committee a substantial amount of information, including some sensitive documents.

It would have been far more appropriate had the committee accepted the documents, analyzed them, and then used the knowledge thus derived to argue for any additional documents indicated. Indeed, the committee in my view would have been in a much stronger position had it done so.

As the gentleman from Colorado, Mr. Brown, correctly referred in his remarks, the Administrator, Ms. Gorsuch, has attempted to cooperate with the committee. Her refusal to comply fully with our subpena is a direct response to her instructions from the President and the Department of Justice.

### □ 2110

It is for that reason that I have serious reservations about issuing a contempt citation for the EPA Administrator when she is only following instructions from the President and the Department of Justice.

The legal issues are extremely complex and in my view could have benefited from extensive analysis.

The materials requested so far go far beyond the issue of how an agency is implementing the law. It involves such sensitive issues as prosecution strategy which involves a totally separate agency, the Justice Department. We may be plowing new ground in injecting the Congress into matters of prosecutorial discretion, tactics and strategy. This is not to say that such issues could not have been resolved given sufficient time. But they could well have required a mechanism along the lines of the U.S. district court finding which I mentioned earlier as one possibility.

One final point. One of the Members made a telling point during our full committee meeting on this matter. To paraphrase his point was this: We sought certain documents and failing to obtain them issued a subpena which was not complied with in full. The failure to comply was on the instructions of the Justice Department and the President.

Assuming this House votes a contempt citation, and a grand jury is convened and an indictment is handed down and a trial results in a conviction, who can doubt but that the President will pardon the Administra-

tor whose only transgression has been compliance with his instructions.

We still will not have achieved what started out as the original purpose of the exercise, acquisition of the file material in furtherance of our investigation. We would have failed in our purpose and achieved nothing but needless controversy. The upshot would reflect no great credit on this body.

So I therefore would urge the Members to reject this motion and lend their support to alternative efforts to resolve this dispute in as amicable and productive a manner as possible. I am very concerned about the gravity of creating this constitutional crisis when I genuinely believe a better solution is available.

Mr. LEVITAS. Mr. Speaker, will the

gentleman yield?

Mr. CLAUSEN. I yield to the gentleman from Georgia.

Mr. LEVITAS. I thank the gentle-

man for yielding.

I take this time first of all to say to the Members that there is no one in this Chamber I consider a better friend than the gentleman from Cali-

fornia (Mr. CLAUSEN).

I say to my colleagues, the gentleman from California is truly a good man. He is a person who has worked for the best interests of his district, his State, and this Nation. And I want to say before we proceed to a vote that the gentleman from California did everything within his power to avoid this constitutional crisis of confrontation that we are here tonight dealing with.

If the suggestions and recommendations of the gentleman from California had been accepted by officials in the administration, many, many days ago, we would not be here tonight and this crisis would have been avoided.

I would like to also say that other Members of the minority, both on the subcommittee and the leadership, also worked very hard with all of us to

avoid our being here tonight.

I know that the choices that many Members are going to have to make are difficult choices. This is a matter of gravity, this is a matter that has to be resolved. And as we approach that vote, I just want everybody in this Chamber to know that the gentleman from California, a good man, did everything he could to avoid this confrontation.

Mr. CLAUSEN. I thank the gentle-

Mr. LEVITAS. Mr. Speaker, I yield 2 minutes to the gentleman from New York (Mr. LaFalce), from Love Canal.

Mr. LaFALCE. Mr. Speaker, I think I have considerable experience with lawsuits that have been brought regarding environmental issues. There is a dilemma that is very often faced when a lawsuit is brought.

When a lawsuit is brought, you must make the worst possible allegations that can be made. That is the nature

of a lawsuit. When you do this, there is a tendency on the part of the bureaucracies to then bend over backward trying to justify those allegations and withhold any information that might differ from the worst possible scenario that has been posed in the lawsuit.

Truth is difficult to come by. The bureaucracies will not reveal truth.

Now, when the administration makes a judgment either not to bring a lawsuit or makes a judgment that they want to settle the case, you have

the exact opposite situation.

Mr. Speaker, whether the executive branch is bringing a lawsuit or whether the executive branch has made the decision to settle a lawsuit, the entire machinery of the executive branch attempts to justify that decision. The interest of the public can very often be secondary to the justification of the decision. Truth can become irrelevant.

There is only one way that we can protect the public and that is by having disclosure of as much information as there possibly can be, at least to the body that represents the public interest, the House of Representatives and the Senate, the Congress of the

United States.

The issue is quite clear. It happens to be our power to have information to make a judgment as to whether the executive branch is faithfully discharging those laws we have enacted. Reluctantly, we must pass this resolution of contempt.

Mr. LEVITAS. Mr. Speaker, I yield 2 minutes to the gentleman from Louisi-

ana (Mr. BREAUX).

Mr. BREAUX. Mr. Speaker, we are debating really probably one of the most important health issues that will ever come before this Congress, how we are going to handle the disposal of toxic wastes which in fact can cause birth defects and other more serious impediments.

From the attention the national press is giving it, perhaps if we had a pay raise amendment we would get more attention from them on such an

important issue.

When I first came to the Committee on Public Works and Transportation and looked at this issue, my original position was to be against the resolution because I felt that it could have been worked out. I felt certainly that it should have been worked out. But after months and months of trying to work it out, we have come to the conclusion which I think is inescapable that it cannot be worked out other than by a resolution of this Congress.

What we are talking about is some 9,000 toxic waste sites in this country and how they are being cleaned up and whether prosecutions are being handled in a responsible manner.

My own State of Louisiana just recently levied a \$600,000 fine against a company for discharging toxic wastes. And we see examples of EPA looking at these cases and levying a \$25,000 fine in Connecticut, a \$25,000 fine in New Jersey for sites that are going to cost \$10 and \$20 million to clean up.

We have found that what they are doing is taking the very lowest minimum potential fine and then negotiating down from there. And what they tell us is that we cannot look at the documents because they are enforcement strategy documents.

I would submit that they are lack of enforcement strategy documents, that they do not want Congress or anyone else to look at because of what they might reveal.

I would submit that you and I and all of us cannot do a good job of seeing that the law that we pass is being properly enforced unless we look behind the scenes and see how the settlements are being handled, too.

Mr. LEVITAS. Mr. Speaker, I yield 1 minute to the gentleman from Maryland (Mr. MITCHELL).

Mr. MITCHELL of Maryland. Mr. Speaker, I intend to vote with the gentleman from Georgia. I have followed this debate very carefully. I asked for this minute to point out that tonight I think the House acted in its finest and best tradition.

#### □ 2120

Mr. Speaker, I think the debate tonight represents the U.S. House of Representatives at its finest and highest tradition. No matter which side you are on in this issue, we saw reasoned debate take place. We saw Members address issues without anger, without violence, without being obstreperous.

I just wanted to share with you my idea. I know you feel at times, I wonder what is going on in the House of Representatives? I wonder why we act as we do; but tonight you acted, it seemed to me, in the finest tradition that one could expect of any legislative body and I think that needs to go on the record.

Mr. LEVITAS. Mr. Speaker, I yield 1 minute to the gentleman from Pennsylvania (Mr. EDGAR).

Mr. EDGAR. Mr. Speaker, I just would like to rise in support of this resolution.

I think that the gentleman from Georgia and the other members of the committee have laid out the case well. I want to associate myself with the remarks of the gentleman from Maryland (Mr. MITCHELL). I think the debate has been clear and concise and I hope that the Members of the House have looked carefully at the documents. This is a historic moment. It is a moment of difficult choices, but it is a choice that we have to make.

I commend the gentleman from Georgia for his work in this particular area that has been thoughtful, responsive and patient.

I think that the action that is taken tonight, as regrettable as it is, is a difficult action, but it is an action that must be taken.

Mr. Speaker, my colleagues have thoroughly aired the legal arguments surrounding this case. As one who is somewhat familiar with the environmental movement and actions of the Government affecting the environment, I think we ought to try to put the citation in perspective.

The gentleman from New York listed the number of environmental bills and acts which have stalled in the 97th Congress. I think we ought to face the fact that everyone here knows-the regressive polices of this administration have stalled progress on environmental legislation. At every turn the President, and the EPA, and Secretary Watt have proposed to weaken the law, to eliminate protections provided by Government regulation, to pander to industry and the polluters of the environment who are not forced to live with the mess they make of our world. We must achieve a balance of economic growth and concern for our environment, but we have seen a pattern over the past 2 years of indecent disregard for the natural resources which are our fundamental national treasury.

Ann Gorsuch did not labor long hours and late nights to enact the Superfund or the Clean Water Act; the people in this room did. Now we have entrusted the enforcement of these laws to bureaucrats who have an arrogant disregard of their duties, and will not even inform us of the actions they have undertaken. For those of us who have invested years of our lives to making environmental law, it is an outrage to know that our intent is being ignored, our trust is being violated, and our very right to information is being denied.

This is what this confrontation is about. From the beginning the environmental policies of this administration have shyed away from daylight. In his campaign President Reagan ridiculed concern for the environment, and until now we have not had the courage to confront that ridicule.

But, now we know that the progress we have made over the last dozen or so years will not be easily turned back. Memorandums from the Attorney General or even from the President himself cannot shield the true purposes or activities of those charged with a sacred trust. I feel confident that we will pass this resolution and reassure the American people that we hold their safety and health above all legalisms and privileges claimed by an irresponsible executive.

Mr. LEVITAS. Mr. Speaker, I yield myself 2 minutes.

Mr. Speaker, we are rapidly approaching the end of this debate. I want to thank the Members of the House on both sides of the issue for their participation in this extremely important decision.

I want to emphasize in closing, this is not a partisan issue. It is an issue that fundamentally deals with the responsibilities under the Constitution

of the U.S. Congress.

It is not a happy decision, but it is a decision we have got to face up to. We have that responsibility. We cannot discharge the awesome task of oversight without information and we cannot let the executive branch of government in this administration or any administration to make the judgment as to what information this Congress, representing the American people, has the right to receive.

Mr. Speaker, I ask my colleagues, vote for this resolution, assert the prerogatives as well as uphold the responsibilities of the U.S. Congress. That is

our duty.

I urge you to join in supporting this resolution.

Mr. HOWARD. Mr. Speaker, I yield

myself 2 minutes.

Mr. HOWARD. Mr. Speaker, as has been stated, this is an historic moment in this body and as is so often the case, historic moments are not necessarily happy ones. This has been a very trying and difficult debate for all Members.

I would like to say that I believe the Members of the House on both sides have been truly statesmanlike and I am very, very proud to be a Member of this body at this time and very, very proud to have colleagues of the caliber of all of you.

Never before has this happened, because never before has a contempt citation been passed by the Congress of the United States concerning an offi-

cial at such a high level.

In just the past few years, this kind of an issue has been negotiated before it got to this point. Four former Secretaries, two Republican and two Democratic, provided the Congress with the information which we were entitled to before it got here, either after subcommittee or full committee action; former Secretary of Commerce Rogers Morton; former Secretary of State Henry Kissinger; former Secretary of HEW Joseph Califano; former Secretary of Energy Charles Duncan.

If we do not tonight uphold the right of this U.S. Congress, we may never have the opportunity again; so I urge all Members to vote for this resolution. I want to thank you for your patience. I want to thank you for giving us the additional hour and the additional 16 minutes beyond that.

We want to make sure that all Members have the opportunity to get to the floor here to cast his most historic vote. So I hope that you will please

forgive me one more time for asking to move a call of the House.

• Mrs. SCHNEIDER. Mr. Speaker, I rise in support of the resolution of contempt citing the Administrator of the Environmental Protection Agency for failure to cooperate in providing various documents to the Committee on Public Works and Transportation. It is never pleasant to reach such an impasse between two branches of government, and I believe that events have not in anyone's memory in this House deteriorated to this point. But, cooperation has not been forthcoming and it is our constitutional responsibility to oversee the programs we authorize.

I offer the following two thoughts for my colleagues consideration:

First, the privilege accorded to the executive to withhold information has always pertained to matters affecting the national security. Can information pertaining to the 160 hazardous waste sites in question possibly compare to sensitive CIA and Department of Defense national security data? Again, this cannot be treated as a partisan game but as a necessary denial of an inappropriate application of executive privilege.

Second, we must remember that the serious national problem of toxic pollution of our environment—particularly those many sites which we have probable cause to believe are particularly hazardous to the health of our citizens—is simply too critical a responsibility of this body to permit the denial of information we must have to carry out our responsibilities.

Mr. Speaker, simply put, the issue is not whether the parties involved are Democrats, Republicans, or anyone else. The issue is whether this information which is necessary for the proper conduct of congressional responsibilities, can be denied on grounds of executive privilege. I submit that it cannot, and the resolution must be supported.

Again, I regret that affairs have deteriorated to this unnecessary point, but they have. I must support this resolution. Politics cannot come before the welfare of the citizens of our country.

• Mrs. SCHROEDER. Mr. Speaker, rather than discuss the rights of the Congress to oversee the enforcement efforts of the executive branch. I would like to indulge my colleagues in a recollection. A similar situation arose in the late 1970's when several Members of the minority subjected an official of the Carter administration to numerous requests for documents. Ironically, that official was also a Coloradan. He complied with requests from Congress by providing not a few documents, but literally boxes of documents.

Without presuming an opinion on what the documents now requested will show, Congress certainly has ample reason to be suspect the Environmental Protection Agency's record on enforcement. This makes the request all the more justifiable.

EPA's entreatments about protecting the success of its investigations are laughable when one considers EPA's well-known mishandling of Thriftway, Sanderson, and Hugh Kaufman cases. So too are protests that Congress cannot keep a secret. The morale problem at EPA has created a sieve of its own making. The Agency need not look elsewhere for leaks.

Congressional oversight has been an ideal of both parties, let us stop pretending there is something else at stake.

• Mr. FRENZEL. Mr. Speaker, this matter is as disturbing to me as it is to other Members. It is a complex and sensitive constitutional matter which is best resolved in other bodies.

Whatever we do, we are likely to make a mistake. I do not want to vote away the House's rights to information and I do not want to vote against the rights of my Chief Executive.

Despite my affection for, and my natural inclination to support my President, and my doubts about the necessity for the Congress to have the papers in question, I am compelled to vote in favor of the congressional right to information. I cannot vote to limit the House's authority.

I have no confidence that the House's case will be sustained by a court. I am disappointed that the subcommittee could not negotiate with the EPA. Nevertheless, I must vote with the House on this citation.

• Mr. McGRATH. Mr. Speaker, I rise in opposition to the resolution which would cite Ann Gorsuch, Administrator of the Environmental Protection Agency, for contempt of Congress, and I want to set forth my reasons for doing so.

First, the Committee on Public Works has called for the production of some 787,000 pieces of paper. The committee has not demonstrated its need for all of this material in order to conduct a proper inquiry. Further, many of the documents requested by the committee are potentially evidence in litigation against firms which are allegedly violating Federal law.

Second, the Administrator's actions in no way show contempt of Congress. She appeared voluntarily before the committee, and her invocation of privilege came at the express order of the President of the United States and the Attorney General. She has remained willing to try and resolve the dispute in a manner which recognizes the preprogatives of the executive branch and respects the need of Congress to effectively perform its oversight function.

Third, the alacrity with which this contempt citation has been rushed through committee to the floor is not something for which this body can be proud. The resolution has moved from the subcommittee to the floor in less than 2 weeks. The 118 page committee report was available to Members only several hours ago. We are dealing in this case with a major constitutional question, and Members should, at the very least, have a respectable amount of time to study the evidence and make informed judgments. If the purpose of this contempt citation was, in some way a partisan attempt to embarrass the administration, then the leadership has certainly accomplished its goal.

Finally, there is very little indication that the EPA has improperly defied the will of the Congress in performing its responsibility to clean up toxic waste sites. The vast majority of EPA documents have been open for committee and subcommittee inspection.

and remain open.

• Mr. BROWN of California. Mr. Speaker, I have followed with great concern the proceedings of the House Public Works Committee and the Energy and Commerce Committee regarding documents being withheld by the Environmental Protection Agency involving hazardous waste disposal sites eligible for funding under the Federal Superfund program. I rise in support of the House resolution under

consideration.

The small community of Glen Avon in my district in southern California has known for years about the trauma of being located near a dangerous toxic waste disposal facility. The Stringfellow Acid Pits is on the Superfund priority list for receipt of Federal dollars. The State has been working on an interim solution to clean up the site which entails trying to secure the site against continued leaching of chemicals into the groundwater. A final solution has not yet been devised but I will continue to work toward this goal.

Our community had great hopes when the Superfund legislation was passed by Congress 2 years ago. I am sure that communities across the Nation were relieved to learn of the much needed help they would receive for cleaning up their most serious hazardous waste sites. But the great hopes have not materialized. I am disappointed that progress has been so slow in the case of the Stringfellow Acid Pits. State and local government activities involving this site could serve as a model for other sites because of the excellent work of all those involved. And while there has been Federal cooperation, it is now beginning to look like foot dragging.

Mr. Speaker, it is for these reasons that I rise in support of this House resolution. The public has a right to know what is holding up action in sites all over the country. The Congress has a right to know what is holding up the funding of a program we authorized. The reason we passed Superfund legislation was not primarily to collect cleanup costs from responsible parties although this is very important. This law was passed to clean up abandoned hazardous waste sites. The public and the Congress need to know what is holding this program up. I urge adoption of the resolution.

• Mr. RINALDO. Mr. Speaker, As the Administrator of the Environmental Protection Agency, Ann Gorsuch has my utmost respect. She is a competent manager and has been most helpful in expediting approval of Federal funding for the cleanup of dangerous hazardous waste sites in my New Jersey district. Earlier this year, after I had requested action on the cleanup of the Lone Pine landfill in Freehold Township, Mrs. Gorsuch came to New Jersey to endorse a joint agreement with Gov. Thomas Kean to provide \$3.4 million in Federal funds for Lone Pine and for the Kin-Buc landfill in Edison Township. In 1981, when Federal funds were about to be shut off for the final stage of the cleanup operation at the Chemical Control Corp., site in Elizabeth, I appealed to EPA for continued funding. The immediate response was to allocate additional funds for the project, and today the site is virtually free of toxic pollutants, with \$4 million of the cleanup cost having been contributed by the Federal Government.

In voting on the resolution to cite Mrs. Gorsuch for contempt of Congress, I had to weigh my respect for her against my obligation, as a Member of Congress, to see that Federal environmental protection laws continue to be actively enforced. My vote was not directed at her personally, but against the unconstitutional attempt by the executive branch to withhold information that is essential for Congress to fulfill its obligation to see that a crucial Federal program is effectively carried out.

As the State with one of the most serious hazardous waste problems, New Jersey has a vital interest in the enforcement of the Superfund program. I actively supported the creation of Superfund 2 years ago, but Congress responsibility does not end with the establishment of a Federal program. We have a continuing obligation to oversee its implementation, to insure that Federal agencies carry out the letter and the spirit of the law. This congressional responsibility overrides all consideration of personalities or partisan lovalties.

Without being able to examine the subpensed documents, the Public Works Committee is in the position of having to accept the administration's

assurance that the necessary enforcement actions are being taken in the cases to which the documents relate. This situation completely negates the committee's authority to independently evaluate the performance of the ex-ecutive branch in carrying out the laws made by Congress. If Congress is unable to exercise this authority, we will be at the mercy of each administration's whim and each successive administration will be able to decide for itself which of the laws are to be enforced and which may be neglected.

As a rationale for refusing to produce the subpensed documents, the administration has given the thinnest of excuses, telling us that House Members in whose district hazardous wastes are located might alert the site operators that they were under investigation. This accusation is an affront to the integrity of the Members of Congress who are doing everything possible to see that the waste sites which threaten the health and safety of thousands of people are cleaned up.

When sensitive issues relating to national security and intelligence are considered, Congress routinely follows procedures that prevent the information from being disseminated to the general public. There is absolutely no reason why similar precautions could not be taken by the Public Works Committee in overseeing the enforcement of our environmental protection laws.

In view of the urgent need to eliminate hazardous waste dump sites, I find it extremely unfortunate that the administration has decided to take a hard line and refuse to cooperate with Congress, when we should be working together on the problem. I am hopeful that the administration will soften its stance so that we can continue to make progress in the prosecution of the real villains, those who threaten the public's health and safety by illegally dumping hazardous wastes.

Mr. SKELTON. Mr. Speaker, I rise to join my colleague from Georgia (Mr. Levitas) in expressing alarm at the cavalier, not to mention illegal, attitude apparently held by the administration and the Attorney General concerning the recent and extraordinary congressional contempt citation issued to Environmental Protection Agency Administrator Ann Gorsuch.

Mr. Speaker, it has been 10 years since we last saw this kind of all-powerful disregard of the law from an administration and never has one branch of the Government so arrogantly flaunted the powers, rights, and prerogatives of another branch.

Yesterday, the EPA announced a number of priority sites where life threatening hazardous waste is to be cleaned up under the "superfund law" enacted by this body. My home State of Missouri has at least five such sites. The citizens of Missouri have the right to know if they can count on the administration to carry out the law as they have been directed to do. Unfortunately, we may never know until it is too late. By their actions, the administration has made it clear that they will not tell us if they can avoid it.

Mr. Speaker, I would remind the Members and the administration that ample precedent exists for us to circumvent the formal statutory contempt procedure and order our Sergeant at Arms to take direct action. As for the Attorney General, I would remind him that obstruction of justice is certainly a high crime or misdemeanor within the purview of the Constitution. I urge this body and its Judiciary Committee to take such action as is necessary: direct, legislative, or otherwise to enforce our rights.

#### CALL OF THE HOUSE

Mr. HOWARD. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The call was taken by electronic device, and the following Members responded to their names:

The Clerk announced the following

### On this vote:

Mr. Fuqua for, with Mr. Craig against. Mr. Derrick for, with Mr. Badham against. Mr. Flippo for, with Mr. Burgener against.

Mr. Williams of Ohio for, with Mr. Jeffries against.

Mr. RALPH M. HALL changed his vote from "nay" to "yea."

So the resolution was agreed to.

A motion to reconsider was laid on the table.

The result of the vote was announced as above recorded.

### GENERAL LEAVE

Mr. LEVITAS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the resolution just agreed to.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Georgia?

There was no objection.

### TWO FIGHTER PILOTS IN A DOGFIGHT

(Mr. DORNAN of California asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DORNAN of California. Mr. Speaker, last week during debate on the Defense appropriations bill, the gentleman from Iowa (Mr. HARKIN) offered an amendment regarding the cutoff of funds to the CIA for the purpose of assisting any individual or group in carrying out military activities in or against the Sandinista Government of Nicaragua. The text of the amendment offered can be located in the Congressional Record of December 8 on Page 29457.

During the debate I rose in opposition to the amendment. Mr. Speaker, as you well know, often times in the heat of debate, Members say things which later, after contemplation and due consideration for the conduct of reasoned debate, one might wish had never been said. This is the situation I find myself in with regard to a small portion of an otherwise stimulating

exchange of opinions.

The day after the debate my friend, Tom Harkin-and I call him my friend even though we have quite different views on a broad range of issuescame to see me. Tom and I have traveled together not only to mainland China but to other countries, and let me just say that he has always conducted himself and presented himself in a manner that represents well our country and the best interests of our country. Tom and I have something else in common besides a burning desire to see things firsthand, up close and draw our own conclusions. IWT I call it, "I was there." We have both been fighter pilots and I know Tom shares my love and enthusiasm for aviation and the need for the United States to continue our lead in aviation throughout the world. This is one area in which we certainly agree. Even though we have different views on many issues, I have always found Tom to be reasonable and considerate of the views of others with whom he disagrees. So the day after the Nicaragua debate, Tom came to see me and brought to my attention the written words in the RECORD of what I had said the evening before. (Congression-AL RECORD, Dec. 8, 1982, on Page 29465 and continue through 29466.)

He asked that I reread those words and consider the impact of those words as they appeared in cold print. In reflection my remarks were not fair. I said, "I overheard Mr. HARKIN

in Communist China as he put on a Mao hat say, and he did not realize I could hear him, 'It is an honor to wear a worker's hat.'" The trip in question was taken in January 1981 and, quite frankly, it is unfair to try to recall exactly what people said almost 2 years ago in casual conversation. And so, I apologize to my friend for ascribing to him a quote which he sincerely maintains he never said. Again speaking fairly, most of us on that trip, bought one of those strange little Mao hats. including me, and wore them in good humor even taking pictures of one another. In fact one Member of the group, whom of course I will not name, had a full Mao outfit on at one point. But this is all done in good spirit and nothing more than that should read into it.

Mr. Harkin and I do find ourselves on different sides of just who we should be supporting in Central America. But certainly Mr. Harkin has never accused me of supporting terrorists and I in no way want to imply that he in any way supports terrorist activities either.

#### ALCOHOL ABUSE AND ALCOHOL-ISM AND DRUG ABUSE AMEND-MENTS OF 1982

Mr. WAXMAN. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 6458) an Act to amend the Public Health Service act and related laws to consolidate the laws relating to the Alcohol, Drug Abuse, and Mental Health Administration, the National Institute of Mental Health, the National Institute of Alcohol Abuse and Alcoholism, and the National Institute on Drug Abuse, and for other purposes, with a Senate amendment thereto, and concur in the Senate amendment with an amendment.

The Clerk read the title of the bill. The Clerk read the Senate amendment as follows:

Strike out all after the enacting clause and insert: That this Act may be cited as the "Alcohol Abuse and Alcoholism and Drug Abuse Amendments of 1982".

# TITLE I—ALCOHOL ABUSE AND ALCOHOLISM

### REFERENCE

SEC. 101. Except as otherwise specifically provided, whenever in this title an amendment or repeal is expressed in terms of an amendment to, or a repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment, and Rehabilitation Act of 1970.

### SHORT TITLE

SEC. 102. The first section is amended by striking out "Prevention, Treatment, and Rehabilitation" and inserting in lieu thereof "Research and Prevention".

# CONGRESSIONAL FINDINGS AND DECLARATION OF PURPOSE

SEC. 103. (a) Section 2(a)(3) (42 U.S.C. 4541(a)(3)) is amended by striking out

"\$43,000,000,000" and inserting in lieu thereof "\$49,000,000,000".

(b) Section 2(b) (42 U.S.C. 4541(b)) is amended to read as follows:

"(b) It is the policy of the United States and the purpose of this Act to provide leadership in the national effort to reduce the incidence of alcoholism and alcohol-related problems through—

"(1) a continued Federal commitment to research into the behavioral and biomedical etiology, the treatment, and the mental and physical health and social and economic consequences of alcohol abuse and alcoholism."

"(2) a commitment to-

"(A) extensive dissemination to States, units of local government, community organizations, and private groups of the most recent information and research findings with respect to alcohol abuse and alcoholism, including information with respect to the application of research findings; and

"(B) the accomplishment of such dissemination through up-to-date publications, demonstrations, educational programs, and other appropriate means;

"(3) the provision of technical assistance to research personnel, services personnel, and prevention personnel in the field of alcohol abuse and alcoholism;

"(4) the coordination, in cooperation with all governmental and nongovernmental sources of assistance for alcohol abuse and alcoholism, of Federal, State, and local planning for, and effective use of, Federal assistance to States to meet the urgent needs of special populations:

"(5) the provision of a Federal response to alcohol abuse and alcoholism which recognizes the importance of State decisionmaking with respect to treatment needs;

"(6) the development and encouragement of prevention programs designed to combat the spread of alcoholism, alcohol abuse, and the abuse of other legal and illegal drugs;

"(7) the development and encouragement of effective occupational prevention and treatment programs within Government and in cooperation with the private sector; and

"(8) the provision of a Federal response to alcohol abuse and alcoholism which encourages the greatest participation by the private sector, both financially and otherwise, and concentrates on carrying out functions relating to alcohol abuse and alcoholism which are truly national in scope.".

### REPORTS BY THE SECRETARY

Sec. 104. Section 102 (42 U.S.C. 4552) is amended—

(1) by inserting "(a)" before "The";

(2) by striking out paragraphs (1) and (2) and inserting in lieu thereof the following:

"(1) submit to the Congress on or before the expiration of the one-year period beginning on the date of enactment of this Act, and every three years thereafter, a report which shall include—

"(A) a description of the actions taken and funds expended under this Act, and an evaluation of the effectiveness of such actions and expenditures:

"(B) a description of the extent to which Federal and State programs, departments, and agencies are concerned and are dealing effectively with the problems of alcohol abuse and alcoholism, including information with respect to services provided for alcohol abuse and alcoholism under part B of title XIX of the Public Health Service Act;

"(C) current information on the health consequences of using alcoholic beverages;

"(D) a description of current research findings with respect to alcohol abuse and alcoholism:

"(E) such recommendations for legislation and administrative action as the Secretary considers appropriate; and

"(F) such other information as the Secretary considers appropriate;";

(3) by redesignating paragraphs (3) and (4) as paragraphs (2) and (3), respectively; and

(4) by adding at the end thereof the following new subsection:

"(b)(1) In order to obtain the information required under subsection (a)(1)(B) with respect to services provided for alcohol abuse and alcoholism under part B of title XIX of the Public Health Service Act, the Secretary shall work with appropriate national organizations to insure that State and local governments use compatible means of data collection so that uniform national data with respect to the provision of such services will be available to the States and to the Secretary.

"(2) In carrying out paragraph (1) of this subsection and subsection (a)(i)(B), the Secretary may not require any State to submit any information which is not required under section 1916(a) of the Public Health Service Act.".

#### ABOLITION OF INTERAGENCY COMMITTEE

Sec. 105. Section 103 (42 U.S.C. 4553) is repealed.

#### GRANTS AND CONTRACTS

SEC. 106. Section 311(c)(4) (42 U.S.C. 4577(c)(4)) is amended by inserting "(including Native Hawaiians and Native American Pacific Islanders)" after "Native Americans".

#### RESEARCH

Sec. 107. Section 501(b) (42 U.S.C. 4585(b)) is amended—

- (1) by striking out "make available" in paragraph (1) and inserting in lieu thereof "disseminate";
- (2) by inserting "including the development of curriculum materials," after "appropriate means," in paragraph (1);
- (3) by striking out paragraph (3) and inserting in lieu thereof the following:
- "(3) make grants to universities, hospitals, laboratories, and other public or nonprofit institutions, and individuals for projects for such research, investigations, experiments, demonstrations, studies, and evaluations as are recommended by the National Advisory Council on Alcohol Abuse and Alcoholism and such Council shall give special consideration to projects relating to—
- "(A) the relationship between alcohol abuse and domestic violence;
- "(B) the effects of alcohol use during pregnancy:
- "(C) the impact of alcoholism and alcohol abuse on the family, social system, and health service systems;
- "(D) the relationship between the abuse of alcohol and other drugs;
- "(E) the effect on the incidence of alcohol abuse and alcoholism of social pressures, legal requirements respecting the use of alcoholic beverages, the cost of such beverages, and the economic status and education of users of such beverages;
- "(F) the cost and effectiveness of treatment, prevention, and intervention among youth, women, and the elderly; and
- "(G) the interrelationship between alcohol use and other health problems;"; and

(4) by inserting "or the impact of alcohol abuse on other health problems" before the semicolon in paragraph (5).

#### AUTHORIZATION OF APPROPRIATIONS

SEC. 108. The first sentence of section 504(a) (42 U.S.C. 4587(a)) is amended by inserting before the period a comma and "\$32,911,000 for the fiscal year ending September 30, 1983, and \$32,911,000 for the fiscal year ending September 30, 1984"

#### NATIONAL COMMISSION ON ALCOHOLISM

SEC. 109. Section 18(b)(10) of the Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment, and Rehabilitation Act Amendments of 1979 (42 U.S.C. 4541 note) is amended by inserting "Native Hawaiians, Native American Pacific Islanders," after "Alaskan Natives,"

## TITLE II-DRUG ABUSE

#### REFERENCE

SEC. 201. Except as otherwise specifically provided, whenever in this title an amendment or repeal is expressed in terms of an amendment to, or a repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Drug Abuse Prevention, Treatment, and Rehabilitation Act.

SEC. 202. The first section is amended by striking out "Prevention, Treatment, and Rehabilitation" and inserting in lieu thereof "Research and Prevention"

#### CONGRESSIONAL FINDINGS

SEC. 203. Section 101 (21 U.S.C. 1101) is amended-

(1) by striking out "is rapidly increasing" in paragraph (1) and inserting in lieu there-

of "has rapidly increased";
(2) by striking out "abuse, especially heroin addiction," in paragraph (3) and in-

neroin addiction, in paragraph (3) and inserting in lieu thereof "abuse";
(3) by striking out "drug abuse, especially the causes, and" in paragraph (5), and inserting in lieu thereof "the";

(4) by inserting "and State" before "drug abuse programs" in paragraph (6);

(5) by striking out paragraphs (7), (8),

(10), and (11); (6) by redesignating paragraphs (9), (12), (13), and (14) as paragraphs (7), (8), (9), and

(10), respectively;

(7) by striking out "the Federal Government" in paragraph (7) (as redesignated by clause (6) of this section) and by inserting in lieu thereof "Federal and State governments"; and

(8) by inserting "State activities and" before "Federal international" in paragraph (9) (as redesignated by clause (6) of this section).

### DECLARATION OF NATIONAL POLICY

SEC. 204. Section 102 (21 U.S.C. 1102) is amended to read as follows:

### "§ 102. Declaration of national policy

"The Congress declares that it is the policy of the United States and the purpose of this Act to utilize the comprehensive resources of the Federal Government to provide a leadership role in reducing the incidence, as well as the social and personal costs, of drug abuse in the United States and to develop and assure the implementation of a comprehensive, coordinated longterm Federal and State strategy to combat drug abuse. To reach these goals, the Congress further declares that it is the policy of the United States and the purpose of this chapter to meet the problems of drug abuse through-

"(1) a continued Federal commitment to research into the behavioral and biomedical etiology of, the treatment of, and the mental and physical health and social and economic consequences of, drug abuse;

'(2) a commitment to-

"(A) extensive dissemination to States, units of local government, community organizations, and private groups of the most recent information and research findings with respect to drug abuse, including information with respect to the application of research findings; and

"(B) the accomplishment of such dissemination through up-to-date publications, demonstrations, educational programs, and

other appropriate means;

(3) the provision of technical assistance to research personnel, services personnel, and prevention personnel in the field of drug abuse;

"(4) the coordination, in cooperation with all other governmental and nongovernmental sources of assistance for drug abuse, of Federal, State, and local planning for, and effective use of, Federal assistance to States to meet the urgent needs of special popula-

"(5) the provision of a Federal response to drug abuse which recognizes the importance of State decisionmaking with respect to

treatment needs:

"(6) the development and support of community-based prevention programs;

"(7) the development and encouragement of effective occupational prevention and treatment programs within the Government and in cooperation with the private sector;

"(8) the provision of a Federal response to drug abuse which encourages the greatest participation by the private sector, both financially and otherwise, and concentrates on carrying out functions relating to drug abuse which are truly national in scope.".

#### ELIMINATION OF ANNUAL REPORT

SEC. 205. Section 207 (21 U.S.C. 1117) is repealed.

REVIEW OF NATIONAL DRUG ABUSE STRATEGY

SEC. 206. Section 305 (21 U.S.C. 1165) is amended by striking out "each year" and inserting in lieu thereof "each even-numbered year, beginning with 1982".

### REPORTS

SEC. 207. (a) Section 405(b) (21 U.S.C. 1172(b)) is amended-

(1) by striking out "with respect to each fiscal year" in the matter preceding para-

graph (1):

(2) by inserting "including a description of current research findings with respect to drug abuse," after "United States," in para-

(3) by striking out "and" after the comma the last place it appears in paragraph (4);

(4) by striking out the period at the end of paragraph (5);

(5) by inserting after paragraph (5) the

following new paragraphs: "(6) current information on the health consequences of marihuana use and such proposals for legislative and administrative action as the Secretary considers appropri-

ate: and

'(7) a description of the extent to which Federal and State programs, departments, and agencies are concerned and are dealing effectively with the problems of drug abuse, including information with respect to services provided for drug abuse under part B of title XIX of the Public Health Service Act."; and

(6) by striking out "each year" in the last sentence and inserting in lieu thereof "each even-numbered year, beginning with 1984".

(b) Section 405 is further amended by adding at the end thereof the following new subsection:

"(c)(1) In order to obtain the information required under subsection (b)(7) with respect to services provided for drug abuse under part B of title XIX of the Public Health Service Act, the Secretary shall work with appropriate national organizations to insure that State and local governments use compatible means of data collection so that uniform national data with respect to the provision of such services will be available to the State and to the Secre-

"(2) In carrying out paragraph (1) of this subsection and subsection (b)(7), the Secretary may not require any State to submit any information which is not required under section 1916(a) of the Public Health

Service Act."

(c) Effective January 15, 1984, the Marihuana and Health Reporting Act (42 U.S.C. 242 note) is repealed.

#### GRANTS AND CONTRACTS

SEC. 208. Section 410(d) (21 U.S.C. 1177(d) is amended by striking out "native Americans" and inserting in lieu thereof "Native Americans (including Native Hawaiians and Native American Pacific Islanders)"

#### AUTHORIZATION OF APPROPRIATIONS FOR RESEARCH

SEC. 209. Section 503(c) (21 U.S.C. 1193(c) is amended by inserting before the period a comma and "\$46,356,000 for the fiscal year ending September 30, 1983, and \$46,356,000 for the fiscal year ending September 30,

#### DISSEMINATION OF MATERIALS

SEC. 210. Section 301 of the Public Health Service Act (42 U.S.C. 241) is amended by adding at the end thereof the following new subsection:

"(c) In carrying our subsection (a)(1), and in order to educate the public with respect to the health hazards of drug abuse, the Secretary shall take such actions as may be necessary to ensure the complete and widespread dissemination of up-to-date publications of the National Institute on Drug Abuse relating to the most recent research findings with respect to such health hazards,"

## TITLE III-MISCELLANEOUS

### PUBLIC HEALTH SERVICES CORPS

SEC. 301. Section 207(a)(1) of the Public Health Services Act (42 U.S.C. 209(a)(1)) is amended by inserting "psychology," after "pharmacy".

The Clerk read the House amendment to the Senate amendment, as fol-

In lieu of the matter proposed to be inserted by the Senate amendment insert the following:

TITLE I—ALCOHOL AND DRUG ABUSE AMENDMENTS

### SHORT TITLE: STATEMENT OF POLICY

SEC. 101. (a) This title may be cited as the "Alcohol and Drug Abuse Amendments of 1982'

(b) It is the policy of the United States and the purpose of this title to provide leadership in the national effort to reduce the incidence of alcoholism and alcohol-related problems and drug abuse through-

(1) a continued Federal commitment to research into the behavioral and biomedical etiology, the treatment, and the mental and physical health and social and economic consequences of alcohol abuse and alcoholism and drug abuse;

(2) a commitment to-

(A) extensive dissemination to States. units of local government, community organizations, and private groups of the most recent information and research findings with respect to alcohol abuse and alcoholism and drug abuse, including information with respect to the application of research findings; and

(B) the accomplishment of such dissemination through up-to-date publications, demonstrations, educational programs, and other appropriate means;

(3) the provision of technical assistance to research personnel, services personnel, and prevention personnel in the field of alcohol abuse and alcoholism and drug abuse;

(4) the development and encouragement of prevention programs designed to combat the spread of alcoholism, alcohol abuse, drug abuse, and the abuse of other legal and

illegal substances:

- (5) the development and encouragement of effective occupational prevention and treatment programs within Government and in cooperation with the private sector;
- (6) the provision of a Federal response to alcohol abuse and alcoholism and drug abuse which encourages the greatest participation by the private sector, both financially and otherwise, and concentrates on carrying out functions relating to alcohol abuse and alcoholism and drug abuse which are truly national in scope.
- THE ALCOHOL, DRUG ABUSE, AND MENTAL HEALTH ADMINISTRATION AND THE NATIONAL INSTITUTE OF MENTAL HEALTH, THE NATIONAL INSTITUTE ON ALCOHOL ABUSE AND ALCOHOL-ISM, AND THE NATIONAL INSTITUTE ON DRUG

SEC. 102. (a)(1) Title V of the Public Health Service Act is transferred to the end of the Public Health Service Act and redesignated as title XXI and sections 501 through 515 are redesignated as sections 2101 through 2115, respectively.

(2) Sections 217(c), 217(d), and 384 of the Public Health Service Act (42 U.S.C. 218 and 278) are each amended by striking out "501"

and inserting in lieu thereof "2101".

(b)(1) The Public Health Service Act is amended by inserting after title IV a new

title designated as follows:

"TITLE V-ADMINISTRATION AND CO-ORDINATION OF THE NATIONAL IN-STITUTE OF MENTAL HEALTH, THE NATIONAL INSTITUTE ON ALCOHOL ABUSE AND ALCOHOLISM, AND THE NATIONAL INSTITUTE ON DRUG

"PART A-ADMINISTRATION AND INSTITUTES".

(2) Section 201 of the Act of May 14, 1974 (42 U.S.C. 3511) is transferred to title V of the Public Health Service Act established by paragraph (1), redesignated as section 501, and amended-

(A) by striking out "of Health, Education, and Welfare" each place it occurs;

(B) in subsection (c), by striking out "of the Public Health Service Act"

(C) by amending subsection (d) to read as follows:

"(d) To educate the public with respect to the health hazards of alcoholism, alcohol abuse and drug abuse, the Administrator shall take such actions as may be necessary to ensure the widespread dissemination of current publications of the National Institute on Alcohol Abuse and Alcoholism and the National Institute on Drug Abuse relating to the most recent research findings with respect to such health hazards.

(D) by adding at the end the following: "(e)(1) There shall be in the Administration an Associate Administrator for Prevention to whom the Administrator shall delegate the function of promoting the prevention research programs of the National Institute of Mental Health, the National Institute on Alcohol Abuse and Alcoholism, and the National Institute on Drug Abuse and coordinating such programs between the institutes and between the institutes and other public and private entities

'(2) On or before January 1, 1984, and annually thereafter, the administrator, acting through the associate Administrator for Prevention, shall submit to the Congress a report describing the prevention activities (including preventive medicine and health promotion) undertaken by the Administration, the National Institute of Mental Health, the National Institute on Alcohol Abuse and Alcoholism, and the National Institute on Drug Abuse. The report shall include a detailed statement of the expenditures made for the activities reported on and the personnel used in connection with

such activities.

"(f) The Administrator shall establish a process for the prompt and appropriate response to information provided the Administrator respecting (1) scientific fraud in connection with projects for which funds have been made available under this Act, and (2) incidences of violations of the rights of human subjects of research for which funds have been made available under this title. The process shall include procedures for the receiving of reports of such information from recipients of funds under this title and taking appropriate action with respect to such fraud and violations.".

(3) Section 101 of the Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment, and Rehabilitation Act of 1970 is transferred to title V of the Public Health Service Act, inserted after the section 501 inserted by paragraph (2), redesignated as

section 502, and amended-

(A) in subsection (a)—(i) by striking out "this Act" the first time it occurs and inserting in lieu thereof "this

(ii) by striking out "assigned to the Secretary of Health and Human Services (hereafter in this Act referred to as the 'Secretary')" and inserting in lieu thereof "relating to alcohol abuse and alcoholism assigned to the Secretary", and
(iii) by striking out "of the Public Health

Service Act", and

(B) by amending the section heading to read as follows:

#### "NATIONAL INSTITUTE ON ALCOHOL ABUSE AND ALCOHOLISM"

(4) Section 501 of the Drug Abuse Prevention, Treatment, and Rehabilitation Act is transferred to title V of the Public Health Service Act, inserted after the section 502 inserted by paragraph (3), redesignated as section 503, and amended-

(A) in subsection (a)-

(i) by inserting "Sec. 503." before "(a)", (ii) by striking out "this title" and insert-

ing in lieu thereof "this section",
(iii) by striking out "of the Secretary of Health and Human Services (hereinafter in this title referred to as the 'Secretary') with respect to drug abuse prevention functions" and inserting in lieu thereof "relating to drug abuse assigned to the Secretary by this

ct", and (iv) by striking out "of the Public Health Service Act",

- (B) by striking out "(hereinafter in this title referred to as the 'Director')" in subsection (b)(1), and
- (C) by striking out the section heading "§ 501. Establishment of Institute." and inserting in lieu thereof the following:

#### "NATIONAL INSTITUTE ON DRUG ABUSE".

(5) Subsection (a) of section 406 of the Drug Abuse Prevention, Treatment, and Rehabilitation Act is transferred to section 503 (as so redesignated), inserted after subsection (d), and redesignated as subsection (e).

(6) Section 455 of the Public Health Service Act is inserted in title V of the Public Health Service Act after the section 503 inserted by paragraph (4) of this subsection

and redesignated as section 504.

(7) The following sections are inserted in title V of the Public Health Service Act after the section 504 inserted by paragraph

#### "REPORTS ON ALCOHOLISM, ALCOHOL ABUSE, AND DRUG ABUSE

"SEC. 505. (a) The Secretary shall submit to Congress on or before January 15, 1984, and every three years thereafter a report-

"(1) containing current information on the health consequences of using alcoholic beverages.

'(2) containing a description of current research findings made with respect to alcohol abuse and alcoholism, and

(3) containing such recommendations for legislation and administrative action as the Secretary may deem appropriate.

"(b) The Secretary shall submit to Congress on or before January 15, 1984, and every three years thereafter a report-

"(1) describing the health consequences and extent of drug abuse in the United States;

"(2) describing current research findings made with respect to drug abuse, including current findings on the health effects of marihuana and the addictive property of tobacco: and

'(3) containing such recommendations for legislation and administrative action as the Secretary may deem appropriate.

### "PEER REVIEW

'SEC. 506. (a) The Secretary, after consultation with the Directors of the National Institute of Mental Health, the National Institute on Alcohol Abuse and Alcoholism, and the National Institute on Drug Abuse shall by regulation require appropriate technical and scientific peer review of biomedical and behavioral research and development grants, cooperative agreements, and contracts to be administered through the National Institute of Mental Health, the Na-tional Institute on Alcohol Abuse and Alcoholism, and the National Institute on Drug Abuse.

"(b) Regulations promulgated under subsection (a) shall require that the review of grants, cooperative agreements, and contracts required by the regulations be conducted-

"(1) in a manner consistent with the system for scientific peer review applicable on the date of the enactment of this section to grants, cooperative agreements, and contracts under this Act for biomedical and behavioral research, and

(2) to the extent practical, by peer review groups performing such review on or before such date.

"(c) The members of any peer review roup established under such regulations shall be individuals who by virtue of their training or experience are eminently quali-

fied to perform the review functions of the group and not more than one-fourth of the members of any peer review group established under such regulations shall be officers or employees of the United States.

"(d) The Administrator of the Administration shall establish procedures for periodic, technical, and scientific peer review of research at the National Institute of Mental Health, the National Institute on Alcohol Abuse and Alcoholism, and the National Institute on Drug Abuse. Such procedures shall require that

"(1) the reviewing entity be provided a written description of the research to be re-

viewed: and

"(2) the reviewing entity provide the advisory council of the institute involved with such description and the results of the review by the entity.'

(8) The following heading is inserted in title V of the Public Health Service Act after the section 506 inserted by paragraph

(7):

#### "PART B-RESEARCH "Subpart 1-Alcohol Abuse and Alcoholism.

(9) Sections 501, 503, and 504 of the Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment, and Rehabilitation Act of 1970 are transferred to the subpart 1 of part B of title V of the Public Health Service Act established by paragraph (8), redesignated as sections 510, 511, and 512, respectively, and amended as follows:

(A) Section 510 (as so redesignated) is

amended-

(i) by striking out "the Institute" in subsection (a) and inserting in lieu thereof "the National Institute of Alcohol Abuse and Alcoholism (hereinafter in this subpart re-

ferred to as the 'Institute')",
(ii) by striking out "make available through publications and other appropriate means" in subsection (b)(1) and inserting in lieu thereof "desseminate through publications and other appropriate means (includ-

ing the development of curriculum materi-

(iii) by striking out "; and such Council shall give" and all that follows in subsection (b)(3) and inserting in lieu thereof the following: ", giving special consideration to projects relating to-

(A) the relationship between alcohol

abuse and domestic violence,

"(B) the effects of alcohol use during

pregnancy,
"(C) the impact of alcoholism and alcohol abuse on the family, the workplace, and systems for the delivery of health services,

(D) the relationship between the abuse

of alcohol and other drugs,

"(E) the effect on the incidence of alcohol abuse and alcoholism of social pressures, legal requirements respecting the use of alcoholic beverages, the cost of such beverages, and the economic status and education of users of such beverages,

"(F) the interrelationship between alcohol

use and other health problems, and

"(G) the comparison of the cost and effectiveness of various treatment methods for alcoholism and alcohol abuse and the effectiveness of prevention and intervention programs for alcoholism and alcohol abuse.

(iv) by inserting "or the impact of alcohol abuse on other health problems" before the semicolon in subsection (b)(5), and

(v) by amending the section heading to read as follows:

"ALCOHOL ABUSE AND ALCOHOLISM RESEARCH".

(B) Section 511 (as so redesignated) is amended-

(i) by striking out the last sentence of subsection (a),

(ii) by striking out the second sentence of subsection (b).

(iii) by striking out "of the Public Health Service Act (42 U.S.C. 292a)" in subsection (b), and

(iv) by striking out subsection (c).

(C) Section 512 (as so redesignated) is amended to read as follows:

#### "AUTHORIZATIONS OF APPROPRIATIONS

"SEC. 512. There are authorized to be appropriated to carry out this subpart \$33,480,000 for fiscal year 1983 and \$45,776,000 for fiscal year 1984. Of the funds appropriated under this section for any fiscal year, not more than 35 percent may be obligated for grants under section

(10) The following heading is inserted in title V of the Public Health Service Act after the section 512 inserted by paragraph (9):

### "Subpart 2-Drug Abuse Research"

(11) Section 503 of the Drug Abuse Prevention, Treatment, and Rehabilitation Act is transferred to the subpart 2 of part B of title V established by paragraph (10), redesignated as section 515, and amended—

(A) by striking out "The Director" the first time it occurs in subsection (a) and inserting in lieu thereof "The Director of the

National Institute of Drug Abuse' (B) by amending subsection (b) to read as

follows:

"(b) In carrying out the activities described in subsection (a), the Secretary, acting through the Institute, may—

"(1) collect and disseminate through publications and other appropriate means, including the development of curriculum materials, information as to, and the practical application of, the research and other activities under this section,

'(2) make grants or enter into contracts with individuals and public and nonprofit entities for the purpose of determining the causes of drug abuse in a particular area,

and

"(3) make grants to and enter into contracts with individuals and public and private nonprofit entities for research respecting improved drug maintenance and detoxification techniques and programs."

(C) by amending subsection (c) to read as

follows

(c) For the purposes of subsections (a) and (b), there are authorized to be appropriated \$47,374,000 for fiscal year 1983 and \$56,175,000 for fiscal year 1984."

(D) by striking out the section heading and inserting in lieu thereof the following:

### "Drug Abuse Research,"

(E) by inserting before "(a)" in subsection (a) the following: "Sec. 515."

(12) The following headings are inserted in title V of the Public Health Service Act after the section 515 inserted by paragraph

"PART C-MISCELLANEOUS PROVISONS RELAT-ING TO ALCOHOL ABUSE AND ALCOHOLISM AND DRUG ABUSE

Subpart 1-Provisons Relating to Alcohol Abuse and Alcoholism".

(13) Sections 301, 201, 321, and 333 of the Comprehensive Alcohol Abuse and Alcohol-ism Prevention, Treatment, and Rehabilitation Act of 1970 are transferred to the part C of title V established by paragraph (12), redesignated as sections 520, 521, 522, and 523, respectively, and amended as follows:

(A) Section 520 (as so redesignated) is amended-

(i) by striking out "the Institute" in subsection (a) and inserting in lieu thereof "the National Institute of Alcohol Abuse and Alcoholism'

(ii) by striking out "section 321" in subsection (a)(4) and inserting in lieu thereof "sec-

tion 522", and

(iii) by striking out "under this Act and under the Drug Abuse Prevention, Treat-ment, and Rehabilitation Act" and inserting in lieu thereof "under this title"

(B) Section 521 (as so redesignated) is

amended-

(i) by striking out "section 413(b) of the Drug Abuse Prevention, Treatment, and Rehabilitation Act" in subsection (b)(4) and in-

serting in lieu thereof "section 525",
(ii) by striking out "title" in subsection (d)
and inserting in lieu thereof "section", and

(iii) by striking out subsection (e).

(C) Section 522 (as so redesignated) is amended by striking out "of the Public Health Service Act" in subsection (a).

(14) The following heading is inserted in part C of title V of the Public Health Service Act after section 523 (as so redesignated):

#### "SUBPART 2-PROVISIONS RELATING TO DRUG ABUSE".

(15) Section 502 of the Drug Abuse Prevention, Treatment, and Rehabilitation Act is transferred to title V of the Public Health Service Act, inserted after the heading inserted by paragraph (14), redesignated as section 524, and amended—

(A) by striking out "The Director" in subsection (a) and inserting in lieu thereof "The Director of the National Institute on

Drug Abuse"

(B) by striking out ", to promote the pur-

poses of this Act," in subsection (b)(2), (C) by striking out "section 407" in subsection (d) and inserting in lieu thereof "section 526".

(D) by striking out "under this Act and under the Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment, and Rehabilitation Act of 1970" in subsection (d) and inserting in lieu thereof "under this

(E) by striking out the section heading and inserting in lieu thereof: "Technical Assistance to State and Local Agencies", and

(F) by inserting before "(a)" in subsection (a) the following: "Sec. 524.".

(16)(A) Section 413 of the Drug Abuse Prevention, Treatment, and Rehabilitation Act is transferred to title V of the Public Health Service Act, inserted after the section 524 inserted by paragraph (15), redesignated as section 525, and amended-

(i) by striking out the section heading and

inserting in lieu thereof:

### "DRUG ABUSE AMONG GOVERNMENT AND OTHER EMPLOYEES";

(ii) by inserting before "(a)" the following: 'Sec. 525."; and

(iii) by striking out "section 201(b) of the Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment, and Rehabilitation Act of 1970" in subsection (b)(4) and inserting in lieu thereof "section 521"

(B) Sections 407 and 408 of the Drug Abuse Prevention, Treatment, and Rehabilitation Act are transferred to title V of the Public Health Service Act, inserted after the section 525 inserted by subparagraph (A), redesignated as sections 526 and 527 and amended as follows:

(i) Section 526 (as so redesignated) is amended-

(I) by striking out the section heading and inserting in lieu thereof:

"ADMISSION OF DRUG ABUSERS TO PRIVATE AND PUBLIC HOSPITALS";

and

(II) by inserting before "(a)" in subsection (a) the following: "Sec. 526.".

(ii) Section 527 (as so redesignated) is

amended-

(I) by striking out the section heading and inserting in lieu thereof:

"CONFIDENTIALITY OF PATIENT RECORDS"

(II) by inserting before "(a)" in subsection (a) the following: "Sec. 527."; and (III) by striking out "of Health and Human Services" in subsection (g).

(c)(1) Sections 102, 103, and 502 of the Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment, and Rehabilitation Act of 1970 are repealed.

(2) Sections 405 and 504 of the Drug Abuse Prevention, Treatment, and Rehabili-

tation Act are repealed.

(d) Title V of the Medical Facilities Construction and Modernization Amendments of 1970 (Public Law 91-296) is repealed.

ALCOHOL AND DRUG ABUSE AND MENTAL HEALTH REPORTS BY THE SECRETARY

SEC. 103. (a) The Secretary of Health and Human Services shall submit to the Congress, on or before January 15, 1984, report describing the extent to which Federal and State programs, departments, and agencies are concerned and are dealing effectively with-

(1) the problems of alcohol abuse and alcoholism.

(2) the problems of drug abuse, and (3) mental illness.

(b) The report required by subsection (a) shall include information with respect to the services provided for alcohol abuse, alcoholism, drug abuse, and mental health under part B of title XIX of the Public Health Service Act. To obtain information respecting such services, the Secretary shall work with appropriate national organizations to ensure that State and local governments use compatible means of collecting data respecting such services so that uniform national data with respect to the provision of such services will be available to the States and to the Secretary.

(c) In compling data for the report required by subsection (a), the Secretary may not require any State to submit any infor-mation which is not required under section 1916(a) of the Public Health Service Act.

### DRUG ABUSE STRATEGY REPORT

SEC. 104. (a) Section 305 of the Drug Abuse Prevention, Treatment, and Rehabilitation Act (21 U.S.C. 1165) is amended to read as follows:

"§ 305. Report.

"The President shall submit to the Congress, on or before August 1, 1984, and every two years thereafter, a written report de-scribing the strategy. The report shall specify the objectives, nature, and results of the strategy and shall contain an accounting of funds expended under title II.".
(b) Section 207 of such Act (21 U.S.C.

1117) is repealed.

#### TITLE II-HEALTH PLANNING **AMENDMENTS**

### HEALTH PLANNING AMENDMENTS

SEC. 201. (a)(1) This title may be cited as "Health Planning Amendments of

(2) Whenever in this title an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Public Health Service Act.

(b)(1) Section 1512(b)(2)(A) (42 U.S.C. 3001-1(b)(2)(A)) is amended—

(A) by striking out "shall have a staff" and inserting in lieu thereof "shall, to the extent practicable, have a staff", and (B) by striking out "at least".

(2) Section 1512(b)(2)(B) is amended—

(A) by striking out "not less than five" and inserting in lieu thereof "not less than

(B) by striking out "rounded to the next highest" and inserting in lieu thereof

highest" and inserting in lieu thereof "rounded to the nearest", and (C) by striking out "one hundred thousand" each place it occurs and inserting in lieu thereof "three hundred thousand".

(c) Section 1513(f) (42 U.S.C. 3001-2(f)) is amended by striking out "shall review" and inserting in lieu thereof "shall, upon the request of the appropriate State health planning and development agency, review".
(d)(1) Section 1515(b)(2) (42 U.S.C 3001-

4(b)(2)) is amended-

(A) by striking out "(which, except as otherwise provided in this paragraph, may not exceed twenty-four months)", and

(B) by striking out the second, third, and

fourth sentences

(2) Section 1515(b) is amended by striking out paragraph (3) and by redesignating paragraph (4) as paragraph (3).

(c) Section 1515(c)(3)(B) is amended—
(A) by striking out "for a period not to exceed twelve months" in the first sentence, and

(B) by striking out the second sentence. (3) Section 1515(d) is amended by striking out "another entity" and inserting in lieu thereof "an entity". (d) Section 1516(c) (42 U.S.C. 3001-5(c)) is

amended by striking out paragraph (2).
(e)(1) Section 1521(b)(2) (42 U.S.C 300m(b)(2)) is amended by striking out the second and third sentences of subparagraph (B) and by striking out "or by the secretary upon ninety day's notice to the Governor

in subparagraph (C).
(2) Section 1521(b)(4)(B) is amended—

(A) by striking out "for a period not to exceed twelve months" in the first sentence,

(B) by striking out the second sentence (3)(A) The first sentence of section 1521(b)(2)(B) (42 U.S.C. 300m(b)(2)(B)) is amended by striking out "the period set forth in subsection (d)(1)(3)" and inserting

in lieu thereof "March 31, 1985" (B) Section 1521(d) is repealed.

(f) Section 1523(a)(6) (42 U.S.C. 300m-2(a)(6)) is amended (1) by striking out "Review" and inserting in lieu thereof 'Review, to the extent feasible and", and (2) by inserting a comma before "at least

(g)(1) Section 1531(5) (42 U.S.C. 300n(5)) is amended by striking out "\$250,000" each place it occurs and inserting in lieu thereof

\$500,000"

(2) Section 1531(6) is amended by striking out "\$600,000" each place it occurs and inserting in lieu thereof "\$1,000,000".

(3) Section 1531(7) is amended by striking out "\$400,000" each place it occurs and inserting in lieu thereof "\$500,000".

(h) Section 1537 (42 U.S.C. 300n-6) is

amended to read as follows:

"AUTHORIZATIONS FOR FISCAL YEAR 1983 "SEC 1537. The following amounts are au-

thorized to be appropriated for fiscal year

"(1) \$42,000,000 for grants and contracts under section 1516(a).

"(2) \$21,400,000 for grants and contracts under section 1525(a).

"(3) \$1,500,000 for grants and contracts under section 1534(a).'

(i) Title XV is amended by adding at the end the following:

#### "REPEAL OF TITLE

"SEC. 1538. (a) Effective March 31, 1985, this title is repealed.

"(b) The repeal specified in subsection (a) shall not affect any suit, action, or other proceeding lawfully commenced before the effective date of such repeal, and all such suits, actions, and proceedings shall be continued, proceedings therein had, appeals therein taken, and judgments therein rendered, in the same manner and with the same effect as if subsection (a) had not been enacted.".

### TITLE III-MISCELLANEOUS **AMENDMENTS**

#### MISCELLANEOUS

SEC. 301. (a)(1) Section 311(c)(4) of the Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment, and Rehabilitation Act of 1970 (42 U.S.C. 4577(c)(4)) is amended by inserting "(including Native Hawaiians and Native American Pacific Islanders)" after "Native American".

(2) Section 18(b)(10) of the Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment, and Rehabilitation Act Amendments of 1979 (42 U.S.C. 4541 note) is amended by inserting "Native Hawaiians, Native American Pacific Islanders," after

Alaskan Natives.

(3) Section 410(d) of the Drug Abuse Prevention, Treatment, and Rehabilitation Act (21 U.S.C. 1177(d)) is amended by striking out "native Americans" and inserting in lieu thereof "Native Americans (including Native Hawaiians and Native American Pacific Islanders)".

(b) Section 475(a) of the Public Health Service Act (42 U.S.C. 2891-4(a)) is amended (1) by striking out "the Directors of the National Institute of Mental Health, the Na-tional Institute on Alcohol Abuse and Alcoholism, and the National Institute on Drug Abuse and", and (2) by striking out ", the National Institute on Alcohol Abuse and Alcoholism, the National Institute on Drug

Abuse," in paragraph (2).
(c)(1) Title 35, United States Code, is amended by adding after section 154 the fol-

lowing new section:

"\$155. Patent term extension "(a) Notwithstanding section 154, the term of each of the following patents shall

be extended in accordance with this section: "(1) Any patent which encompasses within its scope a composition of matter which is a new drug product if during the regulatory review of the product by the Federal Food and Drug Administration-

(A) the owner of record of the patent for such product was notified by the Federal Food and Drug Administration on February 20, 1976, that such product's application was not approvable under section 505(b)(1) of the Federal Food, Drug, and Cosmetic Act;

"(B) the owner of record of the patent conducted a health effects test to evaluate the carcinogenic potential of the product;

"(C) the product was approved on December 18, 1979, under section 505(b)(1) of such Act: and

(D) the facility for the production of the product was approved by the Federal Food and Drug Administration on May 26, 1981.

"(2) Any patent which encompasses within its scope a process for using the composition of matter described in paragraph

The term of any patent described in paragraph (1) or (2) shall be extended for a period equal to the period beginning February 20, 1976, and ending May 26, 1981.

'(b) The owner of record of any patent described in subsection (a), his heirs, successors, or assigns, shall notify the Commissioner of Patents and Trademarks within ninety days of the date of enactment of this section of the number of the patent to be extended. On receipt of such notice, the Commissioner shall promptly issue to the owner of record of each patent to be extended a certificate of extension, under seal. stating the fact and length of the extension and identifying the composition of matter or process for using such composition to which such extension is applicable. Such certificate shall be recorded in the official file of each patent extended and such certificate shall be considered as part of the original patent, and an appropriate notice shall be published in the Official Gazette of the Patent and Trademark Office.'

(2) The analysis for chapter 14 of such title 35 is amended by adding at the end the following:

"155. Patent term extension.".

(d) Section 1804 of the Public Health Service Act (42 U.S.C. 300 b-3) is amended-

(1) by striking out "for the fiscal year ending September 30, 1982" in subsection (a) and inserting in lieu thereof "for the period beginning October 1, 1981, and ending March 31, 1983"; and (2) by striking out "December 31, 1982" in

subsection (b) and inserting in lieu thereof

'March 31, 1983".

(e) Section 1926(a)(4)(A) of the Public Health Service Act (42 U.S.C. 300y-5(a)(4)(B)) is amended by adding at the end the following: "For purposes of this paragraph, the term 'State funds' does not include any funds collected from patients or third-party payors by a community health center for the provision of health care services.

(f) Section 709(d) of the Public Health Service Act (42 U.S.C. 2921) is amended to

read as follows:

"(d) Funds appropriated under this title may be used by the Secretary to provide technical assistance in relation to any of the authorities under this title."

Mr. WAXMAN (during the reading). Mr. Speaker, I ask unanimous consent that the Senate amendment and the House amendment to the Senate amendment be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

The SPEAKER pro tempore. Is there objection to the original request of the gentleman from California?

Mr. MADIGAN. Mr. Speaker, reserving the right to object, I do so for the purpose of asking the gentleman from California to explain first exactly what the Senate amendment does and then also to explain the House amendment.

Mr. WAXMAN. Mr. Speaker, will

the gentleman yield?
Mr. MADIGAN. I yield to the gentleman from California.

Mr. WAXMAN. Mr. Speaker, earlier this year the House passed H.R. 6458, a bill which reauthorizes appropriations for Federal alcohol and drug abuse research programs. Later, the other body passed a similar bill.

I am pleased to announce that we have been able to settle our differences with the Senate without going to conference. I am proposing today an amendment that embodies our

agreement.

The amendment provides for a 2year authorization of appropriations for the research activities of the National Institute on Alcohol Abuse and Alcoholism and the National Institute on Drug Abuse. In addition, the amendment repeals or consolidates conflicting and outdated reporting requirements and increases the Federal emphasis upon research into alcohol and drug abuse prevention.

This compromise was reached because of the strong commitment by both House and Senate Members to strengthen two areas of health research which are essential to reducing the economic, social, and health costs

of alcoholism and drug abuse.

Drug and alcohol abuse seriously threaten the health and welfare of our citizens, stunt educational growth of our young people, and reduce the productivity of our workforce. If we are to lessen the effects and reduce the frequency of alcohol and drug abuse, a national commitment to a strong research agenda is critical.

The framework for such an agenda was contained in H.R. 6458 when it passed the House. That commitment is further strengthened by the productive contributions of our Senate col-

leagues.

The compromise extends for 2 years the authorization of appropriations for research activities of the National Institute on Drug Abuse and the National Institute on Alcohol Abuse and Alcoholism. The levels authorized reflect substantial increases over fiscal year 1982 funding but are consistent with the administration's policy and objectives for increasing research in these areas over the next 2 fiscal years

Although I would have preferred a longer, 3-year extension as contained in the original House passed bill, the Senate's request for a shorter period was not unreasonable in view of the major funding increases provided for

these programs.

The compromise also consolidates alcohol and drug abuse reporting requirements consistent with the original House bill. Several outdated reporting requirements have been repealed and others consolidated into two triennial reports submitted to the Congress.

Our agreement, like the original House bill, increases the emphasis upon prevention research by establishing a new position of Associate Administrator for Prevention within the Alcohol, Drug Abuse and Mental Health Administration (ADAMHA). The Associate Administrator is charged with promoting and coordinating prevention activities sponsored by the Na-tional Institute of Mental Health (NIMH), National Institute on Drug Abuse (NIDA) and the National Institute on Alcohol Abuse and Alcoholism (NIAAA).

The original bill also contained the requirement that each of the three ADAMHA research institutes establish an office to administer prevention research activities. These provisions have been removed and replaced by an annual report to Congress which details the prevention and health promotion activities of the agency. If prevention research activities are substantially increased during the 2 year authorization of this legislation, the establishment of individual prevention offices may not be necessary.

The House amendment also contains three provisions which would:

First, extend the patent term for a new drug product;

Second, make technical amendments to the health planning program; and

Third, extend the President's Commission for the Study of Ethical Problems in Medicine and Biomedical and Behavioral Research for 3 months.

Mr. Speaker I urge support for the House amendment and insert in the RECORD at this point an explanation of the research portions of the proposed compromise and a section-by-section analysis of technical amendments to, the health planning program.

EXPLANATION-HOUSE-SENATE COMPROMISE AGREEMENT

H.R. 6458-TITLE I, ALCOHOL AND DRUG ABUSE AMENDMENTS OF 1982

The proposed compromise agreement on H.R. 6458 provides for a two year extension of Federal research activities sponsored by the National Institute on Alcohol Abuse and Alcoholism (NIAAA) and the National Institute on Drug Abuse (NIDA). NIAAA and NIDA are research institutes of the Alcohol, Drug Abuse and Mental Health Administration (ADAMHA) which is an agency of the Department of Health and Human Services. The House had authorized a three year extension of alcohol and drug abuse research authorities. The Senate had authorized a two year extension.

### TECHNICAL REVISIONS

The principle purposes of ADAMHA and its three institutes are in the areas of research and education. The appropriate locus of the authority for these activities and relevant administrative entities is the Public Health Service Act (PHSA). The compromise consolidates Federal alcohol, drug abuse and mental health research activities and miscellaneous alcohol and drug abuse authorities within Title V of the PHSA.

In consolidating these authorities into a single Title of the PHSA, a careful analysis of the role of ADAMHA within the Public Health Service was conducted. The role of ADAMHA within the U.S. Public Health Service is unique. Although these activities include a strong biomedical component, its research and education functions involved social and behavioral disciplines that provide an important linkage between the social service and health fields.

The technical revision and consolidation of alcohol, drug abuse and mental health authorities within Title V of the Public Health Service Act reflects the Congress' support for maintaining ADAMHA as a discrete and independent agency of the U.S. Public Health Service.

#### PREVENTION

Increasing concern has been noted over the inadequate level of research and other support within the National Institute of Mental Health (NIMH), the National Institute on Alcohol Abuse and Alcoholism (NIAAA) and the National Institute on Drug Abuse (NIDA) for prevention research and prevention activities. The predominant program emphasis within the institute involves basic research activities or those relating to the treatment of mental illness, or alcohol and drug abuse. While these activities are appropriate priorities for the research mission of the Alcohol Drug Abuse Mental Health Administration (ADAMHA), identifiable prevention research in high priority areas should be increased and made a management objective of each institute.

The compromise establishes an administrative structure for expanding the prevention related activities of the ADAMHA. H.R. 6458 establishes a new position of Associate Administrator for Prevention within the ADAMHA administrative structure and requires the Administrator to submit annual report to the Congress describing and providing a detailed statement of expenditures for prevention activities of the

NIMH, NIAAA and NIDA.
The Associate Administrator for Prevention is responsible for promoting and coordinating the prevention related programs of the three ADMAHA research institutes. These activities include not only prevention research but also activities in education, preventive medicine and health promotion which may be conducted under authorities other than Title V of the Public Health Service Act.

The Associate Administrator for Prevention is charged with primary staff responsibility for preparation of the annual prevention report required by Section 2(b)(1) of H.R. 6548. Although the responsibilities of the new Associate Director are intended to be predominantly those outlined in statute. the Administrator of ADAMHA is authorized to assign other responsibilities consistent with the effective management of the

Administration.

The annual report submitted to Congress by the ADAMHA Administrator will be an important measurement of the Administration's compliance with congressional directives to increase prevention activities and the emphasis upon research in prevention. Significant progress is expected in delineating the scope of mental health, alcohol and drug abuse prevention activities as well as expanding the level of Federal financial support for prevention research relative to other research priorities.

### INFORMATION DISSEMINATION

The rapid growth in the past several years of the private voluntary sector working to prevent alcohol and drug abuse, particularly among our young people, has substantially increased the demand for accurate up-todate publications on alcohol and drug abuse.

Unfortunately, this demand has not been adequately met. Not only have available supplies of publications distributed by NIAAA and NIDA diminished, but some of the publications available have included dated and consequently erroneous information concerning alcohol and drug abuse.

It is imperative that the Institutes set a high priority on the dissemination of accurate up-to-date information to meet the needs of the public. Accordingly, H.R. 6458 specifically charges the Administrator of ADAMHA with ensuring the widespread dissemination of current and accurate publications of the NIAAA and NIDA.

In view of the critical need for these publications, the Committee believes that any general moratorium on government publications which may be imposed by the Office of Management and Budget or the Department of Health and Human Services should not apply to the dissemination of materials on the adverse health effects of alcohol and drug abuse.

#### MARTITIANA RESEARCH

The compromise increases the authorization of appropriations for research conducted by the National Institute on Drug Abuse (NIDA). H.R. 6458 authorizes \$46.356 million in Fiscal Year 1983 and \$56.175 million in Fiscal Year 1984. In the use of these additional funds the Institute should consider expanding its support of research into the

health effects of marijuana.

In the February 1982 report, "Marijuana the Institute of Medicine Health," (IOM) concluded a 15 month study on the health effects of marijuana. The report concluded that the effects of marijuana on human health "justified serious national concern." The IOM noted that what is currently known about the health effects was inadequate. In view of the extensive use of marijuana by young people, particularly teenagers, the IOM recommended that the Federal government increase its support of investigator initiated research grants.

The NIDA is the principal Federal research agency involved in marijuana research. In view of the increased level of Federal support for drug abuse research anticipated in Fiscal Year 1983 and Fiscal Year 1984, efforts should be made to expand the agency's marijuana research base into those high priority areas outlined in the IOM study. Particular attention, consistent with the availability of high quality proposals, should be focused on resolving conflicting data concerning chronic or irreversible effects of marijuana on the central nervous system and on behavioral or personality changes such as those frequently referred to as the "amotivational syndrome."

### SUMMARY OF HEALTH PLANNING AMENDMENTS TITLE II OF H.R. 6458

Subsec. (a).-Provides that the provisions of the section amend the Public Health Service Act.

Subsec. (b).—Amends Sections 1512(b)(2) (A) and (B) to reduce required Health Systems Agency staff from five overall and one per hundred thousand residents of the area to three overall and one per three hundred thousand residents of the area. This section codifies a policy in effect in 1982 and 1983 under provisions of the Supplemental Appropriations bill in 1982 and the Continuing Resolution in 1983.

Subsec. (c).-Amends subsection 1513(f) to provide that HSAs shall review and make recommendations concerning new institutional health services upon the request of

the appropriate State agency. Currently HSAs are required to perform such reviews.

Subsec. (d).—Consists of four amendments to Section 1515 regarding designation of Health Systems Agencies:

(1) amends paragraph (b)(2) to remove the limit on the period during which a HSA may be conditionally designated. Currently such

period is limited to 36 months.

(2) deletes paragraph (b)(3) which provides authority for the Secretary to terminate a conditionally designated HSA upon 90-day notice.

(3) amends subparagraph (c)(3)(B) remove the limit on the period during which an HSA which has previously been fully designated may be conditionally designated. Currently such period is limited to 12 months.

(4) amends subsection (d) to permit the same entity to be redesignated as an HSA Present law only allows the designation of

another entity.
Subsec. (e).—Amends Section 1516 by deleting paragraph (c)(2) which permits the Secretary to reduce amounts provided to HSAs. This provision will assure that grants to HSAs will continue to be made under the same formula used in previous years.

Subsec. (f).-Includes three amendments to Section 1521 with regard to the designa-

tion of State agencies.

(1) deletes the provisions of subparagraph (b)(2)(B) which require conditionally designated State agencies to progressively increase their functions. Also deletes provisions of subparagraph (b)(2)(C) which provide authority for the Secretary to terminate a conditionally designated State agency upon 90 days notice.

(2) amends subparagraph (b)(4)(B) to provide that there is no limit to the period during which a State agency which has previously been fully designated may be conditionally designated. A State agency re-turned to conditional designation is now limited to 12 months in such status

(3) amends subparagraph (b)(2)(B) and deletes subsection (d) to provide that a State agency may be conditionally designated until March 31, 1985. State agencies may now be conditionally designated, generally, only through January of 1983. Also repeals the penalty of loss of funds for programs under the Public Health Service Act for States without a fully designated agency.

Subsec. (g).-Amends Section 1526(a)(6) to require State agencies to review the appropriateness of currently offered institutional health services only to the extent such review is feasible. Under present law, State agencies must conduct such reviews.

Subsec. (h).-Amends Section 1531 to increase the value of projects that the State Certificate-of-Need programs must review. Specifically, the value of capital expenditues is increased to \$1,000,000 from \$600,000, the annual operating costs of institutional health services are increased to \$500,000 from \$250,000, and the value of major medical equipment is increased to \$500,000 from \$400,000.

Subsec. (1).—Authorized the following amounts for FY 1983:

(1) \$42,000,000 for grants to HSA's under Sec. 1516 (a):

(2) \$21,400,000 for grants to State Health Planning and Development Agencies under Sec. 1525 (a); and

(3) \$1,500,000 for grants and contracts for Centers for Health Planning under Sec. 1534 (a).

Subsec. (j).-Repeals Title XV as of March 31, 1985.

Subsec. (k).-Provides that a State may not use funds collected by a community health center from patient services to match Federal funds for the primary care block grant.

Sec. (1).-Provides authority for funds appropriated under Title VII to be used to provide technical assistance for Title VII pro-

Mr. MADIGAN. Specifically I would like to ask the gentleman if the Senate amendment does in fact provide lower authorization levels than were contained in the House bill and provides for a 2-year authorization rather than the 3-year authorization contained in the House bill?

Mr. WAXMAN. The gentleman is correct.

Mr. MADIGAN. And specifically with regard to the House amendment being considered now I would ask the gentleman if in fact what that House amendment contains is the text of two bills already passed by the House, one dealing with health planning that passed by a vote of 302 to 14, and the other dealing with the extension of the Biomedical Commission which was passed by the House by a unanimous voice vote?

Mr. WAXMAN. The gentleman is correct that these provisions are consistent with the bills which previously

were passed by the House.

Mr. MADIGAN. So the purpose of adding the House amendment is primarily to provide a vehicle to get action by the other body on bills the House has already enacted by overwhelming votes?

Mr. WAXMAN. Yes, the gentleman

is correct.

Mr. MADIGAN. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. there objection to the request of the gentleman from California?

There was no objection.

A motion to reconsider was laid on the table.

### GENERAL LEAVE

Mr. WAXMAN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the measure just considered.

The SPEAKER pro tempore. there objection to the request of the gentleman from California?

There was no objection.

### IMMIGRATION REFORM AND CONTROL ACT OF 1982

Mr. RODINO. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for consideration of the bill (H.R. 7357) to revise and reform the Immigration and Nationality Act, and for other purposes.

The SPEAKER pro tempore. The question is on the motion offered by

the gentleman from New Jersey (Mr. RODINO).

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. STANGELAND, Mr. Speaker, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device and there were-ayes 212, noes 65, not voting 156, as follows:

### □ 2220

Mr. RALPH M. HALL changed his vote from "no" to "aye."

So the motion was agreed to.

The result of the vote was announced as above recorded.

### IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill, H.R. 7357, with Mr. NATCHER in the

The Clerk read the title of the bill.

The CHAIRMAN. Pursuant to the rule, the first reading of the bill is dispensed with.

Under the rule, the gentleman from New Jersey (Mr. Rodino) will be recognized for 1 hour; the gentleman from New York (Mr. Fish) will be recognized for 1 hour; the gentleman from California (Mr. MILLER) will be recognized for 1 hour; the gentleman from Illinois (Mr. ERLENBORN) will be recognized for 1 hour; the gentleman from Texas (Mr. DE LA GARZA) will be recognized for 30 minutes, and the gentleman from Virginia (Mr. WAM-PLER) will be recognized for 30 minutes.

The Chair now recognizes the gentleman from New Jersey RODINO), the chairman of the commit-

Mr. RODINO. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, 10 years ago I took this well and implored my colleagues to adopt legislation which would respond to the serious problem of undocumented aliens.

It was evident to me then, based on extensive hearings I and my Immigration Subcommittee held around the country, that undocumented aliens were being exploited by unscrupulous employers, by landlords, and by many others who were quick to take advantage of their precarious immigration status and their fear of being turned over to the Immigration Service.

While we can debate at length the causes of this problem and possible solutions to it, there are certain basic facts which cannot be debated.

My subcommittee found at that time clear evidence that it was common practice for employers to threaten undocumented aliens with exposure if they complained about substandard wages and working conditions or the denial of fringe benefits.

We heard from many witnesses who indicated that unscrupulous employers would frequently make a convenient call to INS right before payday in an effort to have their undocumented workers apprehended and removed from this country before they were paid. In fact, I recall a study conducted by the Mexican Government at that time which indicated that 67 percent of the aliens returned to Mexico were not paid regularly or were owed wages at the time of their deportation.

Others who were the victims of crime were fearful of reporting these incidents to law enforcement authorities due to their fear of detection and deportation.

Since that time-the early seventies—the problem has grown much worse. Instead of the 1 or 2 million undocumented aliens estimated to be in this country in 1972, current guesstimates range from 3 to 12 million. Further, many employers, bolstered by our Government's failure to address this serious national problem, no longer hide the fact that they are employing undocumented aliens. While

many have argued that these aliens are merely doing the "dirty work" that Americans will not accept, it is clear that some displacement of U.S. workers does occur and that the presence of large numbers of such aliens has a direct effect on depressing wages and working conditions in a particular locality or industry.

Clearly, the undocumented alien has become the unfortunate victim of the failure of this Government and the Congress to resolve this intolerable sit-

In recent years we have also witnessed the development of sophisticated smuggling organizations which recruit and deliver undocumented aliens to employers throughout the United States. In some cases, this trafficking in Human Cargo has resulted in the tragic death of aliens who are left to die in the desert or to smother in packed vans or trailers.

If they are successful in entering the United States-which some smugglers now guarantee-they become a docile and readily exploitable "shadow population" which lives in constant fear of

detection.

After a detailed examination of this problem, the Immigration Subcommittee concluded in 1972 that the status quo was unacceptable and that immediate action was warranted to eliminate the widespread victimization of this vulnerable subclass and to reduce the unfair competition that they presented to American workers.

This body agreed with our committee's basic recommedation that the only humane, reasonable, and effective way of dealing with this problem "demagnetize the magnet" was to which brings them here. This would be done by imposing civil and criminal sanctions on those employers who knowingly hire undocumented aliens. It should be emphasized that this legislation is not intended as a punitive measure against either employers or undocumented aliens. In fact, the committee believes that, by and large, most employers are law-abiding citizens, and when it becomes known that it is a violation of Federal law to employ undocumented aliens, most employers will immediately discontinue this practice.

Further, the committee has consistently resisted efforts to impose additional penalties on aliens who enter this country illegally or who remain here and accept employment after their nonimmigrant visas expire. The committee believes that additional sanctions on undocumented aliens would be inhumane and serve no useful purpose, since the vast majority of such persons enter this country for the sole purpose of sustaining them-

selves and their families.

The House overwhelmingly approved employer sanctions bills which authored in the 92d and 93d Con-

gresses, but regrettably the Senate did not act on those proposals. As a result, we have now lost 10 years in our efforts to bring this problem under control. And the problem has become one that cannot be swept under the rug. It will not go away. The illegal entrants will grow to such numbers that one day the problem will be beyond solution.

As I have stated on numerous occasions, further delays will in effect continue the current situation of an underground and exploitable segment of our population-beyond the protection of our laws-which by all accounts numbers in the millions.

As a result, I do not believe this Government and the Congress should tolerate further delay in responding to this urgent situation. It is a reality we have got to face.

I certainly understand the concerns that have been traditionally expressed by the opponents of employer sanctions legislation. Civil liberty groups worry about discrimination and national identifiers, as well as the prospect of massive deportations. Employer groups maintain that they should not be charged with the responsibility for enforcing our immigration laws. Others worry that legalization rewards lawbreakers.

These are all legitimate concerns, specifically since we are to a great extent entering into "unchartered waters." But I must stress that the bill has not ignored these concerns. In fact, it addresses each and every one of them.

It endorses good faith employers that they will be protected, and it contains numerous safeguards to insure that the potential of national origins employment discrimination is minimized.

Our committee was extremely diligent in assuring that mechanisms to monitor discrimination were included and that the bill would not be interpreted as authorizing the creation of a national identifier.

Further, the sanctions program should be welcomed by well-intentioned and fair-minded employers who are not seeking to hide behind the hypocritical augment that any sanctions may have a foreign appearance or who does not have total command of the English language.

Other employers argue that sanctions will create an onerous paperwork requirement. This is not the case under the bill and I am pleased to see that the Business Roundtable and the National Association of Manufacturers have come out in support of this legislation.

It is also my firm view that employer sanctions must be coupled with a reasonable legalization program. All who have closely studied this issue, including several executive branch

forces, as well as the Select Commission on Immigration and Refugee Policy, have reached this conclusion. Let us face it, that without a fair employer sanctions provision, there will never be any legalization. Nor would I support a measure that does not also provide for legalization.

Many of these persons living in an underground subculture have been here for many years and have become assimilated in their communities. Many have U.S.-born children who are attending our schools and probably know no other language but English. Many are law-abiding, upstanding residents paying their taxes and meeting their civic obligations, much as you and I are doing. We must address their situation with justice and fairness.

Without a legalization provision to accompany the employer sanctions program, we would be closing our eyes to this most difficult humanitarian problem. There is certainly no way, nor would we wish it, to round up thousands and thousands of people and deport them without considering each individual's circumstances.

I know it is a difficult and controversial subject for many of my colleagues, but we must face the situation realistically and resolve this problem once and for all. We have seen the problem worsen each year since 1972. Unless we take remedial action now, we will certainly face graver problems as each year passes.

Legalization will permit honest, hard-working persons who have developed substantial equities while living and working in this country to come out into the light of day and participate fully and openly in our social and political system. It would restore their pride in themselves and free them from the haunting fear of disclosure.

The bill as originally brought to the Judiciary Committee in September contained provisions calling for major revisions of the legal immigration portion of the Immigration and Nationality Act—the reshaping of our preferences and numerical limits on immigration.

In my opinion, and as a result of my long experience in dealing with this subject, I felt that before we could seriously address basic changes in our preference system, we must review the impact of the legalization program with regard to potential numbers of legal residents and relatives affected by this provision. For this reason, I offered an amendment at the committee markup to delete this section pending further study. This amendment was adopted. I hope that when we have had an opportunity to review the impact of legalization and the implementation of this legislation, we can return to a full consideration of this subject. We cannot undertake this until we have learned how many illegals will come forth and where they are.

The chairman and other members of the Immigration Subcommittee will discuss other specific provisions of the bill in greater detail. However, I would like to address briefly the adjudication and asylum provisions which are of deep interest to several Members.

I believe that the provisions in this bill have struck a delicate balance between advocates in favor of streamlining the adjudication process and those in favor of providing a full measure of due process. The provisions, in my judgment, are objective, fair, humanitarian, and above all, recognize our responsibilities under our international agreements relating to refugees.

If this Congress does not pass this bill, it will have missed an opportunity to address a problem of vital concern to the American people. This bill is a positive step toward injecting greater fairness and humanity into our immigration policies and establishing control over our borders.

This bill is supported by a diverse group of individuals and organizations, including several prominent national and local Jewish organizations, the U.S. Catholic Conference, the Business Roundtable, and the National Association Manufacturers.

Failure to approve this legislation will send a clear message to the American people and to aliens considering the possibility of entering this country illegally that the United States is not seriously interested in controlling its borders. We cannot let that happen, and I urge my colleagues' support of this meritorious legislation.

Mr. Chairman, at the appropriate time, I will ask permission to insert into the Record at this point numerous letters I have received supporting this bill or various provisions contained in it.

United States Catholic Conference, Washington, D.C., December 6, 1982. Hon. Peter Rodino,

House of Representatives, Washington, D.C.

Dear Mr. Chairman: On behalf of the United States Catholic Conference, the Catholic Bishops' national organization, I commend you for your efforts over the past thirty years to reform our immigration laws to make them more equitable and responsive to human needs. In recent months you have directed your energies to having your Committee report a comprehensive immigration reform act. As the bill enters the final phase of the legislative process, I wish to express some concerns about it.

Although the Conference continues to support H.R. 6514, it has serious reservations about some of its provisions and urges improvements if the bill is open to amendment on the House floor.

The Catholic bishops have always emphasized family reunification in their approach to immigration questions. They believe the family unit is the foundation both for a more humane society and for the integration of the immigrant into American culture. Therefore, the U.S. Catholic Confer-

ence strongly endorses your efforts to amend H.R. 6514 to increase the opportunities for family reunification through retention of certain family preference categories.

Like you, the Conference would also like to see the bill's legalization program made more generous by moving the cut-off date to January 1, 1982, I applaud your efforts in offering such an amendment in Committee, although unfortunately it did not pass. The Conference is also concerned about the pofor discrimination, particularly against Hispanic people, implicit in the legislation's employer sanctions provisions. Discrimination is present as well in the bill's denial to legalized aliens of benefits from Federal assistance programs based on financial need for at least three years. To place the legalized alien in a different, more restricted status than other admitted aliens in this way is against the tradition of equal treatment for all in this country. Finally, we are concerned that the proposed modifications of the "H-2" program will create another temporary worker system similar to the "Bracero" program of the past. It was a failure when tried before and should not be attempted again.

Once more, I thank you for your efforts to reform our immigration laws, particularly those dealing with family reunification, and assure you of full support for continued efforts to bring families together. Although USCC supports H.R. 6514, the Conference hopes for changes in the bill to prevent undue hardships to newly arrived aliens, permanent residents, and citizens of this country.

Sincerely yours, Rev. Msgr. Daniel F. Hoye, General Secretary.

THE AMERICAN JEWISH COMMITTEE,
December 10, 1982.

Dear Congressman: The American Jewish Committee considers the House Judiciary Committee's version (H.R. 7357) of the Immigration Reform and Control Act, slated to come before the House of Representatives for consideration shortly, to be a landmark measure.

We urge that members of the House approve this legislation because it rejects a single numerical limitation for the entry of immigrants and refugees, retains the generous provisions for family reunification contained in current immigration codes, and provides for a fair legalization and amnesty program.

In its deliberations on this legislation, we particularly urge that members of the House support these three provisions of the House Judiciary Committee's recommendation. We believe that such provisions will establish an orderly flow of entrants to the United States in a fashion consistent with the best humanitarian tradition and foreign policy interests of the United States.

First. The American Jewish Committee welcomes and strongly endorses the House Judiciary Committee's recommendation that the ceiling on normal flows of immigration, as contained in the Senate version is unnecessary. We are also pleased by the Committee's decision not to combine refugee and normal flow immigration under a single numerical ceiling. To place such limit on the number of refugees who could enter the United States by including refugee admission as part of the total number of people allowed into the United States each year would, under certain circumstances, close off avenues of escape to safe havens

and force refugees to remain in situations in which their lives are endangered.

Furthermore, this nation's ethnic and religious groups should not be compelled to contend for preference in admission for their counterparts abroad. This would happen if refugees were to be counted among the total number of people to be admitted to the United States each year.

Finally, such limitations would also reduce the flexibility of our State Department and Immigration and Naturalization Service to pursue our nation's aims and interests abroad.

Second. The Second and Fifth Preference categories, as contained in current immigration codes and as recommended by the House Judiciary Committee, should be retained. These provisions allow natives and naturalized American citizens to be reunited with close family members from abroad. Such reunifications are an expression of our nation's beliefs in the vital role that healthy and stable family lives and family values play in the creation of a free, productive and humanitarian society such as ours.

Third. A fair legalization and amnesty system to regularlize the status of immigrants who enter the United States illegally before certain dates, as provided for in the legislation under consideration, should be enacted. Such a measure is both practical and generous. Coupled with other measures that seek to ensure a more orderly flow of entrants in the future, legalization and amnesty will allow those who have established productive lives here to continue contributing to this society, free from fear of removal and disruption.

Like many others among the broad spectrum of our fellow citizens of differing ethnic, religious and cultural heritages, the American Jewish Committee believes that these three provisions contained in the House Judiciary Committee's version of the proposed legislation are the most important measures which ought to be enacted by the House of Representatives as it holds its deliberation.

Sincerely,

Dr. DONALD FELDSTEIN, Executive Vice President.

**AMERICAN JEWISH CONGRESS** New York, N.Y., December 9, 1982. Re H.R. 7357—Immigration Bill. Representative PETER W. RODINO, Jr., Chairman, Committee on the Judiciary, Washington, D.C.

DEAR CONGRESSMAN RODINO: I am writing on behalf of the American Jewish Congress to express our organization's support for the Immigration Bill now pending, in its present form, H.R. 7357.

We oppose any efforts that would change the preference system and favor the generous legalization/amnesty provisions now contained in the House bill.

We support your efforts to bring the bill to floor in its present form and urge you to assert your leadership in assuring no compromising or weakening amendments are added.

Most sincerely,

MARC A. PEARL Washington Representative. COUNCIL OF JEWISH FEDERATIONS, INC.

Washington, D.C., December 13, 1982. Hon. PETER RODINO,

Chairman, Committee on the Judiciary, U.S. House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: With reference to the Immigration and Refugee Act of 1982, presently scheduled for debate this week the Council of Jewish Federations, representing over 200 local federations nationwide, would like to thank you for your leadership in shaping a committee bill that addresses the legitimate concerns of the American people in a balanced and reasoned manner.

We are generally supportive of the Committee bill (H.R. 7357) and are especially pleased with the provision that maintains the current preference system and creates a generous legalization program. The Council would oppose attempts to weaken these pro-

Not included in the Committee bill are provisions relative to refugee admissions. We believe this is appropriate since procedures for refugee admissions and protections were adequately established in the Refugee Act of 1980.

However, amendments are expected to be offered on the floor that would (1) establish single numerical limits for immigrants and refugees combined and (2) provide for a congressional veto of refugee admissions above the "normal flow". We think both changes would be deterimental to refugees who enter the country via an orderly, legal process that may, in fact, be lifesaving. The Council supports your efforts to defeat these amendments.

Again, Mr. Chairman, we commend you and your Committee for your work on this

Sincerely.

MARK E. TALISMAN, Director.

THE AMERICAN JEWISH COMMITTEE, Millburn, N.J., November 29, 1982. Hon. PETER W. RODINO, Jr.,

Rayburn House Office Building, Washington, D.C.

DEAR CONGRESSMAN: The American Jewish Committee supports H.R. 6514, as reported out by the House Judiciary Committee. We urge passage of this bill.

On humanitarian grounds, we strongly support the family reunification orientation of the current immigration preference categories and oppose changes which would deny admissions preference to unmarried siblings of U.S. citizens and unmarried adult children of permanent resident aliens. We oppose attempts to impose a ceiling on legal immigration.

I hope you concur with our views on these matters and urge that you vote in favor of

Sincerely yours,

BENEDICT M. KOHL New Jersey Area President.

NATIONAL JEWISH COMMUNITY RELATIONS ADVISORY COUNCIL,

New York, N.Y., November 11, 1982.

DEAR CONGRESSMAN: The National Jewish Community Relations Advisory Council (NJCRAC) believes that H.R. 6514, the Immigration Reform and Control Act, represents a long-overdue and positive step toward achieving a comprehensive, humane and effective national immigration policy. Therefore, we urge you to act on this legislation during the post election session.

The National Jewish Community Relations Advisory Council is the national planning and coordinating body for the field of Jewish community relations, comprised of 11 national and 111 community member agencies listed on the reverse of this letterhead. National immigration policy, as a reflection of the nation's humanitarian values with respect to refugees and aliens, has always been an issue of paramount importance to the Jewish community. Based on careful scrutiny of H.R. 6514, we call your attention to our comments on several aspects of the bill that are of special concern to the field of Jewish community relations.

#### LEGAL ADMISSIONS/NUMERICAL LIMITATIONS AND PREFERENCES

NJCRAC supports an increase in the total number of immigrants allowed into the United States and is therefore pleased that H.R. 6514, by retaining current law on admissions, would not place a cap on immigration admissions of immediate relatives of United States citizens. We are also pleased that the bill retains the second preference to adults, unmarried sons and daughters of permanent resident-aliens, and the fifth preference to brothers and sisters of United States citizens. NJCRAC strongly urges you to oppose any amendments that would erode the principle of family reunification, including elimination of the second and fifth preference and the inclusion of immediate relatives under any immigration ceil-

#### REFUGEES

NJCRAC strongly supports the Refugee Assistance Act of 1980. We therefore urge you to oppose any dilution of it, including any amendments that would place refugees and legal immigrants under one ceiling or that would cap refugee admissions.

### ASYLUM AND JUDICIAL REVIEW

NJCRAC calls for full opportunity for fair hearings on requests for political asylum, and opposes the elimination of judicial review of such processes. We believe that the provisions of H.R. 6514 in these areas generally represent substantial improvement over the Senate bill. Specifically, while the Senate bill restricts review to habeas corpus, H.R. 6514 provides for review as a matter of right in a federal Court of Appeals of decisions of the United States Immigration Board (USIB) in cases of deportation, exclusion or asylum. Also, because of NJCRAC's concern for the independence of the USIE and administrative law judges, we support the provisions of 6514 providing for an independent, Presidentially-appointed USIB and for administrative law judges to be appointed by the USIB. The Senate bill places both the USIB and administrative law judges under the Justice Department.

NJCRAC urges you to support any amendments that would further strengthen the judicial review provisions of H.R. 6514, including increasing the time allowed for filing a petition for review.

Again, NJCRAC urges that the House of Representatives take action on the critical policy area of immigration reform during the forthcoming session. Thank you for your attention to our views.

Respectfully.

BENNETT YANOWITZ, Chairman. JEWISH COUNSELING AND SERVICE AGENCY,

Millburn, N.J., December 1, 1982. Hon. Peter W. Rodino,

Chairman, House Committee On the Judiciary, House Office Building, Washington, D.C.

DEAR MR. RODINO: We are one of the largest private, non-profit counseling agencies in the State of New Jersey. One of our primary missions is assisting immigrants on a nonsectarian basis. This assistance extends to their families and carries through the pre-application, application and resettlement processes. As such, we are a qualified agency, recognized for practice before the U.S. Immigration and Naturalization Service.

On the basis of this extensive service to the community, we are convinced of the wisdom of the message conveyed in your letter, published on November 5th in the Newark Star Ledger. We applaud the compassion indicated by your vigorous defense of the fifth preference category for brothers and sisters of adult U.S. citizens. Elimination of this preference, as proposed by the Simpson-Mazzoli bill, would be a disastrous blow to the principle of family reunification. We know from our work as a family counseling agency that the adjustment to their new life in this country is difficult. The presence of members of their extended family is, however, a stabilizing influence, influencing immigrant communities.

We must also voice our concern about the threat to introduce into the House version of the bill an amendment similar to the Huddleston proposal. We strongly urge that immigrants and refugees continue to be subject to separate ceilings. Our country ought to maintain its long-time leadership in human rights and humanitarian concerns. A single ceiling would be divisive, pitting ethnic groups against each other. It would set off competition between those with concerns for refugee needs and those seeking to

reunite families.

As we have in the past, we want to express our appreciation for your decades of leadership in liberalizing immigration statutes. On behalf of our membership and clients, we ask for your continued vigilence in this leg-

islative area. Respectfully,

Bernard Wallerstein, Cochairman, Family Advocacy Committee, Board of Trustees.

THE BUSINESS ROUNDTABLE, December 14, 1982.

DEAR MR. CHAIRMAN: The Business Roundtable urges your spport of H.R. 7357, The Immigration Reform Act as reported by the House Judiciary Committee. We recognize the need to establish control over our nation's borders and, at the same time, reaffirm our commitment to immigration.

H.R. 7357, as reported by the Judiciary Committee provides the most balanced approach to achieve immigration control with the imposition of employer sanctions and the establishment of record keeping requirements without placing an undue administrative burden on business. Finally, we feel that H.R. 7357 provides business and industry with reasonable allowances for critical skill needs.

Again, we urge floor consideration of H.R. 7357 during the 97th Congress and ask that you support its passage.

Sincerely,

JOHN POST, Executive Director. NATIONAL ASSOCIATION
OF MANUFACTURERS,

Washington, D.C., December 14, 1982. Hon. Peter W. Rodino, Jr.,

Chairman, Committee on Judiciary, Rayburn House Office Building, Washington, D.C.

Dear Mr. Rodino: The National Association of Manufacturers supports the need to establish control over our nation's borders and immigration. We have endorsed the Immigration Reform and Control Act (H.R. 7357), including the imposition of employer sanctions, as it was reported out of the House Judiciary Committee on September 22, 1982. However, we have serious concerns over a series of modifying amendments that will be offered by the House Education and Labor Committee when floor action will occur on the legislation.

The amendments proposed by the Education and Labor Committee would create greater employer liabilities than the employer sanctions provision of the legislation. These amendments would establish a new federal bureaucracy for litigating claims involving race or national origin discrimination, require employers to keep large amounts of data not required under present law, and create a presumption that any employer who declines to hire an ethnic minority has committed discrimination on the basis of national origin.

The immigration legislation has already caused substantial concern with some segments of the business community by authorizing the imposition of employer sanctions. We believe that these modifying amendments are not within the intent and purpose of the bill and will only create additional problems. If it appears that these amendments will be incorporated into the final legislation, NAM will withdraw its support for the bill and oppose its passage.

We certainly hope we can work with you to develop a reasonable approach to this vexing situation. We would be most willing to meeting with you to discuss how we can help in formulating a viable solution.

Sincerely,

RANDOLPH M. HALE.

AMERICAN COUNCIL ON INTERNATIONAL PERSONNEL, INC., New York, N.Y., December 15, 1982. Hon. Peter Rodino,

Chairman, House Judiciary Committee, House of Representatives, Washington, D.C.

Dear Mr. Chairman: The American Council on International Personnel (ACIP) is pleased to endorse the Simpson-Mazzoli proposal for reform of the Immigration and Nationality Act that is currently being considered by the Congress. As an organization comprised of 150 major multinational organizations concerned about the international transfer of personnel, ACIP has been keenly interested in the progress and form of this legislation.

The proposal, which has already been passed by the Senate, embodies many positive reforms of the immigration laws as they have an impact on the business community. While our position on proposed revisions to the bill currently pending before the House is well-known, particularly with regard to the inclusion of the "Independent Immigrant" categories provided in the Senate version of the proposal, we endorse without qualification the need for this legislation to be enacted in order to improve and update the current outmoded system for the admis-

sion of immigrants and nonimmigrants into the United States.

Sincerely,

AUSTIN T. FRAGOMEN, Jr., Chairman, Board of Directors.

CITIZENS' COMMITTEE
FOR IMMIGRATION REFORM,
Washington, D.C., December 14, 1982.
Congressman Peter W. Rodino, Jr.,
Rayburn House Office Building, Washington, D.C.

Dear Congressman Rodino: As organization concerned with the formulation of a reasonable, just and humane immigration and refugee policy, we should like to express our support for the Simpson-Mazzoli Immigration Reform and Control Act of 1982 (H.R. 7357).

As passed by the House Judiciary Committee, the bill substantially meets the criteria which we think is essential in a new immigration law-maintenance of the present system for legal immigration, including the current preference system; legalization program for those undocumented persons who have resided in the United States since January 1, 1977; an employer sanctions system aimed at employers who knowingly hire undocumented persons coupled with the establishment of a secure worker identification system; and the maintenance of the provisions of the current Refugee Act of 1980 under the terms which refugees are admitted outside of the ceiling on legal immigration after consultation between the President and Congress.

We shall continue to press for the passage of this legislation as long as the major pro-

visions remain intact.

Sincerely,
American Jewish Committee,

UNITED STATES

COMMITTEE FOR REFUGEES,

New York, N.Y., December 10, 1982.

Congressman PETER W. RODINO, Jr.,

Rayburn House Office Building, Washington, D.C.

DEAR CONGRESSMAN RODINO: Within days, the House of Representatives will consider the Immigration Reform and Control Act of 1982 (H.R. 6514). Many of us involved in refugee and immigration affairs look forward to the House producing a moderate reform bill that speaks directly to, but does not overreact to, the legitimate concerns the American people feel about undocumented immigration.

As the bill is now drawn, it does not include provisions directly related to the protection or admission of bona fide refugees. Several attempts were made in the Senate to include a single numerical limitation for both immigrants and refugees and a Congressional veto over refugee admissions above a "normal flow". These attempts did not succeed. We think this is wise and encourage you to oppose any efforts in the House to merge refugee admissions procedures into the bill, such as Congressman Sensenbrenner's amendment to place a

single numerical ceiling on immigrant and refugee admissions.

The Refugee Act of 1980 established a procedure in which the Administration and Congress consult in determining refugee admissions ceilings for subsequent fiscal year. This consultation procedure has been in place for three years and during that period actual refugee admissions have declined more than fifty percent.

This being the case, we do not see the necessity to enact modifications to the process which are both radical and, in fact, harmful. A single numerical limitation on refugee and immigrant admissions would be domestically diversive by forcing competition between family reunification and refugee admissions and would send dangerous signals to first asylum countries. A legislative veto of admissions numbers over "normal flow complicates the country's ability to react quickly at precisely those times when flexibility is most needed. Both proposals are irrelevant to mass first asylum emergencies, which are one of the public's major concerns in this area. Both in fact seem to be reactions to the concerns of the Congress and the public regarding undocumented immigration, misplaced reactions which will ultimately penalize refugees whose entry here by definition is orderly, legal and by the President's determination after consultation with Congress, in the best interests of the United States.

We the undersigned organizations, there fore urge you not to succumb to unjustifiable arguments to merge refugee and immigrant admissions or to establish a one-House veto over the process.

Sincerely,

US-ASIA INSTITUTE,

Washington, D.C., December 10, 1982. DEAR CONGRESSMAN: The immigration reform bill, HR 7357, will soon come to the floor of the House of Representatives for your vote. We want to express our concern regarding several crucial provisions in the

(1) We feel that the present provisions in HR 7357 are more sensitive to family reunification than the provisions under the original Simpson-Mazzoli bill. Therefore, we oppose any effort to modify or amend the preference provisions as submitted to the House by the Judiciary Committee.

(2) We also oppose any amendment similar to the "Huddleston Amendment" which would reduce the number of legal immigrants that would be permitted to come to the United States to join their families. Family reunification would be seriously impeded by imposing such a restrictive cap.

(3) We feel that the broadest type of legalization program should be implemented at this time, and that any employers sanctions program must include protection of minorities against direct and indirect dis-

crimination.

The US-Asia Institute Task Force on Immigration and Refugee Policy, which I chair, has received various communications from Asian American communities across the nation with the clear message that they support Chairman Rodino's version of the House bill as reported out of the House Judiciary Committee in September 1982. We feel that HR 7357 is a just and equitable compromise that deals fairly with the interests of all parties. A consistent and long range policy on immigration is of vital importance to our country and people. Thank you for your consideration.

Sincerely.

NORMAN LAU KEE. Chairman, Task Force on Immigration and Refugee Policy.

AMERICAN COUNCIL OF VOLUNTARY AGENCIES FOR

FOREIGN SERVICE, INC. New York, N.Y., December 6, 1982. Hon. PETER W. RODINO, JR.,

Chairman, Committee on the Judiciary, U.S. House of Representatives, Rayburn House Office Building, Washington, House D.C.

DEAR PETE: As you may know, in addition to being Executive Director of ACNS, I am currently serving as Chairman of the Refugee and Migration Affairs Committee of the American Council of Voluntary Agencies for Foreign Service. It is in this latter capacity that I am now writing on a subject of major concern.

The thirteen member agencies of the Refugee and Migration Committee represent the refugee and immigration service organizations of all the major religious faiths as well as the key non-sectarian agencies concerned with immigration and refugee matters. Accordingly we have followed the progress of the Simpson/Mazzoli immigration reform bill very closely.

The agencies represent many diverse and often overlapping constituencies and interests. Consequently, many of the individual agencies, as well as ACVA as a whole, have not taken a position on the entire bill, but rather have focused on individual components of the immigration reform legislation. Our views on specific issues are part of the record and are known to the staffs of the appropriate committees.

However, as the immigration reform legislation seems to be approaching the floor of

the House we feel it is important that you know where the agencies stand with regard to the bill in its entirety. While there are many elements we would like to see modified, there are three specific components we consider to be bottom line and on which our support of any immigration reform legislation would hinge.

1. We support a generous legalization program. It is our position that legalization is an integral part of any meaningful immigration reform proposal. We would have to oppose any bill that does not contain a gen-

erous amnesty provision.

2. We support the refugee admissions process established by the Refugee Act of 1980. Accordingly, we oppose any single numerical limitation imposed on refugee and immigrant admissions, as well as a Congressional veto on refugee admissions. We would have to actively oppose any immigration reform bill which includes such provisions.

3. We strongly support the immigration preference system reported by the House Judiciary Committee. Its recognition of the priority we must continue to place on family reunification is sound and in the nation's

best interest.

For us, the issues enumerated above are critical and will define our position in relation to immigration reform legislation. It is our collective hope, and my hope personnally, that you will make the necessary efforts uphold the three principles outlined

With best personal regards. Sincerely.

WELLS C. KLEIN Chairman, Refugee and Migration Affairs Committee.

ORGANIZATION OF CHINESE AMERICANS, INC. Washington, D.C., December 10, 1982.

Hon. PETER RODINO, Chairman, Committee on the Judiciary, U.S. House of Representatives, Washington,

D.C. DEAR MR. CHAIRMAN: With the Immigration Reform and Control Act now pending before the House, the Organization of Chinese Americans strongly urges you to keep the door open for our American citizens to reunite with their families.

OCA strongly supports the maintenance of the current preference system, especially the retention of the full Fifth Preference. We laud the action of the House Judiciary Committee in retaining the current preference system. It is our sincere hope that, if the House enters into conference with the Senate, the House will not recede from its current position on the preference system.

We also strongly urge you to support an amendment to raise the quota for dependent colonies from 600 to 3,000. The effect of the colonial quota on legal immigration and family reunification from the British colony of Hong Kong has been devastating. As you will recall, the colonial quota is the last vestige of the discriminatory national origins quota system, and both the U.S. Commission on Civil Rights and the Select Commission of Immigration and Refugee Policy have recommended that it be eliminated. We urge that this racist provision in the law be eliminated or that the quota be raised to 3,000, so that our communities will not continue to suffer from this provision's adverse effects.

OCA is on record as supporting the pro-posed legalization of undocumented per-sons. We urge that the legalization provisions not be stricken from the legislation.

OCA is a national organization with 26 chapters in 20 States. We are a nonprofit, nonpartisan educational and civic organization. If we may be of further assistance to you and your office, please do not hesitate to contact me at our national office in Washington.

Sincerely.

LAURA CHIN, Executive Director.

AMERICAN COMMITTEE ON ITALIAN MIGRATION. New York, N.Y., December 9, 1982. Hon. PETER W. RODINO, Jr.,

Rayburn House Office Building,

Washington, D.C.

DEAR CONGRESSMAN RODINO: We understand that the House of Representatives in all likelihood will be considering the fate of H.R. 6514, the Immigration Reform and Control Act of 1982, in the final days of this Congress.

We would appreciate your keeping in mind our concerns which are expressed in the attached memorandum.

ACIM supports Chairman Rodino's version, primarily where it pertains to the retention of the present preference system

Our Organization is opposed to the elimination or restriction of the second and fifth preferences.

We urge you to vote against this bill rather than pass it with the above-mentioned restrictions.

Sincerely,

Rev. Joseph A. Cogo, C.S.

### AMERICAN COMMITTEE ON ITALIAN MIGRATION,

New York, N.Y. Why should the immigration preference system remain as it is-because it has served adequately in the past, and there is no reason to project that it will not serve ade-

quately in the future.

The Immigration Reform Bill 1965 structured the current preference system to provide for an overall number of 270,000 visas, exclusive of immediate relatives. This number has proved sufficient for all countries with the exception of: Philippines, Korea, China, Mexico and India. It further provides for immediate relatives to come outside the ceiling and for close relatives of U.S. citizens and permanent resident aliens to come under the quota limitations. Where demand exceeds supply, backlogs have occurred.

The Simpson-Mazzoli proposal seeks to eliminate the problems of backlogs by eliminating the sources of potential trouble. In effect, it would be like cutting off the entire arm in a desire to eliminate a disease in the

fingers.
The "arm" is quite sound. Most of the countries of the world are well served by the present law. It would be wrong to penalize the vast majority of the countries in order to correct a problem which occurs in five

countries.

Furthermore, it is very doubtful that the contemplated changes would resolve the problem in these same five countries. It is instead quite certain that these changes would prejudice our traditional pattern of immigration. They would, for example, result in discriminating against many countries in Europe which now rely on the fifth preference for most of their family-reunion type of immigration to this country: Greece 61%, Ireland 58%, Italy 61%, Portugal 70%,

Yugoslavia 52%.

The restriction of the second preference category (adult unmarried sons and daugh-

ters of permanent resident aliens) and the elimination or at least restriction of the fifth preference (brothers and sisters of U.S. citizens) are being sought also on the basis of projections which anticipate a "snowball" effect resulting in an exponential increase in immigration demand in the future due to the legalization of large numbers of immigrants, who will then be eligible to file petitions for their relatives.

Reasonable predictions cannot be made as to the numbers involved until the authorities have an actual count of how many will be eligible to regularize their status and how many will actually present themselves for legalization. While the situation must be closely monitored, the law should not be changed to suit an eventuality which might not even materialize. To change a basic principle of our immigration policy based simply on hypothetical prognostications is clearly injudicious

In addition, with regard to backlogs, experience has proven that they have an inherent way of dissipating into thin air over a long waiting period. Personal and family situations change and only the would-be immigrant with the closest ties, motivation and

need will eventually migrate.

Backlogs are, of course, odious. However, they are a fact of life. The United States will never be able to have a law which will satisfy the demand of all countries. Much more unpleasant is having to tell an American citizen that he cannot petition for his brother or sister, while at the same time permitting persons with no ties to this country, such as workers, or investors to be admitted on a preferential basis.

In view of these considerations we believe the Simpson-Mazzoli bill should concentrate on the immediate problem: to handle the illegal alien situation through some kind of legalization process, and especially to ensure that the illegal flow of immigration be prevented in the future. If these two objectives are achieved, the Simpson-Mazzoli bill will undoubtedly make an indelible contribution to our society.

Minor refinements on the preference system can always be achieved in the future, if experience shows them to be necessary, with later legislation.

Mr. MAZZOLI. Mr. Chairman, will

the gentleman yield?

Mr. RODINO. I yield to the chairman of the subcommittee, who has labored so long on this effort. I want to congratulate him for having diligence and patience, and for bringing to the attention of this House this deplorable problem. I hope the House will act wisely on this legislation.

Mr. MAZZOLI. I thank the gentleman for that compliment, but of course the gentleman is always too modest. It is he who is the expert in this body and this Congress on the

subject of immigration.

I just wanted to commend the gentleman on an outstanding statement. It was scholarly and inspiring. It was clear in its message that the House should move on, now on this kind of a

I want to thank the gentleman for his leadership over these many years, and commend to this House and to the Congress his words of wisdom.

Mr. McCLORY. Mr. Chairman, I thank the gentleman for yielding.

Mr. Chairman, this legislation is indeed long past due. It has received, as the Members will gather, strong bipartisan support. I want to assure the Members that this administration is wholeheartedly in support of this legislation. Certainly the leadership on the Democratic side of the aisle-as evidenced by the remarks of the distinguished chairman of the House Judiciary Committee and the distinguished chairman of the Immigration Subcommittee—support the bill.

#### □ 2250

There must be a full awareness of the strong bipartisan support for this legislation. At the same time that I commend those gentlemen from the Democratic side of the aisle, I want to commend the gentleman from New York (Mr. Fish) for his leadership and commend the other Republican members of the Subcommittee on Immigration who have contributed so much to this comprehensive immigration bill.

Mr. RUDD. Mr. Chairman, will the gentleman yield?

Mr. McCLORY. I yield to the gentleman from Arizona.

Mr. RUDD. Mr. Chairman, I thank the distinguished gentleman for yield-

Mr. Chairman, I commend the committee chairman, the subcommittee chairman, the ranking minority member, and all of the members who have worked so diligently to try to bring about a change in immigration laws that is long overdue. It is 17 years since we have had that. I rise also to indicate that I do oppose one portion of this bill, the amnesty provisions.

Mr. Chairman, In the last days of the special session, this body will likely consider the Immigration Reform Act, H.R. 7357. This is a very complex and far-reaching piece of legislation—the first major overhaul of our immigration laws in well over a decade-which has broad implications for all regions of our country and, I believe, contains serious defects which severely undercut the many positive features of this bill.

The provisions granting amnesty to the unknown millions of illegal aliens who were here before January 1, 1980, could be the albatross of this bill for several reasons. First, there is the obvious element of unfairness for those who have exhaustingly, and many times unsuccessfully, sought entrance to America through the proper legal channels. Our Nation has perhaps the most open and generous immigration policies in the world, yet many people must wait months, and even years, before our vastly undermanned and underbudgeted Immigration and Naturalization Service processes them through.

Second, there is the very clear signal a "one-time" mass amnesty program sends to prospective illegal immigrants. It is without question a reward for those who have doggedly violated our Nation's laws, many of them more than once, rather than pursuing the legal course. Amnesty will not "clean the slate," as many of its proponents suggest in order to free more of our resources for other aspects of immigration enforcement. In fact, amnesty will probably encourage more prospective immigrants-legal or illegal-especially those who previously thought our Nation's laws meant something. I couldn't think of a more inappropriate way to greet prospective citizens-by telling them it is all right to break our

Of great interest to the Federal, State, county and local governments is the question of who will foot the bill for public services and welfare costs for millions of newly legalized residents. The Federal level has already sent a very clear message to our State and local governments: Don't expect us to pay for the added costs. Budgets at all levels of government are already straining, and are there enough new taxpaying jobs to finance the moderate estimate of Attorney General William French Smith of \$18 billion a year in combined Federal and State costs for amnesty? The State of Cali-fornia has already figured that without Federal funding, it would cost them \$1.3 billion a year in added welfare and medical expenses.

Perhaps the biggest "unknown" in the amnesty question is the number of illegal immigrants already in this country. Estimates of eligible illegals who have lived here since 1980 range from 3 to 12 million people. The administration currently uses estimates running between 3.5 and 6 million persons. It is not known how many of these people are currently working, dependent on welfare programs, or financially independent.

I oppose the very concept of such a mass amnesty, but I do believe there is a more reasonable alternative. The registry date provision approved by the Judiciary Committee would simply update an existing section of our immigration laws. The present law provides a "registry date" procedure allowing all aliens who can show good moral character and continuous residence in the United States since 1948 to receive permanent resident status. The committee proposal moves the 1948 date to January 1, 1973, allowing illegal aliens who can prove they entered the country prior to that date to apply through the INS. The registry date provision has been in our books since 1929, it is a tested and proven procedure, one that the INS is throughly familiar with, and I believe it is the fairest approach in dealing with the undocumented-illegal-alien problem.

Another very important aspect of this bill is the placement of an overall ceiling-or cap-on total annual legal immigration. The administration originally asked for a ceiling of 425,000 legal admissions per year, excluding refugee admissions and the spouses and children of U.S. citizens. The other body concurred with this proposed cap, but all ceilings were re-moved in the version passed by the House Judiciary Committee.

The United States currently accepts more than twice as many permanent residents annually as the rest of the world combined. No other country can boast of an "open door" policy more open or lenient than America's. We should continue this open policy, but only within reason. In my opinion, a fixed cap is necessary on legal immigrants, and that it be enforced so that we can get a grip on the problem this bill was originally intended to address: the control of our borders and reform measures to limit within reason the level of immigrants arriving in this

Further, if this Nation is to achieve true control over its immigration, all entrants should fall under the annual ceilings. An absolute ceiling should include refugees, immediate relatives of U.S. citizens, and all other categories currently not subject to the cap re-

quirements.

Another aspect critical to a successful immigration policy is that of having adequate enforcement officers along our borders and other INS officials to handle the backlog of admissions and projected admissions under this legislation. The immigration and Naturalization Service, and its enforcement arm-the Border Patrolhave been underfunded for many years, and certainly the new reform measures contained in this bill will further strain these limited resources. It is my hope that, in accordance with the language contained in this bill, the 98th Congress follow through by appropriating additional funds for increased activities in these agencies.

I would also urge my colleagues to oppose changes in this bill which would weaken the very limited temporary worker program now operating. The H-2 program, as it works now, primarily benefits the nonagriculture sector and allows foreign workers to enter the country on temporary visas to fill certain temporary jobs. This bill makes some modifications to streamline the H-2 admissions process, making it easier for both the employer and the worker to take advantage of the program. A respectable guest worker program is needed in many regions of our country, particularly in the United States-Mexico border States, to fill the need for many seasonal jobs not normally taken by American workers, and I believe it can be operated by our Government in a manner respectful of the rights of the employers and the guest workers.

Another focal point of the bill revolves around the use of employer sanctions to help control the flow of illegal aliens into this country. In the House version, as passed by the committee, civil penalties are imposed on employers who knowingly hire illegal aliens, with criminal penalties for those who repeatedly violate our laws. "paperwork exemption" is allowed for small employers with three or fewer employees, eliminating the requirement that they check a job applicant's documentation, but still places them under the civil and criminal sanctions as are other employers. The sanctions apply to new hires only.

While I have no strong objections to employer sanctions, I think it would be a serious mistake to presume that such penalties will by themselves deter illegal immigrants from crossing our borders. The penalties will be nearly impossible to enforce without substantially increased INS manpower, and even then the absence of a fraud-resistent identification system for determining work eligibility will undermine our attempts for tougher enforcement.

The legislation instructs the President to design and implement such an identification system within 3 years. In the meantime, rigid criminal penalties, including heavy fines and up to 5 years imprisonment, will be applied to those convicted of using, selling, or manufacturing counterfeit or altered identification documents.

Again, it will be necessary to bolster our enforcement activities if we hope for these penalties to carry any weight.

We do need to pass a comprehensive immigration bill to update, and hopefully strengthen the outdated laws now on the books. Outside of the fact that it has been some 17 years since we last signed into law major immigration reforms-almost a generation in which conditions have changed dramatically both domestically and on the international scene-we need to act decisively on a problem that the American public is overwhelmingly in favor of resolving.

In my own district, Arizona's Fourth, citizens are more cohesive on this one issue than almost any other problems facing our Nation today. Last year, I sent out a questionnaire survey on several issues and received more than 15,000 responses. By far the most onesided response was on a question relative to immigration. Over 94 percent of the respondents answered "yes" to the question: "Should Congress institute tougher reforms to prevent illegal aliens from receiving Federal bene-

Clearly, the public understands the seriousness of the problem and wants change. Many years of work are behind the "Simpson-Mazzoli" immigration bill, and I applaud those who have worked so diligently to mold this comprehensive bill. But more flaws remain in the House verson as I have indicated, and I urge my colleagues to thoughtfully consider amendments to be offered which would truly reform and put some long needed controls in our Nation's immigration policies.

There can be no perfect immigration bill, nor are there any easy answers to the very complex and seemingly uncontrollable influx of illegal aliens into our Nation. As a free and open society, we are committed to preserving the rights and liberties of our citizens. The luxury of permitting uncontrolled numbers of people into our Nation, as much as it has been ingrained into American tradition and benefitted our growth and prosperity, does have its limitations. No country in the world today can claim a more generous immigration policy and nothing in this bill, with the recommendations I have made, will change that distinction. Most all Americans recognize the need for reasonable reforms and will support them accordingly.

Mr. McCLORY. Mr. Chairman, the United States faces a serious crisis in immigration law enforcement. We have an illegal alien population numbering in the millions—with hundreds of thousands of new arrivals each year in direct contravention of American law. Large numbers of people wait abroad for many years to be reunited with relatives in the United States—at the same time that undocumented people short cut the process and find ways of entering immediately. Our loss of control over our borders requires decisive action by the Congress now.

U.S. immigration laws have received intensive scrutiny during the last 4 years. The Select Commission on Immigration and Refugee Policy-which included four Cabinet members from the previous administration, four Members from each House of Congress, and four public members-held exhaustive hearings all over the United States, heard testimony from 698 witnesses, and consulted with many experts and interest groups. I had the opportunity, together with several other colleagues on the Judiciary Committees of the House and Senate, to participate actively in the Commission's deliberations. In 1981, this administration prepared the Omnibus Immigration Control Act—a bill designed primarily to address the problem of aliens entering the United States illegally. Early this year, I served-together with the gentleman from Kentucky (Mr. Mazzoli) and the gentleman from New York (Mr. FISH)-as an original sponsor of H.R. 5872, legislation that built upon the work of the Select Commission. This was followed by thorough study by the administration and by months of

public hearings by the Immigration Subcommittees of the House and Senate. Senator Alan Simpson, of Wyoming, chairman of the Senate Subcommittee on Immigration and Refugee Policy, introduced an identical bill in the Senate—S. 2222 which passed the Senate in August.

The House Committee on the Judiciary has given this legislation most careful scrutiny. In May 1982 a clean bill-H.R. 6514-was introduced reflecting action taken by the Subcommittee on Immigration, Refugees, and International Law at its markup. The full House Judiciary Committee favorably reported an amended version of this legislation after exhaustive consideration of policy arguments on virtually every provision. H.R. 7357 conforms to the bill as reported by the Judiciary Committee-except for the addition last week of language designed to comply with the Budget Act.

Mr. STRATTON. Mr. Chairman, will the distinguished gentleman from Illi-

nois yield?

Mr. McCLORY. The legislation does embody the best thinking of the members of the subcommittee and those on the Commission on which many of us served.

Mr. Chairman, I now yield to the gentleman from New York.

Mr. STRATTON. Mr. Chairman, I have only had a preliminary opportunity to examine this bill. It is a complicated bill. I gather that, as the gentleman has indicated, this is going to authorize a number of illegal aliens, undocumented aliens, who have been in the country since 1977 to be pardoned and to be accepted as legal aliens from then on.

What does the bill propose to do? Mr. McCLORY. Mr. Chairman, I have not indicated that yet. Howev-

Mr. STRATTON. Mr. Chairman, let me try to ask this question, if I may, because I think this is on the minds of a number of people.

All right, we are going to accept all of the illegal aliens who have come in at a particular date and, presumably, some who have come in since then.

The CHAIRMAN. The time of the gentleman from Illinois (Mr.

McClory) has expired.
Mr. FISH. Mr. Chairman, I yield two additional minutes to the gentleman from Illinois (Mr. McClory).

Mr. McCLORY. Mr. Chairman, I will

finish my comments.

Mr. STRATTON. Mr. Chairman, let me ask, if I may, what does the bill do to prevent this constant inflow that I understand is occurring at the rate of 1,000, 2,000, and 3,000 a day?

Mr. McCLORY. Mr. Chairman, I do not want to yield just now because the gentleman's question will be addressed in some of my concluding remarks.

The measure does provide two stages of legalization—one for persons in this

country prior to January 1, 1977, and another for those in this country prior to January 1, 1980.

Mr. STRATTON. Mr. Chairman, I understand that. My question is, What are we going to do to prevent the daily inflow from across the southern borders that I understand is occurring at the rate of 1,000, 2,000, and 3,000 a day?

Mr. McCLORY. Mr. Chairman, the theory, hope, and expectation of those who have worked diligently on this legislation is that the combination of a legalization program, an employer sanctions program, and an enhanced border patrol can enable us to gain control over immigration so that we can retard, if not stop, the flow of illegal aliens into this country.

Mr. STRATTON. How many more border patrolmen are we going to have to have? It is my understanding we have less than two border patrolmen permile down along some sections of the border.

Mr. McCLORY. Mr. Chairman, I am not going to yield to the gentleman to ask his questions. He will have to get his own time to discuss the subject of border patrolmen.

The CHAIRMAN. The time of the gentleman from Illinois (Mr. McClory) has expired.

Mr. STRATTON. Mr. Chairman, will the gentleman from New York (Mr. Fish) yield time to me?

Mr. McCLORY. Mr. Chairman, I would ask the gentleman (Mr. Fish) to yield me 1 additional minute so I can finish my statement.

Mr. FISH. Mr. Chairman, I yield 1 additional minute to the gentleman from Illinois.

Mr. McCLORY. Mr. Chairman, I am not going to yield to the gentleman from New York (Mr. Stratton) because the gentleman wants to make a speech in opposition.

Mr. STRATTON. I do not. I want to ask a question.

Mr. McCLORY. The gentleman wants to make a speech in opposition to this legislation, and I would like to have the gentleman get his own time for that purpose.

The CHAIRMAN. The gentleman from Illinois (Mr. McClory) controls the time.

Mr. McCLORY. Mr. Chairman, 4 years of thorough and thoughtful consideration of our immigration laws must now be translated into legislative action. The need to act becomes more critical each day; failure to act will exacerbate a national crisis.

This bill recognizes that the attraction of employment in the United States serves as a magnet to illegal entry. A Federal law forbidding employers to hire aliens lacking work authorization is the key to removing the magnet.

The Select Commission recognized the link between jobs and illegal entry when it endorsed employer sanctions by an overwhelming vote. The related issue of the method for verifying work eligibility, however, proved deeply divisive. This bill resolves the Select Commission's dilemma by authorizing employers to rely-for the time being-on existing identifiers and requiring the President-within years-to implement "such changes in or additions to" the verification requirements "as may be necessary to establish a secure system to determine employment eligibility \* \* \*

The United States must act decisively to prevent illegal flows-but also must respond compassionately to the plight of those illegal aliens who have acquired important equities through years of living in the United States. The Select Commission pointed the way with its unanimous recommendation to legalize a substantial percentage of the undocumented population. That recommendation represented a recognition of the need to provide humane treatment for persons who possess a major stake in this country.

A mass deportation effort directed at persons who have lived among us for a number of years would prove seriously disruptive of our national life. The United States, moreover, simply lacks the tools to round up and expel millions of generally law-abiding people. This bill attempts to deal realistically with persons who can document years of residence in the United States and is designed to exclude both recent illegal arrivals and persons intent on violating our immigration laws in the

The Immigration Reform and Control Act of 1982 is a fair and balanced approach to our major immigration problems. I urge the Members of this body to pass this essential legislation.

The CHAIRMAN. The Chair now recognizes the gentleman from California (Mr. MILLER).

Mr. MILLER of California. Mr. Chairman, I yield 8 minutes to the gentleman from California (Mr. Ep-

Mr. EDWARDS of California. Mr. Chairman, I thank the gentleman for

yielding me this time.

Mr. Chairman, I thank Mr. MAZZOLI and the members of the Immigration Subcommittee for diligently trying to work through the thorny issues involved in revising our immigration laws. But I seriously disagree with many aspects of the bill and I don't think we should proceed with it.

The seriousness of the problems in the bill demand full debate and amendment. In the last days of a lameduck session, it is most unfortunate to take up this complex bill, around which there is no consensus. The lack of consensus is clear from the bill's narrow escape from being recommitted by the Judiciary Committee to the Immigration Subcommittee. The lack of consensus is clear from the 350 amendments pending on the

I would like to just briefly state some of my major concerns regarding this bill.

I believe the bill accelerates the potential for increased violations of civil and constitutional rights. The possible increase in discrimination is inherent in various provisions of the bill.

I have always been, and I remain, opposed to employer sanctions, which after all are the real heart of this bill. Putting the onus of law enforcement on employers is simply not appropriate to this problem and the U.S. Chamber of Commerce is justifiably opposed to this provision. In addition, I believe the employer sanction provision is discriminatory on its face. With the prospect of fines and criminal penalties looming over each employer, what employer would be willing to talk about employment to someone who looks or sounds foreign or bears a foreign surname?

I also remain adamantly opposed to the possibility of a national ID card for all citizens. In addition to the prospect of an Orwellian nightmare, this would simply be unworkable. As quickly as a card would be devised, a forgery would follow behind it.

The civil rights implications of the employer sanctions and possible ID card requirement are profound indeed.

On the H-2 workers provision, after working for years to abolish the old Bracero program under which the country suffered, I am deeply concerned that we do not start up another such program. I am afraid the H-2 provisions will do just that and I am opposed to them.

I wholeheartedly support legalization. However, the bill does not go far enough. I am deeply disturbed about the people the bill leaves in limbo due to the arbitrarily selected date for legalization and I am very concerned about the two-class system set up in this legalization provision, with its associated denial of Federal benefits.

I am also concerned about the possible costs of legalization to the States and local governments. And, let's be very clear, undocumented workers pay taxes. Even under this bill, to be eligible for resident status they must show that they have not been nor are they likely to be "public charges". However, in this period of recession, all workers are precariously employed. It is not clear if legalization will mean additional costs to State and local governments. If it does, the Federal Government should bear the burden of the cost. The bill currently contains such language and it is crucial that this language be kept in this bill.

In addition to the problems in the bill that I've discussed, this bill does not even address the management problems under which the Immigration and Naturalization Service operates. The bill also totally neglects the foreign policy implications inherent in

I will support amendments that address my concerns. I will offer a couple of my own, such as my amendment requiring the INS to secure a search warrant before any of its agents could enter a farm or other outdoor operation without the consent of the owner. This amendment has bipartisan and multiregional support and it has been my peasure working with Congressmen Dannemeyer and Fazio, among others, on it.

However, I must caution my colleagues that the House and the Senate versions of the Immigration Reform and Control Act are very different bills. Even if the House version could be amended to address our concerns. we would be faced with a Senate-House conference in which much of our work could be lost.

#### □ 2300

Mr. STRATTON. Mr. Chairman, will the gentleman yield?

Mr. EDWARDS of California. I yield to the gentleman.

Mr. STRATTON. The gentleman is very knowledgeable on this subject and I may appear to be argumentative. I do not know anything about the bill at all except what little I have read. I have been expending my time on some of these other matters that have come one after another in this lameduck session.

My concern is, assuming that we legalize all of the illegal aliens that are now in the country at the present time, what are we going to do to prevent what I understand to be a constant, steady flow coming over from Mexico day after day?

I am told that it is some 1,000, 2,000,

The gentleman from Illinois says we are gong to hire some extra border patrolmen but in the 24 years that I have been in this body we have talked about hiring them but somehow they never seem to get hired.

My understanding is that they have about two patrolmen for every mile which obviously is not going to be very effective without a fence or without the kind of thing that they have over between the borderrs of West Germany and East Germany.

What does this bill propose to do, I would ask the gentleman, to deal with that problem, or does the gentleman feel that it does not effectively deal with it?

Mr. EDWARDS of California. I am not an expert on the subject because I have not been a member of the subcommittee, I would respond to the gentleman from New York.

However, having been a member of the Judiciary Committee for 20 years I can remember time after time that we have authorized increased surveillance of the border, our southern border, and administration after administration, including Democratic administrations and Republican administrations, have not responded to our requests.

The gentleman does go to the heart of the matter. Certainly a more efficient border organization and control, plus an improved foreign policy working with Mexico and our other sister countries in Latin America, would be a much better response to the problem of undocumented workers than this bill.

I would like to explain a little bit more on that in a moment as to why I

disagree with the bill.
Mr. MAZZOLI. Mr. Chairman, will

the gentleman yield?

Mr. EDWARDS of California. I am

happy to yield.

Mr. MAZZOLI. I appreciate the gentleman yielding and I will certainly re-

store his time if he needs it.

Let me answer my friend from New York in this fashion: traditionally we have rejected requests to increase the Border Patrol, the surveillance arm, but to your credit and the credit of the people in this House and in this Congress we have over the last year and a half added 300 people to the Border Patrol staff and we have increased its function by 20 percent and increased the money of the Immigration Service by fully \$67 million.

What this has done is for the first time in history allowed us to address the problem in the multifold way that it has to be addressed, in the law, but also on the ground, with a lean and

very ready service.

We went, for example, to San Diego last year and found in the Chula Vista sector that the helicopters were not flying. Now they are flying. They were not flying because they had no gas. The gentleman from New York joined with us in voting for more money for the service.

So one way we answer the question, I tell my friend from California, who has been a very stalwart member of our full committee, is to improve the

Border Patrol.

I would join in with what the gentleman has said by saying also that you deploy an army along this border and you will never hermetically seal it, nor should you. You will only control it. And this is a bill that is a first step toward control.

Mr. EDWARDS of California. I would not like the committee to think that all is sweetness and light on the Judiciary Committee. We are agreeable. We get along very well. But we have sharp disagreement on this particular bill.

Mr. SENSENBRENNER. Mr. Chairman, will the gentleman yield?

Mr. EDWARDS of California. I yield to the gentleman from Wisconsin.

Mr. SENSENBRENNER. I thank the gentleman from California for yielding.

Is not the effect of employer sanctions as written into this bill turning over to the private sector of our economy the enforcement of the immigration laws rather than having law enforcement enforce these laws like they do all of the other laws?

Mr. EDWARDS of California. I agree with the gentleman from Wisconsin. The laws are being implemented after the people are in the United States and you are making every private employer in the United States who might hire an illegal alien, undocumented worker, an immigration agent.

Mr. ERLENBORN. Mr. Chairman, I yield myself such time as a I may con-

sume.

Mr. Chairman, the bill reported by the Judiciary Committee is a beginning on controlling immigration. I rise in support of H.R. 7357, but oppose the action of the Education and Labor Committee.

It is clear that U.S. immigration policy is out of control and that the country needs legislation to impose stronger restrictions on the influx of illegal aliens, an influx of increasing millions in recent years. We have no idea how many illegal aliens are in the country, but the Census Bureau estimates there are between 3.5 and 6 million illegal aliens in the United States, with an added half million entering each year. Other sources have suggested there are over 12 million illegal aliens in this country and that our border enforcement represents a large sieve. Whatever the number, the presence of such a large number of illegal aliens means that unscrupulous employers and their agents can bootleg illegals into jobs that are lower than the minimum wage compensation, the illegal workers are afraid to complain about wages and conditions, and jobs are taken from citizens or aliens with permission to work. This legislation under consideration would remove this incentive to hire illegal aliens and their resulting second-class status.

H.R. 7357 recognizes the illegal population and would offer permanent resident status to any alien who could prove residency before January 1, 1977. These people would then be eligible for citizenship in 5 years, under the rules for naturalization. In either recognized "legal" status, these workers would then be able to assert their

basic rights.

Furthermore, enactment of the proposed Immigration Reform and Control Act of 1982 will:

First, make it a Federal crime to knowingly hire illegal aliens,

Second, establish a national status verification program,

Third, stiffen penalties for violations by those using false documents,

Fourth, retain existing law to deny temporary and permanent status to Communists, criminals, dope users, and anyone who would threaten our national security,

Fifth, establish universal criteria for the legalization of current illegal aliens, granting a grace period, setting language standards and new naturalization requirements,

Sixth, streamline the process for po-

litical asylum, and

Seventh, continue to keep our doors open to refugees under terms of the 1980 Refugee Act.

In enacting stiff fines for employers who hire illegals, the act would reduce unemployment benefit fraud which has become a serious financial drain in a number of States and particularly in my own State of Illinois. Illinois Attorney General Tyrone Fahner recently estimated an annual loss of \$66 million in fraudulent unemployment claims.

Recent studies all conclude that America's immigration laws badly need reform. The last three administrations conducted studies, as did the House Select Committee on Population on which I served. This legislation would keep the welcoming torch of liberty burning, while protecting the best interests of our citizens. We are a nation of immigrants, and cannot close the doors to others seeking the opportunity to live in a free society.

Although I support the Immigration and Nationality Act amendments in general as reported by the Judiciary Committee, I cannot support certain amendments to the bill reported by the Education and Labor Committee. My opposition is directed to both the H-2 provisions proffered by Mr. MILLER and the discriminatory provision offered by Mr. HAWKINS and accepted by our committee.

As to the H-2 provisions, the basic thrust of those labor standards amendments created a regulatory straitjacket on the Attorney General and the Department of Labor in enforcement of the H-2 program. The committee amendments also penalize and unduly burden employers who, in good faith, attempt to secure either domestic workers or H-2 workers for employment.

This regulatory straitjacket is exhibited in the committee amendments requirement that a Department of Labor certification be a prerequisite to the Attorney General allowing admission of H-2 workers, a requirement not contained in present law or regulation. In reality, the Attorney General's authority is a safety valve for the failure of the Department of Labor to act in an expeditious manner, or for that matter, in an arbitrary manner. By requiring such a certification, the majority has forever foreclosed the Attorney

General, or the courts, from offering relief where relief may be needed. In other words, we need our crops planted and picked despite possible hangups in the administrative process. The safety valve continues to be a necessity

Another "straitjacket" provision of our committee amendments is the failure to allow an extension of time of employment for H-2 workers beyond 8 months, except those grandfathered in, such as sheepherders, timbermen, and cattlemen. Being unable to predict what the future may hold in terms and needs of agricultural employment, it would seem appropriate to provide for future contingencies to allow an extension for over 8 months in extenuating circumstances in the public interest.

The committee amendments also require a "cap" on admissions of H-2 workers unless the Department of Labor can certify to the Attorney General and to Congress that it can adequately enforce the program. I believe the Department of Labor's failures should not be imposed on employers who may comply in good faith with the law and need workers. A "cap," especially not this "cap," is not the proper way to assure enforcement. This "cap" is based on the number of foreign workers admitted in the 1982 year, prior to enactment of this legis-lation. Therefore, this "cap" would be unrealistically low in view of protections of future needs of agricultural workers because of the new employer sanctions.

The committee amendments would prohibit the certification of H-2 workers where there is a strike or lockout concerning a "labor dispute" as defined by INS regulations. In establishing definitions for strike, lockout, and labor dispute, it would seem the Secretary of Labor is the more appropriate authority to define such terms under his regulatory authority, rather than establishing those definitions in the law, particularly considering we have not had any testimony explaining the technicalities of interpretation of these terms. By adopting the INS regulations, the committee amendments recognize the agency with the least expertise in the area, and ignore those agencies with more expertise over labor disputes such as the National Labor Relations Board and the Department of Labor.

There are certain provisions in the committee amendments that are just unacceptable to those who endorse an equitable and workable H-2 program. For instance, the committee amendments claim to equalize payments by employers by requiring employers to pay social security and unemployment to foreign H-2 workers. In my opinion, such payments amount to a "windfall" for the H-2 workers, who would be getting more in their take-home pay

than domestic workers. This amounts to favored treatment to H-2 workers and is not fair to U.S. workers. Besides, this "equalization" allows those payments to leave this country rather than staying home where they could improve our own economy.

As well as creating a regulatory straitjacket for the agencies enforcing the H-2 program, the committee amendments fail to allow employers fair procedures in securing workers. The committee amendments require employers to file an application for certification of foreign workers at least 80 days before date of need, a time that may be long before an employer will even know if he will need workers. This extensive time requirement accommodates only those who wish to create a disincentive to hire foreign workers.

Under the present regulations and the committee amendments, employers are required to accept domestic employees who apply for employment for 50 percent of the period for which foreign workers have been certified. This requirement may mean an employer will have to hire well over 100 percent of his needs. Instead, I support the provisions of the original Judiciary Committee bill, which would allow a certification to remain effective only if the employers continue to accept domestic workers up until the time the aliens depart for work with the employers. In requiring the employers to hire domestic workers before foreign workers, the obligation should only extend to those domestic workers who are "able, willing, and qualified," standards parallel to the Judiciary Committee standards.

My concern for labor standards protections for workers is the reason I attempted to work out a compromise with the majority of our committee. The compromise never materialized. Instead of, in effect, "codifying" existing regulations, as the committee amendments do, I would require the Secretary of Labor, in consultation with the Attorney General and the Department of Agriculture, to establish new employment standards which are at least comparable to those under current regulations. Some flexibility is needed and all current regulations may not be applicable to this new law in their present form. There will be many changes in procedures and enforcement this whole bill will bring about. Because of these new concepts, for instance employer sanctions and amnesty, there is a need for at least moderate flexibility in regulatory writ-

Finally, the committee amendments contain a private right of action. It is my understanding such a provision is not needed to protect domestic workers. The employment offer to domestic workers, if accepted by them, becomes an "oral contract," enforceable under

current contract law. Additionally, many foreign countries, particularly the British West Indies, contract with employers in order to police the employer's job offers. Therefore, those countries can enforce those contracts against growers in this country. Another statutory right of action for either domestic or foreign workers is not needed, should not be created, and is redundant.

As to the discriminatory aspects of this legislation which Mr. HAWKINS' amendments, accepted by the committee, seek to address, I can appreciate his concern, but oppose his means. The committee amendments, in effect, authorize the Immigration Board to determine whether an applicant was discriminated against on the basis of race or national origin, discrimination already outlawed by title VII of the Civil Rights Act of 1964. Title VII, however, already contains sufficient protection of applicants to allay the concern that employers would refuse to hire applicants who appear to be "foreign." Under title VII, employers are prohibited from failing to hire any individual because of such individual's race, color, or national origin. Title VII also establishes an elaborate administrative scheme for the handling of complaints of discrimination and allows complainants to bring suit in Federal court to seek back pay, reinstatement, and other equitable relief. Title VII has proven to be an effective deterrent against employment discrimination, and has provided victims of discrimination with sufficient remedies where violations have occurred. At a time of fiscal austerity, there is no need for Congress to create another EFOC.

Under present law, only persons employing 15 or more employees are subject to title VII's employment discrimination prohibitions. The committee amendments, by permitting the Immigration Board to hear complaints of unfair treatment filed against persons employing more than three individuals, would effectively eliminate this exemption. Under H.R. 7357, therefore, "Mom and Pop" companies would not only be subject to criminal sanctions for violation of immigration laws, they would have to defend themselves against employment discrimination claims as well.

The immigration legislation has already caused substantial concern within some segments of the business community. Not only are all segments of the business community concerned with a proposal creating a second EEOC to process cases involving national origin discrimination, but Members of Congress should be concerned as well. If some feel that EEOC only cares about race and sex claims, then steps should be taken to deal with that problem. Such steps, however, should

not include creation of still another civil rights agency. We already have EEOC, the Department of Labor's Office of Federal Contract Compliance Programs, title VI enforcement agencies within each Federal department, and State and local fair employment practices commissions, among others. Establishing a new civil rights bureaucracy will not solve the illegal alien problem. For these reasons, I must oppose the committee amendment.

I would like to mention one additional committee amendment to this bill which I think makes good sense. My colleague, BILL GOODLING, offered an amendment to section 303 of the judiciary bill to provide for assistance to school districts charged with the responsibility of educating eligible legalized aliens. The amendment recognizes a limited Federal responsibility and merely conforms the Federal educational assistance program in this act to the program structure designed by the Refugee Education Assistance Act of 1980. It is a good amendment, it makes sense, it was adopted unanimously in committee, and I think the House ought to accept this amendment.

#### □ 1120

Mr. Chairman, I reserve the balance of my time.

Mr. MAZZOLI. Mr. Chairman, I

yield myself 4 minutes.

Mr. Chairman, I thank all of my colleagues for their patience. This is of course a very late hour, but this is a very important bill, landmark legislation, and it does deserve the careful attention all of the Members are giving

Mr. Chairman, I am pleased and proud to bring before the House H.R. 7357, the Immigration Reform and Control Act of 1982. This is an important and a highly necessary piece of legislation. Its enactment during this postelection session, the lameduck session of Congress, would be a noteable achievement and would constitute the adoption of landmark legislation.

I am proud of this bill and proud to have my name attached to it because it is a fair and a balanced piece of legislation. It is humane and sensitive and at the same time effective, and it is in the words of the New York Times "not nativist, not racist, and not

mean.'

But though the bill carries my name and that of the junior Senator from Wyoming, Senator SIMPSON, it in fact does not belong to us but belongs to a whole generation of legal scholars, academicians legislators, demographers, and others who have worked on the reform, the sensitive and humane reform, of the Nation's immigration policy.

This bill could, of course, be called the Rodino bill for if there is, as I said earlier this evening, one person in this country whose ideas are most clearly represented in this bill and who represents the best of legislating skill, it is the gentleman from New Jersey, our distinguished chairman.

The bill could be called the McClory bill or the Fish bill for these gentlemen, the gentleman from Illinois, the gentleman from New York, are both Members who served on the Commission headed by the President of my alma mater, Father Ted Hesburgh of Notre Dame. They served with distinction, and they are both, I am proud to say, cosponsors of our original bill.

It could also be called the Hesburgh bill because again it contains the elements which were in the Commission report following the 2-year tenure of Father Ted at its helm. There are hundreds of people who have contributed to our production of the bill.

I might say the preparation for tonight's debate and for tomorrow's debate and markup and eventual production of a bill began many years ago, back in 1970. Four successive administrations have studied this problem and made recommendations. The 16-member panel, the Commission, called the Hesburgh Commission, made its report beginning in the spring of 1981.

The committee I am privileged and proud to serve as chairman began its hearings along with our counterpart in the Senate. We had sessions together for the first time in 30 years as joint hearings. We heard from 300 witnesses. We had 14 separate days of separate hearings. It has been a magnificent effort from the standpoint of the energy expended and I think the talent devoted to the job.

I believe it has been in my view and I admit to some bias here, I think it is a magnificent effort in the finished product. I think it is balanced. I think it is sensible, I think it is humane. I think it is effective, I think it is a bill that there is not a Member of this House who would have any shame in voting for because it treats the people the way they should be treated, as human beings. It does not scapegoat, it does not take cheap shots, it has no hidden agenda. It simply treats human beings as human beings and gives them the dignity and accords them the justice to which they are entitled.

I would hope and I would implore my colleagues to listen to the gentlemen and gentlewomen who will be debating the bill. This is highly complex-it is a multifold bill. It is difficult to sometimes follow. The Members will perhaps think that we are speaking of esoterica, points that are so far out that they cannot be related to actual practice.

These are, however, despite the difficulty of comprehension, important points which should be given careful attention.

Mr. Chairman, I would like to salute the gentleman from Kentucky, the chairman of the Committee of the Whole House on the State of the Union, who has chaired many a committee meeting over his effective years in the House, and he has always chaired them with fairness. He is in the chair tonight. We appreciate his diligence.

But what I hope happens at the end of the day, whenever this bill reaches final passage, I hope that the bill is given a good strong vote of bipartisan support. My friend from California said that the 15-to-13 vote in the committee did not show bipartisan support. The 257-to-137 vote this afternoon in adoption of the rule does show indeed bipartisan support for this measure.

But I hope that we have the passage of the bill resoundingly.

Mr. Chairman, everyone who has worked in the production of this bill will find some elements in it which they have proposed or supported. But, and this should be noted, no one will find in this measure every single recommendation or element they support. That is because this bill is a consensus and a compromise. No true compromise satisfies everyone totally. But, a successful compromise must satisfy everyone at least partially. H.R. 7357 satisfies everyone partially. So, it is a good compromise.

The background and preparation for today's debate has been monumental. Starting in 1970, four successive administrations have studied the immigration issue and recommended changes in our immigration laws which are incorporated in this bill. In 1978, Congress appointed a 16-member Select Commission on Immigration and Refugee Policy which conducted the most exhaustive study in 70 years of immigration policy.

Beginning in the spring of 1981, my subcommittee and the Senate Immigration Subcommittee held the first of what ultimately turned out to be 6 full days of joint hearings on immigration reform. I should note that this was the first time in 30 years that such joint hearings have been held. My subcommittee went on to hold 8 additional days of its own hearings. In all, we held over 100 hours of hearings with more than 300 witnesses appearing.

My subcommittee and I also traveled to California and Florida for extensive investigative trips, and I traveled on my own to Texas and California for further meetings on immigration with concerned groups. And, needless to say, there were literally dozens of private meetings and briefings.

My subcommittee and I ventured to Mexico City to talk with Mexican Government officials about immigration. The gentleman from New Jersey (Mr. RODINO) and the gentleman from New York (Mr. Fish) traveled to Haiti to get firsthand observations of the situation there. My subcommittee and I also visited refugee camps throughout Southeast Asia and met with refugee officials in Europe, all to get a better purchase on the subject.

In short, I believe that although the study of such a complex subject is never complete, all the study that could be done has been done in preparation for today's debate.

The need for the legislation is clear and the time could never be better nor more clement.

Our immigration policy is in chaos. Hundreds of thousands of aliens enter our country each year either illegally or initially legally only to overstay their visas and become part of the large mass collectively known as undocumented aliens. Many of these undocumented aliens, though working and contributing to our economy and society, live in a netherworld because of their lack of legal status.

The process for determining political asylum for those who claim they have been persecuted or will be persecuted if returned to their home countries has become gridlocked, so that over 125,000 asylum applications are pending. And the system for allowing a limited number of temporary foreign workers into our country to take jobs Americans do not want is so cumbersome that employers hire undocumented aliens rather than use the legal system.

It is essential the House act promptly on this legislation. For one thing, the illegal immigration problem continues to grow just as we sit here. Apprehensions along this Nation's southern border have increased dramatically this year over last year, just as they have increased steadily over the last 15 years. And just as they will grow again next year, unless something is done.

Part of the reason the apprehensions have increased is because my subcommittee has strengthened the Immigration and Naturalization Service, particularly the Border Patrol, with increased personnel and funding. That battle is far from over, though, and we will continue to fight for additional funding.

But, the major reason for the increased apprehensions is the increased flow of undocumented aliens. The pull factor, the availability of jobs in this country, is very effective. As long as this magnet exists, as Attorney General William French Smith pointed out in hearings before my subcommittee, even an army along our border will not stop the flow of undocumented aliens.

The immigration reform bill will end the job lure, turn off the job magnet, by making it illegal for employers knowingly to hire undocumented aliens. That brings me to the second important reason to act now on this bill.

We are all exceptionally concerned about the high levels of unemployment in our country. The 11 million Americans out of work today are being drained of their vitality and energy because there are not jobs available. Congress must act to put these Americans back to work, and one vital action will enactment of H.R. 7357. Recent editorials in the New York Times have urged adoption of our bill, in part, because it will tend to return Americans to works.

Contrary to what some might believe, we are not just talking about jobs in agriculture, Undocumented workers come from all parts of the globe and take jobs in all sectors of our economy, frequently at very high wages. Experts estimate that as few as 20 percent of the undocumented aliens work in agriculture, with the bulk in manufacturing of service sector jobs.

During the Immigration Service's operation jobs, conducted earlier this year in major cities all across the country, the undocumented aliens apprehended were earning almost \$5 per hour on average, with many making \$10 an hour earning \$20,000 per year. While Americans may not want certain agricultural jobs, they would find these attractive.

No one knows exactly how many jobs will be opened by the immigration bill or how many jobs will be saved in future years, but even the most conservative estimates start with 500,000 jobs. Other estimates run to 1 to 2 million jobs enough to lower the unemployment rate in the United States by 1 to 2 percent.

Every unemployed American costs the American taxpayer about \$7,000 per year in transfer payments for unemployment insurance, AFDC payments, food stamps, and the like. Assuming that 1 million U.S. citizens can be put back to work under this bill, there would be a savings to the Treasury of about \$7 billion.

This bill will cost some money to implement. And, to have an effective Immigration Service, Congress will have to provide additional funding for the Service after the bill is enacted. But these costs are minimal compared to the potential savings it will bring about.

A third reason we should act now is that under the strong leadership of Senator Alan Simpson, the other body has finally taken a stand on immigration reform. This House twice overwhelmingly passed on immigration reform bill authored by Chairman Rodino, but the other body failed to act, leaving the immigration problems to worsen. But this year, by an 80 to 19 vote, the other body recognized what the House saw 10 year ago—our immigration policy is out of control and needs immediate attention.

We should do no less than the other body and pass H.R. 7357 this year.

Let me hasten to add here that if we enact immigration reform legislation this year, Congress will not be able to wash its hands of the subject. H.R. 7357 only scratches the surface of the migration problem.

The United States has responsibilities to the sending nations to help them increase the standard of living and the quality of life for their citizens so that these people will not have to leave their homelands to find a good life for themselves and their families. These programs will be costly but they will be richly rewarded.

I believe many Members are very familiar with the bill, and I appreciate the time each of them has already taken individually to study this complex legislation. Let me however here very briefly explain the major provisions of the bill.

H.R. 7357 contains sanctions against employers who knowingly—and I need to emphasize that word, knowingly—hire undocumented aliens. There are escalating penalties, but each violator is entitled to receive a warning for the first violation.

The bill contains various protections against possible discrimination arising from this provision, such as the requirement that all new hires—whatever their race, creed, or color—have their documents checked, and that there be monitoring of the program by the President and the Civil Rights Commission, and by a special task force composed of the Attorney General, the Secretary of Labor, and the Equal Employment Opportunity Commission.

The bill contains no requirement for a national identification card, and, in fact, specifically prohibits such a card. During the first 3 years after enactment, job applicants will have to present common identifiers, such as a driver's license and social security card. During those 3 years, the President and Congress, working together, will see what changes, if any, are necessary in this initial system.

The bill streamlines, but at the same time makes more fair, the process for determining asylum applications—those people who arrive on our shores and claim they cannot return home because of a fear of persecution. The Judiciary Committee added a provision guaranteeing judicial review for all asylum applicants whose requests are turned down at the administrative level. This is a valuable amendment.

The legislation provides for a limited and carefully circumscribed program for admitting temporary foreign workers to take jobs that Americans do not want, mostly in seasonal agriculture. This is not a guestworker program, which raises the possibility of foreign workers taking jobs from Americans.

This is a streamlined version of the H-2 program, which has been on the books for 30 years, which provides for admission of foreign workers only to take specific jobs and only when the employers have first been unsuccessful in recruiting Americans to do the jobs.

Finally, the bill provides a carefully controlled legalization program for those undocumented aliens who have lived in our country for a minimum of 3 years and who have demonstrated a willingness to work and contribute to our society. This is not—I repeat, not—a blanket amnesty, as some have charged, nor does it grant immediate citizenship to anyone, also as charged.

This proposal, which has been endorsed by three successive administrations, including the Reagan administration, and by the Select Commission on Immigration and Refugee Policy, chaired by Father Theodore M. Hesburgh of Notre Dame, would require the INS to interview each applicant individually. Only those of good moral character—those who are found acceptable after being tested against the 33 grounds in the laws for excluding prospective immigrants—would be allowed to adjust to legal status.

None of those adjusting could immediately become U.S. citizens. Those who arrived before January 1, 1977, in other words, who have already been continuously living and working in our country for 6 years, could become permanent resident aliens. After 5 years, during which they could be deported for various acts, they could apply to be

naturalized U.S. citizens.

Those who arrived between January 1, 1977, and January 1, 1980, would become temporary residents under the bill. Only after 3 years of good conduct, and only after another screening against the exclusions, could they become permanent resident aliens. Five years thereafter they could become naturalized citizens.

The bill bars newly legalized aliens from most forms of welfare, except emergency medical care and aid for the aged, blind, or disabled, for the first 3 years, in the case of pre-1977 arrivals, and for the first 6 years, in the case of the more recent arrivals. It also provides, subject to appropriations made in advance, reimbursements to State and local governments for welfare costs and educational costs associated with legalization.

Based on all the evidence my subcommittee has gathered, these welfare costs at the Federal, local, and State levels will be minimal. Aliens coming forth to be legalized are working people or else they will not be eligible for legalization. A condition of legalization is to forgo most forms of welfare. One who would flout these restrictions faces deportation.

Admittedly, the new legalized aliens will create some costs, but most work now and pay taxes—recovering almost

none since tax returns are not filed—and I strongly suspect they will continue to work and pay taxes when legalized. I do not believe they will become a major new welfare drain.

Mr. Chairman, I am aware that various Members may want to introduce amendments to improve the bill we are considering. Many have been printed in the RECORD as required under the rule.

Each amendment will be considered carefully. But, I am hopeful the Members of the House, before voting on an amendment, will keep in mind the essential fairness and balance now in the bill and give the benefit of all doubt—and all close calls—to the committee bill.

Some Members want a legalization cutoff date of 1982, some want 1973. The committee came down in the middle with 1977 and 1980 dates you find in the bill.

Some Members want a massive guest-worker program, some want no foreign workers admitted at all. The committee chose instead of either of these extremes a controlled and workable H-2 program.

Some Members want no employer sanctions, others want to put any person who hires an undocumented alien out of business. The committee chose the reasonable middle by creating an escalating set of penalties, starting with only a warning to the first time offender.

In short, the committee has achieved—for the most part—the solid middle ground position.

I also hope Members will realize that this is not the last word—the state of the art. It is a complete bill but does not solve—nor is it intended to solve all immigration or discriminatory problems in the United States. The bill contains the essential elements of a reform effort, with goodies for all.

I have looked through the amendments and realize that many of them have great appeal. But almost none of them have had any hearing or the detailed examination by my subcommittee and the full committee that I know this body would and should expect.

I have already stated publicly and repeat today that during the next Congress, I will be prepared to undertake hearings on many other parts of the Immigration and Nationality Act which are outdated and need revamping. I hope that Members would not offer these special amendments since they will be given full consideration next Congress.

In conclusion, Mr. Chairman, I want to once again commend all the Members of this body and all the outside groups who contributed so much to the legislation before us today.

We have a good bill, and I look forward to its enactment.

The CHAIRMAN. The Chair recognizes the gentleman from New York (Mr. Fish).

Mr. FISH. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, this debate opened with a statement from our committee chairman, the gentleman from New Jersey, typical of his continued wise leadership in the area of immigration. His was a message of urgency. The time for action to regain control over our immigration policy is long overdue. The burden in this debate rests squarely on those who at this late date object to effective enforcement policies.

One of the pleasures for me in this Congress has been working with the gentleman from Kentucky, the chairman of the subcommittee. Few men give of themselves so much to realize necessary but difficult changes in our immigration laws.

Mr. Chairman, I welcome the opportunity today to join my colleagues in speaking in support of H.R. 7357, the Immigration Reform and Control Act of 1982. This legislation represents the culmination of years of work. The Select Commission on Immigration and Refugee Policy held 12 regional hearings in different parts of the United States, conducted 24 in-depth consultations, and authorized extensive social science and legal research. A Cabinet-level task force carefully scrutinized the Select Commission's findings and recommendations. The Immigration Subcommittees of both the House and Senate heard from numerous witnesses from Federal, State, and local governments, business and labor organizations, industry and agriculture, religious and ethnic groups, and civil liberties organizations. The Judiciary Committee, although unable to please everyone, made a conscientious effort to accommodate very diverse concerns. The genius of the Simpson-Mazzoli bill is reflected in its balance of competing interests. The bill-by focusing on enforcement, adjudications, and legalization-addresses the major issues related to the presence of undocumented aliens in the United States today.

The American people, for many years, have called upon the Congress to confront our lack of control over our borders. We have the opportunity, in this Congress, to act with firmness to deter future illegal entry and at the same time reaffirm America's historic commitment to accept legal immigrants from other lands.

Employer sanctions, the centerpiece of immigration law enforcement, is a key provision in this bill. H.R. 7357 attempts to discourage the annual flow of hundreds of thousands of undocumented aliens by removing the major inducement to illegal migration—the magnet that draws people to our

shores—the opportunities for employment. The concept of employer sanctions has received the support of a number of administrations, favorable votes on two occasions in this body, and the endorsement—by a 14-to-2 vote—of the Select Commission on Immigration and Refugee Policy. Alternatives have been considered and found wanting. Employer sanctions is the only effective option—in the judgment of the many people who have focused on the problem of illegal immigration.

This legislation specifically guards against the possibility of making employers law enforcers. Sanctions are not imposed on employers who hire illegal aliens unknowingly. The language of section 101 provides that it is unlawful to hire an alien "knowing the alien is an unauthorized alien with respect to such employment An employer that "establishes that it has complied in good faith" with the verification requirements "has established an affirmative defense \* \* \*." I believe the statutory language as well as the legislative history will protect American businesses by limiting the application of employer sanctions to "knowing" violations. The Business Roundtable, by endorsing this bill, has expressed its faith that employers will receive fair treat-

Contrary to what has been said, the GAO did not say employer sanctions were ineffective. It said in other countries they will not be enforced.

H.R. 7357, moreover, has been designed to protect ethnic minorities against invidious discrimination. Four separate provisions of this bill are designed to prevent discrimination. Employers of four or more persons who ignore a warning and fail to follow paperwork/verification requirements will face a \$500 civil penalty-for each individual with respect to which such violation occurred-regardless of whether the individual turns out to be a U.S. citizen or lawful permanent resident alien. By following the paperwork requirement, the employer will know if the applicant is eligible. He need not fear making a mistake. The employer, I say to my friend from California, will discriminate against Hispanics at his peril.

I am confident that we strengthened the protections against discrimination in the course of our full Judiciary Committee markup. One important provision inserted by the committee directs the Civil Rights Commission to monitor the enforcement of employer sanctions. In addition, the bill directs the Attorney General, the Secretary of Labor, and the Chairman of the Equal Employment Opportunity Commission to review and investigate complaints of discrimination. Another provision requires the President to consult with Congress every 6 months

concerning the implementation of employer sanctions—including possible discrimination in employment.

The very extensive monitoring and reporting mechanisms are an expression of the importance the Judiciary Committee attaches to guarding against discrimination. We are confident that existing civil rights legislation, State and Federal, will provide an important measure of protection in many cases of discrimination based on national origin. Congressional oversight, moreover, will help insure that the new statute is properly enforced.

Another major focus of this legislation is reform of the immigration adjudication process. Today, exclusion, deportation, and asylum adjudications are beset with crippling delays. H.R. 7357 upgrades the administrative adjudicatory structure—by providing it greater independence and stature and thus minimizes the need for protracted judicial involvement. The Judiciary Committee has preserved the critical role of the Federal judiciary in adjudicating the important liberty-related matters that arise in some immigration cases but has eliminated needless layering of review. We have combined due process with necessary reforms.

This legislation, finally, recognizes that substantial numbers of illegal aliens are here to stay and responds realistically and humanely to their plight. At the same time that we act with firmness to deter future illegal entry, we must display compassion in our treatment of those aliens who have become a part of our society. The conferral of a legal status on undocumented aliens with years of U.S. residence will permit this population to come out of the shadows and contribute more to our country.

The Select Commission, by a 16-tozero vote, favored "a legalization program as part of its enforcement package." Precedents in U.S. law for legalizing the status of undocumented aliens can be found in the registry date—which serves as a statute of limitations on illegal entry—and the discretionary remedy of suspension of deportation.

H.R. 7357, in my opinion, sets appropriate cut-off dates for eligibility for legalization. They are the same dates incorporated in S. 2222. Persons who entered the United States prior to January 1, 1977, may qualify for permanent resident status, and persons who entered prior to January 1, 1980, may qualify for temporary residence status—a transition status leading to permanent residence after 3 years.

The approach of our Judiciary Committee and the other body represents an appropriate compromise between the views of those who would eliminate the legalization provisions entirely or only advance the registry date to 1973—and those who would provide

lawful permanent resident status to persons who entered prior to January 1, 1982. A failure to provide a substantial legalization ignores the equities of persons who have lived in the United States for a number of years, perpetuates the existence of a large underclass of illegal aliens, and continues to subject citizens and lawful permanent resident aliens to enormous social costs.

The distinguished chairman of our committee pointed out in his eloquent remarks that many years already have been lost in addressing a critical national problem—our lack of control over immigration. Any further delay would be unconscionable. The full Senate under the great leadership of the Senator from Wyoming acted in August—and the ball is now in our court. I am confident that we will run with it—and bring an important law reform effort to fruition.

#### □ 2340

Mr. MAZZOLI. Mr. Speaker, will the gentleman yield?

Mr. FISH. I yield to the gentleman from Kentucky.

Mr. MAZZOLI. I appreciate the gentleman yielding.

Mr. Speaker, I just want to commend the gentleman. He has been a stalwart force in this subcommittee. The gentleman has served for many more years in this subject area than I have.

There was a great learning process for me when I had the privilege to become subcommittee chairman. I have had the great honor of working with the gentleman from New York, the ranking member of our subcommittee, whose wisdom and diligence and willingness to really get on with a task has just impressed me from start to finish.

I want to thank the gentleman. He is being very modest in claiming his own role, which has been very substantial in reaching this point of progress on this legislation.

The CHAIRMAN. The Chair now recognizes the gentleman from California (Mr. MILLER).

Mr. MILLER of California. Mr. Chairman, I yield 10 minutes to the gentleman from California (Mr. ROYBAL).

Mr. ROYBAL. I thank the gentleman for yielding this time to me.

Mr. Chairman, it was my intention to offer a privileged motion, to adjourn, in protest to the scheduling of this bill at this late hour, but I decided not to do so in deference to my colleagues who were informed earlier today that no votes would be taken once this debate started. I did not want to place those Members in a position where they would have to miss a rollcall, and that is the only reason,

Mr. Chairman, why I did not offer that motion.

I still, however, protest the fact that this bill was taken up at 10:25 this evening. I suppose if we go through today's schedule that we will find that we did a tremendous job in passing several pieces of legislation. One of those is the Futures Trading Act of 1982. That bill is so important that it passed this House by a voice vote.

One of the other bills was the Paddy Creek Wilderness bill. I suppose that bill deals with wilderness, with frogs, with wild animals, and I am for that.

I voted for these bills. The other bill was the Mark Twain National Forest.

So as we look at the rest of the bills, we find that we can pat ourselves on the back for we took the time during the day to debate those bills that deal only with soil, with wild animals, with the wilderness of this Nation. I agree that they are important that we do these, they are worthy bills, but why I am protesting is the fact that they took precedence over a bill that affects millions of individuals the moment it becomes law, and millions of individuals in for generations to come.

To schedule this bill at this time, after having told Members that they need not be here, I think, is an affront to those whom this bill will affect, and it definitely shows insensitivity to the feelings of millions of people in this Nation.

Mr. MAZZOLI. Mr. Chairman, will the gentleman yield?

Mr. ROYBAL. Not at this time.

It shows insensitivity to those people whose civil rights will be affected by this bill in its present form.

I have been told that there is great support for this bill. I wonder why it is that no minority group in this House or any place that I know of is in favor

of the bill in question?

Now, I must admit that the members of this committee are intelligent, hardworking individuals; that they are well intentioned and that they really be-lieve that this bill is truly a reform bill. Not too long ago, someone asked: "Will this bill stop the illegal flow of aliens coming from Mexico?" I did not hear an answer to that question at all. because the truth of the matter is that it will not, and it will not because this bill, or the drafters of this bill, have not consulted or enlisted the cooperation of high officials of the Mexican Government, men who would have the power within that governmental structure to enter into some agreement that would make it possible to stop that flow of illegal aliens to this Nation.

We all realize that this is a complex and controversial bill. In fact, this bill is called the Immigration Reform and Control Act of 1982. I want you to listen to the word "reform." There is no reform in this bill whatsoever. The truth of the matter is that the immi-

gration authorities are understaffed, that they have a tremendous backlog, that anyone in this House can go to the city of Los Angeles or Miami or any large city and find every day hundreds of people surrounding that building trying to get service, people who actually could adjust their status, but only three clerks are there to serve their needs.

These people come back early the next morning or sleep there that night in order to be the first in line.

If you are talking about reform, let us do something about the problems of the immigration authorities. Let us not depend on what was done here on this floor when we were debating an appropriation bill, when the gentleman from Texas (Mr. KAZEN) had to get up and offer an amendment that placed 100 more agents at the border.

Why does it have to be done in an appropriation bill? Why can it not be done by those authorizing committees that have all these fancy hearings? Why can it not be done properly?

Well, my friends, the under staffing, the back log of the Department of Immigration while we continue to call a discriminatory piece of legislation a reform bill. Employer sanctions we are told are designed to prevent these people from coming in? The truth of the matter is, that a hungry man is not going to be deterred from coming to the United States when sanctions are imposed against somebody else; no way.

None of these things are going to happen. What is going to happen, though, and this is the fear of the Hispanic community, that employers fearful of sanctions will not interview for employment anyone who may appear to be hispanic. This is the discriminatory aspect of this bill that we oppose and we believe this is what will happen.

We are told that by having sanctions we are placing the responsibility on the employer he will not hire these people and, therefore, sanctions will be effective. The truth of the matter is that there are 20 countries that have sanctions at the present time some with penalties as high as \$20,000 that now realize that sanctions do not work. A GAO report clearly indicates that it does not work in any of those countries, and it goes on to say that the reasons why it does not work, or one of the reasons, is that they do not have enough money to enforce the law.

What makes the Members of this body, or anyone, think that we can do better when we do not even put enough money to make the Immigration Service effective in the job that they are now assigned to do? We all know that they are not doing their job properly because the Congress is cutting back funds for the Service instead

of increasing funds sufficient for them to provide a proper service.

Then as we go on we find that there is a system of verification, an ID card, that will no doubt be selectively applied to Hispanics. That is not going to work either. We were told just a little while ago that we can depend on title VII of the Civil Rights Act.

The Civil Rights Commission has reported that, "after the fact remedies are rarely adequate to compensate American citizens and legal residents for full enjoyment and participation in our democratic society". Now, something that I find very inconsistent is that the bill is recommending that no cap be placed on people coming into the United States under an H-2 program.

#### □ 2350

One of the arguments that I heard not too long ago with regard to this bill is that this is a jobs bill. You know, I just could not believe that when I heard it, but that was said right where I am standing at this moment. This is not a jobs bill. If anything, it is another bracero bill. The bracero bill, if you remember, was put into place during the war, and 22 years later we repealed the law. Is this what the committee has in mind when they place no limit on their H-2 program?

I am baffled by the inconsistency of the proponents of H.R. 7357. The underlying urgency in pressing legislation is the apprehension that we have lost control of our borders. Time and again, I heard my colleagues state that we had to curtail the influx of undocumented workers who are taking jobs away from domestic workers. Yet when it came to debating the merits of the H-2 provisions, few rose to protect the interest of domestic workers. Instead, the committee passed a backdoor bracero program.

My overriding concern is the possibility that the H-2 program, as amended by this bill, will be used as a backdoor approach to revive a bracero program such as the one this country used to employ 4 and 5 million Mexican temporary guestworkers from 1942-64. This experience clearly showed that dependence on foreign labor only creates a pool of economically interdependent societies, and socially and politically disparate workers. Under the bracero program, employers held complete control over the workers' ability to remain in the United States. Consequently, highly vulnerable workers were subject to harassment and exploitation if they complained about working conditions. After 24 years of abuse we terminated the bracero program. I do not want to see this Congress sanction another temporary foreign worker program which does not adequately protect the rights of domestic and foreign workers.

H.R. 7357, as amended, overlooks the weaknesses and problems which now exist in the H-2 program. Instead of eliminating the present program, the committee voted to expand it. The changes adopted facilitate the entry of hundreds of thousands of temporary foreign workers, thus increasing the economic incentives for recruiting H-2 workers. This will only increase this country's dependence on cheap foreign labor to the detriment of U.S. migrant workers.

Since the inception of the H-2 program in 1952, the use of agricultural workers has not exceeded 30,000 annually. Employers who utilize the H-2 program are exempt from certain tax obligations. Neither the foreign worker nor the employer have to pay social security taxes (FICA). This means that an employer can save 6 percent of his cost by hiring an H-2 alien rather than an American citizen. Additionally, growers do not have to pay unemployment insurance taxes on wages paid to foreign contract labor, thereby saving an additional 2 to 4 percent more on their taxable payroll.

As a result of the amendments adopted to H.R. 7357, most restrictions which protect domestic workers have been weakened. Displacement of U.S. agricultural workers is more likely to occur as are civil rights violations against foreign workers.

The amendments to the H-2 certification process only require a minimal recruitment effort to find domestic workers before foreign workers are certified. This will result in a large-scale influx of foreign workers as was the case with the bracero program and most recent European guest worker programs.

Current certification procedures are designed to protect domestic workers. In order to bring in foreign H-2 workers under present regulations, an employer petitions the Department of Labor (DOL) through its local employment office 80 days prior to the date of need. In its petition the employer must establish that there are not enough qualified U.S. workers in the Nation and that the use of H-2 workers will not adversely affect the wages and working conditions of domestic workers similarly employed. DOL then makes a determination 20 days in advance of actual use. Under this arrangement, DOL has 60 days in which to recruit domestic workers. These deadlines insure that the interests of domestic workers are protected.

The amendments adopted by the committee shorten from 80 to 50 days the period DCL will have to determine availability of domestic workers. This change will have an adverse impact on the domestic farm labor force. DOL will only have 30 days in which to get job information to the migrant farm

workers. Due to the mobility of agricultural workers, it will be extremely difficult to find them within 30 days.

Presently, DOL is responsible for formulating the H-2 regulations. Only DOL can approve petitions for any kind of H-2 workers. Under H.R. 7357, the ultimate authority would be vested in DOJ. The Attorney General would then seek the input of DOL and for the first time the U.S. Department of Agriculture (USDA). This dilutes DOL's role. Although it would continue to issue all regulations relating to certification for H-2 workers, it would have to work in conjunction with the USDA in advising the Attorney General on regulations governing agricultural H-2 workers.

A further modification which weakens the restrictions of the H-2 program is the change in the recruitment standard. Under current regulations. employers must prove that there are no American workers available before foreign workers may be recruited. The national test provision is designed to protect domestic workers. Our domestic migrant workers travel long distances and cross many State lines to obtain agricultural jobs. The current standard is not excessively burdensome. In reality all that is usually required of an employer is that he place a job order with the local employment service which in turn transmits it to other employment offices.

As amended, the recruitment standard does not specifically mention the national test. Leaving this critical standard to regulations may very easily result in the denial of job opportunities to our domestic migrant workers. If, for instance, the employer is merely required to look within his local area or State, there is the possibility that the job notice will never reach the domestic migrant farm worker because they rarely remain stationary. The occupation requires mobility, therefore, job notices must reach the migrant stream.

The adoption of a ready, willing, able, and available at the time and place standard makes it easier for employers to reject U.S. workers from consideration. This is contrary to the intent of the current H-2 program to protect domestic workers. Farmers will have access to foreign labor even after turning away all but the most able U.S. workers.

The H-2 amendments also isolate and protect the unscrupulous H-2 employer by limiting the Secretary of Labor's power to deny certification to employers who, during the previous 2-year period, have substantially violated a material term or condition of the contract. The colloquy which took place between Mr. Butler and Mr. Mazzoli during committee consideration indicated that this new language had been requested by the administration. Furthermore the higher standard

requires material, breath, substance, and an element of knowingness. This change would prohibit unscrupulous employers from using H-2 workers for only 2 years versus the original bill's 5-year limitation.

History has clearly illustrated that reliance on temporary foreign labor creates many domestic and international problems. The bracero program was terminated because of the many Mexican workers who were subjected to exploitation and discrimination. Other European countries have also recently curtailed the use of guest workers because of similar problems.

All persons working in the United States should be protected by the same civil and labor rights as citizens. Anything less is economically unfair to U.S. citizens and permanent residents, and encourages the continued exploitation of foreign workers. The many inequities of the current H-2 program will only be increased by the adoption of these or any amendments which effectively create a guest worker program. The changes will further erode the civil and labor rights of U.S. workers while at the same time allowing for a larger number of temporary workers to be employed in the United States without the protection of those civil and labor rights.

Senator Alan Simpson has commented that "once employers can use foreign workers, they want to keep using them and discourage U.S. workers, thereby justifying a continued need for Mexican labor." Staff members of the Select Commission on Immigration and Refugee Policy recommended against any substantial expansion in foreign worker recruitment at this time. I respectfully concur and call for the deletion of the H-2 amendments to H.R. 7357 as reported by the Judiciary Committee. When taken in the context of the entire bill these changes are premature and may be altogether unnecessary given the labor force which will be given legal status through the legalization provision of this bill.

The CHAIRMAN. The time of the gentleman from California has expired.

The Chair now recognizes the gentleman from California (Mr. MILLER).

Mr. MILLER of California. Mr. Chairman, I yield myself 7 minutes.

Mr. Chairman, I rise in support of the Education and Labor Committee substitute section 211, the temporary guestworker H-2 program in H.R. 7357. The Education and Labor Committee was granted a sequential referral of H.R. 6514 based primarily on our jurisdiction over labor standards and other provisions of this section affecting both American and guest workers. On December 1, our committee reported the bill with eight amendments, including a redrafted tempo-

rary worker program.

The Education and Labor Committee overwhelmingly approved my substitute in order to protect domestic workers from displacement by temporary foreign labor and to guard against abuse and exploitation of agricultural workers, be they alien or domestic.

As reported by the Judiciary Committee, H.R. 7357 utterly fails to provide adequate, or even current, protections for domestic or temporary foreign labor.

The current H-2 temporary worker program is a small program designed to meet the legitimate short-term labor needs of employers. Regulations were promulgated by the Secretary of Labor over the past 20 years to protect the domestic work force from adverse impacts resulting from the influx of alien workers under the H-2 program. These existing regulations require employers of temporary, alien labor to certify to the Government that there is an insufficient number of qualified American workers to fill the available jobs. Current regulations also contain basic labor standards protections for the temporary agricultural alien worker.

Nearly 100 percent of the applications for these temporary workers have been routinely granted. The number of alien agricultural workers involved in the program has hovered between 17,000 and 20,000 per year

over the last decade.

But the Judiciary Committee bill could increase the number of temporary workers by as much as 15 to 25 times. According to one of the bill's strong supporters, the Judiciary Committee version could produce as many as 300,000 to 500,000 H-2 alien workers at a time when there are millions of unemployed Americans looking for jobs.

Yet the Judiciary Committee has not even seen fit to maintain the current safeguards for American workers in H.R. 6514. The certification procedures intended to give first rights to a job to American workers have all but been discarded. The Judiciary Committee bill throws out nearly all the protections for the H-2 worker, too. In addition to expanding enormously the size of the program and weakening its protections, the Simpson-Mazzoli bill makes no provision to assure that its weak protections are enforceable. Under the current 18,000 agricultural worker H-2 program there have been only a handful of investigations by the Government to assure compliance with legal requirements. Less that 2 percent of the H-2 sites were inspected in 1981-11 sites out of nearly 900. Yet violations were found in nearly half the cases investigated.

Obviously, the Government has little means of assuring compliance with the current, small-scale program. The Judicary Committee bill is silent on safeguarding the legal and economic rights of 300,000 to 500,000 alien workers (and the Americans they might displace), especially if the protections themselves are weakened.

For these reasons, the Education and Labor Committee sought and was granted sequential jurisdiction over this legislation. The Labor Standards Subcommittee, of which I am chairman, has developed a substitute to the Judiciary Committee's section 211, which addresses the severe shortcoming in the Judiciary Committee's H-2 language, and which would assure that the H-2 program is enforceable and fair both to American workers and to work here.

The Education and Labor Committee substitute places the labor standards currently found in regulations, into the text of the new law. Having noted the Department of Labor's woefully inadequate effort to enforce current law and regulations, the substitute provides that the program may not be expanded unless the Secretary certifies that he has the ability to enforce the law thoroughly. The bill also provided access to the courts for any person aggrieved by a violation of this portion of the law.

The changes adopted by the Education and Labor Committee to protect American workers from displacement and to maintain labor standards protections for alien workers are of crucial importance. The AFL-CIO has stated that without the guarantees included by the Education and Labor Committee substitute "the H-2 program would undermine the very purposes of the Immigration Reform and Control Act." In fact the continued support of the Federation is contingent on the success of the Education and Labor substitute on the House floor. The minority members of the Education and Labor Committee, likewise have concerns over the Judiciary Committee temporary worker program. The committee report by the minority indicates that they intend to pursue the "adequate protections for foreign workers and the continued strong labor standards protections to domestic workers," in H.R. 7357.

At this time of record unemployment, the Congress must not send a message to the American worker that we will sanction efforts to rescind longstanding labor protections, while relaxing procedures which regulate the importation and protect the rights of foreign temporary workers in this country.

Mr. Chairman, I urge that when this bill comes under the 5-minute rule that the House in fact support the Education and Labor substitute to section 211.

Mr. LUNGREN. Mr. Chairman, will the gentleman yield for a question?

Mr. MILLER of California. Yes.

Mr. LUNGREN. Mr. Chairman, am I to understand from the gentleman's comment that if the H-2 provisions the gentleman puts forth are adopted, the gentleman is prepared to support the bill?

Mr. MILLER of California. That is correct.

Mr. MAZZOLI. Mr. Chairman, would the Chair advise the gentleman from Kentucky how much time he has remaining?

The CHAIRMAN. The gentleman from Kentucky has 34 minutes remaining.

Mr. MAZZOLI. I would seek perhaps a clarification from the Chair. I believe that is the total time remaining, but I think under the general agreement of tonight, the gentleman from Kentucky would have 4 minutes remaining of the first phase of the general debate. Is that correct?

The CHAIRMAN. That would be up to the gentleman.

Mr. MAZZOLI. Mr. Chairman, the gentleman from Kentucky would yield himself 2 minutes.

Let me make reference—unfortunately my friend from California is not here in the Chamber; I do not see him—I have listened with care to his very eloquent remarks tonight about the chagrin that he feels about the placement of this bill, starting it at 10:25 tonight rather than at an earlier hour. He cited the parade of legislation we had, all of which was important, but not probably amounting to the complexity and the importance of the bill before us tonight. He indicated—I am sure it was accidental—that somehow that reflected an insensitivity.

I think that the gentleman, of course, was aware that the gentleman from Kentucky—in fact, all of us—urged the leadership of the House, and we have for the last 2 weeks, to get our bill up. We have done almost everything from begging to shining shoes to get it up. So, I would join the gentleman. It is certainly wrong that this bill reaches the floor at this hour, but I would have to say that the gentleman from Kentucky had not a thing to do with the scheduling.

The gentleman from California, my friend (Mr. ROYBAL) said something to the effect that, say, 500,000 people would come in under the H-2 provision. Well, of course, no one really knows, and that is the big conjectural part here. No one really knows how many people would be needed, how many temporary agricultural workers would be required in the event the employer sanctions work, and we think they will, and that will cut off the supply of jobs to the undocumented.

□ 2400

But one thing that the Committee on the Judiciary did, Mr. Chairman, was to put in our bill very severe limitations and very severe requirements which have to be met by the temporary workers who come in. They have to establish under our bill that there is no adverse effect upon the prevailing wages of American workers by these people who would come in from abroad. They would come in for a limited period of time. And we furthermore state that there woud be a requirement that there is no American worker willing to take the job.

Having made that clarification, Mr. Chairman, I for the moment reserve the balance of my time, which I be-

lieve is 2 minutes.

The CHAIRMAN. The Chair would like to state that the gentleman from Kentucky (Mr. Mazzoli) has 32 minutes remaining, the gentleman from New York (Mr. Fish) has 42 minutes remaining, the gentleman from California (Mr. MILLER) has 36 minutes remaining, and the gentleman from Illinois (Mr. Erlenborn) has 44 minutes remaining

Mr. FISH. Mr. Chairman, I yield 7 minutes to the gentleman from California (Mr. Lungren) a member of the

subcommittee.

Mr. LUNGREN. Mr. Chairman, I would just like to reiterate what the chairman of the subcommittee has just said. Those of us on this subcommittee who are in support of this bill in no way determined that this would be the hour we would be debating the bill.

I even thought facetiously that perhaps I might bring up a privileged resolution to extend the pay raise to Members of Congress so we could have more members of the press following this issue. It seems rather strange that when we deal with the subject of the pay raise, which averages a penny per constituent, we have the press galleries overflowing, but when we talk about an issue that has not been addressed in 30 years by this Congress or previous Congresses, we see very few of the members of the press there. One wonders, when we talk about the priorities of the Congress, about the priorities of the press as well. Nonetheless, this is the time we have, and this is the time we must use.

Mr. Chairman, some Members have gone before us and have reminded me almost as if we were in a debating society or in an academic setting in which we were talking about the ideal situation we would all wish for. But unfortunately we as legislators do not have that luxury. We are talking about the

real world.

Some would say that we cannot have employer sanctions, that they are too intrusive and they are unnecessary. The only problem is that if we do not have them, we are not going to demag-

netize the pulling effect that we see in immigration that is the promise of jobs that drives people from their other countries to come to the United States seeking opportunity.

Some say that we cannot have a guest worker program or an expanded H-2 program because we have problems of unemployment in this country. There is no doubt that we have unemployment problems here, and no one here intends to diminish the impact of

The fact of the matter is that we have a de facto guest worker program in this country. We did rid ourselves of the bracero program with all the problems that that entailed, but that did not stop the people from coming.

If anyone can honestly stand up here and say that we do not have a de facto guest worker program, I would invite them to accompany me to the Rio Grande or to accompany me to Chula Vista, Calif., and I would ask them to sit on the banks of the river in Texas, as I did several years ago, and talk to those coming from Mexico as they come across.

I talked to one person, and I asked him how often he comes across, and he said he comes across the river twice, once so he can seek employment in his regular job and then so he can come across to his regular class in a junior college on the American side of

the border.

I talked to people who come here on a monthly basis to their jobs. We would drive along the banks of the Rio Grande, and we saw, for instance, a woman dressed in maid's clothing sitting atop the shoulders of someone. presumably her husband or her brother. As we drove down in a border patrol truck and as they came across the Rio Grande, we could see them impassively, without any change in expression, turn around in the middle of the river and go back. And when we went down the river about 2 miles, as we were checking on other people coming across, we would see them come across because they then know we could not get back in time to stop

We have to realize that we are talking about realities here. We are talking about between 3.5 and 12 million people living here as second-class citizens. It is nice for us to say that we should not do something that could lead to discrimination. The reality is

that there is discrimination.

We have 12 million people living in this country, a large percentage of them living in my part of the country, who everyday have to worry that they are going to be picked up by the border patrol and sent back home. And when they send their children to school, they have to wonder if, when their children come home from school, mother and father are going to be on their way back down to Tijuana, and hopefully, whether they can try to get back across the border 2 days hence.

We are talking about the agricultural community in southern California and in Arizona. The total harvest employment in those two States alone is about 300,000, and no one will say it officially, but if you talk to people, you will find that half of that crew is here illegally. That means 150,000, maybe 170,000, and some say, "well, you can't have an H-2 program with more than 15,000 or more than 20,000," as we presently have.

We have an official H-2 program which does not work in the Southwest portion of the United States, which is a huge, humongous, uncontrolled H-2 program that everyone knows exists, a program that we say we do not have and that we ignore at our peril. And if we do not pass this bill, it is going to

continue.

So I think we ought to try to talk realistically here. There is discrimina-tion now. We can talk about the problems of discrimination or the potential for discrimination. Let us talk about the reality of discrimination. I would like to have a Member stand up and tell me why they think it is better or why Hispanics would be better served if we do not pass the bill when there is discrimination in my part of the country and when Hispanics are the subject of that discrimination.

In addition, I would just suggest this: When a law is not enforced year after year after year as this law is not enforced, what does it do with respect to the credibility of our society?

Theodore White in his recent book, "America in Search of Itself," says

One starts with the obvious: That the United States has lost one of the cardinal attributes of sovereignty-it no longer controls its borders. Its immigration laws are flouted by aliens and citizens alike, as no system of laws has been flouted since prohibition. And the impending transformation of our nation, its culture, and ethnic heritage could become one of the central debates of the politics of the 1980's.

Mr. Chairman, it is not our fault that we are in the waning days of this lameduck session.

Mr. CONYERS. Mr. Chairman, will the gentleman yield?

Mr. LUNGREN. I will yield in just a minute.

Mr. Chairman, we have been trying to bring this bill before Congress for several months. The question now is whether we are going to gather up the courage to deal with a very, very tough issue. And it is a tough issue, one that needs to be addressed, and we should not let the late hour prevent us from trying to address it.

Mr. Chairman, I am happy to yield to the gentleman from Michigan.

Mr. CONYERS. Mr. Chairman, I am happy to find out that the gentleman is concerned about reality and he is

worried about the discrimination that is going on.

It just so happens that the gentleman from California (Mr. ROYBAL) might be equally as worried as the gentleman, maybe even a little bit more worried, with all due respect.

Let me ask the gentleman, why can he not give some respect to the leaders of the Hispanic community in the Congress and in this Nation and in their organizations who have been begging and pleading for years and saying that what you are trying to do now, sir, is going to create far more hardship, more privation, and more discrimination than all the discrimination and hardship that exists at this present moment? Do they not know anything about their own problem?

Mr. LUNGREN. Mr. Chairman, the gentleman makes a point about those who believe this will lead to more discrimination. In fact, for the last 4 years I have attempted to consult with the Hispanic community. Continually, as we have dealt with this issue, we have had the representatives of the major organizations talking with us.

The CHAIRMAN. The time of the gentleman from California (Mr. Lungren) has expired.

Mr. FISH. Mr. Chairman, I yield 1 additional minute to the gentlemen from California (Mr. Lungren).

Mr. LUNGREN. Mr. Chairman, one of the problems is that everyone seeks a perfect bill. Labor is not happy with this bill. I can guarantee that agriculture is not happy with this bill. The leaders of the Hispanic community by and large are not happy with this bill. Some church groups are not happy with this bill.

The problem is that there is no pefect solution, and if we continue to seek a perfect solution, as we have for 30 years, we will be frozen and paralyzed by inaction.

### □ 2410

What we have to do is try and bring as best we can a comprehensive approach to the problem. We have to try and bring, not giving the best for everybody, but the best we can do under the circumstances, giving a little bit here and giving a little bit there.

I would suggest to the gentleman that is precisely what we have done here.

Mr. CONYERS. Mr. Chairman, will the gentleman yield?

Mr. LUNGREN. I yield to the gentleman from Michigan.

Mr. CONYERS. It did not sound like when I heard the gentleman from California (Mr. ROYBAL) that the gentleman had given anything anywhere to the leadership in that community. I think it is an insult to the Hispanic people of this country to be treated by this charade that is going on now.

Mr. MAZZOLI. Mr. Chairman, I

vield myself 1 minute.

Let me address my friend from Michigan and his concerns, and also my friend from California. I think the gentleman from California (Mr ROYBAL) will suggest and say that while this is not a perfect bill there are many elements in it which reflect the attention of the Hispanic community.

We have in there many protections. The Civil Rights Commission is involved in monitoring the application of employers' sanctions. We have in there a task force which was authored by our friend from Massachusetts (Mr. FRANK). That is in there at the behest of the community.

We have in the bill, as we know, a twofold system of penalties so employers have to keep paper on all applicants, not just those who might look different.

So I think there is much of the bill which is directly there because of attention to that community.

Mr. ROYBAL. Mr. Chairman, will the gentleman yield?

Mr. MAZZOLI. I yield to the gentleman from California.

Mr. ROYBAL. Is the gentleman saying that the civil rights of individuals are amply protected in this bill?

Mr. MAZZOLI. I did not say that this was a civil rights bill. This is not meant to be a civil rights bill.

Mr. ROYBAL, I am asking the gentleman if he thinks those rights are adequately protected.

Mr. MAZZOLI. I think they are; yes. Mr. ROYBAL. Then the gentleman will not accept any amendments correcting any possible inequities?

Mr. MAZZOLI. I did not say that. The gentleman and I have had extensive conversations in the last 2 days. There are amendments that the gentleman has offered which may well be elements of addition and betterment to our bill.

Mr. MILLER of California. Mr. Chairman, I yield 5 minutes to the gentleman from Texas (Mr. Gonza-

Mr. GONZALEZ. I thank my distinguished colleague from California for giving me this opportunity to speak tonight. I want to say by way of preface that I join my equally distinguished colleague from California (Mr. ROYBAL) and the gentleman from California (Mr. MILLER) in what they have said here in both areas of great concern with respect to guest workers and all.

In my freshman year here I was either correctly or incorrectly blamed for the demise of the bracero program. The first year I came here that is what I concentrated on and I just hate to see the continuation of the misery of one country being fed on the misery of another country.

So I want to compliment the gentleman from California (Mr. MILLER) for

his sensitivity in this very important area.

No one of conscience could reflect on our history of immigration law and be untroubled. Our Nation of immigrants has a proud history of offering refuge to the oppressed, opportunity for the ambitious, and shelter for the unwanted. Ours has truly been the golden door.

Yet our immigration laws have been marked by fear and racism more than anything else. There was a shameful exclusion act which tried to bar Orientals. The longstanding quota system itself tried to preserve our Nation's opportunity solely for the nationalities that had already arrived, a policy of blatant racism.

Incidentally, in this act I notice that there is a special proviso for a pilot program and also for waiver in certain cases involving those countries that have been respectful of our immigration laws.

What does that mean? It means that a country like Mexico is not going to be able to have any entitlement to this privilege provided for in this bill.

That system was left somewhat altered but not essentially changed by the preference system that went into effect with the last reform written in 1965. It was that same law that for the first time established an unrealistic and unenforceable quota on immigration within our hemisphere and led to our present dilemma.

The RECORD will show that I was the only one to rise in 1965 and got severely chastised. In fact, voices were raised and I was shouted at by the then Representative McGregor from Minnesota because I dared question his amendment.

The quota was appended to that act on an amendment from the floor, even though the then chairman of the Judiciary Committee had assured me when I sought to approach the committee during hearings, because I had been told that such amendment would be entertained in the committee, that no such possibility would occur.

Then in the middle of the debate the committee chairman abjectly accepts the McGregor amendment, no restraints to it.

I was the only one to get up and question it, the RECORD will show. I did not hear anybody from any part of society later or at any time coming up and saying, "Hey, look, what about this question?"

I predicted then that if that absurdity was adopted into law we would be within I said less than 10 years facing the dilemma that we are now trying to address.

Then I sent a telegram to President Johnson asking him to veto the bill. This was the apple of his eye. He even went to the base of the Statue of Liberty to sign that bill and I dared send

It was the same law that established that quota.

Our policy is torn between spite and generosity, between fear and charity. We accept more refugees than any other land, maybe more refugees than the rest of the world combined, yet even there the policy is at random and unpredictable.

Central Americans fleeing from imminent danger are turned back but Cubans who were simply an inconvenience to Castro were welcomed until we found out that most of them were black. Then all of a sudden that welcome mat was removed.

All of a sudden we had a dilemma here and we start saying, well, these are all castoffs that Castro wished on

Southeast Asians swept up in the tides of war have been welcomed, but not Haitians who live in oppression and misery as grim as any on the face of this Earth. The policy is not directed by any clear and consistent idea of what a refugee really is, but by the politics of the moment, by impulse. Some refugees find us generous; others find our hearts stony cold. It depends on whether we are feeling fearful or whether we are feeling charitable.

It is this same contest between spite and generosity that marks our overall immigration policy.

The bill before us is at once too

much, and too little.

It is too little because it does not undo the fundamental error of the 1965 law, the error that assigned totally unrealistic quotas on immigration from Latin America. Those are quotas that give no consideration to the history of the Southwest, that ignore the inextricable ties that have been in place since long before the American Revolution, and that seek to defy the unchangeable facts of geography. These are quotas that make legal immigration all but impossible for the typical Mexican or Bolivian or Central American—quotas that perforce create illegal immigration on a very large scale.

Enactment of this bill will not end illegal immigration. The fact is that Latin Americans are attracted to this country by a powerful set of forces. I might more accurately say driven, because these people are more driven than anything else. They are driven by warfare. They are driven by political oppression and persecution. They are driven by economic desperation. This bill does not change any of that, indeed, does not even address these forces at all.

Take the case of Mexico. The new President of Mexico has just set out on an austerity program that makes Reaganomics look like an economic boom, and in his own words, says that

him a telegram asking for him to veto his country will have "a couple of very tough years." In the words of Deputy Secretary of the Treasury McNamar, the people of Mexico are going to face 'a real drop in living standards." What they are telling us is that Mexico is sinking beyond poverty into mass deprivation. Hundreds of thousands, maybe millions of Mexicans, face a likely choice between slow starvation and a stab at decency, by moving across the border. If there is no chance for legal immigration to the United States, and no real chance for anything like a decent life in Mexico. the conclusion is obvious: The flow of illegal entry that we see today is destined to become a tidal wave.

The bill tries to address that prospect in a way that is too little: it seeks to penalize employers of undocumented aliens, but then it does not require a universal, uniform means of identification. The bill seeks not to offend Americans by requiring us all to carry an internal passport. It places the onus of identification only on those who happen to have a foreign look, maybe an accent of some kind. It establishes an identification system that is too loose to be really effective, but too discriminatory in its impact, too subjective in its application, to be either just or fair. It leaves enforcement up to private citizens, more than to any police apparatus. It, in fact, not merely invites the most odious kind of discrimination, but comes perilously close to compelling it. What could be more unreasonable, arbitrary, or unfair? What could be less in the spirit and letter of the Constitution? The identification system set up by this bill would not actually require people who have some kind of foreign appearance to carry a passport-but makes plain that for such people a passport would be the only practical thing to have. Thus, for those who have an alien appearance, there has to be effective proof of citizenship or legal status. For anybody else, there is no requirement to carry around a passport or birth certificate, plus one other form of good identification. Any law that sets up this kind of subjective, uneven standard, fails to meet the fundamental test of either fairness or effective-

Let us be honest about this. If the employer sanctions are going to work, then everybody in this country who applies for work will have to be required to submit a passport or other identification. If we really aim to limit jobs in this country to people who are legally present, we are going to have to enact the same kind of universal identification, and set up the same kind of alien police forces and invite the same kind of oppression that exists elsowhere. If we really mean to carry out the employer sanction provisions, we have to set up a passport and police system that the vast majority of

would find Americans unacceptable, and a dangerous extension of police powers. As it is, this bill puts the burden on just a few-those who in some way look alien, sound alien, or maybe just arouse the dislike of a prospective employer. It is too little to be effective, too unfair to be acceptable.

The bill provides for an amnesty for those illegal aliens already here, at least some of them. Those who have been here at least 5 years would be able to obtain permanent status. Those who have been here more than 2 years could become permanent residents, if they satisfy a maze of tests. Those who came in after 1980 would be plain out of luck. All of this differentiation reflects an effort to achieve a Solomon-like wisdom in determining who is deserving and who is not. It is arbitrary, it probably cannot ever be enforced, and it probably will not work. Despite the complexity of the amnesty provisions, what they reflect is, in fact, a stately throwing up of the hands-for the authors of the bill cannot choose between enforcing the law and giving up entirely. Thus, they would not punish old offenders, only the relatively new offenders, though there is no practical difference in their history, motivation, or qualification. The amnesty section simply falls in a middle ground, generous to some but devastating to others.

It is, of course, beyond the scope of the pending bill to address the real root causes of illegal entry-poverty, oppression, degradation, desperation. Yet, we all know that if those conditions could be alleviated in the countries from which illegal entrants come, we would not now be facing the dilemma that we do. Let us face the fact: unless we are willing and able to help alleviate the forces that sweep these people to our shores or unless we are willing to build up high walls and establish an army of police to make us all prove our legal status, each and every day, this bill will not stay the tide. It will not even create a pause. Those who come here out of desperation and in search of hope are not going to be deterred. Those who fear the undocumented workers will not find their hearts eased.

The pending bill is a commendable effort to slide between hard-maybe impossible-choices. But if fails to address the reality that for tens of millions of people living next to our border, people whose misery is already great, people whose desperation will mount quickly under the lash of depression and austerity, cannot now find legal entry and will not be able to do so under this bill. It does not open the border, but does not close it, either. It makes no fundamental change. It starts us down the road to an internal passport system, but in an

insidious and fundamentally flawed way.

It may be impossible to establish an immigration policy that is at once reflective of our historic open door and our fear of inundation. Yet, that is what this bill seeks to do. It would have us avoid being a police dominated state on the order of, say, Switzerland, yet achieve the same result. The bill is too little, in that regard; it will not enable effective border control. Yet it lays a great burden on a considerable minority of legal residents and native born citizens, who have the fate to bear an alien appearance or maybe speak with an accent of some kind. It seeks to grant a generous amnesty, yet harshly penalizes people who are identical in all but date of arrival. The bill moves to little to alter a fundamentally flawed quota system, too much in the direction of a police state, and too awkwardly to make any real difference in our historic dilemma.

Mr. FISH. Mr. Chairman, I would like to reserve the balance of my time. Mr. MILLER of California. Mr. Chairman, I yield myself 1 minute.

Mr. Chairman, it has been said time and again that this legislation is about this country getting control of its borders.

Let me suggest to the Members of the House that they ought to look very carefully, that to suggest that we are going to take in a substantial increase in the number of temporary workers when all of the evidence is that the Department of Labor is unable to enforce the existing program, the existing laws, the existing rights and protections both for American workers and for the temporary alien workers, in fact it would be a sham to suggest to American citizens that this program will get control of our borders by this program if, in fact, we go ahead and pass a law that does not provide adequate protections and adequate civil rights for those work-

We have a body of law that has grown up over 25 years that employers work with today. What the Education and Labor Committee amendments do on section 211 is seek to incorporate that into the law so that we can err on the side of protection of both foreign workers and American workers.

#### □ 2420

Mr. MAZZOLI. Mr. Chairman, I yield myself 1 minute.

Mr. Chairman, let me congratulate my colleagues at this very late hour, now nearly 20 minutes after 12. I think everyone has really benefited a great deal from this debate. We will have additional debate on tomorrow.

I would just simply ask Members of the House, our colleagues: If not this bill, then what bill? And if not now, then when?

Mr. CONYERS. Mr. Chairman, will the gentleman yield?

Mr. MAZZOLI. I yield to the gentleman from Michigan.

Mr. CONYERS. Well, the gentleman asks at 12:20 on Friday morning: If not this bill, what bill?

Mr. MAZZOLI. That is right.

Mr. CONYERS. I think the gentleman is insulting the Congress and people who have been working-

Mr. MAZZOLI. Mr. Chairman, I reclaim my time.

Mr. CONYERS. All right.

Mr. ERLENBORN. Mr. Chairman, I yield 3 minutes to the gentleman from Kentucky (Mr. Mazzoli).

Mr. MAZZOLI. I thank the gentleman from Illinois for his courtesy.

Mr. Chairman, I certainly resent what the gentleman from Michigan has said. Certainly there is nothing in my Congressional Record that indicates any intention to insult anyone nor anything indirectly insulting. This is a serious bill. And I simply ask the question: If not the bill that is before the House, then what bill? And, of course, there is no bill pending. And if not now, this time of the year, at this moment in the legislative session, then

I would say that there is no better time, and there is no better bill. So I would suggest and urge my colleagues in the House to give serious consideration to all of the offerings. The gentleman from California will have some serious amendments he intends to offer. There will be many more. We will have a full and fair debate. At the end of that debate I would urge all Members of the House to vote the committee bill up and to vote it up and vote it out proudly because it is a good bill and a balanced bill.

• Mr. WIRTH. Mr. Chairman, no one can deny that our immigration policy is in need of reform. Our country's immigrant flows have increased dramatically in recent years, and the American people have every reason to be alarmed especially at the level of illegal immigration we face. We are of course a nation of immigrants-but uncontrolled today immigration strains our economic and governmental resources, and must be addressed.

H.R. 7357 is the product of a long and arduous effort directed at comprehensive immigration reform, and its sponsors deserve our gratitude for focusing attention on this issue. But while this legislation would make sweeping changes in our immigration laws, it contains a number of very significant problems, and threatens the civil rights and liberties of Americans in the attempt.

H.R. 7357 requires employers to examine identification documents of prospective employees to determine if the individual is a U.S. citizen, or a legal or ellegal alien. Employers who hire illegal aliens would be subject to graduat-

ed civil penalties that increase with repeat violations. These employer sanctions are likely to result in dis-crimination against Hispanics and other minorities, and should not be en-

Employers intent on excluding minority applicants can conceal their discriminatory practices under the pretext of complying with the prohibition on the hiring of illegal aliens. On the other hand, well-meaning employers might avoid hiring minorities or "foreign-looking" applicants for fear of being subject to employer sanctions. Either way, minority applicants would likely be asked to provide more complete documentation than other applicants.

H.R. 7357 provides no expedited administrative or judicial recourse for applicants who are unfairly denied a job by a prospective employer.

The extent to which the rights of "foreign-looking" people can be abused was demonstrated by "Operation Jobs," a misnamed crackdown on illegal aliens conducted nationwide by the U.S. Immigration and Naturalization Service in April 1982. INS agents concentrated their efforts on Hispanic neighborhoods and gathering places, detaining many actual citizens who could not produce proof of their citizenship. In Boulder County and in Denver, Colo., for example, life in Hispanic communities was cruelly disrupted, leaving wounds that will not heal

In addition to the potential for discrimination inherent in employer sanctions, there have been serious questions raised about their effectiveness. A recent General Accounting Office report on the experience of employer sanctions in 19 other countries concluded that they are "not an effective deterrent to stemming illegal employment," because employers are able to evade responsibility for illegal employment and because of problems with enforcing the sanctions. The GAO report was not brought up during consideration of this bill in the House Judiciary Committee.

H.R. 7357 calls for development of a "secure" work-eligibility verification system within 3 years of enactment. Despite a weak disclaimer in the bill, this provision puts us on the slippery slope toward a national identification card. Such a document would be an intrusion into the privacy of our citizens and a violation of their civil liberties. The bill provides no safeguards preventing the new identification system from being used by employers or the Government for purposes other than employment eligibility verification.

H.R. 7357 creates a new guest worker program for the legal entry of temporary agricultural workers. The existing H-2 program in the Department of Labor is designed to provide employers with temporary labor only during unique and emergency situations. H.R. 7357 codifies the H-2 program and makes it permanent, regardless of market conditions and the need for workers. In addition, the dramatic expansion of the program-with a likely tenfold increase in the number of workers admitted-is unwarranted considering domestic levels of unemployment. Any guest worker program written into the law should more carefully account for conditions in the U.S. labor market and more closely attend to the problem of poor working conditions.

Legalization of current illegal aliens is the only practical and humane solution to a staggering enforcement problem, as the authors of this legislation have recognized. However, the various restrictions in H.R. 7357 contradict the intent of the legalization program and leave many aliens in a legal limbo. Workers in the United States since 1977 could be permanent legal residents, but would be denied public assistance benefits for 3 years. Those here since 1980 could be temporary legal residents, but would be denied benefits for 6 years. All of these legalized aliens, however, would be fully liable for taxes.

The purpose of legalization is to bring illegal aliens into the mainstream of society, abolishing a permanent underclass. Unfortunately, the legalization restrictions in H.R. 7357

would only perpetuate it.

Whatever the flaws of H.R. 7357, they pale in comparison with the draconian provisions of its companion bill, S. 2222. S. 2222, for example, strips the Federal courts of their role in reviewing asylum and refugee cases. Judicial review of Government action, regardless of an affected individual's status, has always been and must continue to be an essential feature of our legal system.

In addition, S. 2222 overhauls the preference system for legal immigration, limiting the admission of the "nonimmediate" relatives of citizens. As a member of the Commission on Security and Cooperation in Europe, I am concerned that these provisions run counter to the principle of family reunification underlying our immigration laws and the Helsinki accords of 1975, our most important internation-

al human rights agreement.

In coming to grips with the very real shortcomings of our current immigration policy, we must address the problem of border enforcement. There is no possibility that illegal immigration can ever be curbed unless the long stretches of our border that are currently unpatrolled are monitored. The Immigration and Naturalization Service, charged with enforcing immigration laws, is the most notoriously underfunded of our Federal agencies. H.R. 7357 includes a vague sense-of-

Congress provision on increased enforcement funding, but no actual authorization.

Given its lack of resources, we find that the INS enforces immigration laws the cheapest way it can—unfortunately, the cheapest way is neither effective nor humane. For example, the overwhelming majority of those rounded up and deported during the "Operation Jobs" crackdown had crossed the border and were back at work within days.

In addition to better border enforcement, an alternative to employer sanctions would be better enforcement of minimum wage and fair labor standards laws. By ameliorating the substandard conditions in which illegal aliens are compelled to work, we can reduce the economic incentives to hiring illegal aliens, and put alien smuggling operations out of business.

Finally, no immigration reform can be considered in a foreign policy vacuum. Mexico's economic difficulties must be recognized as the major cause of illegal immigration—a cause that has grown even greater in importance with the recent devaluations of the peso. The impact of changes in our immigration laws on the political and economic stability of our southern neighbor and third largest trading partner will be felt by our own economy. Yet we have not fully consulted the Mexican Government on the pending legislation.

The "push factors" leading to increased immigration cannot be ignored. The only effective long-term answer to the problem of migrant and refugee flows is economic development of our poorer neighbors, along with the vigorous promotion of human rights in other countries.

I oppose H.R. 7357 in its present form, and will support amendments that address the concerns I have outlined.

• Mr. SHAW. Mr. Chairman, today we are considering a most important bill, H.R. 7357, the Immigration Reform and Control Act. I would like to compliment the tremendous effort of Representative Mazzoli, chairman of the Immigration, Refugees and International Law Subcommittee of the Judiciary Committee, and all the subcommittee members. Without their dedica-tion, this bill would never have reached the floor and a bill of this type is long overdue. As a new member of the full Judiciary Committee, I am very pleased to have been able to work on this bill. I have the dubious distinction of representing a district where immigration is now cited more often than any other as the most important problem facing the district today. Therefore I was very proud to have the opportunity to help shape what I consider to be the most important immigration legislation in many decades.

Right now our immigration situation is clearly out of control. Due to our lack of a coherent policy we have sent a signal to the rest of the world which broadcasts that the United States is unable to secure her own borders. It was only a matter of time before someone put this to a test. Two years ago, the world watched as the dictator of an unfriendly country singlehandedly dictated U.S. immigration policy as he defiantly emptied his prisons and mental hospitals and sent people to the U.S. shores. The reaction of the United States to this hostile action was slow, indecisive, and inadequate. More than any other, this crisis clearly showed the urgent need for a strong, clear policy.

I believe this bill, H.R. 7357, will go far toward accomplishing that goal. To call a halt to the long, drawn-out process of hearings and appeals, the bill would streamline the proceedings so that decisions could be made swiftly regarding who should be admitted. To remove the lure of employment which draws most illegal aliens to the United States, the bill would penalize those employers who knowingly hire illegal aliens. Both these measures and many others in the bill would show the world that the United States is once

again going to decide who is admitted here and why.

While most of the bill does indeed strengthen our laws, one provision would have the exact opposite effect. An amnesty provision, which would "forgive" illegal aliens here before 1980 and give them legal status, is included. In my opinion this provision should be removed.

I have several reasons for my position. The idea of rewarding law-breakers is entirely contradictory to the idea of toughening our laws. The provision makes a mockery of the actions of the thousands of people around the world who have been waiting patiently to emigrate legally to the United States. Also, once these aliens receive citizenship, their family members are eligible for admittance so we will see a ripple effect that may result in literally hundreds of thousands of potential "citizens." And, finally, in these budget-conscious times, there are serious questions as to who will pay for the services needed by the aliens. The bill attempts to address this aspect, but since no one has any idea of the real number of illegal aliens who would be eligible for legalization, no one knows what the real costs will be.

Aside from all this, there is the practical concern of just how this legalization program would be carried out. According to a confidential INS planning document obtained by the Miami Herald and dated November 1, the INS has no idea how to effectively carry out the amnesty provision. For exam-

ple, applicants for amnesty must document the fact that they have been residing in the United States since before 1980. But INS has not been able to decide what type of documentation could be reasonably required. The potential for fraud and abuse is frightening.

It is because of these concerns that I plan to support amendments which will be offered to strike the amnesty provision. I also plan to push for final passage of this legislation. Imperfect as the bill may be, it represents a crucial first step in regaining control of our borders. We urgently need to take

that step. Mr. FAZIO. Mr. Chairman, as you know, a high level of controversy and debate continues to surround H.R. 7357, the Immigration Reform and Control Act that is before us today. Members continue to hold strong reservations about a wide variety of issues raised by this complex and comprehensive measure, and I am concerned that we will not have adequate opportunity to address these issues in the time remaining in the lameduck session. I am concerned that in our haste to adopt some kind of immigration reform, we will inadvertently

create poor public policy.

My own hesitations about this legislation persist. I am concerned about the costs that my home State of California and the other States will be forced to bear without adequate Federal support as a result of this measure's amnesty provisions. I support a reasonable amnesty policy, but recognize that State and local coffers which have already been strained by Federal budget cuts will bear the brunt of the amnesty program. California officials have estimated that the annual costs to the State under this bill would reach \$1.2 billion, plus another \$130 million in locally funded general assistance programs. I urge my colleagues to support the bill's provisions authorizing full Federal reimbursement to the States and to reject any attempts to block-grant Federal reimbursement or to significantly reduce the Federal Government's responsibility for the costs of amnesty.

I am also concerned about the enforcement burden placed on employers by the employer sanctions authorized by this legislation, and about the opportunities for discrimination that are inherent in such a program. And I am concerned that the agricultural sectors of California and across the country will be hard pressed by the implementation of employer sanctions, without adequate provision for the industry's

labor needs.

Further, I have reservations about the immigration reform bill as it is now written because it makes no attempt to address the problems and abuses of the enforcement arm of the INS that have become especially ap-

parent in the last year in California and in many other areas of the country. In their efforts to apprehend and deport illegal farmworkers, Border Patrol agents have been allowed to storm onto private farm property without a search warrant because the property is considered "open fields." In so doing, they have destroyed crops and farm property, harassed and frightened American and legally documented farmworkers, and have denied farmers and their employees their rights under the fourth amendment against unwarranted searches and seizures.

For these reasons, I strongly support an amendment that will be offered to title I of the bill by my colleague from California (Mr. EDWARDS), to require owner consent or a search warrant before an immigration official could enter onto a farm or other outdoor op-This amendment would eration. extend to this country's farmers and farmworkers the same constitutional protection that is currently enjoyed by business men and women and their employees whose operations are enclosed by walls. It would put a halt to the abusive treatment of farmers, farmworkers, and farm property that has been rampant in the enforcement practices of the Border Patrol, without hindering their legitimate efforts. I encourage the House to adopt this amendment.

• Mr. GARCIA. Mr. Chairman, the legislation that we are debating is one of the most significant bills to be considered by the 97th Congress. Control over the entry of noncitizens is key to how we determine our national soverignty. But it goes beyond that, our immigration policy shapes our national identity.

This bill, H.R. 7357, has the potential to affect that identity for generations to come. It is a reflection of how we want to structure our society, how we want our great Nation to continue to develop. Our immigration policy is also key in determining what kind of

future we will have.

A nation is made up of people. It is only as healthy and as capable as its people. That is why the United States is such a good nation. It is made up of decent, hard-working people who share common dreams and a common destiny. We are unique because we are a product of all the nations in the world.

The castoffs from every other nation, generation upon generation, have come to the United States to find opportunity, to prove themselves. That has been our source of strength,

our key to success.

We are not debating the way in which we will continue to determine that formula for success. H.R. 7357 is not mean spirited. It was written by honorable individuals. Unfortunately, I cannot support this bill. I have not

reached that conclusion without a great deal of consideration. I am convinced that we can come up with a better bill.

Our immigration problems—and we do have problems—have been with us for some time and will be with us for some time to come, but we will not be able to resolve this issue by passing this bill. I am concerned that we could make matters worse.

We could make matters worse because this bill will not work. It will not solve our problems; it will not stem the tide of immigration; it will not help us control our borders any better. The U.S. House of Representatives is made up of 435 very capable individuals. We were elected to serve the people of the United States by writing laws that would better provide for their needs and their future.

If H.R. 7357 passes, we are failing the people of this Nation because we have not lived up to our commitment to enact only just laws—only those laws that live up to the spirit of American democracy.

Clearly the House is divided on this bill. There have been 297 amendments introduced from both sides of the aisle. What it indicates is that we must consider this legislation further in the next Congress when we can sit down and deliberate more fully and in less haste.

H.R. 7357 must be fine tuned and reworked so that it better reflects the spirit as well as the letter of the law. It is not a tragedy if we do not pass a new immigration bill right now. It may, however, prove to be a tragedy if we pass this bill.

This issue is complex and longstanding. We will never solve our immigration problems completely, but we can get a better handle on them. H.R. 7357 does not do that. It does not effectively address this issue.

This is bad public policy. It is bad because as I said, it will not work, and because it is potentially discriminatory toward brown, black, and yellow people. I am certain that the intention of this bill is not to discriminate, but it is perceived that way by minorities, and if it passes its implementation will have that effect.

My specific difficulties with the bill are not unique. They are a familiar litany to those who have closely watched the evolution of the bill.

I have difficulty with the employer sanction provision. As a State Senator in New York, I worked hard against a State bill that would have imposed sanctions on employers. I thought it was wrong then. I think it is wrong now.

The proposed ID system will be expensive to implement, and I feel, finally, ineffective. The legalization program does not go far enough, and it

will prove to be an administrative nightmare.

The H-2 program is a thinly disguised bracero program. For those who have supported this bill because they feel it will open up jobs for our multitude of unemployed, how do they explain the expanded H-2 program? We do not need a guest worker pro-

Another difficulty with this bill is that it does not address the foreign policy aspect of immigration reform. Last week the Government of Mexico passed a resolution opposing this bill. We are trying to build better relations with Mexico. And while I do not believe that we should tailor our immigration policy to the needs of Mexico or any other nation, we must, nevertheless, realize that this bill has definite implications for that nation. It is part of our responsibility as a great power to develop policies that will not hinder our relations with our allies.

I am sorry that this bill was even brought up during the closing days of the 97th Congress, but since it has been I hope that it will be defeated.

The CHAIRMAN. The Chair announces that the gentleman from Kentucky (Mr. Mazzoli) has 30 minutes remaining; the gentleman from New York (Mr. Fish) has 34 minutes remaining; the gentleman from California (Mr. MILLER) has 30 minutes remaining; and the gentleman from Illinois (Mr. Erlenborn) has 41 minutes remaining.

The CHAIRMAN. For what purpose does the gentleman from California

(Mr. MILLER) rise?

Mr. MILLER of California. For the purpose of clarification, Mr. Chairman. It was my understanding under the agreement reached earlier today, that if you did not use your full allotment of your time in these 2 hours, you would lose it, and that tomorrow we would have 3 hours of debate, an hour remining for Education and Labor an hour remaining for Judiciary, and an hour for Agriculture.

ary, and an hour for Agriculture.
The CHAIRMAN. The Chair advises the gentleman from California that the only way you would lose your time, you would have to yield it back.

Mr. ERLENBORN. Mr. Chairman, I yield back all but 30 minutes of my time.

The CHAIRMAN. The gentleman from Illinois (Mr. ERLENBORN) yields back all but 30 minutes.

The Chair will inquire of the gentleman from California (Mr. MILLER), does the gentleman reserve all of the balance of his time?

Mr. MILLER of California. Yes, I do, Mr. Chairman.

Mr. MAZZOLI. Mr. Chairman, I reserve the balance of my time.

Mr. FISH. Mr. Chairman, I reserve the balance of my time.

Mr. MAZZOLI. Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly the Committee rose, and the Speaker pro tempore (Mr. Gonzalez) having assumed the Chair, Mr. Natcher, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 7537) to revise and reform the Immigration and Nationality Act and for other purposes, had come to no resolution thereon.

#### GENERAL LEAVE

Mr. MAZZOLI. Mr. Chairman, I ask that all Members may have 5 legislative days in which to revise and extend their remarks and to include extraneous matter on the bill just considered.

The CHAIRMAN. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

#### GENERAL LEAVE

Mr. MAZZOLI. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and entend their remarks and to include there in extraneous material on the subject of the special order today by the gentleman from Texas (Mr. Frost).

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

#### GENERAL LEAVE

Mr. MAZZOLI. Mr. Speaker, I ask unanimous consent that all Members be permitted to extend their remarks and to include therein extraneous material on the subject of the special order speech today by the gentleman from California (Mr. EDWARDS).

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

# CLEAN UP THE TOXIC WASTE SITES

(Mr. ECKART asked and was given permission to address the House for 1 minute and to revise and extend his remarks and to include extraneous matter.)

Mr. ECKART. Mr. Speaker, in the next several days the House is going to have an opportunity to vote on an issue of most critical importance for us all: The cleanup of hazardous waste sites throughout our countryside.

At stake is the prerogative of this House to properly oversee the actions of a particular administrative agency, in this instance the Environmental Protection Agency. While I appreciate the assistance that the EPA has given to me in helping to clean up two toxic waste sites in my district, the issue

here is whether Congress is going to have the proper tools to oversee the administration of this very important program.

My new district has six toxic waste sites in drastic need of immediate action. I would like to insert in the Record articles from a local newspaper in my district that serves to emphasize the importance of ridding our areas of these toxic waste sites and preserving the prerogatives of the Congress to insure that the laws of our country relative to the timely cleanup of hazardous waste sites are fully complied with by the Environmental Protection Agency.

The articles follows:

## SIX HAZARDOUS SITES LITTER ASHTABULA

(By Bonna Savarise)

Ashtabula County could be called the hazardous waste dump of northeast Ohio.

Of Lake, Geauga and Ashtabula counties, only the latter has hazardous waste sites—six of them.

Environmental scientist Gary Gifford of the Ohio Environmental Protection Agency said it is possible EPA may find more as it investigates the sites already in the county.

The six sites include three landfills, one in Kingsville Township, another on the border of North Kingsville and Conneaut and a third in New Lyme; the Eaton Mill site in Rock Creek; Poplar Oil Co. in Jefferson; and Fields Brook and Ashtabula city.

Almost \$2 million of federal emergency Superfund money has been spent to partially clean up Eaton Mill and Poplar Oil and to study Fields Brook.

Superfund was established to stabilize extremely hazardous sites in the country. Superfund money is allocated by federal EPA.

Eaton Mill and Poplar Oil were emergency sites before partial cleanup by EPA. The primary danger at the Eaton Mill site, located on Mill Street in Rock Creek, was that the chemicals were extremely flammable. Later, EPA found that 61 of the 55-gallon drums on the site contained high concentrations of polychlorinated biphenyls, known to be toxic. The other drums also had toxic wastes.

The last of 1,200 drums originally found on the site were removed by EPA in September. A total of \$160,000 was spent to remove them.

But Rock Creek residents say they want the soil on the site cleaned up too. EPA is still investigating the soil and residents' well water to see if it is contaminated.

Poplar Oil, located on Poplar Avenue in Jefferson, contains polychlorinated biphenyl contaminated oil. It took \$1 million in Superfund monies for partial cleanup.

Open tanks of the oil have been drained but several closed tanks still contain the contaminated oil. EPA plans to assess the site in the early part of 1983 before continuing with the cleanup.

Fields Brook in Ashtabula got \$200,000 in Superfund monies for a study to determine if it is contaminated. Chemicals from area industries were allowed to run off into the brook for several years.

According to Gifford, a preliminary study of the brook will be done this year and samples will be analyzed through Region 5 of the federal EPA in Chicago.

The three landfills, all closed, are not considered emergencies now because EPA does

not know what they contain. They are not eligible for emergency Superfund money.

Both the New Lyme landfill on Dodgeville Road and the Conneaut/North Kingsville landfill off Route 20 are being monitored now through wells, Gifford said. EPA is currently waiting for results of what may be in the landfills.

A clay cap was recently put on the landfill located next to the Big D Kampground on Creek Road in Kingsville by Olin Corp. of Ashtabula, at the company's own expense

Olin dumped chemicals in the landfill for

several years.

But EPA still wants money to see what is in the landfill and will be monitoring the site to see if the cap is effective in control-ling leaching, which occurs when rainwater goes into the landfill and comes out contaminated with chemicals, Gifford said.

Poplar Oil was placed on the National Interim Priority List in July. The list, which is in effect until the National Priority List is completed, contains only 160 sites in the country. By inclusion on the list, the site became eligible for more Superfund cleanup money.

#### LIVING WITH HAZARDOUS NEIGHBORS

People in Ashtabula, Lake and Geauga counties live alongside industries that store or treat hazardous chemical wastes, some of which are toxic to humans.

Approximately 30 firms scattered throughout the three counties generate a

variety of waste products.

Most of the wastes are solvents, like paint thinner, according to Pat Morrison, public information spokeswoman with the Ohio Environmental Protection Agency.

Corrosive solvents are those that can corrode steel at more than one-quarter inch a year. Reactive, or unstable, ones react violently with water or heat. The most dangerous reactive substances explode or release toxic gases when mixed with water.

Some solvents are ignitable, which means they can burst into flame in the presence of a spark, by friction or by absorbing water. Some solvents are toxic. They may be hazardous to humans even at low levels.

When a company is producing solvents as a waste material, it must either test the solvent to see if it is hazardous or check the federal Environmental Protection Agency's list of chemicals which are know to be hazardous. Morrison said.

"The primary danger is ignitability," she

Some of the waste produced by companies is acid-based or contains lead. Lead is also toxic to humans.

All Ohio companies are required to have a permit to store, treat or dispose of hazardous wastes.

The sites are inspected at least annually, Morrison said, but more if the company has a particularly large volume of waste. ones more likely to need it get it more often," she said.

Some of the companies test themselves by using monitoring wells and submit regular

reports, she said.

All of the companies with permits must also submit a closure plan, Morrison said. If the company closes, EPA must know what will happen to containers and tanks of

#### WHERE WASTES ARE HANDLED IN THE AREA

Below is a list of companies, by county, which deal in hazardous wastes. The information, for the most part, was obtained from permits on file with EPA.

#### ASHTABULA COUNTY

Reactive Metals, Inc., Metals Division, East 21st Street, Ashtabula, manufactures titanium sponge. Wastes are disposed of by burning. Scrap sodium is burned in one process and metallic sodium is burned in a second process.

RMI's Sodium plant on East Sixth Street Extension has a permit for chemical treatment of sodium calcium residue. The company burns reactive wastes from the manufacture of sodium metals.

Premix Inc., Harmon Road, North Kingsville, stores paint sludge and resin paste, and steel bottoms, another hazardous waste.

General Tire and Rubber Co., Middle Road, Ashtabula, can burn a half ton per hour of ignitable solvents and can store up

to 25,000 gallons of wastes in drums.

General Electric Co. at Reig and Maple Avenue in Conneaut stores up to 165 gallons

of wastes in drums.

General Electric Co., 82 W. Ashtabula St., Jefferson, stores solvents. The company manufactures light bulb parts and can store

up to 1,100 gallons of waste.

Detrex Chemical Industries, Inc., State Road, Ashtabula Township, stores up to 110 cubic yards. of solid waste in a waste pile. The company's waste is eventually inciner-

Diamond Shamrock, State Road, Ashtabula Township, can store chromium waste, corrosive solvents and reactive solvents-up to 390,000 gallons.

Cleveland Electric Illuminating Co., has two plants with permits, both on Lake Road in Ashtabula Township. CEI can treat up to 64,800 gallons a day of chromium and lead by burning. The other plant does the same type of burning but can burn up to 180,000 gallons a day.

IMC Chemical Group Inc., Middle Road, Ashtabula Township, stores spent pickle liquor, which is an acid bath used to treat steel. The spent pickle liquor is recycled to a form of iron chloride, a solution which can be reused. The sludge from the recycling process is shipped out of the area for dispos-

Olin Corp., Middle Road in Ashtabula Township, stores ignitable and corrosive solvents. The company can store 327,500 gallons of wastes and 12,800 cubic yards of solid wastes. It can treat 9,100 gallons of wastes a day.

Plasticolors Inc., 3129 Middle Road in Ashtabula Township, has a storage and treatment permit for solvents and heavy metals, including lead. It can store up to 5,000 gallons of waste in drums and can

treat 50 gallons per batch.
True Temper, Center Road, Saybrook Township, can store up to 660 gallons in drums and 1,500 gallons in tanks of solvents and ignitable wastes.

Reserve Environmental Services, Middle Road, Ashtabula Township, has a permit for surface impoundment-a minilandfill. Waste acid from acid storage is neutralized with lime and then pumped to the landfill. The waste is corrosive and reactive.

## GEAUGA COUNTY

Geauga County has only three sites, all in Chardon. Two are Diamond Shamrock plants. One, a metal casting division, recovers chrome from chromium waste, up to 2,000 gallons a day, and can also store 5,000 gallons of wastes in drums and 3,000 gallons in tanks.

The other Diamond Shamrock plant is a esearch and development facility which handles a wide variety of wastes, including corrosive solvents. It stores up to 8,000 gallons of waste in tanks and 2,000 gallons in containers

The third site in Geauga County is Chardon Rubber, which has a permit to store up to 550 gallons, or 10 55-gallon drums of industrial solvents.

#### LAKE COUNTY

The Diamond Shamrock T. R. Evans Research Center, 7528 Auburn Road in Concord Township, has a storage permit only. Public Relations Director Frank Hawkinson said the company stores the waste in various sized containers and then ships them to the Ashtabula facility and from there out of state.

The research facility can store up to 16,500 gallons of waste in containers. It stores approximately 360 different chemi-

cals.

A former Diamond Shamrock plant in Concord Township-the Plastics Divisionhas a treatment permit for 22,800 pounds of a solvent per year. An incinerator was used to burn PVC (polyvinyl chloride). The plant was sold to B. F. Goodrich earlier this year.

The Eastlake Electric Generating Plant, Erie Road, Eastlake handles corrosives, chromium and lead. It treats 1,150,000 gallons per day, and 122,400 gallons in thermal

treatment per day.

The Georgia Pacific Corp., 786 Hardy Road, Painesville Township can store 11,000 gallons per year of solvents and can treat 200,000 gallons a day. It also handles 700 pounds of corrosive waste and 690 pounds of ignitable waste per year.

Lubrizol Corp., 155 Freedom Ave., Paines-ville, stores and treats ignitable and toxic solvents. The company can store 319,000 gallons per year, and 132 cubic yards per year of solids. It can treat 40,000 gallons per

Russell, Burdsall and Ward Corp., 8100 Tyler Blvd., Mentor, Treats 156,000 tons per

year of corrosive waste.

Acco Adhesives Plant, SMC-Glidden Coatings and Resin Division, 30400 Lakeland Blvd., Wickliffe stores 7,100 gallons of mercury, and 23,100 pounds of ignitable solvent wastes.

Uniroyal Inc., Fairport-Nursery Road, Painesville, stores ignitable waste and toluene, a solvent, in the amount of 35,000 gallons per year.

Ohio Rubber, 3911 Ben Hur Ave., Willoughby, can store solvents, asbestos, ignitables and toluene, up to 85,000 gallons.

Lubrizol Corp., Lakeland Blvd., Wickliffe, stores or treats solvents, ignitable, corrosive, or reactive materials, and metals like lead, chromium and selenium.

### SOVIET ATROCITY IN **AFGHANISTAN**

(Mr. PETRI asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. PETRI. Mr. Speaker, December 27 will mark the third anniversary of the Soviet invasion of Afghanistan. I noticed a UPI story on Afghanistan in a local newspaper yesterday, and I want to share it with you.

Mr. Speaker, last September 13, in a village 36 miles south of Kabul, Soviet troops apparently poured a flammable liquid into an underground irrigation channel and burned to death 105 Afghan civilians hiding inside. Eleven children were among those killed in

the flaming massacre.

To trap the hiding civilians, the Soviets first adjusted a small dam to make the channel's water rise. Then they poured in a flammable liquid, probably gasoline or kerosene, and ignited it. Everyone in the underground irrigation channel was burned to death.

For some reason, we have not been hearing a lot about Afghanistan recently. I think it is time for more people to speak up, to express moral outrage, and to demand that the Soviets get out of Afghanistan.

[From the Washington Times, Dec. 15, 1982]

SOVIET ATROCITY REPORTED IN AFGHANISTAN

New Delhi.—Soviet troops poured inflammable fluid into an underground irrigation channel and burned to death 105 Afghan civilians hiding inside, diplomats said yesterday.

Eleven children were among those killed in the flaming massacre Sept. 13 in Padkhwab-e-Shana village in Logar province, 36 miles south of the Afghan capital of Kabul, the diplomats said.

The diplomats based their report on an investigation by an American, Michael Barry, who made a clandestine journey to the vil-

lage to investigate the incident.

The Soviet-controlled official Afghan news agency, Bakhtar, said, "The incident was fabricated by Western media and never occurred in Logar or any other region" of Afghanistan.

Barry led a three-member team from a Paris-based organization called Bureau International Afghanistan to the village from Nov. 26 to Dec. 4.

Barry said 105 Afghan civilians—mostly migrant workers and refugees—hid in the underground irrigation channel because

they were afraid of the approaching Soviet and Afghan troops.

To trap the hiding Afghans, the Soviets first adjusted a small dam to make the channel's water rise. The Soviets then poured in an inflammable liquid "probably petrol (gasoline) of kerosene, which would float on the water's surface" and ignited it, the diplomat said.

"Everyone in the underground irrigation channel was burned to death," Barry re-

ported.

Sixty-one of the 105 victims were "still recognizable because their faces were partly protected from the flames by the soft mud they pressed themselves into to escape the flames," a diplomat said.

Barry, who speaks the Dari language of Western Afghanistan, claimed "he had interviewed eyewitnesses, been inside the underground irrigation channel, taken photos and brought back samples of the thick, sooty deposit now lying in the irrigation channel," a diplomat said.

In Islamabad, capital of Pakistan, which borders Afghanistan, diplomatic sources said the regime in Kabul was considering drafting students to beef up the country's

depleted army.

It was not immediately known why the Soviets burned the trapped civilians, but it was believed the victims were suspected of being sympathizers of the Moslem rebels fighting the Moscow-backed communist regime.

The sources said desertions and casualties had reduced the strength of the Afghan army from 80,000 at the time of the Marxist revolution in 1978 to nearly 30,000.

# FURTHER MESSAGE FROM THE SENATE

A further message from the Senate, by Mr. Sparrow, one of its clerks, anounced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 7019) entitled "An act making appropriations for the Department of Transportation and related agencies for the fiscal year ending September 30, 1983, and for other purposes."

The message also announced that the Senate agrees to the amendments of the House to the amendments of the Senate numbered 2, 6, 11, 15, 17, 43, 45, 46, 47, 53, 56, 59, 66, 72, 93, 96, 97, 98, and 101 to the above-entitled

bill.

The message also announced that the Senate had passed a joint resolution of the following title, in which the concurrence of the House is requested:

S.J. Res. 271. Joint resolution to make technical corrections on certain banking and related statutes.

#### ON THE NATURE OF TAX-EX-EMPTIONS, SUBSIDIES AND TAXATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. DORNAN) is recognized for 60 minutes.

Mr. DORNAN of California, Mr. Speaker, during the course of the debate on the floor 2 weeks ago regarding the issue of tax-exempt status for the private and religious schools of this Nation, I was amazed to hear some of my colleagues repeatedly refer to tax exemptions as being the equivalent of Federal subsidies or Federal financial assistance. This simply is not the case. Furthermore, it is one of the most dangerous assumptions regarding the nature of taxation that we keep hearing from our liberal colleagues. Implicit in such an assumption is that nontaxation of certain organizations which fall under the 501(c)(3) category of the Internal Revenue Code is somehow an abnormal condition and that the Government has the right and the duty to tax everything that lives and moves and has being. Anything that escapes taxation, according to this logic, is therefore conceived to be enjoying some kind of special privilege or immunity at the expense of the rest of society.

The practical justification for exempting charitable organizations from Federal taxation is a recognition of the fact that they are nonprofit, non-wealth producing entities. As Prof.

Boris Bittker of the Yale Law School points out, when Congress first wrote the modern income tax statutes, the Revenue Act of 1894 and the Revenue Act of 1913, only net income was to be taxed, thus excluding all nonprofit organizations which have no net income. Professor Bittker goes on to point out:

The exemption of nonprofit organizations from Federal income taxation is neither a special privilege nor a hidden subsidy. Rather, it reflects the application of established principles of income taxation to organizations which, unlike the typical business corporation, do not seek profit.—("The exemption of Nonprofit organizations from Federal Income taxation," 85 Yale Law Journal, at 299, (1976).

Mr. Speaker, it is of utmost importance to stress the operational distinctions between a tax exemption and a subsidy. Please, my colleagues, heed this. These are the facts.

First. In a tax exemption, no money changes hands between Government

and the organization;

Second. A tax exemption, in and of itself, does not provide 1 cent to an organization; without contributions from its supporters, it has nothing to spend. Government cannot create or sustain—by tax exemptions—any organization which does not attract contributions on its own merits;

Third. The amount of a subsidy is determined by a legislature or an administrator; there is no amount involved in a tax exemption because it is open ended; the organization's income is dependent solely on the generosity of its several contributors, each of whom freely and individually determine how much he or she will give;

Fourth. Consequently, there is no periodic legislative or administrative struggle to obtain, renew, maintain, or increase the amount as would be the case with a subsidy; the energies of the organization are not expended in applying for, defending, reporting, qualifying, undergoing audits and evaluations, et cetera, and the resources of Government are not expended in administering them;

Fifth. A subsidy is not voluntary in the same sense that tax-exempt contributions are. When the legislature taxes the citizenry and appropriates a portion of the revenues as a subsidy to an organization, the individual citizen has nothing determinative to say as to the amount of the subsidy or the selection of the recipient; and

Sixth. A tax exemption does not convert the organization into an agency of State action, whereas a subsidy—in

certain circumstances-may.

The Supreme Court underscored the distinction between a tax-exempt status and a subsidy in its celebrated case of Walz v. Tax Commission of the City of New York (1970) in which it said:

Tax-exemptions and general subsidies, however, are qualitatively different subsidy involves the direct transfer of public moneys to the subsidized enterprise and uses resources exacted from taxpayers as a whole. An exemption, on the other hand, involves no such transfer. It assists the exempted enterprise only passively, by relieving a privately funded venture of the burden of paying taxes. In other words, in the case of direct subsidy, the state forcibly diverts the income of both believers and nonbelievers to churches, while in the case of an exemption, the state merely refrains from diverting to its own uses income independently generated by the churches through voluntary contributions.

I might add that the assumption that tax exemptions, Federal subsidies and Federal assistance are synonymous is troublesome for another reason. Recently, tax-exempt status has been granted for organizations sympathetic toward such practices as witchcraft, homosexuality, lesbianism and abortion (see revenue rulings 78-305 and 73-569). Are we, in effect, subsidizing such groups? No person in his right mind would make such an absurd argument.

I repeat: To insist that tax exemptions are the equivalent of subsidies and Federal assistance is one of the most pernicious assumptions of our time. It assumes that the Government owns all the wealth, a thoroughly totalitarian assumption at variance with our entire Anglo-Saxon-Celtic tradition which holds to the proposition that the State is made for man, not man for the State. The hundreds of thousands of voluntary organizations which, as Alexis de Tocqueville observed in his classic 1830's work "Democracy in America," have made this country strong and vigorous, would, under this pernicious doctrine, be considered subsidized by the Government. No longer would such organizations provide a buffer between government and the individual and the family and provide the basis for resisting an oppressive and tyrannical government. "The power to tax is the power to destroy," warned Chief Justice John Marshall. Let us once and for all rid ourselves of this fallacious and dangerous way of thinking and instead recognize the tremendous contributions that our tax-exempt organizations are making toward the welfare of our Nation.

Mr. Speaker, at this time I would like to insert into the Record an excellent editorial by my good friend and superb political analyst Bruce Herschensohn on how some of our leaders in Congress believe that the Government owns all the wealth and that the people are the servants of Government rather than the Government rather than the Government being the servants of the people. Some Members should commit Mr. Herschensohn's observations to memory.

(KABC-TV News: Political Analyst, Nov. 8,

BRUCE HERSCHENSOHN COMMENTARY

Congressional arguments about how the economy of the Nation should be handled have been so frequent during the past couple years with the same old points being raised so often, that at times it's hardly worth listening to. But, yesterday, something was said that I've never heard before and I believe it to be one of the most dan-gerous statements yet made by a politician regarding the economy of the United States: so dangerous that I would hope it would be corrected rather than allowing it to become a part of the national dialogue. It was said House Majority Leader Jim Wright, as he explained why he wants to eliminate the next tax-rate reduction of 10 percent scheduled for next July. Why he doesn't want the tax-rate reduction to go through. He said this, get this, that the tax-rate reduction "is robbing the Treasury of 96 billion dollars this year."

That sentence can't be allowed to just pass by as a new defense for taxation. That sentence shows what's going on inside his head, and perhaps the heads of others in regard to their thinking about taxation. A tax-cut will rob the Treasury of 96 billion dollars? Do we now cast those who work for a living as the robber and the government as the innocent victim? Who did the earning and who does the taking? Have we turned around our thinking 180 degrees to believe that unless the wage-earners of the United States pay the exorbitant taxes that they are paying today that they are thieves, rob-bing Washington? How much do wage-earners need to pay before they can be considered honest by politicians? Should we hand it all over? The truth is that people who earn money, earn money, earn it.

Each week, however, there is a demand to give a good deal of that earned pay-check to Washington. It's not a request. It's demand, with penalties and punishments if the money isn't handed over. Handed over, in fact, in most cases, before the worker is even allowed to see it. But because of a taxrate reduction, voted upon in 1981, you'll owe a little less. A very little less this July. Because of that are we now to believe that we have become the robbers and we have stolen from the one who has taken the money, and we discover, wants to continue to take the same amount, and in fact even more? The House majority leader, Jim Wright, has revealed his thinking and I believe, the thinking of some others in the Congress, and if it doesn't warn us, it should. Because by saying that we're robbing the Treasury, he's saying that we're the servants of Government rather than Government being the servants of the people.

# TRIBUTE TO THE HONORABLE MARGARET HECKLER

The SPEAKER pro tempore. Under a previous order to the House, the gentleman from Massachusetts (Mr. Conte) is recognized for 60 minutes.

Mr. CONTE. Mr. Speaker, I am privileged and honored today to have been able to request this special order for my good friend and fellow Republican from Massachusetts, Margaret Heckler.

Peggy came to the Congress after working as a practicing attorney in

Boston, Mass. She has been the first women ever elected to the Governor's Council in the Commonwealth of Massachusetts, the first accomplishment in a countless list.

In 1966, she won a seat in the House of Representatives representing Massachusetts 10th Congressional District. This earned her the distinction of being the second woman ever elected to this body from the Commonwealth, She handily won reelecton seven times.

Throughout her years here she championed the causes most important to her State and, ultimately, to the Nation, She was particularly concerned with banking and commerce, small business, transportation, and, most importantly to our State, the development of the high-technology industry. In fact, her accomplishments include writing the Small Business Advocacy Act, the Geriatric Research Act, and the Equal Credit for Women Act. Additionally, she has focused on energy and environmental legislation—especially in the fields of synthetic fuels.

In terms of the high-technology industry-which I want to discuss because of its tremendous importance to the strength of our Nation's economy-PEG has helped our State tremendously, Massachusetts is highly dependant on these firms-located from Holyoke to Cape Cod-which provide our State with growth and economic expansion and jobs for our people. When the President first proposed the Economic Recovery Tax Act which passed last year, PEG, fought to insure that the high-technology industry would be affected favorably by the legislation. All of the high-technology firms in Massachusetts appreciated her hard work and assistance.

In a much larger context, PEG's concerns have affected the Nation as a whole. She has championed the cause of the equal rights amendment, and her work in the congresswomen's caucus tells of her concern for women's issues generally. But she fought hardest for the equal rights amendment, and, more importantly, equal rights for all. No one-no onecan deny the important leadership role Mrs. HECKLER played during the long and difficult journey traveled by the ERA. PEG was there from the beginning-fighting for this amendment every step of the way. Advocates and sympathizers with the ERA-if they thank anyone-should recognize the enormous efforts of Mrs. Heckler. I was proud and honored to be able to help with this struggle.

In fact, PEG worked her hardest to insure that the equal rights amendment would be a part of the Republican Party platform. In 1980, she was not successful, as we know, but all of us who support equal rights for all

Americans were thrilled at her hard work for the amendment.

Throughout her 16 years of service in the House of Representatives, Mar-GARET HECKLER was a true leader. She was a Member of Congress who fought hard and vocally for the people of her district and for the interests of those who had no other voice in Congress. PEGGY really kept the campaign promise made to her constituents-she promised to be a "heckler" in Congress. For example: She fought for consumers when the sugar industry interests invaded the Hill. She fought for veterans and veterans' rights from her seat on the Veterans' Affairs Committee, and all those who served this Nation appreciate the help that she gave to their causes. Those causes became her own.

In addition to the national role played by Mrs. Heckler as the ranking woman in Congress, Peggy was genuinely concerned about the welfare of her district. As difficult as it was to represent the 10th Massachusetts Congressional District, it was represented by Peggy well. From Wellsley to Taunton to Fall River, she listened and brought her constituents' views, concerns, and problems to Washington. But she was not only a messenger; Peggy earned her reputation as a fighter when the interests of her district and her constituents were at stake.

When the textile manufacturers in Fall River were threatened, she was there

When an elderly lady in Taunton was harassed by bureaucrats, she was there

When a veteran in Natcik was denied his rightful benefits, Peggy Heckler was there to remind the officials who they were paid to serve—the people.

The record of Mrs. MARGARET HECK-LER speakes for itself. She concerned herself with issues that we must all concern ourselves with. She represented her people—but she never lost sight of her higher cause, for she represented her Nation, and she did both well. I can tell you that I will miss those attributes.

As the years go by, all of us will have the opportunity to look back with pleasure and pride at having served with Peg. I can tell you personally that I—the last bastion of Republican strength in Massachusetts—will miss her help to that extent. But more than that, Mr. Speaker, and in a much larger sense, I will miss her dedication, her warmth, and her friendship.

I know that I speak for all of my colleagues on both sides of the aisle when I wish her, her husband John, and her three children Allison, Belinda, and John, Jr., the best of luck, health, and happiness in the days and years to come—now and forever more.

Peg, we are going to miss you. Thank you, Mr. Speaker. • Mr. O'NEILL. Mr. Speaker. I am pleased to have this opportunity to honor my colleague from Massachusetts, Peg Heckler. She has a distinguished record in the Congress and in the service of her State and country.

She has made a special contribution to the Nation's veterans, particularly Vietnam veterans. She has been a consistent champion of their cause over the last 10 years.

In addition, she has been in the forefront of the women's rights movement during her terms in Congress. She was instrumental in gaining passage of the equal rights amendment in 1972 and just as instrumental in getting it extended by Congress in 1978.

When the equal rights amendment is finally ratified, and I am certain it will be, PEG HECKLER'S early work will be a major reason for its ratification.

Peggy has had an impressive career in public service since 1958. She has served in local office, State office and in the Congress. She has always represented her constituents with great energy and admirable independence.

For the eight terms she served in Congress, she worked closely with me and her other colleagues from Massachusetts on behalf or her State. Despite the fact that she was not a member of my party, we are close friends. I respect her talent and acknowledge her achievements. I will miss working with her. But I know she will be available to serve her country in the future because she is able and talented, young and energetic, and most of all, a real patriot.

• Mr. EARLY. Mr. Speaker, I am very glad to join in this well-merited tribute to my dear friend and esteemed colleague from my own State of Massachusetts, Congresswoman Margaret Heckler.

Throughout her 16 years of service here her exceptional initiative and achievements in furthering our national progress and for the benefit of the people in her own district have rightfully earned her the wide acclaim in which she is held as a national legislator.

Her personal concern and compassion in helping constituents with individual and family problems connected with Federal agencies is a legend in her home area. Her special interest and leadership in the promotion of equal opportunity and treatment for women in all walks of American life is universally acknowledged and applauded.

Mr. Speaker, Margaret Heckler enjoys the highest regard of all Members on both sides of the aisle as a person of absolute integrity and patriotism. All of us know her to be a most effective Member of Congress, a very eloquent and persuasive advocate and an unusually formidable but fair adversary.

She brought superior research and competence into our discussions in this Chamber and, equally important, she brought beauty, grace, and dignity into all her activities here.

Margaret Heckler is, by profession, an attorney of vast knowledge, great skills and extraordinary experience. Without doubt she will be eminently successful in whatever field of work she decides to engage in outside of this legislature. She will leave behind an example of dedicated public service to her constituency and her country that will be a continuing inspiration for all of us. I earnestly hope she will frequently renew her friendships with us and that good health and good fortune will follow her in all her future endeavors.

• Mr. MAVROULES. Mr. Speaker, when the House adjourns this week, a good friend, and a diligent and conscientious member of this body will be leaving us after gracing this Chamber for 16 years.

I am, of course, referring to the gentlelady from Massachusetts, Mrs. Heckler

It is thus with great pleasure that I rise and associate myself with the remarks of her other many friends here this evening.

For 16 years, for eight terms, the gentlelady has been more than equal to the task of being a Member of Congress. A scrapper and a strong believer that none of us should ever turn a deaf ear to our constituents, she has demonstrated, through example, just what it means to be a Member of this august body. Time after time again, she has reminded us of our principal responsibilities to our districts and to the half million men, women, and children who each of us represents. As a member of her own State delegation, I know how hard the gentlelady has worked on behalf of her constituents not only under this dome but at home, as well.

And, although we are members of different parties, I can also speak to her unflagging willingness to work together with the other members of the Massachusetts delegation for the betterment of our home State. Democrats and Republicans, to be sure, all of us are. But first we are public servants serving a public trust for the common good. The gentlelady's exemplary conduct in office has never failed to remind me of that.

As she embarks down a different road, I am sure that all here tonight hold the very best and fondest wishes for the gentlelady of Massachusetts.

May all your future endeavors be as rewarding and fruitful as your years in Congress have been.

 Mr. MONTGOMERY. Mr. Speaker, I want to add my name to the list of colleagues paying tribute to the distinguished gentlelady from Massachusetts, the Honorable Margaret Heck-Ler.

She and I came to Congress at the same time in 1967, and I have a great amount of respect for the job she has done as a Member of this Chamber. MARGARET has been a very articulate speaker, who always had a clear understanding of the issues.

We have worked closely together in the Veterans' Affairs Committee and I can say that she has always been a most diligent and informed member of the committee. Her contributions on behalf of this Nation's veterans have been outstanding.

In addition, she has been active on the Science and Technology Committee, as well as the Joint Economic Committee. She can be most proud of her accomplishments as a Member of the House of Representatives.

We will miss her input and experience on the Veterans' Affairs Committee, where she served on the Hospitals and Health Care Subcommittee and the Education, Training and Employment Subcommittee. I know many of my colleagues will agree that she has been a positive force for progress in this Congress.

♠ Mr. MOORHEAD. Mr. Speaker, I would like to thank the gentlewoman from Colorado and the gentleman from Massachusetts calling this special order. Surely, it is most fitting that we take 60 minutes to say goodby to a lovely and capable Member of the House. Margaret Heckler.

After an effective and distinguished career in the House of 16 years, paying tribute to the most senior woman in the Congress is surely warranted. During her tenure here, she has given to all of us. Her educational background, her expertise regarding our system, her grace and charm, her loyalty and integrity have contributed a great deal to every aspect of our political process.

MARGARET will be missed by all of

Mr. GILMAN. Mr. Speaker, I thank my colleague, the gentleman from Massachusetts (Mr. Conte), for giving us the opportunity to honor Margaret Heckler this evening. To her much honor is due. It will be hard to imagine this Chamber without her keen wit and hard working spirit. Personally, I am losing a friend and coworker that I admire deeply and whose counsel I valued in getting to the heart of a controversial issue.

No issue was so small that it did not demand absolute study and thorough understanding by MARGARET before she took a stand on it. She thoroughly studied legislation and carefully consulted with her constituency to determine what was best for them and for our Nation. I respected her decisions because I knew she had done her homework and that her integrity and commitment to the people of her dis-

trict and our Nation governed all of her actions.

Since 1960, Congresswoman Heckler has worked tirelessly for the veterans of our Nation. Regardless of what public opinion may have been, from the beginning she has led the fight to assure that our Vietnam veterans receive the benefits and the respect to which they are entitled. In my work on the missing in action, I have constantly run into families expressing deepest admiration for this great lady. Our veterans have lost a true friend and a woman of action on the Veterans' Affairs Committee. In times of budget cuts, she has waged battles on behalf of those programs that so contribute to enhancing the quality of life of our veterans.

MARGARET, we wish you and your family good health and joy in the future, which I am certain will be a continuation of your fight for the people of Massachusetts and the rest of our Nation. These halls will not be the same for any of us without your informed voice and your courageous actions. Thank you for the inspiration of your example of placing duty above privilege and service above seniority. Onward, MARGARET. May your fighting spirit toward the goal of a better life for all Americans stay with us and hold you in good stead as you forge ahead in further service to our Nation.

• Mr. MAZZOLI. Mr. Speaker, my friend and colleague MARGARET M. HECKLER will be leaving the House after many years of service. I have worked with Peg over the years especially on pro-life issues and have always found her to be a pleasant and dedicated person. She has made many fine contributions to the House and to her district, and I wish Peg the very best. Her presence will certainly be missed here in the House

missed here in the House.

Mr. MOAKLEY. Mr. Speaker, I commend the gentleman from Massachusetts (Mr. Conte) for providing this House with an opportunity to pay tribute to our distinguished colleague, the gentlewoman from Massachusetts (Mrs. Heckler).

PEGGY has always been one of the Commonwealth's hardest working legislators. With her departure at the end of this Congress, she will be greatly missed by all her friends in the Massachusetts delegation.

Her first elective office was the Governor's Council, which she entered in 1962 and left for her successful election to Congress in 1966. During her eight distinguished terms in Congress, Progressed developed a well-earned reputation as an effective advocate for the causes in which she believes; as a tenacious fighter for the interests of the people she represents; and as a tireless campaigner for her party.

campaigner for her party.

Throughout her career in Congress, she has held a seat on the Committee

on Veterans' Affairs. There she has been one of the best friends of veterans and has worked tirelessly for their concerns and needs. She has been a leader in the movement to recognize the special needs of Vietnam era veterans.

PEGGY has served on a number of other committees during her long service here and presently is a member of the Committee on Science and Technology, the Joint Economic Committee, and the Select Committee on Aging. She has served effectively on these committees and on the House floor to advance the causes she considers important.

Serving with her has been a great honor and I extend my best wishes to Peggy.

• Mr. RINALDO. Mr. Speaker, with the close of the second session of the 97th Congress, Congresswoman Mar-GARET "PEGGY" HECKLER'S service as a Member of the House will end. What will not cease, however, is the lasting effect of her dedication and able service to the residents of Massachusetts' 10th District.

During her 16 years of service, she has brought to the deliberations of the House a strong sense of personal conviction, integrity, and high moral character. In establishing an outstanding record of public service, Peggy has contributed creatively and constructively to legislation advancing the welfare of the Nation.

She has been a tireless, dedicated, and independent legislator, and her love of her district, State, and country has had a positive influence on all who have known and worked with her. She has won the respect of her colleagues on both sides of the aisle and others familiar with her legislative accomplishments.

A prime mover in support of the high-technology industry, she took the initiative in getting President Reagan to expand his 25 percent research and development tax credits to include more than wages for the high-technology industry, and to add other similarbeneficial industry-related provisions to the 1981 tax package. It would be fair to say that PEGGY's 16 years of congressional service have been characterized by broad guaged activity, with specialization in the fields of banking and commerce, international trade, small business, high technology, and transportation.

She will also be remembered by her colleagues as the founder and steering committee member of the Textile Caucus and the Travel and Tourism Caucus, and as the founder of the Congresswomen's Caucus, which she has cochaired since 1976.

Her record reflects one success after another. After earning her law degree from Boston College Law School, she was a practicing attorney in Boston. She later became the first woman elected to the Governor's Council in the Commonwealth, and in 1966 she was elected to the House, therby becoming the second woman Member of Congress in the history of Massachusetts. Her able and effective representation gained her the lasting respect of her constituents who returned her to Congress in the next seven elections. A remarkable achievement for a Republican in a heavily Democratic, labor-oriented district.

During her tenure in Washington she gained the distinction of being the ranking woman Member in the Congress and the 24th ranking Member of the House.

Now, on the eve of her departure, I join my colleagues in bidding my good friend farewell and Godspeed. In politics she found scope for unfettered expression of prodigious talent to serve her fellow citizens, and I want to express my gratitude for the noble service she rendered to her constituents and the country. It has been a great privilege to have served with her. I wish Peggy much success, happiness and the best of everything in the years ahead.

 Mrs. HOLT. Mr. Speaker, I believe all of us feel a sense of loss because the gentlewoman from Massachusetts, MARGARET (PEG) HECKLER, will be leaving us at the end of this session.

We enjoyed the high spirits of this energetic woman, her quick mind, and her competence as a legislator. The people of our Nation and her congressional district have been well served by Congresswoman Heckler, and she was an asset to this House. She was my inspiration to run for Congress and I am sure all Members of the House join me in best wishes for her success in whatever endeavors she pursues in the years ahead.

• Mr. FUQUA. Mr. Speaker, our esteemed colleague Margaret Heckler will be concluding her career in the House of Representatives when the 97th Congress ends and it is fitting that we should take note of the marvelous job she has performed for her constituents and her country.

First elected to the 90th Congress in 1960, Peggy Heckler has been returned to Congress in every subsequent election until this year when she failed to carry the vote in a redrawn district.

I know Peggy best as a member of the Committee on Science and Technology where she distinguished herself as the ranking minority member of the Subcommittee on Science, Research and Technology.

She has been a firm advocate of a strong Federal program of research, development, and demonstration to keep America in the forefront of the highly competitive high-technology marketplace.

While accumulating more tenure in the House than any other female Member, Peggy Heckler used that seniority to sharpen her knowledge of the subjects in which she specialized and to hone the legislative skills which translated that knowledge into law.

She has been an effective and dedicated Member of this House of Representatives and her sound, thoughtful contributions to our deliberations will be sorely missed when she departs.

• Mr. CARMAN. Mr. Speaker, it is an honor for me to rise today and pay tribute to Margaret Heckler on the occasion of her retirement from the House of Representatives. Peg has distinguished herself in Congress since she was first elected in 1970. In her 16 years of service she has been an effective advocate for the interests of her constituents and for the country as a whole. She has served on both the Science and Technology and the Veterans' Affairs Committees in this Congress and has many special legislative accomplishments.

As the woman who has the longest tenure of any woman in Congress she will be especially missed. She should be proud of her role in passing the Equal Credit Act and also of her efforts on behalf of small business in establishing the Office of Advocacy. It was a pleasure to serve in the Congress with her and I wish her all the best in the days ahead.

• Mr. SHUMWAY, Mr. Speaker, I would like to express appreciation to SIL CONTE and PAT SCHROEDER for requesting this special order, enabling us to say farewell to Margaret M. Heckler, and to pay tribute to the outstanding performance she has delivered as a legislator, and as an accurate representative of her constituents' needs. For 16 years, she has selflessly served the people of Massachusetts and the Nation, and has been a credit to our membership.

I know that we will all miss her able contributions when she has returned to private life, and I extend every best wish for continued fulfillment and reward to her as she prepares to leave the House of Representatives.

• Ms. OAKAR. Mr. Speaker, I would like to take this opportunity to pay tribute to an outstanding Member of Congress, the Honorable Margaret M.

I have had the pleasure of serving with Representative Heckler on the Congressional Caucus for Women's Issues, a group that Margaret helped found and cochair. Her dedication to women is exemplified by her strong support for ERA, the Women's Economic Equity Act, and Women in Science. In addition, Congresswoman Heckler pioneered the Equal Credit Opportunity Act, an important piece of legislation which increased financial independence for women.

Through her perseverance in the areas of high-technology industry, energy, and her support for issues of grave concern to people, Congresswoman Heckler has gained the respect of her colleagues since her swearing in to Congress in 1966.

Mr. Speaker, the constituents of Massachusetts and the Members of this Congress will be losing a fine politician and legislator. Peg, I wish you all the best. Thank you.

• Mr. SENSENBRENNER. Mr. Speaker, I would like to join with my colleagues in recognizing the commitment with which Representative Margaret Heckler has engaged this Congress for more than 15 years.

Since first taking office in 1966, MARGARET HECKLER has proven to be a strong advocate and tough legislator when taking up an issue. During her tenure in Congress, she has been an articulate spokeswoman for the rights of women on a multitude of issues. From the ERA to equal treatment when applying for loans, mortgages, or credits, MARGARET HECKLER has worked to assure fair treatment under the law.

As the second ranking Republican on the House Veterans' Affairs Committee, she has had a great impact on the programs designed to serve the Vietnam veterans. She also proved to be an able voice in the Agriculture Committee in curbing the minimum price supports for sugar.

Her persistent drive on such issues has provided the kind of representation that make this Congress work. To borrow from an old slogan we truly needed "a Heckler in Congress." From your distinguished service and through the future, I wish you the best of life.

• Mr. BOLAND. Mr. Speaker, I am pleased to join in this tribute to a distinguished Member of the Massachusetts congressional delegation, Margaret Heckler.

I have had an opportunity to work with Peggy Heckler frequently, during the 16 years she has been in Congress, on issues of concern to the people of Massachusetts. As dean of the Massachusetts delegation, I want my colleagues in the House to know how valuable the people of the Commonwealth consider her service in this body to have been. She has been a tireless and effective advocate for the interests of her fellow New Englanders.

Peggy arrived in the House with a well-deserved reputation for political independence, and with the distinction of having been the first woman ever elected to the Governor's Council in Massachusetts. In Washington, she quickly became a respected voice for the rights of women, and the interests of consumers and veterans. She waged a difficult, but successful struggle for the passage by Congress of the equal

rights amendment, and for the extension of the ratification deadline on the amendment when that became necessary. While these are clearly issues of paramount concern to women, it was Peggy's belief, and she successfully convinced her colleagues that she was correct, that these issues were, first and foremost, matters of simple justice.

Mr. Speaker, it is always difficult to say goodby to a colleague, and the task is especially hard when that colleague is a member of your State's delegation. I know, however, that PEGGY will continue to be active, both in Massachusetts and around the country, on those issues in which she deeply believes. The House will miss her, but I want to wish her every success as she turns her considerable talents toward new challenges.

• Mr. ANNUNZIO. Mr. Speaker, I rise today to pay tribute to the Honorable MARGARET M. HECKLER, who has ably represented the people of the 10th District of Massachusetts in the U.S. House of Representatives for the last 16 years. Peg's tireless efforts in the advancement of woman's rights, and her activities on behalf of her constituents and on behalf of all citizens of this Nation are most commendable.

PEG HECKLER has compiled an outstanding record of achievement as ranking minority member of the Subcommittee on Science, Research, and Technology of the House Science and Technology Committee, and as ranking minority member of the Subcommittee on Education, Training, and Employment of the House Veteran's Affairs Committee. She also has served with diligence and distinction as a member of the Joint Economic Committee.

PEG is a woman of the highest integrity, and a legislator of outstanding ability, who has provided exemplary service to her constituents. She will be missed by those of us in the House of Representatives who have had the pleasure of knowing and working with her.

I extend to Peg Heckler my best wishes for continued success in devotion to the highest principles.

• Mr. LENT. Mr. Speaker, I would like to take this opportunity to pay tribute to my friend and esteemed colleague, Peggy Heckler, who, unfortunately, will be leaving the Congress at the end of this session. Those of us on both sides of the aisle who have been privileged to know Peggy recognize that her contributions to this body have been of measurable significance to the district she has so capably represented, to her State of Massachusetts, and to our great Nation.

PEGGY was the first woman elected to the Governor's Council in the Commonwealth of Massachusetts, when in 1966 she won a seat in the House from Massachusetts 10th Congressional District. She thereby became the second woman Member of Congress in Massachusetts history.

Peggy's 16 years of diligent congressional service have been characterized by a wide range of activities which have benefited the good citizens of the 10th Congressional District. Her outstanding work in the fields of banking and commerce, international trade, small business, high technology, and transportation issues have earned her a reputation as an effective and capable legislator, respected by Republicans and Democrats alike. As a strong supporter of small business throughout her career, Peggy wrote the Small Business Advocacy Act and numerous other bills to help the small businessman. Peggy's legislative leadership contributed greatly to the passage of the Equal Credit Act for Women, a major step for women's rights in this country. She founded the Congresswoman's Caucus and has served effectively as cochairperson since 1976.

Mr. Speaker, these are only a few of Peggy's numerous accomplishments during her 16 years in the Congress. Her outstanding record speaks for itself. We are indeed losing a fine and effective Member of Congress in Peggy Heckler. It has been my privilege to work with Peggy on many legislative projects during my 12 years in Congress. I hope that she continues to apply her many talents to endeavors she chooses to pursue in the years to come. Peggy, I speak not only for me but for my colleagues when I say that we will miss you in January.

♠ Mr. McKINNEY. Mr. Speaker, Congresswoman Margaret M. Heckler reminds me of the nursery rhyme from my youth about the little girl with the big curl right in the middle of her forehead. When she was good, she was very, very good. But when she was bad, she was horrid.

I quickly realized when I first came to Congress that it is always more comfortable having Peggy Heckler working on my side of an issue. There is no Member of the House of Representatives more skilled at turning out the public for a legislative battle, no one more tenacious in seeing that the battle is fought to its fullest. Happily, we are usually working for the same causes. From my view, she is very, very

Peggy Heckler has been a crusader during the 16 years in Congress, a crusader for the people. She has been a friend of women seeking equal rights, a friend of frequently forgotten or ignored Vietnam veterans, a friend of children whose mothers need to work, a friend of consumers demanding fair prices at the grocery store. I am proud to have worked with her on those crusades. I am proud to say I am her friend. I am one among many who will miss a very good friend and a very

great lady when Congress convenes next year.

• Mr. WALGREN. Mr. Speaker, I want to join the other Members of Congress in speaking today in honor of Congresswoman Margaret Heck-Ler. The gentlewoman from Massachusetts has served with great distinction on the Science, Research, and Technology Subcommittee. As chairman of that subcommittee during the 97th Congress, I cannot speak highly enough about her dedication, fairness, and insight into the issues facing the committee.

Her leadership on a broad range of issues facing high-technology industry is especially significant. Recognizing that technological change accounted for almost one-half of all growth in the American economy over the last 100 years and that high-technology industries will comprise close to 50 percent of our GNP by the end of the decade, Mrs. Heckler has strongly championed high-technology issues from a position of strength and respect within the Congress.

On the issues before our subcommittee, Mrs. Heckler as made a wise distinction between those areas where the Federal Government can support the private sector and those—like regulation and overtaxation—where she feels the Government should just plain step out of the way.

She is a leading supporter of reforming antitrust regulations to allow joint R&D efforts of tax credits to stimulate research, of patent policy reform, of Federal measures to encourage the special innovative capacities of small science- and technology-based firms, and of renewed national attention to the quality of science, math, and engineering education.

In a recent interview with the National Association of Manufacturers' Magazine Enterprise, Mrs. Heckler described herself as being "primarily concerned with the application of science and technology to the Nation's productive resources in order to improve the economy." She said she would like "an environment that encourages the natural forces of innovation and productivity embodied in our free market system." She sees the clear need for balancing intelligent fiscal policy with the social needs of an increasingly complex and rapidly changing American society.

I know Margaret worked hard on those in the Reagan administration during the development of the Economic Recovery Tax Act. As a result of the President's favorable response to her requests the 25 percent tax credit was broadened to include R&D expenditures, and section 861-8 of the Internal Revenue Code, which previously sent valuable high-tech jobs overseas, was suspended.

Recognizing that much more still needs to be accomplished, Mrs. Heckler supports a broad legislative agenda of keen interest to high-technology industries. Perhaps of greatest importance is the Joint Research Act (H.R. 6262) which would grant limited antitrust protection from criminal and civil prosecution for companies entering into joint R&D consortia approved by the Department of Justice or the FTC.

Margaret is a cosponsor on four bills (H.R. 1539, H.R. 2473, H.R. 6023, H.R. 6024) which provide various tax credits for research and experimental costs, amending section 861-8 of the IRC in order to include all domestic R&D in tax incentives—regardless of foreign production applications.

Mrs. Heckler was a key supporter of the Small Business Innovation Development Act, H.R. 4326, which would increase small business participation in Federal R&D. She has also sponsored legislation (H.R. 5294) intended to provide additional assistance to small business concerns in acquiring procurement information and contracts from the Government. Last, she has cosponsored H.R. 4215, to provide long-term capital gains treatment for distribution of earnings with respect to certain small business participating debentures, and H.R. 6575 which would permit the pooling of smallissue development bonds to preserve a means of access to capital for small business.

#### SCIENCE EDUCATION

Congresswoman Heckler was one of the first Members of Congress to recognize the crisis in science education in America. In addresses before meetings sponsored by such prestigious organizations as the National Academy of Sciences and the American Association for the Advancement of Science, she has elaborated on appropriate Federal Responses to a growing national problem.

Her bill, the National Science and Technology Improvement Act (H.R. 6930) has been introduced in the Senate by Senator Harrison Schmitt and has already been favorably discussed by President Reagan's Cabinet Council on Human Resources. Don Fuqua, the chairman of the Science and Technology Committee, has included her bill in committee legislation dealing with the issue.

Through inservice training, the bill seeks to improve the qualifications of secondary science and math teachers, and provides research grants to encourage college science, engineering, and math faculty to stay on the job. Moreover, it authorizes Federal agencies with large R&D budgets to support university research efforts in conjunction with the private sector through grants for equipment, facilities, fellowships, scholarships, or other means. She has also cosponsored the

precollege teacher assistance bill (H.R. 6775) that would provide low-interest loans to college students who pursue math or science degrees and who intend to enter the precollege math and science teaching professions. In addition, she has promoted a variety of tax credit measures (H.R. 1864, H.R. 5573, H.R. 6774) that would: First, credit business for amounts contributed to a research and experimentation reserve to be used by institutions of higher learning; second, encourage contributions of computers and other sophisticated technical equipment to elementary and secondary schools; and third, credit employers for compensation paid to employees who are practicing precollege math or science teachers. She is also an original cosponsor on my bill, the National High Technology Technician Training Act (H.R. 6950) which would utilize community colleges in the training of students for jobs as technicians and technical paraprofessionals in the electronic industries.

As you can see, Mrs. Heckler has been a major leader in high-technolgy issues vital to the continued prosperity of Massachusetts and the national economy. Her seniority and respect in the Congress have combined with her masterful grasp of issues to single her out as a special asset worthy of our support.

Let me conclude, Mr. Speaker, by thanking the Congresswoman from Massachusetts for her leadership and cooperation on the subcommittee. I sincerely say that I could not have had a better informed or dedicated ranking minority member. You will be missed.

Sometimes I think only another Member of Congress can fully appreciate balance of personal qualities that sometimes continue to make an individual excel as a representative in a legislative body. As a lawyer with a certain passionable energy to change circumstances for the better, and as a personable woman with the wisdom and maturation that comes from raising an exceptional family, Margaret Heckler excelled in the Congress of the United States. Our society is better off because of her quality.

• Mr. SAM B. HALL, JR. Mr. Speaker, MARGARET HECKLER has enjoyed a distinguished career in the House, and I think her place in history is secure. She is an able, effective legislator, and I have enjoyed our service together.

Our Vietnam veterans have had a tremendous friend in Peg Heckler. She has championed their cause on the Veterans' Affairs Committee, and it has certainly been a privilege for me to serve with her on the committee. Her committee work like all of the legislative activities she has been involved in demonstrate a great love of people. She is known as a humanitarian of the first order.

All over America more and more women are taking an active role in politics. An inspiration to young women who aspire to political office is Peg Heckler. Her success in the political arena is well-established, and she has paved the way for increased political activity by American women. She has dared to challenge the establishment from her earliest days in politics and has succeeded even with the odds often against her.

I appreciate the forthrightness of Peg Heckler. While our views may not always coincide, she is ever the lady and has demonstrated the greatest courtesy, charm, and respect toward me.

While redistricting put PEG HECKLER at a disadvantage this past election, I have the confidence and assurance that she will continue to be active in public service. She has fought the good fight. She has provided leadership and inspiration to people throughout the Nation, and we all owe her a debt of gratitude. I look forward to hearing more from her in the years ahead.

• Mr. WINN. Mr. Speaker, 16 years ago, Margaret Heckler and I came to the 90th Congress together, along with 57 other freshman Members. Since then, she has represented the 10 District of Massachussetts with devotion and distinction. I had the pleasure to serve with Margaret on the Science and Technology and was always impressed with her tenacity, knowledge, and preparation. She also served admirably on the Veterans' Affairs Committee and the Joint Economic Committee.

Margaret has been a strong voice for women and their participation in the American political process since she entered Congress in 1966. Margaret combined her concern for women's issues with a belief in fiscal conservatism. She never believed government should take a meat-ax approach to cutting the size of public programs and she was a strong believer in lifting the burdensome load of taxes off the people. She never flinched in her belief that the United States should be at parity with the Soviet Union in strategic armaments.

I respect MARGARET HECKLER immensely. I wish her the best of luck in future endeavors. She will be missed on Capitol Hill.

#### GENERAL LEAVE

Mr. CONTE. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the subject of my special order tonight.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

#### A TRIBUTE TO CONGRESSMAN JIM MATTOX

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. Frost) is recognized for 60 minutes.

• Mr. FROST. Mr. Speaker, I rise today today to accord special recognition to our friend and colleague, Jim Mattox of Texas, who is leaving Congress after 6 years of distinguished service. Jim, however, is not leaving public service but within a matter of weeks will be sworn in as attorney general of the State of Texas, having won the Democratic primary against a strong field of contenders and then having defeated his Republican opponent this November.

JIM MATTOX is truly an extraordinary public servant. His career as an elected official began 10 years ago when he was elected to the Texas State Legislature from his home district in east Dallas. He served there for 2 years and then was elected to Congress in 1976 from a district in Dallas. While a Member of this body, JIM has served on the Banking Committee and on the Budget Committee. He chaired the defense task force of the Budget Committee and has served on the executive board of the Democratic Study Group. He also served a term as chairman of the Texas congressional delegation.

Mr. Speaker, Jim Mattox has approached every task with the same vigor and resourcefulness. He is a fighter for the people—especially for the little people of the Fifth District of Texas. He is an advocate of the blacks, the browns, and of the working people that make up his constituency. Jim is true to principle, he stands up for what he believes is right and he shows no quarter for his opponents, particularly when they threaten to deny the rights of the people he represents.

I have known JIM MATTOX personally during his entire career in elective office and have admired his capacity for hard work, his brilliance, and his ability to cut through the rhetoric and get down to brass tacks. To some, JIM may appear to have a somewhat rough exterior, but our State of Texas and our Nation would surely be better off if there were more like him in public office.

I am sad to see him leave this body but I most assuredly look forward to working with him in his new role as attorney general.

• Mr. HIGHTOWER. Mr. Speaker, I want to take this opportunity to say a few words about a colleague of ours here in the House and a member of my own State delegation—Jim Mattox. Jim will not be rejoining us in the 98th Congress, but will be returning instead to Austin, Tex., to take up a new life there.

JIM MATTOX has always approached his legislative work with the kind of spirit and dedication that his constituents can be proud of. For the three terms that he has represented the Fifth District of Texas, he has met the needs of his urban constituency very well. We in the Texas delegation have appreciated his tenacity in the pursuit of his responsibilities; he has been a strong and active member of the delegation, and his contribution will be missed.

Even though Jim will be leaving the particular service of his constituents in the Dallas area, he is not leaving public life. Instead, he is going on to serve the people of the entire State of Texas in his new capacity as attorney general. We in Texas look forward to great things from Jim as he approaches the new challenges of his job in his own unique and special manner.

• Mr. BROOKS. Mr. Speaker, my good friend and colleague, JIM MATTOX, will be leaving Congress at the end of this session and we will miss him deeply. As dean of the Texas delegation, I can tell you that Congressman MATTOX has been an important member of our legislative team. During the 6 years that he has served with us we have grown to admire his skill and dedication as an effective spokesman for his Dallas constituency.

I have had the good fortune of working closely with Congressman Mattox on a great many issues of importance to the State of Texas and have observed the outstanding representation he has given to his district and his country. The people of Dallas' Fifth Congressional District could not have had a stronger advocate and he will leave an admirable record of public service in the House.

He has always had the ability to present arguments on complex issues in a clear and reasoned manner, and those of us who will return to the 98th Congress will miss his contributions to our legislative debates.

While the Texas delegation will miss his hard work and dedication, and the Congress will miss his contribution to the legislative process, I can assure you that the people of Texas have gained an outstanding new State attorney general who will represent them with the same skill and dedication that we have observed here on the floor of the U.S. House of Representatives.

• Mr. LOEFFLER. Mr. Speaker, as we bid farewell today to Jim Mattox, those of us who have the privilege of representing the State of Texas in this House know that we are not saying goodby—but only "auf Wiederschen," for while our paths will not cross quite so often, we shall all have the pleasure of keeping in touch with Jim as he assumes his new responsibilities as our State's attorney general.

We shall miss our daily contact with you, Jim, but we are pleased that our friendship will endure as we visit with you in Austin and work together on matters of mutual interest and concern. We salute you for your past service and wish you much success and happiness in your new endeavors.

• Mr. DE LA GARZA. Mr. Speaker, paraphrasing the old cliche, "The Nation's loss is Texas' gain," JIM MATTOX is going back home to be the attorney general of Texas.

In the last election Jim stood right at the top of the sweep that put Democrats in all the top Texas offices.

Since his election to the 95th Congress he has served with verve and excellence on the Committee on the Budget and the Committee on Banking, Finance and Urban Affairs.

Back in 1967 Jim came to Washington as a congressional intern in the office of the late Congressman Earl Cabell of Dallas. When he came Jim set his sights on someday representing his area.

Being a man who makes a career of getting what he goes after he came up here to make his mark and to go back home to serve his State in a sensitive area.

We wish him well.

• Mr. SAM B. HALL, JR. Mr. Speaker, I commend the gentleman for taking this special order to honor my good friend and fellow Texan, JIM MATTOX. As we know, JIM will be leaving the House to assume the position of attorney general of the State of Texas.

Jim will make an outstanding attorney general. He scored impressive victories in the Texas Democratic primary and the general election with a broad coalition of support. He has a tremendous legal mind and brings solid experience to this all-important State position. All of his friends here in the House are justifiably proud of him.

As we know, JIM MATTOX is an active, independent legislator who takes a back seat to no one. He is strong in his views and manifests great courage in expounding his philosophy of government. On occasion we have disagreed, but we have disagreed as friends and gentlemen.

JIM has a well-rounded background in budgetary matters. He has given exemplary service on the Budget Committee and the Banking and Currency Committee. This experience will be invaluable to the people of Texas in his role as attorney general.

As members of the Texas delegation can attest, JIM MATTOX has been an important participant in legislative activities affecting our State. We are going to miss his counsel at our delegation meetings. On items of concern to my own congressional district, JIM

MATTOX has always been willing to help out.

JIM MATTOX has made a positive impact on the House. He has a bright political future, and I am looking forward to our continued association as he represents the people of Texas as their attorney general.

## ANALYSIS OF HOUSE RULES CHANGES PROPOSED BY THE DEMOCRATIC CAUCUS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Mississippi (Mr. Lott) is recognized for 30 minutes.

Mr. LOTT. Mr. Speaker, I have taken this special order to discuss in greater detail the proposed House rules changes for the 98th Congress adopted by the Democratic Caucus on December 7 and 8 behind closed doors. I regret that much of this debate must be conducted in the pages of the RECORD, but the fact is, when these changes are presented to the House on January 3, 1983, the House will have only 1 hour to debate these far-reaching proposals, and no opportunity to amend or vote separately on the eight rules changes unless the minority, by some miracle, manages to defeat the previous question.

Perhaps the most glaring paradox of this whole exercise is the fact that on the one hand the caucus would make it impossible for a simple House majority to force the consideration of amendments to the Constitution, while on the other hand it has managed to violate the spirit if not the letter of the Constitution in several respects.

In the first place, the very procedure for considering these rules at the beginning of a Congress violates the constitutional provision of article I, section 5, clause 2, that "each House may determine the rules of its proceedings." The fact is that the rules are actually determined by a majority of the Democratic Caucus in secret session, and the caucus is then admonished by informal instructions to support the entire package on opening day by unit rule or risk future discipline.

This presents the bizarre prospect that on the opening day of a new Congress, rules may be adopted which do not have the actual support of a majority of the House. This is possible because in the case of controversial and closely contested rules in the caucus, minority caucus opposition combined with the unified opposition of the minority party to a rule may actually comprise a majority of the House membership. Moreover, the minority party may have additional rules changes not considered by the Democratic Caucus which could, if put to a vote, garner majority House support. But, since the caucus is bound to support its own rules and oppose the minority party's even offering its rules, it is clear that the House is not permitted to determine the rules of its proceedings as required by the Constitution.

It may come as a shock to many Members that this is not how it has always been done. There was a time when the House complied with its consitiutional mandate to determine its own rules rather than swallow whole a caucus-imposed rules package. According to George Galloway, in his "History of the House of Representatives":

The customary practice in post bellum days, when a new House met, was to proceed under general parliamentary law, often for several days, with unlimited debate, until a satisfactory revision of former rules had been effected.

This practice continued even after the 1880 general rules revision. To again quote from Galloway on this period:

On three of these occasions 2 months or more elapsed before the amended code was finally adopted, in striking contrast to the celerity with which the old rules have been rushed through in recent times.

It is especially ironic that our body of rules, which are ostensibly designed both to facilitate majority rule and protect minority rights, are not even subject to amendment by the minority. It is little wonder that these rules have increasingly eroded minority protection in the House in favor of majority tyranny over the years.

Mr. Speaker, let me now turn to the specific rules changes proposed by the Democratic Caucus and the ways in which they subvert certain constitutional protections and requirements.

#### THE NO-QUORUM CONGRESS

Mr. Speaker, article I, section 5, clause 1 of the Constitution provides that,

A majority of each House shall constitute a quorum to do business.

This seems like a fairly self-evident and necessary requirement: A majority of the people's Representatives should be present to consider the people's business. But, the concept of what constitutes business was drastically altered by House rules adopted at the beginning of the 95th Congress. Under those rules changes, the determination of a quorum is left to the Speaker in the House and the Chairman of the Committee of the Whole unless a pending motion or proposition is put to a vote. Put another way, the only business conducted by the House for constitutional quorum purposes is voting. Everything else, including debate in the House, general debate in the Committee of the Whole, and debate on amendments, is nonbusiness. It may come as a shock to our constituents that consideration of some of the most vital matters affecting them is not really considered important enough to require the presence of a majority of their Representatives. It is just nonbusiness as usual for the no-quorum Congress.

Now, to add insult to constitutional injury, the Democratic Caucus has proposed two additional House rules to make it possible for the House to operate for a good part of the legislative day without a constitutionally quired majority quorum. First, the caucus would make it possible for the Speaker to postpone a vote on the Journal until later in the legislative day. The approval of the Journal is the second "order of business" of the House each day after the prayer under rule XXIV. Since the rules have already left it to the discretion of the Speaker to entertain a point of order that a quorum is not present at the beginning of a day, a vote has frequently been called for on approving the Journal by the minority to accomplish the same purpose—establishing that a quorum is indeed present on that day. The caucus would now preclude that opportunity.

Second, the caucus has proposed a rule that once a resolution from the Rules Committee has been adopted providing for the consideration of a bill in the Committee of the Whole, the Speaker may declare that the House is in the Committee of the Whole, eliminating the possibility of a vote on resolving into the Committee of the Whole as may now be ordered under the rules. At first blush, this may seem a reasonable change, but only if the vote on going into the Committee of the Whole comes immediately after the adoption of the Rules Committee resolution on that bill. Unfortunately, the proposed rules change is not confined to such situations. It may well be that the House has adopted one or more Rules Committee resolutions on a bill or bills on a previous day. Under the new rule, following the prayer and a nonvote on the Journal, the Speaker could declare that the House is now in the Committee of the Whole for consideration of a bill that had not even been scheduled for that day—a not implausible prospect given the rapidity with which the program is changed around here. In such a situation, the majority may well be prepared to move forward on that unscheduled bill, but the minority could be left completely unalerted and unprepared. Debate on the bill could go as far as the beginning of consideration of amendments under the 5minute rule before a quorum call could be forced-and even then the Chair could make that a notice or short quorum, meaning the call would be terminated as soon as 100 members, a majority in the Committee of the Whole, had registered their presence. In other words, it is possible that the full House might not be called to the floor until the first vote on an amend-

The point is that the vote on resolving into the Committee of the Whole is a very important question of consideration: Does the House want to proceed to consider this particular bill at this particular time? It may well be, even though the House has previously agreed to a resolution providing for the consideration of that bill, that it may not want to resume consideration of it at a later date. Members having important amendments may be absent intervening circumstances have made consideration politically or practically inadvisable. full The House, and not the Speaker unilaterally, should retain the right to decide whether a bill should be considered. Not only is the abuse of minority rights possible under the proposed procedure, but the will of the majority might be thwarted as well.

#### APPROPRIATIONS RIDERS

Mr. Speaker, article I, section 8, clause 7 of the Constitution provides that "no money shall be drawn from the treasury but in consequence of appropriations made by law." There can be no question that the congressional power of the purse is one of the most important it possesses under our form of government. This is as it was intended by the Framers. In Federalist Paper No. 58, Madison had this to say:

This power over the purse may, in fact, be regarded as the most complete and effectual weapon with which any constitution can arm the immediate representatives of the people, for obtaining a redress of every grievance, and for carrying into effect every just and salutary measure.

And yet, Mr. Speaker, the Democratic Caucus has proposed a House rule that would severely cripple the congressional power of the purse by making it more difficult to offer socalled limitation amendments to appropriations bills which prohibit the expenditure of money, in whole or in part, for specific activities. Under the terms of the proposal, while the Appropriations Committee could still report such limitations, they could not be offered as amendments on the floor unless the House votes down a motion that the Committee rise after all other amendments have been disposed of. If the initial motion is voted down, it could be renewed again after the vote on each limitation amendment.

The argument raised in defense of restricting such limitation amendments is that they deal with subjects more appropriate for consideration in authorization bills. This argument ignores the fact that many matters are not subject to periodic reauthorization and therefore are not subject to such control. Moreover, even those which are subject to periodic reauthorization are increasingly never enacted into law. One need only witness the current fiscal year and all the waivers necessary on appropriations bills for unauthorized agencies and programs.

More and more agencies and programs are continued only through the appropriations process and not in connection with enacted authorizations as intended. In a study conducted by Dr. Louis Fisher of the Congressional Research Service of matters requiring annual authorizations in fiscal year 1982, it is revealed that 13 of the 24 annual authorizations were never enacted into law. To quote Dr. Fisher,

A remarkable fact is that few of the annual authorizations were ever enacted into law. This may appear to be an ineffective and fruitless process, but the act of marking up an authorizing bill and reporting it for floor action meets many of the needs of substantive committees and agencies.

As real control is being lost through a diminished authorization process, it makes little sense to make it more difficult to assert that control through the appropriations process.

What is the need for the new restriction on appropriations amendments? Is it that the House is being overwhelmed by rollcall votes? No. To date in this Congress there have been roughly 780 rollcall votes, nearly a 40-percent drop from the 1,276 votes in the 96th Congress, and a 50-percent drop from the 1,540 votes in the 95th Congress.

The only justification and explanation given in the Democratic Caucus rationale for this rule change is that such riders have included "such matters as abortion, school prayer, and busing." While that is true in part, it ignores the fact that such riders have been effectively used by Members of all political and ideological persuasions. According to a 1978 Democratic study group report, during the Nixon-Ford years, Democrats offered nearly 60 percent of the limitation amendments, whereas, during the Kennedy-Johnson years, Republicans offered nearly 80 percent of the limitation amendments. During the first year of the Carter administration, Democrats still offered about 50 percent of the limitation amendments. Not only have they been used by conservatives to force votes on their issues, but they have been used by liberals on such matters as terminating funding for U.S. combat operations in Southeast Asia, terminating the SST transport and the B-1 bomber.

The Patterson Select Committee on Committees in the 96th Congress studied various proposals to limit appropriations riders, and one of its task forces concluded in its report to the select committee that.

Limitation or retrenchment amendments have often been the only way legislators could bring major issues to the floor.

It went on to quote then Budget Chairman Robert Giaimo as saying that the House—

Should carefully preserve and protect this great right that we have today, which is to write limitations on appropriation bills.

The task force concluded:

Perhaps because present rules and practices serve the interests of different Members at different times, the House has yet to formally change House Rule XXI and ban or restrict appropriation riders.

One final note on this proposal: The only certain effect it will have will be to increase the number of recorded votes in the House. These will occur with increasing frequency on special rules for appropriations bills as Members try to waive the new rule against certain amendments, and on various motions that the Committee of the Whole rise after considering each such rider. In short, the proposal will only further frustrate and prolong the present workings of the appropriations process, as imperfect as it may now be.

#### CONSTITUTIONAL AMENDMENTS

Mr. Speaker, article V of the Constitution provides that two-thirds of both Houses may propose amendments to the Constitution which shall become effective when ratified by three-fourths of the State legislatures. Such an amendment may now be considered by the House once it has been reported by the Judiciary Committee or has been discharged from committee on the signature of a majority of House Members, and a House majority subsequently votes to discharge the committee from further consideration of the amendment.

The present discharge procedure, found in House rule XXVII, clause 4, applies to the discharge of bills and constitutional amendments alike, as well as to resolutions referred to the Rules Committee providing for their consideration.

The Democratic Caucus has proposed an amendment to this rule which would require the signature of two-thirds of the House membership to call up a discharge motion on a constitutional amendment or a special rule providing for its consideration. A simple House majority would then be necessary to effectively discharge the committee.

The present discharge rule dates back to 1931, and replaced a 1910 rule providing for a motion to instruct a committee to report a bill or resolution. The concept is based on the simple democratic notion that a majority of the House should always be able to work its will, even over the objections and resistance of the committee of jurisdiction.

The Democratic Caucus proposal undermines that democratic concept by requiring a supermajority of the House to even call up a discharge motion for the consideration of a constitutional amendment. Put another way, a minority of the people's Representatives may block a House majority from even considering an amendment to the Constitution.

What has prompted this proposed change? Have all manner of constitutional amendments been forced to the floor in recent years by the discharge procedure? The answer is "no." In the last Congress one such discharge move was successful on a constitutional busing amendment, but it failed the requisite two-thirds vote for passage. In this Congress the requisite 218 signatures was gained on a constitutional amendment to require a balanced budget, but the amendment was never officially discharged by the House since the issue was brought to the floor by a special rule in the interim.

According to a Congressional Research Service study, "discharge petitions have rarely been successful." Since their first use in 1910, only 25 bills have been discharged from committee by this procedure, including only three constitutional amendments: An ERA amendment in 1970, a school prayer amendment in 1971, and the busing amendment in 1979. In this Congress, while 24 discharge petitions have been filed, including 7 relating to constitutional amendments, only the balanced budget constitutional amendment received the requisite 218 signa-

The statistics would seem to indicate that the Democratic Caucus proposal requiring two-thirds signature on a constitutional amendment discharge petition is a case of constitutional overkill.

#### REMOVAL FROM COMMITTEES

Finally, Mr. Speaker, the Democratic Caucus has proposed a House rule to permit the automatic removal of a Member from a committee once that Member ceases to be a member of his or her party caucus. Under the proposed rule, the removal of the Member from committee would automatically occur on notification of the Speaker by the caucus chairman that the Member is no longer a member of the caucus. The Speaker would then notify the chairman of the standing committee that the Member's election to that committee is vacated.

This rule seems to overlook the reason we now have election of Members to committees by the House. The former power of the Speaker to appoint and remove Members from comittees was stripped in 1910 because of the arbitrary way in which this power was wielded. Under present rules it is understood that, since Members are elected to committees by the House, they may only be removed by vote of the House.

Granted, Members are nominated to committees by their respective party caucuses, and House election is simply a pro forma ratification of that decision. Likewise, the House would probably respect the decision of a caucus to remove a Member from the committee if that Member has voluntarily left the caucus or has been expelled. Nev-

ertheless, action by the House is an important safeguard against arbitrary removal. Caucus rules may or may not specify conditions under which a Member may be expelled, and those conditions may or may not be reasonable. But the proposed House rule does not spell out those conditions, leaving room in the future for caucuses to expel Members for unreasonable reasons. Moreover, the rule does not even provide that the Member must have left the caucus voluntarily or by action of the caucus. It simply states that all that is required to remove a Member from committee is for the caucus chairman to notify the Speaker that the Member is no longer a caucus member and for the Speaker to then notify the appropriate committee chairman that the Member is no longer a committee member. There is no requirement that the House even be notified of the caucus and committee membership stripping. Presumably, under this rule, a caucus chairman could simply declare that a Member is no longer a caucus member. without explanation, and the Speaker would be required to declare that Member's committee seats vacant. In short, there is nothing in this rule to prevent a caucus chairman from unilaterally expelling a Member from the caucus and thereby strip him of his committee seat. If this does not pose the prospect of "King Caucus" once again rearing his ugly head, I wonder what does.

#### CONCLUSION

Mr. Speaker, the five rules changes proposed by the Democratic Caucus which I have cited are indeed a return to the days of "King Caucus" and all the excesses associated with that period. They continue to move us in the direction of conducting the people's business without a majority of the people's representatives actually being present. They make it more difficult for a House majority to even consider such important matters as controlling Government activities through the appropriations process and amending the Constitution. And they open the door to the old "King Caucus" and "Czar Speaker" tricks of jerking Members off committees for arbitrary reasons. Taken together they demonstrate a cynical rejection of the democratic notion that a majority of this House is capable of governing itself or the Nation.

#### COMPUTER CRIME

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida (Mr. NELSON) is recognized for 5 minutes.

Mr. NELSON. Mr. Speaker, I would like to call to the House's attention an article which appeared in my hometown newspaper on December 5, 1982. The article relates the story of a man who has allegedly stolen \$100,000 worth of trade secrets from the memory banks of his former company's computer. This incident is of particular interest to me as I have introduced a bill, H.R. 3970-the Federal Computer Systems Protection Act, which will make computer-assisted crime a specific Federal offense. The Subcommittee on Civil and Constitutional Rights, which is currently considering this legislation, held hearings on September 23, 1982, to examine the potential legal problems inherent in the use of computers; the potential for abuse; the existing mechanisms to prevent abuse; the adequacy of these mechanisms; and the need for additional solutions. One of the major concerns expressed during the hearings was the lack of concrete data regarding the extent of computer-assisted crime. I turn your attention to this newspaper article, which I would like to enclose at this point in the RECORD, as evidence of this growing problem.

#### EXEC CHARGED WITH THEFT OF COMPUTER TRADE SECRETS

SAN JOSE, CALIF.-Investigators searching for stolen trade secrets made an unprecedented "raid" on a computer's memory banks and accused an executive of stealing confidential design information.

Paul Magnuson, 39, co-founder of a once highly promising but now troubled computer company, was charged Thursday with conspiracy, trade-secrets theft, bribery, possession of stolen property and soliciting another to steal trade secrets.

He allegedly transferred \$100,000 worth of trade secrets from his old company, Magnuson Computer Systems Inc., to Prodigy, an electronics company he founded last summer-four months after leaving Magnu-

#### WILSON RILES

The SPEAKER pro tempore. Under previous order of the House, the gentleman from California (Mr. EDWARDS) is recognized for 5 minutes.

 Mr. EDWARDS of California. Mr. Speaker, I rise to salute a great American who has devoted his life to democracy, and especially the future of democracy through the education of our

I speak of Wilson Riles, who will soon step down after 12 years as State superintendent of public instruction in California. The accomplishments of this man are known to many across this Nation. The first black statewide elected official in California history, Wilson Riles has been a nationally recognized leader in education for more than a decade. It is less well known that the true story of Wilson Riles' life makes Horatio Alger appear to be an underachiever.

Wilson Riles was born in 1917 in Elizabeth, La. In those days the streets were dust and the houses were crude three-room structures of unpainted wood. There was one store, a movie house, and a bar that, until Prohibition, served the town population

of 2,000.

Young Riles' father worked sunup to sunset in a turpentine camp and could scarcely afford to provide his family with material comfort. Still, Riles' memories of his childhood are fond memories. Even today, Riles speaks of the love and feeling of belonging which were his only family inheritance when he was orphaned at the age of 11.

The young Riles was taken in by friends of the family. He attended Elizabeth Colored Elementary School, where the principal, F. Paul Augustine, believed that education was the salvation for black people in America. His tiny school produced many teachers, a New York doctor, a playwright, an Arizona State senator and a California State school superintendent.

There was no high school in Elizabeth, so the extended black family at the African Methodist Episcopal Church, where his mother had been a tireless volunteer, raised \$40 for Wilson to buy a suit and a bus ticket

to New Orleans.

In New Orleans, Riles attended a black high school and lived with an elderly man in a one-room shack between an alley and train tracks—a shack with no paint, plumbing, or address. Riles found a job delivering milk, for \$2.50 per week plus a quart of milk.

After high school, Riles moved with his foster family to Flagstaff, Ariz., where he became the only black student at Arizona State Teachers College, now Northern Arizona State University. He earned his way by taking food trays to sick students in the dorms, and by working at other jobs with a small stipend from the New Deal's National Youth Administration.

After graduation, Wilson Riles served his country in the Army Air Corps and, following the war, returned to Northern Arizona State to complete

a masters degree in education.

Riles' first teaching job was in a oneroom black school in Pistol Creek, Ariz., with 12 students who had run off the previous three teachers. He was firm about discipline, insistent that they learn the value of education. Several in turn became teachers and one a lieutenant colonel in the Air Force.

After Pistol Creek, Riles became principal of a three-teacher school in McNary, Ariz. From that first administrative job, Riles embarked on a career through the ranks that earned him deep respect and a strong following in the educational community. In the midsixties he was appointed to take charge of the then, and still, largest compensatory education program in the Nation. His talents attracted the attention of President Johnson who appointed him to the President's Task

Force on Urban Education. This was just one of scores of honors which have been accorded Wilson Riles in the last two decades.

In 1970, at the urging of friends and educators, he ran for the California superintendency and won against all predictions and seemingly impossible odds. Now completing his third term in this, the only nonpartisan statewide office in California, riles worked successfully with both Ronald Reagan and Jerry Brown, whose gubernatorial terms spanned his own tenure.

From one room schoolhouse to superintendent of the largest school system in the United States, Riles never failed to improve, reform, and lead his colleagues in pursuit of excellence in education. In schools of education, in universities around the Nation, would-be-teachers take courses in "early childhood education," "compensatory education" and "mainstreaming" for handicapped. Each of these concepts began in the fertile mind of Wilson Riles and was brought into reality by his considerable skills of politics and adminsistration.

Wilson Riles has accomplished a great deal as he has led California's massive school system of 7,500 schools and 4 million students. Last year, he was elected by his peers to be president of all chief State school officers. This man has been awarded no less than nine honorary doctorates and received numerous prestigious awards of

recognition.

Moving as it is, the story of Wilson Riles' life is really no more inspiring than the man himself. Congenial and charismatic, Riles never falls to win an audience, though his favorite public gathering remains a classroom of children. One student once asked the 6-foot 4-inch Riles just how tall he was. Wilson Riles' answer summarized his approach to his work. He said, "let's just say I'm tall enough to see a future for all of the children."

UPDATE ON THE PRESIDENT'S COMMISSION ON FOREIGN LANGUAGE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. PANETTA)

is recognized for 5 minutes.

• Mr. PANETTA. Mr. Speaker, as a former member of the President's Commission on Foreign Language and International Studies, it has been my custom to periodically update my colleagues on the status of this issue and on the progress that is being made toward implementation of the Commission's recommendations. As the 97th Congress draws to its close, I would like to take this opportunity to once again outline the developments in the field of international education since the issuance of the Commission's final report, in the hope that the 98th

Congress will place an even stronger emphasis on the need to educate our citizens in the languages and customs of other nations.

First of all, I would like to briefly summarize some of the major recommendations contained in the Commission's report, which was issued in November of 1979. Among other measures the Commission advocated:

The establishment of foreign language and international studies, high schools, summer institutes, and regional centers.

Incentive grants to schools and colleges based on their foreign language enrollment.

Funding for national centers for advanced research and training in foreign language and international studies.

Measures to improve the skills of foreign language instructors.

Coordinated efforts at the State level to explore, develop, and implement international studies programs for elementary and secondary students.

Appointment of foreign language specialists in all State departments of education.

Development of foreign language proficiency tests.

Reinstitution of language requirements for college admission and graduation, and requirement of two or three courses in international studies for the granting of a bachelor's degree.

Obviously, many of the Commission's suggestions require action at other levels of government, by State and local education authorities, and in the private sector, and I can assure my colleagues that progress is being made on these fronts. For example, Mr. Speaker, I would like to draw attention to the Monterey County international studies program, which began operation this past September. Under this program, students from five area high schools are participating in adanced language and culture courses in three languages at four different sites. I believe the Monterey international studies program is an excellent example of the kind of innovative programing which is essential if international education is to receive the emphasis it deserves.

Other developments have included the recent appointment of a foreign language consultant in the California Department of Education; creation of the National Council on Foreign Language and International Studies, a privately funded group, to follow up on the work of the Commission; formation of an informal international education group here in the Congress; and designation of the week of March 1, 1981, as "National Foreign Language Week."

However, I would like to focus today on the legislative efforts which have succeeded the issuance of the Commission's report, and on the current funding situation at the Federal level. I am glad to report that legislative action in the field of foreign language and international studies over the past several years has included passage of the following measures:

A 1979 amendment-Panetta-which resulted in a GAO report concluding that more competence in foreign languages was needed among U.S. person-

nel overseas.

An amendment-Simon-to the bill that created the Department of Education, making foreign language and international studies one of the new department's seven priority concerns.

A 1980 amendment-Simon/Panetta-to the Foreign Services Act requiring the establishment of at least two foreign language competence posts at American diplomatic missions abroad.

A 1980 amendment—Panetta—to the International Security and Develop-ment Cooperation Act, directing the Peace Corps to develop a plan to better utilize the special talents and knowledge of returned Peace Corps volunteers in international education.

A provision-Simon-in the 1980 reauthorization of the National Institute of Education-the research arm of the Education Department-making encouragement of the study of languages and cultures one of NIE's research

projects. House Concurrent Resolution 301-Simon-expressing the sense of the Congress that local education agencies and institutions of higher education should consider strengthening the study of foreign languages and cultures.

An amendment-Simon-to the authorizing legislation for the Department of Defense, directing the Department to study the feasibility of requiring proficiency in at least one foreign language for all cadets and midshipmen at U.S. Military Academies.

This impressive list of achievements is supplemented by a long list of legislative initiatives which are still pending in the 97th Congress. This list includes, but is by no means limited to:

H.R. 5738-Panetta-which would improve the translation and interpretation services available to the Department of State and other Government agencies by creating a Bureau of Language Services at the State Department.

H.R. 3231-Simon-which would provide grants to States to establish model foreign language programs at the elementary and secondary level, and grants to postsecondary institu-tions based on their enrollment in foreign language courses.

House Concurrent Resolution 243-Panetta-which expresses the sense of the Congress that the educational and

cultural programs at the International Communication Agency should be strengthened.

H.R. 4389-Gonzalez-which would establish a National Commission for the Utilization and Expansion of Language Resources.

H.R. 5588-Conable-which would increase the tax deduction for maintaining an exchange student in the

taxpayer's household.

H.R. 7211-Hamilton-which would establish a Soviet-bloc Research and Training Fund to promote advanced research and training in the field of Soviet and East European studies, including reciprocal programs with the U.S.S.R. and Soviet-bloc nations.

As you will see from this list, Mr. Speaker, interest in the field of international studies is bipartisan and wideranging. The fact that funding for international education and exchange programs has continued to fare well in the last 2 years-a period as you know of increasingly strict budget limitations-is further evidence of congressional support. To briefly summarize:

The Educational and Cultural Affairs Division of the U.S. International Communication Agency is responsible for the tremendously successful and popular Fulbright program, as well as other international exchange programs. When a 12 percent across-theboard cut was imposed on Federal agencies in 1981, ICA announced that most of its reduction would come out of ECA programs. The Fulbright program would have been cut by over 50 percent, terminating the program in 6 countries. However, the expression of congressional support which succeeded this announcement has resulted instead in slight increases in funding, to \$100.6 million for ECA programs-including about \$77 million for the Fulbright and other exchange programsin the 1983 appropriations bill recently approved by the House.

The Department of Education administers various international education programs under title VI of the Higher Education Act, including funding for 90 national resource centers; grants and fellowships for foreign language and area studies; grants for undergraduate international education programs; and research grants used primarily for the development of instructional materials. The administration's 1983 budget request allowed \$8.8 million for these programs, a 54 percent reduction from the fiscal year 1982 level of \$19.2 million. However, the appropriations bill for the Department of Education recently approved by the House rejects this recommendation, and contains \$20 million for the

programs in 1983.

The Education Department also administers certain programs under the Fulbright-Hays Act, such as support for doctoral dissertation research fellows, faculty research fellows, and overseas specialists brought to this country to help in the development of foreign language curriculum. The administration's 1983 request included \$1.5 million for these programs, versus \$4.8 million in 1982; the House education appropriations bill contains \$5 million—still a decrease from the fiscal year 1981 level of \$6.2 million.

The administration requested drastic reductions in funding for the National Endowment for the Humanities, which supports foreign language education among many other programs, in both fiscal 1982 and fiscal 1983. However, the appropriations bill for the Department of the Interior recently approved by the House continues NEH funding at the fiscal year 1982 level of \$130.6 million.

Mr. Speaker, I have been gratified by the 97th Congress willingness to provide Federal funds to support foreign langauge and international studies. In view of rapidly improving communications technology, decreasing distances between nations, and delicate international relations which involve almost inconceivably high stakes, it is essential that we develop among our citizens a knowledge and understanding of other nations, languages, and customs. I am hopeful that the incoming Congress will be even more receptive to this need, both in terms of legislative action and in appropriating funds for international education and exchange programs. I look forward to participating in a new and energic effort in this area in the next 2 years, and welcome the support and help of my colleagues.

### SOUTH KOREAN GOVERNMENT'S RELEASE OF KIM DAE JUNG

The SPEAKER pro tempore. Under a previous order of the House, the gen-Washington tleman from Bonker) is recognized for 5 minutes.

Mr. BONKER. Mr. Speaker, last night the South Korean Embassy called me with great news. Kim Dae Jung, the popular leader, has been transfered to a hospital in Seoul and is due to be released in the next few days. I commend President Chun for taking this action. For more than 2 years I have been calling on the Korean Government to release Mr. Kim.

I was in South Korea in the spring of 1980 during the brief period following President Park's death and before General Chun's ascendency to his current position. I lead a delegation of Members to meet with the various political leaders of the opposition, including Kim Dae Jung, whom we met at his residence. We saw nothing but political tranquility and stability in the country. It seemed like the Koreans were well on their way to adopting a constitution. They had established an election date. There seemed to be an air of freedom and optimism in the country. Shortly after our visit there was a military coup, and Kim Dae Jung and many of the democratic opposition were jailed.

As one who has been critical of the Korean Government's human rights record, I am deeply pleased by Mr. Kim's release. It should serve as a precedent and should be followed by other similar acts until all political pri-

sioners are released.

President Chun has taken a large step to further the unity of South Korea and the reconciliation of the Korean people. It is my hope that he will continue on this course until democracy is restored in South Korea.

### PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from South Carolina (Mr. DER-RICK) is recognized for 5 minutes.

Mr. DERRICK. Mr. Speaker, be cause of official business I was unable to vote on the House floor today, December 16, 1982. Had I been present I would have voted:

S. 1965, Paddy Creek Wilderness,

"yea."

H.R. 7019, Transportation Department appropriations for 1983, "yea." EPA contempt of Congress, "yea."

## ENTITLEMENTS

(Mr. PICKLE asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

• Mr. PICKLE. Mr. Speaker, we all hear a lot about "entitlements" these days, about what a great proportion of the Federal budget is now devoted to paying out benefits under the entitled programs, about how we must "come to grips with entitlements" before we can ever really ease our deficit dilemma. Yet very few of us, even here in Congress, really have a thorough understanding of what these programs represent, why they are in the budget, or what to do about them.

The following article, researched and written for the Atlantic Monthly magazine by James Fallows, is the best thing I have seen on the subject. Mr. Fallows, a former speechwriter for President Jimmy Carter, the author of "National Defense," and the Washington editor of the Atlantic, is a thoughtful, perceptive, and gifted writer. As we prepare to enter a new session of Congress that is likely to be dominated by questions of what to do about military and civilian retirement, medicare, veterans benefits, social security, and the other entitlements, I believe that Mr. Fallows' work could be of great benefit to every Member of Congress.

Mr. Speaker, I insert the article from the November 1982 issue of the Atlantic here in full. I urge all Members to read this thoughtful article.

#### ENTITIEMENTS

(By James Fallows)

Early last spring, Hastings Keith tried to return some money to the federal government. For fourteen years, Keith was a Republican congressman from the Massachusetts district that includes Cape Cod. After leaving the Congress in 1972, he worked for a few months in the Nixon Administration and then went into business. Together with the five years and ten months he had spent in the military before, during, and after World War II, Keith had put in twenty years on the federal payroll; and so, in 1973, at the age of fifty-eight, he was eligible for the early retirement benefits the government provides.

combined congressional/civil-service pension provided him initially with \$1,560 a month, or \$18,720 a year. He also received retirement pay, \$551 a month, for service on active military duty and in the reserves, which he began getting in 1975. And in 1980. when he turned sixty-five, Keith drew a government benefit, his monthly

Social Security check.

Like other federal benefits, Keith's were fully "indexed" against inflation, which meant that they were increased once, and in some cases twice, a year, in step with changes in the Consumer Price Index (CPI). Because of these increases, Keith, whose highest salary as a congressman had been \$42,500, found himself by 1982 taking in nearly \$61,000 a year in federal pensions. His congressional pension had more than doubled since 1973, to \$3,419 a month. His military pension had risen to \$903 a month, and his Social Security payment was \$691 a month. Another round of cost-of-living adjustments made this summer raised Keith's federal pensions yet again, to a total of more than \$65,000.

And that was not the end of federal benefits for the Keith household. Keith's wife had retired from the federal government during a "reduction in force," or RIF, when she was forty-six years old. Since she had put in twenty-five years of federal service, she was, as a victim of a RIF, entitled to a pension, which started at \$550 a month in 1976. By this year, it had nearly doubled, to some \$1,000 a month. All told, then, the Keith family's federal pensions came to more than \$77,000 as of last summer—and all of it was fully indexed to future in-

creases in inflation.

To Hastings Keith, this seemed excessive. He wrote a letter to the secretary of the Treasury, Donald Regan, explaining why he wanted to turn over three checks, totalling \$3,107, each representing a portion of his monthly allotments that he considered unwarranted.

Keith's hope had been to present his checks in a public ceremony, where he would register his complaint about the system that depleted the Treasury to finance windfalls such as his. The government shared little of his enthusiasm for the plan. Instead, he was granted an audience with an assistant secretary of the Treasury, who listened politely to his case, but did nothing.

His rebuff at the Treasury did not stop Hastings Keith, who has been telling his story to congressional committees and devoting his extra money to the effort to change the federal retirement system. But the government's lack of interest in his cause helps explain some of the current agonies over the federal budget and federal deficits.

Although the generosity of congressional pensions makes the sums in this example extreme, they illustrate a basic fact of modern government. Benefits that are indiscriminately awarded, and then ceaselessly increased, add more to the federal budget than do those more familiar evils "cost overrun" and "welfare fraud." Yet politicians of every camp have found it perilous to tackle, or even to acknowledge, this problem.

Since early this year, both friends and foes of the Reagan Administration have understood that the next four years might well produce the largest sustained budget deficits in American history. When the administration released its budget proposals for fiscal year 1983 last spring, it did what no other administration had ever done: for the years ahead it predicted a smooth, robust return to national prosperity, yet it still foresaw budget deficits that would hover in the vicinity of \$100 billion a year.

Last year's reductions in tax rates are part of the reason for the deficits, as are the administration's plans for a sustained military buildup. But while these two policies have been debated to death, neither the administration nor its critics have yet wrestled with the largest single force behind the deficits. Neither liberals nor conservatives have yet devised a confident approach to that portion of federal spending known as "entitle-

ments.

Entitlements, sometimes called "payments to individuals," are technically defined as benefits for which people qualify automatically, by virtue of their age or income or occupation. Social Security is such an entitlement, by far the largest. So are medical programs such as Medicare and Medicaid, civilservice and military pensions, unemployment insurance and price-support payments for farmers, and (with certain technical quibbles over definitions) subsidized housing and food stamps.

From a budgetary point of view, the significance of such programs is that, at least in the short run, their costs cannot be controlled. If the Congress appropriates \$2 billion to build a dam or a highway, it can be confident that no more than \$2 billion may legally be spent. But when it authorizes extended unemployment benefits, or a different reimbursement formula under Medicare. it can set no limit on the money that will ultimately flow from the Treasury, since the government is legally obligated to provide benefits to anyone who can prove that he is

The Reagan Administration took office committed to a fundamental redefinition of federal responsibilities, but it will almost certainly depart having made no dent in entitlements. From less than one third of federal spending in 1970, entitlements rose to represent nearly half (of a much larger total) in 1980. Even if the Reagan Administration should continue to be granted its every wish for more military spending, and even if Congress were to concur in all its proposed cuts in the rest of the budget, entitlements would still make up nearly half of the budget in 1983 and 1984.

The two national parties have virtually raced each other to distance themselves from this dangerous issue. Oldstyle liberals "neo-liberals," the Democrats have attacked almost every other part of the administration's economic plan, without volunteering their ideas about this half of the budget. In its top-to-bottom re-examination of government spending, the administration exempted from Budget Director David Stockman's scrutiny not only the military but also the largest and fastest-growing entitlements.

The "entitlement problem" is often thought of as a "welfare problem." To a trivial extent, it is: most federal programs for the needy, including the classic welfare program, AFDC (Aid to Families with Dependent Children), do fall within the entitlement budget. But they make up a small part of the whole. Only a sixth of all the money spent on entitlements is for programs that are "means-tested," or aimed at the poor, and those programs are the slowest-growing part of the entitlements budget. For example, AFDC, at \$7 billion, costs one-third as much as civil-service pensions, and it shrinks while the pensions grow. Rather than a "welfare problem," the growth of the entitlements is actually a "retirement problem."

October 1 marks the beginning of the government's fiscal year, and in fiscal year 1983, just begun, the federal government will, according to the latest congresional budget resolutions, spend some \$770 billion for all its varied activities. Of that total, \$362 billion will go toward entitlements; of the \$362 billion, \$264 billion will be for retirement programs. In other words, one out of every three dollars the federal government spends this year will be spent on pensions or on medical care for those over the age of sixty-five.

age of sixty-five.

Social Security, of course, heads the list of retirement programs; it will cost about \$170 billion in 1983. Medicare, the medical-care program for people over the age of sixty-five, is second largest, at \$49 billion. Together, these two programs account for more than half of the entitlement budget and more than a quarter of all federal spending. Two other major retirement items are civil-service pensions, \$21.2 billion in 1983, and military retirement pay, \$16.2 billion. By way of comparison, the largest means-tested program, Medicaid (Medicare's counterpart for the needy) is expected to cost \$18.5 billion in 1983, and food stamps will be about

\$12 billion. Retirement programs not only dominate the federal budget, they also represent its largest area of growth. The basic reason for this growth is demographic: over the past generation, more people have been surviving to retirement age, and the birthrate has declined. In 1950, roughly one American out of every forty-three drew benefits from the main Social Security account, known as Old Age and Survivors Insurance. Now about one in seven receives payments (including those who draw from the newer Disability Insurance account). In 1950, every 100 working Americans had to provide, through their Social Security taxes, the support for six retired people. Now each worker's obligation is five times as great (thirty-one retirees per 100 workers). That ratio should remain steady for the next twenty-five years, while the children of the postwar baby boom remain in the workforce. But early in the next century, the ratio should shift again. Fifty years from now, each person in the office or on the assembly line may be responsible not only for his own livelihood but also for half the support of a retired countryman.

The average single man who retired in 1960 received six and half times as much money in benefits as he ever paid in. (These comparisons are adjusted for inflation, and for the interest that the taxpayer could have been earning on his contributions.)

The man who retired in 1970 got back more than three times as much as he contributed, and the man who retired in 1980 should eventually receive two and a quarter times as much money as he paid in. But by the time one of today's teenagers retires, in the year 2030, he will have paid more into the system than he will ever get back.

Moreover, while lifespans were increasing, the retirement age was being lowered. The average man who turned twenty in 1940 could expect to live six months past his sixty-eighth birthday. Since the retirement age was then sixty-five, he could expect to spend three and a half years receiving the retirement benefits toward which he had contributed during his forty-five years of work. In 1956, the Social Security retirement age for women was lowered to sixtytwo: it was lowered for men in 1961. Retiring at sixty-two instead of sixty-five means maximum reduction of 20 percent in Social Security benefits, but most of those eligible choose to take their benefits as soon as possible.

The average man who turned twenty in 1977 could expect to live to the age of seventy-five, or thirteen years past his retirement age. Consider how this young man's expectations would differ from his older counterpart's. The thirteen years he would spend in retirement would be nearly one third as long as his forty-two-year working career. Forty years ago, the average retirement was only one twelfth as long as the average working career.

Demographic trends, powerful as they are, do not fully explain the growth of the retirement programs; political maneuvering deserves much of the credit. The explosion in retirement benefits derives in large part from a reform gone away.

The reform in question was an attempt to take the "politics" out of federal benefits. In 1962, Congress undertook a reform of civil-service pensions. Until that time, Congress had to approve each pension increase, in rituals very much like its regular votes to raise the ceiling on the national debt. Goodgovernment spokesmen argued that this sapped the Congress' energies and debased its deliberations, by enticing congressmen to play politics with pension adjustments. It would be far better, they said, to delegate adjustments to the automatic workings of a formula.

The reformers also recommended an improvement over the military's system of raising pensions whenever active-duty pay went up. In those days when federal salaries were considered to be "low," it was argued that the government might need to increase its pay selectively to attract the right talent; there was no logical reason to pass this on as a windfall to retirees. Pensions should rise only in accordance with the cost of living.

Starting in 1962, therefore, pensions for civil servants were to be adjusted once a year, in proportion to the rise in the CPI. Indeed, starting in 1969, the adjustment was one percent more than the CPI increase. This one percent "kicker" was supposed to make up for the lag between the rise in prices and the annual adjustment in the checks.

The other major step came in 1972, when Congress voted to index Social Security benefit to the CPI (but with no "kicker"). Until than, Social Security benefit levels had also been adjusted by the Congress. Switching to the index plan was, once again, supposed to shield the system from political demagoguery. The logic seemed so compelling that by

the end of the 1970s, 30 percent of all federal spending was directly indexed to the CPI, and another 14 percent was indexed to other measures.

The architects of indexing failed to foresee what would happen next, and understandably so: through most of the fifties and sixties, inflation had averaged less than 2 percent a year. But at just the moment when so large a share of federal spending was being tied to the CPI, the historic American inflation of the 1970s began. As prices increased by 8, 10, 12 percent each year, exactly in pace rose federal payments.

No, not exactly in pace. In fact, the payments rose faster, because of peculiarities in the design of the indexing formulas. The kicker for federal pensions, for one thing, put federal retirees far ahead of the game. until it was removed in 1976. Civil-service retirement pay cost \$2.8 billion in 1970; after ten years of sustained inflation, it reached billion in 1980, an increase of 525 per-Perversely, indexing meant that it could be more profitable to retire than to work. Eric Heimel wrote in the Journal of Contemporary Studies that a four-star general who retired in 1971 would have seen his retirement pay increase, through indexing, to \$64,000 in 1981, while a four-star general still on active duty in 1981 would be earning

In principle, indexed increases did nothing more radical than enable federal pensioners to keep even with inflation. But in practice, their effect was quite different. During the inflation of the 1970s, few prices rose faster than those of energy and housing; but the increases in those prices, dramatic enough in reality, were exaggerated by the formulas used to calculate the Consumer Price Index. The costs of home ownership, which made up one quarter of the "market basket" of goods whose prices determined the CPI, were calculated in a way that made the index extremely sensitive to changes in the mortgage rate. For example, if the mortgage rate were to rise by one point in a month, from 10 percent to 11, that change would, all by itself, raise the CPI for that month by almost one full point, which could be "an-nualized" into an inflation rate of 12 percent. The Congressional Budget Office has estimated that his and other quirks in the CPI's treatment of housing costs exaggerated the real rise in consumer prices by as much as 5.1 points between 1978 and 1980, with each of those points triggering an extra \$2 billion in federal spending each year. As for the cost of energy, the CPI market basket assumed that families would keep buying the same amounts of gas and oil and electricity, no matter how much prices might rise or fall. The real market basket of American consumers has of course changed markedly from that of 1972. The era of cheap fuel ended, and consumers cut back, but the CPI ignores such adjustments totally.

Beyond these technical defects in the index was a larger question of fairness, for "full indexation" led to very different fates for different segments of the American public. It created a class that had nothing to fear from the inflation that was the scourge of the rest of the populace. Those who retired from private companies were, if anything, more vulnerable to inflation than their working counterparts, since more than 90 percent of private pension plans offer no cost-of-living protection. (Hastings Keith's pension from the private firm where he spent twenty years started out at \$150 a month and dropped to \$100 when he began

receiving Social Security.) But because of the technical oddities of the CPI, those who received federal pensions and Social Security could come out ahead when prices rose. For one class of beneficiaries, indexation all but shattered the connection between the nation's productivity and their economic welfare.

There is one further engine of growth at work within the retirement accounts: medical insurance. In financial terms, the medical programs are potentially the most explosive of all; they also present the most intractable of the entitlement dilemmas.

Through the past decade, no major program run by the federal government has grown more quickly than medical care for the aged. Between 1970 and 1980, federal payments for medical entitlements, of which Medicare makes up three quarters (Medicaid accounts for nearly all of the rest), rose by 133 percent in real dollars (i.e., adjusted to remove the effects of inflation). Medicare now costs less than one third as much as Social Security, but it is increasing at a much faster rate. According to projections based on the 1981 Social Security Trustees' report. Medicare could, by the year 2005, surpass Social Security to become the largest single item in the federal budget.

That Medicare should be outstripping Social Security suggests that it is subject to pressures other than demographics, since the clientele of the two programs is almost the same. The pressures driving Medicare costs ever higher are built into the medical

system.

American doctors, researchers, and hospitals have proven far more brilliant in combating the ravages of age than in figuring out how to do so at a controllable cost. This imbalance presents choices that are inescapably cruel: who shall be denied kidney dialysis if the cost of serving everyone is too high? Who shall pay the cost if no one is to be denied? These are precisely the sorts of choices that democratic governments find most awkward to make, and medical-entitlement plans reflect that uneasiness. Under Medicare and Medicaid, the choices finally do get made, but only in a backhanded fashion that does not pretend to be rational and does not succeed in being economical.

The choices fall to the doctors: if your physician authorizes a trip to the hospital and elaborate tests. Medicare will pick up the costs of the next sixty days (after you pay the first \$260). In principle, the brake on expenditures is the cumulative effect of half-a-million doctors' prudent decisions. In practice, the limit is often set by local availability of hospital beds, of specialists, and of

machines.

After years of bitter struggle, Congress enacted the Medicare program in 1965. Organized medicine, led by the American Medical Association, represented the principal opposition; as part of the political bargaining that ensured congressional passage, Medicare took on features that guaranteed that doctors and hospitals would not suffer financially under the plan, Doctors would be reimbursed according to a schedule of permissible fees-but the schedule would be based on rates set by the doctors themselves. Moreover, the doctors were free to bill their patients for supplements on top of the charge to Medicare. Hospitals unlike doctors, agreed to accept Medicare's reimbursement as payment in full for a patient's bill. But that reimbursement would be based on the hospital's rendering of "reasonable costs" of care. Hospitalization insurance was automatic under Medicare. To get the extra coverage for doctors' bills, each person had to pay a premium, now \$12.20 a month. Nearly everyone chooses the additional coverage, and so is effectively shielded from rising medical costs—which was, of course, one of the fundamental purposes of the plan.

The result of these arrangements was another of the "cost-plus" schemes so common in government contracting. No party to the transaction had both the incentive and the ability to economize on care. A hospital-building boom left new beds waiting to be filled. Filled they soon were, and the charges were passed on to Medicare or to private insurers. These "third-party reimbursers" watched their payments shoot through the roof—hospital charges have typically risen by 15 to 20 percent each year.

This general quandary for American medicine has created a particular challenge for Medicare, because expensive new medical techniques are most often used to treat older patients. Nearly a quarter of all Medicare payments are made in the last year of a recipient's life. While Medicare has been a resounding success in enabling retired Americans to meet their routine medical needs without financial terror, its budget is tremendously skewed by the costly last efforts to fend off death.

Political arguments about medical care have simmered down in the past half-dozen years, because of the near-universal assumption that the time has not been right to create another expensive new entitlement, in the form of a national health system. Yet the very difficulty of balancing our public accounts may soon refocus political attention on the basic questions of who gets what kind of medical care, and how we can pay for it.

As it drew up its proposals for the 1983 budget, the administration decided not to recommend any reductions in Social Security, and only minor adjustments in Medicare and federal pension plans. In so doing, it started out by declaring one third of the budget off-limits for spending cuts. Another quarter of the budget belonged to the military, and its share was supposed to increase to one third over the next few years. A further 15 percent of the 1983 budget was committed to repaying interest on the national debt

Together, these three areas account for nearly three fourths of all federal spending, without even counting the other entitlements. If they could not be cut, an administration pledged to frugality and embarrassed by mammoth deficits had little choice but to slash everything else. The administration proposed "zeroing out" most job-training programs, cutting research-and-development funds, and taking other difficult steps. There was one final possibility for savings: the "other" entitlements, those aimed at the poor. This possibility the administration seized.

Between Jimmy Carter's budget for fiscal year 1981 and Ronald Reagan's proposals for 1983, the major pension programs increased by 20 percent and Medicare increased by 30 percent. But in the same period, AFDC was cut by 25 percent, the low-income energy-assistance program by 30 percent, and a variety of nutrition programs, including food stamps, by 15 percent.

percent, and a variety of nutrition programs, including food stamps, by 15 percent.

The unequal sharing of the sacrifice became one of the administration's central political problems; it led even conservative pillars such as Senator Robert Dole to complain about shoving the burden onto the

poor. Even so, the cuts were not enough to solve the budget problems. No matter how deeply it might probe elsewhere, an administration that chose not to confront the biggest entitlements (to say nothing of the military) was left with the prospect of deficits so stupendous that they could double the national debt within five years.

In the middle sixties, it took the simultaneous pursuit of a war on poverty and a war in Vietnam to throw the federal budget into chronic deficit. Now it might require nothing more ambitious than meeting our rou-

tine obligations.

Can the entitlements explosion be contained? The ultimate answer demands a reconsideration of basic political premises that we have found comforting since the New Deal. Yet certain technical changes, primarily involving pensions for public employees, provide a place to start.

The single most important technical change is to begin dismantling preferential federal pensions and bring new federal employees into the Social Security system.

Federal employees now enjoy the nation's most generous pension plan. Most private pensions aim at replacing 20 to 25 percent of a worker's previous earnings. Social Security, reduced living expenses, and, yes, savings are supposed to make up the rest. A federal employee with thirty years' service will typically receive 56 percent of the average salary for his last three years on the job, congressmen 80 percent. All of it is fully indexed, of course (although the Congress did, this summer, limit indexing for retirees under the age of sixty-two, on the theory that most of them were holding other jobs). Federal retirees receive more in pensions than retirees from all private businesses combined.

The pension plans of private businesses usually require the worker and his firm to invest, in varying proportions, the resources that will pay dividends during retirement. Federal pension plans don't come close to doing so. The largest contributions come neither from the workers nor from the agencies that employ them but from general federal funds. Patrick Owens reported in Newsday that in 1980, federal workers and their agencies contributed a total of \$3.6 billion toward their retirement funds. The Treasury contributed an extra \$11.9 billion. The unfunded liabilities of the federal retirement systems-the commitments made to workers but backed by no investment or trust fund-now amount to some \$1 trillion. roughly as much as the entire national debt. According to Hastings Keith, unfunded liabilities average \$149,000 per person in the military, \$173,000 in the civil service, and \$530,000 in the foreign service.

The generosity of federal pensions is a legacy of the 1920s, when federal pay was poor. For the past twenty years, the federal government has embraced the principle of "comparability," offering salaries comparable to those in business. Why should the principle not extend to pensions as well?

"Integrating" federal employees into Social Security would ultimately mean more generous benefits for low-paid federal employees, especially those who do not work for the government long enough to earn pension rights, since they would be able to count their years in government service toward their Social Security benefits. At the other end of the scale, it would mean an end to the windfalls now available to "double-dippers": government employees who, having qualified for pensions while still in their late forties or fifties, take private jobs

and become eligible for Social Security as well. Robert Myers, a former chief actuary for Social Security who now directs a presidential commission on Social Security, which will recommend reforms for the system this winter, contends that threequarters of all retired government workers are either receiving a second pension or are working in a job that will qualify them to do

A few groups of federal employees have already set an example that might be widely emulated. The retirement plan for the Tennessee Valley Authority has since the 1950s been integrated with Social Security, like most private pension plans; it does not count military service toward its pensions; it applies its disabilty standards more strictly than does the civil-service retirement system; and it discourages early retirement. Except for the provisions for early retirement, it offers benefits comparable to those of other civil servants; yet, unlike most other systems, it is actuarially sound. The Federal Reserve pension plan and a few others operate on similar principles.

The logic of comparability also suggests a change in military pensions. Career soldiers can now retire on half pay after twenty years of service, or three-quarters pay if they serve for thirty years. (Members of the military are also eligible for Social Securi-

The demands of military duty obviously differ from those of any other work. But the twenty-year career costs a greater deal while adding very little to our national defense. Gradually converting the military to a thirty-year career might mean increasing active-duty pay, especially for the sergeants and petty officers who are now the services scarcest resource. In the long run, this would probably cost less than adding to the mountain of unfunded pension liabilities; and by reducing many officers' sense that their military duty can be only a "first career," it might well enhance the services' integrity.

Yet all such reforms take us only so far. No matter how we might crack down on the retired colonels and GS-15s, it will not make much more difference in the entitlements budget than cracking down on welfare mothers would. Our national accounts will remain out of balance until we wrestle with the IOUs that middle-class America has issued it itself, through Social Secuirity and Medicare. The two awesome challenges of the entitlements are to control medical costs and re-examine our notion of who

"needs" public help.
The budgets for Medicare and Medicaid, in their leaps to the sky, reflect the same pressures that are driving Blue Cross premiums and personal medical bills up and up. Tinkering with the government programs is the minor solution to this problem; the major one is changing incentives in the medical system. In forcing this issue to the center of political attention, the entitlements mess may indirectly do some good.

One political camp, exemplified by Senator Edward Kennedy, contends that the government can never contain medical costs unless it controls the medical system. To that end, Kennedy has tirelessly pushed for a nationwide, largely publicly financed, centrally planned approach to health care. The opposite view, espoused by David Stockman in his days in the Congress, holds that rising medical costs reflect imperfections in the medical market. The answer, therefore, is to unleash market forces through more compe-

Of the two views. Stockman's seems more in harmony with the politics of the time. The Reagan Administration plans to unveil a new medical-reform scheme, emphasizing "market forces," about the time of the President's State of the Union address next January.

The logic of the market means encouraging the pre-paid medical plans known as health-maintenance organizations. It also means-though this may or may not be a feature of the President's plan-removing some of the padding that now protects the typical patient from his medical bills. Economists lament "third-party" payment schemes, whether run by Blue Cross or by the U.S. government, because they blunt the instinct for frugality that is so powerful when one's own money is at stake. When the patient can pass the bill to someone else, why should he worry about unnecessary tests? Why should he wait two weeks for an appointment at the doctor's office when he can use the hospital emergency room as a clinic? He will ultimately pay the bill, of course, through higher taxes or insurance premiums; but the market functions poorly when its messages are so long delayed and so weak.

One government economist, who chooses to remain unnamed, has taken reliance on the market a radical step further, Medicare's biggest economic problem, the economist argues, is the last-resort measures taken before an elderly patient's death, which dwarf the costs of previous care. When patients and their families decide how hard the doctors should fight, and with what machines, finances do not color the deliberations, because Medicare covers nearly all hospital fees. The economist argues that when such a patient dies, his estate should be tithed to recover a share of his "Medicare profit"-the difference between the premiums he has put into the system and the benefits paid on his behalf. This, the argument continues, would repair the social contract between the generations. It would also build into individual decisions the same realities that the nation faces, as high-priced medical possibilities grow more rapidly than resources.

This may seem a ghoulish suggestion, as its author is aware, but when public leaders dismiss out of hand the possibility of questioning the rules, even though those rules lead straight to bankruptcy, are a few ghoulish thoughts so much more dangerous than the conventional wisdom? Whether or not this specific proposal is workable, the spirit behind it is constructive, because it demonstrates a willingness to think of new

ways out of a predicament.

The main idea waiting to be spoken is that people have different claims on public support. Yes, there are cases in which the state bestows its benefits equally on all. The children of rich and poor alike should be entitled to schooling at public expense. But to extend that logic to pensions and subsidies leads to commitments beyond our national means. The people who really need help need more than they are now getting. If they are to have it, other people must have

In the case of medical care, there are certain obligations that the state should assume on everyone's behalf. Any burn victim, to choose one example, should be entitled to the best care that is available, regardless of the cost. But there are other obligations that the nation cannot assume, simply because there would never be enough money to pay for them. Medical technology now offers answers to many of mankind's universal complaints. Corneal surgery can eliminate much of the need for ses. Joints can be rebuilt, arteries reamed, gums surgically lifted and the underlying bone scraped to remove plaque. We all "need" such services, but if all these innumerable repairs to all parts of all bodies were carried out, the cost would rival the gross national product.

How, then, can we decide where to draw the line? One way is to ask each patient to share more of the cost, giving him a stake in the decision about costly care. But if that is done without recognizing the differences in economic need, it will deny some people a

more basic level of medical care.

A twenty-dollar physician's fee, or a \$500 deductible for hospitalization, would mean quite different things to a retired couple with pensions and dividends of \$30,000 and a widow surviving on \$4,000 from Social Security. For the one, it would mean some sacrifice; for the other, denial of care. Yet our retirement plans, in their magnificent evenhandedness, treat the poor widow and the well-off couple the same. When we provide for some, we must provide for all. If we change the rules so as to balance the budget, we revoke the widow's right to treatment. But if we do not, we lose control of our financial future.

The original genius of Social Security was precisely that it did treat everyone the same. No one need feel humiliated by accepting its benefits, because it was not welfare. Everyone was included in the plan. As a political ideal, this is most attractive; but, in Social Security as in Medicare, it may simply have become too costly to sustain.

Consider two of the major proposals for bringing Social Security's commitments into line with its resources. One is to raise the retirement age, in recognition of medical improvements and demographic shifts. Raising the retirement age to sixty-eight by the end of this century would keep the average time in retirement one quarter as long as the average adult life-span—the same balance that has prevailed for the past few years. Another proposal is to hold down the automatic increases in Social Security and other benefits, perhaps by gearing them to the Consumer Price Index or the average increase in wages, whichever was less in a given year. If wages rose faster than prices, the buying power of the pension would be fully protected. If the reverse, people of all ages would share in the sacrifice of a less productive economy. (The CPI will, in any case, soon be revised to eliminate the housing-cost bias.)

But if changes like these were applied "fairly," with equal effect on all, the results would be unfair. Some people need the pay-

ments; others do not.

To speak of "the aged," or "Social Securi-ty recipients," as one homogeneous group no longer makes sense. As recently as twenty years ago, it did. Those above sixtyfive were then an economically distinct group. Like black Americans or single women heading households, they were on the whole poorer than other people. The economic differences within the group were less important than the gap between them and the American norm. To aim a program at all retired people not only made political sense, in avoiding the taint of welfare: it also made economic sense, for it transferred money to people in need.

That has changed. Older Americans are now economically very much like their children's generation, and their grandchildrens'.

Michael Hurd and John B. Shoven, of the National Bureau of Economic Research, have reported that the per capita income of people over sixty-five is now higher than for the population as a whole. In 1978, it was 121 percent of the national norm. Two thirds of all people over sixty-five own at least one home.

As the differences between the generations have diminished, the differences among older people have grown more acute. On average, those above sixty-five enjoy parity with those below; but the average conceals many retired people who are desperately poor. About a fifth of all retired couples have incomes above \$24,000; but of the 5.8 million single women sixty-five or older, fully half have incomes below \$5,000. As the world works, the wealthiest couples generally receive the highest Social Security benefits (because they earned more when working) but depend on them least. For the couples making more than \$24,000, the comparatively large Social Security check represents about one sixth of their income. For the poorest elderly women, their smaller check is more than 80 percent of their total support.

Can it be fair to treat these people "equalto hold the widow's \$300 a month and the couple's \$900 a month to an "even" percent increase? Only a perverted sense of fairness is thereby honored; yet it is this kind of equity that our evenhanded entitle-

ment policy now serves.

In practical terms, the solution might be to provide a full cost-of-living adjustment for only a certain portion of Social Security benefits—say, the first \$500 a month. A more significant step might be to make Social Security benefits subject to federal income tax. The automatic workings of the IRS are administratively far simpler than any other means for concentrating scarce resources on people in need. Social Security is already subject to a tax of sorts—the "earnings test," which reduces benefits by \$1 for each \$2 a recipient earns above \$6,000 per year. (The limit is \$4,400 for those under the age of sixty-five.) But the test does not apply to people above the age of seventy-two, and next year the age will fall to seventy. More important, it applies only to earnings, from jobs, and not to investment income or other pensions, which are the major source of income for the most affluent older people.

Yet to tax Social Security would be heresy: that attitude is nearly universal, its emotional and political power a legacy of the era when we could effortlessly afford to treat everyone "equally." As I have tried to suggest, that era has ended, but adjusting our assumptions takes time. The only political proposition more challenging than taxing Social Security would be carrying the logic to its next step, and asking why there should be extra exemptions on form 1040 for everyone over the age of sixty-five. Since older Americans are, on the whole, economically even with everyone else, why are the exemptions necessary? And since they transfer money to the wealthiest members of the group (those who pay taxes) and do little or nothing for the poorer 50 percent,

how can they be defended?

We are understandably reluctant to face seemingly mean-spirited questions such as these. Yet our reluctance helps explain why the entitlements have grown so large, and why we seem so powerless to control them. We are also hindered by a widespread misunderstanding of where most people stand on the economic pyramid, and who should

therefore be "entitled" to help. A family whose income is in the mid-\$30,000s is part of the richest 20 percent of all Americans. A family in the mid-\$50,000s is in the upper 5 percent. Yet most such people would be horrified to think that they were anything but "middle class," entitled to public help in financing their homes or sending their children to school and to the rewards of a lifetime of work in the form of monthly Social Security checks. As individuals, they undoubtedly deserve help; but if all of us are entitled, where will the money come from?

The entitlements problem has forced such questions upon us. The cost of ignoring them is not simply the obvious-the automatic growth of federal spending-but also the subtle destruction of other public goals. This effect transcends ideology. It matters little whether you want to improve education for all children, or build more aircraft carriers, or lift the burden of taxation from the shoulders of America's entrepreneursall causes are in jeopardy as long as more and more of us are "entitled" to support from everyone else.

#### LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. CAMPBELL (at the request of Mr. MICHEL), from 7 p.m. for the balance of the day, on account of illness.

Mr. ALEXANDER (at the request of Mr. WRIGHT), for today, on account of attending a funeral.

#### SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted

(The following Members (at the request of Mr. BEREUTER) to revise and extend their remarks and include extraneous material:)

Mr. Lott, for 30 minutes, today. Mr. CARNEY, for 15 minutes, today. Mr. LATTA, for 60 minutes, on De-

cember 17.

Mr. BUTLER, for 5 minutes, today. Mr. Dornan, of Califorina, for 30 minutes, on December 17.

Mr. McDade, for 60 minutes, on December 17.

Mr. Nelligan, for 30 minutes, on December 17.

Mr. McDade, for 60 minutes, on December 18.

Mr. BEREUTER, for 60 minutes, on December 20.

Mr. BEREUTER, for 60 minutes, on December 18.

(The following Members (at the request of Mr. Mazzoli) to revise and extend their remarks and include ex-

traneous material:) Mr. BINGHAM, for 30 minutes, today.

Mr. Gonzalez, for 30 minutes, today. Mr. Annunzio, for 5 minutes, today.

Mr. STARK, for 5 minutes, today. Mr. Nelson, for 5 minutes, today.

Mr. EDWARDS of California, for 5 minutes, today.

Mr. Panetta, for 5 minutes, today.

Mr. Bonker, for 5 minutes, today.

Mr. DERRICK, for 5 minutes, today.

Mr. Brooks, for 60 minutes, on December 17.

Mr. ALEXANDER, for 60 minutes, on December 20, 21, and 22.

Mr. STRATTON, for 60 minutes, on December 20 and 21.

#### EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. Michel, to include remarks prior to passage of conference report on H.R. 7019.

Mr. Pickle, to revise and extend his remarks and to include extraneous material notwithstanding the fact that it exceeds two pages of the RECORD and is estimated by the Public Printer to cost \$2,023.

Mr. Wylle, to revise and extend his remarks on the special orders on HENRY REUSS and PAUL FINDLEY.

Mr. Dornan, to revise and extend his remarks and to include extraneous material notwithstanding the fact that it exceeds two pages of the RECORD and is estimated by the Public Printer to cost \$1,904.

(The following Members (at the request of Mr. BEREUTER) and to include extraneous matter:)

Mr. FIELDS in three instances.

Mr. Lott in two instances.

Mr. CLAUSEN.

Mr. MARRIOTT.

Mr. DANNEMEYER.

Mr. WINN.

Mr. WILLIAMS of Ohio.

Mr. McCloskey.

Mr. KEMP.

Mr. GREEN.

Mr. FORSYTHE. Mr. BROYHILL.

Mr. CARMAN in four instances.

Mr. Dornan of California in four instances.

Mr. BETHUNE.

Mr. GILMAN.

(The following Members (at the request of Mr. Mazzoli) and to include extraneous matter:)

Mr. Roe in two instances.

Mr. Solarz in two instances.

Mr. MOFFETT in two instances.

Mr. MAZZOLI.

Mr. Washington in two instances.

Mr. MOTTL.

Mr. SHANNON.

Mr. JACOBS.

Mr. Jones of Oklahoma.

Mr. DINGELL.

Mr. ST GERMAIN.

Mr. MURTHA.

Mr. PANETTA.

Mr. FASCELL in six instances.

Mr. LAFALCE.

Mr. TRAXLER.

Mr. Garcia in two instances.

Mr. Walgren in two instances.

Mr. FORD of Michigan.

Mr. DERRICK.

Mr. Gore in two instances.

Mr. AuCoin. Mr. BARNARD.

Mrs. Schroeder.

Mr. O'NEILL.

Mr. HAWKINS.

Mr. HOYER.

Mr. D'AMOURS.

Mr. Long of Maryland.

Mr. SKELTON.

Mr. FOUNTAIN.

Mr. McDonald in five instances.

Mr. John L. Burton.

#### SENATE BILLS AND A CONCUR-RENT RESOLUTION REFERRED

Bills and a concurrent resolution of the Senate of the following titles were taken from the Speaker's table and, under the rule, referred as follows:

S. 1908. An act to provide for the reinstatement and validation of U.S. oil and gas lease NM-A26947 (Oklahoma); to the Com-

mittee on Interior and Insular Affairs. S. 2118. An act to designate certain national forest system lands in the State of Wyoming for inclusion in the National Wilderness Preservation System, to release other forest lands for multiple use management, to withdraw designated wilderness areas in Wyoming from minerals activity, and for other purposes; to the Committee on Interior and Insular Affairs, the Committee on Agriculture, and the Committee on Rules

S. 3073. An act to provide for the distribution within the United States of the U.S. Information Agency film entitled "Dumas Malone: A Journey With Mr. Jefferson"; to

the Committee on Foreign Affairs. S. Con. Res. 131. Concurrent resolution to express the sense of the Congress concerning Americans missing and unaccounted for in Southeast Asia; to the Committee on Foreign Affairs.

## SENATE ENROLLED BILL SIGNED

The SPEAKER announced his signature to an enrolled bill of the Senate of the following title:

S. 816. An act to amend the Clayton Act to modify the amount of damages payable to foreign states and instrumentalities of foreign states which sue for violations of the antitrust laws.

## ENROLLED BILLS SIGNED

Mr. HAWKINS, from the Committee on House Administration, reported that that committee had examined and found truly enrolled bills of the House of the following titles, which were thereupon signed by the Speaker:

H.R. 3942. An act to amend the Commercial Fisheries Research and Development Act of 1964; and

H.R. 6758. An act to authorize the sale of defense articles to United States companies for incorporation into end items to be sold to friendly foreign countries.

## ADJOURNMENT

Mr. MAZZOLI. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 12 o'clock and 31 minutes a.m.) the House adjourned until today, Friday, December 17, 1982, at 10 a.m.

#### EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

5300. A communication from the President of the United States, transmitting a request for appropriation amendments and amended appropriation language for fiscal year 1983 (H. Doc No. 97-268); to the Committee on Appropriations and ordered to be printed.

5301. A letter from the Comptroller General of the United States, transmitting a list of reports issued or released by the General Accounting Office during November 1982, pursuant to section 234 of Public Law 91-510; to the Committee on Government Operations.

5302. A letter from the Secretary of Agriculture, transmitting his recommendation, together with the final environmental impact statement and study report, that the Shawnee Hills study area on the Shawnee National Forest in Illinois not be designated a national recreation area, pursuant to section 502 of Public Law 94-518; to the Committee on Interior and Insular Affairs.

5303. A letter from the Commissioner of Patents and Trademarks, transmitting a report on automating the patent and trademark office, pursuant to section 9 of Public Law 96-517; to the Committee on the Judici-

### PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BIAGGI: H.R. 7429. A bill to amend title IV of the Social Security Act to provide that information concerning an applicant for or recipient of aid to families with dependent children must be made available (by the applicable State agency) to any Federal, State, or local law enforcement authority who requests such information for use in a felony investigation or prosecution; to the Committee on Ways and Means.

By Mr. BINGHAM (for himself, Mr. OTTINGER, Mr. UDALL, Mr. FASCELL, Mr. Wolpe, Mr. Shamansky, Mr. Bonker, Mr. Eckart, Mr. Barnes, Mr. Studds, Mr. Edgar, Mr. Gejden-Mr. SEIBERLING, and Mr. SON. MARKEY):

H.R. 7430. A bill to promote the nuclear nonproliferation policies of the United States; to the Committee on Foreign Affairs.

By Mr. FLORIO (for himself and Mr. [ADIGAN):

H.R. 7431. A bill to amend the Railroad Retirement Act of 1974 to help assure sufficient resources to pay benefits, to make technical changes, and for other purposes; jointly, to the Committees on Energy and Commerce and Ways and Means.

By Mr. LEVITAS (for himself, Mr. SAM B. HALL, JR., and Mr. KINDNESS): H.R. 7432. A bill to amend title 5, United States Code, to make regulations more cost effective, to insure review of rules, to improve regulatory planning and management, to enhance public participation in the regulatory process, and for other purposes; jointly, to the Committees on the Judiciary and Rules.

By Mr. PERKINS:

H.R. 7433. A bill to repeal section 278 of the Tax Equity and Fiscal Responsibility Act of 1982 which imposes the hospital insurance tax on Federal employment; to the Committee on Ways and Means.

By Mr. WASHINGTON:

H.R. 7434. A bill to repeal certain changes made by the Omnibus Budget Reconciliation Act of 1981 to the extended unemployment compensation program, and for other purposes; to the Committee on Ways and Means.

H.R. 7435. A bill to extend the Federal Supplemental Compensation Act of 1982 and to increase the number of weeks for which compensation is payable under such act; to the Committee on Ways and Means.

By Mr. WHITLEY: H.R. 7436. A bill to amend the Agricultural Act of 1949; to the Committee on Agricul-

> By Mr. DIXON (for himself, Mr. Gray, Mr. Lowry of Washington, Mr. Wolpe, Mr. Barnes, Mr. Bedell, Mr. Bonior of Michigan, Mrs. Chis-HOLM, Mr. CROCKETT, Mr. DELLUMS, Mr. Dymally, Mr. Edgar, Mr. Fazio, Mr. Fauntroy, Mr. Foglietta, Mr. Fowler, Mr. Frank, Mr. Garcia, Mr. GUARINI, Mrs. HALL of Indiana, Mr. HALL of Ohio, Mr. KILDEE, Mr. LEHMAN, Mr. LELAND, Mr. PANETTA, Mr. PEPPER, Mr. RANGEL, Mr. RATCH-FORD, Mr. SCHUMER, Mr. STARK, Mr. WASHINGTON, and Mr. WAXMAN):

H.R. 7437. A bill to require that the U.S. Government oppose the furnishing of assistance by the International Monetary Fund to any country which practices apartheid; to the Committee on Banking, Finance and Urban Affairs.

By Mr. TRIBLE:

H.R. 7438. A bill to amend the Internal Revenue Code of 1954 to provide that interest on certain real estate mortgages made by savings and loan institutions and mutual savings banks will be exempt from Federal income tax; to the Committee on Ways and Means.

By Mr. FISH:

H. Res. 633. Resolution to recognize the successful resettlement of hundreds of unaccompanied Haitian children; to the Committee on Post Office and Civil Service.

## ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 4588: Mr. Gore, Mr. Moorhead, and Mr. QUILLEN.

H.R. 6800: Mr. Jacobs. H.R. 7066: Mr. Roe.

H.R. 7108: Mr. CAMPBELL.

H.R. 7126: Mr. KINDNESS, Mr. LEBOUTIL-LIER, Mr. ROBERTS of Kansas, Mr. FOGLIETTA, Mr. Dornan of California, Mr. Hagedorn, Mr. Young of Florida, and Mr. TAUKE.

H.R. 7271: Mr. KILDEE and Mr. JACOBS. H.R. 7333: Mr. FRENZEL, Mr. EDGAR, Mr. SHAMANSKY, Mr. FISH, Mr. WHITEHURST, Mr. BAILEY of Pennsylvania, Mr. BEILENSON, and Mr. VENTO.

H.R. 7373: Mr. STOKES and Mr. FLORIO.

H.R. 7386: Mr. MILLER of California and

Mr. Sabo. H.R. 7411: Mr. Gore. H.J. Res. 294: Mr. Paul and Mr. Dornan of California.

H.J. Res. 420: Mr. WHITTEN.
H.J. Res. 591: Mr. LeBoutillier, Mr. Fog-Lietta, Mr. Smith of Pennsylvania, Mr. Sol-omon, Mr. Quillen, Ms. Fiedler, Mr. Hance, Mr. Dannemeyer, Mr. Hunter, and Mr. RHODES.

H.J. Res. 592: Mr. Kogovsek and Mr.

Brown of Colorado.

H. Con. Res. 427: Mr. Sabo, Mr. Clausen,
Mr. Hall of Ohio, Mr. Daub, Mr. Parris,
Mr. Shamansky, Mr. McDonald, Mr. Long
of Maryland, Mr. Solomon, Mr. Bevill, Mr.

WOLPE, Mr. KINDNESS, Mr. WEBER of Minne-WOLPE, MI. KINDNESS, MI. WEBER OF MINITE-SOTA, Mr. BEARD, Mr. BEILENSON, Mr. JEF-FRIES, Mr. HYDE, Mr. LUNGREN, Mr. GUARINI, Mr. EDGAR, Mr. WOLF, Mr. FAZIO, Mr. ED-WARDS OF OKLAHOMA, Mr. FISH, Mr. WAXMAN, Mr. RAHALL, Mr. CARNEY, Mr. SCHUMER, and Mr. STOKES.

#### PETITIONS, ETC.

Under clause 1 of rule XXII,

678. The SPEAKER presented a petition of the International Good Neighbor Council, Mexico, relative to the Committee for Freedom and Justice; which was referred to the Committee on Foreign Affairs.

#### AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

#### H.R. 7397

By Mr. GEPHARDT:

-On page 11, after line 16, insert the following:

"(2) tuna, prepared or preserved in any manner, in airtight containers; or,".

Renumber the following paragraphs accordingly.

# **EXTENSIONS OF REMARKS**

HISPANICS AND JOBS: BARRIERS TO PROGRESS

## HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 16, 1982

• Mr. GARCIA. Mr. Speaker, I wish to recommend to my colleagues the report by the National Commission for Employment Policy. This report, "Hispanics and Jobs: Barriers to Progress," focused on the difficulties Hispanic Americans have in finding and keeping good jobs.

The report emphasizes that Hispanic Americans face three barriers to success in the job market: lack of proficiency in English, low levels of formal schooling, and discrimination. By far the most important barrier is difficulty with English.

Hispanics are a sizable and growing part of the U.S. population. They fare almost as badly as blacks in the labor market, judged by unemployment and wages. Moreover, their school-dropout

rates are higher than either blacks or

whites. The Hispanic subgroups, however, suffer in very different ways and to different degrees. This diversity of problems reflects the varieties of location, education, and immigration/settlement histories of the peoples called "Hispanics."

I have enclosed a summary of the National Commission for Employment Policy report and encourage my colleagues to read it.

#### EXECUTIVE SUMMARY

Hispanic-Americans are a sizeable and growing part of the U.S. population. Many have problems finding good jobs and earning a decent income even in prosperous times. The dimensions of their difficulties are often hidden by figures on the position of all Hispanic-Americans, since the type of problem differs among Mexican-Americans, Puerto Ricans, Cuban-Americans, and persons irom Central and South America. For some, finding work is a severe problem; for others, low pay is the major issue.

At the same time, Hispanics generally experience common barriers to labor market success: lack of proficiency in English, low levels of formal schooling, and discrimination. Difficulties communicating in English directly reduce their prospects for good jobs, impede their educational attainment, and operate as a vehicle for labor market

discrimination.

## CHARACTERISTICS OF HISPANICS

The 1980 census estimates that there are 14.6 Hispanic-Americans living on the U.S. mainland and another 3.2 million in Puerto Rico. They are 6.5 percent of the population on the mainland, up from 4.5 percent a decade ago.

Hispanics differ from the rest of the U.S. population in several important ways.

Hispanics are geographically concentrated in a few States. Two-thirds live in California, New York, Texas, and Florida; less than one-third of the total population lives in these States.

Hispanics are more likely than the rest of the population to be immigrants. In 1970, about 1 out of every 4 Hispanics was foreign born, compared to 1 out of 20 in the total population.

Hispanic adults have fewer years of schooling than either whites or blacks. Among persons over age 25 (when most people have finished their schooling), half of the Hispanic population has completed fewer than 11 years of schooling, about 2 years less than whites, and 1½ years less than blacks.

Many Hispanic adults, whether native or immigrant, have problems communicating in English. Almost 15 percent of those 21 years or older speak only Spanish and almost 30 percent consider Spanish to be their major language.

Hispanics are a young population. Half are under age 24 and almost one-third are under age 15. Half of the white population is under age 31 and about 20 percent are under age 15.

Many Hispanic youth leave school before graduation. Their dropout rate is about 1½ times that of blacks and almost 3 times that of whites

Many Hispanic youth have problems with English. About 70 percent of those age 5 to 14 (or 1.7 million children) who have been raised in Spanish-speaking homes have limited proficiency in English.

The experiences of Hispanics in the job market differ from those of blacks and whites.

The rate of participation in the labor force among Hispanic men is as high as that of whites and above that of blacks. Hispanic and white women have about the same rate of participation, which is below that of black women. Hispanic youth participate in the job market at a rate below that of whites but above that of blacks.

The unemployment rates of Hispanic men, women, and youth are above those of whites, but below those of blacks.

Hispanics are more likely to be in bluecollar jobs than either whites or blacks.

Hispanic men earn less per hour than black or white men. All groups of women earn less than men and Hispanic women earn the less per hour among women.

earn the least per hour among women.

The annual income of Hispanics is between that of blacks and whites.

THE DIVERSITY OF THE HISPANIC POPULATION

The majority of Hispanics on the mainland are Mexican-Americans (60 percent). Fourteen percent are Puerto Rican, 6 percent are Cuban-American, 8 percent are from Central and South America, and 12 percent are "other Spanish." This last group includes persons of mixed Hispanic background.

Because most Hispanics are Mexican-American, statistics on Hispanics as a group largely reflect the experiences of Mexican-Americans and tend to obscure trends and problems of the other groups. The several groups of Hispanics differ in important ways.

They are located in a few widely separated regions of the U.S. with different rates of economic growth and different occupation/industry mixes. In general, Mexican-Americans are located in the Southwest; Puerto Ricans on the mainland live mainly in the Northeast; and most Cuban-Americans in Florida.

The groups become citizens in different ways and at different times. Mexicans' land was annexed by the U.S. in the mid-1840's. By 1970, about 50 percent were at least second-generation Americans and less than 20 percent were immigrants. Puerto Ricans also became Americans when the island was annexed by the U.S. in 1898. A unique characteristic of this group is their frequent migration between the Spanish-speaking island and the English-speaking mainland. The vast majority of Cubans are immigrants and children of immigrants who began arriving in the U.S. in the early 1960's. Most Central/South Americans are also recent immigrants.

Mexican-Americans and Puerto Ricans are, on average, a young population. Their median age is 22 years, 8 years below the median age of non-Hispanics. By contrast, Cuban-Americans are a relatively old group; their median age is 36 years.

Mexican-Americans and Puerto Ricans have a low level of education. Those over 25 years old have a median education of 9 and 10 school years, respectively. The comparable figure is about 121/2 years for the total U.S. population. The low levels of education are partly due to the lack of schooling of immigrants, who comprise a larger proportion of these groups than of the non-Hispanic population. However, native Mexican-Americans and mainland-born Puerto Ricans average at least 1 year less of schooling than white non-Hispanics of the same age. By contrast, Cubans are a well-educated group. Their median formal education is about the same as that of the non-Hispanic population.

Due to their different characteristics, the Hispanic groups have different experiences in the job market.

Difficulties finding work—as indicated by low rates of participation in the labor force and high rates of unemployment—are especially severe for Puerto Rican men and women both on the island and on the mainland. By these two measures they fare no better than blacks.

Mexican-American men have the largest proportion in blue-collar jobs and they earn less per hour than any other group of men. Mexican-American women have high rates of unemployment and earn less than the other groups of Hispanic and non-Hispanic men and women.

Compared to the other Hispanic groups, Cuban men and women do well in the labor market: their participation in the labor force is high, unemployment is low, and their median personal income is also high. On the other hand, their income position is substantially below that of non-Hispanic whites. Also, these figures exclude a large number of Cubans—the recent Mariel refu-

gees, of whom a substantial number are jobless.

REASONS FOR HISPANICS' PROBLEMS IN THE JOB MARKET

Determining the reasons for Hispanics' difficulties in the labor market is an empirical problem. The goal is to disentangle the effects (for example, on wages) of various characteristics such as location, immigrant status, age, education, and proficiency in English.

Research shows that while the several groups experience different labor market problems, the major causes are the same: lack of proficiency in English, low levels of formal schooling, and discrimination in the labor market. In this context, "lack of proficiency in English" means not only a limited ability to speak and understand the language, but also an infrequent use of English."

Research also suggests that the Hispanic groups are treated differently in the job market. However, due to Hispanics' widely scattered locations and to limited data, it is not possible to determine whether these differences reflect the effects of (1) belonging to a particular Hispanic group or (2) living and working in a particular place.

In general, Hispanic men who have problems with English earn less than those who are proficient. Language difficulties for women are associated, on average, with reduced participation in the labor force. Language is also associated with reduced earnings among women who have 12 or more years of education.

Hispanics' low levels of education, operating separately and in combination with their language problems, are another important reason for their low wages and poor occupational position. Lack of formal schooling has a particularly strong effect on the wages of Mexican-American men and women.

Language deficiencies are one vehicle through which discrimination against Hispanics occurs in the labor market. Even among men with similar language problems, Hispanics are in lower-paying occupations than non-Hispanics. Evidence indicates that discrimination against Hispanic men on the basis of their ethnic, as well as their linguistic, characteristics contributes to their low wages, although its severity varies among the several groups of Hispanic men. Discrimination has not been found to be a cause of differences in pay between Hispanic and non-Hispanic women.

GOVERNMENT ACTIONS TO IMPROVE HISPANICS'
POSITION

There have been several important governmental actions that seek to reduce Hispanics' problems in the job market. Bilingual education was designed to help all language minorities, but it is considered by the Hispanic community to have been a major instrument of the Federal Government to help Hispanics enter the American mainstream. Federal training programs are also considered here.

#### BILINGUAL EDUCATION

Over the past two decades the Federal Government has supported educational programs sensitive to the needs of young people whose first language is not English. The three major components of this support are title VI of the 1964 Civil Rights Act, the Bilingual Education Act of 1968, and the Supreme Court's 1974 decision in Lau v. Nichols. The Supreme Court ruled that students whose first language is not English do not receive an education free

from unlawful discrimination if they are instructed in English, without regard to their language difficulties.

There are several approaches to teaching language-minority students: English as a second language, transitional bilingual, bilingual bicultural, and structured immersion. The goal of each program is to teach English to the students while continuing their education in other subject areas. Bilingual bicultural programs give equal emphasis to parallel development of the students' own languages and cultures.

There are examples of successful projects for each of these approaches, but there is no consensus regarding which program works best. The literature does show that to be effective, individual programs should consider the students' age, social background, and educational needs. Also, the programs must have sufficient teaching materials and adequately trained staffs.

#### PEDERALLY SPONSORED TRAINING PROGRAMS

Federally sponsored training programs, such as those authorized by the Comprehensive Employment and Training Act of 1973 (CETA), are available to economically disadvantaged persons who wish to improve their skills. In general, more Hispanics participated in CETA training programs than would be expected on the basis of their proportion of the national eligible population.

The services and treatment Hispanics received did not differ from that of blacks and whites, once differences in program-relevant characteristics were taken into account. However, Hispanic women were more likely than men to be training for (or working in) low-paying jobs.

Analyses of all racial and ethnic groups of participants indicate that after completing the training program, men's yearly earnings did not increase above those of otherwise similar men who had not been in a training program. Women's yearly earnings rose above those of the comparison group, largely due to higher levels of employment, and somewhat to higher wages.

## LAW OF THE SEA: A RIP-OFF

# HON. JACK FIELDS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES Thursday, December 16, 1982

• Mr. FIELDS. Mr. Speaker, I enter into the Record for the benefit of my colleagues a recent editorial from the Dallas Morning News concerning the President's decision not to sign the Law of the Sea Treaty.

Rena Pederson, an editorial staff writer, has done a highly commendable job of presenting the essence of the treaty's problems. If more members of the media would follow her example, the anger of the American people over this treaty would surpass any we have seen in years.

The article follows:

[From the Dallas Morning News, Dec. 15, 1982]

Law of Sea: A Rip-off (By Rena Pederson)

The diplomatic tug of war over the law of the sea treaty is one of those issues that tend to make your eyes glaze over at the first mention.

Yet the treaty is considered the most important document since the adoption of the U.N. Charter.

It affects every aspect of the seas. It confirms the right of ships to pass through important straits and waterways. It settles disputes regarding fishing rights. It covers overflight rights for aircraft. And it sets out rules for seabed mining, which some say is the underwater bonanza of the future.

Thanks to new developments in technology, made by Dallas companies such as SEDCO and Dresser Industries, some 1.5 trillion tons of manganese, nickel, copper and cobalt can be harvested in the coming decades as potato-sized nodules on the ocean floor.

Now mining cobalt potatoes may not seem a red-hot issue. But considering that much of American industry depends on those minerals, you can imagine why the United States is interested in a treaty to determine the territorial rules of the game. And considering the trillion-dollar treasure at stake, you can also imagine why all the under-developed countries in the United Nations want a piece of the action.

That's where the problems come in. The treaty also contains some cockeyed requirements for forcing industial countries to share their profits and technology with other countries—including the PLO and Soviet Union. It was those later provisions that caused the United States, which helped start the Law of the Sea negotiations nine years ago—to decide not to sign the treaty.

It has not been a popular decision abroad. Countries such as France, which caters to the Third World countries dominating the United Nations, have supported the treaty. And so has the Soviet Union, which would dearly love to have access to the American seabed mining technology, much of which has strategic applications.

And it has not been a well-understood decision domestically. Editorials have been savaging the Reagan administration for abandoning the treaty.

But ask yourself what you would do. To get an exploration contract, a company would have to provide the Seabed Authority with detailed research on two sites, so the authority could use one or give it to a poor nation. To use the other site, the company would have to agree to share its technology with the atuhority. Even if the company finally got approval to mine, the rate of removal would be governed by the authority so as to protect countries with land-mining operations, such as the Soviet Union and Gabon (manganese), Zaire and Zambia (cobalt), Canada (nickel) and Chile (copper).

Along the way, the company would have to pay stiff fees up to a million dollars every year until production began, and taxes as high as 50 percent. Fot only that, but the authority's governing board would be weighted with Third World countries and the Soviet bloc. The United States, whose companies are expected to do the bulk of any privately financed seabed mining would not be guaranteed a single seat on the 36-member board.

Such a deal. Would you sign the treaty and hold your country's vital industries hostage to a global bureaucracy in which you have almost no voice? Probably not. And that's what the Reagan administration reluctantly decided, even though its negotiators approved of 90 percent of the rest of the treaty.

Over the weekend, 117 other nations did sign the treaty at a meeting in Jamaica. That's nearly twice the 60 countries needed for implementation. But 22 other countries chose to delay signing, pending further study, including Great Britain, West Germany and Japan. That keeps alive the slim hope that if enough major industrial countries back away from the treaty, the seabed

provisions will be restructured.

In the meantime, legislation is being offered in Congress to establish a 200-mile economic zone, define the limits of the U.S. continental shelf and set procedures for scientific research in U.S. waters, things that also would have been covered in the treaty.

What the administration is trying to do is keep debating the critical issues while trying to set up mini-treaties of its own. It's a risky gamble, but agreeing to give away American technology to hostile countries would be even more dangerous. That's what the public needs to understand, if they can be convinced to care about something that sounds as boring as the Law of the Sea Treaty.

#### TRIBUTE TO ADAM BENJAMIN

## HON. ANDREW JACOBS. JR.

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES Thursday, December 16, 1982

. Mr. JACOBS. Mr. Speaker, the following is the well-deserved tribute paid by the Indiana Legislature to our dearly departed colleague, Adam Ben-

INDIANA LEGISLATURE RESOLUTION

A concurrent resolution urging the Congress of the United States to authorize a small boat marina within the Indiana Dunes National Lakeshore to be named "The Adam Benjamin, Jr. Memorial Marina."

Whereas Congressman Adam Benjamin, Jr. worked unceasingly for the betterment of Lake County, Indiana, by supporting, during his tenure as United States Congressional Representative for the First Congressional District of the State of Indiana, numerous programs and projects designed to improve the quality of life in his district and county; and

Whereas one of the primary projects developed and nurtured by Congressman Adam Benjamin, Jr. was the expansion and development of the Indiana Dunes National Lakeshore; and

Whereas one of the dreams of Congressman Adam Benjamin, Jr. and the constituents he represented was construction of a small boat marina as part of the west unit of the Indiana Dunes National Lakeshore; and

Whereas the construction of a small boat marina within the west unit of the Indiana Dunes National Lakeshore Park was identified as a first priority development element in the park's general management plan; and

Whereas in 1980 the Congress of the United States reviewed the general management plan and the United States Department of Interior approved the plan; and

Whereas through the continued support and coordination of Congressman Adam Benjamin, Jr., several hundred thousand dollars have been spent by the City of Gary, the Lake County Parks and Recreation Department, and the United States Department of Interior for the planning of such a marina; and

Whereas the people of Indiana believe that Congressman Adam Benjamin, Jr. should be honored and forever remembered for the dedicated service he gave to the citizens of his district, county, and state: Now, therefore, be it

Resolved by the Senate of the General Assembly of the State of Indiana (the House of Representatives concurring therein):
Section 1. That we urge the Congress of

the United States to authorize the construction of a small boat marina in Lake County, Indiana within the west unit of the Indiana Dunes National Lakeshore Park, to be named "The Adam Benjamin, Jr. Memorial Marina"

Section 2. The Secretary of the Senate is directed to transmit a copy of this resolution to the President of the United States the Secretary of the Interior, the leadership of each party of each House of Congress, and each member of the Indiana congressional delegation.

Adopted by voice vote this sixteenth day of November, 1982.

#### THE STATEMENT OF PATRICIA BREWER

## HON. ANTHONY TOBY MOFFETT

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES Thursday, December 16, 1982

. Mr. MOFFETT. Mr. Speaker, vesterday I submitted to the RECORD a statement from a constituent with which I did not agree. Today, I am doing so again. My colleagues may wonder why I am doing this. At a hearing I held on child welfare and the New Federalism in Connecticut. two persons felt that they had not been provided the opportunity to present their views. One gentleman is opposed to abortion; he had his say in the RECORD yesterday. Patricia. Brewer, coordinator of the Connecticut Catholic Conference, is in favor of tuition tax credits. Although I do not share her views, I did want to fulfill my promise to her that those views would be presented to this body.

Ms. Brewer's statement follows:

I am Patricia J. Brewer. I am a Doctor of Philosophy with an academic concentration in Anthropology and Folklore. I am a longtime participant in the Connecticut educational scene having taught in Connecticut's nonpublic school system on the elementary, secondary, and collegiate levels. I am presently associated with the Connecticut Catholic Conference.

I speak in favor of that aspect of the New Federalism which would allow parents to retain enough of their own earnings to choose the education they want for their children. Specifically, I speak in favor of the Educational Equity and Opportunity Bill: the tuition tax credit legislation which is set for mark-up this week in the Senate Finance Committee. I am here to ask that you give some fresh and clear thought to the justice of our present system of educational finance and that you cease active opposition and begin active support of legislation that would aid many of your constituents in the performance of the most sacred of their duties: the formation of the minds and hearts of their children.

Parents have the moral responsibility and the constitutionally guaranteed right to educate their children according to their religio-cultural values. Until recently, parents who chose to educate their children in an institution which transmitted Judeo-Christian values had little trouble doing so. They had access to the public, the private, and the parochial schools. All were Judeo-Christian in orientation. Two of them—the public and the parochial were tuition free, the public schools being supported by the state tax dollar, the parochial by both the Church tax and the contributed services of religious teachers.

Not so today. Today, in recognition of our society's religio-cultural pluralism thanks to several supreme court decisions, the specific teaching of Judeo-Christian values is prohibited in our public schools. Today, in response to the dramatic decline in the contributed services of religious teachers and the inability of the Church tax to sustain the full cost of parochial educa-

tion, parish schools charge tuition.

Consequently, for most of the poor and the nearly poor and for many of the middle class, there is today no educational choice, there is no educational freedom. Compelled by law and conscience to send their children to school, and unable to pay the tuition to send them to a nonpublic school, some parents are in a real sense coerced to educate their children in a manner abhorrent to their religio-cultural values. It seems clear that, whatever may have been its justification in the past, our present system of educational finance is neither just nor democratic. Coercion is hardly a principle sacred to democracy.

I am aware that both you, Representative

Moffett, and you Representative Kennelly, concerned as you are, and as you should be, with maintaining a quality school system, accessible to all, presently oppose tuition tax credit legislation. I am aware also of the cliched bugbears which are bandied about by the organized, vested-interest opposition to the legislation. Because I recognize in your prepared statements of rationale for opposition to tuition tax credits these bugbears, I would like to confront some of them with you.

The opposition says: Tuition tax credits would lead to the demise of the public school system. They would serve as an incentive to parents to remove their children from the public school. Only the dregs would be left in the public schools.

I say: Nonsense. Tuition tax credits when fully funded would pay only half of actual tuition cost up to a maximum of \$500. Parents sending their children to public schools presently receive an average benefit of \$3000 per child from their tax dollars.

The opposition says: Tax credits would take badly needed money from the public schools.

I say: Not so. During the first year of its implementation the tax credit would cost the federal government \$100,000,000 in federal revenue loss. In its out-year, when fully funded, the estimated loss would be \$1,500,000,000. That revenue loss, when prorated against the entire federal budget would be miniscule. The loss to the budget could easily be balanced by manufacturing one less Trident Submarine. There is no reason to believe that Congress will appropriate one penny more or less to public education because it has allowed citizens who have chosen nonpublic education to withhold some of their earnings to help finance that choice.

The opposition says: The tuition tax credits would benefit the wealthy and not the

I say: It is the marginally poor who will [From the Wall Street Journal, Sept. 16, benefit most from the tax credit. It is to the 19821

parent who can scrape up \$200 to pay half his child's tuition-but can't get together the \$400 to pay the full tuition that the tax credit will make the difference between educational freedom and educational coercion.

The \$500 maximum tuition credit will hardly influence the decision of a parent paying \$8500 to send his child to a Cheshire Academy-or a Choate Rosemary.

The opposition says: Tuition tax credits are unconstitutional.

I say: There has never been a Federal Tuition Tax Credit. A decision on the constitutionality of that legislation is yet to be had. Students of the Constitution argue for constitutionality. The Supreme Court will and should make this decision-not the legisla-

Representative Moffett-Representative Kennelly, words, whether full of reason or full of sound and fury signify nothing to the ears of those who will not hear. I hope that my words this morning have been somewhat reasonable. I trust that they have not fallen on deaf ears. It would be a privilege to discuss this matter in detail with either or both of you.

THE SOUTH BRONX'S ECONOMIC REVIVAL

# HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 16, 1982

Mr. GARCIA. Mr. Speaker, the South Bronx is in the early stages of a dramatic revitalization effort. Decreases in arson and burglary, as well as signs of economic recovery, are driving businesses back into this once highly prosperous region.

In the past 12 months, 134 companies have moved into or expanded in the South Bronx. Electrical demand, commercial phone usage, and business activity are up for the first time in years. Perhaps the most encouraging statistics are those showing that robberies and burglaries, the most common problems for businesses, are down by as much as 36 percent in recent months.

Our reviving community offers numerous attractions for an incoming business. Rents are inexpensive, there is a large supply of trainable labor, and the location provides easy access to Manhattan's profitable market. In addition, a strong transportation network and an innovative Con Edison electricity savings program have served to entice prospective business-

I submit this article, a testimony to the atmosphere of revitalization that has taken hold in the South Bronx, for the benefit of my colleagues:

NEW YORK CITY'S BURNED-OUT SOUTH BRONX STARTS A COMEBACK AS FIRMS

SLOWLY RETURN

(By Luis Ubinas)

New York.-The South Bronx, long a national symbol of ruin and despair, is slowly rebuilding itself.

Electrical demand, commercial phone usage and business activity are all up for the first time in years. The New York State Department of Commerce reports that in the past 12 months five businesses have been moving into or expanding in the South Bronx for every three that leave or cut back. Businessmen point to cheap rents, available labor and good location as reasons for moving into the area.

And local businessmen and politicians have begun to tackle what is perhaps the most difficult task, that of improving the area's image.

Many Americans were introduced to the South Bronx in 1977, when President Carter stood before television cameras on Charlotte Street in one of the most devastated sections of New York City. Amid acres of burned-out buildings and rubble-strewn vacant lots, the president promised to rede-

velop the area.

#### TEN-YEAR-OLD PROBLEMS

That plan fell through. Working against optimism were problems that had had more than 10 years to take root.

In the mid-1960s, drug use, arson and robbery had begun to drive out the tool makers, metal smelters and textile mills that were the backbone of the South Bronx economy. Old-timers in the area tell of prominent businessmen being murdered and of business deals ruined when visitors were accosted by derelicts.

Only minutes from midtown Manhattan and some of the world's most expensive real estate, the South Bronx came to be portrayed by the news media as a battlefield where arsonists and thieves were winning the fight against police and nearly half a million residents.

By 1979, when street crime and arson peaked, the area was at rock bottom and the future looked bleak. Donald DiMuro, executive director of the Bronx Chamber of Commerce, says, "We were left with nothing."

## SOME COMPANIES MOVE IN

But lately, things have begun to look up. Aircraft Supplies Inc., a manufacturer of airplane parts, has moved from New Jersey into the South Bronx. Arlene Blatt, the company's executive vice president, says, 'At first I was a little afraid, but rent of \$2.50 a square foot on a long-term lease was unbeatable." When it reaches full production later this year, the company will employ as many as 450 workers.

Panorama Windows Ltd. also moved in to take advantage of low rents. The company relocated last month from fashionable quarters on Manhattan's East Side to a factory near the Triborough Bridge. The company's president and owner, Peter Folsom says, The 5,000 square feet of yard space and 5,000 square feet of interior space we were able to buy here didn't exist in Manhattan

at any price.' Richard Slavin, of Houlihan-Parnes. Realtors, says, "Over the past few months there

have been fewer vacancies than there have been in years." Rents now are up to between \$5 and \$7 a square foot, but are still below costs in Manhattan and most nearby suburban locations, according to Realtors.

CHEAP, TRAINABLE LABOR

Some companies find the South Bronx attractive because of what an executive calls "cheap, trainable labor." The Welbilt Electronic Die Corp., a defense contractor, considered leaving the area. But Frederick Neuberger, a company vice president, studied the labor situation elsewhere without finding what the South Bronx offered, a "human reservoir of quality workers willing to start at minimum wage."

Another advantage, businessmen say, is the South Bronx's location. Herbert Klein, a director of mattress distributor Klein Sleep Products Inc., says he has seen other companies "offered everything from the Easter Bunny on down to move from the South Bronx," but he himself would never consider such a move.

#### TROUBLES STILL EXIST

"Forget the low-cost real estate and good work ethic of the people," Mr. Klein says. What keeps my company in the South Bronx is being right smack in the middle of 20 million potential customers. I'm 12 minutes from Manhattan."

In the past 12 months, 134 companies have moved into or expanded in the South Bronx, more than the total for the previous 22 months. Yet the picture isn't all rosy. A New York Department of Labor "micro-area study" of the South Bronx puts unemployment at 14.8% as of June. And companies are still moving out. Electrical costs, crime and image problems continue to be major concerns.

Businesses are getting a break on New York City's electricity costs, among the highest in the nation. Consolidated Edison Co., the local utility, has started a program that saves new companies in the South Bronx as much as 25 percent on their bills. In recent months, about 90 businesses a month have applied to the program, up from 25 in the same period last year.

Leonard Fuchs, an executive vice president with M. Tucker Co., a food-equipment distributor moving to New Jersey, says crime was one reason his company decided to move out. "We were broken into two times in one weekend," he says.

But more police and more precautions, such as alarms and dogs, have driven the crime rate down. Lt. Nicholas Dechiaro of the 40th police precinct in the heart of the South Bronx, says statistics show that robberies and burglaries, the most common problems for businesses, are down by as much as 36 percent in recent months.

#### PERSISTENT IMAGE PROBLEM

Some workers still find the streets unsafe, however. "Of course coming to work is dangerous," says Robert Cummins, an employee of Guardsman Elevator Co. "Anything can happen," he adds. "You could be mugged, you could be killed, anything."

That sort of attitude goes along with the area's persistent image problem. American Banknote Co., which prints foreign currencies, has split itself up to accommodate the image. "What we've done," says Robert S. Ivie, vice president, "is keep our executive offices in Manhattan and just have the people on the production end" in the South Bronx. After all, he asks, "Would you want to work in a place where you could be robbed, where your car could be stripped?

Bronx politicians have established forums at local colleges, a complaint hotline at Bronx borough hall and a chamber of commerce committee to help new businesses adjust to the area. Even New York Yankee pitching ace Ron Guidry has been enlisted in the effort to make the South Bronx appeal to companies. Starting this fall, cards in city hotel rooms will inform tourists that they can call a number and hear the Cy Young Award winner describe all the "interesting things to do in the Bronx."

But that venture doesn't stir optimism in

But that venture doesn't stir optimism in everyone. "Not many people are going to be coming up," says Donald DiMuro of the chamber of commerce. "You see," he adds, "it's like the rungs of a ladder—you go down one step at a time and you go up one step at a time. Right now we're just getting off the ground."

# TELEPHONES FOR THE HEARING IMPAIRED

## HON. WILLIAM D. FORD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 16, 1982

• Mr. FORD of Michigan. Mr. Speaker, I was extremely pleased when the House overwhelmingly passed S. 2355, the Telecommunications for the Disabled Act of 1982, on Monday. Upon enactment, this measure will prevent an ill-conceived Federal Communications Commission regulation from taking effect on January 1. This rule would have prevented State regulators from making specialized telephone equipment available to the disabled. This bill will insure that the hearing impaired have access to the telephone system of our Nation.

In our society, the telephone has become more than an integral way of life; it can mean the difference between life and death. This is particularly true for the elderly, who may often be homebound alone, and their only access to the outside world is via the telephone. One-third of Americans over 65 have hearing impairments which require the use of a hearing aid. S. 2355 will insure that newly manufactured telephones will be compatible with hearing aids. In addition, this measure encourages phone companies to provide specialized equipment at affordable prices to people with other physical disabilities. The immeasurable benefits which this legislation provides far outweigh the insignificant cost of this measure.

## THE PEOPLE'S PARADISE

# HON. JACK FIELDS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES Thursday, December 16, 1982

• Mr. FIELDS. Mr. Speaker, some form of socialism/communism is dominant in many nations and every continent. The idea of socialism is especially attractive to intellectuals who are able to maintain a comfortable distance from actual socialist practices.

Though socialism is a god that fails continuously, and causes more human

suffering and tragedy than any idea of practice in history, there are those who stubbornly cling to its high-minded idealism. They religously close up their eyes to the reality that the socialist promise of instant utopia brings only the tyranny of a real dystopia.

It is for them that the following glimpse of reality is provided.

[From Chronicles of Culture, November 1982]

### LETTER FROM PARIS: MITTERRAND'S FRANCE (By Thomas Molnar)

Since I have never traveled behind the Iron Curtain, I can only compare Mitterrand's France with socialist Burma, where Dictator-General Ne Win's heavy hand lies heavily even on tourists. France is not yet a Soviet-style state, but a few verbal snapshots can provide a picture of developments in summer 1982, after twelve months of the present regime.

The setting is in a new building, the office of a leftist-Catholic professor-editor. He has just finished writing his third semiclandestine (samizdat?) "letter to friends," calling on them to resist the ideologues who are demolishing the country economically and culturally. "In this office," he remarks with a wry smile, "we may still speak openly; as far as I know the walls have no microphones."

At France's border with Switzerland many travelers are stripped and searched in order to stop their fleeing francs from reaching the safe-deposit boxes of Swiss banks. Address books are photocopied by customs officials, later checked for names of friends whose monies you may be helping escape. A matchbox bearing the name of a Zurich bank can make one a suspect. Not only are the smaller fortunes fleeing (the big ones escape more officially as "transfers" or "investments"), but new investments—by Arabs, Japanese, Germans—are not forthcoming. One year's socialist-communist management has sufficed to make France's economic future bleak. I talked with young, enterprising businessmen, lawyers, scientists, all of whom contemplate emigration and spend their days devising ways and means to do so. Perhaps Mitterrand believed Pol Pot when he claimed that people are expendable and that one million hard communist Cambodians are enough for the country's future. During the summer, 2,000 gendarmes spread through France, checking for conformity to the postfreeze price of butter and eggs. Meanwhle, the minister of justice freed thousands of criminals after abolishing, through parliamentary majority, his predecessor's semitough law on security. Industries—the ones not yet bankrupt—are working halftime, while hopelessly struggling against worker demands encouraged by the government. Unemployment has risen beyond two million, and the number of those out of work continues to rise. Some expect that the communists might wait for more bitterness, then organize the unem-

ployed into "worker-militias."

Is "communism" indeed Mitterrand's objective? He is known to be strongly against it. A close friend of his whom I queried said that the first adjective coming to his mind describing Mitterrand is opportunist. There may be no contradiction here; the four communists in the cabinet can scarcely do more damage than some of the socialist hierarchs, who are more Marxist than Marx. The whole picture recalls the Allende regime in Chile: fanatic, incompetent social-

ists trying to prove to their communist col-leagues that Muscovite obedience is stifling-whereas socialists bring new techniques and strategies to the pink international. While Mitterrand is increasingly Buddha-like in his inscrutability, his minister of industry and technology, Jean-Pierre Chevènement, a man 20 years younger, emerges as the chief activist and ideologue. Again: is Chevenèment a Marxist? The term is irrelevant, since "we are all Marxists now" and Chevenement represents simply a new, perhaps already international, Marxian activist model. Some 12 years ago, it is said, he wavered between leftish Gaullism and socialism; since then, he has fused the two and combined that explosive mixture with the utopian socialism (Engels dixit) of the French 1840's-Comte, Proudhon, but particularly Fourier. Chevenement's avowed goal-which he admits only in private-is a monolithic France, frugal and efficient, a model for the Third World. He brings to mind St. Just, the fiery young orator of the Revolution who narrowly missed stepping into Robespierre's shoes. Chevenement, whose ambition is limitless, regards himself as a stricter, less literary Mitterrand-and as a future president.

I love France, so I should not be suspected of deliberately painting a dark picture of the country. Voltaire's observation that every man has two countries, his own and France" certainly applies to me. Thus I may close one eye when socialist leaders Quiles and Mermaz (the latter the speaker of the National Assembly) threaten the opposition with the line "heads will roll," or when moderate minister of economics Jacques Delors calls the opposition spokesmen "fascist loudmouths." But I am less tolerant with minister of culture Jack Lang, who ordered that on June 21, 22 and 23 (the summer solstice) France be turned over to "music and fun," with the result that screeching noise filled every arrondissement in Paris, and amateurish clowns stopped pedestrians at every corner. This is the socialist notion of "people's culture," while at the same time serious journalists—if they are critical of public policy-are denied newsprint, and television airs pornography and propaganda—or hour-long analyses of Mit-terand's books. To an unprejudiced eye, the officialization of fun has saturated France with a mood which is obviously morose. The abuses continue: unannounced strikes block vacationers at airports, company executives are sequestered in their offices, an old chateau is burned down by protesting workers. And the regime that once promised paradise now is already shopworn, fighting ridicule with threats instead of positive measures or competence. Even the small bourgeoisie—the country's backbone ever since the peasantry drastically diminished in numbersup in arms. But, unlike the summer of 1789, their anger is turned against the left, supposedly their official representative. From rich man to cafe waiter, they all exclaim: "Monsieur, cela ne va plus du tout, cela ne peut pas continuer!" What do they foresee? It is expected that the March 1983 municipal elections will clearly signify that the nation has had its fill of demagogic promises and catastrophic results. The regime is trying to meet this challenge by redistric' ing, most notably by fragmenting Par (which, for a change, is now in an anti-reve lutionary mood) into 20 independent-and socialist-fiefdoms. But the mayor of Paris, Jacques Chirac, is head of the opposition and a popular man. He asked the obvious question: why not divide Marseilles, too?

The mayor of Marseilles is E. Deferre, minister of interior; the issue was quickly

Mitterrand came to power largely on the implied promise that his would be a "social-ism with a human face," the slogan of the Prague Spring and of the later vogue of Eurocommunism. Those who voted for him in 1981 have had a rude awakening and have yet to digest communist participation in important ministers. My feeling is that if Mitterrand, even now, dismissed the four communist cabinet ministers, popular opinion would turn in his favor. Much of the fled capital might also return. It may be worthwhile, therefore, to speculate on Mitterrand's motives in keeping them on. He obviously regards himself as a leftist de Gaulle, heir to the policy of an alternative to both Moscow and Washington. When he nationalized banks and other enterprises, he reasoned that "in the world of multinationals the government must watch over the country's sovereignty." Next comes Mitter-rand's conviction that France has for too long been a bourgeois country, and must regain a position of leadership among those who look toward a new revolution. This accounts for its aid to and rhetoric about Nicaragua and the like. It should not be forgotten that de Gaulle, too, tried to awaken national consciousness—and a "third option"— from Phnom Penh to Quebec. There is a greater continuity of French policies than meets the eye.

The most frightening aspect of Mitterrand's France is its egalitarian impulse. Igor Shafarevich theorized that socialism is the symptom of a nation's tiredness. I think that is a dangerous half-truth. Egalitarianism is a passion of envy and brutal ambition: in the end, it manipulates and reduces society to a geometrical pattern. A socialist society is not peaceful and passive but restless and combative. Most of the people I talked with in France were either cynical regarding the future ("plus ça change, plus c'est la mème chose") or despairing. But there were others, too, new Jacobins with eyes ablaze at the prospects of drastic change. Chevene ment is reputed to have suggested that all Frenchmen should think alike on issues of national and global import. His acolytes warn—so far, discreetly—intellectuals and professors that debates "in a critical vein," are not desirable. The consequence is, of course, that students spy on teachers, col-leagues report colleagues, journalists, researchers and bankers look over their shoul-

ders when talking, writing, deciding.

An often-heard adjective of Mitterrand's regime is "generous": a new and generous policy, a generous interpretation of the law, mistakes made out of generosity. Let us remember that while sending thousands to be "married to the guillotine," Robespierre had his mouth full of virtue.

STATE OF OUR NATION

# HON. BOB TRAXLER

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES Thursday, December 16, 1982

• Mr. TRAXLER. Mr. Speaker, I want to share with the Members of the Congress an eloquent and articulate capsulization on the state of our Nation. The article which follows is reprinted from the Tuscola County Advertizer, a highly respected weekly newspaper which serves a large rural portion of my district. It was written by Mr. Rudy Petzold, publisher and owner of

the newspaper.

Mr. Speaker, I share this article with you because I was highly impressed, as I am sure you will be too, by the commitment and concern evidenced in this writing about the direction which our Nation is taking. This article truly captures a sense of what is going wrong in our country.

It calls for moderation from the White House and a return to the true basic American values such as compassion, realistic economic policies, fairness to the little guy, a lean, strong and credible national defense, protection for our elderly, and hope for all our youth. I could not agree more wholeheartedly.

This article reflects the unwavering commonsense of the American people. I think it merits the recognition of

this Congress.

[From the Tuscola County (Mich.) Advertizer] TRICKLE-UP (By Rudy Petzold)

Mr. President . . . it's getting awfully tough for us out here to understand what

you're trying to do up there.
Your "trickle down" supply side economics is turning into a major waterfall . . . and a lot of the ordinary folks that trusted and believed in you on election day are wondering whether you've lost your handle on things.

These people-and I was one of them-believed that you would bring sense and moderation to government. You talked sensibly. You talked with compassion. And those were the things that I believed necessary to gradually bring America out of the economic mess it has gotten itself into.

But as time goes on, I am having trouble believing you. And I am having great trouble in understanding your approach.

It took us 40 years to get into the mess we're in-we can't get out of it in less than 40 years. Both you and I are going to be dead and buried before the job is completed. This generation and its children simply cannot make up four generation's worth of free-wheeling.

In the last few weeks I've watched the television shows . . . hungry people, people living in tents, people seeing their little business fold, people suddenly left jobless and without hope. And even that would be bearable if everyone was feeling the bite.

But they aren't. The rich truly are getting richer. The poor are truly getting poorer. And those of us caught in the whipsaw of the middle-class which makes up the country's biggest segment, are feeling themselves sliding and sliding and sliding.

Most of the jobs in America are provided by the middle class that is being destroyed. Most of the taxes that are used to build schools and roads, support churches and charities, build towns and maintain themcome from the middle class that your "trickle down" theory is now destroying.

Instead of building new production facilities and expanding the hard production capabilities of America—the rich are gobbling each other up in endless mergers and takeovers. They sit at their corporate tables playing gargantuan "Monopoly games" and

the little people who built their pyramids and palaces matter not one iota. Only the 'bottom line" matters to them-to hell with the people that create the bottom line.

You brag about inflation being brought under control. Yes, the inflation in the private sector is slowing-but what about the tax hogs of the government? The property tax on my home went up 30% in one year. The property taxes on my business went up 20% in one year. And these increases are at a time when no one wants to buy them, or could afford to buy them. The tax is even higher when related to the declining value both homes and businesses represent in these times.

This "trickle down" business surely has not trickled down to county, township and school tax collectors who have just blasted us with another horrendous tax increase in dollar terms. And still they do not have enough money.

Your paranoia about national defense is disturbing. The MX and the other toys of destruction that the military keeps on wanting are sucking billions and billions of little people's dollars into the cesspool of military extravagance. We need a defense to save us from defense.

This nation has to be strong-but you've got the wrong idea about what strong means. Strength is not determined by the number of swords, but by the will, who wield them. Your bull-headed refusal to back down on the extravagance of military spending destroys a lot of credibility and it disgusts me.

What will the horrible force of destruction defend-if America itself is gutted by the rich and left in economic disaster by bull-headed refusals to moderate the longterm job of reconstruction and rebuilding of our nation's economic strength.

Our business is having the worst times since the depression. We are flowing in red ink. But at least we can still afford the red ink. My heart goes out to the millions of little people, young people, elderly and hope-shattered people who are seeing what little they have evaporate and who are left with the feeling that this land is now run in the interests of the wealthy who live like fat and uncaring pharaohs off the slaves out in the brick pits.

You want to move the tax cut up from July to January 1983. Do it-but divert the entire tax cut to people who make \$25,000 a year or less and exempt everyone whose income tops that. We don't need any more "trickle down" . . . we need some "trickle up.

Give the benefits, the money, the breaks to the little guys-there are millions of them. They will begin spending the benefits, the breaks and the money because they have to survive. Giving them to the rich just sends more gold to their vaults and gives them more chips to play with in their games of corporate wheeling-dealing.

Mr. President, we cannot rebuild America in just four years. We desperately need a strong dose of moderation, the kind of moderation that most of us Americans who voted for you thought we would be getting. WESTERN HEMISPHERE CON-FERENCE OF PARLIAMENTAR-IANS ON POPULATION AND DE-VELOPMENT

# HON. PAUL N. McCLOSKEY, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES Thursday, December 16, 1982

• Mr. McCLOSKEY. Mr. Speaker, at your direction, the Honorable John E. Porter, of Illinois, and I attended the recent Western Hemisphere Conference of Parliamentarians on Population and Development in Brasilia, Brazil, from December 2 to 5.

This conference followed a world conference held in Sri Lanka in 1979 and the earlier world conference in Bucharest in 1974. Delegates from 20 Western Hemisphere countries concluded the conference with a unanimous declaration including the following key recommendation calling on parliamentarians of the Western Hemisphere to:

Establish National Committees of Parliamentarians on Population and

Development which can:

Increase understanding among parliamentarians of the interrelationship between population and development.

Promote a dialog between parliamentarians and social, economic, and population planners and administrators.

Review, propose, and modify—according to the needs of each country—legislation that relates to population

and development.

Insure that all individuals can exercise their basic right to decide freely and responsibly the number and spacing of their children, by providing family planning information and services. Family planning services must be voluntary and be provided in ways that respect human dignity, individual rights, and spiritual values.

Include parliamentarians in official delegations to the United Nations and other conferences, particularly the United Nations Population Conference to be held in Mexico City in 1984.

A copy of the unanimous declaration of the conference is attached:

DECLARATION UNANIMOUSLY ADOPTED BY THE WESTERN HEMISPHERE CONFERENCE OF PAR-LIAMENTARIANS ON POPULATION AND DEVEL-OPMENT BRASILIA, DIGEST, DECEMBER 5, 1982

We, the parliamentarians attending the first Conference of the Western Hemisphere Conference of Parliamentarians on Population and Development

Wish to express our sincere gratitude to the government and people of Brazil for their generosity in hosting this historic con-

The beauty of this unique city of Brasilia is exceeded only by the gracious hospitality of its people and its parliamentarians.

We record our appreciation of the honour of having had his Excellency Aureliano Chaves, the Vice-President, and the Honorable Nelson Marchezan, President of the Chamber of Deputies, perform the opening ceremony of the Conference.

We also record our conviction that the full success of the Conference is due in great part of the magnificent efforts of the Brazilian Parliamentarian Group for the Study of Population and Development and the Brazilian Society for Family Welfare in Brazil, Brazil. To them we express our thanks

#### PREAMBLE

1. We, parliamentarians from 22 countries of the western hemisphere attending the first Western Hemisphere Conference of Parliamentarians on Population and Development, held in Brasilia December 2-5, 1982, having considered the development implications of population dynamics, migration and urbanization, the status of women, and the protection of children:

2. Consider that the goals of development policies as well as population policies are to improve the quality of human life, and the population and development variables are closely linked. Effective development planning cannot be done without considering population phenomena. Likewise, population factors must be harmonized with other

elements of development effort.

3. Acknowledge that development is a complex process which involves many aspects of social, political, economic, and cultural change. Different countries have chosen different paths toward development. Population and development policies must respect the social, cultural, and political characteristics of each country and of each ethnic group within the country. Achievement of meaningful social and economic development implies a fairer distribution of goods and resources within countries and among countries.

4. Recognize that the nations of this hemisphere have accumulated a substantial social debt to their citizens, as indicated by the millions who are without adequate housing, education, health care, nutrition,

and employment opportunities.

# THE CURRENT SITUATION OF THE WESTERN HEMISPHERE

### Population and development

5. The 1982 population of the Western Hemisphere is estimated to be 634 million, composed as follows: Latin America—348 million; Caribbean—30 million; U.S. and Canada—256 million. Although rates of population growth have decreased throughout the hemisphere, tremendous demographic momentum remains. In Latin America and the Caribbean the population is projected to double by the year 2005. This means that by the year 2005, development planners must devise ways to feed, house, educate, employ, and provide other basic services to a new population as large as that which inhabits the region today.

6. Although considerable economic and social progress has been made over the past decade, serious problems of economic growth and distribution of resources persist. Among countries in the region, there is a wide disparity in indicators of development such as per capita income, literacy nutritional status, and life expectancy. Economic growth, which increased rapidly during the 1960s has slowed during the 1970s. Prices for raw materials produced in the region have remained low while the cost of importing manufactured goods from the industrialized nations has continued to increase. Inflation has reached 100 percent annually in some countries of the hemisphere.

7. Rapid population growth threatens to deplete natural resources and to outpace im-

provements in food production. It also seems sure to increase the already high levels of unemployment in the Western Hemisphere, since many countries would have to double their 1950-1980 rate of economic growth to generate enough jobs to absorb those who will be entering the labor force.

#### Migration and urbanization

8. More than 60 percent of the population lives in urban areas. In Latin America, urban migration has grown at more than 5 percent a year and urban population will almost double from now to the year 2005. This rapid urbanization will continue to generate acute problems. Many major cities in the region are characterized by shanty-towns surrounding the "downtown" areas. inhabited by people who live without adequate shelter, sanitation, water and other basic services. The situation is further complicated by high rates of urban unemployment and underemployment in some countries which generate international migration, which is difficult to regulate. In many ways, the region is fast becoming a regional labor market, regardless of immigration laws. The migration of undocumented workers has become an important economic, social, human and political issue in both countries of origin and destination.

#### The status of women

9. Women have not attained rights equal to men in some countries of the western hemisphere. This inequality is manifested in either de jure or de facto discrimination in employment, education, family rights, and political rights. In some countries married women cannot hold property, receive credit, or inherit property in their own names, and even the basic right to regulate fertility does not exist in many countries. The ability of women to plan, manage and control their own fertility is a pre-requisite to equality.

#### The protection of children

10. Children represent the future of our contries, consequently the problems of children in this hemisphere must be of great concern and high priority. Infant mortality remains high, and in some areas one out of every 10 children born die before reaching their first birthday. Although there are wide variations between and even within countries, more than 3000 small children die every day in Latin America and the Caribbean. Deaths of young children could be reduced dramatically utilizing preventive medicine which is currently available. The abandoned child constitutes a most painful social reality in our countries. Behind every abandoned child there is an abandoned family of an unwanted pregnancy. The abandonment, if not addressed, leads to anti-social behaviour. The prevention of abandonment requires policies of economic, social, educational, cultural and moral reinforcement of the family. Assistance to the abandoned child should be provided within the family whenever possible, or in a substitute family, be it by adoption of by foster parents, and only as a last resort by institutionalization.

#### OBJECTIVES

11. In view of the concerns and challenges describes above, the Conference addressed itself to the following objectives:

To promote cooperation and collaboration among parliamentarians of the Western Hemisphere \* \* \*.

To improve the quality of life of the people of the Western Hemisphere, by pro-

moting equitable and rational population

and development policies.

To encourage the adoption of legislation which will rationalize internal and international migration policies, improve the status of women, and provide greater protection to children.

#### A CALL

12. To achieve these objectives, the Conference calls on:

Parliaments of the region to:

Establish National Committees of Parliamentarians on Population and Development which can:

Increase understanding among parliamentarians of the inter-relationship between population and development.

Promote a dialogue between parliamentarians and social, economic, and population

planners and administrators.

Review, propose, and modify-according to the needs of each country-legislation that relates to population and development. Government of the region to:

#### POPULATION AND DEVELOPMENT

13. Strengthen and expand socio-economic development programs and ensure that development is directed toward reducing social and economic disparities, thus helping to build more equitable societies.

Ensure that all individuals can exercise their basic right to decide freely and responsibly the number and spacing of their children, by providing family planning information and services. Family planning services must be voluntary and be provided in ways that respect human dignity, individual rights and spiritual values.

Include parliamentarians in official delegations to the United Nations and other conferences, particularly the United Nations Population Conference to be held in Mexico

City in 1984.

Establish National Population Councils which can serve as a focal point for the initiation and co-ordination of population and development policies.

#### MIGRATION

14. Encourage more balance growth by formulating national and regional development plans which promote the growth of smaller and intermediate sized cities and give priority to development of rural areas.

Improve the quality of life in marginal urban settlements by adopting policies designed to solve the problem and, in any event, to provide basic social services

Support the efforts of the United Nations to conclude an international treaty on international migrant workers, and in the meantime, encourage both origin and destination countries to negotiate bilateral or multilateral agreements in respect of international

#### THE STATUS OF WOMEN

15. Guarantee full equality of women and men under the law and in actual practice. To ensure such equality, family codes, employment laws, and other legislation should be examined and those which discriminate against women or men should be modified. Where appropriate, equality between men and women should be guaranteed by the constitution of each nation.

16. Emphasize in primary health care programs, services for women, including family planning information and services as well as care for pregnant women and lactating

mothers.

#### THE PROTECTION OF CHILDREN

17. Give high priority to those health interventions which can save children's lives and protect their health. Among these are: family planning, immunization, oral rehydration therapy; also implement the recommendation of WHO concerning breast feed-

18. Improve the social and economic conditions which provide a basis for the welfare of children, particularly, housing, nutrition, sanitation, domestic water supply, primary education, recreation and strengthening family structure.

19. Develop programs to reduce the inci-

dence of adolescent pregnancy.

20. Support the Inter American Institute of the Child in its programs to improve and modernize birth registration and adoption procedures.

Governments of the world to:

21. Increase the overall amount of development assistance and, in particular, to increase the allocation of international assistance to social programs including populathe United Nations recommendation that the governments of the developed nations devote at least 1 percent of their gross national product to development assistance, and reaffirms the call of the Colombo Declaration on Population and Development to achieve an annual target of one billion dollars for population assistance in 1984.

Development banks, intergovernmental agencies, and nongovernmental organiza-

tions to:
22. Increase their financial support for government and nonorganizations in the countries of the Western Hemisphere, in order to sustain and expand projects and programs in population and development.

Support the organization of similar conferences in the Western Hemisphere region at least once every three years; and also to support a World Conference of Parliamentarians on Population and Develop-

ment in 1984.

24. Support the establishment of national committees of Parliamentarians on Population and Development and a regional Forum of Parliamentarians on Population and Development which will promote the activities of parlimentarians in the countries of the region and will coordinate the exchange and dissemination of experiences of the various national committees.

#### COMMITMENT

25. We, the Parliamentarians at this Conference, in our capacities as legislators, representatives of our people, and leaders of the community, commit ourselves to:

Create national awareness and under-standing of the relationships between population and development particularly among parliamentarians in our own countries.

26. Promote the formation of national committees of Parliamentarians on Population and Development, and participating

fully in their activities.

27. Request the Steering Committee of this Western Hemisphere Conference to coordinate the actions of Parliamentarians on Population and Development in the Western Hemisphere region; and urge it to maintain close contact and cooperation with the UNDP, UNFPA, IPPF, OAS, UNICEF, WHO, World Bank and other relevant orga-

28. Encourage the passage of legislation necessary to improve the status of women, to provide better protection for children, to rationalize patterns of migration both within and among countries, and to integrate population considerations into development planning.

29. Finally we commit ourselves to initiating and pursuing the actions required to realize the aims and objectives of this Declaration of Brasilia.

INDICTMENT OF CUBAN OFFI-CIALS FOR NARCOTICS SMUG-GLING

## HON. DANTE B. FASCELL

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 16, 1982

Mr. FASCELL. Mr. Speaker, I would like to take this opportunity to bring to the attention of our colleagues a recent development in the continuing fight against illegal narcotics trafficking. Last month a Federal grand jury in Miami handed down indictments against 14 individuals-including four high-level Cuban Government officials-for involvement in the international narcotics trade.

These indictments mark a welcome, forceful step in the struggle by the United States against the international drug scourge. For the benefit of our colleagues, I would like to place in the RECORD at this point two informative articles from the New York Times and the Washington Post.

[From the New York Times, Nov. 6, 1982] U.S. DRUG CHARGES CITE FOUR CUBAN AIDES TEN OTHER MEN INDICTED IN MIAMI IN LARGE-SCALE SMUGGLING

(By George Volsky)

MIAMI.-Four high-ranking Cuban officials, including the chief of the Cuban Navy. were among 14 people indicted here today on Federal charges of smuggling narcotics into the United States.

Stanley Marcus, United States Attorney for the Southern District of Florida, who announced the indictment, said he believed this was the first time an official of the Government of President Fidel Castro of Cuba had been charged with such offenses. He said the indictment was strictly a criminal matter and was not a foreign policy maneuver.

A Cuban official in Washington said today that the charges against the four Cubans were "all lies." There was no immediate comment from Havana.

#### BASED ON 3-YEAR INVESTIGATION

While officials here would not comment for the record, the indictment was preceded by a three-year investigation by agents of the Drug Enforcement Administration.

Peter F. Gruden, head of the agency's Miami office, said the case "is important in view of the substantial amount of drugs involved." According to the indictment, more than 5 million methaqualone tablets and more than 1,000 pounds of marijuana were smuggled into Florida in two separate operations between the fall of 1979 and January 1981.

Mr. Gruden said the four Cubans indicted are presumably in Cuba. It was considered unlikely that the four would come to the United States to face trial.

Eight of the 10 others indicted, mostly Cuban-Americans, were reported in Federal

Before this year Cuban officials have not been linked to drug trafficking. But in April Thomas O. Enders, Assistant Secretary of State for Inter-American Affairs, said the United States had evidence that Cuban intelligence authorities were using drug trafficking as a guise for running guns to guerrillas in Latin America.

The Cubans indicted were:

Vice Adm. Aldo Santamaria Cuadrado, who is also a member of the Central Committee of the ruling Communist Party of

René Rodriguez Cruz, another Central Committee member, who is president of the Cuban Institute of Friendship with the Peoples, the government agency that coordinates activities of foreigners visiting Cuba;

Fernando Ravelo Renedo, who used to be Cuba's Ambassador in Bogota, Colombia, and who is now a high offical in the Foreign Ministry;

Gonzalo Bassols Suarez, minister-counselor in the Bogotá Embassy at the time of the activities charged in the indictment

One of those indicted, Jaime Guillot Lara, a Colombian, is reputed to be an international drug trafficker, and his whereabouts are unknown. He was arrested several months ago in Mexico, charged with smuggling. He is also wanted by Colombia, where he has been accused of smuggling arms from Cuba for Colombian leftist guerrillas. But late last month he was released by Mexican authorities and left Mexico City for Spain, from which he traveled to an unknown destination.

#### NINE CUBAN-AMERICANS CHARGED

The nine others indicted, all Cuban-born Americans, were David Lorenzo Pérez Jr., Hector Gonzalez Quinones, Jorge Felipe Llerena Delgado, Jose Domingo Martinez Valdes, Jose Rafael Martinez, Cornello Ramos Valladares, Alberto Cortes, Levinio Orobio Michelena and Julian Losanda.

Of the nine Cuban-Americans, only Mr.

Losada is at large, according to Mr. Gruden. The indictment asserts that the 14 con-"to commit certain offenses against the United States." Part of the conspiracy was purportedly an agreement between Ambassador Ravelo, Mr. Bassols, Mr. Rodriguez Cruz, Mr. Guillot and others to "use Cuba as a loading station and source of supplies for ships transporting methaqualone tablets and marijuana from Colombia to the southern district of Florida, by way of Cuba."

According to the eight-count indictment, Admiral Santamaria and others "would supervise, in Cuba, the protection and resupply of ships transporting methaqualone tablets and marijuana" from Colombia to the

United States. Admiral Santamaria and Mr. Rodriguez Cruz are known to be close friends of President Castro. Both belong to a small group that was the core of the guerrilla movement under Mr. Castro that overthrew the dictatorship of President Fulgencio Batista in

A State Department source said today that the Justice Department had discussed the case with the State Department before obtaining the indictments. Another State Department official said he could not say whether Washington had been in touch with Havana about the case.

Mr. Marcus also said that once criminal charges were filed against an individual, he could be arrested at any time. "The U.S. may be able to apprehend them in another country," he said.

In response to the indictment of the four Cuban officials, Miguel Martinez, the press officer of the Cuban Interest Section in Washington, which handles Cuban affairs in the absence of an embassy, said today: "It is all lies. There is not a single truth in those allegations and that's that."

Asked to discuss the indictments further, Mr. Martinez said, "We are not going to elaborate.

In a telephone interview, Mr. Marcus, the United States Attorney, said the indictment of the Cuban officials simply represented the "application of American law by the grand jury" and was in no way a foreign policy maneuver. "I'm not involved with foreign policy," he said.

[From the Washington Post, Nov. 6, 1982] FOUR CUBAN OFFICIALS INDICTED IN DRUG SMUGGLING

#### HAVANA SAID HAVEN FOR COLOMBIA GOODS (By Mary Thornton)

Two members of the Cuban Communist Party Central Committee and two other high-level Cuban officials were among 14 persons indicted yesterday by a federal grand jury in Miami on charges of conspiring to import marijuana and methaqualone from Colombia to the United States by way

of Cuba.

The Cuban officials were charged with allowing Cuba to be used "as a loading station and source of supplies" for drug smugglers bringing drugs from Colombia to the United States from 1978 until April of this year.

The indictments marked the first time that Cuban officials have been formally accused of drug trafficking, although there have been widespread reports that the Castro government was heavily involved in smuggling drugs from Colombia to the United States via the communist island nation.

The Reagan administration announced last month that it intended to get tough on drug traffickers by setting up 12 regional task forces covering the country with 1,200 new agents and prosecutors

Drug Enforcement Administration officials said yesterday that they decided to seek indictments against the Cuban officials to draw attention to the role of the Castro government in drug trafficking in the Americas. Sources said there is little hope of prosecuting the Cubans, since the United States does not maintain diplomatic relations with Cuba.

Jim Judge, a DEA spokesman, said the indictments followed a three-year investigation. During that period, he said, Colombians brought into this country 2.5 million pounds of marijuana, 23 million methaqualone tablets, known as Quaaludes, and 80 pounds of cocaine. Those drugs would have a street value of more than \$800 million, officials said. Much of the marijuana and methaqualone came through Cuba.

A DEA source alleged that the smugglers were led by a Colombian named Jaime Guillot-Lara, also indicted yesterday, who is accused of paying off Cuban officials so that his boats could stop at Cuban ports for supplies and refueling.

In return, the source said, Guillot-Lara was allegedly paid by Cuban officials to smuggle arms to the M19 leftist guerrilla movement in Colombia. One of his boats was seized by the Colombian government in 1981 with 100 tons of weapons aboard.

Guillot-Lara was wanted by U.S. authorities for a 1978 drug indictment and by Colombian authorities on weapons charges. He was arrested last year in Mexico City and charged with being involved in terrorist activities. But Mexican authorities released him last month. He fled to Spain and is believed to be in hiding in Europe.

The Justice Department has sent a formal protest to the Mexican government over his

A DEA source said that all of the boats allegedly used in the operation were renamed "Viviana" and that the Cuban navy was under orders not to fire upon any boat bearing that name.

The Cuban officials named in the indictment include:

Rene Rodriguez-Cruz, reportedly an official of the cuban intelligence member of the Cuban Communist Party Central Committee and president of the Cuban Institute of Friendship with The Peoples. It was in the last capacity in 1980 that Rodriguez helped organize the boatlift of nearly 125,000 Cubans to the United States as refugees-including some convicts from Cuban jails.

Aldo Santamaria-Cuadrado, also known as Rene Baeza-Rodriguez, who the indictment identifies as a vice admiral in the Cuban navy and a member of the Cuban Communist Party Central Committee. He "would supervise in Cuba the protection and resupply of ships transporting marijuana from Colombia to the United States by way of Cuba," the indictment says.

Fernando Ravelo-Renedo, Cuban ambassador to Colombia until the embassy in Bogota was closed as relations between the countries worsened in 1980. He is godfather of a 2-year-old daughter of Colombian drug trafficker Juan (Johnny) Crump. Crump is now in the federal witness protection program.

Gonzalo Bassols-Suarez, identified as a former minister-counsel of the Cuban embassy in Bogota and a member of the Cuban Communist Party.

A DEA source said that Rodriguez-Cruz and Santamaria-Cuadrado are both close associates of Cuban President Fidel Castro.

Two of the men indicted were arrested yesterday in Miami. They were Cubans Jose Domingo-Martinez and Alberto Cortez.

Others indicted include five Cubans who are already serving time in American prisons on drug charges: Cornelio Ramos-Valladares, David Lorenzo-Perez, Jorge Felipe Llerena-Delgado, Jose Rafael Martinez and Hector Gonzales. A Colombian named in the indictments, Levino Orobio-Michelena, is also in a U.S. prison on drug charges.

Another indictment listed charges against Julian Losada, who is still in Colombia.

#### RAILROAD RETIREMENT LEGISLATION

## HON. JAMES J. FLORIO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 16, 1982

Mr. FLORIO. Mr. Speaker, I have today introduced legislation which addressed the serious financial problems currently facing the railroad retirement system. As a result of the serious recession this Nation is now in, employment in the railroad industry has dropped by 70,000 in the last year and a half-a decrease far in excess of what anyone could have predicted. This decrease in employment has, in turn, resulted in decreased payroll tax revenues to the railroad retirement SOME COMMONSENSE FROM LLOYD McBRIDE

## HON. JOHN P. MURTHA

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES Thursday, December 16, 1982

• Mr. MURTHA. Mr. Speaker, this week United Steelworkers of America President Lloyd McBride appeared before the Congressional Steel Caucus. His testimony was an excellent presentation of problems facing the steelworkers, and in particular how the TRA program has been cut back to the point where it has been destroyed.

Mr. McBride began with a very concise overview of the steel situation facing our Nation.

The American steel industry and its employees are locked in an economic depression unlike anything since the 1930s. The outlook for the immediate future is bleak and no one has any idea of when or how the steel industry will recover. Many of our members—some 120,000—are facing economic disaster . . . Another fact that you already know is that at a time when our industry is operating at below 40 percent capacity, steel imports are approaching record highs, averaging 22.4 percent of our market which is about 25 percent higher than last year.

Mr. McBride moved from there to look at the cutbacks in the TRA program and how that has adversely affected the steelworkers across the United States. Mr. McBride noted that "TRA was based on the idea that workers who were injured because of liberalized international trade policies should receive special consideration in an effort to help them adjust to changing trade patterns," but went on to conclude "for all practical purposes those special considerations and, in fact, the whole notion underlying TRA have been largely eliminated."

Mr. McBride outlined that since late 1981, the union has filed TRA petitions covering 93 steelmaking facilities. The scoreboard since then shows: 2 cases certified by the Labor Department plus 2 partial certifications; 7 petitions have been denied; 84 petitions remain pending, some for as long as 14 months.

Mr. McBride concluded that:

The combination of adverse administrative actions and legislative cuts have all but eliminated TRA as a viable program for workers subject to trade-related unemployment.

He added these recommendations:

First, review the critieria used by the Labor Department in determining TRA certification in order to identify and correct any flaws in that criteria. At the very least the Labor Department should be requested to review its criteria and methods in light of exising circumstances and steel import levels;

Second, examine the Labor Department's long lag time in making a determination on TRA certification; and

Third, address the question of should we have a trade adjustment assistance program or not. This would involve a series of hearings and investigations that could contribute to any final decision on the TRA program which is scheduled to expire in September, 1983.

I have talked to many steelworkers in the area I represent who are frustrated by this inaction in the TRA program. I believe we need a strong, active TRA program and will certainly be working for that goal in the coming Congress.

OUR FEDERAL BUDGET: A CALL TO ACTION

# HON, JAMES R. JONES

OF OKLAHOMA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 16, 1982

• Mr. JONES of Oklahoma. Mr. Speaker, Robert D. Kilpatrick's speech of December 8, entitled "Our Federal Budget: A Call To Action," merits careful consideration. Mr. Kilpatrick points to the dangers to our economy if we do not control Federal spending and reduce the staggering deficits that we face if we leave the Federal budget on automatic pilot.

Mr. Kilpatrick believes, as I do, that "Americans are willing to do their fair share, to sacrifice if others do, to tighten up if it is done as part of a program to strengthen the Nation." have called for a national needs budget that would encompass some of the recommendations made by Mr. Kilpatrick. I hope my colleagues will read Mr. Kilpatrick's speech because I think it represents a substantial concern that the business community, in particular, and the American people in general have with the need for a sound and effective fiscal policy that will promote economic growth.

OUR FEDERAL BUDGET: A CALL TO ACTION
(By Robert D. Kilpatrick, President and
Chief Executive Officer, CIGNA Corp.)

I very much appreciate the invitation to join you this evening. I know that every visitor who comes to Washington has heard more than his fair share of economics speeches. Therefore, I shall try to be as brief and direct as I can be.

I want to underscore my strong support for the work you are discussing. This conference comes at an important time for me, for the Business Roundtable, and for my company, CIGNA Corporation. If all of the construction industry cost effectiveness recommendations are addressed, savings of \$10 billion a year could be achieved. That means that you've got your eye on the ball. Those kinds of savings are of particular interest to folks like me who are involved in financing and insuring much of the construction of this nation. My company, CIGNA, is very much involved in the development of your business. And indeed we are currently building over one million square feet of new office space for our own use. My own experience is an example of why the Chief Executive Officers of the Business Roundtable are

action. As a result, the Board may face the need to reduce benefits in fiscal vear 1984. Of course, Congress will do its utmost to prevent that from happening. I expect that rail labor and management will come to a prompt agreement on recommendations to solve the financial problems facing railroad retirement and that Congress can act on those recommendations early in 1983. But-let me make this clear-if no agreement is reached promptly, Congress will not sit idly by and let benefits be cut. I am particularly concerned that rail management may believe that no action is necessary at this time, since under the law, benefits are cut automatically if there is a cash

Under section 22 of the Railroad Re-

tirement Act, the Railroad Retirement

Board has the authority to reduce

benefit payments if, in a particular

fiscal year, the Board projects there

will be insufficient funds to pay full

benefits. As a result of the recent large

and thus payroll tax revenues-caused

by the current recession, it is possible

that there will be a cash shortfall in

fiscal year 1984, absent corrective

reductions in railroad employment-

shortfall. As the introduction of this legislation should show, Congress will not let that happen.

However, if the Board is faced with a financial crisis, its sole option at the present time is to reduce benefits. This is grossly unfair to railroad retirees. To remedy this inequity, this bill would amend section 22 of the Railroad Retirement Act to require the Board to raise taxes at the same time

would amend section 22 of the Railroad Retirement Act to require the Board to raise taxes at the same time that it reduces benefits, if it is ever forced to take such emergency action. Under this bill, the tier II—or private pension component—payroll tax paid by employers would automatically increase by 3 percent and the tier II payroll tax paid by employees would automatically increase by 1.5 percent, simultaneously with any reduction in

benefits.

This would result in greater equity, as all parties—including the carriers—would have to share the burden. In addition, the increased taxes would add revenue to the system, minimizing any benefit cuts that would be required. While it is my expectation such emergency action will never take place, it is clear that if it ever does, it is most unfair and inequitable to have railroad retirees bear the full burden of a cash shortfall beyond their control.

While this bill would make any emergency action more equitable, we must avoid the need to take the sort of emergency action contemplated by section 22. Thus, I urge rail labor and management to promptly submit joint recommendations to Congress which address the financial problems of the railroad retirement system.

fully committed to and supportive of the CICE project and objectives.

More important, your business is fundamental to the growth of the nation's economy. We can take some modest pleasure that spending on new construction rose 1.1 percent in October, the biggest gain since June. Some of the other indicators are also beginning to point upwards.

So, there may be some light at the end of the tunnel. Our problem is to make sure it's not merely the headlight of a train coming

the other way.

What do I mean? Simply this. The longterm health of the construction business, the financial services and investment businesses, and of the entire nation depends on the vitality of private capital-raising and investment activity. Yet our national fiscal and monetary policies over the past decade have not been adequately indusive to capital formation.

The problem is clear. We have for many months endured a severe recession. We are showing early signs of recovery. But the federal budget continues to be out of control. We can't afford to carry government spending and debt at these levels and have the needed resources left to restore the private sector of our economy. At current and projected levels of federal budget deficit—\$175 billion in Fiscal Year 1983 and over \$200 billion in Fiscal Years 1984 and 1985-the resources of our country won't be committed to increases in productivity. In 1974 the federal deficit was only \$6 billion, the closest to a balanced budget in the last decade. When compared to the total spending that year the deficit was four-tenths of one percent of the Gross National Product. During the Fiscal Year that just ended, the deficit was \$110 billion and four percent of the GNP. This is a tenfold increase since 1974. At this we will be trapped by servicing the highest debt levels in our history.

I recently attended a meeting with the President at which Martin Feldstein, Chairman of the Council of Economic Advisers, reported that federal borrowing needed to service these deficits would soak up 75 percent of all private savings. I don't need to tell you what that would do to the cost and availability of investment funds for business, especially your business. Every dollar that the Federal Treasury borrows is a dollar that is not being spent on new plant and equipment, money that is not available to put people to work. There would be real crowding out of private investment, just at the time the economy is trying to begin a sustained recovery. That's the train coming

the other way.

The private sector simply cannot sustain such a distortion in federal taxing and spending. When the cost effectiveness study was initiated four years ago, how many of you would have contemplated federal spending in excess of \$2 billion a day? In the 1984 fiscal year we will edge close to our first trillion dollar budget. Since 1975, federal spending has more than doubled and is consuming a larger portion of the GNP.

Let me give you a snapshot of the federal budget. The automatically appropriated entitlement programs—Social Security, Medicare, Medicaid, Veterans' Benefits, Food Stamps—when added to contracts that the federal government has become obligated for, amount to 45 percent of the budget. Social Security alone—the largest single entitlement—amounts to 23 percent of the

budget.

The second category is national defense. Defense spending accounts for 29 percent of the budget. Add the 14 percent of the budget which is the necessary interest to pay for the debt, and we find that a staggering 88 percent of our three-quarters of a trillion dollar federal budget is in the so-called "untouchable" area.

These so-called uncontrollables or sacred cows cannot be sacred any more. We simply will never see another balanced budget without reductions in the planned increases for defense and Social Security which are each scheduled to exceed \$1 trillion over the next five years. We simply do not have enough discretionary programs with room left to be cut.

I have described this composition of our budget to make a basic point. The federal budget is virtually on automatic pilot, and it's headed toward disaster. The problem is not just restraining spending. It's worse than that. The problem is cutting back on the pre-programmed spending which already consumes 88 percent of the budget, is growing steadily, and will require positive action to be brought under control. There are some obvious solutions, and I will discuss them briefly. Our difficulty is not in recognizing what must be done, but in putting our national interest above the political difficulty of taking the action needed.

For a Senator or a Congressman or a business leader to recommend changes in entitliments or defense or revenues is to invite harsh criticism. That's understandable. People fear changes in entitlements, our defense is vital to our security, and we are already taxed heavily. The point is that there is a greater danger than inaction, and that is the crippling effect of triple digit deficits. We have to discuss the national interest in the face of such a threat. I believe the President is the best defender of our national interest and the single person best suited to take unpopular steps for the country's interest.

I strongly believe that Americans are willing to do their fair share, to sacrifice if others do, to tighten up if it's done as part of a program to strengthen the nation. The President will find that the American people prefer strong leadership with bad news but a way to solve the problem. I think a major television address describing the dimensions of the serious crisis we face would produce political support for the President's efforts.

What must be done? The answer is everything! This means a balanced economic package which takes something from all of us and to which we all contribute.

Further reductions in spending must be the first priority. I realize that Congress and the Administration have teamed up during the past two years to begin to turn back the spending patterns of the last twenty years. But we simply have not gone far enough, as our triple digit deficit makes clear. And some dublous reductions, through such practices as overestimating management savings or tax receipts, or by shifting costs between sectors, are not the answer. Tough program reductions on an across-the-board basis, with no area of the budget being held sacrosanct, are what is needed.

Take Social Security, for example. Benefit growth has grown dramatically in recent years. In 1970, Social Security expenditures were \$34 billion and consumed 17 percent of the federal budget. Today those costs are \$172 billion, and they absorb over 20 percent of the budget. Unless growth is slowed, it is projected that Social Security costs will total \$400 billion by the end of this decade.

To pay for these benefits, workers and employers have been forced to shoulder an incredible weight. In 1970, the maximum posible tax on a worker was \$374. Today, it is \$2,170 and by the end of the decade it will be almost \$8,000. As we so well know, this tells only half the story because each employee dollar is matched by one from business.

Even though some individuals pay more Social Security taxes than federal income taxes and even though Social Security taxes are adding weight to business's burden during a time of record business failures, the Social Security system is going broke. Actuaries predict that the retirement fund will require an additional \$75-200 billion over the next five years. And the picture for the long-term is even bleaker. Where five workers are barely able to support one today, only two-and-one-half workers will be around to pay for each beneficiary in forty years.

Let me deal candidly with the element of fear in discussing Social Security. We are not talking about cutting benefits. We are talking about preserving the Social Security system so that current beneficiaries receive their checks. And we are talking about the changes necessary to ensure that today's young people have a solid system intact for their retirement. That basic security is essential. We cannot have it if we continue to expand without control. We will have to grow more slowly. We will have to restrict the rate of increase in benefits. We must do this to save a system which faces bankruptcy. The American people, I am sure, will choose a healthy Social Security system expanding more gradually to one on the rocks which threatens our future security. That's the hard truth, but if we face it we can protect both our elderly and our youth.

The other large area of federal spending is defense. Defense is the single most important part of our budget. It's the one category we can honestly say must come first, because without a strong national defense in this world all else is threatened. But national security also requires a strong national economy, and our economy is threatened by the crushing weight of our deficits.

Current budget requests call for defense spending to double by 1987 when it will consume 31 percent of the federal budget and 9 percent of GNP. While I support a strong defense I also underscore that our federal budget cannot admit any sacred cows. Unless we change the projected growth in defense spending it will grow twice as fast as all other federal spending during the next five years. I know that we can remain strong and yet grow more slowly. As part of a fair package of budget reform, defense must be included.

Slowing the growth of entitlement programs and defense spending simply cannot be avoided—I repeat, cannot be avoided.

As I observed, entitlements, defense, and interest on the debt amount to over three-fourths of the federal budget. There just is not enough room in the rest of the budget for significant spending cuts which will reduce the deficit. Let me give you an example. You are well aware of the Administration's aggressive campaign to curtail waste, fraud, and abuse. The Administration now calculates that its effort has saved \$8 billion—an impressive achievement, but not much of a dent in a \$175 billion deficit. If we continue to concentrate on only non-defense and non-entitlement spending, whole programs and departments will have to be eliminated, including education, conserva-

tion, housing assistance, road construction and foreign aid. I think you will agree that this is a fruitless endeavor. If there is one message I want you to take away this evening, it is that entitlements and defense spending must be subjected to the same budget discipline that has already been visited upon the discretionary parts of the budget.

Finally, let me talk about taxes. Business strongly supported the steps taken by the Administration and Congress to spur investment, savings and capital formation in 1981 even though we thought further business tax incentives could have been added. Many in the business community also reluctantly lined up behind the President earlier this year in support of the 1982 tax bill as a means to reduce the projected budget deficit below a \$100 billion threshhold, even though many viewed the legislation as a retreat. I personnaly do not think further tax increases are the answer. Additional taxes on business will only serve to deter our economic recovery and future growth. Spending cuts must be the first priority. Yet in the vein of common sacrifices for the national good, revenues may have to be part of a general package designed to attack the deficits.

The bottom line of my message to you tonight is a call to action—a call for action by the President, the Congress and the business community. Only the President can take the lead to effectively restrain budget growth. He has to communicate to Congress and the American people that uncontrollable deficits are unaffordable.

As for Congress, the political squabbling must end. Congress must begin to work with the President on a bipartisan basis. Only immediate action to slow the growth of entitlements and defense will send the right signals to the marketplace and the financial community. We must see a convincing pattern of future deficits sloping toward zero.

The nation badly needs a broad public constituency behind the drive for budget constraint. Business must put management of the federal deficit at the top of its agenda, and so must every other interest group. It's simply too important to leave to someone else, and there is not one else. Nor is there more time. We're about to begin 1983. It will be a critical year. And before it ends, the politics of 1984 will be with us. The time for action is right now! It is your job and my job to do whatever is necessary to convince members of Congress and the Administration that our country cannot afford the budget deficits facing us in the next few years. I am confident that our country will not hide from reality and ignore a real danger. The danger is here, and I invite all of you to put the national interest first. Let's stand up for our future and be remembered as having shown political courage when it mattered.

SOVIET WATCH: SPEAKING OF BREZHNEV AND DEATH

# HON. JACK FIELDS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES Thursday, December 16, 1982

• Mr. FIELDS. Mr. Speaker, I enter into the Record the following for the benefit of our colleagues:

[From the Washington Times]
Speaking of Brezhnev and Death

(By David Brudnoy)

Boston.—All tyrants should go out to such pleasantries. Of Leonid Brezhnev it was said that he was "a lusty and vigorous man" (John J. McCloy), that he was "a warmhearted man" (Armand Hammer), that his life was "meritorious" (President Mauno Koivisto of Finland), that he was "well-briefed" (Haroid Wilson), that he was a "dedicated leader who relentlessly worked for his country" (Egyptian Minister of Foreign Affairs Boutros Ghali), that he "devoted every effort to world detente and to the strengthening of cooperation between states" (UN Secretary General Javier Perez de Cuellar).

Jimmy Carter and Ronald Reagan mouthed pap that amounts to nothing, but Richard Nixon said the truth of Brezhnev: "As a Russian he was warm, effusive and ebullient. As a communist, he was a ruthless schemer and relentless aggressor." Gotta hand it to Dick Nixon, he knows how to put those world leaders into perspective. (See Nixon's recently published book on leaders if you have any doubt about that. In fact, make no mistake about it....)

The art of saying nothing ill of the dead is venerable, probably more than casually useful in the world of diplomacy, and yet so at variance with the commonly accepted canons of truth that, presumably, normal people never quite get the hang of it, except maybe when some relative they've always loathed dies and they have to face the bereaved and not grin.

Examples of utter balderdash uttered about the recently departed are legion and certainly anybody can think of some that particularly tickle the funnybone, though possibly our contemporary eulogizers, like those quoted on Brezhnev above, would best be able to speak nothing but good of the dead of all ages. Consider some choice reflections on the recently dead by that paragon of rectitude and even-handedness, the secretary general of the United Nation, Sr. Perez de Cuellar, who thinks Mr. Brezhnev "devoted every effort to world detente and to the strengthening of cooperation between states."

Of Lizzie Borden, Sr. Perez de Cuellar would say: "She honed her household utensils as she honed her wit, and drove deeply into the consciousness of her parents, leaving an indelible impression on them as on her community."

Of Tokyo Rose, the good secretary general would say: "She devoted her life to informing a waiting, watching world of events throughout the world, bringing messages of comfort and welcome to lonely hearts of lonely valiant soldiers far from their homes and much in need of succor."

Of Attila the Hun, friend Javier Perez de Cuellar would say: "He strode forth with determination and firm insistence on upholding his values and those of his people, and in bringing the message of the Hunnish people to neighboring lands, he saw to it that no stone was left unturned lest anyone be ignorant of his purpose."

Of Pontius Pilate, the chief officer of the United Nations would probably have said, if given the chance: "He stood foursquare for the brilliant value structure of the empire which he served so nobly, and in carrying out the sometimes awkward assignments that fell to him owing to his high station, he always gave the people a choice so that they, too, could participate in the affairs of

state. His best remembered trial ensured him a place in the history of mankind."

And one day, of the likes of Sr. Perez and those others who can't call a mass murderer, like Brezhnev a mass murderer, may it be said: "They hadn't a clue about common honesty and intellectual decency, and they went out sniveling like the hypocrites that they were."

#### TRIBUTE TO BESS TRUMAN

# HON. WILLIAM D. FORD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 15, 1982

• Mr. FORD of Michigan. Mr. Speaker, the death of Bess Truman saddened me a great deal. She was an outstanding woman who lived a long, full life, and was loved and respected by people all across the United States.

Although quiet and unassuming, Bess Truman left her mark on America. The former First Lady was best known for her quiet dignity and her marvelous sense of values. I think that the Washington Post editorial on Bess Truman expresses my thoughts very clearly. I would like to call it to your attention at this time.

#### ELIZABETH WALLACE TRUMAN

Women under 30 may wonder why Bess Truman, who died in Kansas City, Mo., this week at the age of 97, was an object of such affection and respect for those with a memory of postwar America. Surely she was not a political power in her own right, like Eleanor Roosevelt, or glamorous and exciting, Jacqueline Kennedy. She had no causes of her own, no protégés, no press conferences. Her husband said she looked "just the way a woman who has been married 25 years should look," and she described the role of first lady as requiring that a wife "sit beside her husband, be silent and be sure her hat is on straight." Why, then, was she so special to us?

In the years immediately following the turbulence of Depression and world war, Americans found reassurance and inspiration in the virtues Mrs. Truman personified. She was from the heartland and appeared to cherish all the good values of small-town America that we like to believe are universal in this country. She was warm, modest, friendly and home-loving. Her family came first, and that feeling was reciprocated by her husband and daughter. There is something touching about childhood sweethearts who marry, have a family, live in a white clapboard house and are still holding hands and enjoying private jokes on their 50th wedding anniversary. If President Truman held a personal grudge against anyone— public figure or private citizen—who had anything bad to say about his "girl," as he called his wife, we think better of him for it, and envy her.

Mrs. Truman had a sense of duty, dignity and quiet pride, and a sense of proportion. She was correct and gracious about everything she did in the White House and she served the country and her husband well. When it was all over, she was delighted to return to Independence, to her friends and to privacy. Within hours of leaving office, she was telling the former president to "go

up into the attic and put away the suit-

In each of our families there is a woman who looks rather like Bess Truman and who embodies the same down-to-earth virtues. She reminds us of someone we love—a mother, a teacher, a favorite aunt. We mourn her not so much as a public figure but for what we knew of her private role as a wife, mother and model for so many women of her generation.

### GARY A. LEE

# HON. DONALD J. MITCHELL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 14, 1982

• Mr. MITCHELL of New York. Mr. Speaker, I would like to take this opportunity to pay tribute to my colleague and good friend, Congressman Gary A. Lee. Although Gary will not be returning to Congress in 1983, he has certainly left his mark during the two terms he has served in the House of Representatives.

Gary came to Congress in 1979 with a solid background in State and local government. Drawing upon this experience, as well as his immense reserves of energy, imagination and enthusiasm, Gary became an active and ag-

gressive Member of Congress.

During his years in House of Representatives, GARY has been a forceful advocate of restrained and responsible Federal policy. With an ever-watchful eye, Gary has closely guarded the concerns of American taxpayers and citizens. As a member of the Energy and Commerce Committee, he worked to acheive an orderly transfer of the Conrail railroad system to private ownership. As a member of the House Administration Committee, he has kept a close watch on the practices and policies of this legislative body. He has fought welfare fraud and abuse. He has proposed serious reform of congressional compensation procedures. He has represented his constituency well and effectively. He will be missed.

I wish him much good fortune in all future endeavors. I am sure he will be as successful in them as he was here in the House of Representatives.

# THE UNDEMOCRATIC HOUSE

# HON. WILLIAM E. DANNEMEYER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 16, 1982

• Mr. DANNEMEYER. Mr. Speaker, it is indeed a bitter irony that, at a time when the American public grows increasingly weary, restless, and angry because they feel that—regardless of who is in power—their voices are not heard here in Washington, the majority party finds a way to make these

voices even less audible. Rather than fashioning a more democratic (with a small "d") system whereby the public will can at the very least be given a proper hearing, the majority is attempting to further circumvent any such contact with the "rabble" of this Nation.

This autocratic power grab, under the guise of innocent-sounding "rules changes," is somewhat reminiscent of previous governments in history which retrenched when confronted with the stirrings of popular democratic spirits. And, if we recall that history, those governments were ultimately over-thrown by those same citizens whose rights had been abridged and whose yearning for some element of democracy had been stifled. France, Austria, Russia, Germany, Italy-most of continental Europe suffered the consequences during the 19th century. And of course there is always the example of how a few contemptuous brigands had the gall to rebel when they were forced to pay taxes without being properly represented

This body has already suffered years of inequity due to the failure of the majority to provide committee memberships in proportion to party ratios in the whole House. This has been bad enough; considerable legislation has waltzed through committees which otherwise would have undergone more diligent scrutiny had committees been

properly apportioned.

But this adds insult to injury. Proposed rules changes will impose nothing less than one-party rule here in the House. Naturally, from the perspective of the majority party, it will be easier to pass legislation favorable to that side, the changes will facilitate the handling of controversial matters, and the legislative process will, ostensibly, be speeded up. But there are risks for the majority as well. There will no longer be any doubt in the public mind where responsibility will rest for every measure that passes muster under these new rules. Every thwarting of the public will-be it the stifling of balanced budget constitutional amendments or the ramming through of odious appropriations schemes-will bear the indelible stamp of the majority party upon it.

The attached statement issued December 10 by the House Republican leadership spells out the proposed changes and why they serve to undermine democracy in this body. This action is a travesty of governmental ethics and makes a mockery of our democratic process. And it is certainly beneath the dignity of any party which calls itself Democratic with a capital "D."

# STATEMENT BY THE HOUSE REPUBLICAN LEADERSHIP

The proposed changes in House rules adopted by the Democratic Caucus this week are an exercise in political expediency

that will concentrate more power in the hands of the Speaker and further erode the democratic process in the House.

These new rules extend years of steady and systematic assaults on free and open debate and the rights of the minority in the House.

To deny Members of either party their right to influence the expenditure of public funds or vote on the merits of proposed Constitutional amendments or be alerted to and informed of critical legislative issues before the House is inexcusable and indefensible.

There is a clear distinction between rules changes designed to streamline and expedite legislative proceedings and those intended to subvert the process. The Democratic rules changes make no major contribution to the improved management of the House or the flow of legislation, but they do make major assaults on the Members' abilities and rights to influence the legislative process.

Making the House of Representatives more effective and more productive cannot be the ultimate goal of rules that muzzle the Membership.

Specifically, the amendment to Rule XXI, Clause 2, restricting riders to appropriation bills in order to limit use of public funds, deprives Members of all political persuasions of their ability to exercise full oversight responsibility. Deryng that right is a mock-

The advent of omnibus appropriation bills and budget resolutions makes the need for limiting amendments even more critical. These rules changes virtually disenfranchise anyone who disagrees with spending levels reported from Committee unless, of course, the Democratic Leadership itself sanctions an amendment to reduce spending.

The new rule requiring a two-thirds majority vote on the discharge of a Constitutional amendment is an outrageous attempt to prevent any consideration of Constitutional change that does not conform with the will of the Democratic Leadership. The House must be given the opportunity to consider, debate and vote on the merits of Constitutional change in accordance with the intent of the founding fathers, who saw the need for such deliberation.

The intent of the Constitution is also thwarted by rules changes which prevent the call of a quorum to the floor prior to

consideration of legislation.

The Constitution's Article I, Section 5, specifically instructs the Congress to have a quorum present to conduct business. Postponement of votes on the Journal and eliminating votes on consideration of bills would allow the Democratic Leadership to conduct legislative business without the Constitutionally-required majority quorum. These new rules merely perpetuate "phanton legislating," and enable the Speaker to stampede the House into actions it may regret.

Rules such as these do an injustice to the House and thwart the legislative process.

They must not be adopted.

### SUMMARY OF DEMOCRATIC CAUCUS HOUSE RULES CHANGE PROPOSALS, 98TH CONGRESS

(1) Appropriations Riders Restrictions.— Clause 2, Rule XXI would be amended to prevent the offering of limitation amendments on the Floor unless already authorized by law for the period covered by the bill or if the House votes down a motion that the Committee rise after other amendments have been disposed of. Limitation amendments could still be reported by the Appropriations Committee. The amendment also confines "retrenchment" amendments (e.g., those reducing salaries and personnel) to reductions in amounts of money covered by a bill, and to those recommended by the Appropriations, thus precluding authorizing committees from offering retrenchment amendments on the Floor.

- (2) Resolutions of Inquiry.—Clause 5, Rule XXII would be amended to permit committees 14 legislative days to report back to the House after referral of such a resolution requesting information from the heads of executive departments, and permits a committee, by majority vote, to extend the period for reporting by an additional 14 legislative days. The current rule permits only 7 legislative days for reporting back to the House, after which a motion to discharge the committee is in order.
- (3) Closed Hearings.—Clause 2(g)(2)(B), Rule IX, would be amended to permit the Committees on Appropriations, Armed Services and the Select Committee on Intelligence to vote in open session to close hearings for up to seven consecutive days. Current House Rules permit all committees to vote to close hearings for two consecutive days.
- (4) Resolving into the Committee of the Whole House.—Clause 1, Rule XXIII would be amended to permit the Speaker to declare that the House is resolved into the Committee of the Whole House on the State of the Union at any time after the House had adopted a resolution from the Rules Committee providing for the consideration of a measure. Under present rules, the motion is subject to a vote by the House.
- (5) Approval of the Journal.—Clause 5(b)(1), Rule I would be amended to permit the Speaker to postpone a vote on the approval of the Journal until later in the same legislative day. Under present rules, approval of the journal is the second order of business in a legislative day and a vote may be demanded immediately.
- (6) Committee Membership.—Clause 6, Rule X would be amended to make removal from committee membership automatic once a Member ceases to be a member of his party caucus or conference. Member would still be elected to committees by vote of the House on nominations from the party causcuses. Under the interpretation of present rules, it would take a vote of the House to remove a Member from a committee.
- (7) Tax Legislation.—Clause 5, Rule XXI would be amended to prohibit non-tax committees from reporting any measure containing tax or tariff matters and the House from considering any amendment in the House or proposed by the Senate on a bill reported by a committee not having jurisdiction over tax matters.
- (8) Constitutional Amendments.—Clause 4, Rule XXVII would be amended to require that a discharge motion for an amendment to the Constitution, or a resolution referred to the Committee on Rules providing for the consideration of a constitutional amendment, must contain the signatures of two-thirds of the membership of the House in order to be called up in the House.

STATE OF NORTH CAROLINA IS COMMENDED

## HON. IKE ANDREWS

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES Thursday, December 16, 1982

• Mr. ANDREWS. Mr. Speaker, I am pleased that the outstanding public university system in North Carolina comprising 16 campuses with the excellent "flagship" University of North Carolina at Chapel Hill has been recognized by an editorial in the Washington Post as having raised the level of education and maintained excellence in the higher education system while at the same time lowering costs. Since its inception in 1785 and in article 9 of its constitution adopted in 1868, public education has been valued

in North Carolina. I am respectfully inserting the attached editorial from the November 21, 1982, Washington Post in the Con-GRESSIONAL RECORD of Thursday, December 16, 1982, along with my commendation to Gov. James B. Hunt, Jr., President William Friday, Chancellor Christopher Fordham, Chancellor Bruce Poulton, and the other chancellors of the other members of the University of North Carolina system, and all those who share a part in this excellent record in higher education in North Carolina. Certainly, all of us in the Old North State can take pride in maintaining a high level of education while at the same time lowering costs. This is a notable record which we

trust can be enjoyed by every State. [From the Washington Post, Nov. 21, 1982]

TUITION, FEES AND QUALITY
From time to time, various listings and guides rank the colleges by tuition and the cost of a year's education. It's generally pretty depressing, especially for the parents of children in their last years of high school. Most of the attention generally goes to the top of the list, a position currently occupied by Massachusetts Institute of Technology, where tuition and fees now run \$8,700 a year, and the total cost of a resident undergraduate is around \$13,500. But it's more interesting to look down the list for those institutions that maintain superior standards while managing, somehow, to keep the price down.

The leader in that more difficult test, among the large universities, is the University of North Carolina. Tuition and fees there come to \$702 this year for local students. (Those who are not fortunate enough to be North Carolina residents are charged a less unusual \$2,260.) Including living expenses and all, a resident student can typically get through the year on \$3,800. Throughout the country, on the average, college costs in both public and private institutions have been rising at just about the rate of inflation, which is to say that in the past four years, they have gone up by nearly half. At the University of North Carolina, they have gone up by less than a third. Why does the student pay less? Because the state pays more.

Public education is a creed and a passion in North Carolina. The people of the state make it a point of pride not only to run a university that is manifestly one of the finest in the country, but to keep its doors open to students who haven't much money. North Carolina is not a rich state, but it has clear ideas about priorities.

Here in Washington, there is much urgent talk about the need to strengthen the national economy and the country's technological base. That talk usually drifts eventually toward tax gimmicks to push companies into more industrial research. How about investing that money, instead, in the people who are going to be running the companies and doing the research?

Congress, so far, has done a fairly effective job of protecting the student-aid programs from the administration's budget-cutters. But much of that aid is delivered in the form of loans, which means that young people emerge from four years of college with substantial burdens of debt. As public policy, that practice grows more questionable as the tuitions, and the debts, grow larger. A more useful and elevated example can be found in North Carolina, where the state keeps the threshold costs low and collects its interest in the broad benefits of a rising level of education.

### ENERGY CONSERVATION COALITION

# HON. JOHN D. DINGELL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES
Thursday, December 16, 1982

- Mr. DINGELL. Mr. Speaker, on Monday of this week I attended an awards reception sponsored by the Energy Conservation Coalition, which is a 2-year-old organization consisting of many groups dedicated to sensible energy policies and environmental protection.
- I was extremely pleased to see my good friend and colleague, Mr. Ottinger, who chairs the Subcommittee on Energy Conservation and Power of the Committee on Energy and Commerce, receive the group's annual energy conservation award. As Deborah Bleviss, president of the ECC said:

1982 will be remembered as the year when foreign oil imports reached their lowest levels since 1974, but we cannot count this as progress as long as recession, not efficiency, is reducing demand. Dick Ottinger understands this problem. He is one of Congress's strongest proponents of a least-cost energy strategy to stimulate a growing na-tional economy while keeping our energy bills and oil imports to a minimum. He is a leading advocate for weatherizing the homes of poverty families, saving them and the nation millions of dollars in unnecessary energy costs. His persistence and dedication to the goal of an energy efficient society deserve particular praise at a time when many have become complacent about this country's energy needs.

I second Ms. Bleviss' remarks, and commend my good friend from New York for his continuing efforts on energy, and congratulate him for his receipt of the Energy Conservation Coalition's award.

The ECC made a second award presentation at its reception on Monday, and this was to the Wallingford Auditing Technical Team, of Wallingford, Conn. This group consists of some 21 high school students and their dedicated teacher, Carol Wilson. After performing energy audits of the various school buildings in the Wallingford school district, the group reduced heating oil consumption from 711,000 gallons to 492,000 gallons, and reduced electrical consumption by a million kilowatt-hours, which saved the local taxpayers a whopping \$260,000. The cost of achieving this was a meager

I was fortunate on Monday to meet some of these youngsters, many of whom are now energy auditors certified by the State of Connecticut, and to talk with them about their accomplishments. The possibility of seeing their efforts duplicated in other communities across the country is very exciting, and I want at this point to share with my colleagues a short paper describing what WATT has done, which was prepared by Carol Wilson, the energetic and marvelous lady who organized the group. I ask unanimous consent that "Teenagers as Energy Advocates" be inserted in the Record at this point.

# TEENAGERS AS ENERGY ADVOCATES (By Carol A. Wilson)

Wallingford, Connecticut has been fortunate to have an unusual group of teenagers, whose enthusiasm and concern for energy conservation has saved the community's schools over half a million dollars in two years.

The students, who call their group WATT (Wallingford Auditing Technical Team), did energy audits of schools and municipally-owned buildings. Their recommendations were heeded by the school board, with no expectation that any substantial savings could be achieved. To the amazement of all, in the first year oil consumption was reduced from 711,000 gallons to 492,000 gallons, and electrical consumption was down more than 1,000,000 kilowatt-hours. In the second year, similar savings were achieved. The dollars invested to achieve these savings were minimal, less than \$12,000.

Publicity about WATT's success, and efforts to tell the community how energy might be saved, have made Wallingford unusually energy-aware. In addition, teenagers in this New England community are viewed as worthwhile, contributing citizens, instead of nuisances.

WATT has received two grants to promote their efforts. They are presently making a videotape of the development of their group so that other communities can develop similar groups.

Imagine an energy conservation program that saves more than \$500,000 in two years, with an investment of less than \$12,000. Impossible? Not at all. This was accomplished in a New England school system—and by a group of high school students and their science teacher. What was done can be duplicated in any high school in the country.

The community where this happened is Wallingford, Connecticut, a town of 36,000 people which dates back to the seventeenth century. It is proud of its colonial roots and its tradition of Yankee independence. Perhaps this is why the town fostered an unusual group of teenagers, teenagers who have helped the community become energy aware, and have saved the town substantial energy dollars.

The students call themselves "Wallingford Auditing Technical Team" (WATT). Members range from ages 13-18, freshmen to seniors, both male and female. The goals of WATT are to reduce energy waste in the schools, to increase awareness of the potential for conservation in all buildings of the community, and to educate people about the potential for renewable energy sources.

WATT grew from a classroom study of energy in grade 9 Earth Science. Reinforced by world events and attitudes acquired at home, these young people expressed a need to affect the energy future of their community. The summer of 1979 was spent struggling to do an energy audit of a middle school. An energy audit is a scientific analysis of energy use in a building. An auditor needs knowledge of heating systems, building materials, and building use patterns. The middle school audit showed many areas of energy waste. The students took their findings to the school board, and urged that a vigorous energy conservation program be instituted. The school board was doubtful that much energy could be saved, but appointed the students and their teacher as the Energy Management Committee for the school system. A custodian was designated Energy Conservation Officer to work with them.

WATT continued auditing schools and made recommendations based on these audits. Many of the students and their teacher became State Certified Energy Auditors. This certification made the town eligible for funds to pay for the audits through the Schools and Hospitals Program.

WATT conducted workshops for teachers of several schools in the community, in an effort to involve building users, both teachers and students, in the conservation program. Peer pressure was used to motivate schools to save electricity. Arrangements were made to have WATT receive copies of each school's electric bills. Usage was compared with that of the same period of the previous year, and the percentage of decrease or increase was noted. The schools were ranked in order of improvement, and copies of the rankings were sent to each school principal. In the first month, about half of the schools showed an increase, and half a decrease. After the initial report came out, there was a marked change. In the second month, only three of the schools had an increase, and ten a decrease. For the rest of that school year, no school showed an increase, and the school system saved more than a million kilowatt-hours of electricity without spending one cent.

WATT found that positive reinforcement was an effective tool in encouraging behavioral changes. Teachers and students who cooperated by reducing their energy use were commended publicly. Those who did not cooperate were not mentioned. It became desirable to save energy because you received recognition for your actions.

The Energy Conservation Officer met frequently with WATT, and acted on their suggestions. He closely monitored oil use, checking to see that temperatures were set back one hour before the close of school. Custodians were taught at monthly meetings how to manage their heating systems.

On days when warm temperatures were forecast furnaces were not turned up to 65 degrees in the morning, the anticipation that the sun would warm the building sufficiently. Serious leaks in building envelopes were repaired, furnaces were cleaned regularly, lighting was brought down to new state recommended level by the removal of excess bulbs and ballasts, and air conditioning was limited to occupied areas of the buildings.

The results of this program surprised everyone. In the first year, oil consumption was reduced more than 200,000 gallons, and electrical consumption was reduced 1.17 million kilowatt-hours. This saved the taxpayers of Wallingford more than \$260,000. The cost to the school board was the salary of the Energy Conservation Officer (less than \$9,000) and materials costing approximately \$3,000. In the second year, there was no Energy Conservation Officer because the school board did not fund the position. However, oil consumption remained down 175,000 gallons from the year prior to WATT, and electrical consumption remained about one million kilowatt-hours between the 1978-79 year. This saved another \$260,000 plus. Total dollars saved by the Wallingford schools now total over half a million dollars.

WATT also performed energy audits of all municipally-owned buildings in Wallingford, schools in Connecticut communities which had no Certified Energy Auditors, churches, business establishments and homes. An Appropriate Technology grant allowed WATT to sponsor an Energy Fair as a means of putting information about conservation and renewable energy sources into the hands of the people of the community. Publicity about the success of the WATT program has made the community unusually energyconscious. The new Wallingford library gets 30 percent of its heat from the sun, and has solar-heated water for domestic use. Many energy conservation measures were incorporated into this new building, and WATT was invited to recommend energy-saving measures prior to its opening.

In September of 1981, the Governor of Connecticut recognized forty companies in the state for outstanding energy conservation programs. Five of these awards went to Wallingford companies, the school system among them. A community with one percent of the population of the state has received 12½ percent of the awards.

The WATT members have benefitted from the program. They have learned how important and effective a knowledgeable individual can be. They have developed leadership qualities far beyond their peers. They have gained academic skills in communication, organization of both time and information, mathematics, geometry, and physics. They have been recognized by their community and peers as an energy resource, and have done much to remove the barrier between senior citizens and teenagers. They have gained insight into career opportunities, and have gained a marketable skill. Many of them have earned money for doing energy audits.

WATT continues to find ways to help people learn about saving energy. WATT has worked with the Connecticut Energy Division in planning and presenting workshops aimed at developing groups similar to WATT in other Connecticut high schools. WATT members have made presentations at state and national conferences on energy and science education. WATT provided the major impetus for Connecticut Energy Edu-

MICHAEL LEWAN: A LAST AT BAT

# HON. STEPHEN J. SOLARZ

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES Thursday, December 16, 1982

Mr. SOLARZ. Mr. Speaker, I rise today to pay tribute to Michael Lewan, my able administrative assistant, and an extremely talented young man, with whom I have been associated for the last 9 years. Without Mike's help, I might not be standing in the well of this House today.

All too often, congressional staffers labor in anonymity. Now that Mike is leaving the Hill to embark on a new career in the private sector, I want to acknowledge the debt that I and the people of the 13th Congressional District of Brooklyn owe to him.

A graduate of Nazareth High School in Brooklyn, and an alumnus of the Baruch College and the Maxwell School of Public Administration, Mike has been my administrative assistant since my election to Congress in 1974. Mike organized my staff, set up and managed my district offices, and ably represented me in Brooklyn and in Washington.

He is an exemplary public servant who has always been willing to do whatever needed to be done. He is conscientious and thorough, dedicated and tenacious, creative and diciplined. He has been my right hand man.

I would not want you to think that Mike is totally serious. In fact, he would probably be hard pressed to say which is his greatest accomplishment: keeping my office running smoothly and happily or captaining the "Solarz System" softball team to the House Softball League "A" Division championship in 1982.

More than being the key member of my staff, Mike has been my friend. It is difficult for me to briefly express what Mike's friendship has meant to me, and to my wife Nina. He has become a part of our family.

Mike is leaving my office to take advantage of a new opportunity. I am certain that he will be successful because he succeeds at whatever he does. I want to wish him well and to say to him what the poet Yeats so well expressed about loyal and true friends: "Think where man's glory most begins and ends, and say my glory was I had such friends."

# MRS. BESS TRUMAN

# HON. DON FUOUA

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES Wednesday, December 15, 1982

• Mr. FUQUA. Mr. Speaker, Bess Truman, wife of President Harry S.

in the United States with its own WATT group, and every community saving hundreds of thousands of energy dollars, and million of BTUs as Wallingford has done.

MEMBERS OF WATT

cation Day in 1982, and will again lead the

project in 1983. WATT recently received a

grant from the American Public Power As-

sociation to make a videotape about the de-

velopment of WATT. This videotape will be

made available on loan to any community

served by a public power company. The dream of WATT is to see every high school

Advisor: Carol A. Wilson. 10

## ED WEBER

# HON. MICHAEL G. OXLEY

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 16, 1982

Mr. OXLEY. Mr. Speaker, I would like to take this opportunity to pay tribute to a good friend and fine Member of Congress, ED WEBER, who has represented the congressional district neighboring mine to the north for the past 2 years.

Ep has capably served the 9th Ohio District throughout the 97th Congress. He has distinguished himself as a Representative closely attuned to the needs and concerns of his constituents, traveling home to Toledo virtually every weekend to meet with area groups and participate in local activi-

A well-known member of the Toledo legal community, he diligently applied his extensive knowledge of the law to his duties as a member of the House Banking, Finance and Urban Affairs Committee. As a member of this panel, he was a leader in efforts to bolster the urban development action grant (UDAG) program, of particular importance to his inner-city Toledo.

Although he held no public office before coming to Congress in 1980, ED proved to be a very effective legislator and dedicated public servant. He learned the ropes quickly and earned the respect of his colleagues on both sides of the aisle.

It is my understanding that ED now plans to return to private law practice. I know my collegues will join with me in telling him we will miss him and in wishing him every success in future endeavors.

Truman will be remembered by Americans not only as a First Lady but as a great lady.

Her death at age 97 on October 18, at her home in Independence, Mo., came as sad though inevitable news.

We shall always remember Bess Truman as the quiet, dignified, and graceful lady who was so much a part of our national scene at the side of her husband, our President, during the later years of World War II and the difficult years which followed that

Who can assess the comfort and devotion she lavished upon our President to make his days more bearable during the times when he was called upon to make decisions which framed our national and international lives for dec-

My deepest sympathies go to the members of the Truman family.

## **BOB SHAMANSKY**

# HON. JONATHAN B. BINGHAM

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 16, 1982

Mr. BINGHAM. Mr. Speaker, I deeply regret that our colleague from Ohio, Bob Shamansky, will not be returning to the House and the Foreign Affairs Committee in the coming year.

In the one term that he has been in the House. Bos has made a major contribution to the work of the Foreign Affairs Committee and especially to the work of the Subcommittee on International Economic Policy and Trade, which I have the honor to chair. He has brought to the consideration of the difficult and technical problems that come before that subcommittee a keen analytical mind, as well as a broad background in law and a familiarity with conditions around the world. His questions of witnesses have been probing and his suggestions for amendments valuable.

Bos has become expert in a number of fields. One, which I consider of transcendent importance to the United States and the world, is the problem of the proliferation of nuclear weapons capability. Bos has correctly brought out the weaknesses of the so-called safeguards system operated by the International Atomic Energy Agency and has energetically called for its strengthening.

In addition to his substantive contributions, Bos has invariably been a pleasure to work with, not least because of his delightful sense of humor. My wife June and I have enjoyed his company on a number of occasions.

We wish him well in all his future pursuits and hope that he will soon return to the House.

<sup>&</sup>lt;sup>1</sup>Certified energy auditor.

SUPPLEMENT TO STATEMENT ON H.R. 5121

# HON. DAN MARRIOTT

OF UTAH

IN THE HOUSE OF REPRESENTATIVES Thursday, December 16, 1982

• Mr. MARRIOTT. Mr. Speaker, since the difference between the House and Senate versions of the Federal oil and gas royalty management bill is in the Miller-Marriott amendment (sec. 114 of H.R. 5121), I would like to say a few words in explanation of that amendment.

Section 114 gives the Secretary discretionary authority to increase the royalty rate for noncompetitive onshore oil and gas leases from the currently mandated 12½ to 16% percent. The section also sets forth certain standards or findings which must be met or made by the Secretary prior to any increase above 12½ percent; that is, first, the impact on future oil or gas exploration, development, or production and second, the impact on overall revenues to the Federal Government generated by such activity.

The Linowes Commission recommended that onshore oil and gas lease royalty rates be increased from 121/2 to 16% percent. However the Commission based its recommendation on the rationale that the royalty should be the same for both onshore and offshore leases, and on the belief that royalties in the private sector had been rising. Commission envisioned The the higher royalty as a means to finance improved royalty collection procedures.

It is a matter of record that the Linowes Commission made no formal study to substantiate its position, making no distinction between the very different circumstances of offshore and onshore leasing, and thus did not analyze the true impact higher royalty rates might have. The Comptroller General of the General Accounting Office in a September 3, 1982, report to the Interior Committee on the subject, points out that not only did the Linowes Commission fail to study the issue, it was acting on beliefs which were not substantiated. The Comptroller General found that "121/2 percent is still the predominant royalty used in the private sector." Further, his report concludes:

We found no conclusive arguments either for or against a higher royalty.... Such a decision ideally should consider the total cost to a lessee to acquire, hold, and develop Federal lesses.

Both the report of the U.S. General Accounting Office "Possible Effect on Increased Royalty Rate for Federal Onshore Oil and Gas Leases" (September 3, 1982) and the study completed by the Interior Department entitled "Final Report on Potential Impacts of Changing Royalty Rates and Systems

for Federal Onshore Oil and Gas Leases" (May, 1982) indicate that the advantages and disadvantages of a royalty rate increase are uncertain, primarily because of the two factors to which section 106 directs the Secretary's attention: First, the impact on future oil or gas exploration, development or production and second, the impact on overall revenues to the Federal Government generated by such activity. Both factors are interrelated.

At least two responses to an increase in royalty can offset the prospective revenue gains. First, gross royalties are tax deductible so the increase in gross royalty payments is much larger than total revenue increase. Second, increasing royalty obligations can cause fields that are only marginally profitable at the lower royalty rate not to be developed and may induce firms with access to other, cheaper sources of oil and gas to reduce production from these fields. Both the Interior Department report and the GAO reports agree that it is entirely possible that the increased tax deductions resulting from a royalty increase and possible decreases in production from fields subject to Federal royalties will actually reduce Federal revenues instead of yielding the hoped-for in-

Increased royalty rates for onshore noncompetitive leases may also impact exploration and hence downstream revenues as well as future domestic production. A large percentage of the exploration done in the wildcat areas for which noncompetitive onshore oil and gas leases are issued is performed by smaller independent companies. These companies may be discouraged from exploring in areas where the oil or gas potential is unknown when faced with a royalty burden which exceeds 121/2 percent. The less exploration activity there is, the less likely it is that domestic production will be coming onstream to generate muchneeded energy supplies as well as the desired revenue generated by such

As as result of these uncertainties, the Interior Committee chose to give the Secretary the discretion to raise the royalty rate on noncompetitive onshore oil and gas leases but conditioned the exercise of his discretion to insure that he will take into acount the long-range, overall impacts of his decision. The committee believed that by requiring the Secretary to take into account these effects, this section will force him to consider the impacts of his decision in the public interest.

A GREAT IDEA FOR HELPING ELDERLY WITH UTILITY BILLS

# HON. TRENT LOTT

OF MISSISSIPPI

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 16, 1982

• Mr. LOTT. Mr. Speaker, my hometown of Pascagoula, Miss., has developed a unique approach for helping elderly or handicapped people with their utility bills. Project COPE is further explained in this article from the Mississippi Press of December 6, 1982. I urge my colleagues to read this article and decide whether it can be made applicable in their own districts. Its innovation is truly outstanding.

[From the Mississippi Press, Dec. 6, 1982]

PROJECT COPE SET TO BEGIN; TO AID ELDERLY WITH UTILITIES

(By Gloria Moore)

Pascagoula's Project COPE (Caring Offered to Pascagoula's Elderly) will get under way Tuesday with the mailing of city utility bills.

Utility customers will be given the opportunity to add \$1 to their payment, a dollar that will help the elderly and handicapped with payment or natural gas bills, electric bills, propane-butane expenses or furnace repairs.

The project is voluntary and has been structured so that each dollar a person gives goes directly to help someone. No salaries or other expenses will be paid out of the gifts.

City Manager Charles Fulghum said similar programs have been successfully operated by natural gas and electric companies on a regional basis but Pascagoula is the first city in the country to undertake this method of assisting the elderly handicapped with home energy related expenses.

The criteria for receiving help is as follows:

- 1. Must be a resident of Pascagoula.
- 2. Elderly age 60 years or over.
- 3. Handicapped-disabled physician-certified
- No other obvious resources available for payment of the energy-related expense.
- 5. Needs of a last-resort nature without regard to age.

Fulghum explained customers may simply add \$1 to their utility payment and the city will direct each of these donated dollars to the American Red Cross which will distribute the money. The city computer has been programmed to handle the extra \$1 donations and persons desiring to give more than \$1 per month should send their gift to Project COPE. American Red Cross, P.O. Box 276, Pascagoula, 39567.

Information on applying for assistance may be obtained by contacting the Information and Referral Service of the United Way, 1309 Market St., telephone, 762-8557. The I&R staff will help the Red Cross to screen applicants.

A pamphlet outlining the the details of COPE will be mailed with the December utility bills.

Fulghum said COPE provides a way for residents to assist those in need. He shared with The Mississippi Press a letter he received following the announcement of the COPE project in the newspaper.

I am an elderly woman myself and on Social Security. But God is so good to me and I know He takes care of me.

This isn't much, but I would like to help.

Enclosed is \$2."

Fulghum explained the assistance of the United Way and the Red Cross in receiving applications and disbursing funds makes it possible for every dollar received going to assist the elderly-handicapped.

He said the program will be monitored by an independent committee representing the elderly, handicapped ethnic groups and

THE 70TH ANNIVERSARY OF THE COLLEGE OF COMMERCE AT DE PAUL UNIVERSITY

# HON. MARTY RUSSO

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 16, 1982

Mr. RUSSO. Mr. Speaker, a 16month celebration is underway to celebrate the 70th anniversay of the College of Commerce at DePaul University. As a graduate of DePaul, I want to take a moment to congratulate the college, the 10th business school formed in the country and the first at a Catholic university. The city of Chicago, the State of Illinois, and the Nation have been well served for 70 years by this fine educational facility.

Established in 1912, the College of Commerce at DePaul is the sixth largest accredited graduate school of business in the country and the ninth largest accredited undergraduate school of business at a private university. Nearly 7,000 students are currently enrolled in the graduate and undergraduate programs of the college and nearly 49 percent of all students attending DePaul are enrolled in commerce, graduate or undergraduate, day or evening.

The theme for the celebration-September 1, 1982 to December 31, 1983, is "DePaul: Educating Chicago business leaders for 70 years." Over 35,000 alumni live and work within 150 miles of the downtown and Lincoln Park Campus so it is certainly an appropriate theme. Other graduates live throughout Illinois and the country as well as abroad. The influence of the

college is far reaching.

The anniversary will focus on the contribution of DePaul's College of Commerce to business, industry, and the professional lives of the community. As the dean and professor at the college, Brother Leo V. Ryan, C.S.V., reminds us, DePaul was founded to provide opportunities for five generation Chicagoans to go to college and to achieve upward social and economic mobility through higher education. DePaul alumni have achieved this goal and continue today to be faithful to the original mission. DePaul offers opportunities for thousands of men and women of all ages to develop competence enhanced by values and to serve both through business and also through their family, church, civic, and social activities.

I know many people will be joining in this important celebration in recognition of this milestone in the life of the College of Commerce and that my colleagues join with me in commending the college and congratulating them on 70 years of excellence.

## TRIBUTE TO FORMER FIRST LADY MRS. BESS TRUMAN

# HON. BALTASAR CORRADA

OF PUERTO RICO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 15, 1982

Mr. CORRADA. Mr. Speaker, I am pleased to join my friend IKE SKELTON and our colleagues in paying tribute to former First Lady Bess Truman, who passed away on October 18.

Mrs. Trumen was a loving wife and devoted mother who, according to President Truman was "the Boss" in the Truman household. She was a gracious First Lady, although by nature she was a shy and unpretentious woman.

Vice President When Truman became President under tragic and difficult conditions following President Roosevelt's death, Mrs. Truman undertook her responsibilities with dignity and a sense of duty to her Nation.

Mrs. Truman lived a full and long life and she will be remembered with love, respect and gratitude by her fellow citizens in the 50 States as well as in Puerto Rico.

## IN MEMORY OF GEORGE KISTIAKOWSKY, 1900-82

## HON. GEORGE E. BROWN. JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 16, 1982

. Mr. BROWN of California. Mr. Speaker, George Kistiakowsky, who died December 7, set an example of public service that has inspired many, both within the science community and throughout the Nation. His outstanding 47-year career in basic chemical research was combined with involvement in the Manhattan project and with giving advice to the Federal Government. During 1959-61, he served as President Eisenhower's science adviser.

Today and in the future, when many policy decisions will require technical expertise and when many technical developments will demand public attention and concern, we will miss George Kistiakowsky. He took very seriously his responsibility to use his intellect and wisdom to work for a livable world. Because he was an outstanding scientist and bipartisan public servant, his clear and honest critique of the nuclear arms race carried great weight and could not be easily dismissed. His arms control efforts over the past decade have helped lay a foundation for rational debate over nuclear arms policies. It is now our responsibility to build on that foundation.

I wish to insert articles from the December 14 edition of the Washington Post and the December 13 issue of Chemical and Engineering News which capture some of the respect and affection felt by those who knew him.

The articles follow:

[From the Washington Post, Dec. 14, 1982] GEORGE B. KISTIAKOWSKY, 1900-82

(By Boisfeuillet Jones Jr.)

In an awesome way nuclear weapons have forced the question of scientists' responsibility for the potential use of their technological achievements. George B. Kistiakowsky, an eminent American scientist who died Tuesday at the age of 82, faced this question for several decades in advising on weapons to deter and on arms control. His dedicated efforts contributed to the nation's security.

A Harvard chemistry professor and explosives expert Kistiakowsky designed the triggering device for the atomic bomb at Los Alamos, N.M., in 1945. He has been widely quoted as remarking, after seeing that first explosion, "I am sure that at the end of the world-in the last millisecond of the Earth's existence-the last human will see what we

Saw.

This apprehension did not presage a sentimental or idealistic reaction on Kistiakowsky's part. He was later a scientific adviser to the Defense Department, serving on various weapons committees, including one which in 1954 urged that top priority be given to the development of an intercontinental ballistic missile. He served for a year and a half during 1959-61 as President Eisenhower's science adviser, a post created as a consequence of Sputnik in 1957 and carrying considerable influence during that period. He continued to advise the government on military and foreign policy matters until 1967, when he ceased because of disagreement with the Johnson administration over the Vietnam War.

For those of us who knew Kistiakowsky in his later years, when he was a strongly opinionated and vocal commentator on the implications of security issues, it is impossible to think of the man as a subservient technician. He attributed his growing skepticism about defense policies in large part to the personal influence of President Eisenhower, whom he came to admire greatly, and who turned to Kistiakowsky as a source of independent advice during his years on the President's Science Advisory Committee and

as science adviser.

Afterward, from 1962 to 1969, Kistiakowsky served on the advisory board to the U.S. Arms Control and Disarmament Agency. By the early 1970s he was criticizing the extent that federal resources were allocated to research and development for defense and space programs while civilian technological programs went relatively unsupported. In his last years, Kistiakowsky expressed outrage and pessimism at the seemingly uncontrollable escalation of the nuclear arms race. His death deprives the nuclear debate of a critic whose credentials

and basically non-ideological background meant that his views had to be seriously dealt with on their merits.

Quite apart from his absorption in these public issues, Kistiakowsky lived a rich and useful life. He was born in Russia in 1900, the son of a law professor, and served in the anti-Soviet White Russian army after the revolution in 1917. Thereafter he escaped to Germany, earned a PhD, and came to the United States in 1926. After four years at Princeton, he joined the Harvard faculty in 1930 and remained there for the rest of his life.

I knew him as a neighbor in Cambridge, where he lived in a modest style with his wife, Elaine. With characteristic rigor and attention to detail, Kistiakowsky concentrated late in life alternately on publishing the diary of his White House years, writing about arms control issues, gardening at his "dacha" on Cape Cod, and overseeing the life and times of his corgi. He was amiably crusty and blunt, the object of affection among his colleagues, students and acquaintances. At times, his biting wit and scathing judgments on people and issues could astonish.

Eisenhower wasn't the only one who respected Kistiakowsky for his outspoken, independent views. It was a privilege to have known him.

[From Chemical and Engineering News, Dec. 13, 1982]

George Kistiakowsky, 1900-82 (By Michael Heylin, Editor)

This reporter never knew George Kistiakowsky well enough to call him "Kisty," as his friends did. We really met only once. That was in his office at the Harvard chemistry department one cold afternoon in January 1981 to talk at length about his efforts to lessen the danger of nuclear war. He was the kind of man you only had to meet once to appreciate his incredible intellect, sparkle, and wit.

Now he is dead at 82. But the struggle for rational arms policies goes on. Ironically, he died the day the House of Representatives voted to delete initial funds for deploying 100 MX intercontinental ballistic missiles. This vote may not represent Congress' final disposition of this matter. But it is the first time since World War II that either house has voted to deny a President a major new arms program.

Very few scientists, and no other chemists, were better qualified than Kistiakowsky to speak out on nuclear arms. His outstanding 47-year career in basic chemical research, much of it related to explosives, was interlaced with involvement in the Manhattan Project, and with advisory roles to the federal government—including science adviser to President Eisenhower.

For his government service he was honored with medals by three Presidents—Truman, Eisenhower, and Johnson. His enormous scientific contributions were recognized by a host of awards, including ACS's highest honor, the Priestley Medal.

As he said that January afternoon, his life was divided into four equal parts (C&EN, Feb. 2, 1981, page 20). The first involved growing up in prerevolutionary Russia and experiencing war first hand. The second was all chemistry—a Ph.D. at the University of Berlin before moving on to Princeton and then Harvard. The next 20 years were half chemistry and half weapons buildings. And, as he put it, "The last 20 years I have been trying mostly to undo the nuclear weap-

ons—and this has been my least successful [period]."

His disillusionment with U.S. arms and defense policies came slowly. He said he began to see all the lies, such as the socalled missile gap." By then, in his position as President Eisenhower's science adviser, he knew there was no such gap. As he explained, "I began to realize that policy was being formed in a way that was really quite questionable." Finally, in January 1968, he esigned from his government advisory positions as a protest against the Vietnam war. After retiring from active research in 1971 he devoted all his vast energies to the prevention of nuclear war. In recent years he served as chairman of the Council for a Livable World, a group founded in 1962 by nuclear physicist Leo Szilard to strengthen security through arms control.

Kistiakowsky will be sorely missed in the rising national debate over nuclear arms policies-a debate that cries out for clear, totally honest and scientifically trained minds such as his. But his efforts over the past decade or so have helped lay a foundation for rational debate. He and others of like mind are not calling for unilateral U.S. disarmament, as some suggest they are. They realize a deterrent force is necessary. They are not working against U.S. security and to the advantage of the Soviet Union, as those in the highest places have charged. All they are saying—and all a growing portion of the public is saying-is that the superpowers must find ways other than a headlong race to ever more sophisticated nuclear weapons to handle their differences and so assure the security of all mankind.

PERSONAL EXPLANATION

## HON. DAN MARRIOTT

OF UTAH

IN THE HOUSE OF REPRESENTATIVES
Thursday, December 16, 1982

• Mr. MARRIOTT. Mr. Speaker, I was unable to be present on the floor of the House of Representatives Monday, December 13, 1982, for roll-call votes Nos. 435 and 436. Had I been present I would have voted "yea" on S. 2355 Telecommunications for the Disabled Act of 1982; and "nay" on House Joint Resolution 429, State commissions on teacher excellence. ●

# THE NORTH AMERICAN LAKE MANAGEMENT SOCIETY

## HON. DON H. CLAUSEN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 16, 1982

• Mr. CLAUSEN. Mr. Speaker, several years ago the U.S. Council on Environmental Quality noted that more than one-third of the Nation's publicly owned lakes were degraded by toxics, silt, algae, or weeds and need restoration. The significance of these problems ranges from old deposits of toxic substances that threaten public drinking water supplies to accumulations of sediment caused by urban development that totally fill lakes. I would

like to share with you a few words about the efforts of an organization that is concerned about these lake quality problems and about the impairment of public benefits from these waters.

I would like to acknowledge the efforts of the North American Lake Management Society (NALMS) in focusing attention on these polluted lakes. Often regulatory agencies are more concerned about controlling pollution to rivers and streams and have not devoted sufficient resources to the more complex pollution problems existing in or threatening lakes and impoundments. The society was formed by citizens interested in cleaning up dirty lakes and protecting clean lakes. Planners, engineers, government officials, scientists, and citizens have joined NALMS to work for safe drinking water, unimpaired recreation, useful industrial water supplies, and fishing opportunities so that these lake quality benefits can be inherited and enjoyed by future generations of Americans.

Members of NALMS have promoted clean lakes by holding annual conferences on lake management and restoration around the country and in Canada. The scientific reports from these meetings are like those mandated by section 304(j) of the Clean Water Act to be submitted to Congress as an update of information describing lake quality problems and current restoration capabilities and techniques. What is clear from these reports is that our Nation's lakes are still very much in trouble from polluting substances and need vigorous attention. NALMS promotes information exchange among scientists, consultants, and lake managers through a newsletter to share new information or techniques. The NALMS board of directors frequently prepares legislative positions and gives testimony before Congress to acquaint us with lake management problems and the need to support Federal and State programs for resolving these problems. The society is also working with State administrators and legislative bodies to build State programs capable of addressing this serious national problem. The society provides information to citizens and urges them to let their U.S. congressional and State delegations know what they think and need. With the overwhelming citizen support for environmental protection and improvement, and particularly with our vital lake resources that has surfaced in recent public opinion polls, it is important that we support their concerns.

While debate on the Clean Water Act will continue into the next session of Congress, I am concerned about this debate and would like to share with you the position statement on key sections of the Clean Water Act that was prepared by members of the North American Lake Management Society:

#### POLICY STATEMENT

While the Nation can be proud of the progress made in controlling conventional pollutants, much remains to be accomplished in correcting water quality problems from nonconventional and toxic pollutants. The flowing waters of rivers and streams have the ability to flush pollutants downstream and cleanse themselves once controls are implemented, but impounded and lake waters have less capability to do so, and they continue to suffer from decades of deposited pollutants. Congress recognized in 1972 that the Nation's water quality goals could not be reached without a lake restoration program to clean up this accumulation of pollutants and enacted the Section 314 Clean Lakes Program. After almost a decade of struggling in building an experimental program to demonstrate the effectiveness of lake quality restoration, the Clean Lakes Program became operational in 1980 with the publication of formal regulations. However, the program was eliminated from EPA's proposed budget in 1981.

Likewise, Congress recognized in 1972 that cost effective pollution control can only be achieved by considering point and nonpoint source abatement tradeoffs on an areawide bases as specified in Section 208 of the Act. While EPA devoted funding to nonpoint source planning, point/nonpoint source control tradeoffs were often ignored and a mechanism for ensuring the implementation of "208 plans" was never established. EPA devoted funding for this important concept of planning cost-effective pollution

abatement in 1981.

The elimination of funding for lake restoration, point/nonpoint source abatement tradeoff planning, and other activities mandated by Congress has been called a backdoor repeal of the Clean Water Act by the public and by some members of Congress. NALMS recommends that Congress reaffirm the importance of such essential programs by specifically calling for their implementation in the amended Clean Water Act as well as in the Conference Report.

### CLEAN LAKES PROGRAM

The Clean Lakes Program has demonstrated that its State-Federal partnership can motivate local participation to address pollution problems in lakes in a very cost-effective manner. NALMS strongly urges that the impaired use caused by toxics contamination, sedimentation, and excessive growths of algae and weeds (conditions that plague more than 10,000 publicly owned lakes) be considered a national problem worthy of modest Federal involvement through continuation of the Section 314 Clean Lakes Program. With the increased burden of programs being transferred to the States, most of them cannot be expected to develop expertise and establish programs to provide leadership in lake restoration. Section 314 should be reestablished at its present authorization for a five-year period so that this 50 percent Federal, 50 percent local and State implementation program may be continued. EPA should be directed to encourage State assumption of the program after the five years, at which time the Federal program will sunset.

## NONPOINT SOURCE POLLUTION

NALMS supports the retention of the mandatory planning mechanism that will ensure cost-effective implementation of pollution controls through point and nonpoint source abatement tradeoffs on a compre-

hensive, watershed-wide basis. Originally established in Section 208, this mechanism must be institutionalized into the waste-load allocation, water quality standards, Construction Grants, and NPDES processes, and the planning mechanism recently established in Section 205(j) as part of P.L. 97-117 may not be sufficient to do so.

NALMS recommends that Congress address the national problem of nonpoint source pollution by requiring in Section 208 the consideration of point/nonpoint source abatement tradeoffs in watersheds with priority water quality problems. A 50 percent Federal, 50 percent non-Federal matching grant program would be established under Section 208 to conduct specific interagency nonpoint source implementation projects in urban and rural problem watersheds. The Section 208(j) Rural Clean Water Program would be reestablished as part of this cooperative, interagency approach to nonpoint source pollution.

#### CLEAN WATER ACT GOALS

Public opinion has shown overwhelming support for retaining the goals and approaches specified for pollution control in the Clean Water Act. NALMS reaffirms its support for the two national goals specified in Section 101, but recommends that they be modified to reflect a more realistic time-frame for compliance and to recognize the importance of controlling toxic substances. NALMS suggests that the "zero discharge" goal be modified to read "It is the national goal that the discharge of toxic pollutants into waters of the United States be eliminated by July 1, 1987" and the "fishable, swimmable" goal be revised to reflect a new target date of July 1, 1987.

#### WATER QUALITY CRITERIA

Some industry and business groups have criticized the scientific adequacy of water quality criteria and technology-based effluent standards established by EPA. These groups wish to abandon effluent standards in favor of State criteria and standards established for local conditions. The local water quality standards-based approach to pollutant control was abandoned in the early 1970s because scientific inadequacy, insufficient State funding for monitoring and analysis, and political pressure often stymied pollution control efforts. There is no reason to believe that a return to the same system will work today, especially with new questions concerning the scientific adequacy of criteria and recent criticism by the U.S. General Accounting Office of frequently used water quality monitoring programs.

NALMS recommends that a national research program be authorized to resolve the scientific questions surrounding water quality criteria, point/nonpoint source abate-ment tradeoff methodologies, cause/effect relationships between impaired water use and upstream pollution sources, and methods for improving lake water quality. This would be accomplished by amending Sections 104 and 304 of the Act. Special emphasis should be placed on a cooperative effort between EPA and the States to develop regional watershed specific water quality criteria for toxics to protect designated uses. Such a nationally coordinated approach would be more cost-effective than each State duplicating such efforts. The goal would be to implement a water quality based system for establishing effluent limitations after BAT, BCT, and secondary treatment are installed over the next five TECHNOLOGY-BASED EFFLUENT LIMITATIONS

NALMS supports the retention of technology-based effluent limitations, BAT and BCT requirements for industry, and secondary treatment for municipalities. BAT variances may be provided if bioassays and/or biomonitoring show no acute or chronic toxicity problems and "fishable" use designations are being attained. Case-by-case variances for secondary treatment may be given if water quality standards are not being violated and "fishable-swimmable" uses are being attained. Section 301 should be amended to specifically appropriate funding for all BAT limitations to be developed by 1984 and to set a compliance deadline of mid-1987.

#### CONSTRUCTION GRANTS PROGRAM

Congress established the Construction Grants program to hasten the initial construction of publically owned treatment works (POTW's). In some cases, industries and businesses that discharge into these municipal plants receive a significant public subsidy in treating their pollution problems. A recent report to Congress by U.S. General Accounting Office documented the existence of this subsidy and warned that the future successful operation of these municipal treatment works (and protection of water quality) may be in jeopardy because most municipalities are not charging adequate user fees. Most are not setting aside funding for plant replacement or improvement and other public revenues are used to subsidize operation and maintenance.

In 1972, Congress specified that an industrial cost recovery program and sufficient user charges be established so that public funds would not be used to treat industrial wastewater. Congress also mandated a pretreatment program so that industrial wastes would not overload or interfere with operation of these treatment works. In recent years, the industrial cost recovery program was eliminated and pretreatment regulations were suspended. It appears that the intent of Congress to avoid public subsidy of industrial treatment was not carried out. NALMS strongly urges Congress to address this deficiency by amending the Act to set a deadline (10 years hence) to phase out the Construction Grants Program. The amendment would contain a provision for all industries discharging to POTW's improved with Federal funds to contribute "industrial cost recovery" payments to a State trust fund for making POTW's self-sufficient.

This could be supplemented by State established construction grants programs financed by sales of bonds. The amendment should specify sufficient user charges for improved operation and maintenance and national minimum standards for pretreatment programs. Industry should be required to handle toxic sludge from the pretreatment process rather than saddle the public with costly disposal of contaminated sludge. NALMS recognizes the need to streamline complex pretreatment regulations, but most municipalities cannot be expected to effectively implement pretreatment programs for political reasons without national categorical pretreatment standards.

### DREDGE AND FILL PROGRAM

NALMS recognizes the importance of wetlands in protecting water quality and providing habitat for fisheries and wildlife resources. We oppose the current pressure from developmental groups to limit the Section 404 Dredge and Fill program to strictly navigable waters rather than the valuable headwaters wetlands they wish to develop. NALMS supports a reauthorization of Section 404 in its current form and recommends that a strong Congressional mandate be included that clearly opposes any artificial drainage, land conversion, or development of wetlands classified by the U.S. Department of Interior through refusal of the 404 permit or through enforcement action.

GROUND WATER

Ground water is a valuable resource for recharging lakes and rivers as well as for providing inexpensive drinking water. Comprehensive planning for protecting both ground water and surface water has not been implemented under the Clean Water Act despite the existing statutory requirements in Sections 102, 208, and 304. Because of the fragmentation of responsibility for ground water among many pieces of legisla-tion, NALMS recommends that the Clean Water Act be amended to provide the planning and coordination mechanism for assuring that ground water uses are protected. NALMS supports amending Section 304 to authorize funding for developing regional ground water quality criteria for protecting ground water uses and to mandate State adoption of the criteria. The Act should be amended to include consideration of ground water impacts under the NPDES program and to coordinate ground water planning and protection strategies as part of an element of State water quality (recognized as both surface and ground water) management programs under Section 208. This would provide a national framework to improve performance of both Federal and State programs in a coordinated fashion.

#### DAMS AS POINT SOURCES

A recent court decision established that discharges from dams/impoundments are subject to Section 402 NPDES requirements if they cause downstream impairment of water quality. Despite the very serious nature of these water quality problems in many sections of the Nation (not only impacting aquatic life and municipal water supplies but also suppressing economic development), some groups are petitioning Congress to amend the Act to exempt dams from Section 402 requirements. NALMS opposes this action because water quality problems downstream of dams can often be traced to upstream pollution sources that also impact lake water quality. Congress should amend Section 402 to confirm the applicability of the NPDES program to all point source discharges, including dams that cause downstream water quality problems.

CONGRESSIONAL SALUTE TO THE HONORABLE HARRY CONRAD NAGEL OF WAYNE, N.J., DISTINGUISHED CITIZEN, SENIOR CONFECTIONER, AND GREAT AMERICAN

## HON. ROBERT A. ROE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES Thursday, December 16, 1982

• Mr. ROE. Mr. Speaker, on Sunday, January 9, the residents of my congressional district and the State of New Jersey will join together in testimony to an outstanding confectioner, distinguished citizen, and good friend, the Honorable Harry Conrad Nagel, whose birthday celebration commemorating the 85th year of his birth will provide an opportunity for his relatives and many, many friends to express tribute to his lifetime of good works. I know that you and our colleagues here in the Congress will want to join with me in extending our warmest greetings and felicitations to him, his good wife Virginia, three sons, Harry William, Robert Henry, and Theodore Christian; daughters-in-law, seven grandchildren and four greatgrandchildren on this most joyous occasion in testimony to the quality of his leadership and professional expertise in his field of endeavor, the warmth of his friendship, and his standards of excellence in our American way of life.

Mr. Speaker, the pleasure of great personal dedication and always working to the peak of one's ability with sincerity of purpose and determination to fulfill a life's dream—that is the success of the opportunity of America—and the mark of distinction in our society of "the self-made man." The aspirations and success of Harry Conrad Nagel in the mainstream of America's candy industry does, indeed, portray a great American success story.

We are proud to boast that Harry Nagel was born and raised in our great sovereign State of New Jersey. He was the son of German immigrants, born in Dundee Lake, N.J., January 2, 1898. The house of his birth still stands on Orchid Street in the borough now named Elmwood Park, Bergen County, N.J.

Harry is New Jersey's senior confectioner, having started his own business in West New York, N.J., in December 1921. He was a bookkeeper for the Hackensack Water Co., before joining the Homemade Candy Co., of New Jersey as a salesman. He sold more candy than they could produce and that is when he started his own company to fill the balance of the orders. As the members of the Homemade Candy Co., retired and finally closed their doors, Harry was in full swing as a leading entrepreneur in the art of a confectioner. He would load his pickup truck as a route man 3 days a week and called on stores throughout northern New Jersey and New York City.

ern New Jersey and New York City.

After World War II, the mode of business changed. With the coming of home freezers and refrigerators, the homemade candy and ice cream stores started to disappear and Harry seeing this trend decided to move to the highways. He opened his first store in Wayne, N.J., followed by a second in Randolph, N.J. Both stores were instantly successful. It is interesting to note that his first confectioner's shop in West New York is still in operation. At the age of 83, Harry decided it was time to retire and turned the business over to his son Robert although old

habits are hard to break and Harry still visits his candy stores regularly.

Harry Conrad Nagel has attained excellence and national prominence in the compounding, mixing, and preparation of delightful taste treats. He received two distinguished service awards from the New Jersey Confectioners in December 1975 and February 1982 in recognition of more than a half century of outstanding expertise and dedication to our State's candy manufacturing industry.

Mr. Speaker, there is so much that could be said of the friendship and good will that Harry Nagel has so willingly and abundantly given over these many years that mean so much to the lives of all of us who have had the good fortune to know him.

As we join together in a birthday celebration to a good friend and distinguished citizen, we extend the appreciation of the Congress to Harry for his outstanding contribution to the quality of life and way of life here in America. We do, indeed, salute a great American, the Honorable Harry Conrad Nagel of Wayne, N.J.

APPOINTMENT OF RICHARD STILL AS GENERAL COUNSEL OF BANKING, FINANCE AND URBAN AFFAIRS COMMITTEE

# HON. FERNAND J. ST GERMAIN

OF RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 16, 1982

• Mr. ST GERMAIN. Mr. Speaker, I wish to announce the appointment of Richard L. Still to the position of General Counsel of the Committee on Banking, Finance and Urban Affairs, effective immediately.

In addition to serving as General Counsel, Mr. Still will continue as staff director of the Subcommittee on Financial Institutions Supervision, Regulation, and Insurance, a position he has held since 1973.

A graduate of the U.S. Naval Academy, Mr. Still received his LL.B. in 1957 and his LL.M. in 1960 from Georgetown University. He served as Chief Counsel and Commissioner of the Community Facilities Administration during the period 1962-66, and assumed his present position after service with the House Government Operations Committee, during which time he directed investigations of the operations of the Federal Housing Administration and the Law Enforcement Assistance Administration.

December 16, 1982

THE PEDESTRIAN HAD NO IDEA WHAT DIRECTION TO GO, SO I RAN OVER HIM

# HON. CECIL (CEC) HEFTEL

OF HAWAII

IN THE HOUSE OF REPRESENTATIVES Thursday, December 16, 1982

HEFTEL. Mr. Speaker, our good friend and former colleague, the Honorable Clare Boothe Luce, recently forwarded to my attention a very amusing article on bureaucracy and our seeming inability to master its various intricacies. The article discusses the trials and tribulations of relating to an insurance company the details of an unfortunate automobile accident. Many of us have experienced the frustration of an accident and the subsequent anxiety of reporting it. I offer the following article which recently appeared in the San Francisco Herald Examiner as an aside, a moment of humor for our colleagues. I hope that you will find it as amusing as I did.

The article follows:

THE PEDESTRIAN HAD NO IDEA WHAT DIRECTION TO GO, SO I RAN OVER HIM (By Neal Leavitt)

Thousands of drivers nationwide have been involved in automobile accidents and the insurance rigamarole that follows afterwards. Filling out the myriad and often confusing insurance claim forms can befuddle even the most stalwart semanticist. The following are actual excerpts culled from various auto insurance company files in North-

ern and Southern California:

Coming home, I drove into the wrong house and collided with a tree I don't have. The other car collided with mine without giving warning of its intentions. I thought my window was down but I found out it was up when I put my hand through it. I collided with a stationary truck coming the other way. A truck backed through my windshield into my wife's face. A pedestrian hit me and went under my car. The guy was all over the road: I had to swerve a number of times before I hit him. I pulled away from the side of the road, glanced at my mother-inlaw and headed over the embankment.

In my attempt to kill a fly, I drove into a telephone pole. I had been shopping for plants all day, and was on my way home. As I reached an intersection a hedge sprang up obscuring my vision. I did not see the other car. I had been driving my car for 40 years when I felt asleep at the wheel and had an accident. I was on my way to the doctors with rear end trouble when my universal joint gave way causing me to have an accident. My car was legally parked as it backed into the other vehicle. To avoid hitting the bumper of the car in front of me I struck the pedestrian.

I was unable to stop in time and my car crashed into the other vehicle. The driver and passengers then left immediately for a

vacation with injuries.

As I approached the intersection a stop sign suddenly appeared at a place where no stop sign had ever appeared before. I was unable to stop in time to avoid the accident. An invisible car came out of nowhere and

struck my vehicle—and vanished.

I told the police that I was not injured, but on removing my hat I found that I had

I was sure that the old fellow would never make it to the other side of the roadway when I struck him.

The pedestrian had no idea what direction to go, so I ran over him.

I saw the slow moving, sad faced old gentleman as he bounced off my car.

The indirect cause of this accident was a little guy in a small car with a big mouth.

I was thrown from my car as it left the road. I was later found in a ditch by some stray cows.

The telephone pole was approaching fast. I was attempting to swerve out of its path when it struck my front end.

And you wonder why it takes weeks, sometimes months to receive restitution from automobile insurance companies? It takes them that long to decipher what their clients are trying to tell them!

CURBING SKYROCKETING NAT-URAL GAS PRICES; CONGRESS MUST ACT NOW

# HON. DOUG WALGREN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES Thursday, December 16, 1982

. Mr. WALGREN. Mr. Speaker, I am pleased to share with my colleagues testimony I gave to the House Subcommittee on Fossil and Synthetic Fuels on the need for Congress to act promptly to hold down natural gas prices.

Mr. Chairman, I appreciate the opportunity to testify before your subcommittee today and want to commend you and the subcommittee members on the thorough job you have done in exploring the causes of skyrocketing natural gas prices-a problem which will vitally affect millions of Americans this winter.

As a member of the Energy and Commerce Committee, it is clear to me that we need to take immediate action, before we adjourn, so that we can moderate the high gas prices predicted for the winter months. If we fail to act, there will be thousands of people literally forced to choose between feeding their families or heating their homes.

Representative from Allegheny County, Pa., I represent an area especially hard hit by the natural gas crisis. High energy prices have a double impact on Pennsylvania. Not only do they raise the cost of living beyond the reach of many, but, because they hamper economic recovery, we lose more jobs.

Our heating bills in Pennsylvania are unusually high for three reasons. First, our winter climate is 20 percent colder than the national average. When you are one-fifth colder than the rest of the Nation, you obviously can expect to need at least one-fifth

more heat to keep warm.

Second, we in Pennsylvania are especially dependent on natural gas and other fossil fuels for heat. Our low-income households are heavily dependent on natural gas with over one-half of these residents using gas for heating. Oil provides the heat for onethird of these households.

Finally, energy prices in the northeast are substantially above the U.S. average. For natural gas, Pennsylvanians pay at least \$3 more per 100 therms than the national average. Pennsylvanians in the three largest

metropolitan areas-Philadelphia, Pittsand burgh, Scranton-Wilkes-Barre-pay above one-fifth more on average for natural gas than do residents in major cities in the South.

Since November of 1978, residents of Pennsylvania's three largest cities have seen natural gas prices rise, on average, by 70 percent.

Financial advisors used to say that no more than 29 percent of your pay should be needed to finance your home. Today, it takes 29 percent of your income to pay your heating bills. In my home area of Pitts-burgh, the three major gas companies are projecting to increase their rates by up to 25 percent, with the average gas bill for the month of January expected to be \$146.

There could be no worse time for this economic shock. The Pittsburgh area has 135,000 people out of work with no hope of employment before the spring, and that does not count those forced to take parttime jobs or those who have given up looking for work. Under the best of conditions, an unemployed steelworker collecting maximum benefits in Pennsylvania brings home \$728 a month. After paying the gas bill, that leaves only \$145 a week to pay the mortgage, buy food and clothing, and meet family medical bills.

What about the elderly poor in Pennsylvania? An elderly widow, living independently and totally dependent on SSI, receives \$316 a month. If she heats with gas, her January energy bill will total 46 percent of her income, leaving only \$39 a week for her

other expenses.

There are those who argue that these high prices are necessary to reflect the true cost of energy in a free market and that the answer is to expand energy assistance programs to help the poor meet these bills.

Certainly we need a strong energy assistance program. The business-sponsored Committee for Economic Development has estimated that \$5 billion is a sufficient approximation of the need for this program. But, regretably, the Reagan administration, instead of increasing the funding for energy assistance, has repeatedly tried to hold low income energy assistance below \$1.5 billion, less than one-third of what is needed.

And even with a strong low-income energy assistance program, it is important to understand that these rising gas prices are destroying the budgets of middle-class families as well as the poor and elderly. Middleincome families do not qualify for energy assistance.

Second, the current gas prices are a perversion of the free market and not a fair reflection of supply and demand. As other witnesses have pointed out, the take-or-pay contracts made several years ago locked pipeline companies into buying the most expensive gas-even when cheap gas is either burned off or vented into the air. Demand is down; supply has increased. It should follow that prices fall; but they do not.

The legislation we are supporting here today, the Temporary Natural Gas Market Correction Act of 1982, gets to the root of one of the problems by forcing major gas pipelines to renegotiate take-or-pay contracts and offer the least cost mix of gas to distribution companies. This legislation, developed by the Northeast-Midwest Coalition, is important emergency legislation that must be considered and approved quickly if it is to help hold down gas prices in cold climates this winter.

I hope this subcommittee and the Full Energy and Commerce Committee will act during this session. It is already cold in our part of the Nation, and we simply cannot wait until a new Congress gets organized in late January and early February.

#### EXPLANATION OF VOTE

# HON. BILL GREEN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES Thursday, December 16, 1982

• Mr. GREEN. Mr. Speaker, earlier today I voted "Present" during the vote on final passage of H.R. 3191, tax deductions for cruise ship conventions. I have an interest in one hotel and have an option to acquire a second. Both of these hotels conduct extensive business with conventions and, consequently, I thought it would be a conflict of interest to vote any other way on this matter.

## TRIBUTE TO THE HONORABLE ROBERT H. MOLLOHAN

# HON, MELVIN PRICE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES
Tuesday, November 30, 1982

Mr. PRICE. Mr. Speaker, I rise to pay tribute to Bob Mollohan, a loyal and valued member of the Committee on Armed Services for many years and an old friend.

BoB was first elected to the Committee on Armed Services in 1954 during his second term in the House. He served with us during the 84th Congress and then left to run for Governor of West Virginia. Upon his return to the Congress in 1969, Bos was once again elected to our committee. During the intervening 14 years, he has been one of our most dedicated supporters of national defense legislation. We have always been able to count on him for guidance and advice. And we have known that in a tight situation BoB is always there to support the committee.

I believe that at one time or another he has served on all of our subcommittees. Most recently, I have been privileged to have him as the ranking member of the Research and Development Subcommittee where he has generously assisted us with his knowledge

and experience.

Bob is also the ranking member of our Seapower and Investigations Subcommittee. His many years of service on the Seapower Subcommittee have given him a vast knowledge of the Navy and its needs. He has worked diligently on behalf of a Navy that is second to none. I believe that much of our recent success in modernizing and enlarging the Navy can be attributed to his tireless efforts.

While he has left his mark on many military programs, perhaps Bos's

greatest achievement was in the improvement of defense communications, command and control. In 1969 he was assigned by Mendel Rivers to chair an examination of Department of Defense communications. In that Congress and in the next three, Congresses, Bos conducted a thorough examination of defense communications and command-control (C3) systems. The reports of his subcommittee's examination are referred to in the C3 community as the Mollohan reports. Those reports are considered the dawn of congressional recognition of the critical importance of C3. Communicators also credit the Mollohan reports with awakening the military services to the necessity of improving C3 in order to realize the full potential of our weapons systems. Senior C3 personnel in the Armed Forces trace most of the significant improvements in their system during the past decade to the determination of Bos to provide the forces with reliable, responsive C3 equipment. It is their consensus that the capabilities of our defenses have been vastly improved as a result of his efforts to identify deficiencies and to obtain funding for their correction.

We will also miss Bob, and his wife Helen, on our committee travels. We have always enjoyed their company. In those travels Bob has always been very interested in learning of the living conditions of our troops overseas as well as their equipment needs. He has used that knowledge to bring about an improvement in the troops' quality of life and to improve and modernize their weapons and equipment.

Mr. Speaker, I know I speak for all of our committee members on both sides of the aisle when I wish Bos and Helen many happy years of retirement.

WESTERN HEMISPHERE CON-FERENCE OF PARLIAMENTAR-IANS ON POPULATION AND DE-VELOPMENT

# HON. PAUL N. McCLOSKEY, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 16, 1982

• Mr. McCLOSKEY. Mr. Speaker, between December 2 and 5, I was privileged to represent the House at the Western Hemisphere Conference of Parliamentarians on Population and Development in Brasilia, Brazil.

In the course of the 4-day agenda, I was called upon to deliver some remarks on the immigration problems between the United States and Latin American countries.

A copy of those remarks is attached.

Address to the Western Hemisphere Conference of Parliamentarians on Population and Development December 3, 1982

Mr. Chairman, I would like to congratulate the host Government of Brazil, and the Brazilian Parliamentary Group for organizing and hosting this first Western Hemisphere Conference of Parliamentarians on Population and Development.

I am particularly glad that Mr. Bustamante of Mexico was able to be with us today. Many of us in the United States recognize him as the leading expert, in this hemisphere on the subject of immigration between Latin American countries and the

United States.

It is simply outstanding that countries and more than 20 international and government organizations are represented in this hall here today. The fact that more than 90 parliamentarians have agreed to discuss these issues demonstrates real hope for our future cooperation in their solution.

#### VAZ DA COSTA

I particularly appreciated Mr. Vaz Da Costa's challenge yesterday—that when executive branches of government fear to act or do not wish to act, parliamentarians should do so. In all of the major U.S. initiatives for family planning it has been the Congress, not the executive branch, which has provided the leadership. Our major population legislation for example was led by Senator Tydings and our present Vice President George Bush who was then a Member of our House of Representatives.

The population explosion in Latin America and the Caribbean that started more than 30 years ago is now taking its toll on the region's ability to modernize and develop. According to the United Nations Latin American Demographic Center (CELADE), the population of Latin America and the Caribbean is projected to more than double from 208 million in 1960 to 545 million in

the year 2000.

The consequences of this drastic population increase becomes evident when we consider a comparison drawn by Robert Fox of the Inter-American Development Bank. He said: In its best year since World War II, from 1945 to 1977 the United States created 4 million jobs, but Latin America, with perhaps one-fifth of the economic base of the United States must from now to the end of the century annually create 4 million jobs, just in order not to fall behind in its present high rate of unemployment. This seems literally impossible if the present rate of population growth in many countries continues.

Population growth seems therefore to be one of the main causes of the poverty, under development, high levels of unemployment, and political instability that ignite internal and external migration in the hemisphere. It also can prevent human immigration policies. Consideration of new immigration policy has become a priority item on the political agenda of many industrialized nations, and is also emerging as a critical concern of many developing countries. It is an issue that affects most of us in

this room.

For some of us here, massive migration means the loss of our best talent, the loss of time and effort that was employed in educating and training our most intelligent and industrious people, and the imposition of limitations on our development potential. For others of us, it means increased competition in our labor markets in the face of unprecedented levels of unemployment and severe economic difficulties. I think we must

accept a basic fact. When good people cannot find jobs in their own country, they will undertake almost incredible hardships to migrate to countries where they can find work. No law that we can pass in the United States or any other country can stop this basic human desire and action to achieve a better life.

Traditionally, the United States has been known as a willing recipient of successive waves of immigrants from different parts of the world. In recent years, more than 600,000 legal immigrants and refugees have been admitted for permanent residence in the United States annually. Furthermore, between 1 and 2 million illegal immigrants a year are estimated to be flowing into the United States, 200,000 to 500,000 of whom

Our current economic uncertainty in the United States is aggravated by record unemployment rates of more than 10 percent. Under these conditions there is an understandable adverse public reaction against recent waves of immigrants. This, in turn, affects the ability of policymakers to develop a rational and humane immigration

policy.

The countries of Latin America have every right to hope that the United States will seek to reduce deficit spending and high interest rates. To do this the United States must seek to find jobs for its own people, since our high unemployment is the direct cause of both our deficit spending and our high interest rates. To assist the economies of Latin American countries by reducing our own unemployment therefor, many of our people argue that we should take strong action against the present flow of illegal workers into the United States and to legitimize the rights of people from Latin American countries whose labor contributes to our economy.

Presidents Carter and Reagan both appointed task forces to study immigration problem. Many of the recommendations of these task forces are reflected in a major immigration bill, known as the Simpson-Mazzoli bill, now pending before Congress. This legislation would grant amnesty to millions of illegal aliens who are already in the United States, while imposing severe penalties on employers who hire illegal immigrants in the future. The proposal also calls for substantial increases in the immigration ceilings for Mexican nationals and the upgrading of immigration law enforcement.

The legislation has been referred to several committees in the House and Senate, and has been subjected to more than 100 hours of hearings at which more than 300 witnesses testified. Whether this legislation will be enacted into law is hard to predict. Mr. Porter and I will welcome advice from each of you in these next few days as we may have a vote on this issue when we return to Washington next week.

A comprehensive response to the immigration issue requires both an international approach and dealing with the root of the problem: The high rates of population growth and the poverty, political chaos, and underdevelopment which are enhanced by

such growth.

It is clearly in the interest of sending and receiving countries alike to cooperate in the development of both comprehensive migration and population programs. What you do in your respective countries and what we do in the United States is a matter on which we parliamentarians should try to agree upon if possible.

Through regional conferences like this one, we Americans hope for once to be lis-

tening to you rather than talking. We hope to coordinate our programs with yours. Hopefully this conference will help us immensely in laying the ground work for future cooperation between our respective parliaments.

The key to addressing the problem is of course for the United States to help in promoting the long-term economic, social, and political development of people-exporting countries. President Reagan's Caribbean Basin Initiative, a series of measures in the areas of trade, aid and investment, is a start, but we think there are two other things we

can do and should do.

First, we will try to continue to do all we can to assist national and international organizations in collecting information and conducting research on international migration and other population-related matters. Lester Brown's world watch information that he gave us yesterday morning is typical of the kind of information that can change parliamentarians' thinking and lead to major changes in national policy.

Second, we believe we should continue to assist you in any programs you devise to permit couples to choose the number of their offspring. Our population assistance, directly and indirectly to Latin American countries today totals approximately \$75 million a year. During hearings conducted by the Subcommittee on Inter-American Afairs, which Mr. Barnes has the honor of chairing, he was able to obtain the commitment of the Reagan administration to continued support of population programs despite our overall deficits which, for the first time in our history, have exceeded \$100 billion per year in the past 2 years.

To the extent that Latin American parliaments adopt effective programs of family planning, I think you can be assured of continuing U.S. assistance both from our Government and our private organizations. Most of us in the U.S. Congress would far prefer to vote for population assistance to your countries than for military assist-

ance.

## PERSONAL EXPLANATION

## HON. EDWIN B. FORSYTHE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 16, 1982

• Mr. FORSYTHE. Mr. Speaker, since I am recuperating from surgery and under doctor's orders, I was not able to be present for several of the votes on H.R. 5133, "Fair Practices in Automotive Products Act." I would therefore like to take this opportunity to state for the record how I would have voted had I been present.

Rollcall No. 457: An amendment that sought to define the purposes of the bill as the following: to reduce competition in the automotive industry, protect jobs in one industry to the detriment of jobs in other industries, and to increase the price of automobiles to consumers; I would have voted

Rollcall No. 458: An amendment, as amended, that sought to exempt Japanese automobile manufacturers from requirements if the balance of trade deficit with Japan declined based on

the ratio of the automotive products balance of trade to the deficit in goods and services; I would have voted "nay."

Rollcall No. 459: An amendment that provided that nothing in the bill should be deemed to supersede the terms or conditions of any treaty, international convention, or agreement on tariffs and trade in existence on the date of enactment to which the United States is party; I would have voted "aye."

Rollcall No. 460: Passage of H.R. 5133 to establish a domestic content requirement for motor vehicles sold in the United States; I would have voted

"nay."

TEDDY GLEASON, PRESIDENT OF THE ILA SPEAKS OUT AGAINST PROTECTIONISM

# HON, JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 16, 1982

• Mr. KEMP. Mr. Speaker, Thomas W. "Teddy" Gleason, president of the International Longshoremen's Association, AFL-CIO, is a statesman of the American labor movement. No one understands better the anxiety of American workers whose jobs are subject to international economic markets. And no one understands better why, in the interest of preserving and creating American jobs, we must refrain from shortsighted "quick fixes" like the domestic content bill which Congress has debated this week.

Today, in testimony before the Senate Commerce Committee, Teddy Gleason outlined the reasons why the domestic content legislation is a bad

idea-

not because it is ill meant but because it is ill-conceived. It is a fragmentary approach that will complicate our own reponses, hamstring our negotiators and create far more dust than it can settle.

The issue of fair trade in other markets is a fair issue, he argues persuasively, but our response must be—

in the context of an overall reconciliation of conflicting national and international policies and interests. \* \* In a sense, all American labor and industry today is in the same vulnerable boat. We have to stay afloat together, not separately and certainly not by going our own ways. We must all pull together in supporting our trade bargainers. That's how the job will get done the right way, not, as this bill will tend to do, the wrong way.

This is excellent advice, and I commend this excellent testimony to my colleagues.

PREPARED STATEMENT OF THOMAS W. GLEA-SON, PRESIDENT, INTERNATIONAL LONG-SHOREMEN'S ASSOCIATION, AFL-CIO

Gentlemen: My name is Thomas W. Gleason. I am the International President of the International Longshoremen's Association,

AFL-CIO. The ILA represents over 100,000 longshoremen and employees in other occupations affecting—and affected by—domestic and international trade.

The ILA can appreciate the motives and responses of S. 2300, The Fair Practices In Automotive Products Act. It is an attempt to seek relief for an important home industry that is facing rapidly increasing competition, in particular, from the Japanese auto industry.

I submit that the solution that that industry seeks, through passage of the bill before you, is not the appropriate or most effective answer to a serious problem. It attempts to handle the situation on an ad hoc basis, without ample consideration of the impact on our country and its trade relations as a whole and the implications for other American industries as well.

The longshore industry is a case in point. Over the past two decades, the results of automation and the adverse actions of federal agencies have eliminated many millions of longshoreman-hours and thousands of jobs on the waterfront. In their wake, all sorts of additional jobs in backup industries such as trucking, warehousing, insurance, processing and so on which depend for their very existence on shorefront activities, at a ratio of about five backup positions for every longshoreman, have disappeared.

If the intended effects of S. 2300 actually come to pass, then we foresee extensive loss of international cargo which our members handle, to be followed by raised tariffs, cuts in foreign shipments of American products, and other retaliatory measures. These will further erode whatever work remains in the already hard-pressed longshore and ship-

ping industries.

This piece of legislation, though it seems narrowly-addressed and confined to a single industry, will be used as a precedent to open the door to similar bills yet to be sponsored on behalf of industries that also face trouble because of over-reaching and inequitable trade practices. It will not be long before we conduct our international trade by congressional statutes written in stone, rather than through flexible negotiations and the selective uses of economic power. This traditionally and for pragmatic reasons has been the province of the Executive branch of government, which conducts our day-to-day foreign relations.

In the case of the Japanese, the measure before you will aggravate and harden the situation, rather than seek changes thru persuasion and appeals to self-interest. We all know that trade with Japan has become too much of a one-way proposition. It hasn't only been limited to automobiles; it encompasses full or partial bans on a whole range of American products that are not permitted to meet the existing and potential demands of the Japanese consumer market, so that Japan's balance of trade—but not ours—artificially remains favorable.

Japan, like other governments who perform the same trick, must be made to understand we will not deal piece-meal with them like they do with us. American industry and the American economy is an integrated one. Whether it be autos, or farm products, or steel, or computers or services, there are ripple effects elsewhere within our system. The example that I gave you of the potential effects of this bill on our own industry can be multiplied a hundred or a thousand fold when one considers the actions of—and counteractions to—Japanese trade policies. The time for action is upon us!

What we need, then, is a broad-not a limited-approach to the underlying problem. It really has to do with Japanese and other foreign attitudes that overprotect and subsidize their constituents, while seeing American industry and consumers as ripe for the picking. That is the type of "foreign aid" you don't-possibly can't-legislate, unless we're going to go back to those days when we were an "island republic". The President, through his Trade Representative, is the appropriate party to drive the message home to our trading partners: that protection and invasion are not the answer; rather, responsible, even-handed trade policies are the only way to keep all of our economies in balance if the Free World is to stick together

I therefore urge you table this bill, not because it is ill meant but because it is ill conceived. It is a fragmentary approach that will complicate our own responses, hamstring out negotiators and create far more dust than it can settle.

and succeed.

This does not mean that the basic problem is to be swept under the rug. To the very contrary! It is precisely because the proponents and supporters of this bill have felt the need to go to such great lengths to remedy what they and our own members see as a festering and growing adversity, that the Administration must devote more strenuous efforts and determination to rectify it through the means at their disposal.

We in the ILA intend to do whatever may be required of us to back up the Administration's posture in bringing these matters to a head. It must be done in the context of an overall reconciliation of conflicting national and international policies and interests.

As Ambassador Brock commented in his statement regarding the corresponding House bill:

"[The Fair Practices In Automotive Products Act] is another manifestation of an afliction that Americans what left behindthe easy answer. They are tired of "quick solutions", that invariably become non-solutions resulting from simplistic analysis of problems. Increased import share is not the problem, but rather a symptom of a decline in U.S. international competitiveness. The answer to this real problem is that management, labor, and the Government must take those actions, separately and together, that improve productivity, that reduce costs, that encourage economic investment, and that put us on a level playing field with respect to our major trading partners.

"In contrast, the passage of [The Fair Practices In Automotive Products Act] creates new problems. It would be viewed as both a renunciation of reciprocal trade liberalization policy, currently being pursued by this Administration, and a revocation of free trade policy that has been supported by all Administrations and Congresses for over 30 years."

In a sense, all American labor and industry today is in the same vulnerable boat. We have to stay afloat together, not separately and certainly not by going our own ways. We must all pull together in supporting our trade bargainers. That's how the job will get done the right way, not, as this bill will tend to do, the wrong way.

Thank you for inviting me to present our position on this important matter.

TRIBUTE TO JACK BRINKLEY

# HON. MELVIN PRICE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES
Thursday, December 2, 1982

• Mr. PRICE. Mr. Speaker, as the gavel sounds for the adjourment of the 97th Congress, it will mean the loss of the experience and talents of a number of our most able colleagues.

Jack Thomas Brinkley is one of those persons. Had Jack chosen, he could have spent many more years in public life with great challenges and honors awaiting him. But he has chosen to retire at the end of this Congress to devote more time to his family and the private practice of law. Although I understand the personal reasons behind his decision to bring his House service to a close, I am deeply saddened at his departure.

JACK has served unselfishly and with distinction as a member of the Armed Services Committee since his election to the 90th Congress. As chairman of the Subcommittee on Military Installations and Facilities, he has worked tirelessly to upgrade the living and working conditions of the men and women in uniform and their dependents. Under his leadership, new and innovative technologies have been introduced in the construction of military facilities and military family housing with good results. Signficant cost savings to the taxpayers have been realized because of his initiative and con-

Jack has always stood for the finest qualities in our humanity: Integrity, courage, tenacity, ability, and dedication. He belongs, first of all to Georgia; but the entire Nation is richer because of his unselfish and excellent service during 16 years in the Congress.

I wish to extend to Jack and his family my sincere best wishes for the future as well as my thanks for diligent service in the past.

AMERICAN STRATEGIES FOR PRODUCTIVITY AND PROFITABILITY

## HON. JOHN J. LaFALCE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES
Thursday, December 16, 1982

• Mr. LaFALCE. Mr. Speaker, to say that our Nation suffers under the weight of a serious productivity dilemma is to belabor the obvious. The inability of our economy to achieve real growth is, in great measure, due to the failure of the Government, the business community, labor, academia, and citizens at large to recognize that productivity improvement, in all its di-

mensions, is an integral factor in lowering inflation, increasing profits, and returning people to their jobs.

One of the most perceptive individuals to comprehend the enormity of our productivity problems is Thomas J. Murrin, president of Westinghouse Corps. Public System's Co. In a truly superb speech delivered at Fordham University, Mr. Murrin outlines the reasons for our productivity dilemma, the impact it has on our economy and international competitiveness most importantly, what we as individuals and as a nation need to do in order to solve our productivity problems

A year and a half ago, I traveled to Japan with Tom Murrin on a tour of Japanese industry sponsored by the American Productivity Center. I benefited greatly from his perceptiveness on the productivity issue. I know that our colleagues will also benefit greatly from Tom Murrin's insights if they take a few moments to read his important remarks:

The remarks follow:

AMERICAN STRATEGIES FOR PRODUCTIVITY AND PROFITABILITY

Thank you-and good evening, ladies and gentleman.

It is a pleasure and privilege for me to participate in this Sievers Memorial Lecture Series.

As we enter the decade of the '80s, an increasing number of discerning Americans grow more concerned about our prospectsas a nation-of being able to come to grips with the economic and industrial challenges that we are facing.

Our country is poised on the brink of a major industrial and economic crisis brought on by more than a decade of low capital investment; limited R&D spending; high labor demands; and too little management attention to productivity and quality improvement-to cite just a few factors. This has been encouraged by a myriad of federal laws and regulations which have inhibited capital formation-and constitute an implicit industrial policy that has led to a disastrous decline in U.S. productivity.

In addition, this industrial and economic crisis makes much more difficult the concurrent revitalization of our national-securimilitary capabilities-necessary counter the growing Soviet military and political threats. But that is a separate sub-

As you probably are aware, the growth rate of America's industrial productivity slowed down in the "70s—and came to a screeching halt at the end of the decade. Our productivity actually declined a couple of points in 1981.

As a result, we as a nation are steadily becoming non-competitive in much of the

world market place.

During this same period, productivity kept rising in most other industrial nations-and particularly in the Far East. Consequently. some foreign companies which could once survive only in their protected home mar-kets can now compete with American industry everywhere-including our home markets here in the United States.

The challenge to American industry-and consequently to the American economy, and our people's security and prosperity-is awesome. In industries in which America was preeminent-steel, ship-building, automobiles, consumer electronics—our leadership

has been stripped away.

To help calibrate you on this challenge. let me cite the following information from a recently published report, which we've verified with our own analysis-concerning a product that we're all familiar with; the automobile: "Ford Motor Company's better plants turn out an average of two engines a day per employe using 777 square feet of space; the plants have up to three weeks of backup inventory, and use over 200 labor classifications. In contrast, a Toyota plant turns out nine engines a day per employe, or more than four times as many as Ford's; it uses only 454 square feet of plant space per engine, or less than 60 percent of Ford's. A Toyota plant has only one hour of backup inventory and only seven labor classifications, less than 4 percent of Ford's"

Of crucial concern to industry, and the future health of much more of our American economy-is the current targeting by the Japanese of micro-electronics, computers, communications, machine tools, and robots-as the next industries for Japanese

world dominance.

In regard to robots, for example, Japan has in place several times the number of robots as the United States-and is far in advance of the rest of the world.

By 1981, they had installed over 60,000 robots-while we in the United States have

installed about 4,000.

There are now over 200 companies in Japan producing robots. Last year they produced some 24 thousand-and they expect to double that this year. Their typical robot producer is apparently planning to triple production over the next four to five years suggesting output by then to be 150 to 200

thousand robots per year.

America must not lose these current battles for industrial supremacy-since these advanced technologies will be the foundation industries for every industrialized nation's economy for the next several decades.

While we in the United States have the technology, the people, and the other resources to meet these economic challenges, our response will probably be insufficent-if things continue on their present course.

So, doing it the same way we've always done it will no longer be sufficient!

Consequently-during the last three and a half years-we at Westinghouse have been studying extensively the "behind the scenes" reasons for the progress of many Japanese companies.

One of the most important lessons we've learned from these studies is that management must be willing to discard outmoded business practices-and embrace new ideas.

Consequently, we are successfully adapting much of what we have learned-and combining what we adapt with some of our own innovations, to keep our business healthy, and to establish productivity and quality improvement as a way of life throughout the corporation.

We have established six fundamental strategies for the improvement of our per-

formance

Three of these strategies are coequal. The first is to improve the management and motivation of our people-with particular emphasis on getting our people involved in the identification and solution of problems, through a participative management approach. Second is the introduction of new technology in both the office and the factory. And the critical third strategy is quality improvement-which must permeate the implementation of all our other strategies.

Note that quality improvement has equal emphasis! It is the quality of their products that has given the Japanese a strategic advantage in world markets-not just their productivity. It appears to me that many of their productivity improvements are actually byproducts of their emphasis on quality. That is, by literally "doing it right the first time", they don't waste resources fixing it, and this automatically improves productivi-

Productivity improvement, in its broadest sense, means improving the way we use all business resources-people's knowledge and labor; technology; energy; raw materials; plant and equipment; money, and time.

Our final three strategies address broad definition of productivity . . .

Our fourth strategy is to increasingly apply the techniques of value analysis to improve our products, processes, services and organizations. The fifth strategy is to improve the utilization of all our resources—including energy, raw materials and money. And the sixth strategy is what Peter Drucker calls "transnational production"-that is, strategically locating our new manufacturing facilities, particularly our feeder facilities, around the world, in a way that reduces our product costs, and improves our access to world markets.

In my view, this is the most challenging and promising program that we have ever undertaken. It may also be the most impor-

tant!

Similar progress must be made throughout American industry! Equally important, an effort from every segment of our society is needed to stimulate our national productivity.

Encouragingly, more and more voices from the boardrooms of Corporate America are speaking out. We see interest in productivity on our college and university campuses-and an ever increasing number of the nation's labor leaders are beginning to talk about it. Even the federal government has begun to acknowledge the problem-and to ponder their role in improving quality and productivity.

A recent study by Yankelovich, Skelly and White found that "the problem of the Japanese challenge to American industry arouses more concern among America's leaders than any social or economic issue that has been investigated by their organization in over 20 years.

The challenge would be grave enough if it were viewed simply as traditional competition in which production capability, management skill, and market forces largely determine the outcome.

But the Japanese challenge poses fundamental questions about the way we do business-about business and government relations, and about several features of our society, and the American character.

In other words, meeting the Japanese challenge is beyond the reach of any one company or industry-though company and industry efforts are certainly essential. In my judgment, even if every major corporation in the United States were to undertake programs to improve their productivity and their competitiveness, their efforts would not suffice against Japan's National Industrial Policy.

The goal of the Japanese has for sometime been to catch, and then surpass all others in economic performance. They have created a strategy and a set of institutional relationships to implement it-a cooperative

relationship among industry, government, labor, and academe and an organization, MITI, to orchestrate the process. As if the economic success of this system to date were not proof enough of its effectiveness compared to the American system, recent studies in South Korea, Taiwan, Hong Kong and Singapore indicate that it is the Japanese not the American-model that is being emulated by these newly industrialized coun-

Our competitive model is no longer being copied-because, to a worrisome extent, it has been rendered obsolete!

These East Asian countries-without significant natural resources-have achieved rapid growth by developing efficient, specialized manufacturing organizations backed by a system of social and economic incentives designed to promote work, savings, risk taking, investment, and labor mobility. They have achieved success by better organizing human and financial resources. Their rapid industrialization has grown out of an economic strategy designed to promote productivity, and international competitiveness.

Their game plan is national economic growth; their strategy is worldwide preeminence in selected industries-and their facilitating mechanism is a relationship among industry, government, labor, and academe that is fundamentally different from our American counterpart. We are being surpassed by a political/economic system that creates growth, strength, and wealth for a nation's economy-and thereby promises to provide for an improved prosperity, and standard-of-living for its people.

This game plan is well described in the new book, "The East Asia Edge". I support former Ambassador Reischauer's commentary on this book-which I quote: "Americans have become accustomed to the concept of Japan as no. 1", as Ezra Vogel put it in his book. Now, Roy Hofheinz and Kent Calder have thrown us a larger and more alarming challenge; it is clear that some of Japan's smaller neighbors are capable of repeating much of the Japanese miracle. Throw in the billion people of China, and you have a quarter of the world's population set to outpace the West and the rest of the world.

"The authors' thesis is not just stimulating; it is mind boggling. This is a fascinating and deeply significant book."

Accordingly, business, government, labor and academe in America can no longer maintain an attitude of indifference toward the industrial policies of other nations-nor can our institutions any longer continue in their present roles and relationships, and expect to witness anything other than the continuing decline of American industry's productivity, and international competitive-

A truly effective response to our economic problems requires a unified effort by these key segments of American society. We need a national commitment—and an explicit strategy for American Productivity Im-provement and International Competitive-

Thus, a major role by government is essential to the restoration and maintenance of America's industrial preeminence. Andas has been demonstrated by the recent comparative successes of the East Asian countries in productivity, and international competitiveness-that role must change substantially from the present governmental philosophies, policies and relationships toward business. The role of government aimed principally as a regulator and a watchdog of industry to "project" the people—leads to an adversarial relationship. that restricts and restrains industry, and hence, the nation's economy. This hurtsrather than protects-our people.

Our new model must recognize the responsibility of government to assure an increasing level of prosperity and standard of living for its people-and must recognize that that goal can be achieved only through a strong and growing national economy; attainable through increased industrial strength and growth. Government's role in such a process is active, cooperative, and supportive of industry.

I am not suggesting that we must copy our competition's political systems. Rather, the challenge is to find in ourselves a uniquely American response. A response that calls upon our creativity and ingenuity—to protect our standard of living, and assure our

national security.

To that end, let me suggest that the role of government in a National Strategy for American Productivity Improvement and International Competitiveness should focus on fundamental changes and actions in several areas; including: a global strategy for trade and investment; technology; education and training; domestic saving and investment policy; and to achieve these, we must develop a concensus-based process for policy formulation.

Let's look at these areas individually: First, in the area of international trade and investment, recent trends have given rise to the observation that other nations export unemployment—whereas we export jobs. While tariffs have generally fallen, nontariff barriers, investment requirements, offset demands and export incentives often fall with disproportionate severity on the U.S. economy.

The United States is too heavily engaged in the world trading system to ignore these trends. In 1980, for example, the United States exported almost one-quarter of its manufactured output, and imported over 21 percent of its manufactured consumptionmore than double the percentage of ten years earlier. Consequently, trade is no longer an "also ran". The line between what "domestic"-and what is "foreign"-is increasingly blurred. What other governments do to promote exports, and restrict investment, now impacts heavily on America's domestic economy.

The U.S. government should be applauded for intensifying its effort to break down foreign barriers to U.S. exports. But if we cannot be successful soon, then our policymakers should consider selective measures to enable our industries that are targeted by foreign industrial policies to compete fairly.

At the same time, the U.S. government should propose new negotiations aimed at establishing a set of common rules that apply to all.

In an era when export markets are becoming the world's most promising-and sometimes only-opportunities for economic growth, the United States government sometimes seems intent on dealing itself out of export opportunities abroad. For example, while other governments put together attractive financing packages in support of their exports, the U.S. government has adopted a negative attitude toward the Export-Import Bank. Studies by Wharton Econometric Forecasting Associates have estimated that for every dollar of interest differential that Exim loans out, the Federal Government gets back roughly nine to ten dollars in net revenues-and state and local

governments another four dollars-mainly through increased tax revenues from in-creased economic activities, and the reduction of various welfare payments.

What is needed is a binding international agreement on export financing that sets firm limits on interest rates, and the duration of loans financed by governments.

To encourage serious international negotiations, the U.S. government should meet other governments' financing offers in whatever way it takes to compete effectively. Present lending ceilings could be greatly increased, or removed entirely, with instructions to match foreign offers on an equal basis. Also, Congress could let the Ex-Im Bank compete for funds in the private sector-and appropriate only those interestequalization funds needed to meet foreign competition.

Overall, our United States maintains more export disincentives than any other nation in the world. While many-if not all-may justified individually, their collective effect is frightful.

Therefore, much must be done to attack these disincentives; including:

The clarification of the Foreign Corrupt Practices Act, so that present ambiguities do not frustrate legitimate business opportuni-

The revisitation of antitrust problems generally-with a view to examining these problems in the context of a global market where global competition exists; and,

A revisitation of the tax structure to enhance export opportunities, and stimulate U.S. participation in global markets.

Our future economic survival depends upon our increasing participation in world markets, it is imperative that we develop a global strategy for trade and investment by providing incentives which match foreign competition-and by removing the disincentives that we currently have in place.
Second, technology. While the United

Second, technology. While the United States leads the world in spending for basic research and development, our technological leadership has eroded in several key areas that have a profound effect on our world competitive position. The economy of a modern industrial society is driven by rapid development and application of technology in products, services and manufacturing processes.

Our major competitors include a Technology Stragegy as an explicit part of their National Industrial Policy.
For example, the Japanese and the

French are concentrating on aerospace, electronics, communications, robots, ma-chine tools, and computers. These are all major industries of the United States that are driven by rapid technological evolution.

Recent history suggests that a foreign national thrust into a chosen market or technology will successfully acquire very large U.S. and world market shares from American firms competing individually.

Therefore, an American response must be formulated and implemented to ensure our competitive strength, and avoid an erosion of our national capabilities. Such a response should include:

Joint multi-firm, government-laboratory and university research ventures that have government approval-and are focused to supply basic technology to meet market requirements.

Manufacturing Technology programs to stimulate the development and deployment of advanced manufacturing techniques-as exemplified by the Department of Defense's Manufacturing Technology and Technology

Modernization programs. Through this mechanism, the government removes barriers and provides incentives for its contractors to pursue higher risk-and higher payoff-technologies. These advances result in substantial savings to the government, contribute to the national-security-and help create a domestic capability that is of substantial value to the economy. And

Intelligence gathering; in which

Government-through its branch agencies-cooperates with industry and academe to assess the direction and nature of foreign competitive threats. This is an essential ingredient for effective executive policy and legislative initiatives-as well as business planning. Such coordinated efforts are necessary to provide the quality of information required to support successful government and business strategies.

Third, we must recognize that America's education and training system is poorly matched with the skills needed for modern U.S. occupations. While Americans are among the most educated people in the world, they are not as well-trained, in many cases, as are workers of our foreign competitors. Consequently, we are faced with a serious and growing shortage of critical scientific and vocational skills that are in high demand, and essential to improving Ameri-

can productivity.

The response to our education system's shortcomings ought to be similar to our response to the Sputnik launch-that is, a national effort to improve the quantity and quality of college trained engineers and scientists at all levels. Japan graduates more engineers than the U.S.—even though it has half our population. And France has decided to double its national force of computer engineers over the next four years-in response to industrial needs and opportuni-

Recently, the Nation Science Foundation reported that about 10 percent of the fulltime engineering faculty positions were vacant at the beginning of the 1980-81 academic year—while the IEEE reported that more than 37 percent of the PhD engineering graduates in 1981 were not available to U.S. industries or universities because they are non-US nationals with temporary student visas. Action must be taken to upgrade faculty salaries and capital facilities for higher education in engineering and the sciences-and we must provide loans and loan guarantees, for students in engineering and the sciences.

In addition, the typical Japanese factory worker-such as those who produce the Toyotas noted earlier-has had about 30 percent more classroom hours than our workers; has passed a rigorous Japanese fluency test, and acquired the ability to read English. When first employed, he goes through a several month orientation program-and then he becomes a career-long member of a quality circle.

Obviously, we have much catching up to do in our factories-as well as our offices

and laboratories.

Such efforts must be coupled with effective vocational training for those skills are obsolete by the application of technologically advanced manufacturing.

We need leadership, on a national scale, to formulate an effective alliance of private industry, labor and government with commu-nity colleges and vocational training schools to emulate for industry the enormous beneficial impact that the Land Grant Agricultural Colleges have had over the years. This suggests an expanded role for many community collleges that should have a very beneficial effect on the work and personal lives of many Americans.

Local organizations—such as "Councils for Needed Skills"-could be created which would bring together educational institutions with industry and labor to develop curricula; define training equipment needs; and identify part-time faculty from industry and labor to satisfy the needs for increasing skill

Assuming the other elements of our strategy are in place—including an aggressive trade policy; strategic education programs; joint R&D projects, productivity including government procurement policies and flexible anti-trust policies-we must recognize, fourthly, that the program may still fail without sufficient capital resources for the critical growth industries. While capital is available in the U.S., its availability does not necessarily coincide with the long term interests of the U.S. Economy. This problem exists for several reasons, such as:

Historically, U.S. firms have tended to focus on short-term profits. In large part, this reflects our reliance on the equity markets for capital-and our preoccupation

with stock market prices

Since World War II, the U.S. has enjoyed a technological advantage over the rest of the world-and has not had to critically examine the relationship between capital investments and its technological base; and

Our earlier history of long-term, realgrowth meant that there was a sufficient capital supply to fund almost any ventureand apparently this has bred inattention to

our current capital needs.

Our inattention to the problem of capital formation and strategic domestic investment has led to a situation where now the future of the technological and hence, industrial base of the U.S. is by no means assured. A Commerce Department study indicates that in 1980, 45 percent of all new U.S. investment in high technology plants and equipment came from foreign sources. In a sense we are losing control of our own economic destiny!

While the Economic Recovery Act of 1981 has helped with this problem, there are several other opportunities available to us .

Promising ways to encourage savings and capital formation include elimination of taxation on interest earned on savings-and allowances for a speedier write-off for investments in new plants and equipment.

This is demonstrated in Japan, where earned interest is tax-free-when one invests in government savings programs. This explains, in part, why the Japanese level of

savings is several times ours.

Two relevant proposals recently emerged at a hearing before the Joint Economic Committee offer an opportunity to enhance the capital resources for new ventures.

One calls for a revision of federal laws governing pension funds—in relation to the Employees Retirement and Income Security Act—to permit some of the 800 billion dollars in pension funds to be invested in venture capital projects.

The GAO estimates that if only one percent of the total pension funds were made available, that would be six to eight times the total venture capital invested last year.

The second proposal would allow for "dif-

ferential" capital gains tax rates. Currently, all long-term capital gains are taxed at 20 percent—whereas the proposal calls for taxing "new" business ventures held for a certain period of time-at a lower rate, or possibly not taxing them at all.

If we are to regain control of our economic destiny, then we must ensure that adequate capital resources are available.

Fifth and finally, there is virtually no disagreement that when Government, Management, Labor and Academe all work in a complementary fashion toward shared objectives, the most difficult challenges become manageable. But what is lacking are effective mechanisms to bring the leaders of these facets of society together, on neutral ground-in pursuit of common goals.

Therefore, we encourage the Executive Branch to adopt a Consensus-Based Policy Formulation Mechanism-to provide leadership in resolving issues on which there is a broad agreement that solutions must be developed and implemented.

For example, the retraining and relocating of displaced workers is the kind of high priority problem that requires the concerted and coordinated effort of Industry, Labor, Government, and Academe. It is an issue on which industry, labor, government, and academic policies and actions must be cooperatively devised-and carefully coordinated.

This is an issue that has near universal consent on the need for action-but no consensus yet on the appropriate actions. There are approximately fifty bills in the Congress to address aspects of the current dichotomy of having critical shortages of skilled workers in some industries-while tens of thousands of workers from other industries swell the ranks of the unemployed.

To this end, a legitimate and necessary role for the Cabinet Council on Economic Affairs-in close cooperation with industry, labor and academe-would be to assist in the adjustments from mature and declining industries into new and emerging opportunities.

Consensus-Based Policy Formulation pilot project should be initiated to develop a detailed and comprehensive set of recommendations for Executive policy, legislation, industrial and academic initiative. The project could begin by soliciting the full participation of the major labor organizations, the major industrial organizations, the principal associations of academic institutions; and the involved departments of government, and their oversight committees in Congress.

Such a Policy Formulation Task Forcewith expertise from these organizationshas the capability to effectively integrate the political and economic needs, and constraints, of all effected segments of society.

This specific training and education project could be the first in a series of efforts to formulate a national consensus on issues that require national attention and

These are some of the key things that we as a nation need to do to effectively mobilize our resources in the face of today's economic challenges.

These then are "American strategies for productivity and profitability".

If we take such actions soon, we can regain our position of economic leadership during this decade-and the United States of America will be healthy, vibrant, and secure, once again.

Thank you.

## TRIBUTE TO MR. JOHN HOOVER

# HON. GREGORY W. CARMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES Thursday, December 16, 1982

• Mr. CARMAN. Mr. Speaker, I wish to give special commendation to Mr. John Hoover, an exceptional member of the American Embassy in Tokyo, Japan. Mr. Hoover recently assisted me during a special factfinding mission on behalf of the U.S. House of Representatives Banking Committee to promote international trade.

I was very impressed by the organization of the American Embassy in Tokyo. Through Mr. Hoover's efforts my meetings with trade officials in the public and private sectors in Japan

were very successful.

Sharing with you a little of Mr. Hoover's history is my pleasure. He was born in Florida in 1945. He holds degrees from the University of Kansas. Mr. Hoover has served in the U.S. General Accounting Office, in the Consular Office is Ecuador and presently holds the post of economic officer in the American Embassy in Tokyo.

Mr. John Hoover's exceptional efforts bring credit to himself, the American Embassy in Tokyo, and to the United States. We are truly fortunate to have him as a member of the U.S. Foreign Service.

A VOTE OF THANKS TO MAINE POTATO GROWERS FROM THE STEEL TOWNS OF PENNSYLVA-NIA

## HON. DOUG WALGREN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES Thursday, December 16, 1982

Mr. WALGREN. Mr. Speaker, on behalf of the unemployed steelworkers and all citizens in my 18th District in western Pennsylvania, I want to express our thanks to the Maine potato industry and the Northern Maine Family Farm Core for donating 90,000 pounds of Maine potatoes to unemployed steelworkers in Pittsburgh.

This Saturday, hundreds of Pittsburgh steel families will be able to receive 10-pound bags of potatoes at Three Rivers Stadium because of the generosity of these potato growers in Maine. With 135,000 Pittsburgh area residents now out of work and with little hope for economic recovery, this assistance is very much needed and welcomed.

The American steel industry, hard hit by this depression, has been one of the many victims of unfair, illegal foreign trade practices. The American potato industry shares the same plight.

In 3 years the volume of foreign potatoes entering the United States has increased by 700 percent. In 1976, Canada exported \$3.3 million worth of potatoes to the United States. By 1981, that figure had risen to \$32.3 million.

The entry of foreign potatoes into the U.S. market has been accelerated because of unfair government subsidization practices by Canada. The U.S. International Trade Commission has determined that Canada has a wide range of programs, including a comprehensive low-interest loan program and a freight-rate assistance program, which clearly aids the Canadian producer's effort to sell potatoes in the United States below the cost of production. Experts believe that the Canadians now have a 3-to-1 advantage over the American potato grower.

At the same time Canadian law prohibits the importation of bulk loads of American potatoes into Canada, and the redtape associated with trying to sell other American potato products in Canada has severely hampered American potato marketing in that country.

The difficulties experienced by potato growers in Maine and other American States are very similar to those that we have endured in the steel industry. Illegal, foreign subsidization has threatened thousands of steel jobs every year.

Clearly the time has come for citizens and their representatives in Congress from all the beleaguered sectors of our economy to join together on behalf of fair trade. In appreciation of the generosity of the Maine potato growers and in recognition of the importance of their case, I have today added my name to a letter that Congresswoman Olympia Snowe has sent to U.S. Trade Representative William Brock urging prompt negotiations with Canada for an orderly marketing potato agreement.

I hope all Pittsburgh residents will join me in writing to Ambassador Brock, The White House, Washington, D.C. 20500, on behalf of our friends in Maine. We will either all join together to save our steel industry, our potato industry, and all the other targets of unfair illegal foreign trade practicesor we shall surely each fall victim one after the other.

TRIBUTE TO HON. JOHN L. NAPIER

## HON. BUTLER DERRICK

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES Thursday, December 9, 1982

• Mr. DERRICK. Mr. Speaker, I would like to thank my friend and colleague from South Carolina, FLOYD SPENCE, for reserving time today to honor a departing Member of our State delegation, JOHN L. NAPIER.

JOHN NAPIER has represented the Sixth District of South Carolina in the 97th Congress, after winning the seat in 1980 in his first effort as a political candidate. Prior to that he ably served the people of South Carolina as a top aid to Senator STROM THURMOND and as chief minority counsel, first of the Senate Veterans' Affairs Committee and then of the Senate's Special Committee on Official Conduct.

JOHN was born and raised in Marlboro County, S.C. He is a graduate of Davidson College, with a degree in political science, and he earned a law degree from the University of South Carolina. He is admitted to practice before the Supreme Courts of the United States and South Carolina, and is a member of the American and South Carolina Bar Associations.

JOHN and I sit on different sides of the aisle and we do not always vote the same way, but I value his friendship greatly and can attest to the devotion and vigor with which he has supported the interests of our State and Nation. His work on the Agriculture Committee and Veterans' Affairs Committee showed him to be an unusually able legislator for a freshman.

John, I will personally miss your presence in this Chamber. I would like to wish you and your family the best of luck in what is certain to be a very

bright future.

## TRIBUTE TO RALPH E. SMITH

## HON. RONALD M. MOTTL

OF OHIO

IN THE HOUSE OF REPRESENTATIVES Thursday, December, 1982

• Mr. MOTTL. Mr. Speaker, I should like to give recognition today to a man who has both served his country in the U.S. Army and as a dedicated public servant assisting fellow veter-

Ralph E. Smith, director of the VA Regional Office in Cleveland since 1977, does an excellent job of providing veterans in Cleveland the best service possible.

While representing the 23d Congressional District the past 8 years and serving on the Veternas' Affairs Committee, I have frequently called upon

Mr. Smith for assistance. He has provided it without fail.

Veterans who go to Ralph's office with a claim or some problem are assured of receiving fair, courteous, and professional treatment.

His fine work has not gone unnoticed. In 1980, he received the Senior Executive Service Performance Award. In 1970, 1971, 1972, and 1977, Mr. smith won the Superior Performance Award. His effectiveness in implementing cost savings measures won him the Presidential Commendation in 1965.

Mr. Smith joined the Veterans' Administration in 1959 as a claims examiner at the Pittsburgh, Pa., regional office. He has held several positions in data processing management and was named Director of the Systems Development Service for the VA in Washington, D.C., in 1972. From 1973 until 1977, he was project management officer for the development of the VA advanced computer system now in operation throughout the United States. He is a graduate of Duquense University and the University of Pittsburgh. Mr. Smith is a resident of Broadview Heights. He and his wife. Sylvia, are the parents of three children, Alexander, Robert, and Rebecca.

The 97th Congress and our predecessors have enacted some worthy legislation for our veterans, but the legislation is not worth much if we do not have good people in the field carrying out our policies. For this reason, Directors like Mr. Smith make us all more effective legislators. For this I offer him my deepest gratitude.

BESS TRUMAN

# HON. E de la GARZA

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 15, 1982

• Mr. DE LA GARZA. Mr. Speaker, it is fitting that we have set aside a day to pay official tribute to Bess Truman. When I think of Mrs. Truman, I remember the autographed picture her husband, President Truman, gave me. I will keep it always with pride. Bess Truman was like her husband in that they both shared a special strength of character that reflected the times, and endured her to the American people long after leaving the White House. Always she put her husband above all else. She was first and foremost a loving wife, and the President was a fortunate man to have such a woman at his side. The recent passing of Mrs. Truman marks the close of an era for those of us old enough to remember this silent, but dedicated woman behind the man.

MRS. HARRY S. TRUMAN

# HON. RICHARD BOLLING

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES
Wednesday, December 15, 1982

• Mr. BOLLING. Mr. Speaker, Mrs. Harry S. Truman was one of the finest and most effective women who ever lived in the White House as a President's wife. She felt that her role was to support and to help her husband and her daughter, Margaret. She did that quietly, with great dignity and effectiveness. She never allowed the welfare or the privacy of her family to be impaired by those whose interest was primarily a story. For that reason she was not as well known as many first ladies.

It was my privilege to know the Trumans, the President, Mrs. Truman, and Margaret, well enough to know the truth that she had great influence on both of them. In my experience her influence seemed always benign. Beyond that she was a loving and delightful person with an abundance of character and charm. Mrs. Truman was at the same time a great lady and a simple person with whom it was a lot of fun to be with.

At crucial times in my life she was of enormous help to me.

I will miss her.

CLINCH RIVER MEETS ITS DEMISE

# HON. LES AuCOIN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES Thursday, December 16, 1982

• Mr. AuCOIN. Mr. Speaker, I would like to take a moment from the hectic pace of these last days before adjournment to urge the Senate to follow the recent action taken by the House and eliminate funding for the Clinch River breeder reactor.

Earlier this week, a bipartisan majority of the House voted to kill the project. As a long-time opponent of this boondoggle, I could not be more pleased.

The Clinch River project makes no sense economically or technologically and holds about as much promise for solving our energy problems as the MX has for reducing the size of the deficit.

If Clinch River was cost effective, there might be reason to support it, but it is not. The initial price tag for the Clinch River breeder reactor read \$422 million. Today, the General Accounting Office has pegged the cost at \$9 billion. That is 20 times the original estimate—20 times more out of the people's pocket.

If the breeder's design was technically up to date, there might be some jus-

tification for it, but it is not. The Clinch River breeder is a technological dinosaur. It is already outmoded by current breeder research and development efforts in the United States and other nations.

If Clinch River was vital to the U.S. energy security, the project might have merit, but it is not. Originally we were told there was an escalating demand for electricity and diminishing supplies of uranium. Both assumptions have proven false. Electrical demand has plummeted and domestic uranium supplies have doubled in the last decade. Private industry has not beaten down the door to invest in the breeder because they know that breeder technology would not be economical until well into the 21st century.

For only one-quarter of the project's cost, we could insulate enough homes to save the equivalent of 48 million barrels of oil for the next 25 years.

If Clinch River was a priority for the American people, I might give it my support, but it is not. The cheering section is empty. Members on both sides of the aisle as well as the National Taxpayers' Union and environmental and church groups agree that Clinch River must go. Even the utilities have given up their front row seats. Their share of the project's cost has shrunk from 50 percent to less than 9 percent.

I have heard a number of my colleagues, many who support Clinch River, stand in this well and point to budget fat to justify slashing health care for the elderly, education for our children and housing for the poor. How do you explain to the people back home that we can afford to spend billions on a project of dubious value, but cannot afford to put them back to work? Is not the average American bearing a heavy enough burden in these trying economic times without having to shoulder this political pork too?

Proponents of Clinch River have tried to sell Congress and the American people a bill of goods. The House did not buy it and I hope the Senate will see fit to join us in killing this boondoggle of a breeder once and for all.

TRIBUTE TO MR. KENT M. WIEDEMANN

# HON, GREGORY W. CARMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES Thursday, December 16, 1982

• Mr. CARMAN. Mr. Speaker, I wish to give special commendation to Mr. Kent M. Wiedemann, an exceptional member of the American Embassy in Shanghai, China. Mr. Wiedemann recently assisted me during a special factfinding mission on behalf of the

31861

U.S. House of Representatives Banking Committee to promote international trade.

I was very impressed by the organization of the American Embassy in Shanghai. Through Mr. Wiedemann's efforts, my meetings with trade officials in the public and private sectors in China were successful.

Sharing with you a little of Mr. Wiedemann's history is my pleasure. He holds degrees from San Jose State University and the University of Oregon. Mr. Wiedemann has served in the Peace Corps and presently holds the post of deputy principal officer and chief of the economic section in the American Embassy in Shanghai.

Mr. Kent M. Wiedemann's exceptional efforts bring credit to himself, the American Embassy in Shanghai, and to the United States. We are truly fortunate to have him as a member of the U.S. Foreign Service.

HON. KEN HOLLAND

# HON. BUTLER DERRICK

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 9, 1982

• Mr. DERRICK. Mr. Speaker, I am certainly pleased to have this opportunity to address this body in recognition of my dear friend and colleague who will be leaving this Congress shortly—Ken Holland.

During his tenure in this body Ken has served South Carolina well. He has worked hard to serve the interests of our State and those of his constituents and has likewise served the Nation with distinction. Those of us who have had the privilege of working with Ken personally on various issues agree that he is an independent thinker who remains loyal to his convictions and who keeps his commitments.

As a member of the House Ways and means Committee, he has worked hard to preserve the textile industry, which is so vital to the economic base of South Carolina.

In addition to his great ability as a legislator he has established quite a reputation as a country musician and as an after dinner humorist. I know that he will be successful in whatever he attempts to do in the private sector and am confident that he will continue to live life to the fullest as he returns to South Carolina. Although I am losing a respected colleague, I know the friendship we have developed over these years will remain strong in the years ahead.

TRIBUTE TO DR. ANDRES D. ONATE

# HON. GREGORY W. CARMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 16, 1982

• Mr. CARMAN. Mr. Speaker, I wish to give special commendation to Dr. Andres D. Onate, an exceptional member of the American Embassy in Beijing, China. Dr. Onate recently assisted me during a special factfinding mission on behalf of the U.S. House of Representatives Banking Committee to promote international trade.

I was very impressed by the organization of the American Embassy in Beijing. Through Dr. Onate's efforts my meetings with trade officials in the public and private sectors in China were very successful. Sharing with you a little of Dr. Onate's history is my pleasure. He was born in Arizona in 1940. Dr. Onate holds several degrees from the University of Arizona and has served in the U.S. Air Force. He has written the book, "Mao and the Chinese Communist Party." Dr. Onate presently holds the post of economic officer at the American Embassy in Beijing, China.

Dr. Andres Onate's exceptional efforts bring credit to himself, the American Embassy in Beijing, and to the United States. We are truly fortunate to have him as a member of the U.S. Foreign Service.

VOLUNTARISM IN GASTON COUNTY, N.C.

# HON. JAMES T. BROYHILL

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 16, 1982

• Mr. BROYHILL. Mr. Speaker, for years I have encouraged the people of my congressional district to become involved in volunteer activities in their communities. Government does not have the resources to do all that needs to be done, but even if it did, I believe that the concept of voluntarism would still be a much needed one.

Recently I wrote my weekly newsletter on the subject of voluntarism with an emphasis on the involvement of President and Mrs. Reagan in promoting this activity. I have received a letter from my good friend, Barbara Voorhees, the president of the Junior League of Gaston County, N.C., and I would like to share it with my colleagues:

I just finished reading your most recent Washington Report and your excellent comments concerning voluntarism. I felt compelled to write and say that the Junior League is committed to promoting voluntarism in Costne Country.

tarism in Gaston County.

For almost twenty-five years, League members have given hundreds of thousands

of hours in service to local agencies and on community boards. We initiated such agencies as the Family Counselling Service, Gaston County Speech and Hearing Clinic (now a part of Gaston Memorial Hospital) and the Information and Referral Service.

Our most recent project has been the creation of a voluntary action center—Volunteer Gaston—which was started last spring in coalition with the United Way. Set to "go public" after the first of the year, Volunteer Gaston aims to bridge the gap between agencies needing volunteers (especially service agencies) and individuals of all ages seeking to volunteer.

This fall, we also directed a Foster Family Media Campaign and have begun preparing a slide presentation to increase the number of foster families in the county. This has been done jointly with funds from the First Presbyterian Church and resources from the Department of Social Services with League volunteers doing the leg work.

I cite these two examples to demonstrate that the League is realizing the importance of broad-based community involvement through coalitions as the best hope of solving community problems, in the light of diminishing resources. I am excited about the possibilities facing us in the future, not only in terms of projects, but also in terms of the expertise our members can share as highly trained advocates and volunteers.

Thank you for recognizing the importance of volunteers and voluntarism.

SISTER OLIVE LOUISE DALLAVIS, C.S.J., LAUDS HON. RICHARD BOLLING

# HON. THOMAS P. O'NEILL, JR.

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 16, 1982

• Mr. O'NEILL. Mr. Speaker, I had the pleasure of participating in a tribute to the Honorable Richard Bolling in Kansas City, Mo., on October 3. Sister Olive Louise Dallavis, C.S.J., president of Avila College in Kansas City, offered the invocation and I want to take this opportunity to share her words with my colleagues:

"The quality of a person's life is in direct proportion to his commitment to excellence regardless of the chosen field."—Vince Lombardi.

And the wind blew and the rain beat And the house stood firm Being built on the rock of faith.

Richard Bolling is a man about whom this Gospel verse could be written—the weather-beaten public servant who stood his ground. A public servant is a whipping boy. He must stand above interest groups and must muster all his talents to do his political job for the good of the United States first and then its constituencies. Only he as an elected public servant knows his job and its tremendous scope. The areas of government demand representatives with courage, stamina, fortitude to withstand the pressure of myopic forces.

Public thanks are given to our distinguished citizen, Mr. Bolling, who dedicated decades of his life to being that public servant. He loved his work, he was faithful, he did his best.

From Proverbs:

The wise man, Richard Bolling has the sincere desire for instruction;

His desire for instruction is his love of wisdom;

And his love of wisdom is the keeping of laws;
And the keeping of laws is his assurance of

immortality; And immortality brings him to God.

So be it.

Bless us, Oh God, and these your gifts which we are about to receive from your Bounty. Amen.

NATIONAL SCIENCE CENTER FOR COMMUNICATIONS AND ELECTRONICS

# HON. DOUG BARNARD, JR.

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 16, 1982

Mr. BARNARD. Mr. Speaker, I want to bring to your attention the Foundation for the National Science Center for Communications and Electronics, a nonprofit, tax-exempt organization created in 1980 by a partnership of industry, science, education, and government. This dynamic group under the leadership of Mr. Robert W. Sarnoff, chairman, and Dr. George M. Snead, Jr., president, is developing plans and raising funds to construct the National Science Center for Communications and Electronics. You will recall that the creation of this center was endorsed by a concurrent resolution passed by this Congress on December 13, 1982.

Those of us in position of responsibility nationally and in Georgia share with the foundation a strong interest in the continuing and critically important role that communications and electronics, science, and technology play in the national security and economic well-being of this country.

The rapidly expanding requirements for highly skilled personnel, particularly in the high technology areas of communications and electronics, are already straining manpower resources. Further, I am advised that the U.S. communications and electronics industry forecasts a need for twice as many technicians and paraprofessionals in the next 5 years, while problems remain in attracting and training qualified personnel. The same forecasts also predict a serious shortfall in engineers during the same period. In addition, the need for trained technical personnel will increase dramatically in the military. The U.S. Army will double its requirements for communications and electronics personnel in the same 5 years, with similar patterns in the other military services.

The importance of trained scientists, engineers, technicians, and other technical personnel to the future of this country becomes even more evident when you consider some basic facts. In terms of economic impact, communica-

tions/electronics is the largest growth industry in the United States. Currently it provides in excess of \$200 billion annually in goods and services. This is forecast to grow to \$400 to \$500 billion annually by 1990. At the same time, communications/electronics industries face the most extensive modernization and technological replacement programs in history as fiber optics, microprocessors, robotics, integrated computer/communications networks, and other products of communications and electronics research and development enter production and expanding use.

The competition for these market opportunities will be aggressive. We must all be aware that our communications and electronics industries have been facing and in the future must be prepared to respond to increasing international competition for their established and created markets in the United States and overseas. Experience should teach us that losses in both domestic and overseas markets are difficult to recover. It is therefore in our national interest to insure that qualified engineers, scientists. and technicians are available in the numbers required by our communications and electronics industry to operate effectively and competitively. We must also be aware of the much greater emphasis being given to science, engineering, and mathematics education in countries of Western Europe and in Japan and the U.S.S.R., and the resulting higher numbers of graduates

at all levels. The National Science Center for Communications and Electronics Foundation has developed a unique response to this challenge, drawing upon the partnership of industry, scientific, military, and academic communities. The foundation proposes to fund the design and construction of the National Science Center for Communications and Electronics and to donate the facility for use onsite and through electronic extension for the introduction to science and technology and the education, training, and retraining of the broadest possible range of Americans, including:

Forty thousand students annually from all military services who attend the U.S. Army Signal School at Fort Gordon, the largest most advanced training center in the world for communications and electronics.

Young people from the elementary to the postgraduate levels in our educational systems.

The general public, with emphasis on understanding the extensive role of communications and electronics in our everyday lives and in our national well-being.

I am pleased that the Augusta-Fort Gordon, Ga., area has been chosen as the site for the Center. This combines the multiple advantages of a location

near the major supporter and user of the Center, close to existing major transportation routes, in an area permitting easy year-round access by multiple means, and in a community dedicated to the support of the Center as a national asset.

I am also confident that the NSCCE Foundation will succeed in its efforts to raise from the private sector of the United States the \$18 million needed to construct the center. I urge all interested individuals and organizations to contact the foundation at its offices in the Armed Forces Communications and Electronics Association International Headquarters Building at 5641 Burke Centre Parkway, Burke, Va. 22015; telephone (703) 425-8517.

Recognition is due to the community of Augusta and the central Savannah River area for growing pledges and support, to the New York Council of the U.S. Navy League for its sponsorship of the center as a supported project, and to the following initial corporate supporters: AT&T Co., Bell Laboratories, BDM, Ford Motor Co., Harris Corp., Litton Industries, Magnavox Government and Industrial Electronics Co. (a subsidiary of North American Phillips Corp.), Rockwell International Corp., Southern Bell Telephone Co., United Technologies, and Western Electric.

TRIBUTE TO REX LAYTON—CITY CLERK OF THE CITY OF LOS ANGELES

# HON. AUGUSTUS F. HAWKINS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 16, 1982

• Mr. HAWKINS. Mr. Speaker, as dean of the Los Angeles city congressional delegation, I would like to pay tribute to a dedicated public servant, Rex Evans Layton, the retiring city clerk of the city of Los Angeles.

Born in Safford, Ariz., in 1920, Rex moved to Califorina where he and his lovely wife Helene have raised their three children, Kristine, Steven, and Robert. Rex is a graduate of the University of Southern California and a registered public accountant in the State of California.

Rex Layton has served Los Angeles as city clerk for the past 14 years. Rex began his employment with the city of Los Angeles in 1946, when he started as a registered public accountant for the city clerk's office. He became city clerk of Los Angeles in 1968 and, since that time, has carried out the numerous responsibilities of this job with honor and distinction.

The city clerk is responsible for the collection of hundreds of millions of dollars in various taxes for the city, and for the administration and ex-

penditure of the budget funds of the city clerk and the city council.

The city clerk is responsible for the appointment, discharge, suspension and transferring of hundreds of employees of the city clerk's office and of the city council, the supervision and conducting of all city municipal elections, and the maintenance of liaison relations with the mayor, city council, city departments, and the public.

The city clerk is also responsible for the city seal, maintenance of an index of all records, maintenance and updating of records for each of the more than 800,000 parcels of real property within the city, direction of the activities of the city's record management program, and the administration of oaths of office to elected and appointed officials.

The presence of the city clerk or a deputy at each meeting of the city council and at each meeting of the 15 standing committees of the city council, and preparation of the minutes of these proceedings is, in itself, an awesome task, and Rex has overseen this function with dedication and thoroughness.

During his term as city clerk, Rex has received two outstanding evaluations from Mayor Sam Yorty and four outstanding evaluations from Mayor Tom Bradley.

Rex Layton is the only general manager for the city that has achieved a fourth step merit rating. He was also recently chosen as "Employee of the Year" for the city of Los Angeles for 1982.

Rex Layton is a member of the International Institute of Municipal Clerks, a world-wide organization of city clerks with a membership of nearly 6,000 persons. Rex served as president of the organization from 1979 to 1980, chairman of its regional reorganization committee in 1980, and chairman of its membership committee from 1972 to 1978.

Rex Layton is also a past office holder in the City Clerks' Association of California; past president of the Southern California City Clerks' Association; past president of the city clerks' department and former board member of the League of California Cities; and is active in the Municipal Finance Officers' Association and the Optimist Club.

Members of Congress, as well as numerous Federal agency officials, know well the name of Rex Layton, for it is under his signature that we have received all official documents from the city over the past 14 years.

It is my pleasure today to extend the gratitude and appreciation of the Los Angeles city congressional delegation to Rex Layton for his many years of service to the city of Los Angeles.

A TRIBUTE TO MR. AND MRS. WILLIS BURKHARD CARMAN

## HON. GREGORY W. CARMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES
Thursday, December 16, 1982

Mr. CARMAN. Mr. Speaker, I rise today to offer special recognition to my parents, Mr. and Mrs. Willis Burkhard Carman, and the many contributions they have made to Long Island.

Like his father, grandfather, and great-grandfather, my father, Willis Carman, was born in Amityville, Long Island. He is a 10th generation, direct descendent of John Carman, one of the founders of Hemstead, N.Y., in 1643. My father graduated from Fordham Law School and set up a prvate practice in Farmingdale, N.Y. Willis Carman has been extremely active in the bar association of Nassau County, as well as in many charitable and civic enterprises. He has served as the Farmingdale village justice for many years, and has also served as judge of the Nassau County District Court.

My mother, Marjorie Sosa Carman, attended Skidmore College and married my father in 1927. She has raised a family of three, and, since the death of her father, Gregory Sosa, in 1952, has managed a thriving real estate concern.

As the son of Willis and Marjorie Carman, it is with deep pride and great pleasure that I recognize their valuable contributions to the citizens and communities of Long Island. The Christmas season is a time to remember and reaffirm the strong bonds between parents and their children. I feel extremely fortunate to have witnessed firsthand the contributions my parents have made to the growth and success of our community in Long Island. My brother, Willis Jr., my sister, Joan, and I have been nourished and enriched by their wisdom, devotion, and love. Whatever success I have achieved in my public service career, I owe, in large part, to their firm instruction and sound example.

I wish them continued health and happiness in their life together.

THE HUMAN DIMENSION OF THE HOUSE

# HON. ANTHONY TOBY MOFFETT

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 16, 1982

• Mr. MOFFETT. Mr. Speaker, I wrote a long goodby speech that presented my views about this institution, its problems, and its future. It sought to articulate what I have learned about the Congress in my 8 years here and it offered some proposals for reform.

But I decided instead to talk briefly about the human dimension of the House. When I came here in 1974, as part of that famous group of "Watergate Babies," I never anticipated that I would grow to love the institution in the way that I do. I never in my wildest dreams thought that I would develop such a respect for the Members here.

I keep thinking what a tragedy it is that the American public cannot see this place from the inside, in the way that those of us who serve here do.

The press and media people pack the gallery upstairs during a debate on a pay raise, but they rarely write or speak about the personal ramifications of the job here. This is not to complain. Every Member here feels that it is a supreme horor to serve as a Member.

But it is important that the public know more about what kinds of people serve here, how hard they work, the personal toll that is taken on individuals and families.

I have seen grown men here cry when their marriages were destroyed. I have seen grown men depressed about missing events that were important to their children.

In sports they have a term called "playing hurt," when players participate even when injured. Well, I have seen Members of the House "play hurt," Members who were ill and dragged themselves to the airport to keep an important commitment back home.

I have seen Members with serious illness or disease struggle to do a good job, to make rollcall votes and committee meetings.

The picture of the Congress presented to the public via the Abscam scandal was not a fair one. This is not a place where you can reach in and pick any seven Members and expect that they will accept money in a brown paper bag. It is not that kind of place and it is an insult to all who have served well here that such a picture of the Congress be presented.

Scandal is what sells newspapers and soap on the evening news. Pay raises and debates over them in this body are in the same category. But these things do not begin to tell the story of what happens here on a day-to-day basis.

What happens here on a day-to-day basis is a struggle to get things done, to do the right thing for our districts, for the Nation and the world. What gets in the way of that is familiar to all of us.

The hectic schedule is a problem. The lack of predictability in the scheduling. The tug and pull of various people and interests wanting our attention. The seemingly constant attention to getting reelected. The accompanying preoccupation with raising money. And, of course, the impact

that such a preoccupation has on policymaking.

There must be a movement developed to deal with these problems. I believe we should move to a 4-year term with a limit of three terms in the House and two 2-year terms in the Senate. I believe we should move to a 2-year budget and plug in a requirement that the Congress do meaningful oversight for 3 or 4 straight months each year.

Most importantly, we need campaign reform-a limit on PAC's, public financing, free access to media, and many other important changes. The political system is being contaminated by money and we must do something

about it.

Such dramatic changes must take place with pressure from the outside and I intend to do my share as a private citizen in that regard.

Being a private citizen again will not be altogether unhealthy. Getting out of politics for a time will give me an

important perspective.

But there will never be anything to take the place of the warm friendships I have developed here. I have not had the chance to thank each of my colleagues and staff for their kindness. I hope this statement will at least partially serve that purpose.

## WHITE-FROEB STUDY DISCREDITED BY SCIENTISTS

# HON. L. H. FOUNTAIN

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 16, 1982

Mr. FOUNTAIN. Mr. Speaker, after 30 years of service to the people of the Second District of North Carolina, I am about to retire from the U.S. House of Representatives. Before leaving I would like to submit, for the RECORD, an item dealing with an issue with which I and many others have long been interested; namely, the alleged effect of smoking on the health of the nonsmoker.

Mr. Speaker, let me briefly place the issue into its proper context. In 1978, the Subcommittee on Tobacco of the House Committee on Agriculture heard testimony from a vast array of eminent scientists and physicians on the issue of the effect of tobacco smoke on nonsmokers. Those individuals who testified generally agreed that no conclusive scientific evidence exists to support the claim that smoking affects the health of nonsmokers. in 1980, however, an article appeared in the New England Journal of Medicine by Drs. White and Feoeb entitled "Small Airways Dysfunction in Nonsmokers Chronically Exposed to Tobacco Smoke," in which the authors concluded that smoking in the workplace adversely affects the lung function of nonsmokers. This conclusion appeared to conflict with the testimony presented to the Subcommittee on Tobacco.

Since its publication, the White-Froeb study has been used to support both regulatory and legislative activities in the United States. For example, the study was referred to in testimony before the Civil Aeronautics Board during its recent consideration of rules regarding smoking aboard commercial aircraft. The National Research Council report entitled "Indoor Pollutants" which was issued in 1981 under an EPA contract also relies on the study. Finally, the White-Froeb study has received widespread attention in both State and local legislative and policy-

making bodies.

The White-Froeb study continues to play an important role in legislative considerations, despite the fact that the study itself has been heavily criticized by scientists and health practitioners. Most recently, at the 1982 joint meeting of the American Lung Association-American Thoracic Society, Dr. Michael D. Lebowitz, professor of internal medicine, college of medicine, University of Arizona and special consultant to the Subcommittee on Tobacco, presented reasons why, in his own words, "the results of this study cannot be used to demonstrate an effect of passive smoking on forced expiratory flows in adults exposed in the workplace." Dr. Lebowitz, a noted specialist in epidemiology and respiratory diseases, said that the basic problem with the White-Froeb study is that it "improperly designed" and that "there are problems with the whole data set and with the conclusion." Dr. Lebowitz also expressed concern that the significance of the White-Froeb data appeared to depend upon their unexplained omission of data from 3,000 subjects originally included in the study.

Mr. Speaker, Dr. Lebowitz wrote a letter, dated July 10, 1981, to our colleague, Congressman Charles Rose, Chairman of the Tobacco and Peanuts Subcommittee of the House Agriculture Committee, as a result of a personal interriew which Chairman Rose and Dr. Lebowitz had with Dr. White. With the personal consent of Chairman Rose, I am inserting herewith Dr. Lebowitz's letter. It more fully explains the author's views regarding

the White-Froeb study.

I also want to mention another evaluation of the White-Froeb study, one which was made by Dr. J. G. Gostomzyk, director of the department of health of the city of Augsburg, West Germany. After an extensive, detailed review of the White-Froeb study, Dr. Gostomzyk has concluded that the White-Froeb data were incompletely presented and did not satisfy the prerequisites for scientific credibility. In addition. Dr. Gostomzyk remarked that "Dr. White's methodology is not scientific but that of a lay person with convictions," and concluded that "we assume that Dr. White's study is an attempt at scientific validation of his credo and that he possibly is unaware of the inadequacy of this methodology." It is obvious that Dr. Gostomzyk is referring to Dr. White's outspoken antismoking activities in California, including Dr. White's endorsement of public smoking referendums which were, incidentally, twice rejected by the California voters.

Given these and other criticisms of the White-Froeb study, it would appear that the New England Journal of Medicine has, perhaps unwittingly, performed a disservice to its readership. It is extremely unfortunate that a study so fraught with methodological problems, as indicated through numerous criticisms by scientists in the United States and elsewhere, should have been published in such a reputable journal of medicine. The White-Froeb study should, therefore, not be relied upon by the Congress, Federal agencies, or other legislative or policymaking bodies when considering restrictions on smoking in public places.

> THE UNIVERSITY OF ARIZONA, COLLEGE OF MEDICINE,

Tucson, Ariz., July 10, 1981.

Congressman Charles Rose,

Chairman, Subcommittee on Tobacco and Peanuts, House of Representatives, Rayburn Building, Washington, D.C.

DEAR CONGRESSMAN ROSE: The following is summary of my notes on our visit to Dr. James White at UC San Diego, as per our discussion. Unfortunately, despite the statement in the editorial of the New England Journal of Medicine (27 March 1980), Dr. White and his co-author did not "faultlessly demonstrate a reduction in measures of small airways of healthy non-smokers exposed to cigarette smoke in the work place". It is apparent from our visit and the article that there were various faults in the present study, which shall be discussed.

The problems with the research design are as follows:

The participants were not only volunteers, but generally had to pay for the physical fitness course; this is the reason most were white-collar. Employees in specific factories invited White to run the physical fitness course in their factories as well, which would also bias the population sample. Bluecollar workers were not distributed randomly. [It has to be assumed that volunteers in the physical fitness courses fall into unrepresentative categories: the highly motivated, with an interest in health and usually healthier, those who are worried about health and generally less healthy; the first group would include fewer smokers and the second group would include more smokers.1

The questionnaire utilized was not a validated one per se; test-retest comparisons were made only on the smoking questions and very small groups of subjects. smoking information was not validated. There were no test-retest or validations on symptoms asked in the questionnaire. The questionnaire itself was derived by the investigator, and included some questions from standard questionnaires; this did not

appear to include standard respiratory questions, and in fact various typical respiratory questions (such as phlegm) were not asked. The questionnaire did not include questions on attitude, but did include questions on activity levels and jobs (duration, type). The questionnaire did ask how many smokers were in their work area, room size, and nature of the air conditioning. It also included questions about residences in the last 20 years (zip codes), so that exposures away from work were assessed by residential location. A question was asked about smokers in the home. [Thus, the smoking information is not validated, but is probably relatively accurate. The information about exposure to passive smoking is only approximate, as is the information on other occupational exposures. Exposures to air pollutants or to unknown toxic gases in the working place is only approximate, and their effects underes-

Dr. White presented a paper to the American College of Sports Medicine, the abstract for which in 1977 indicated there were 7.122 subjects enrolled between 1969 and 1977. However, in the New England Journal of Medicine article, he states that the base population analyzed is only 5,210 smokers and non-smokers enrolled between 1969 and 1979. Although he excluded all the ex-smokers, some whose zip codes were missing, his answers as to why the rest of the subjects were excluded were entirely unclear and tend to indicate potential bias in selection of subjects for consideration for analyses. It might be added that the 2,100 subjects analyzed in the NEJM article and those analyzed and presented in the Sports Medicine abstract appear to be the same as they yield exactly the same table of results (as determined from comparison of the table in the Sports Medicine manuscript and the NEJM table).

In addition to the sources of bias mentioned above, it is apparent that the non-smokers in clean work environments and those in smoking work environments have not only chosen not to smoke, but it is likely that those non-smokers working in smoking environments may be different for a variety of reasons from non-smokers working in clean environments. Furthermore, it is apparent that the non-smokers in non-smoking environments are quite different in that their lung function is "super normal" in comparison even with the Seventh Day Adventists (the source of the Morris prediction equations).

Dr. White did state that from the questionnaire and from the baseline tests that there were no significant differences in the three non-smoking/non-inhaling groups in terms of the amount of previous exercise or oxygen consumption, but he was unsure of the difference in percent of body fat. Smokers did have less body fat, were less in terms of having lower oxygen consumption, and had less activity. He says further that there were no differences between the groups in terms of childhood respiratory history (lower respiratory tract illnesses) from his submitted questionnaire information, but he did not ask about family history. He did not ask sufficiently about respiratory questionnaires to appropriately exclude groups on the t-ses of productive cough ("cough bronchitis"). He states that there were no differences in prevalence rates of questionnaire responses by zip codes; if so, this contradicts other evidence vis-a-vis the effects of air pollution in these areas. He was not able to assess other exposures such as those from hobbies, exposures to gas stoves, or transportation. In terms of passive smoking in the home, he excluded such passive smokers from the non-smoking and passive smoking groups, but not from any smoking groups. He was not able to provide any information about the distribution of characteristics in those eliminated from the original 7,000 or the 2,208 that qualified because of other questionnaire results.

With regards to the pulmonary function testing done by Dr. White, it must be first noted that the instrument used is not considered a satisfactory instrument in that it is non-linear (highly biased) at both high volumes and low volumes. [This has the effect of maximizing differences in that anyone with minor aberrations of total vital capacity or of flows at the end of the flow volume curve would have very different, that is, low, flows.] The comparisons that Dr. White did and reported on in his response letter in the NEJM (14 August 1980) would not in any way modify this opinion. Furthermore, Dr. White has the only pulmonary function technician and reader. Even though he was trained at the VA hospital and his techniques were evaluated by test-retest and by comparison to other readers, any biases inherent in Dr. White's thinking (see below) would affect the way he read the tests. Furthermore, he took the FEV, and flows off the same spirogram using an approximation technique published by Morris, et al., which is not an adequate or accurate representation of those measures. All of his tests were baseline tests done after two and a half hours in the classroom in the evening on those without acute respiratory illnesses (usually on a Monday Tuesday evening); thus, there is probably little diurnal variation or pretest biases other than those experienced by the workers during their work day and in their activities prior to the classroom. Although it is difficult to judge the effects of these factors, they may have influenced the test results, especially in those with any significant exposures during the day.

The major problem with the pulmonary function test results as reported is that they are not age- and height-adjusted, since lung volumes and flow rates are associated with both of these factors. In other words, Dr. White used raw values of flows and volumes to do comparisons. He did this on the assumption that the mean age and height were similar for the different groups. This is a mistake, since the distributions for those ages and heights could have differed. Furthermore, his quoted figures for percent predicted are strictly for the average person, age 49, with an average height, and does not represent the group for which they are provided. In terms of these statistical analysis, he just chose the SNK package among many. There is no correlation coeffi-cient per se. "Normality" was not an objec-tive of this study, so he cannot state anything about the normality of the subjects studied, including those he considered to have significantly different results from the non-exposed non-smokers. He does not understand the difference between clinical meaningfulness and statistical significance. It is quite obvious that the majority of those in the passive smoking and in the noninhaling group are quite normal and that very few would be considered abnormal by any criteria.

In his reported results, he quotes as incorrect significance level of p.<.005, whereas the level provided by the technique is p.<.05. This is very different, given the number of comparisons made, and indicates

that some of the results would not be significant if corrections were made for the number of comparisons. Furthermore, the data presented in Table 1 was used to recompute the SNK analysis by Mary C. Townsend, MPH (Department of Epidemiology, University of Pittsburgh). Those results differ from those published by Dr. White and are provided in the attachment. The most important of the differences is the finding that the passive smokers and light smokers differ for the male FEV 75-85 percent. Thus, the effect of passive smoking on non-smokers is still unconfirmed, despite Dr. White's unfailing conviction that it is confirmed.

Other minor points: In terms of the carbon monoxide sampling, although it is stated that it was randomized, it was really on only 40 smoking and 40 non-smoking situations chosen by chance but not by random selection. Dr. Froeb, the co-author with Dr. White, is a private practitioner in La Jolla and helped Dr. White in drafting the NEJM manuscript from the manuscript presented at the American College of Sport Medicine. It might be pointed out that San Diego is not strictly low in air pollution concentrations, nor uniformed throughout the area; this may bias some results. Dr. White performed the pulmonary function tests until "reproducible curves were obtained", but they do not necessarily follow the Intermountain, Snowbird, or ATS recommendations

In reviewing Dr. White's response to the letter to the Editor in the NEJM (14 August 1980), it is quite clear that Dr. White did not satisfactorily answer all the questions raised, many of which are similar to those raised in this letter. It is questionable, from the discussion, whether Dr. White would pursue any further re-analysis of the data, nor necessarily could it be pursued. It is questionable, given the basic underlying problems in the research design, that reanalysis of the data would be worthwhile. On the other hand, given other results that contradict Dr. White's, including those now in press (such as Comstock et al., Johns Hopkins, presented at the Society for Epidemiological Research in June of 1981), it would be likely that a panel discussion of passive smoking might be valuable. I will be glad to furnish further discussion or help in that matter.

Sincerely

MICHAEL D. LEBOWITZ,
Ph. D., F.C.C.P.,
Professor of Internal Medicine.

#### TOM BUTTEPFIELD

# HON. IKE SKELTON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 16, 1982

• Mr. SKELTON. Mr. Speaker, as 1982 draws to a close, it is customary to reflect upon the events of the past year. I would like to talk about an experience I had just over a year ago and about some sad news I heard just this week.

In December of 1981, a movie called, "The Children Nobody Wanted" was televised. This moving story depicted the work of a man named Tom Butterfield and the help he gave to foster-

lings in Marshall, Mo. On Monday, December 13, my longtime friend, Tom Butterfield died of respiratory failure.

"The Children Nobody Wanted" is a true story. When Tom Butterfield was a freshman at Missouri Valley College in Marshall, Mo., he discovered the problems of children who have nowhere to go, and for whom the law makes few, if any, provisions. Boy by boy, he made a life for these homeless youngsters. Tom fought increasing odds, from the lack of money, to outdated laws. He became the youngest single adult-and the first bachelorto be a legal foster parent in the State of Missouri. He and his boys rented an old country club and turned it into their ranch. Today, there are four ranches, giving a homelife to over 100 voungsters.

During this special time of the year, it is good to stop and think about the road we are traveling. Looking at the trail of Tom Butterfield's life, I can see that, although he died at the young age of 42, his contributions will go on for a very long time to come. It is appropriate, at this time of gift-giving, to look back at all the giving this man has done in his lifetime.

## ADMINISTRATION'S INSENSITIVE APPROACH TO CANCER

# HON. ALBERT GORE, JR.

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 16, 1982

Mr. GORE. Mr. Speaker, present administration appears to be headed down a regulatory path that will needlessly expose millions of people to many known, cancer-causing chemicals at levels well beyond those traditionally accepted as safe and prudent. One example, documented in hearings held before the Investigations and Oversight Subcommittee of the Committee on Science and Technology which I chaired, was EPA's failure to take rapid action in setting reasonable limits for exposure to formaldehyde, although it is unquestionably an animal carcinogen. My colleague, Hon. George E. Brown, Jr. has done some excellent work in this area and has found similar evidence of EPA's failure to regulate certain pesticides that have been clearly shown to cause tumors in animals. Two recent articles in the New York Times (Dec. 4, 1982) and the Baltimore Sun (Dec. 8, 1982) provide further documentation of the new, high-risk approach to Federal cancer policy. I commend them to the attention of my colleagues. It is time for us to halt this administration's crass and insensitive bottom-line approach in which costs to industry are balanced against increased human suffering. We all owe a debt of gratitude to the gentleman

from California and I am looking forward to his forthcoming subcommittee report on this subject.

The articles follow:

[From the Baltimore Sun, Dec. 8, 1982] EPA and Cancer: The Shifting Standards

(By Ken Cook)

Washington.—In what some critics charge is a fundamental and unjustified change in federal cancer policy, the Environmental Protection Agency (EPA) has determined that an insecticide which caused cancer in laboratory animals poses no cancer risk to human beings.

The decision removes the last barrier to the permanent registration of the insecticide permethrin for use on dozens of U.S. crops.

As a result of emergency exemptions granted by the agency since 1977, permethrin already is one of the country's major insecticides, used on millions of acres of vegetables, beans and cotton each year. Permethrin is marketed under the trade names Pounce and Ambush.

A leading critic of the EPA decision, Representative George E. Brown, Jr., (D., Calif.) characterizes the permethrin ruling as "one of several actions that suggest the EPA has adopted a new set of scientific principles in reaching regulatory decisions on proven animal carcinogens."

Federal pesticide law does not prohibit registration of cancer-causing chemicals if dietary and occupational exposure can be kept below the safety level established by the agency. By contrast, the Food and Drug Administration must by law prohibit the use of any food additive shown to cause cancer in laboratory animals.

The practical effect of a decision to brand permethrin as a human carcinogen would have been a greater restriction on the number of crops for which it could be registered. Such a ruling might also have left the manufacturers, FMC Incorporated of Philadelphia, and ICI, a British firm, more vulnerable to product liability suits.

John W. Melone, director of EPA's hazard evaluation division and author of the permethrin decision (which appeared in the Federal Register in October), said that one of the long-term animal studies submitted by a manufacturer in support of the chemical's registration "was clearly positive" for cancer, it reported that tumors had appeared on mice after they had been fed permethrin over an extended period. Mr. Melone said five other studies submitted by manufacturers were accepted by EPA as showing no cancer-causing effects in labora-tory animals. However, Mr. Melone described one of those studies as "quite controversial" because EPA scientists could not agree on the results. A seventh study, also conducted by a manufacturer, was rejected because of irregulatories in the way it was conducted.

Mr. Melone described the permethrin case as "unique" for having so many long-term studies available for scrutiny by EPA scientists. Only two such studies normally are required for pesticide registration.

"We concluded that the weight of evidence suggested this chemical is highly unlikely to be a potential human oncogen tumor-inducing substancel," Mr. Melone said in a telephone interview. "And since we have to make a decision, we believe permethrin should not be regulated as a potential human oncogen."

Regarding the permethrin ruling, Mr. Melone said, "There's no question it's a change in perspective."

Representative Brown, chairman of the House Subcommittee on (Agriculture) Department Operations, Resarch and Foreign Agriculture, which has jurisdiction over EPA's pesticide program, said that "for the agency to adopt a policy which, in effect, attempts to balance positive tests with negative ones is clearly a bold step."

Mr. Brown considers the action "a monumental and quasi-scientific leap of regulatory faith."

There is a continuing debate among cancer experts over how to weigh various types of evidence to determine a chemical's potential to cause cancer in humans. Although the precise mechanisms of cancer remain unknown, scientists have for some time agreed that proven animal carcinogens do not all pose an equal risk of cancer to humans. Traditionally, cancer regulatory decisions, including those made by EPA, have been made as if they did.

In the past few years, several cancer researchers and research institutions have proposed detailed systems by which regulatory agencies might distinguish between "strong" and "weak" carcinogens, based on information gained from long-term animal studies such as those submitted in the permethrin case. Regulatory actions might then take the form of an outright ban if such a system ranked the chemical as a strong cancer risk. Chemicals judged to be weak would be regulated less stringently, or not at all.

Last summer, EPA circulated to a select group of experts a draft of a proposal to modify the agency's original cancer policy guidelines promulgated in 1976. The draft proposed a ranking system similar to one developed by the Intenational Agency for Research on Cancer. According to Dr. Betty Anderson, head of EPA's office of health and environmental assessment, which issued the proposal, the experts who reviewed the document "essentially were not very comfortable with the issues raised. It is unplowed turf."

Dr. Anderson said, "There was an endorsement of the idea of stratifying (ranking) evidence." But the experts did not agree on exactly how to go about it.

However, the agency did apply several ranking schemes in the course of evaluating the carcinogenic potential of permethrin. The outcome of this classification was an important part of the agency's justification for the final decision.

In the past, when faced with ambiguous scientific information on a chemical's cancer-causing potential, EPA scientists generally had assumed that the chemical posed a hazard. A carcinogen ranking scheme, if strictly applied could push the agency's scientific assessments in the opposite direction, making it more likely that chemicals would be approved at the political level, where ultimately all EPA regulatory decisions are made.

Mr. Melone conceded that the agency's cancer policy has not been revised officially to incorporate the ranking approach already used in the permethrin decision. He noted that the 1976 policy "mandated a weight-of-evidence approach but did not lay it out in detail." The permethrin ruling was an example of change in "practice underneath the broad policy," he said.

Some experts familiar with EPA's pesti-

Some experts familiar with EPA's pesticide policy consider the agency's earlier cancer decisions to have been overly conservative, setting an unrealistic precedent the agency cannot now easily change. For example, even though serious environmental problems justified EPA's ban on DDT in 1972, the human cancer threat posed by DDT is now widely thought to have been overstated by the Agency.

Mr. Brown's subcommittee staff is nearing completion of an investigation of EPA's cancer policy for pesticides. As part of the study, the staff contacted "a number of noted cancer researchers" and, a according to Mr. Brown, "most of them agree that major regulatory reforms based on these ranking schemes are premature."

"I think the Congress and the public deserve a a thorough documentation that this major change is based on adequate science before, not after, the policy is adopted" Mr. Brown said.

Mr. Melone agreed that "ideally the policy would change and then decisions would adhere precisely to it."

"But business goes on and we have to make decisions on chemicals," Mr. Melone stated, "and sometime this drives changes in policy."

The significance of the decision extends beyond its timing. Some scientists inside and outside the agency consider the adoption of a ranking scheme as a legitimate attempt to reform the agency's 1976 cancer guidelines. But others fear a ranking scheme is a means by which EPA Administrator Ann Gorsuch could weaken the agency's regulation of cancer-causing substances.

[From the New York Times, Dec. 4, 1982]
Administration Drapting New Policy on
Regulating Cancer-Causing Agents

## (By Philip Shabecoff)

Washington, December 3.—The Reagan Administration is drafting a new, Government-wide policy that would change the way Federal regulatory agencies protect the public from cancer-causing substances.

Adminstration and industry officials say the new cancer policy is needed to reflect recent advances in science and to provide more flexibility in regulating carcinogens.

But environmentalists and many public health scientists charge that the policy is being designed to ease restrictions on industry and that in practice it would permit a substantially greater amount of cancer-causing substances in the country's air, water, food supplies and working places.

The administration has generally abandoned carrying out the Government cancer policy developed by the Interagency Regulatory Liaison Group in the Carter Administration. One major aspect of that policy required Federal agencies to view cancer-causing substances as a potential risk to human health at any level of exposure.

The Reagan Administration's approach is still being developed, and concrete policy recommendations are not expected to be ready until next spring. But the Interagency Staff Group, which under the President's Office of Science and Technology is preparing the new policy, recently issued a draft "Part I" of its report, a thick document reviewing the state of knowledge about cancer.

## CRITICS FEAR MAJOR CHANGES

The draft report proposes no specific policies and is somewhat bland in tone. But critics said they saw in it the potential for major departures from established regulatory policy regarding cancer. The critics also said the Environmental Protection Agency, the Occupational Safety and Health Administration, the Food and Drug Administra-

tion and other Federal agencies had already departed from past practices since this Administration took office in regulatory decisions that reduced the protection of humans from cancer-causing chemicals.

From this report, from other agency documents on cancer policy and from the decisions made by the regulatory agencies over the last two years, the Administration appears to be heading toward these changes in cancer policy, according to environmentalists, public health officials and other concerned parties.

To assume risks to human health at varying "thresholds" of exposure rather than as in the past, assuming that any exposure, no matter how low, conveys a measurable risk of cancer.

To differentiate between cancer-causing substances that change the genetic properties of the cell and those that act by other means, and then to alter regulatory approaches accordingly. Under the former policy, all carcinogens were treated the same.

To rely less on laboratory tests on animals and to wait instead for epidemiological studies of sickness and death in human populations in deciding on the dangers of chemicals and other carcinogens and how to regulate them.

To raise the level of risk considered significant for human exposure to cancer-causing substances and to regulate them according-

ly.

To place more emphasis on voluntary "life style" causes of cancer, such as smoking, and less on environmental causes, such as chemicals in the air, water, food and workplace.

To give increased weight to the costs as well as benefits of regulatory decisions on protecting people from cancer.

#### SUPPLY-SIDE CARCINOGENESIS

Myra L. Karstadt, director of the Environmental Cancer Information Center at Mount Sinal Hospital in New York said the Reagan Administration effort was being described in toxicology circles as "supply-side carcinogenesis."

But Administration officials interviewed recently insisted first that no new policy had yet been established and, second, that whatever policy did emerge would be based on the weight of scientific evidence, not on political considerations.

Denis Prager, chairman of Interagency Staff Group, said the cancer policy promulgated under the Carter Administration was "a little too definite in areas where there are still uncertainties and often stated principles as immutable facts."

Dr. Prager, who is assistant director of the Office of Science and Technology, said new information on the mechanisms of carcinogenesis was emerging almost daily. He said the new policy now being prepared "hopefully will add to the scientific credibility" of regulatory activities.

## FULL DISCUSSION PROMISED

He also said that the process of developing the policy "will be as open as possible" and that whatever emerges would not be regarded as the final word on the subject but part of a continuing process.

Dr. Prager also noted, however, that the revision of cancer policy was being conducted "under the aegis" of Vice President Bush's office, which has been given responsibility for President Reagan's regulatory changes.

"There is no way we can separate this exercise from other Administration pro-

grams," he said. But he added: "Neither the President nor the Vice President has said to come up with a cancer policy more liberal than the current one. We are not politically constrained."

Some Administration officials do not see the need for revising Federal cancer policy. J. Donald Millar, Director of the National Institute of Occupational Safety and Health, which does research and makes recommendations on workplace hazards, said in a recent interview: "We felt the prior carcinogen policy was useful. We don't see any reason to change it."

Dr. Millar said he believed the policy was being revised because "the chemical industry finds it to be an onerous responsibility." He also said he had not been consulted about plans to change policy, although his agency deals with carcinogens in the work-place.

#### CHEMICAL INDUSTRY WANTS CHANGES

The chemical industry has, in fact, been pressing hard for new approaches to regulating carcinogens. Gordon Strickland, deputy director of the Chemical Manufacturers Association, a leading industry group, said, "Cancer policy is outdated and should be changed to reflect today's science."

He said public fears of the danger of cancer from chemicals in the environment were exaggerated and "would simply dissapate if we have good science." He said that cancer rates were stable and that the "common perception that cancer mortality related to the production of chemicals is mistaken."

"The old cancer policy had been founded on the notion of zero exposure to cancer," Mr. Stickland said. But with increasing sophistication in measuring, he said, it is now possible to find chemicals in parts per trillion where measurements used to be in parts per million and the definition of zero exposure keeps changing. Because of this "vanishing zero," he considered, "the concept of zero exposure is not realistic anymore."

While regulating cancer-causing substances is difficult because of moral as well as scientific issues, "we have to look at the costs and benefits and balance them," he said. He added that all carcinogens should not be regarded as posing the same level of risk.

## SOME SEE NO NEED FOR CHANGES

But several scientists and public health officials said the developments of scientific data does not justify changes in the cancer policy. Dr. Arthur C. Upton of the New York University Medical Center, who was director of the National Cancer Institute from 1977 through 1980, said he did not personally see a need to change "a cancer regulatory policy that has evolved for 20 years and was the basis of the Carter Administration's regulatory policy."

The accepted public health approach holds that "it is unproved but reasonable" to assume that there is no threshold below which a carcinogen poses no risk to health, Dr. Upton said. He added that he could understand that "it is difficult for many people to accept this concept, especially when it results in a heavy economic impact."

Dr. Upton said he had not followed to regulatory practices of the Reagan Adminitration closely and was reluctant to be "harsh" about it.

"But I must confess I have been troubled by indications of efforts to relax vigilance and set aside evidence," he said adding, "There is seemingly less readiness to classify substances and to take regulatory precautions that prudence would dictate."

Much of the criticism of the Administration's evolving cancer policy has focused on
the Environmental Protection Agency. An
agency decision not to regulate formaldehyde as a carcinogen, even though formaldehyde has caused nasal cancer in laboratory mice, provoked sharp attacks. John Todhunter, the agency's assistant administrator
for toxic substances, said that while the animals had shown susceptibility to the widely
used chemical, there was no evidence that it
posed a significant risk to humans at low
levels of exposure.

#### PROPOSAL ON DIOXINS ASSAILED

Recently the agency was assailed for weighing a policy option that would consider a higher level than what was previously accepted for human exposure to dioxins, an extremely toxic substance, at several places in Missouri.

Something of an uproar among environmentalists and public health scientists was created by a recent memorandum by Dr. Roy Albert of the New York University Medical Center, who is chairman of the environmental agency's carcinogen assessment group, suggesting that a distinction might be made between genotoxic substances that cause cell mutations and other carcinogens that do not have that impact. Dr. Albert suggested the possibility of treating the genotoxic substances as if there was no safe threshold but using a conventional toxicologic approach to the nonmutagenic substances by limiting exposure to a "no observable effect level."

Dr. Albert said the response he has gotten indicated that the scientific community is split evenly on the value of this approach. But he said there was wide support for the concept of stratifying the degree of risks of various cancer-causing agents as a first step toward "attuning a regulatory approach to the weight of evidence."

Frederica P. Perara, senior staff scientist for the Environmental Protection Agency, opposed Dr. Albert's approach on the ground that "knowledge of the mechanisms involved in cancer is still very limited." The proposed policy change, she said, could result in a "significant lessening of health protection against carcinogens."

John P. Hernandez, assistant administrator of the E.P.A., said the general cancer policy left by the Carter Administration "froze us into place," instead of giving the flexibility necessary to deal with the wide range of laws the agency administers.

#### 'RADICAL CHANGES' FEARED

But Ellen K. Silbergeld, chief toxicologist for the Environmental Defense Fund, charged that the Administration and the agency were seeking to change the overall policy "in order to support radical changes in regulation." She said the agency would soon have to make regulatory decisions affecting hazardous air pollutants and volatile organic compounds in drinking water and was seeking to establish an "intellectual framework" in which it could increase the acceptable levels of cancer-causing agents in the air and water.

Dr. Silbergeld asserted that an effort is being made to prepare the public for "the revolutionary revisionism of carcinogen policy which is in progress in this Administration and the E.P.A."

Marvin Schneiderman, former associate director for science policy and for field studies and statistics of the National Cancer Institute, said the Reagan Administration "is trying to demonstrate something they really believe—that there are far fewer things in the world that are hazardous and need to be controlled."

"But if you are health oriented," said Dr. Schneiderman, now a teacher and consultant, "you want to find things that cause cancer and regulate them."

### SUPPORT FOR DOMESTIC CONTENT BILL

# HON. NORMAN E. D'AMOURS

OF NEW HAMPSHIRE

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 16, 1982

Mr. D'AMOURS. Mr. Speaker, I was unavoidably absent from the floor of the House yesterday evening and thus missed the votes on the Fenwick amendment to the Domestic Content bill and on final passage of H.R. 5133. I regret that the Fenwick amendment was adopted because I believe it guts the major provisions of the bill. Had I been present I would have voted against the Fenwick amendment. I also would have voted for final passage of the Domestic Content bill. I am delighted that the House passed this legislation by a vote of 215 to 188 as I believe it will send a strong message to our trading partners, and to the American people, that the Congress is serious about protecting American jobs from unfair foreign competi-

# THE GAS TAX IS NOT A JOBS BILL

## HON. ED BETHUNE

OF ARKANSAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 16, 1982

 Mr. BETHUNE. Mr. Speaker, I recommend the following article from the Washington Post to my colleagues who may still be wondering about the gas tax.

## STOP THE "QUICK NICKEL" GAS TAX (By Richard A. Snelling)

No matter what combination of the three "quick nickel" highway bills now before Congress is ultimately passed as a result of the current steamroller in Washington, the bill will not do the things its backers have promised. Specifically, the quick nickel will not do anything about the current severe unemployment problem (except possibly make it worse) and it will not fill potholes.

The White House (correctly) denies that this is a jobs bill. Nevertheless, the Department of Transportation tells anybody who will listen that precisely 170,000 jobs will be created. The only reason the bill is being considered at all in the lame-duck session is the great need of Congress to appear to do something about the unemployment situation.

The bill is not going to create jobs. In its early years, it takes more money out of the economy than it puts back in. Neither a Keynesian nor a supply-side economist

would claim that sending more money to Washington is a way to create jobs.

If we don't have to send that \$5.5 billion a year to Washington, we will presumably spend it to buy something else. If we do send that money to Washington, we won't be able to use it to buy something else. Whoever makes that "something else" will lose his or her job. Eventually, some of the money will result in creating some new construction jobs while eliminating jobs elsewhere in the economy.

Since the money leaves our pockets well before it ever comes back from Washington, the short-term effect will be a loss of jobs and not a gain. To make things even worse as far as jobs are concerned, it is unlikely that all states will be able to spend all the money that will theoretically be available to them. This federal money must be matched by state money. Since many states are already having difficulty matching the federal funds they are now eligible for, it is unlikely that these states will be able to match any more federal funds—especially since the federal government is planning to preempt their ability to raise state gas taxes.

The bill is touted as a way to fill the nation's potholes. There are certainly plenty of potholes that need filling. However, this bill simply extends existing federal highway programs, and federal highway money is not available for filling potholes under these programs unless the whole road is repaved. As a matter of fact, the road also has to be "wide enough" and "straight enough" to meet federal standards in order to qualify for this repaying money.

There are roads that do need to be completely reconstructed. There are also other roads that simply need to have their potholes filled and their cracks sealed. It is because of a lack of pothole-filling and crack-sealing over the last decade that so many roads need to be completely repayed or reconstructed now. This bill continues the tradition of encouraging massive reconstruction rather than simple preventive maintenance.

Many states, including Vermont, already need to raise their own gas taxes this year to meet unmet maintenance requirements. It is unlikely that those states will want to impose any further "user charges" on top of a large federal increase. When states raise their own gasoline tax, they can use the money from that increase to meet their most urgent priorities—whether those priorities be pothole-filling or new construction. It has been know for a long time that state-only projects are cheaper and can be done more quickly than projects using federal money.

It is easy to understand why those who have been frustrated by Congress' inability to pass a multi-year highway bill are jumping aboard the quick-nickel steamroller. They are afraid that, if Congress does not pass this bill now, it will never address highway needs constructively. They are willing to accept any bill, even a bad bill, as long as there is some more money for highways.

Nevertheless, a bad five-year bill passed during the lame-duck session will be worse for the nation than no bill at all. It will neither create jobs nor fill potholes. It will frustrate the ability of the states to achieve these goals themselves.

Although many states will be winners from the quick nickel, others will be substantial losers. The Reagan administration dedicated itself to a restructed federalism, which recognized the diversity of needs and problems in the different states. It is ironic

that this administration is pushing a bill that extends federal decision-making even further and cripples the ability of states to meet their individual highest priority needs.

This lame-duck Congress ought to go home. After the Christmas recess, a new Congress should come back and address the nation's transportation (and other) problems in a constructive way. The quick nickel ought to be allowed to die a quick death.

(The writer, governor of Vermont was president of the National Governors Asso-

ciation during 1981-1982.)

BOWIE HIGH SCHOOL SOCCER TEAM

## HON. STENY H. HOYER

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 16, 1982

• Mr. HOYER. Mr. Speaker, I am pleased to bring to the attention of my colleagues the outstanding achievement of the Bowie High School soccer team and its coach, Lou Reck.

Working with a young team short on experience but long on heart and enthusiasm, Mr. Reck led the Bowie Bulldogs to an undefeated 15-0 season, setting the stage for the Maryland Class AA State soccer championship battle. In the finals of the State championship, Bowie was victorious with a 2-1 victory over Severna Park in a hard-fought, double-overtime battle.

As a junior varsity coach, Lou Reck led his Bowie team to an astonishing 30-0 record and three Prince Georges County titles. Bowie qualified for the State playoffs during Lou's first 2 years as head coach, yet the State title

always alluded him.

This year, Mr. Speaker, was quite a different story. Under the excellent goaltending of Terri Curran, the fighting Bulldogs allowed only one goal to be scored against them the entire season and only then in the doubleovertime final.

The Bowie High School soccer team members and its coach deserve our special attention and congratulations. Each athlete performed magnificently and each made that all-important extra effort to insure victory. Mr. Speaker, I know that the Members of the body join me in saluting the championship athletes of Bowie High School and its outstanding coach, Mr. Lou Reck, on an accomplishment well deserved.

THESE ARE OUR SONS WHO ARE DYING

## HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES Thursday, December 16, 1982

• Mr. DORNAN of California. Mr. Speaker, today, in my State of California, another aging U.S. Air Force B-52 crashed killing the entire crew of nine young officers and airmen. How many more dedicated, fine young public servants in the flight uniforms of our military services have to die to stop the yearly attacks on the B-1 in this Congress and the attempts to terminate this SAC bomber replacement

Please stop this ignorant demagoguery. It is killing our pilots and their crews to extend the life of our oldest B-52's beyond its designer's wildest es-

timates and hopes.

I submit for the RECORD an excellent speech by Mr. S. F. Iacobellis last May defending our B-1. Mr. Iacobellis is the B-1B program manager, North American Aircraft and Operations, Rockwell International.

The speech follows:

It is an honor and a pleasure to be here to speak about the production of the U.S. Air Force B-1B long range combat aircraft.

I understand you've been having these Wednesday gatherings for 57 years without a miss. Obviously you have a proud heritage and a fine tradition at the Los Angeles Breakfast Club.

It's just the same with Rockwell. We've been in the aerospace business for nearly 55 years. From that activity has come our own proud heritage and fine tradition in building aircraft.

I've learned something very important in my time with North American Aviation Incorporated, now Rockwell International.

Companies don't build aircraft.

People build aircraft. People built the North American B-25 Mitchell. In 1942 sixteen Mitchells flew from the deck of the USS Hornet to strike Tokyo under the command of Lieutenant Colonel Jimmy Doolittle.

People built the North American P-51 Mustang. Assigned to the Eighth Air Force it helped the Allies ruin the reputation of the Luftwaffe in raid after raid over Germa-

People built the North American F-86 Sabre Jet. During the Korean War it gave the United States air superiority over the

Russian MIG-15 by a 10 to 1 kill ratio.

People built the North American F-100 Super Sabre. On its very first test flight it established a world speed record on the way to becoming the United States first operational supersonic fighter.

People built the North American X-15 rocket research aircraft. With such pilots at the controls as Astronaut Neil Armstrong, the X-15 set world altitude and speed records for winged aircraft in its flights at

Edwards Air Force Base.
I'm sure you're aware that our people at Rockwell International are building the space shuttle. And before that, they played a major role in building the Apollo vehicles and propulsion systems for the successful lunar landings and returns.

Today, people of my company are building the B-1B.

They are building it because the Department of Defense has determined that a critical strategic imbalance exists between the United States and the Soviet Union.

The B-52 is the air breathing mainstay of the Strategic Air Command. But some models of the B-52 are a quarter-of-a-century old. Many of the pilots who fly them are younger than the aircraft itself. Counting the FB-111, as well as the B-52, the Strategic Air Command has about 412 serviceable strategic aircraft. That number compares to the Soviet Union's more than 800 strategic aircraft. They include the Backfire bomber. which has been rolling off the line month after month for several years.

And that doesn't take into account the fact that the strategic U.S.-U.S.S.R. balance also is tipped heavily in favor of the Soviets with respect to submarine launched ballistic missiles and intercontinental ballistic mis-

The B-1B is ideally suited to help redress that imbalance. It is a new aircraft.

Using advanced technology now available, the B-1B is an outstanding improvement over the B-1A prototypes, which the people at Rockwell also built. The B-1A was not delivered to the Strategic Air Command because production was cancelled by President

The B-1B is designed to be a multi-role aircraft, able to perform conventional, nuclear and cruise missile missions. By contrast, the B-1A's primary mission capability was as a low-altitude penetrator to deliver nuclear weapons. The B-1B's range has been significantly upgraded. It will be able to fly intercontinental missions without need of refueling. And the Air Force is extremely confident about the B-1B's prospects for survival against probing radar and other threats.

In a hearing before the U.S. Senate's Subcommittee on Strategic and Theater Nuclear Forces, Air Force Chief of Staff General Lew Allen said, and I quote:

Even though we expect the Soviets to make major improvements in their air defense capabilities the B-1B, flying at low altitude and with dramatically reduced radar profile and advanced electronic countermeasures, will be able to penetrate and strike targets throughout the Soviet Union well into the 1990's. And this could be extended by further progress in electronic iamming.

As I said a few moments ago, the B-1B is a new aircraft, but it enjoys the best of two worlds.

It incorporates the proven capabilities of the B-1A prototypes, which compiled an outstanding record at Edwards Air Force Base during almost 2,000 hours of flight test. The B-1B also incorporates many improvements to further extend its capability.

I have already mentioned multi-role ability and range. There are other significant

As General Allen implied in his Congres sional statement, we have made very significant progress in assuring that the airplane will be extremely hard to detect. For example: The B-1A radar image was ten times smaller than that of the B-52. The B-1B radar image is already ten times smaller than the B-1A. That's a 100 to 1 image reduction over the B-52.

Another important improvement is payload carrying capability. The airplane's maximum gross takeoff weight has been increased from 395,000 pounds to 477,000 pounds. This allows more fuel and/or weapons to be transported.

Payload flexibility is another key item. The two weapons bays in the forward portion of the aircraft will have a movable blukhead which can be moved in the field. This means that many different size weapons-like cruise missiles-can be accommodated. Fuel tanks can also be carried internally to extend range. At the same time, weapons and fuel could be carried externally on the under-side of the fuselage for even greater mission capability.

The list of B-1B improvements is much longer. It includes items like vastly improved electronics and greater aerodynamic efficiencies. The point is simply this: The B-1B is designed to be the most capable strategic aircraft in the world.

The B-1B will be a tremendous deterrent to any act of aggression by any adversary today or anyone who may become an adversary in the next 30 years. They will think twice before they enter into an act of aggression against this nation because of the existence of the B-1B. Russian strategists know that the B-1B carrying nuclear weapons will be able to take off from the U.S. mainland and penetrate the Soviet Union at an altitude of only 200 feet to evade radar detection. It would then be able to fly to a recovery base completing the entire mission without need of refueling.

Or it can carry cruise missiles for a Soviet strike and return to the continental U.S. without need of refueling.

Let me be even more graphic to illustrate the B-1B's mission capability and flexibility. A few minutes ago I mentioned the B-25

raid on the Japanese mainland in the early days of World War II.

Just think of the immensity of that under- taking. Besides the months of planning and training it required the following minimums:

An aircraft carrier, the USS Hornet, with all its crew and support equipment.

A complement of support ships, with all their crews and equipment, to protect the carrier.

Sixteen B-25s, carrying a combined weapons load of 64 500-pounders.

Eighty airmen, led by Colonel Doolittle.

The airplanes left the deck of the Hornet when they were about 800 nautical miles from Tokyo. After conducting the raid they were supposed to recover as best they might on the Chinese mainland. We all remember what a hit and miss proposition that turned out to be. There was the loss of life and many of the airplanes ran out of fuel. Doolittle, himself, bailed out over China and was lucky to survive.

Now what could a single B-1B have done on the same raid?

Well, right off the bat, one B-1B could have carried more 500-pounders than the entire complement of 64 which the Doolittle Raiders had on board their 16 B-25's.

Then, too, there's the tremendous range of the B-1B. Carrying more payload than all the Doolittle Raiders combined. The B-1B could have left the continental United States just before dawn and flown all the way to Tokyo. After completing its mission, the B-1B could have flown all the way back to its U.S. base in Alaska and been there in time for the dinner hour at the club.

All this nonstop, without need for refuel-ing—in fact with plenty of fuel to spare.

All this with survivability enhanced be-cause of high speed and on board counter-

All this with only one airplane instead of 16, and four airmen instead of 80.

All this without the stupendous expense of an aircraft carrier and support ships and

all their crews and equipment. Looking at all that. I think you could say

the B-1B has capability. The B-1B production program calls for 100 aircraft to be produced at the cost of \$20.5 billion, expressed in 1981 dollars.

The North American Aircraft Operations of Rockwell is the over-all systems contractor on the program. General Electric is responsible for the engines. Boeing is producing the offensive avionics for the aircraft, and AIL, a division of EATON, is producing the defensive avionics.

The production schedule is ambitious, but we are determined to beat it. The contract calls for the first B-1B to be delivered to the Air Force and enter flight test in March 1985. That's 38 months after contract goahead. Any veteran aircraft builder will tell you that's a very short time, indeed when it comes to a very advanced aircraft like the B-1B. But we're even ahead of that time line. We're nearly three months ahead of schedule and intend to remain so.

The first fifteen B-1B's will be delivered in 1986 and the 100th aircraft will be completed in early 1988.

As I indicated, since going on contract with the Air Force on January 20 for the B-1B full scale development and production go-ahead, we have made outstanding progress on the program at Rockwell.

All our major subcontractors throughout the United States have been turned on full bore. They will build approximately 55 percent of our portion of the aircraft so B-1B

production is national in scope.

Our facilities expansion program is in full swing at Rockwell. We occupied a new 341,000 square foot engineering building in January. In March we began construction of an \$83 million. 950,000 square foot final assembly complex at Palmdale, California, In all we will have more than seven million square feet of space for the program at Rockwell.

We are on plan with other capital investments. The first deliveries have been made of major milling machine components for the heavy machining centers at our El Segundo, California and Columbus, Ohio plants. The order has a approximate value of \$40 million. In addition, more than \$20 million in key high technology equipment is in place or on order. Rockwell's total capital investment in the B-1B program will be more than \$400 million.

Our manpower build up is going forward as planned at El Segundo, Columbus, Ohio, Palmdale and Tulsa, Oklahoma. We anticipate no significant manpower problems. Our buildup requires no steep climbs since we started with a proven cadre of veteran B-1B employees. At the peak of production in 1986/87, more than 20,000 Rockwell employees will be working directly on the B-1B employment will be approximately 55,000. That will involve more than 3,000 subcontractors and suppliers in addition to Rockwell. Boeing. AIL and General Electric.

On many other fronts we are on or ahead of schedule. More than 21/2 shipsets of stored B-1 assets are being speedily put back into work. The first B-1B parts have been fabricated. In fact, the production goahead occurred on January 20, and only nine days later the first part for the B-1B was made. To date we have over 1.500 new parts fabricated. More than two-thirds of the needed structural engineering drawings have been released to manufacturing. We have over 30,000 tool orders and manufacturing directives issued to the shop so we're well on our way. The program is going extremely well. I believe that we are going to meet or beat all of the delivery schedules that I mentioned.

That, in a nutshell, is the status of the B-1B program.

But, let me emphasize, again, people build aircraft, not companies

So it is with the B-1B.

It will be an airplane which fits right into the tradition of the great airplanes produced at Rockwell, built by very dedicated people. The T-6, the P-51, the B-25, F-86, F-100 and X-15, now the B-1. Thoroughbreds all.

Thank you.

## A TRIBUTE TO KANSAS UNIVERSITY

# HON. LARRY WINN, JR.

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES Thursday, December 16, 1982

Mr. WINN. Mr. Speaker, for 16 years, I had the opportunity of representing the University of Kansas in Lawrence. Because of redistricting, Lawrence and Douglas Counties are no longer in the Third District. My association with the university will not be as direct, but I will still be very close to KU, my alma mater.

I will miss representing the University of Kansas-its fine faculty and students, the physical beauty of the campus on Mount Oread, and the excellent curriculum the university possesses. I will miss dealing with the need and problems of a major university like KU even though I will remain an active member of the alumni association, which is one of the best in the

I graduated from KU in 1941 and I have always been thankful for the educational opportunity it provided me. In addition to the academic credentials I was able to secure, KU gave me a strong sense of loyalty to the university in particular and the State of Kansas as a whole. I will never forget walking down the hill on graduation day and feeling the deep pride associated with graduating from college-especially a school like KU. Of course, you might say I am partial and prejudiced, but let me point out that recently, my alma mater received national recognition from a variety of publications for its academic standards and I thought it would be appropriate, at this time, to pay tribute to a great university.

Washingtonian magazine, in its December issue, included Kansas among a group of universities that provide a top-flight education at a reasonable cost. In these days of rising tuition and fees, KU remains very affordable to the thousands of undergraduate and graduate students who matriculate there every year.

"Kansas is a comprehensive, doctoral granting institution that, in selective areas, has some of the finest programs in the country," writes Edward B. Fiske, author of the "New York Times Selective Guide to Colleges." Fiske describes the campus as "beautiful, sitting atop Mount Oread." The Changing Times is another publication which rates KU as a desirable university at a reasonable cost.

Another aspect of KU that makes me especially proud are the caliber of its graduates. Many KU alumni have moved on to successful careers in all walks of life and all of them remember vividly the impact that KU had on their lives. I remember the second Space Shuttle launch when astronaut Joe Engle, a KU graduate, took the university flag with him while in orbit. Later, he proudly presented the flag to KU in a ceremony at the halftime of a football game. Joe presented the flag with pride and appreciation to Chancellor Gene Budig epitomizing the spirit of Jayhawk graduates.

I bid the main campus at KU an official goodby, but Mount Oread will always be a special place to me and I intend to remain a loyal alum and a good friend of the University of

Kansas.

I continue to be proud representing the University of Kansas Medical School in Kansas City, Kans.

## "FROM CUBA WITH HATE"

## HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES
Thursday, December 16, 1982

• Mr. DORNAN of California. Mr. Speaker, never has an article been more aptly entitled than Peter Michelmore's "From Cuba With Hate," in the current Reader's Digest. I am submitting this article to inform the Members of Congress of the darker implications of one ugly aspect of this Nation's unprecedented crime wave.

# FROM CUBA WITH HATE (By Peter Michelmore)

Claribel Benitez was a pretty 19-year-old who worked as a receptionist in a legal office. She lived with her parents in an apartment on NW 37th Avenue, in a middle-class section of Miami. Early one evening she agreed to drive her brother Leo to a used-car lot to inspect an automobile. In the manner of well-brought-up Cuban-American girls, she left a note for her parents explaining her absence.

On the way back home, Claribel detoured into the neighborhood shopping plaza. Leo wanted to be dropped off at a supermarket to see his girlfriend. It was a little past 9:30 p.m., March 12, 1981. Stores around the perimeter of the brightly lit plaza were empty-

ing of late shoppers.

Claribel kept the motor running while Leo hopped out and hurried into the market. As Claribel began slowly driving away, the car door beside her was wrenched open. She looked into the face of a dark-haired stranger with a gun in his hand. As the gunman pushed Claribel across the seat to make room for himself behind the wheel, a swarthy accomplice scrambled through the back door. The gunman screamed a curse, and began shouting at the second man in Spanish. The accomplice had been ordered to invade the front seat, not the back to trap the girl between them.

While the argument raged, Claribel reached about the floor for a knife concealed there. Her fingers gripped the handle. Gamely, she struck at the gunman. The blade grazed his left hand and his side.

Startled, the man in the back seat raised a can of Mace and filled the car with the stinging chemical spray. Bellowing in fury, the gunman in front thrust his pistol at

Claribel's chest and fired.

Blood gushed from her wound as the two men leaped from the car. One was carrying Claribel's purse. The girl herself struggled to stay conscious. Propping herself behind the driving wheel, she had the car moving even as she saw her attackers join a third man in a station wagon. She weaved through the plaza for 80 yards, and then lurched across the main avenue to the parking lot of a roadside restaurant. She had friends there. Somehow she held on long enough to get out of the car and stagger inside, only to collapse on the floor.

Horrified waitresses rushed to her side.

"Caribel! What happened?"

She was slipping into delirium, fighting for coherence. A police officer, arriving just ahead of the ambulance, knelt to smooth her dark-brown hair. She looked up at him. "Marielitos," she whispered. "Three Marielitos..."

At 12 minutes past midnight Claribel died in surgery at Jackson Memorial Hospital. She had repeated Marielitos many times. To those who heard her, the word needed no

explanation.

They had come in the thousands during the spring and summer of 1980 with the great refugee tide from Cuba's Mariel Harbor, gaunt men with stone-hard eyes and crude tattoos on their bodies. Many had been released from prisons and put on the boats, but they carried no records of their past. They were just men from Mariel—Marielitos. The name set them apart from the host of true refugees.

Almost from the beginning there had been an uncommon menace about these men. In recent months it had become a reality. They had plunged into crime with a savagery and recklessness that bordered on lunacy. Other Cuban-Americans were ashamed of them and called them escoria

scum).

The American government, during the Administration of Jimmy Carter, had been duped by Cuba's Communist dictator, Fidel Castro. Under cover of the Mariel boat lift, Castro set among an open society a vicious new criminal force. The scope and predictable effect of his infamous deed should have been detected early, but it was not. To this day, Castro's outlaw invasion has not been recognized, or confronted nationally.

### "I'M THE BADDEST"

Through the 1960s and '70s, vast numbers of Cuba's most skilled and productive citizens had fled to the United States. In later years, people from the working classes joined their ranks. The revolution, supposedly the workers' revolution, could no longer even provide adequate food for their tables.

Demonstration of the discontent in Cuba was given on Easter weekend in 1980. Twenty-five Cuban men, women and children were inside Havana's Peruvian embassy at the time, claiming asylum. Radio Havana described them as lumpen, an expression meaning contemptible.

pression meaning contemptible.
In a typically theatrical act, Castro had the police guards removed from outside the embassy on Good Friday. Cuba could well do without hungry lumpen mouths, he said.

Let Peru feed them. But he badly miscalculated the numbers of his disenchanted. By Easter Sunday, when the guards returned in force, more than 10,000 citizens had Jammed into the embassy grounds. They included carpenters, mechanics, physicians, housewives, students.

Several countries, the United States included, offered to take a share of the fugitives. But plans for orderly transport were sabotaged when Cuba released 37 of the embassy crowd to a man who sailed free-lance from Key West to Cuba. Within a week, the waters between Forida and Mariel Harbor, about 30 miles west of Havana, were alive with boats. They ferried refugees pouring out from the embassy, the cities, the towns, the farms. Florida began taking them in at the rate of 3,000 and 4,000 a day.

To save face and turn the confusion to advantage, Castro decreed: "If they want ex-

coria, let's give them escoria."

Throughout the island, from Pinar del Rio to Oriente Province, local Committees for the Defense of the Revolution were instructed to flush out "undesirables." Under threat of punishment if they refused, exconvicts, homosexuals, suspected black-marketeers, vagrants and troublemakers were offered one-way passage to the United States. A huge, heavily guarded camp was established at El Mosquito plantation, near Mariel, as a departure base for the outcasts. They were taken directly from there to the docks and escorted aboard boats bound for Florida.

With no sign in Washington that the illegal boat lift would be blockaded, Castro extended his roundup to the prisons, insane asylums and juvenile-delinquent farms. Legitimate refugees were upset by what they saw as an attempt to stigmatize them. But they also reasoned that many of those released from prison would be political prisoners; others, men and women who had been jailed for such crimes as stealing shoes; still others, innocent victims of a justice system in which innocence was never presumed.

The fact was, however, that Cuba did have a substantial population of hardened felons. And, much more ominous, they had been incarcerated under such prolonged torment that many were mentally twisted or broken. Humanity was not forgotten in the prisons; it was lost. Men were objects for abuse. Sadism was rampant. Guards beat inmates with clubs and machetes. The toughest inmates preyed mercilessly on the weakest. Common criminals, a large proportion of them poor, ill-educated Afro-Cubans, were very often remade into psychopaths.

Typical of their experience was that of a man called Harpo. At age 36 he was a terminal convict, no trace left of the lad of 16 who was first jailed as a petty thief. His life was reduced to day-by-day survival, his world to a dark proving ground of his machismo. A man was measured by his capacity for violence. The meaner he was perceived to be, the more he was protected against being beaten, raped, robbed or killed by his fellows. Fights were unceasing in the open galleries of San Severino Castillo prison in Matanzas Province where Harpo was held. Victors wore their scars with a swagger. "I'm the baddest" was their common brag.

Harpo himself had not seen the sun in more than a year and was racked with a tubercular cough. Once, as punishment for escape, he had spend six months in solitary in a cell smaller than a closet. Stripped naked, lacking bed or mattress, he could neither stand upright nor lie full length. A thin

stream of water, operated from the outside, flushed his body waste through a drain in the floor. He knew of only one worse punishment. At some prisons the practice was to break spirit in a man by sealing him into a round, nine-foot-deep hole in the ground.

Tattooing, despised in conventional Cuban society, was high machismo. For criminals, it was like war paint. Harpo had had, since the early '60s, an image of Santa Barbara tattooed on his right upper arm. It was done by a cellmate who bound three sewing needles together and pricked at the skin with black soot collected from the burnt handle of a toothbrush.

In the same manner, other outlaws adorned themselves with religious figures, dragons, mermaids, ships, swords and castles. Girls' names and such strangely sentimental phrases as "Without you, I am nothing" were included in the skin gallery. Tattoos covered the entire torsos of some of them. The toughest had numbers and names pricked painfully inside their bottom lips, on their eyelids, even on their genitals. The web of the hand, between thumb and index finger, was used for domino dots, stars and hearts. These hand designs sometimes denoted membership in a macho prison gang. Gangs, for mutual protection or mass attack, were pervasive in the prisons.

#### THE EASY ROAD

Of the 125,000 Cubans who crossed from Mariel before Castro closed down the harbor in September, it was later unofficially estimated that about 25,000 were criminals. The Castro regime refused to give an accounting, and the American social workers and sociologies who interviewed sample groups came up with different numbers.

Officials of the immigration and Naturalization Service (INS), ignorant of the significance of the tatoos, identified fewer than 2000 of the criminal outcasts at the screenings of the new arrivals. These people either confessed a criminal past or were pointed out by refugees who knew them. Most were sent to the federal penitentiary in Atlanta. The State Department tried to get Castro to take some of them back. He flatly refused.

"What happened was unprecedented, unexpected and explosive," said State Department spokesman Arthur Brill, explaining the government's handling of the invasion. "There was an attempt to screen the criminals from the rest of the Cubans, but how do you do that? I dare you to line up 300 Cubans without record books and pick out the three or four criminals. It's very, very difficult."

About half of the throng were released directly to family or friends. The rest—including most of the escoria—were transported to live-in processing centers at Florida's Eglin Air Force Base, and at the Army bases of Fort Chaffee in Arkansas, Fort McCoy in Wisconsin and Fort Indiantown Gap in Pennsylvania.

Pennsylvania.

There they remained until relatives or other volunteers were located to sponsor them. Sponsors had only to register their names and addresses, guarantee lodging, and promise to introduce the newcomer to American society. In the early weeks there were long lists of them. The majority were family members or well-meaning citizens. Others were seeking cheap labor. Still others mistakenly thought they would receive monthly compensation from the government.

A patchwork of federal agencies proved inadequate for any careful selection of sponsors. Immigration officers issued visas, or I-

94 forms, placing the Cubans on parole. They were described as "entrants," and treated as applicants for asylum rather than true refugees. This entitled them to take jobs and receive food stamps. As each entrant left detention, his records went to the appropriate district INS office. Soon they were scattered all over the country.

An underworld of Marielitos took root with amazing speed. The word was passed, and they knew exactly where to go—which streets, which houses—to join their own kind. And in their turn, they sponsored comrades from the detention camps. Established Hispanic criminals hired Marielitos pull robberies. Some wormed their way into the narcotics business as runners and hit men for Colombian bosses. A few hired out to auto-theft rings. Mostly, however, they rar in their own packs. With the proceeds of crime, they armed themselves with handguns, shotguns and M-1 carbines. Firepower was machismo.

American justice was not in the least intimidating to the Marielitos, and this accounted in part for the brazenness of their crimes. They knew they could not be deported, and, as the problem evolved, the INS was devoid of any policy or procedure for dealing with them. They were treated in the same manner as any American citizen charged with a crime—pretrial release or detention, court hearings and, if convicted, probation or imprisonment at local or state institutions. After Cuba, it was an easy road

For homicide departments in Florida's Dade County, preoccupied with the slaughter brought on by the drug wars, the problem with the Marielitos seemed at first to have its own solution. They were so reckless and mentally unhinged that they would wipe each other out.

A partial police listing of Mariel deaths in

Dade County explained the notion:

Rolando Rodriguez, 55, stomped to death and Reynaldo Carbonell, 62, beaten to death by the same Marielito, who felt he was "doing society a favor by getting rid of all the escoria."

Enrique de Juan, 35, shot in the head by another Marielito in an argument over \$10. Armando Arancibia, 21, stabbed to death on the outskirts of Miami's Little Havana.

Jorge Vita, 26, shot to death on a sidewalk in Little Havana. Vita wore an ax in his belt. Juan Valdez, 32, shot by his partner as they tried to rob a store on Okeechobee Road. Hisleah.

This last killing was talked about by police as a typically crazy Marielito crime. Valdez walked in the store with a confederate who pulled his gun and announced a stickup. When both the store clerk and Valdez failed to open the cash register, the confederate went into a tantrum. He reached over the counter and struck the clerk with his gun, which accidentally went off and mortally wounded Valdez.

The Marielitos seemed indeed to be less of a threat to the general community than to one another. But that theory was shattered in Miami the night they shot Claribel Benitez, a truly innocent victim.

#### GOVERNMENT NEGLECT

In the short span of two years a criminal force of rogue men, Castro's escoria, has embedded itself in American society. It is concentrated in Florida, New York, New Jersey and Pennsylvania, but police in those states say it is spreading. Many of the last Cubans held at Fort Chaffee were sent to correctional institutions in Missouri and Kentucky and to halfway houses in Illinois

and Washington State. They are eligible for release. Predictably, they will link up with others, and they will be dangerous.

Police officers and local courts must necessarily continue to bear the brunt of the task of bringing Marielito outlaws to justice, but they deserve and need the help of the federal government.

The State Department should apply every diplomatic pressure to Fidel Castro to receive deportees. Presently, Marielito felons are being returned to U.S. society once they have served sentence.

The Justice Department should assume responsibility for the incarceration of Marielito felons, who are now doing time in city jalls and state prisons. (The Federal Bureau of Prisons took more than 50 of them off Florida's hands in June, but this was a special arrangement and not a change in policy.)

The Department of Justice must also direct one of its agencies to establish a central file of arrest records that can be tapped by all police departments, or, alternatively, develop the METS data bank in Harrisburg to its full potential.

The Dade County Grand Jury has found the "federal policy of benign neglect to be unconscionable." The facts show this conclusion to be completely justified. The federal government let the criminals into America; the government must either get them out or put them where they can do no further harm.

# COMMENDING ALBERT LEE SMITH

# HON. TRENT LOTT

OF MISSISSIPPI

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 16, 1982

• Mr. LOTT. Mr. Speaker, I wish to take this opportunity to commend my good friend and colleague, Albert Lee Smith, for his many accomplishments during the 97th Congress. He has been a quality legislator who has served his country and constituents well.

ALBERT LEE SMITH is a man of compassion who lives his values to the fullest and who makes a powerful statement for his beliefs through daily actions. America needs more persons like Albert Lee Smith in policymaking positions.

One of the characteristics that sets him apart is his understanding that it is the impact of politics upon our familles, our freedom, and our economy which is creating our problems. He approaches economic decisions with sensitivity and takes a refreshing, positive approach because he believes we can and should have growth and opportunity.

As a member of the powerful House Budget Committee, Albert Lee Smith is well aware that the course to recovery involves difficult choices that must be made with compassion, but, at the same time, realizes our society has grown used to something-for-nothing expectations. He knows the importance of controlling our budget and

the bureaucracy, and he was instrumental in our successful fight against inflation. And, he has worked consistently and diligently to lower taxes, and to remove bureaucratic control from our lives.

With regard to foreign affairs, Albert Lee Smith approaches policy-making with commonsense. He realizes the stark but unavoidable truth that the Soviet Union has not mellowed and that the goals of communism remain world domination. Albert Lee Smith is a man of peace, but he has acted to repair the sagging state of our defenses for our own best interest, knowing that preparedness is our best defense against blatant aggression.

I am pleased to have served with ALBERT LEE SMITH in the 97th Congress, and I encourage him to continue his involvement in the affairs of our country.

TED HENSHAW

# HON. M. CALDWELL BUTLER

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES Thursday, December 16, 1982

• Mr. BUTLER. Mr. Speaker, It has been my great privilege to be a part of the American Delegation to a number of meetings of the Interparliamentary Union. I had the opportunity to work closely with Ted Henshaw on several occasions in which he was also a member of our delegation. I enjoyed getting to know him better and to observe the stature he has with his counterparts in the other parliaments of the world.

Ted Henshaw is a very able public servant, and has given most generously of himself in carrying out his duties as Clerk of the House of Representatives. I value his friendship and appreciate his efforts.

I join with my colleagues in wishing him, his wife Barbara, and his family a most pleasant retirement.●

# PAUL FINDLEY

# HON. CHALMERS P. WYLIE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES Tuesday, November 30, 1982

Mr. WYLIE. Mr. Speaker, soon after I was elected to Congress, I had occasion to visit with my former minister at North Broadway United Methodist Church, Dr. Lance Webb. He was then Bishop of Illinois and a constituent of Congressman Paul Findley. Bishop Webb said Paul Findley is a good man and suggested I get acquainted with him. We had a friend in common, so I got to know Paul pretty, well. I came to respect his judgment on agriculture matters and knew he would always give me sound advice on any bill

coming from the Agriculture Commit-

I came to know him as a person of deep concern and dedication to his job.

His courage in taking an unpopular stand on Mideast problems no doubt contributed to his defeat. One day I asked Paul why he did it. He said with characteristic frankness, "There has to be debate on the problems of the Mideast, and you can't solve the problem if one of the principals is excluded."

I did not always agree with Paul on his observations from his Foreign Affairs Committee assignment. But I always respected him as an honorable person who sought to do what he believed to be right. The House is losing an exceptional legislator of intelligence and industriousness. Paul has made a lasting, valuable contribution to our country.

It has been a pleasure to serve in Congress with PAUL FINDLEY. Marjorie and I wish for him and his wife Lucille our very best, knowing they will be active in espousing the ideals in which they believe.

## BILL BRODHEAD

## HON. JAMES M. SHANNON

OF MASSACHUSETTES

IN THE HOUSE OF REPRESENTATIVES Wednesday, December 8, 1982

• Mr. SHANNON. Mr. Speaker, I want to join with my colleagues who have already participated in a special order honoring Representative BILL BRODHEAD. It is with great regret and hope that I watch BILL leave the House for he has done much for this Congress, his district, and our country.

Congress, his district, and our country.

He has showed us that integrity and innovation, hard work and a sense of fairness can shape good legislation. He has also brought to our attention the need to overcome some of the disadvantages of serving in the House.

The 17th District of Michigan that BILL has served, as well as the Nation as a whole, has had some tough economic times recently, but he has not hesitated to address the demanding issues. The auto industry has been assisted by the House Auto Task Force that he founded and cochaired, and the trade adjustment assistance program that he helped to obtain funds for compensates and retrains workers in industries hurt by foreign competition. BILL has fought hard to reform our tax system as well, to make it more equitable for all.

Also noteworthy is his concern for those who need his care and expertise the most: the elderly, the poor, the young, and the handicapped. Because of his compassion and diligence there is now more support for the services these people need.

BILL's election to the Democratic Study Group chairmanship is another indication of his outstanding leadership ability and keen understanding of the important legislation before us. He has recognized the need for expanded and improved legislative research and anlysis, made us aware of fresh ideas, and has worked energetically with coalitions to find the best possible solutions to today's difficult problems.

I admire the courage in Bill's decision to step aside, and I appreciate his sharing with us the reasons for this decision. His thoughts are ones we should continue to consider.

I will miss BILL's perceptive mind and wit, and his willingness to get involved. I wish him the very best.●

ANTI-JET LAG DIET FROM AR-GONNE NATIONAL LABORATO-

## HON, HAROLD WASHINGTON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES Thursday, December 16, 1982

• Mr. WASHINGTON, Mr. Speaker, I happened to learn that the Congressional Research Service had received inquiries about an anti-jet lag diet. The diet was developed by a noted biomedical researcher, Dr. Charles F. Ehret of Argonne National Laboratory. Argonne National Laboratory is a multidisciplinary research center with primary focus on nuclear power, basic research, environmental-biomedical studies, and alternate energy sources. The laboratory is operated for the Department of Energy by the University of Chicago. The university is located in my district. I am pleased to share the diet with my colleagues.

The diet grew out of studies of circadian rhythms, natural body cycles controlled by molecular "clocks" found in every cell of the body. Besides aiding travelers, this research has important implications for helping shift workers. Many nuclear power stations are using shift-rotation programs based on this research to help reactor operators adjust quickly to continually changing work shifts.

Anyone traveling across three or more time zones, such as coast-to-coast across the United States, can benefit from the anti-jet lag diet, says Charles Ehret.

Left to its own devices, the body normally needs 1 day to adjust for each time zone crossed. But proper use of the Argonne diet can help the traveler make the change in 1 day.

Thousands of travelers have used this diet to prevent or ease the discomfort and inconvenience of jet lag. The U.S. Army used Dr. Ehret's research to help devise plans for moving troops great distances and having them arrive alert and ready for action.

Many airline travelers are learning to prevent jet lag—or at least speed up their recovery times—by using the Argonne diet plan. Jet lag is a feeling of irritability, insomnia, indigestion, and general disorientation. It occurs when the body's inner clock is out of synchronization with time cues from the environment. The Argonne diet uses some of the same time cues that create jet lag to prevent it.

Time cues include meal times, sunrise and sunset, and daily cycles of rest and activity. These cues help keep the body on schedule and healthy. The Argonne diet uses a combination of time cues to speed the traveler's adjustment to a new schedule.

The diet requires a planned rescheduling of mealtimes, meal contents, and social cues to help reset the body clock. The trick is to prepare for the adjustment a few days ahead of time by carefully watching the amounts and types of food eaten at mealtimes. By the day of arrival, the body's clock has been reset by assuming the schedule of meals and activities appropriate for the new time zone.

For example, traveler begins the anti-jet-lag diet on Thursday, 3 days before a flight. Thursday is a feast day, to be followed by fasting on Friday, feasting on Saturday and fasting on Sunday. The day of the flight is always a fast day.

On feast days, the traveler eats three full meals. Breakfast and lunch are high in protein. Steak and eggs make a good breakfast, followed later by meat and green beans for lunch. Protein helps the body produce chemicals that wake it up and get it going.

Supper is high in carbohydrates. They help the body produce chemicals that bring on sleep. Spaghetti or another pasta is good, but no meatballs—they contain protein.

On fast days, the traveler eats three small meals. They are all low in carbohydrates and calories to help deplete the liver's store of carbohydrates. "We do not fully understand the reasons," say Ehret, "but this seems to speed the shift to a new time zone." Acceptable meals on fast days would contain 700 calories or less and might consist of skimpy salads, thin soups, and half-slices of bread.

Whether feasting or fasting, the traveler drinks coffee, or any other drink containing caffeine, only in the afternoon. This is the one time of day when caffeine seems to have no effect on the body's rhythms.

Sunday evening, the traveler boards the plane about 7 p.m. and begins the first phase of speeding up the body's internal clock to Paris time. He or she drinks several cups of coffee between 9 and 10 p.m., turns off the overhead light and goes to sleep.

About 1:30 a.m. New York time, the traveler wakes up—the coffee consumed before going to sleep may even help do this—and takes the final steps

that reset the body's clock to Paris time.

First, he or she eats a high protein breakfast without coffee—perhaps last night's supper saved until the new breakfast time. Most airlines will gladly agree to this request. The meal helps the body wake up and synchronize itself with the Parisians, who are eating breakfast at about the same time.

Second, having finished breakfast, the traveler stays active to keep the body working on Paris time. The other passengers are asleep, but the traveler is walking the aisles, talking to the flight attendants or working with a briefcase on the pull-down table in front of his or her seat.

Monday afternoon in Paris, the traveler has a high-protein lunch. Steak is a good choice. That evening, he or she eats a high-carbohydrate suppercrepes, for example, but with no high-protein meat filling—and goes to bed early

Tuesday morning, the traveler has little or no jet lag.

On the return trip, the procedure is reversed, with one change. Going from east to west, the traveler wants to turn the body clock back 6 hours so that upon arrival at, say, 10 p.m. New York time, the body's clock is not still set at 4 a.m. Paris time.

The same feast-fast-feast-fast procedure is followed as before, except that plenty of coffee is consumed the morning before the flight and the morning of the flight, but avoided in the afternoon and evening of both days.

After boarding the plane, the traveler again coordinates his or her schedule with that of the destination. The fast is broken with a large, high-protein breakfast at about the same time New Yorkers are eating theirs.

Ehret points out that the diet can be flexible. He says that if you do not have time to alternate feasting and fasting for 3 days, just fast on the day you leave. Follow the rest of the plan accordingly. It may not prevent jet lag entirely, but it will speed up the adjustment.

I hope my colleagues and their staffs who will be traveling for the holidays will benefit from this diet.

I also hope, that when the 98th Congress convenes in January, they will be mindful of the millions of Americans for whom traveling and dieting are not an issue.

#### HENRY REUSS

## HON. CHALMERS P. WYLIE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES
Tuesday, December 7, 1982

• Mr. WYLIE. Mr. Speaker, I feel truly privileged to have served with

HENRY REUSS in the House. He has been a great Member of Congress. HENRY is an extremely talented, highly respected Member of Congress who will be missed.

Henry has a genuine concern and warmth for people. In addition, he is one of the truly intellectual Members of the House. His range of knowledge is extraordinary, and even though you might not always agree with Henry, you know you will learn something if you listen to him.

He is, at the same time, a very hardworking person. With his brilliant, insightful, and energetic mind, he has made a lasting and significant contribution to our democracy.

He has a delightful sense of humor, a masterful command of the English language, and a loyalty to his friends which gains him admiration, respect, and the genuine affection of his many friends.

HENRY is a great credit to his hometown of Milwaukee. By choosing HENRY REUSS to represent them, the people of Milwaukee have helped make a sounder Nation.

In his work on the Banking Committee and the Joint Economic Committee, where I had the privilege to serve with him, Henry earned a reputation for integrity and dedication. He leaves Congress knowing that he has served his Nation with honor and distinction. We have lost an outstanding Member who will, indeed, be missed.

My wife Marjorie joins me in wishing for Henry and his wife Margaret the very best for a bright future and an enjoyable life ahead.

# TRAINING TERRORISTS IN U.N. CAMPS

# HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 16, 1982

• Mr. McDONALD. Mr. Speaker, as a member of the Armed Services Committee of the U.S. Congress, I am increasingly alarmed at the success of Soviet expansion backed by an ever-increasing Soviet military buildup.

For example, the United States has not built a new intercontinental ballistic missile since 1965—13 years ago. The Soviets have built and deployed thousands of missiles with nuclear warheads in a position to dominate Western Europe.

Parallel with its military buildup, the U.S.S.R. is rapidly advancing its "resource war" to place its surrogates in control of governments of countries in Africa where oil and strategic minerals such as chromium, uranium, and the platinum group are located. Without oil and critical minerals from the Mideast and southern Africa, the 16 industrialized countries of the West,

including the United States, will be subject to Soviet "blackmail" and cha-

otic economic disruption.

The United Nations, which costs U.S. taxpayers \$1 billion a year in hard-earned tax dollars, misuses millions of those dollars each year to finance Soviet-sponsored terrorists such as the Palestine Liberation Organization (PLO), the South West Africa People's Organization (SWAPO), and the African National Congress (ANC), which struggle to seize control of strategic areas such as Lebanon, Namibia, and Afghanistan, and impose Marxist dictatorships in furtherance of Soviet expansionism. Congress must act to stop U.N. misuse of American taxpayer money to subsidize terrorism.

I invite attention to the following article from the December 16, 1982, Washington Times which tells an ap-

palling story.

TRAINING TERRORISTS IN U.N. CAMPS

(By Thomas Gulick)

The military use of United Nations refugee camps by the Palestine Liberation Organization, which was revealed during the Israeli occupation of Lebanon, is just the tip of the iceberg. There is now considerable evidence that Soviet-backed guerrillas are also using U.N. camps in southern Africa and Central America for similar purposes. Even more disheartening is the fact that the United States is picking up the tab for 25 percent, and often more, of the operating costs of these training camps.

Recently captured PLO documents show that the Siblin Training Center, a U.N. trade school near Beirut, was used to train

PLO military recruits.

Yet another document intercepted by Israeli forces reveals that the PLO used U.N. International Force in Lebanon intelligence reports to monitor Israeli troop movements. The captured documents were dated May 26, 1981.

A Heritage Foundation report dated April 8, 1982—several months before the Israeli move into Lebanon—quoted Lebanese officials as saying the PLO had "transformed most of the (Lebanese) refugee camps—if not all—into military bastions." The charges were emphatically denied by U.N. officials.

As early as 1976, U.N. Secretary General Kurt Waldheim had been informed in writing that the PLO had installed "heavy weapons" in U.N. refugee camps in Lebanon. Lebanese officials also told Waldheim that the PLO had "even occupied the UNRWA (U.N. Relief Works Agency) offices in the camps." This was confirmed by the Israeli invasion discoveries.

The use of U.N. camps and "schools" in other parts of the world by Marxist terrorists has gone virtually unreported in the

press

For instance, in southern Africa, the Southwest African People's Organization, another Marxist guerrilla organization, is recognized by the U.N. as the "sole and authentic" representative of the Namibian people, even though there are some 45 political parties in that African country. The U.N. and its specialized agencies have allocated some \$40 million to SWAPO for U.N. programs begun between 1977 and 1981 and new programs slated for the 1982-to-1986 period

Among these programs is the SWAPOcontrolled Institute for Namibia, located in Lusaka, Zambia. Between 1977 and 1981, about \$1 million in U.N. funds went annually to finance the institute. In 1982 a handful of U.N. member-nations pledged an additional \$2 million. The United States' pledge of \$500 thousand for 1982 was by far the largest

While the institute is charged by the U.N. with responsibility to train administrators for a future independent Namibia, serve as an information center on Namibia; perform research on Namibia, and aid in the "struggle for freedom of the Namibian people" in practice, it would appear that only SWAPO members are accepted as students at the institute and that the school is used for

SWAPO military training.

Located in Zambia, the Institute for Namibia provides SWAPO with a strategic site for a military training center. With its common border with Angola—the point for which SWAPO launches its terrorist attacks into Namiba—a more suitable spot would be

hard to find.

One might ask why no U.N. members have questioned whether the Institute is being used by SWAPO to train officers and troops for guerrillas warfare in Namibia.

On March 28, 1981, New York Times correspondent Bernard Nossiter reported for Angola that yet another U.N. facility was being commandeered by SWAPO for its terror campaign—the Namibian Health and Education Center in Luanda, Angola. The camp is run by the U.N. High Commissioner for Refugees. Nossiter said SWAPO was using this camp to train students aged 5 to 18 as guerrillas to be returned to Namibia.

The Times newsman also said a nearby U.N. women's camp with a population of 25,000 seems to be SWAPO-dominated.

Further evidence of U.N. support of Marxist terrorism is evident in Botswana, just south of Zambia. Here, the African National Congress, a thoroughly Marxist terror organization aimed at overthrowing the government of South Africa, uses a U.N. refugee camp in Dukwe as a recruiting center for terrorists, according to military sources there.

And within the very borders of South Africa, the tiny country of Lesotho hosts another refugee center run the UNHCR auspices, which also is suspected of being an ANC recruiting center. Refugees recruited there and in Botswana are moved to military and terrorist training centers in Angola, Tanzania, Algeria, Eastern Europe and the U.S.S.R. This was confirmed in recent testimony by former ANC members during hearings before the U.S. Senate Subcommittee on Security and Terrorism.

In the Western Hemisphere, there also is strong evidence that U.N. refugee camps in Central America are being used to train Marxist guerrillas and terrorists.

A UNHCR camp at La Virtud, Honduras has supplied food and medicine to Marxist guerrillas staging raids into El Salvador, according to Heritage Foundation Latin American expert Richard Araujo. In addition, Araujo says, the French medical volunteer group, Medecins Sans Frontieres, which is part of the UNHCR operation in the Honduras refugee camps, is funneling intelligence reports to the Communist-oriented Sandanista army of Nicaragua.

It is high time the United States and its Western Allies demand a full internal investigation of U.N. aid and support for terrorist groups which operate freely in refugee camps in the middle East, southern Africa and latin America.

These investigative teams should include representatives of the United States and the Western nations, which pay the lion's share of the tab for the U.N. refugee program.

In addition, the U.S. Congress, General Accounting Office, and Central Intelligence Agency should conduct their own intensive investigation into all aspects of U.N. support for terrorist and guerrilla groups and subversives of all kinds—including those directed by the Soviet KGB, the U.S.S.R.'s secret police, which considers the U.N.'s New York headquarters its home away from home.

The United States and the West can make a bid dent in U.N. funding of international terrorism and Marxist guerrillas movement by cutting off all U.S. contributions to U.N. organizations backing terrorist and guerrillas cadres until this practice is stopped. U.S. taxpayers can help stop the flow of aid to terrorists simply by refusing to give their money to those at the U.N. who would abuse our trust and the legitimate needs of the world's refugee population.

#### NHTSA

# HON. JOHN L. BURTON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES
Thursday, December 16, 1982

• Mr. JOHN L. BURTON. Mr. Speaker, as chairman of the House Government Activities and Transportation Subcommittee of the Committee on Government Operations, I have had the opportunity to examine some of the vehicle defect investigations conducted by the National Highway Traffic Safety Administration (NHTSA), including the vehicle defect inquiry into General Motors' Corvair. The subcommittee staff's analysis NHTSA's Corvair materials revealed numerous deficiencies in the design and implementation of the NHTSA investigation, deficiencies Corvair which suggest that NHTSA must modify and improve its investigative procedures so as to better insure that defective automobiles are properly identified, so that they may be promptly recalled and not be allowed to remain on American highways.

During the 18 years since Ralph Nader first exposed the designed in defects of General Motors' (GM) Corvair automobile, much additional evidence has emerged from product liability cases, Government test, GM whistleblowers, former GM executives, and congressional investigations and reports-evidence that further documents and supports Mr. Nader's original thesis that the rear-engine Corvair was a menace to life and limb because of its marked tendency to go out of control and roll over, especially when cornering. This thesis was put forth in his bestselling book, "Unsafe At Any Speed" in which Nader claimed that Corvair accidents were caused by the tendency of the outside rear wheel to tuck under the chassis during turns. GM management concealed these defects from the public, Nader charged, and did not change the defective design until the 1965 model year, even though they were aware of the defects

as early as the late 1950's.

During those same 18 years since the publication of "Unsafe At Any Speed," General Motors has been working steadily and determinedly to shape the Corvair historical record, a record which, when unencumbered by GM roadblocks, reflects most unfavorably upon the social, moral, and legal stature of one of the world's largest manufacturing multinational corporations

and its management.

From a safety point of view, the evidence is clear, overwhelming, and convincing: General Motors manufactured and marketed 1.2 million unsafe Corvairs for the 1960, 1961, 1962, and 1963 model years, knew about the inherent safety defects, yet did nothing to correct them. From the point of view of honesty and integrity, the evidence is also clear, overwhelming, and convincing: General Motors has sought at every turn to conceal and suppress evidence showing that the Corvair was unsafe, and that GM did little to remedy a situation that was causing unnecessary death and injury on the highway. Taken as a whole, the record shows that in manufacturing and marketing the Corvair, GM acted in reckless disregard of human life.

As chairman of the Government Activities and Transportation Subcommittee, I have had a special opportunity to observe the operations of powerful interests seeking to work their wills on the Congress. GM has persisted in its attempt over the years to mold the history of the Corvair, sometimes by bending the facts, sometimes by suppressing the facts, and other

times by creating new facts.

Before reviewing the methods GM and its sympathizers have employed in attempting to wipe the slate clean on the Corvair, for the record, I will briefly outline the evidence on the safety of the Corvair—what GM knew about the Corvair's unsafe characteristics and when GM knew it. No amount of suppression or deception can overcome the weight of the evidence listed below, evidence that constitutes the bedrock of the case against GM and the Corvair:

One, GM's own secret proving ground reports detailing tests dating from 1959-63. These early tests (Proving Ground Reports (PGR) 11106 (June 1959) and 11543 (November 1959)) show that GM was aware of the Corvair's instability before production. They show the Corvair rolling over at speeds as low as 25 mph in simple j-turn—emergency obstacle avoidance—maneuvers.

Two, 1968 Ford Motor Co., test of the Corvair. Ford put the Corvair alongside of some of its own cars and ran them through lane change maneuvers. While none of the Fords had any significant difficulty with the maneuvers, the Corvair would often go out of control with the rear of the car losing traction, causing it to spin.

Three, Maurice Olley patent application. Maurice Olley, GM's preeminent engineer in the field of vehicle handling, filed a patent application in 1956 in which he was highly critical of rear-engine automobiles with swing axles, such as the Corvair.

Four, 1964 first change to new suspension. Corvair's 1960 suspension was chosen primarily for reasons of cost to the manufacturer, service, reliability, quality of ride, isolation of passengers from suspension, harshness and noise. Safety was not a major factor. Then, in 1964, GM changed to a modified rear end suspension, a more fundamental suspension change, known to GM for years, was introduced in the 1965 model year. GM tests made at the time indicated that safety was the

own Corvairs, model years 1960-63:
These tests showed that the dynamic quality of the current production 1963 Corvair was not substantially improved through practical modifications to shock absorber design and configuration \* \* \*.

primary reason for the change. In one

test description, GM implicitly admit-

ted the inherent unsafe nature of its

A 1964 prototype suspension installed in the car made the dynamic stability characteristics acceptable for

several different test conditions.

Five, 1971 GM tire test. This internal GM document states explicitly that the Corvair handling could become "unacceptable under some

driving conditions."
Six, DeLorean Book. In January 1980, J. Patrick Wright published a book based on his conversations with former GM engineer and group vice-president John Z. DeLorean. DeLorean expressed the following views

about the Corvair:

\*\* the Corvair was unsafe as it was originally designed.

In the high-performance Corvair, the car conveyed a false sense of control to the driver when in fact he may have been very close to losing control of the vehicle. The result of these characteristics can be fatal.

These problems with the Corvair were well documented inside GM's Engineering Staff long before the Corvair was ever offered for sale.

The questionable safety of the car caused a massive internal fight among GM's engineers over whether the car should be built with another form of suspension.

These men collectively—Charles Chayne, Von D. Polhemus and others—and individually made vigorous attempts inside GM to keep the Corvair, as designed, out of production or to change the suspension system to make the car safer.

Albert Roller, who worked for me in Pontiac's advanced engineering section, tested the car and pleaded with me not to use it at Pontiac.

Seven, October 1, 1959, Ford Motor Co. presentation to their executive committee. Ford ordered handling tests of a wide range of Ford and other make cars. The Corvair was tested and filmed. The film was shown to Ford's executive committee with the following explanation:

The handling and stability of the Falcon (Ford) are excellent. The Corvair with its rear heavyweight distribution shows marked instability under conditions of severe cornering and in passing. While the driver will not encounter difficulty under most normal driving conditions, there are frequently encountered emergency conditions such as slippery pavement or emergency maneuvering in which the driver cannot maintain control of the vehicle. The Corvair falls considerably short of our (Ford) handling standards.

Eight, testimony of Robert Ben-zinger, General Motors engineer in charge of the Corvair engine. On August 12, 1966, Benzinger gave a deposition in a case involving a man who suffered permanent brain damage as the result of driving long distances in a Corvair with a defectively designed heating system that permitted lethal carbon monoxide gas from engine-in the rear-to mix with the air entering the vehicle passenger compartment through the direct air heater. During the deposition, Benzinger admitted: (1) that any malfunction of the engine which permitted the emission of carbon monoxide would result in carbon monoxide being carried by the heating system into the passenger compartment; (2) GM knew that it was not possible to design with certainty an aluminum engine of the type to be used in the Corvair which would not malfunction and leak carbon monoxide; (3) GM had considered the possible danger of a carbon monoxide leakage from the engine and had therefore upgraded the quality of the engine seals and exhaust manifolds; and (4) GM had considered but had not adopted a shield device to prevent contact between engine cooling air and passenger compartment warming air. The state of the art in other vehicles was such that occupants were not placed at risk of breathing carbon monoxide fumes, as they were in the Corvair.

General Motors effort to whitewash this record first emerged publicly after the publication of Nader's book. In an attempt to intimidate the Corvair's primary critic, GM launched a private investigation of Nader. In January 1966, one of the detectives following Nader was detected in a Senate Office Building on Capitol Hill trailing Nader. When this incident was made public, GM's initial attempt at suppression began to unravel.

James Roche, then president of General Motors, later would go before a Senate committee and tell the assembled Congressmen and media:

To the extent that General Motors bears responsibility, I want to apologize here and now to the members of this subcommittee

and Mr. Nader. I sincerely hope that these apologies will be accepted. Certainly I bear Mr. Nader no ill will.

At these hearings, representatives of General Motors maintained, as they had throughout the controversy, that the Corvair was not an unsafe car, that the Corvair was, in effect, a safe car. As evidence to support these assertions. GM cited two jury verdicts which found that the Corvair's design was not the cause of the crash injuries involved in each case. But the Corvair juries and the Senate subcommittee that heard GM's testimony on March 22, 1966, were not getting the damning information that GM had stashed away in its files. They were not getting the warnings that the company received from its own engineer Maurice Olley, they were not getting GM's preproduction testing reports that detailed the flipping Corvairs on J-turns, nor were they getting all of the infor-mation about the carbon monoxide leakage problem and the safety problems attendant thereto. Subsequent juries in Corvair trials did bring in sizable verdicts against GM, not to mention many sizable settlements with plaintiffs that GM concluded.

In 1971, an investigation was launched by Senator Abraham Ribicoff's Senate Subcommittee on Execu-Reorganization to determine whether GM had misled the subcommittee. The resulting highly controversial Ribicoff report, written by two staff members, found that the subcommittee was not misled by General Motors. But the report came under immediate and justifiable criticism from quarters, including Ralph many Nader's staff which issued an eloquent, lengthy, and piercing rebuttal. The Nader staff report concluded that the Ribicoff report was "marred by faulty methodology, technical incompetence, and inaccurate assertions." "It read like a GM brief," wrote the

Nader report authors.

A close examination of the Ribicoff staff report reveals three problem areas that raise serious doubts about the accuracy of the report's conclusions. First, the staff refused to consider as relevant the most damning evidence against GM and the Corvair-the preproduction GM proving ground reports which detailed how Corvairs flipped over while maneuvering J-turns at moderate speeds. The report discounts these GM proving ground reports, first because they are "not representative of the practical driving environment." The staff here echos former GM president Ed Cole's assertion that the J-turn test are "violent maneuvers designed to overturn" the cars. In fact, most impartial experts agree that a J-turn test determines a car's response in an emergency reaction to a suddenly perceived obstacle in its path—not an uncommon occurrence. While probably no other

American cars could be overturned in such a J-turn test, a 1962 Corvair rolled over twice in a simple 28 mph J-

turn (PG 17103).

Another criticism that the Ribicoff staff had about these early GM proving ground reports was that they did not involve Corvairs identical to production Corvairs. In fact, the differences were insignificant. Modifications to the test cars were all minor changes to items such as shock absorbers and spring rates, modifications that have been characterized by GM engineers as "not significantly affecting the handling or stability of the Corvair."

The importance of these preproduction GM proving ground tests cannot be underestimated. Corporate criminologists consider them incriminating pieces of evidentiary material ranking right up with the "Asbestos Papers" and the "Thalidomide Files." The Ribicoff staff's failure to give substantial weight to these reports severely undermines the staff's primary conclusion that the subcommittee was not misled since "the performance of the 1960-63 Corvair compares favorably in stability and handling to similar contemporary cars."

Second, the Ribicoff staff uncritically accepted the conclusions of the July 1972 NHTSA evaluation of the Corvair, a report that put its stamp of approval on the car. The Ribicoff staff report virtually ignores the conclusions of physicist Dr. Carl Nash's detailed and reasoned critique of the NHTSA study. "A Critique of the NHTSA Defect Investigation of the 1960-63 Corvair Handling Stability,' by Dr. Carl Nash, December 2, 1973.

The Ribicoff staff accepts NHTSA's conclusions about the Corvair despite a gross testing irregularity that should have rendered the primary NHTSA conclusion about the Corvair's stability meaningless. Before NHTSA conducted its tests, the Corvairs were weighted down with 615 extra pounds. This procedure is called heavy loading. There is strong evidence that indicates that heavy loading increases a car's stability. The evidence of heavy loading should have led any reasonable observer to strongly question NHTSA's conclusion that "the handling and stability performance of the 1960-63 Corvair does not result in abnormal potential for loss of control or rollover." The Ribicoff staff's acceptance of this conclusion, coupled with an overriding obsession with secrecy 1, raises important questions of impartial judgment and bias.

Even more damaging to the report's conclusions was the revelation in 1973 that NHTSA engineers had secretly removed the 615 extra pound weight, then retested the Corvair. The Corvair

overturned repeatedly during these tests. The NHTSA engineers withheld this information until after the release of the NHTSA and Senate reports.
